[Do I Have “A Mind” That Is Fixed and “Mine”?](#)

4.9.4.1 Do I Have “A Mind” That Is Fixed and “Mine”?

August 30, 2018

You may want to read the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” first to have the proper background.

1. Let us take a step back and systematically see what happens when we “see” a tree for example. Please don’t just read through, but stop and think about each point. There is a lot of information condensed in this post (true for most posts, but especially this one).

- Light reflected off of the tree falls on our eyes and an image of the tree is formed in the back of the eye. That is a really small image that falls on the retina, but we “see” its numerous leaves, individual flowers, fruits in great detail. How is that possible?
- Anyway, that image is transmitted to the brain in terms of a chemical signal. How does the brain “see” the tree?
- Someone who has thought a lot about this issue is Jeff Hawkins, who is actively engaged in artificial intelligence. In his book, “On Intelligence”, he discusses current scientific knowledge on vision and other sense inputs.

2. Starting on p. 55 of his book, Hawkins discusses how the image that falls on the back of the eye is transmitted to the brain: “Visual information from the outside world is sent to your brain via a million fibers in your optic nerve...”

- “You can visualize these inputs as a bundle of electrical wires or a bundle of optical fibers...” and “The inputs to the brain are like those fibers, but they are called axons, and they carry neural signals called ‘action potentials’ or ‘spikes’, which are partly chemical and partly electrical...”
- As discussed there, not only visual signals but all sense inputs (sounds, taste, smell, and body touch) to the brain are of the same type. You hear sound, see light, and feel pressure, **but inside your brain there isn’t any fundamental difference between these different types of neural signals.** An action potential is an action potential.
- **Scientists have not been able to figure out how the brain distinguishes those different types of signals.** Moreover, they have no idea how the mind “sees light” or an image of that tree.

3. To quote more from that book: There is no light inside your head. It is dark in there. There is no sound entering your brain either; it is quiet inside. In fact, the brain is the only part of your body that has no senses itself. A surgeon could stick a finger into your brain and you would not feel it. All the information that enters your mind comes in as spatial and temporal patterns on the axons.

- **So, it is a mystery how those chemical and electrical signals coming to the brain are sensed as vision, sound, taste, smell, and body touch by the mind.**
- Scientists are trying to solve this puzzle by looking for answers in the brain. They have come to the end of the line here.
- Now let us see how the Buddha described these processes.

4. **Actual “seeing” (and hearing, smelling, etc) goes on at the *hadaya vatthu* located in the *gandhabbā* or the mental body.** The *gandhabbā* is like a very fine mesh overlapping the physical body, with the *hadaya vatthu* located close to the physical heart. That is what gives life to the physical body.

- At the death of the physical body that fine *gandhabbā* is pulled off the physical body like a ghost. It is so fine that we cannot see it. But we all know that a body can be alive one second and then become totally inert (like a piece of wood) at death.
- Of course, when the *gandhabbā* comes out **temporarily (as in the case of those who can do astral travel or in the case of out-of-body experiences)**, it is still “attached” to the physical body and keeps the physical body alive. In “astral travel” terminology, it is said that the mental body is attached to the physical body via an invisible “silver cord.”
- Such cases are discussed in, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

5. Another key point is that in the fine body of the *gandhabbā*, there are five “*pasāda rūpa*” located around the *hadaya vatthu*: *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya*, that correspond to seeing, hearing, smelling, tasting, and touch. **Here is the “missing part” of the puzzle that the scientists will never be able to solve just by dealing with the brain:**

- The brain is like a very sophisticated computer that analyzes those chemical and electrical signal discussed above in #2 and #3.
- **Those chemical and electrical signals (which come in packets of about 10 millisecond duration per scientists) are converted to electromagnetic (EM) waves and are transmitted through air to the *pasāda rūpa* located around the *hadaya vatthu*.**
- **This is what the Buddha taught 2000 years ago and until scientists make this connection, they will not be able to proceed too far from where they are now.**

6. Of course, the Buddha did not explain it in terms of EM waves. These waves are called “*kirana*” in Pāli or Sinhala.

- This is explained in the post, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#)” and other posts in the following subsection: “[Citta and Cetasika](#).”
- It will take a real effort to understand the details, but it will be worthwhile the effort for those who are serious about learning *Abhidhamma*. Otherwise, just try to get the basic idea.

7. As an example, let us take the case of seeing a tree. A continuous series of “data packets” (chemical and electrical signals per #3, #4 above) that come to the brain from the eyes are processed by the brain and are converted to EM waves (*kirana*).

- Those waves then travel to the *cakkhu pasāda* that is located close to the *hadaya vatthu*. These waves from the brain to the heart area of the body travel in air much faster than those chemical/electrical signals traveling from the eyes to the brain via axons.

8. When such an EM wave (*kirana*) packet arrives at the *cakkhu pasāda*, it hits the *hadaya vatthu* and “transfers” that visual information about the tree to the mind. **The mind is actually born momentarily during this transition for the duration of that signal.**

- This is what is meant by, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.” Here *cakkhu* is the *cakkhu pasāda rūpa* (**not the physical eye**) and *rūpa* (in “*rupeca*”) is the **signal from the brain**

that carries the visual signal about the tree (not the actual tree!). [*uppajjati* : [u + pad + ya] to be born; arises.]

9. This is CRITICALLY important to realize. What meant by a “*rūpa*” is NOT the same as what our visual object is. We DO NOT see a man, woman, or a tree. What comes to the mind is a “*rūpa* signal” that is generated by the brain. That signal has all the INFORMATION about that visual object.

- The reception of the visual signal (*rūpa*) by the *cakkhu pasāda* (*cakkhu*) happens at the very moment that the *cakkhu pasāda* transfers that signal to the *hadaya vatthu* by “hitting it.” And at that very moment, *cakkhu viññāṇa* arises: “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam.*”

10. These are critical points to understand, even if all the details are not understood. The visual consciousness arises for a brief moment when that information about the visual object is transferred to the mind.

- However, within that split second, not only the object (the tree in this case) is recognized, but also *vedanā*, *saññā* (recognition), and other mental factors also arise.
- For example, if we have seen that tree in the past, the *mansikāra cetasika* is able to feed that information too, so we will know the name of the tree instantly; see, “[Amazingly Fast Time Evolution of a Thought \(Citta\).](#)”

11. In another example, let us think about what happens when we tap a glass with a spoon. Of course, we will hear the tapping sound.

- Now, where did that sound come from? Was it in the glass? No. Was the sound in the spoon? No.
- The sound was emitted as a result of the spoon hitting the glass. If the spoon did not hit a glass, there would not be a tapping sound.
- In the same way, unless a “*rūpa*” or an image taken in by the eyes came to *cakkhu pasāda* and made it hit the *hadaya vatthu*, there would not be a “seeing event” or a *cakkhu viññāṇa*.

12. So, there is no “entity” called the mind. The mind arises when we receive sense inputs via the five physical senses as described above.

- What we loosely call the “mind” is actually the *viññāṇakkhandha* that arises in a billionth of a second, after going through a fast process of *citta*, *mano*, *manasan*, ...: “[Amazingly Fast Time Evolution of a Thought \(Citta\).](#)”
- We can not only hear the tapping sound, but we can also see the glass and the spoon at the same time too. But those two events do not really happen “at exactly the same time.”
- What comes to the mind is a series of sense inputs (via all five physical senses) in rapid succession. We just perceive it all to happen at the same time.

13. How this is possible is explained in the post, “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)” and other posts in the following sub section: “[Citta and Cetasika.](#)”

- As explained there, the process is similar to how a motion picture works. When making a movie, what is actually done is to take many many static pictures and then play them back at fast enough speed. If the playback speed is too slow, we can see individual pictures, but above a certain “projection rate”, it looks like real motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](#)

14. When we see the outside world, what happens is very similar to the above. At the end of the video it is stated that the “movie” we see is an illusion, and as the Buddha explained, that holds for real life as well. In real life when we see someone coming towards us, what we actually see is a series of “static pictures” or *citta* projected at a very fast rate in our minds, giving us the illusion of a “movie like experience.”

- The mind is very fast. The Buddha said that there is nothing in this world that is faster than the mind. So, this is why we feel that all types of sense inputs come to “one’s mind” at the same time. **In reality, they are discrete snapshots, just like movie frames!**
- But just like we see a continuous movie (that is really a large number of individual picture frames), **we feel like we have a continuous mind.**

15. Now to the second issue on the mind. Why do each of us experience the outside world our own way, and have our own feelings and perceptions about a given sense input (love or anger when seeing the same person, for example)? That is why we feel like “I have **my own mind.**”

- The key is to realize that our response to the external sense inputs is unique because we have our “own way” of perceiving and the evaluating those sense inputs based on the set of *gati* that we have.

16. As we discussed in the previous post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#),” **our feelings as well as our initial responses reflect our personality or our *gati*.**

- There we also discussed why the types of sense input also plays an important role. So, our INITIAL response to an external sense input depends on BOTH; one’s *gati* AND the types of sense input.
- That was an important post, so it may be beneficial to go over it again. In this series of posts, I am going to try to highlight some key features of Buddha Dhamma that will truly help to get rid of *sakkāya diṭṭhi*. That is the key to the *sotāpanna* stage.

17. In other words, our “state of mind” depends on both our *gati* and the sense inputs that we are subjected to. Furthermore, we don’t have “a fixed mind”; it can change very rapidly.

- If you think back, I am sure you can remember times where you felt like your mind was filled with greed; other times with love; yet another time with anger, ...
- As one progresses on the Path, these extreme swings of “one’s mind” will become less, and that is the key to *nirāmisa sukha* which eventually leads to *Nibbāna*.
- Each of us does not have a fixed mind. That means we don’t generate “our own” *saññā*, *vedanā*, *saṅkhāra*, *viññāna*. In other words, we do not have our own *saññākkhandha*, *vedanākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.
- Moreover, it is not fruitful to take any of them as “mine.” That perception is part of *Sakkāya diṭṭhi*.

18. *Sakkāya diṭṭhi* can be stated as: “I am my body”, “I am my *vedanā*,” “I am my *saññā*,” “I am my *saṅkhāra*,” and “I am my *viññāna*.” The last four can be lumped together to label as, “I am my mind.” But a better way to remove *Sakkāya diṭṭhi* is to realize that: “All those entities are not worthwhile to be taken as mine.”

- We tend to think automatically that “I have my own body” and “I have my own mind”, and “it is fruitful to be taken them as mine.”
- Let us first analyze the mind and see whether that statement is true. In the next post, we will address “I have my own body” and “it is fruitful to be taken as mine.”
- In order to understand what the mind is, the Buddha analyzed **how the mind arises** step-by-step, by breaking down the process. That is why he called himself a “*Vibhajjavādi*”; see, “[WebLink: suttacentral: Subha Sutta \(MN 99\)](#)”: “*Vibhajjavādo kho ahamettha, māṇava; nāhamettha ekamsavādo..*” or “Young man, I am a *Vibhajjavādi* (one who analyzes from many aspects by dividing a given process to parts), I do not hold a fixed view based on just one aspect.”

In the next post, we will discuss why it is not fruitful to take one’s body as “one’s own.” But it is important to know that the perception of “me” goes away only at the Arahant stage; see, “[Sakkāya Diṭṭhi is Personality \(Me\) View?](#).”

4.9.5 Nāmarūpa Formation

Dec 12, 2017

[Kamma Viññāna and Nāmarūpa Pariccheda Ñāna](#)

4.9.5.1 Kamma Viññāna and Nāmarūpa Pariccheda Ñāna

December 12, 2017

1. *Nāmarūpa* can have few different meanings depending on the context, i.e., where it is used. But the most important meaning is associated with the “*nāmarūpa pariccheda ñāna*.”

- When one has the *nāmarūpa pariccheda ñāna*, one understands how the mind is related to matter, i.e., how *viññāna* acts as the critical link between mind and matter.
- Here “*pari*” means “complete” or “comprehensive”; “*uccheda*” means to “cut off” or “eradicate.” Thus *nāmarūpa pariccheda ñāna*, means the knowledge or understanding how *nāmarūpa* via *kamma viññāna* at the “*viññāna paccayā nāmarūpa*” step in *Paṭicca Samuppāda* (PS).
- The two previous posts in this series provided more related information. This post wraps up that discussion; see, “[Viññāna – What It Really Means](#)” and “[Kamma Viññāna – Link Between Mind and Matter](#).”

2. It is also important to note that *nāmarūpa* can be of several varieties:

- When written as two words — *nāma rūpa* — *nāma* refers to mental attributes and *rūpa* refers to matter. There, *nāma rūpa* refer to mind AND matter.
- With *viññāna*, *nāma* COMBINES with *rūpa* and creates *nāmarūpa* — **imprints for future rebirths** — which eventually lead to fully-formed living beings. This happens at the “*viññāna paccayā nāmarūpa*” step in PS.
- These are very fine *rūpa* which are below the *suddhaṭṭhaka* stage created by *viññāna*, and are **part of dhammā**. Thus *nāmarūpa* are distinct from the more dense *rūpa* that we experience with the five physical senses; see, “[What are rūpa? – Dhammā are rūpa too!](#).”
- We also talk about *nāmarūpa* referring to visuals in our minds; these are also related to the fine *rūpa*. For example, an alcoholic will be visualizing scenes of a drinking party that he/she is planning to attend. That comes in *Pavutti* PS; see, “*Akusala-Mūla Pavutti* (or *Pravurthi*) *Paṭicca Samuppāda*.”

3. Here, it is significant to note that in PS, it is the “*viññāna paccayā nāmarūpa*” step that separates the previous steps involving the mind to those involving *rūpa*. Now we have “*nāmarūpa paccayā saḷāyatana*,” leading to internal *rūpa*.

- Then those *saḷāyatana* making contact (*phassa*) with with external *rūpa*: “*saḷāyatana paccayā phassa*.”
- Note that *phassa* means contact of internal *rūpa* (*saḷāyatana*) with external *rūpa*, and giving rise to *vedanā*: “*phassa paccayā vedanā*.” Now we are back to just *nāma*, i.e., *vedanā*.
- So, we can clearly see that *kamma viññāna* plays a key role in bridging *nāma* with *rūpa*.

4. *Kamma viññāna* with *kammic* energy are created in *javana citta*. That *kammic* energy may start small but can grow with repeated generation of *abhisankhāra* and can grow to be a *kamma bīja* that can give rise to a new *bhava*. That *kamma bīja* then gives rise to a very fine mental body (*gandhabba*) which will provide the “seed” for the dense physical body.

- This happens at “*upādāna paccayā bhava*” step giving rise to a *gandhabba*, which is a very tiny *rūpa* which is really a “packet of energy.”

- Then at the “*bhava paccayā jāti*” step, *gandhabba* enters a womb and starts a new physical body.
- Just like a tiny seed can grow to a huge tree by taking in water and nutrients from the soil, an unimaginably small *gandhabba* gives rise to the heavy human body by taking in food. **The only difference is that while a *gandhabba* or a human has a mind, a seed or a tree does not.**

5. Our solid physical body starts with a *gandhabba* — smaller than the first cell made by the reunion of mother and father (zygote) — descending to a womb and taking hold of that zygote in the womb. We recall that the Buddha also called this event as “a *viññāṇa* descending to the womb”; see, “[Gandhabba State – Evidence from Tipitaka](#),” and below. From the posts in this series, now we know why the “*gandhabba* descending” can also be called “*viññāṇa* descending.”

- The complex process of this single zygote growing into a adult human is discussed in, “What does Buddha Dhamma (Buddhism) say about Birth Control?.”
- **Therefore, the “seed” to bring up this physical body of several hundred pounds (tens of kg), was the *kammic* energy created in the *paṭisandhi viññāṇa* which gave rise to a *gandhabba* consisting of just a few *suddhaṭṭhaka*.**

6. This basic mechanism of how a *suddhaṭṭhaka* — the smallest unit of matter (billion times smaller than an atom in modern science) — is created with the mind was discussed in the post, “[The Origin of Matter – Suddhatthaka](#)” in the *Abhidhamma* section. **But in this subsection on *nāmarūpa*, we are discussing it with a more simple, fundamental analysis that everyone can understand (if the fundamentals are grasped).**

- Furthermore, those with *abhiññā* powers can intensify the *kammic* power in *javana citta* in *jhānā* (specifically in *jhāna samāpatti*), and create matter directly too. This enhancement can be compared to the difference between a regular lamp that puts out a bit of light, and a laser which puts out intense light that can cut through metal; see, “[Javana of a Citta – The Root of Mental Power](#).”
- When we dive deeper into Buddha Dhamma we will be able to see that some phenomena that seem “supernatural” (like creating a flower using mind energy) are indeed possible. But that ability to create matter requires purifying the mind to very high levels.

7. The Buddha described how the *paṭisandhi viññāṇa* (which is the same as the *gandhabba*) “descends” to the womb of the mother and starting the process in the “[WebLink: suttacentral: Mahā Nidana Sutta \(Dīgha Nikāya 15\)](#)” where he has the following exchange with Ven. Ānanda:

“*Viññāṇapaccayā nāmarūpan’ti iti kho panetaṃ vuttaṃ, tadānanda, imināpetam pariyāyena veditabbaṃ, yathā viññāṇapaccayā nāmarūpaṃ. Viññāṇaṅca hi, ānanda, mātukucchismiṃ na okkamissatha, api nu kho nāmarūpaṃ mātukucchismiṃ samuccissathā’ti? “No hetam, bhante.” “Viññāṇaṅca hi, ānanda, mātukucchismiṃ okkamitvā vokkamissatha, api nu kho nāmarūpaṃ itthattāya abhinibbattissathā’ti? “No hetam, bhante.” “Viññāṇaṅca hi, ānanda, daharasseva sato vocchijjissatha kumārakassa vā kumārikāya vā, api nu kho nāmarūpaṃ vuddhiṃ virūḷhiṃ vepullaṃ āpajjissathā’ti? “No hetam, bhante.” “Tasmātihānanda, eseva hetu etaṃ nidānaṃ esa samudayo esa paccayo nāmarūpassa—yadidaṃ viññāṇaṃ.*”

Here is the English translation:

“It was said: ‘With consciousness as condition there is *nāmarūpa* (normally translated as **mentality-materiality; which in this case is the *gandhabba***).’

How that is so, Ānanda, should be understood in this way: If **consciousness (*viññāṇaṅca*) were not to descend (*na okkamissatha*)** into the mother’s womb, would that *nāmarūpa* take shape in the womb?”

“Certainly not, venerable sir.”

“If, after **descending (*okkamitvā*)** into the womb, consciousness were to **depart (*vokkamissatha*)**, would that *nāmarūpa* be generated into this present state of being?”

(**Note:** this happens in the case of a natural termination of pregnancy, where the *gandhabba* comes out of the womb on its own, because it is not a suitable match).

“Certainly not, venerable sir.”

“If the consciousness of a **young boy or girl** (*kumārakassa vā kumārikāya vā*) were to be come out, would that *nāmarūpa* grow up, develop, and reach maturity?”

“Certainly not, venerable sir.”

“Therefore, Ānanda, this is the **cause, source, origin, and condition** (*eseva hetu etaṃ nidānaṃ esa samudayo*) for *nāmarūpa*, **namely, defiled consciousness** (*yadidaṃ viññānaṃ*).

8. Therefore, it is quite clear that it is the *kammic* energy of the *paṭisandhi viññāṇa* that “descends” to the womb and gives rise to the physical body. *gandhabba* is another term for *paṭisandhi viññāṇa* descending to the womb; it is also called “*manomaya kāya*.”

- Sometimes the *gandhabba* in a human body can come out in a stressful situation; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” The Buddha compared a *gandhabba* (sometimes also called a *Tirokutta* or a *Tirokuddha*) coming out of a physical body to a sword being pulled out of the sheath that it is stored in.

9. The erroneous concept of a *paṭisandhi* taking place in a womb is nowhere to be found in the *Tipiṭaka*. Note that in the above verse in #7, the term *okkanti* is used to describes the descent of the *paṭisandhi viññāṇa* to the womb, and the word “*paṭisandhi*” is not there. *Paṭisandhi* took place in the previous life, at the end of that *bhava*, see, “[Cuti-Patisandhi – An Abhidhamma Description](#).”

- Furthermore, if *paṭisandhi* took place in the womb, then a human *bhava* would last only until the death. Then, since human *bhava* is so rare (see, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”), all those rebirth stories cannot be accounted for (where children recall their previous human lives only several years before).
- The concept of a *gandhabba* is criticized by some saying that it is a Mahāyāna concept about an “*antarā bhava*.” Of course there is no *antarā bhava*, i.e., there is no gap between two adjacent “*bhava*”: *cuti* (end of one *bhava*) is followed by the grasping of the next *bhava* in the next thought moment, see, “[Cuti-Patisandhi – An Abhidhamma Description](#).”

10. A human *gandhabba* may be born with a human body many times before the *kammic* energy for the human *bhava* runs out and he/she is born in another existence (as a *deva*, animal, etc); see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- During that whole time, the human *gandhabba* lives moving from one body to another and spending the time “in between successive human bodies” in *para loka*; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”
- I keep repeating things, because these are important points. In case there are still questions, the “Search” box on top right is a good resource to find relevant posts. The [Pure Dhamma – Sitemap](#) is another good resource.
- You can also use the “Comments” box to send a comment or ask a question. I will be opening the discussion forum soon too.

11. This connection between mind and matter (*nāma* and *rūpa*) — combined via *viññāṇa* to create *nāmarūpa* — is what the Buddha meant when said that, “*mano pubbangamā dhammā*,” i.e., “the mind is the precursor to all *dhamma*.”

- When one understands that point one is said to have the “*nāmarūpa pariccheda ñāṇa*.”

- We have essentially all the major components in place now, and there may be some who can see the “whole picture” at least vaguely. But there are still more minor pieces that needs to be added to make the picture much clearer.
- However, if a key piece cannot be understood, the picture may not become clear. Please do not hesitate to comment if you have questions. Even if it is clear to me, I may not be conveying it in a optimum way, and I can make it better with your input.

12. I must emphasize that one could be a *Sotāpanna* and may not even know about these details; I do not want to discourage those who are not really into *Abhidhamma*.

- What is needed for the *Sotāpanna* stage is a grasp of *Tilakkhaṇa*, the *anicca* nature of this world.
- The details discussed in this subsection are to dispel any doubts about the consistency of Buddha Dhamma, and to illustrate that it can explain mind phenomena to profoundly deep levels. Furthermore, it can give confidence to those who have any remaining doubts about the validity of key concepts in Buddha Dhamma (laws of *kamma*, rebirth, *gandhabba*, etc).

5.1 Dhamma and Science – Introduction

Revised January 22, 2019; August 22, 2019; February 26, 2020

1. Whether it is a scientist or a Buddha, each is “discovering” the way nature works, i.e., reveal to the world what the fundamental laws of nature are. To appreciate what a Buddha does in comparison to a scientist, contemplate the following. The scientific knowledge we have today is the CUMULATIVE effort of thousands of scientists, each one taking the knowledge-base a little further. As Newton said, “I was fortunate to stand on the shoulders of giants to see further.”

- Not all scientists make similar contributions. Galileo, Newton, and Einstein made “giant leaps” in comparison to the smaller steps taken by other scientists.
- Now with cumulative effort over many hundreds of years, science has made significant advances concerning understanding some of the fundamental laws relevant to INERT MATTER.
- On the other hand, there is virtually no progress in understanding how the mind works; see, [“Cosciousness – A Dhamma Perspective.”](#)

2. As I build up this site, anyone will be able to see that Buddha Dhamma is the ultimate Grand Unified Theory. It explains the behavior of inert matter and living beings that we can see. And it also describes the existence of an infinite number of worlds with living beings in 29 other realms (other than the human and animal realms that we cannot see). See, [“The Grand Unified Theory of Dhamma.”](#)

- Buddha Dhamma is not a religion in the sense of providing salvation. The Buddha was not a God, a prophet, or a messenger. He was a human being who purified his mind to perfection so that he could see the whole of existence.
- The Buddha was the greatest scientist who investigated the problem of existence and found a complete solution. We all need to find our salvation by following the Path that he prescribed to purify our minds.

3. Newton could not have discovered the laws of gravity if it were not for the efforts of scientists like Brahe and Copernicus. Similarly, Einstein could not have discovered relativity without the knowledge passed down by other scientists. Quantum mechanics would not have been possible without the efforts of multiple scientists who moved forward with the evidence gathered by hundreds of other scientists.

- The Buddha, in comparison, discovered the complete set of laws about the WHOLE EXISTENCE by his efforts. That includes not only the way inert matter behaves on this Earth but all of existence in the 31 realms that science is not even aware of). That includes the way inert matter behaves in all 31 realms AND the minds of beings in those 31 realms.
- I recently proposed an explanation for the existing controversy over the “non-locality” issue in quantum mechanics. Everything in this universe inter-connected (or entangled) at a deep level; [“Quantum Mechanics and Dhamma.”](#)

4. We could say that the minds of the caliber of Newton and Einstein appear roughly every 100 years. The mind of a Buddha is infinitely more advanced and appears once in many billions of years if beings are lucky. Normally, the gaps are much more wider.

- There have been four Buddhas in this *Mahā kalpa*, but the last Buddha before them was born 30 *Mahā Kalpas* ago. Thus, there was a gap of 30 *Mahā Kalpas* (roughly a trillion years) without a Buddha appearing in this world.
- The Buddhas use a method that is different from the “scientific method” used by scientists. Instead of conducting experiments on inert matter, they conduct mind experiments. Answers to ultimate questions on the existence of living beings who have complex minds can be found only by PURIFYING a human mind to the ultimate level. That is what a Buddha does.

5. I will try to provide at least some details of the complex world view that was provided by the Buddha on this website. Buddha Dhamma has been muddled and distorted within the past 2500 years.

- “Our world” is much more complicated than what is grasped by our senses; see, “[The Grand Unified Theory of Dhamma](#).”
- And our lives do not end with this one; see, “[Evidence for Rebirth](#).”
- Those two facts constitute the basis of the true nature of existence. They need to be thought about carefully. One cannot comprehend the message of the Buddha until one at least has some idea about this “big picture.”

Now let us examine one case where it took 2500 years for science to come to be consistent with one part of Buddha Dhamma’s world view.

It Took 2500 Years...

Here is a picture of our Milky Way galaxy. We can see only a couple of thousand stars. But there are hundreds of BILLIONS of stars in our galaxy, and there are about an equal number of GALAXIES in our universe. Thus for each star in our galaxy, there is a whole galaxy out there. It is truly mind-boggling.

Milky Way

1. Even a few hundred years ago, even scientists believed our Earth was at the center of the universe:
[WebLink: WIKI: Geocentric model](#)

- Therefore, Buddha’s view of the universe as consisting of innumerable “world-systems” was not looked at favorably even a few hundred years ago.

- Of course, that has changed now. Buddha's statement that "there is no discernible beginning to life" is also becoming vindicated with each new scientific discovery.
2. In Buddha Dhamma, there is no First Cause (no Creator): Life always existed, and will always exist. Each living being has gone through innumerable birth-rebirth processes without a conceivable beginning. However, everything in the "world around us" is impermanent, including our universe (a "major world system" in Buddha Dhamma).
- Everything is born, has a transient existence, and finally decays. And this includes our universe as well. Star (and associated planetary systems), like everything else, come to existence and eventually fade away.
3. If there is no beginning to life, then where did life exist before the "big bang," i.e., before our universe came into existence? (actually, life is believed to have evolved on Earth very much later).
- People who lived even a hundred years ago had to take Buddha's words on this point solely on faith. But we are lucky to be assured by the fact that modern science give us some rather persuasive reasons to believe that life existed forever. Let us look at the emerging evidence.
4. Even as recently as at the beginning of the 1900s, Lord Kelvin (one of the top scientists of the day), estimated that the age of the Sun was < 40 million years. He estimated that time based on gravitational contraction (scientists did not know about nuclear fusion at the time). Our knowledge of the universe was also pretty much limited to the Solar system. So, this meant the age of our "known universe" was very short, and thus the Buddha's teachings on a beginning-less *saṃsāra* seemed like a myth.
- Vindication of the Buddha's teachings started at the beginning of the 1900s with the advent of quantum mechanics and relativity. Discovery of radioactivity in 1898 by Becquerel and Einstein's explanation of the photoelectric effect in 1905 led to the quantum theory of atomic structure. That, in turn, led to the correct picture of nuclear fusion as the source of solar energy.
 - So, by 1956, the age of the solar system was known to be > 4 billion years, and the age of the universe was estimated to be around 14 billion years. Even billions of years are hardly the same as "beginning-less time"!
5. By 1929, Edwin Hubble proved that the distant galaxies were moving away from each other. And that our galaxy is but just one of many galaxies. That was a vast understatement since now we know that there are 400 billion galaxies in our observable universe!
- The currently accepted theory on the "big bang" is the inflationary theory of Alan Guth. See, "The Inflationary Universe" by Alan Guth, 1997).
 - However, there are a minority of scientists who do not believe in the "Big Bang." They have proposed alternate theories; see, "Endless Universe" by Paul J. Steinhardt and Neil Turok (2007). In this view, universes are destroyed and reborn.
6. Buddha's world view does not have a "Big Bang" beginning either. Life always existed, and it will always exist in the future.
- I will start discussing some aspects of "the origins" later, when I have enough background material at the web site.
 - Some key concepts discussed in the post, "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)."
7. By the way, there are several theories currently being explored in quantum mechanics that are related to cosmology. There is one theory that requires a universe being existing for each possible event! So, there may be an infinite number of parallel universes. For example, see "The Beginning of Infinity" by David Deutsch (2011). In all these theories, there are multiple universes always exist.

- In any case, the Buddha, of course, did not say which of these theories is correct. He just said life always existed, and it always will. But he did say that “star systems” — like our Solar system — come into being, survive for long times, and destroyed at the end.
 - And that process repeats over and over!

5.2.1 Origin of Life – There is No Traceable Origin

July 10, 2019

Why Is This Issue Important?

1. As I explained in my previous post, we CREATE OUR OWN future lives, as described by *Uppatti Paṭicca Samuppāda*; [“Uppatti Paṭicca Samuppāda \(How We Create Our Own Rebirths\).”](#)

- *Paṭicca Samuppāda* cycle starts with “*avijjā paccayā saṅkhāra.*” As long as there is *avijjā* (no comprehension of the Four Noble Truths), one is bound to do (*abhi*)*saṅkhāra* — and generate *kamma* — there will be *bhava* and *jāti* (i.e., rebirth). That cycle will continue forever (just as it had no beginning).
- All types of births (*jāti*) lead to suffering, without exception.
- **This cycle ends ONLY WHEN one’s *avijjā* is removed via comprehension of the real nature of this world of 31 realms and one voluntarily gives craving (*taṇhā*) for existence in this world of 31 realms.** That is the attainment of *Nibbāna* or *Arahanthood*.
- This understanding is the FOUNDATION of Buddha Dhamma.

2. Therefore, the question, “What is the origin of life?” is very much relevant to UNDERSTANDING Buddha Dhamma.

- Most scientists believe that our universe came to existence only about 14 billion years ago with the “Big Bang.”
- Furthermore, current scientific theories say that life first formed in a primitive state (single-cell entities) and evolved to more complex life forms. And that humans came into existence less than five hundred thousand years ago.
- Most scientists do not agree with the “Creation hypothesis” that is the foundation of Abrahamic religions (Christianity, Judaism, Islam) simply because it is not compatible with the Principle of Causality. It says nothing can come to existence without a cause(s). If a Creator created life, how did that Creator come into existence?
- The compatibility of a “Big Bang” origin with causality is also not clear. Scientists are exploring possibilities like the “multiverse theory”, but those are still speculative.
- **However, our focus in this series of posts is not the actual origin of the universe, but the origin of life on Earth.**

Buddha's Explanation

3. According to the Buddha, life has no traceable beginning. This is certainly compatible with causality.

- For example, in the “[WebLink: suttacentral: Gaddulabaddha Sutta \(SN 22.99\)](#)”: “*Anamataggoyam, bhikkhave, samsāro*” means “**bhikkhus, there is no discernible beginning to the rebirth process.**” It also describes how living beings are bound to *samsāra*, because they do not realize the *anicca, dukkha, anatta* nature, which we recently discussed: “[Sotāpanna Stage and Tilakkhana.](#)”
- The above verse appears in all *suttā* in the “[WebLink: suttacentral: Anamatagga Samyutta \(SN 15.1 ~ 15.20\)](#)” of the *Samyutta Nikāya*, where each *sutta* gives a simile to illustrate how long each of us has been in this rebirth process and **how much suffering we have endured.**
- **However, it must be noted that Buddha's message is NOT a depressing one.**
- Whether there is a Buddha in the world or not, this suffering exists. This suffering is real but there is a way to overcome that suffering.
- Without a Buddha, we will not even be aware of this hidden suffering. **Furthermore, a Buddha FOUND A WAY (Noble Eightfold Path) to stop this perpetual suffering. That is the uplifting message.**

4. As many of you may have observed, learning deeper aspects of Buddha Dhamma is not easy. It requires one to spend a considerable time learning and then contemplating.

- Without an understanding of how long the *samsāric* journey is and how much suffering is encountered in most births, it is difficult to generate the MOTIVATION to study Buddha Dhamma. Most people turn to Buddha Dhamma only when they come down with a harsh suffering, seeking relief. But the best time to learn is when one is healthy with a sharp mind, and I hope I can motivate those people too with this series.
- In the “[WebLink: suttacentral: Upanisa Sutta \(SN 12.23\)](#),” the Buddha discussed the proximate causes/conditions (*upanisa*) for various factors leading to *Nibbāna*. Understanding how various births (*jāti*) arise and how ALL those births give rise to *dukkha* (suffering) is the key.
- That understanding cannot be attained until one can clearly see that there has not been a BEGINNING to this rebirth process, and we all have suffered so much in each and every birth. Regarding the perpetual suffering, I will also discuss the “[WebLink: suttacentral: Pathama Niraya Sagga Sutta \(AN 10.211\)](#)” in the future. It explains the causes of rebirth in good and bad realms, and why most births are in bad realms.

5. Life has always existed, but planetary systems (like our Solar system) are destroyed periodically and re-formed over long times.

- This is the only explanation that is consistent with the Principle of Causality: There is no “first beginning to life.” Life always existed, and it evolves according to the Principle of Causality, which is *Paṭicca Samuppāda*; see my previous post: [“Uppatti Paṭicca Samuppāda \(How We Create Our Own Rebirths\).”](#)
- If we go by the Principle of Causality (which is THE basis of modern science), there CANNOT be an origin of life, unless life can start with inert matter.
- **What the video below explains is that it is NOT POSSIBLE to create EVEN A SINGLE CELL (basic building block of life) in the laboratory starting with inert matter.** If it cannot be created in a laboratory under controlled conditions, it WILL NOT be possible for life to arise in a natural process starting with inert matter.

Evolutionists Versus Creationists

6. Of course, there is an ongoing debate between the evolutionists and creationists. **Evolutionists** believe that life evolved into complex entities like humans over billions of years. Furthermore, they believe that even the first cell (which is the building block of all life forms) evolved in the early Earth starting with inert molecules. **Creationists**, on the other hand, believe that a Creator God created life.

- I am providing a few references at the end of the post for both sides.
- It is to be noted that most evolutionists do not discuss the origin of a cell that much. They mainly focus on the “evolution of the species” STARTING WITH a fully functioning cell and progressing into more complex species with more and more cells of complex structure. **Evolutionists are just speculating that a cell evolved in the primitive Earth due to random events.** For example, Dr. Richard Dawkins writes in the reference given below, “How long would we have to wait before random chemical events on a planet, random thermal jostling of atoms and molecules, resulted in a self-replicating molecule? Chemists don’t know the answer to this question” (p. 144).
- On the other hand, creationists focus on the issue of why it is not possible to “create a cell” via evolution. Many of them agree that complex life possibly evolved starting with simpler life forms.
- I agree with the creationists that it is not possible for a cell to come to existence “starting with inert molecules” via random events. You can decide for yourself based on the videos below (and the references if you are really interested). Of course, we can discuss at the discussion forum.

7. The video below is by a scientist (Dr. James Tour) who has a different viewpoint than most other scientists. He provides solid evidence that life could not have evolved starting with inert matter. It is too complex to have been evolved by natural processes.

- At the end of the video, Dr. Tour comes to the conclusion that since life is too complex to evolve, it must have been CREATED by a Creator God. That is the other extreme view.
- According to Buddha Dhamma, life did not evolve from inert matter, nor it was created by a Creator God. Life always existed and it just takes different forms when a given “lifestream” is reborn a human, animal, *deva*, etc. We all have been born in most of the 31 realms in our deep past! When the conditions on Earth became suitable cells came to existence via *kammic* energy.

Mind Is the Creator of (New Forms of) Life! No Beginning to Life

8. Of course, it is very likely that Dr. Tour is not aware of the extensive and scientific explanation by the Buddha in the *Aggāṇṇa sutta*: Life has ALWAYS existed. A given lifestream (you or I) have existed without a traceable beginning.

- I will not be able to discuss that complex process any time soon. But I have discussed the main points in the *Aggañña sutta* in the post: "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)."
- It is just that we ourselves CREATE OUR OWN future lives, as described via *Uppatti Paṭicca Samuppāda* (which I discussed in my previous post).

9. A cell is the building block of life. Setting aside a complex life form like a human (made of trillions of different types of cells), science WILL NOT be able to create even a single cell. **In fact, even in any living being, individual cells are not formed. Instead, an existing cell divides to make two cells, and that is how more and more living cells come into existence!**

- **Each of our bodies started with just a single cell (zygote), and it became alive only when a gandhabba (or patisandhi vinnana) “descended to the womb” and merged with that single cell.** It is cell division that led to the current physical body with trillions of cells; see, "[Buddhist Explanations of Conception, Abortion, and Contraception](#)."
- No scientist has been able to CREATE even a primitive single cell. In cloning experiments, they deal only with existing cells; see, "[Cloning and Gandhabba](#)."
- As explained by Dr. Tour, a living cell is very complex and is like a working factory. He does a good job in his explanations.

[WebLink: youtube: James Tour: The Mystery of the Origin of Life](#)

Here is an introductory video on a living cell:

[WebLink: youtube: Introduction to Cells: The Grand Cell Tour](#)

REFERENCES

For evolution:

Richard Dawkins, “The Blind Watchmaker: Why the Evidence of Evolution Reveals a Universe without Design” (2015).

Jerry A. Coyne, “Why Evolution is True” (2010).

(Note that both these and other books/research papers do not provide ANY evidence for the evolution of a cell)

For creation:

Stephen Meyer, “Signature in the Cell: DNA and the Evidence for Intelligent Design” (2010).

Richard Behe, “Darwin’s Black Box: The Biochemical Challenge to Evolution” (2006).

Both evolution and creation not adequate:

Thomas Nagel, “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature is Almost Certainly False” (2012).

- Professor Nagel (who is a philosopher) obviously has had no exposure to Buddha Dhamma. But I am very much impressed that he came to the conclusion that mind MUST play a central role. I will write more on that in future posts.

5.2.2 Human Life – A Mental Base (Gandhabba) and a Material Base (Cell)

July 15, 2019; revised July 16, 2019

Current Scientific Understanding of a Human Birth

1. Of course, science assumes that life is only associated with a physical body and when the physical body dies, that is the end of the story. This is what we called “*uccheda ditṭhi*” in the post, “[Sakkāya Ditṭhi – Getting Rid of Deeper Wrong Views.](#)” Here is a summary of the current scientific understanding of the beginning of a human life.

- During the mother’s menstrual cycle, one **egg (ovum)** is usually released from one of the ovaries and is swept into the funnel-shaped end of one of the fallopian tubes.
- After intercourse with the father, If a **sperm** penetrates the egg there, fertilization results and the **fertilized egg (zygote)** moves down the fallopian tube and ends up in the uterus. This zygote divides into two cells, those two to four cells, etc.
- This collection of cells enters the uterus in 3 to 5 days. In the uterus, the cells continue to divide, becoming a ball of cells called a **blastocyst**. Inside the uterus, the blastocyst implants in the wall of the uterus, where it develops into an **embryo** attached to a placenta and surrounded by fluid-filled membranes; see, [WebLink: merckmanuals.com: Stages of Development of the Fetus](http://www.merckmanuals.com: Stages of Development of the Fetus)

2. This cell division is what causes that baby to grow (first inside the womb and then outside the womb) to become a full-grown human with trillions of cells. **It is that first cell (which cannot even be seen with the naked eye) that eventually multiplied to a mass of trillion of cells in a grown human!**

- However, there is much confusion about WHEN that zygote becomes alive, i.e., when it can be called “a human.” This “time of conception” varies widely based on personal and religious beliefs.
- Some people believe life starts at the moment of the merger of the egg and sperm (to form the zygote). At the other end, some say the actual birth of the baby (i.e., coming out of the womb) is the start of the human life! Some others define the life to start when the embryo’s heart starts beating.
- This confusion goes away when one understands the complete process described by the Buddha.

Buddhist Description of a Human Life – *Bhava* and *Jāti*

One needs to understand the concepts of *bhava*, *okkanti*, and *jāti* in order to understand how a human being is conceived in the womb (conception) and is born 9 months later.

3. According to the *suttā* as well as *Abhidhamma* in the *Tiṭṭaka*, a **new human existence (*bhava*)** does not start in a womb. It starts at the *cuti-paṭisandhi* moment when the previous *bhava* comes to an end. For example, if a *deva* dies and becomes a human, a human *gandhabba* (fine mental body) will be formed at the time of death of that *deva*; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- A human *bhava* can last thousands of years. On the other hand, a physical human body lasts only about 100 years. In between successive births with “human bodies”, the *gandhabba* (mental body) lives in what is called “*para loka*.” The *para loka* co-exists with our human *loka*, but we cannot see those fine mental bodies of *gandhabbas*; see, “[Micchā Ditṭhi, Gandhabba, and Sotāpanna Stage.](#)”
- **It must be noted that all living beings have a mental body and it is called “*manomaya kāya*.” *Gandhabba* is a special case of a *manomaya kāya*; see #12 below.**
- That human *gandhabba* will have to wait until a suitable womb becomes available. By “suitable” it means that the *gati* (loosely related to character/habits) of the *gandhabba* have to match those of the parents, especially the mother. *Gati* is an important concept in Buddha Dhamma that has been ignored for a long time; do a search for “*gati*” on the top right search box to find about “*gati*.” A starting post is, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\).](#)”
- Anytime after the egg and sperm are merged to form the zygote, a “matching *gandhabba*” can descend to the womb. Now a new human life starts with a mental body and the seed for a physical body (zygote).

4. Therefore, the time of conception is very precise in Buddha Dhamma: It happens at the time when the lifeless zygote becomes “alive” with the merging of the *gandhabba*. **That is the time of conception and it happens very early, normally within a day after intercourse.**

- In *suttā*, this is called “*okkanthi*” (a *gandhabba* or a *paṭisandhi viññāṇa* descending to a womb); see, “[Gandhabba State – Evidence from Tipitaka](#).” When the baby is born that is *jāti*.
- The moral issues involving contraception and abortions are discussed in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”

5. What happens in a womb (when an egg is fertilized with a sperm) is just to provide the “material basis” (zygote or the “first cell”) for the *gandhabba* to start a new “human being” that will eventually grow to become an adult with trillions of cells.

- The “blueprint” for that physical body (i.e., the *gandhabba*) was created at the dying moment in the previous life. The *gandhabba* brings his/her own *gati* as well as a set of *kamma vipāka* that would come into play during the existence of that human body.
- However, the physical body will also take into account the features of the mother and father via that zygote; see, #1 above.
- Therefore, the new baby will have a complex mixture of physical and mental characteristics of all three.
- All this is discussed in more detail in several posts, including “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#),” “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)”, and a more technical description in “[Cutī-Paṭisandhi – An Abhidhamma Description](#).”

Connection to *Sakkāya Diṭṭhi*

6. I will take this opportunity to point out that is it only series of events that lead to a “new human being.” **That *gandhabba* which led to a new life arose due to a “*paṭisandhi viññāṇa*,” which is nothing other than a “packet of *kammic* energy” created in a previous life. **Therefore, it was NOT an existing “living being” that “became the new human being.”****

- This is why the Buddha said there is no “self” traveling from life-to-life. Any living being just CREATES energy (*kammic* energy in terms of a *paṭisandhi viññāṇa*) to start a new “life form.”
- However, there is a “continuity of life” that was CAUSED in a previous life (when a strong *kamma* was done and this *paṭisandhi viññāṇa* was created). **Therefore, it is also not correct to say that a new life arises without a previous life making causes for it.** There is a causal connection between adjacent lives.
- If one can grasp this key point, that will help to remove *sakkāya diṭṭhi* (which is the key to the *Sotāpanna* stage).

7. There is no NEW living being and there has not been a FIXED living being (i.e., a “soul” or an “*atma*”) either. Life just moves from one existence to another based on what types of *paṭisandhi viññāṇa* have been created in the past!

- For example, one may be born many times with a human body while in the “human *bhava*,” but when the energy for that “human *bhava*” runs out, that life-stream gets hold of a new *bhava* (as a *brahma*, *deva*, animal, etc) which is the strongest *paṭisandhi viññāṇa*, i.e., the strongest *kamma* (good or bad) done in the past.
- If one is able to follow that “chain of past lives”, one will go through billions of past lives per minute, but will never be able to find a “beginning” life!
- According to the Buddha, life has no traceable beginning. “[WebLink: suttacentral: Gaddulabaddha Sutta \(SN 22.99\)](#)” is about how long the rebirth process. At the very beginning of the *sutta*: “*Anamataggoyaṃ, bhikkhave, saṃsāro*” means “***bhikkhus*, there is no discernible beginning to**

the rebirth process.” This verse is in many *suttā* including all the *suttā* in the “[WebLink: suttacentral: Anamatagga Samyutta.](#)”

A Mental Base (*Gandhabba*) and a Material Base (Cell)

8. A human life requires two basic components: a mental body (*gandhabba/paṭisandhi viññāṇa*) and a physical body (consisting of cells).

- A mental body or *gandhabba* (in different forms) has existed forever with any existing life-form, as explained in #6 and #7 above.
- The material body starts with a single cell created by the union of mother and father; that single cell (zygote) multiplies over time and the body of an adult has trillions of cells.

9. As I pointed out towards the end of the previous post, a cell is the basic building block of a live physical body. All living things (sentient beings and plants) are made of cells.

- **Each of these cells comes into existence from pre-existing cells! No new cells are produced individually.** This is a very important point.
- However, the first cells that appeared in the Earth were created by *kammic* energy (in *javana cittā*); I will discuss this below.
- **Therefore, both mental and physical components of a human life have origins in the MIND.**

10. Of course, there are many scientists today with the view that a “first cell” was created solely with inert matter early in Earth’s history, within a billion years of the formation of the Earth.

- This “first formation time” comes just from archeological studies. As new studies find fossilized cells going back to earlier rocks, the time it took to form the “first cell” has now been pushed back within 300 million years of the formation of the Earth!
- However, living is cell is too complex to be formed via random combinations of inert molecules no matter how long a time is given. It not just forming complex molecules of DNA, **but those DNA strands have a built-in program for life**, just like a computer program.
- Random re-arrangement of inert molecules CANNOT lead to the formation of a “programmed cell.” More on that in the next post.

All Life on Earth is Made of Cells

11. All life that we see (whether sentient or not, i.e., whether have a mind or not) are made of cells. To be more precise, human and animal bodies — and plants — are made of cells.

- Some of them (plants) are not conscious, i.e., they do not have a mind.
- On the other hand, humans and animals are also made of cells, but they have a mind too.

12. So, we must realize that being alive and being conscious are two different things. Plants are alive but they cannot think: plant cells just mechanically perform “pre-programmed” functions. On the other hand, humans and animals are also made up of cells, but there is an additional entity associated with them: ***gandhabba* or the mental body!**

- (It must be noted that all living beings have a mental body, and it is called *manomaya kāya*. A *manomaya kāya* of a human or an animal is called a *gandhabba* because it can inhale aroma — *gandhabba* comes from “*gandha*” + “*abba*” or “taking in aroma or scents” —, and become dense; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#)”).
- It is amazing to see that even plant cells are very active, buzzing with activity. All cells are programmed for various functions. Of course, different types of cells are programmed for carrying out different tasks.

This is an interesting topic that we do not want to get too much involved in, because that can be a real distraction to the main task of learning Dhamma and following the Noble Eightfold Path.

- However, having at least a rough idea about the complexities of life can be a motivation to learn more about Buddha Dhamma.

Complex Structure of a Cell

13. Here are two videos that explain the current status of understanding of cells. I will get to more relevant aspects in the next post.

[WebLink: youtube: Organelles of the Cell \(updated\)](#)

14. Energy for ALL cells come from Solar energy. Plant cells first convert Solar energy to forms of energy that can be used by animal cells. Therefore, plant cells play a major role in sustaining human and animal life!

[WebLink: youtube: Cells: Structure and Function](#)

5.2.3 Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya”

July 19, 2019; revised September 8, 2019

Introduction

1. There are words in Pāli that can have similar meanings. But one word may be better than another word in a particular situation. That is also true in English or any other language.

- In Buddha Dhamma, several Pāli words are used in different contexts regarding the “mental body.” They are *manomaya kāya*, *kammaja kāya*, *gandhabba*, and *paṭisandhi viññāṇa*. I will try to make things a bit clear in this post.
- We need to keep in mind that the mind is very complex, and living beings in different realms have different types of “mental bodies.” It is good to have a basic idea of these differences.

2. Most important here is to realize that these “mental bodies” are very different from the “physical bodies” we see in humans and animals.

- In particular, a *brahma* does not have a physical body at all. Then how can a *Brahma* see and hear without physical eyes and ears, and a brain to process those signals? These are questions that naturally arise in our minds. That is because we are not used to the concept of a “living being” without a solid body.
- The following discussion lays out a simple picture (with a few omissions to keep it more uncomplicated).

Mental Body and Physical Body

3. All living beings have a “mental body” (“*manomaya kāya*”). Living beings in some realms also have a “physical body” (*āhāraja kāya*).

- So, the very first thing we need to realize is that such a “*kāya*” is not the same as a “physical body” that we are used to, weighing tens of kilograms or hundreds of pounds. The Pāli word “*kāya*” means a **collection**. Even in English “body” is sometimes implies a collection of parts. Some examples are, a “body of evidence” or “a body of water.” [*kāya* : (m.), a heap; a collection; the body.]
- “*Manomaya*” means “made by the mind.” Therefore, a *manomaya kāya* is a collection of very fine parts (*hadaya vatthu* and several *pasāda rūpa*) that are necessary for any living being. A *manomaya*

kāya arises out of *kammic* energy created in our thoughts (*citta*). *Abhidhamma* is even more specific and says that our *javana citta* generates this energy.

- **“*Kammaja kāya*” is the primary component of the *manomaya kāya*.** This is because it is the first *kāya* “created by *kammic* energy.”

4. Now we can look at the two words *kammaja kāya* and *āhāraja kāya*. Here each composite word is made from two parts: **The common component, in this case, is “*ja*,” which means “generated by” or “born due to.”**

- The collection of parts that arise due to *kammic* energy is “*kammaja kāya*.” This “*kāya*” or “body” is very fine. A whole “*kammaja kāya*” is a billion times smaller than an atom. **But as we will see, this “*kāya*” is the more powerful one.** That is where the seat of the mind (*hadaya vatthu*) and the five real sensing elements of “*pasāda rūpa*” are located.
- Those six elements are made of the smallest units of matter (*suddhaṭṭhaka*) in Buddha Dhamma.
- Therefore, a whole “*kammaja kāya*” is unimaginably small, by our standards. One would not be able to see one even with an electron microscope. As we see below, that is all a *brahma* has!

5. **“*Āhāra*” means “food,” and thus *āhāraja kāya* is the “collection of body parts” that grows via eating food.** In humans and animals, this is the “physical body” that we see.

- Therefore, an “*āhāraja kāya*” is a “collection of heavy components of a body” like the head, arms, legs, eyes, ears, etc. That is what we call the “physical body.” A physical body grows by using energy intake from the food we eat.
- For beings like us with solid physical bodies, the sensory signals are first received by the five physical senses (eyes, ears, nose, tongue, and body). Then the brain processes those signals and sends them to the *manomaya kāya*. The *manomaya kāya* senses those signals.
- **Eyes and ears, for example, do not actually see or hear.** Eyes and ears pass those signals to the brain. The brain processes those signals send them to the corresponding *pasāda rūpa* in the *manomaya kāya*; see, **“[Brain – Interface between Mind and Body](#).”**
- In other words, for beings like us with physical bodies, the sensory signals received by the five physical senses (eyes, ears, nose, tongue, and body). Then processes those signals and send to the *manomaya kāya*. The *manomaya kāya* senses those signals.
- As we have discussed in recent posts in this series, a physical body (of a human or an animal) starts with a single cell called a zygote. The development of a complete human body, beginning with that one cell is another fascinating story. Scientists have no idea how that happens via a program that is in the DNA of that single cell. Who designed that program? See **“[Origin of Life](#).”**

Beings in *Brahma* and *Deva* Realms

6. *Brahmā* do not have an *āhāraja kāya*, and just have the *kammaja kāya*. The *kammaja kāya* of a *brahma* has only a *hadaya vatthu* and TWO *pasāda rūpa* (*cakkhu* and *sota*) for seeing and hearing. Still, they can see and hear with that ultra-fine “body” without having any eyes or ears (and brains) like ours. **Of course, it is tough for us to imagine such a living being.**

- Therefore, a *brahma* with just a *manomaya kāya* has a mass less than that of an electron. We cannot see even a cell or an atom, let alone an electron. Now we can understand why we should not think of “*Brahma* bodies” in the same sense as a “solid body.”
- Those *Brahmā* cannot taste the food, smell odors, or touch things physically like we do. In other words, they do not have *ghāṇa*, *jivhā*, and *kāya pasāda rūpa*.
- By the way, *Brahmā* do not need food. *Kammic* energy sustains their lives. Only the *hadaya vatthu* and the two *pasāda rūpa* of *cakkhu pasāda* and *sota pasāda* need to be maintained.

7. *Devās* do have *āhāraja kāya*, but that is much finer, and we would not a *deva* if we come face-to-face with one.

- They have all five physical senses. Their food is just a drink called “*amurta*.” That is probably not the correct Pāli word, but that is the Sinhala — and probably Sanskrit — name for it.
- **Therefore, we need to be careful not to carry over our perceptions of “heavy bodies” to bodies of other beings in other realms.** Millions of *devas* and *Brahmā* were present to hear the first discourse by the Buddha, according to the Vinaya Piṭaka. However, those five ascetics probably did not even realize that at that time.

What is *Gandhabba*?

8. A human (or an animal) has a both a *manomaya kāya* and a *āhāraja kāya*. But the *manomaya kāya* of a human has a special name of *gandhabba* due to the following reason.

- A human *bhava* starts with the generation of a *manomaya kāya* (or *kammaja kāya*) by *kammic* energy. For example, if an animal dies and gets a human *bhava* (which is extremely rare), a human *manomaya kāya* will come out of that dead animal. If a *deva* dies and gets a human *bhava*, a human *manomaya kāya* will appear in the human realm.
- That human *manomaya kāya* has a *hadaya vatthu* and five *pasāda rūpa* as mentioned above. However, it has the ability to absorb aroma (scents from plants and even food), and to get a bit denser (unlike a *brahma*). **Thus the name *gandhabba* (“*gandha*” + “*abba*” or “*inhaling aroma*”) for the *manomaya kāya* of a human (or an animal).**
- Therefore, the name *gandhabba* is used only for the *manomaya kāya* of humans and animals.
- Normal humans cannot see that relatively dense “body” of a *gandhabba*. They are in the “*para loka*” (which is within the human realm).

What is the Connection of *Gandhabba* to *Paṭisandhi Viññāṇa*?

9. Another phrase used in some *suttā* to indicate a *manomaya kāya* of a human or animal (i.e., a *gandhabba*) is *paṭisandhi viññāṇa*.

- As we had discussed before, a human *gandhabba* could live for thousands of years until the end of that human existence of “human *bhava*.” During that time, it can give rise to many “human lives” (*jāti*) with different physical bodies.
- For example, suppose one of those human *jāti* ends. At that moment, the *gandhabba* comes out of the dead body and waits for another “matching womb.” (*Gati* of the *gandhabba* has to match those of the parents, especially the mother). When a matching womb becomes available, *gandhabba* is drawn to that womb. That is described in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”
- The [WebLink: suttacentral: Mahā Tanhāsāṅkhaya Sutta \(Majjhima Nikāya 38\)](#), describes that as “descending of the *gandhabba* to the womb.” [WebLink: suttacentral: The Mahā Nidana Sutta \(Dīgha Nikāya 15\)](#) it is stated as “*paṭisandhi viññāṇa* descending to the womb.” That is because a *paṭisandhi viññāṇa* created that *gandhabba*. That is discussed in detail in the post, “[Gandhabba State – Evidence from Tipitaka.](#)”

The Physical Body Shields *Manomaya Kāya* of Humans and Animals

10. A question may have come up in the mind of some readers. Why cannot a *gandhabba* in a human physical body directly sense the outside world without the help of the five physical senses (eyes, ears, etc), if the *brahmā* can do that?

- The dense physical body shields the *manomaya kāya* of the *gandhabba*. As long as the *gandhabba* is inside the physical body, it is unable to get those “sense inputs” directly. Those sensory inputs come through our “sense doors”, eyes, ears, nose, tongue, and the body. The brain processes those signal and transmit them to the *gandhabba* (*manomaya kāya*). See, “[Brain – Interface between Mind and Body.](#)”
- We can compare this situation to a human operator inside an enclosed military tank. That operator cannot see or hear anything outside. Audio and video equipment mounted on the tank sends those signals to an on-board computer, which analyzes and displays them for the operator.
- In that analogy, video camera and audio equipment mounted on the tank act like the eyes and ears of a human. The computer is like the brain. Without getting those signals, the operator is totally blind and deaf to the outside world. In the same way, the *manomaya kāya* cannot receive those sense inputs if the eyes are ears are damaged.
- A detailed discussion at: “[Our Mental Body – Gandhabba.](#)”

11. But that *manomaya kāya* can be “kicked out of the physical body” in a traumatic situation, mostly in cases of heart operations; such claims are categorized as “out-of-body experiences” (OBE). In such cases, some patients have reported being able to see doctors perform operations on their own bodies from the ceiling (with their *manomaya kāya*).

- It may also happen to people whom the doctors thought had died, but “come back to life” within a short time. They report being able to travel with their *manomaya kāya*. Such cases are “near-death experiences” (NDE).
- Some others report being able to do “astral travel” with their *manomaya kāya* whenever they like, see, “[WebLink: wikipedia.org: Astral projection.](#)” At least some reports in this category seem to be valid. Reports of OBE and NDE are more trustworthy, because doctors and nurses confirm the accounts of those patients.
- These are discussed in the post, “[Manomaya Kāya and Out-of-Body Experience \(OBE\).](#)”

5.2.4 Buddhist Explanations of Conception, Abortion, and Contraception

Revised with a new title: November 10, 2018; revised November 14, 2018 (rewritten and replaces What does Buddha Dhamma (Buddhism) say about Birth Control?); revised January 5, 2020

Introduction

This completely revised post is necessary to continue our discussion on *Paṭicca Samuppāda*: “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self.’](#)”

1. Buddhist explanation of conception is in several *Tipiṭaka suttā*. Following is a simple account based on those *suttā*. It is compatible with modern science but provides more details than science.

- **Moral issues regarding abortion and birth control have clear answers in Buddha Dhamma. In particular, at what stage of pregnancy does a human life first appear in a womb?**

Current Scientific Knowledge

2. First of all, there must be a fertilized egg (zygote) in the womb. The fertilization happens when a sperm from the father combines with an egg from the mother to form a zygote or a fertilized egg.

- During the mother’s menstrual cycle, one **egg (ovum)** is usually released from one of the ovaries and swept into the funnel-shaped end of one of the fallopian tubes.
- After intercourse with the father, If a **sperm** penetrates the egg there, fertilization results, and the **fertilized egg (zygote)** moves down the fallopian tube toward the uterus.

- The “live zygote” enters the uterus in 3 to 5 days. In the womb, the cells continue to divide, becoming a hollow ball of cells called a **blastocyst**. Inside the womb, the blastocyst implants in the wall of the uterus, where it develops into an **embryo** attached to the placenta and surrounded by fluid-filled membranes.
- See, “[WebLink: merckmanuals.com: Stages of Development of the Fetus](http://merckmanuals.com: Stages of Development of the Fetus).”

3. It is important to note that science does not have an answer to the question of why all zygotes do not result in pregnancies, and why some couples who could not have babies for many years all of a sudden have success.

- Science cannot explain how an inert zygote (a cell) becomes “alive” and a living baby comes out of the womb.
- Furthermore, science cannot say WHEN that inert cell, zygote, becomes alive. Some say a live baby is there as soon as a zygote is formed, and others say there is no life there until a heartbeat can be seen.
- For more details on the controversy on the “time of conception” see, “[WebLink: wikipedia.org: Beginning of pregnancy controversy](http://wikipedia.org: Beginning of pregnancy controversy).”

Buddhist Explanation – Mind is in the “Mental Body” or *Manomaya Kāya*

4. We humans have two “bodies.” *Manomaya kāya* is the “mental body” (with a trace of matter) born at the beginning of the human existence or human *bhava*.

- Here is “body” means a “collection.” The physical body is a collection of “physical body parts.” The mental body has only a trace of matter and is a collection of “mental parts” (*vedanā*, *saññā*, *Saṅkhāra*, and *viññāṇa*.) For details, see “[Human Life – A Mental Base \(Gandhabba\) and a Material Base \(Cell\)](#)” and “[Clarification of “Mental Body” and “Physical Body” – Different Types of ‘Kāya’](#).” Those two were posted earlier in this series of posts.
- The mental body is referred to as “*gandhabba*” in the Tipiṭaka. See, “[Gandhabba State – Evidence from Tipitika](#).” However, for the current discussion, we do not need details on the *gandhabba*.
- Thus, a “human *gandhabba*” has only a trace of matter, and thus, we cannot see it. Some *suttā* refer to the *gandhabba* state as “*paṭisandhi viññāṇa*.” See, “[Gandhabba State – Evidence from Tipitaka](#).”

A Human Existence Can Last Thousands of Years

5. A human existence (*bhava*) can last thousands of years, and that is the lifetime of the *gandhabba* or the mental body.

- On the other hand, a physical human body lasts only about 100 years. With the death of the physical body, the *gandhabba* comes out and waits for another womb. Thus, there can be many births (*jāti*) as a human within a given human existence (*bhava*). See, “[Bhava and Jāti – States of Existence and Births Therein](#).”
- In between successive births with “human bodies,” the *gandhabba* (mental “body”) lives in the “*para loka*.” The *para loka* co-exists with our human *loka*, but we cannot see those subtle “mental bodies” of *gandhabbas*.

6. A new human existence (*bhava*) does not start in a womb. It begins at the *cuti-paṭisandhi* moment when the previous *bhava* comes to an end. For example, if a *deva* dies and becomes a human, a human *gandhabba* (fine “mental body”) will be formed at the time of death of that *deva*.

- Then that human *gandhabba* will have to wait until a suitable womb becomes available. By “suitable,” it means that the *gati* (loosely related to character/habits) of the *gandhabba* have to match those of the parents, especially the mother.

- *Gati* is an essential concept in Buddha Dhamma. But it is absent in modern texts. Search “*gati*” on the top right search box to find about “*gati*.” I have discussed *Tipiṭaka* references in several posts. See, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)”](#) and references therein.

A Zygote Becomes Alive When a *Gandhabba* Takes Possession of It

7. With the above background, now we can make the connection to current scientific understanding and extend that understanding. As science has shown, human life arises with a single cell called a zygote; see #2 and #3 above.

- A *gandhabba* may have to wait for even many years until a suitable womb becomes available. Then, *kammic* energy will pull it into that womb. And the *gandhabba* will merge with the zygote in the womb that was created by a sperm fertilizing an egg.
- A *gandhabba* entering a womb is sometimes referred to as “*paṭisandhi viññāṇa* descending to a womb” as stated in the *Mahā Nidāna Sutta* (DN 15.) In the *Mahā Taṇhāsankhaya Sutta* (MN 38) it is stated as, “a *gandhabba* descending to a womb.”
- As we saw above, Nature automatically matches the “*gati*” the parents (we can say that matching the zygote that was formed by the union of the mother and father), and a “matching” *gandhabba* will be “pulled in” by the *kammic* energy.
- However, the *gandhabba* concept is different from the idea of a “soul.” A *gandhabba* will keep changing during its lifetime. Furthermore, it will make a drastic change when the lifetime of the human *bhava* comes to an end. At that time, it can become an animal, a Deva, a Brahma, etc.

8. Therefore, a zygote just provides the “material basis” (zygote) for the *gandhabba* to form a physical body. (That zygote develops when an egg combines with a sperm.)

- The “blueprint” for that physical body (i.e., the *gandhabba*) is in the *paṭisandhi viññāṇa*. However, the physical body will also take into account the features of the mother and father via that zygote; see #3 and #4 above.
- If the mother (and father) are unable to have a child due to a previous *kamma vipāka*, the resulting zygote will be a “dud.” Thus no *gandhabba* can “descend to the womb,” i.e., pregnancy is not possible.
- All this is discussed in more detail in several posts, including [“Ghost in the Machine – Synonym for the Manomaya Kāya?”](#), [“Manomaya Kāya \(Gandhabba\) and the Physical Body,”](#) and a more technical description in [“Cuti-Patisandhi – An Abhidhamma Description.”](#)

The ‘Time of Conception’ is Precise

9. A *gandhabba* can take hold of that fertilized egg (zygote) any time after its formed.

- Therefore, the conception of a new baby happens when the life-less zygote becomes “alive” with the merging of the *gandhabba*. **That is the time of conception, and it happens very early, generally within a day after intercourse.**
- Once a *gandhabba* merges with the zygote, the cells of the zygote start repeatedly dividing as the zygote moves down the fallopian tube. **Thus cell division and the formation of a baby DOES NOT start unless and until a *gandhabba* merges with the zygote.**

Effects of Condoms/Birth Control Pills

10. Now let us see what happens with a condom or with birth control pills.

- With the use of a condom, an egg will not be able to come to contact with a sperm to form a zygote. Thus there will be no “material basis” or a zygote in the womb.

- If the mother is taking birth control pills, again, that will prevent the formation of a zygote for a *gandhabba* to start a new life.
- **Thus it is clear that there are no moral issues involved in either of those two cases. Terminating a life does not happen in either case.**

If a *Gandhabba* is in the womb, there is a Human there

11. On the other hand, once a *gandhabba* “is in the womb,” then there is a living being in the womb.
 - **Any procedure to remove the live *gandhabba* after this “real conception” is equivalent to killing a human. The exact time of the removal procedure does not matter. It could be a month before the birth of the baby or just a day after the *gandhabba* came into the womb.**
 - The only uncertainty about the “time of conception” is a few days. Conception happens when the *gandhabba* takes hold of the zygote. That could happen immediately after intercourse or a few days after sex.
 - Thus Buddha Dhamma provides an unambiguous picture of the moral issues involved in the birth control process.

Other Aspects

12. The death of a physical body of a human does not mean its existence as a human has ended. If there is remaining “*kammic* energy” for the human *bhava* left, the mental body (*gandhabba*) will come of the dead physical body and will wait for another suitable womb.
 - However, if the “*kammic* energy for the present human *bhava*” is exhausted at the time of death, then the transition to the next “*bhava*” or existence happens at the dying moment. If that new existence is that of a cat, a “cat *gandhabba*” will leave the dead body.
 - Here again, the “cat *gandhabba*” will have to wait until a suitable “cat womb” becomes available. At that time it will go into the womb of the “cat mother.” And a baby cat will be born later on.
 - However, except for humans and animals, a *gandhabba* is not involved in most other realms. That is true, for example, in *Deva* and Brahma realms.
13. Sometimes the child may have different “*gati*” compared to the parents. For example, a “fairly moral” couple may have a child with violent character qualities. That could be due to a drastic change in the mindset of the mother during that “conception window.” (Between the formation of the zygote and a *gandhabba* “descending” to the womb.) Violent rape is one possibility.
 - Furthermore, this is also why mothers who could not get pregnant for years, suddenly get pregnant. This happens during a time when the mother most likely has a “personality shift” or a significant change in her mental state.

Cloning – A Detailed Analysis

14. I have revised and updated another relevant post, “[Cloning and Gandhabba.](#)”
 - More details on the formation of the zygote are discussed there, before the discussion on cloning.
 - We will make the connection to *Paṭicca Samuppāda* in the next post.

5.2.5 Cloning and Gandhabba

March 5, 2018; revised January 5, 2020; January 8, 2020

Introduction – Cloning of Dolly the Sheep

1. Cloning of various types of animals has become common since Dolly was cloned in 1996. Three sheep contributed to the birth of Dolly. One provided the egg, another the DNA (donor), and a third (surrogate mother) carried the cloned embryo to term.

- Obviously, a clone has most similarities with the donor and there is no “father” involved (no sperm is needed). Are these consistent with the Buddha Dhamma, and how does a *gandhabba* play a role?
- Also, there are some myths associated with cloning, such as whether “totally unexpected creatures or monsters” can result from cloning.
- Therefore, it is good to review the key steps in the cloning process and to clarify these issues.

What Happens in a Normal Conception?

2. But, first, we need to look at what happens in a “normal conception” where an egg and a sperm combine to form the unique cell called a zygote. This was explained in the post, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).” Here, we will first extend that discussion.

- The “material base” for a new life is a zygote. In a natural conception, the zygote is formed by the fertilization of a female egg by a sperm from a male. Then a *gandhabba* can come into the womb and provide the “mental basis” for the new life, as explained in the above post.
- There are two things REQUIRED to make a zygote. **The first requirement** is the egg that comes from the mother and is unique. However, eggs have only 23 chromosomes instead of 46 chromosomes in all other cells. Therefore, **the second requirement** is to somehow have 46 chromosomes in the nucleus of an egg.
- Let us discuss the two factors in a bit more detail since this was not discussed in the previous post.

An Egg Is Unique

3. **Eggs are the most remarkable of cells. They can give rise to a completely new individual within a matter of days or weeks in some animals. No other cell in a higher animal has this ability.** Egg cells also contain many mitochondria which supply the energy required for cell replication and division.

- **However, an egg must be “activated” first in order to start the cell division process.** It is activated only when its nucleus has a full complement of 46 chromosomes or 23 pairs.
- You can read more about the role of the egg at, “[WebLink: discovermagazine.com: How Does a Single Cell Become a Whole Body?.](#)”

Activation of the Egg by the Presence of 46 Chromosomes

4. Now, to the second factor. Most cells in a body have **23 pairs** of chromosomes, **for a total of 46**. The egg and sperm are different. **Each egg and each sperm has only one set of 23 chromosomes, not a pair.**

- When fertilization occurs in normal conception, the 23 chromosomes from the egg combine with the 23 from the sperm to create a zygote or a *fertilized egg* with the full complement of **23 pairs** of chromosomes. This is shown in the following diagram (**Fertilization**. Zygote is egg plus sperm genetically different individuals. Fusion of two haploid gametes to form a diploid zygote):

- In this case of normal conception, those two nuclei from mother and father will combine to form a single nucleus in the yellow cell (egg), which is now the zygote.
- So, we see that in normal conception, the nucleus of the zygote — or the result of the merger of the egg with the sperm — will be a cell with a nucleus that has half chromosomes from the mother and the other half from the father. Thus, DNA from mother and father BOTH contribute to the zygote in normal conception. This is why the baby will have bodily features from both parents (a mix).

Science Cannot Explain Why Some Zygotes Are “Duds”

5. When the above process is complete, the egg becomes a zygote. At this point, the cell division is supposed to activate. However, some zygotes do not activate and thus do not lead to a fetus or a baby.
 - Scientists do not know why the zygotes formed by the union of some couples do not lead to cell division, i.e., why certain couples cannot have babies.

It Is a *Gandhabba* That “Activates” the Zygote!

6. The only difference in Buddha Dhamma is that the cell division starts ONLY IF (and when) a *gandhabba* descends to the womb and merges with that zygote.
 - A new animal or human life cannot be initiated without a *gandhabba* (or the “mental body” or “*manomaya kāya*.”)
 - In the case of a natural conception, the matching *gandhabba* (or *paṭisandhi viññāṇa*) will descend to the womb and will be merged with that fertilized egg to complete the conception. However, if a previous *kamma vipāka* for the mother and father does not allow a conception, a *gandhabba* WILL NOT be drawn into the womb.
 - Otherwise, a matching *gandhabba* with *gati* that are a mix of *gati* of mother and father will be drawn into the womb. That is why a child is likely to have *gati* which are a mix of the two parents. That is in addition to having physical features of the parents.

A *Gandhabba* (Mental Body) Makes the Zygote Alive

7. Without the “mental component” or the *gandhabba*, there is no life! A zygote is an inert cell and has no “sentient life.” The zygote that results from the merger of the egg and the sperm is just the “material base” and not a “new life.”
 - It is only when the *gandhabba* descends to the womb and takes possession of that zygote that it “becomes alive.”

The Procedure of Cloning Versus Natural Conception

8. **The zygote formation is different in cloning compared to the natural conception.** In the case of cloning, a sperm from a father is not involved.

- Here the nucleus of the egg is REMOVED, and the nucleus of the “donor cell” with the full set of 46 chromosomes is INSERTED in the egg. That is the key difference in cloning. So, now the nucleus of the egg has the full set of chromosomes needed to start cell division. The basic process involved in **cloning** is nicely represented by the following diagram:

9. However, it seems that is not enough to initiate the cell division. An electric shock is required to activate the process (i.e., to initiate cell division of this artificially created zygote.) This is the second difference compared to the natural process.

- Therefore, the artificially modified egg is placed in the womb of the surrogate mother, and an electrical shock is applied to start the cell division.
- The above figure is from the article, [**“20 years after Dolly: Everything you always wanted to know about the cloned sheep and what came next.”**](#) You may want to read that article too.

A *Gandhabba* Is Still Needed in Cloning

10. Even though that is the whole picture according to science, Buddha Dhamma says, there **MUST** be a *gandhabba* merging with that cell in order to “give it life.”

- **Just like in the case of natural conception we discussed above, there is no “new life” created with cloning. It just created a suitable “temporary home” for the *gandhabba*.**
- When that physical body dies, the *gandhabba* would come out and wait for another womb to be ready. Dolly has now died and it is possible that she was reborn as another sheep somewhere.

Genetic Material Is From One Cell in Cloning

11. The main thing from the above figure in #8 on cloning for our discussion is that the **yellow cell is the egg from the mother.** The other **cell on the top is from the “donor.”** It is not sperm but any kind of cell. No sperm is in the picture. Instead of half the genetic material coming from sperm and half from an egg, it all comes from a single cell.

- **The unique feature of the egg** from the mother is that it allows the growth of a whole animal (**with many body parts for doing very different things**) just starting with that single cell.
- However, the egg needs to have a full set of 46 chromosomes to form the zygote. In cloning, the whole set comes from the “donor” as shown in the above figure. In a natural conception, half of the

chromosomes come from the mother (egg), and the other half comes from the father (sperm), as shown in the figure above in #4.

- When an egg starts cell division, it splits — first into 2, then 4, then 8, 16, 32, 64, and so on — it is not merely splitting. It is a complex process that produces descendant cells with a huge variety of shapes and functions: bone cells, nerve cells, red and white blood cells; the cells of the eyes, fingernails, stomach, skin, etc.

More Information From Scientific Studies

12. Now, in the case of cloning, the following should be clear, according to science:

- The mother that provides the egg, provides the all-important platform for cell division that leads to the formation of the new offspring.
- However, 99% of the DNA comes from the donor. Therefore, the physical resemblance of the offspring would be to the donor, as is the case with Dolly the sheep.
- The surrogate mother who carries the embryo to term would provide no real contribution to the physical appearance of the offspring, according to science.

No “Monsters” Will be Created With Cloning

13. Studies done over the past 20 years with different types of animals show that:

- Some people are afraid that cloning can lead to unexpected outcomes like “creating monsters.” However, from the above discussion, it is clear that monstrous creatures **cannot** be expected to form due to cloning. This is because the source of DNA is the donor. **Therefore, the clone will look like the donor.**
- It is not possible to clone an animal that is identical to the donor. Even if they look similar, their character traits are different.
- The success rate is low, around 10%.
- Those are observations from the cloning studies over the past 20 years. They are consistent with our picture of the *gandhabba* having *gati* close to that of the donor. No two animals can be the same. In the case of natural birth, *gandhabba*'s *gati* will be close to those of both parents.

Additional Points From Buddha Dhamma

14. That is pretty much the picture in Buddha Dhamma too, but with the following exceptions:

- All three involved in the cloning process would contribute to some extent to the “mental qualities” in selecting a matching *gandhabba* (which happens automatically.) However, the major contribution is likely to come from the donor.
- Of course, we can only make a guess, since the Buddha never had to explain this particular case. The Buddha specifically mentioned that the “mental state of the mother” at the time of *gandhabba* descending to the womb is a factor. This is why even the most moral mother may, in a few cases, end up with a baby who turns out to have immoral *gati*.
- Therefore, the surrogate mother — within whose womb the actual descending of the *gandhabba* would occur — could play some minor role in determining the behavior of the baby, but not the physical appearance, i.e., the developing embryo would be affected by the mood and health of the surrogate mother.

Conclusion – New Life Cannot Be Created

15. The word “clone” is defined as, “an organism or cell produced asexually from one ancestor or stock, to which they are genetically identical.”

- However, a clone will NEVER be exactly the same as the “donor.” They are two different “life-streams.” The Buddha taught that each life-stream has existed “forever” and we discussed *Tipiṭaka* references in, [“Origin of Life – There is No Traceable Origin.”](#)
- All living beings in existence now have been in the rebirth process forever. The Buddha said that there is no discernible beginning to any living being.

16. The main point from Buddha Dhamma is that a new life cannot be created by any means, whether in a laboratory or anywhere in the universe. This is the only inconsistency with science here, and it is a major inconsistency.

- Living beings just keep switching from realm to realm, but most are trapped in the lower realms. While in the human or animal realms, they spend a lot of time as *gandhabbas*; see, [“Gandhabba – Only in Human and Animal Realms.”](#)
- So, an animal like Dolly would be switching from a “sheep *gandhabba*” to a sheep to a “sheep *gandhabba*” to a sheep...until the *kammic* energy for the “sheep *bhava*” or “sheep existence” runs out.
- When the *kammic* energy for the “sheep *bhava*” runs out, it will grasp another existence. There is no end to this process until reaching the *Arahanthood*.

17. So, I hope it is clear that cloning itself is consistent with Buddha Dhamma, and specifically with the concept of *gandhabba*.

- I wrote this post in response to a question at the discussion forum: [“Gandhabba and Cloning.”](#) If there are more questions or comments, we can discuss them there.

5.2.6 Living Cell – How Did the First Cell Come to Existence?

July 24, 2019

Relevance to Buddha Dhamma

1. A discussion on the origins of a first cell will help understand the fundamentals of Buddha Dhamma, in particular, **the power of *kammic* energy.**

- This discussion is about how modern science is beginning to confirm Buddha Dhamma. Modern science (biochemistry) provides additional information from a “material aspect,” i.e., on the basic building block of a physical body (cell). Even though many scientists believe that a living cell can arise by random combinations of inert molecules, there is no evidence to support that hypothesis.
- Of course, science has not yet even realized that there is a “mental body” too, i.e., the vital role of the *manomaya kāya*.

2. Human life requires two primary components: a mental body (*manomaya kāya* or a *kammaja kāya*) and a material body (*āhāraja kāya*), as I pointed out in the previous post; see, [“Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya.”](#)

- The mental body has existed forever (in different forms); **it is called a *gandhabba* for humans and animals.** Even though we are all humans at present, we had been born *devās*, *brahmā*, animals, and of course “hell beings”; it is just an unbroken “lifestream.”
- A cell is the basic building block of a physical body, which starts with a single cell (zygote) created by the union of mother and father. That single-cell multiplies over time (the physical body of an adult has trillions of cells); see, [“Buddhist Explanations of Conception, Abortion, and Contraception.”](#)
- **For any given conscious living being, there is no traceable beginning to a first *manomaya kāya*.** When an existing *manomaya kāya* dies, mental energy or *kammic* energy creates a “new *manomaya*”

kāya.“ Furthermore, cells make up human (and animal) bodies, and the “first cells” on this Earth were created by *kammic* energy long ago as we discuss below. All cells of current living beings come from those first cells!

How Cells Come to Existence

3. Biochemistry says all cells existing now come from pre-existing cells. How did the first cells on Earth come to existence? Creationists and evolutionists say those “first cells” could only have come from one of two possible places:

- Spontaneous creation – Random chemical processes created the first living cell.
- Supernatural creation – God or some other supernatural power created the first living cell.
- However, both sides have not even realized that there is a third possibility, i.e., “first cells” were created via *kammic* energy, which is the same as “mental energy.”

4. The Buddha taught that there is “no traceable beginning” to life. **Therefore, it is not possible to trace back to a “first *manomaya kāya* (mental body).”** When a human (or an animal) is born, it has a physical body in addition to the *manomaya kāya*. That physical body is made with cells.

- Of course, the Buddha did not talk about cells. I am just bridging that part of the puzzle, based on modern science and *Aggañña Sutta*; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- Now scientists can perform the “cloning” of animals. **That is not the same as the creation of a new life form.** Two existing cells create a zygote, and then an existing *gandhabba* can the “take possession” of that zygote; see, “[Cloning and Gandhabba](#).”

Origins of “First Cells” on Earth

5. **It is essential to realize that Darwin’s theory of evolution is NOT about the “evolution of a cell.”** It is about the evolution of advanced species of plants and animals STARTING WITH simpler lifeforms with a single cell.

- Most scientists who believe in the theory of evolution of SPECIES do also think that it MAY BE possible that A FIRST CELL also evolved starting with inert matter.
- Some scientists have concluded that random interactions of inert molecules cannot lead to the formation of a living cell. But they erroneously concluded that therefore life must have been created by a Creator God.

6. Since Robert Hook discovered the existence of cells in 1665, scientists have uncovered a lot of information about cells. The current “cell theory” in biochemistry has two fundamental axioms:

- i. All living things (living beings or living plants) are made of cells,
- ii. New cells are made by “cell division,” i.e., by the division of existing cells.

- Biochemistry books do not discuss how “first cells” came into existence!

7. Therefore, the question remains as to how the “first cells” on Earth came to life. Evolutionists say random combinations of inert molecules created them.

- Despite what you may have heard in science fiction or popular science literature, scientists are NOT EVEN CLOSE to making even the simplest cell in a laboratory.
- They will NEVER be able to do so. Once we discuss the current status of cell research, you will see why.
- On the other hand, creationists say a Creator God created all life.

Buddhist Explanation of Life

According to Buddha Dhamma, a conscious living being has a mental body (*manomaya kāya*), and some **may** have a physical body (*āhāraja kāya*). In *Brahma* realms, there are no physical bodies like ours (therefore no cells).

8. A NEW living being can never be created starting from scratch. **A dying *manomaya kāya* gives rise to a new one.** Any living being creates CAUSES and CONDITIONS that lead to the next existence (*bhava*)!

- For example, one may be born many times with a human body while in the “human *bhava*,” but when the energy for that “human *bhava*” runs out, that lifestream gets hold of a new *bhava* (as a *Brahma*, *deva*, animal, etc.) because of a strong *kamma* done in the past, as we discussed in previous posts. **Therefore, it is *kammic* energy that gives rise to a *manomaya kāya*!**
- A new *manomaya kāya* is ALWAYS associated with a past life. It is just that the form of the *gandhabba* keeps changing from *bhava* to *bhava*, i.e., an “animal *gandhabba*” or “*Brahma manomaya kāya*” is different from a “human *gandhabba*,” but the same lifestream can take all those various forms.
- If one can follow that “chain of past lives,” one will go through billions of past lives a minute, but will never be able to find a “beginning” life! The Buddha did that upon attaining the Buddhahood, and stated: “*bhikkhus*, there is no discernible beginning to the rebirth process.”; see, for example, “[WebLink: youtube: Gaddulabaddha Sutta \(SN 22.99\)](#)“:

9. A physical body for a human or an animal is a collection of cells. It starts with a single cell (called a zygote) and grows to a large mass with trillions of cells after a *gandhabba* (born of a *paṭisandhi viññāṇa*) “descends to the womb” and gets possession of that zygote. For *Tipitaka* references, see, “[Gandhabba State – Evidence from Tipitaka.](#)”

- On the other hand, a *brahma* has no physical body made of cells. It is just the mental body (*gandhabba*) with a trace of matter at the *suddhaṭṭhaka* level.
- Below, we will discuss how “first cells” on Earth came to existence. We first need to consider how complex a cell is.

The complexity of a Cell

10. Even the simplest cell is very complex and surprising. Even though nanotechnology has made significant advances, it is nowhere close to being able to make a functioning cell.

- The critical issue is not making new complex DNA molecules, but the following: **Those DNA strands in a cell nucleus are “coded with information,” just like a computer is programmed.**
- Just like a computer program can run by itself and manage a factory, information coded in those DNA strands in the nucleus of the cell control cell’s functions.
- This “information” comes not by a Creator and not created via random jostling of molecules in early Earth. It comes from *kammic* energy, just like a *gandhabba* is created by *kammic* energy.

11. In the following video, one can get a good idea about the basic layout and the complexity of a cell.

[WebLink: youtube: Organelles of the Cell \(updated\)](#)

12. It becomes even more impressive when we look at how small an animal cell is. Here are some rough numbers (in comparison, a mustard seed is 1 to 2 mm in diameter):

- Cell (per side) 0.050 mm (or 50 micrometers).
- Cell membrane 0.000007 mm thick.

- Nucleus (diameter) 0.007 mm.
- Nucleolus (diameter) 0.0025 mm.
- Endoplasmic reticulum: each layer 0.0002 mm (0.0001 mm gap between layers)
- Golgi complex 0.007 mm thick, each layer.
- Ribosomes 0.00003 mm (30 nanometers) in diameter.

13. But the most amazing thing is not that such a small cell has all that complexity. It is that a cell has a “built-in computer-like program” that manages all cell functions, including what kind of proteins are to produce. Yes. A living cell is a factory that makes proteins in addition to making copies of its DNA.

- In humans, a copy of the entire **genome**—more than 3 billion DNA base pairs—is contained in **all cells** that have a nucleus. The DNA from a single human cell has a length of ~1.8 m or about 6 feet (but at a width of ~2.4 nanometers).
- This genome has the blueprint for a given human (animal) body.

14. The machinery and the activities inside a cell — which we cannot see with the naked eye — are impressive. As mentioned, a living cell is a pre-programmed, very sophisticated factory. Whatever progress that nanotechnology has made cannot even come close to the level of a cell, as can be seen with the following video:

[WebLink: youtube: Ron Vale \(UCSF, HHMI\) 1: Molecular Motor Proteins](https://www.youtube.com/watch?v=RonValeUCSFHHMI1)

First Cells on Earth Created via *Kammic* Energy (Same as a *Gandhabba*)

15. At present, the division of existing cells creates new cells of different properties (scientists do not understand how!). A new human baby starts with a single cell (zygote) that is formed by the merger of two cells from the mother and father.

- **In the newly-formed Earth, *kammic* energy created the first cells.** That happened a long time after the “first humans” who were without physical bodies. The early humans had very subtle bodies (like *brahmā*), and thus, they did not have physical bodies with cells. Hundreds of million years later, those early (*Brahma*-like) humans got back their “human *gati*,” and their bodies become visible with a physical body made of cells.
- The “first cells” come into existence via *kammic* energies from the past. Once they get started, then the “normal method” of cell division led to more cells (what we see now).
- In the same way, there are no new *gandhabbas* in the sense of starting a new lifestream. When an existing *gandhabba* dies (at *cuti-paṭisandhi*), a new *gandhabba* takes its place because of a new *paṭisandhi viññāṇa* (via *Paticca Samuppāda*).
- Therefore, the MIND is the precursor to EVERYTHING. Even plant life has origins in collective *kammic* energies of all conscious beings on Earth. Thus the Buddha declared, “[Manopubbangamā Dhammā..](#)” or “mind is at the forefront of everything in this world.”

16. It is essential to realize that the dense physical body, say of a human being, is not directly created by mental energy.

- Mind energy provides the two seeds: *gandhabba* and the first cell, the zygote. The fusion of two cells from mother and father creates a zygote.
- When a *gandhabba* merges with a zygote in a womb, that starts a process where no more *kammic* energy is needed. That first “live cell” multiplies and leads to more and more cells using sustenance from the mother, and that is how an embryo grows. After birth, a baby grows by eating its food.

17. Another critical point is that the cells of ALL LIVING THINGS are similar, and they depend on each other.

- Cells of humans and animals are very similar. The differences come from the variations in the genome (DNA that is inside the cell nucleus).
- Even cells of plants are not that different. The main difference in a plant cell is the presence of chloroplast, which generates energy using sunlight.
- Energy to sustain bodies of humans and animals can be traced back to plants. Even though humans and animals do eat other animals, it is those animals like cows who first extract energy from plants.
- Now we can see how inter-related and inter-dependent ALL LIFE is. And how complicated life is, even at the physical level.
- The mental body (*gandhabba*) is even more complicated. Only a Buddha can sort out these complexities of life. We are fortunate to live at a time when modern science helps us clarify some of his teachings.

5.2.7 Mystical Phenomena in Buddhism?

July 28, 2019; revised June 9, 2020

Introduction

Some phenomena may be labeled “mystical” or “incomprehensible” only because there are no rational explanations yet. However, logical explanations become available as science makes progress.

1. There are two essential points to make regarding the series of posts on the “origin of Life,” and in general, regarding Buddha’s teachings.
 - Some characteristics of the other 29 realms in this world may not be compatible with our ordinary sensory experiences. Some phenomena are not “perceivable” or “easily understood” to humans. The Pāli word for “perceivable” is “*gocara*” pronounced “gochara.”
 - The second issue is how *kammic* energy can create a *manomaya kāya* with the ability to “see” and “hear” without physical eyes or ears. Also, how did those “first living cells” on Earth come to existence? See. [“Origin of Life – There is No Traceable Origin.”](#)
 - However, with the advances made in science, it is now possible to convince ourselves that such phenomena are scientifically plausible. There are no contradictions with science, at least theoretically (i.e., in principle).
 - We are fortunate to live at a time when scientific findings show that some of the “hard-to-believe” phenomena discussed in the *Tipiṭaka* are consistent with science. In this post, I will start with a couple of such issues (associated with “supernormal powers”).

Non-Perceivability of Some Phenomena

2. First, let me clarify what I mean by “perceivable” or “easily understood.” Our six senses can “detect” only a tiny fraction of the “our world.”
 - We directly experience only the human and animal realms, where living beings can be “seen with our eyes.” We have no idea about the “bodies” those living beings in other realms. If we visit a *Brahma* or a *deva* domain, for example, we may think that there is “no one there.” Their bodies are too wispy to be seen with our eyes.
 - Even when scientists probe the universe with their best equipment, they also see only a small fraction of “things” out there. At a base level, science today can account for only 4 percent of the mass of our

universe; see, “The 4 Percent Universe: Dark Matter, Dark Energy, and the Race to Discover the Rest of Reality”, by Richard Panek (2011).

- Many things have not been “discovered” by science yet. In particular, nothing significant about the MIND.

Buddha Dhamma Is Self-Consistent

3. Trying to gauge the validity of Buddha Dhamma with just what we can see with our eyes is foolish. That is like a blind man trying to figure out what an elephant is like, by touching just a leg of the elephant; see, “[How do we Decide which View is Wrong View \(Ditthi\)?](#).”

- A frog living in a well does not know anything about the wider world of 31 realms. Similarly, an average human — including scientists — faces the problem of trying to figure out the “reality” by only using data available through our limited six senses. With the help of scientific instruments, we are making progress.
- Thus a scientific theory can't be ever “complete” as proven by the mathematician Kurt Gödel; see, “[Gödel's Incompleteness Theorem](#).” However, science is helping to clarify some concepts.
- Unless one attains *abhiññā* powers and can visit those realms, one would not be able to verify such characteristics of other domains. For example, we cannot see their ultra-fine bodies; see, “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya.”](#)”
- However, if one spends time learning Dhamma, one would be able to see the truth of them. We will discuss a few examples below. Also, see “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”

Touching the Sun – Is That Possible?

4. Some phenomena described in the *Tipiṭaka* seem to be “mystical” or “beyond comprehension.” But they are entirely feasible based on the advances in science. I will discuss a couple of examples in the *Tipiṭaka* to illustrate this point. In the “[WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#)”, it is stated, “.. *imepi candimasūriye evaṃmahiddhike evaṃmahānubhāve pāṇinā parāmasati parimajjati..*” or, “.. **he touches and strokes the Sun** and the moon, so mighty and powerful...”

- This verse describes the powers of a *yogi* with supernormal capabilities (*Iddhividha ñāṇa*). How can one “touch and stroke the Sun?” Isn't the Sun supposed to be extremely hot?
- Here, the *yogi* is in the *manomaya kāya*, not with his physical body. Of course, a physical body will burn well before it gets close to the Sun. The key is to note that the *manomaya kāya* has just a few *suddhaṭṭhaka*. For example, a human *manomaya kāya* has a *hadaya vatthu* and five *pasāda rūpa* and each is a *suddhaṭṭhaka*; see, “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya.”](#)”
- **A *suddhaṭṭhaka* is the smallest unit of matter in Buddha Dhamma and is billion times smaller than an atom in modern science. Therefore, the *manomaya kāya* of a *yogi* is unimaginably tiny; it is a “packet of energy.”**

5. An entity at the level of *suddhaṭṭhaka* will not be affected by the Sun's high temperatures or even by a supernova explosion. We can understand that from modern science as follows: A regular fire can burn dense things like wood or paper. At higher temperatures, melting ovens can melt steel bars. But neither of those can burn molecular gases like hydrogen or nitrogen. Those gases burn at even higher temperatures.

- **However, even at the temperatures generated by a supernova explosion, matter at the *suddhaṭṭhaka* level is not affected.** A supernova is the blowing up of a star.
- **The Earth and the Sun are destroyed at the end of a *mahā kappa*.** However, the *brahma* realms lying at or above the *Abhassara brahma* realm survive. Those *Brahmā* have very fine bodies (with only a trace of matter) that are not affected even by a supernova; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

- Well before that destruction, all living beings in our world move up to the *Abhassara brahma* realm.
- Now we can see how a *yogi* with a *manomaya kāya* of a *Brahma* CAN indeed touch the Sun. **That is not a miracle. It is just that a *manomaya kāya* is so fine (subtle) that it is not affected by even a supernova, which has much more power than the Sun.**

How Can One Go Through Walls?

6. The same *sutta* (and many other *suttā*) also describe the ability of *yogis* with *iddhi* powers to go through walls and dive into the Earth and come out from a different location, among others.

The following verse appears in many *suttā* in the [WebLink: suttacentral: Iddhipāda Saṃyutta](#) of the *Saṃyutta Nikāya* (SN 51.11 through SN 51.32): “*Ye hi keci, bhikkhave, etarahi samaṇā vā brāhmaṇā vā anekavihiṭaṃ iddhividhaṃ paccanubhonti—ekopi hutvā bahudhā honti, bahudhāpi hutvā eko honti; āvibhāvaṃ, tirobhāvaṃ; tirokuṭṭaṃ tiropākāraṃ tiropabbataṃ asajjamānā gacchanti, seyyathāpi ākāse; pathaviyāpi ummujjanimujjaṃ karonti, seyyathāpi uduke; udukepi abhijjamāne gacchanti, seyyathāpi pathaviyaṃ; ākāsepi pallaṅkena kamanti, seyyathāpi pakkhī sakuṇo; imepi candimasūriye evaṃmahiddhike evaṃmahānubhāve pāṇinā parimasanti parimajjanti; yāva brahmalokāpi kāyena vasaṃ vattenti, ..*”

Translated: “*Bhikkhus, a bhikkhu or a brāhmaṇa* who has developed supernormal powers (*iddhi*) wields various psychic powers: He can become many copies of himself. He appears and vanishes. **He travels unimpeded through walls, ramparts, and mountains, and dives in and out of the Earth as if it were water.** He walks on water without sinking as if it were the Earth. Sitting cross-legged, he travels through space like a winged bird. With his hand, he touches and strokes the Sun and the Moon, so mighty and powerful. He displays mastery as far as the *brahmā*-realms...”

- It is also evident in this verse that it could be **anyone** who can cultivate these powers, not just Buddhists.
- Let us first clarify a few things with science, and then we will discuss how it is possible to “**go through walls and dive into the Earth.**”
- We need to first discuss some aspects of atoms and molecules uncovered by modern science.

An Atom is Virtually Empty!

7. Here is a simplified version of some relevant properties of an atom. An atom has a tiny nucleus with 99.9% of the mass (or “weight” in ordinary language.) It is surrounded by an “electron cloud” that takes up almost all the “space occupied by the atom.” In other words, it is analogous to a miniaturized version of our Solar system, where the massive Sun is at the center, and several planets revolve around the Sun.

- The main difference is that those electrons are not in circular orbits. They have complicated “orbitals,” and the easiest is to visualize an “electron cloud” around the nucleus.
- The nucleus is tiny but has all the mass of the atom essentially. Electrons are spread out in a large volume around the nucleus (core.)
- We can use the following analogy to get a perspective on the size of an atom compared to the nucleus. If a mustard seed with a millimeter diameter represents the nucleus, the “electron cloud” would occupy a volume with 100 meters in diameter. We could say a nucleus would be like a grain of sand in the chamber of a large cathedral or a football stadium.

8. Therefore, an atom (or a molecule) is mostly empty. **That means our bodies that we think are very solid are also basically empty.** Even steel or diamond would be similarly “empty.”

- **P.S.** If it is possible to take out all that empty space in our bodies (which of course, is not possible), all the matter in the physical bodies of 9 billion humans in the world today would fit inside a sugar cube!
- If our atoms are mostly space, why can’t we pass through walls like those ghosts in movies?

- Electrical repulsion among the electron clouds of neighboring atoms forces them to stay away without getting close.
- **Therefore, we cannot go through walls or any other “solid object” with our physical bodies.**

Go Through Walls and Dive Into the Earth?

9. Even though our physical bodies cannot go through other “solid objects,” **our *manomaya kāya* (*gandhabba*) made of very fine *suddhaṭṭhaka* can!**

- That level of “matter” is much more refined and subtle than even electrons. Furthermore, “particles” at the *suddhaṭṭhaka* level are not electrically charged. So, they do not have any problem going through the electron cloud.
- Therefore, modern science (physics) helps us understand why this is not a miracle at all.

10. Those objects that appear to be “highly condensed” — such as walls or even steel — are mostly hollow at the atomic level. An atom has a tiny nucleus surrounded by an “electron cloud.” The size of an atom is defined by the electron cloud, which is spreads out over a relatively large volume. Two adjacent atoms cannot come too close to each other because of the mutual repulsion between their electron clouds.

- Therefore, an atom is “virtually empty.” The dense nucleus takes only a little volume, and the electron cloud is far away. Therefore, a *manomaya kāya* made of only a few *suddhaṭṭhaka can* freely move through “solid matter” made of atoms and molecules.
- A *yogi* with such *abhiññā* powers could use the *manomaya kāya* to travel through “solid objects.”
- One with even more developed abilities may be able to reduce one’s physical body to the *suddhaṭṭhaka* level, go through the “solid object” and then “reassemble” at the other end. That sounds like science fiction (“teleportation”), but that is precisely how it may be done in the future with further progress in science. Of course, one with such *abhiññā* powers would be able to do that right now.
- **P.S.** An account from the *Tipiṭaka* regarding “teleportation”: Ven. Ananda attained the *Arahanthood* only the day before the first Buddhist Council held 3 months after the *Parinibbāna* of the Buddha. Only *Arahants* participated. Everyone was waiting for the arrival of Ven. Ananda. In order to remove any doubts of those who were present that he had indeed attained the *Arahanthood* — complete with all *iddhi* powers — Ven. Ananda is said to have entered the room through the keyhole in the door. So, this is an example of teleportation.

Summary and Other Implications

11. Other “mysterious phenomena” in verse in #6 above can also be explained to be consistent with science. As science makes progress, these clarifications will have more support.

- I will be discussing some of those other phenomena in the future after covering the necessary background material.

12. On a side note, this clarification also helps us understand that our concept of “touching someone” is not as intimate as we think. When we “touch” something, it is only the outer electrons of the atoms (molecules) on our body “touching” the same on the other object.

- I am very serious about this. Suppose you are blind-folded and someone touches you on the arm. If you think it is your girl (boy) friend, that will make you generate sensual thoughts. However, you will feel only affectionate feelings of a different kind if you are under the impression that it is your parent. If you think it is a total stranger (and not good looking!), you may barely notice him/her.

Buddha Discouraged “Magic Shows” by Those With *Iddhi* Powers

13. I must also emphasize that the Buddha not only discouraged but banned in most cases, display of such supernormal powers by *bhikkhus*. The main reason for that was explained to Kevatta by the Buddha in the [WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#). The English translation there: “[WebLink: suttacentral: To Kevatta \(DN 11\)](#).”

- So, there were people at the time of the Buddha who could do such “miracles” using special techniques like “*Gandhāra* magic trick” (*gandhārī nāma vijjā*). Some others cultivated supernormal powers via *anāriya jhāna*. Then such people can put down Buddha Dhamma, saying that “I can also do those things without Buddha’s teachings.”
- Even today, some magicians perform such “miracles.” Here is a video showing “[WebLink: youtube: Criss Angel walking on water](#).”

Of course, it is an illusion. But it looks real! Criss Angel discusses these illusions or magic tricks in his book, “Mindfreak” (2007).

- However, only Buddha Dhamma can make it possible to stop future suffering, and that is not possible with magic tricks!

5.2.8.1 Views on Life – Wrong View of Materialism

August 4, 2019

Introduction

The issue of the origin of life is critical to *Sakkāya Diṭṭhi*, which is one of the key wrong views to be removed to attain the *Sotāpanna* stage. I have discussed some background material in the past several posts. It is time to take an in-depth look at each of the three views on the origin of life.

1. As I have already mentioned in the past few posts, there are two wrong views regarding life.

- The materialistic view says life has origins in inert matter. Science says 108 or so atoms make everything in this world. Somehow consciousness with feelings, perceptions, desires, and hopes arise out of inert matter. Many scientists and atheists hold this view.
- Those who are faithful followers of the Abrahamic religions (Christianity, Judaism, Islam) or Hinduism believe that there is a separate “mental component” that makes the inert physical body “alive” with

feelings, perceptions, desires, and hopes (four mental aggregates). A Creator God or *Mahā Brahma* created life according to them.

2. We also need to keep in mind the “endpoints of a life” according to those two views.

- In the materialistic view, one lives only the present life, and it all ends with the death of the physical body. **This view was called “*ucceda diṭṭhi*”** by the Buddha because here the life ends (*ucceda* means “cut off”) with the death of the physical body.
- In the opposite view, the “mental body” survives even after the physical body dies. In Abrahamic religions, the “soul” either is born in heaven or “hell” forever. In Hinduism, the “*ātma*” keeps going through the rebirth process until one is born in the *Mahā Brahma* realm, which is again eternal. In either case, one will eventually live forever (in heaven, hell, or the Brahma realm). **This view was called “*sassata diṭṭhi*”** (*sassata* means “eternal”) by the Buddha.

3. In refuting those two views, the Buddha taught that there is a “mental component” to life, but that is not a “soul” or “a *ātma*” going from one life to the next.

- That is because everything in this world arises due to causes. Life can many different forms (human, *deva*, *brahma*, animal, *peta*, hell-beings, etc.). **When one such existence ends another of those arise depending on which causes (*kamma vipāka*) come into play.**
- “Good” or “bad” forms of life arise due to “good” or “bad” actions done in the past, and the net result of existence in the “long term” is suffering (mainly because most *kammā* lead to “bad births”).
- There is no “soul” or a “*ātma*” that can be considered to be “me” or “my essence.” As long as one has that perception, the rebirth process will continue with much suffering.
- When one realizes the truth of this reality, one will stop grasping (*upādāna*) new existences.

The Conception and Birth of a Baby

4. Let us focus on human life. When the fertile mother (i.e., who has ovulated) has sex with the father, that leads to seed for a new life. The following is a summary extracted from “[WebLink: Stages of Development of the Fetus.](#)”

- During each normal menstrual cycle, one of the ovaries release an egg. The release of the egg is called ovulation. The egg enters the funnel-shaped end of one of the fallopian tubes.
- Within 5 minutes of having sex, sperms from the father move from the vagina to the fallopian tube.
- If a sperm penetrates the egg, fertilization results. **The fusion of the egg and sperm produces a new cell called a zygote**, which is the “seed of life” for a brand new baby.

5. Tiny hairlike cilia lining the fallopian tube propel the zygote toward the uterus. The cells of the zygote repeatedly divide as the zygote moves down the fallopian tube. The zygote enters the uterus in 3 to 5 days.

- In the uterus, the cells continue to divide, becoming a hollow ball of cells called a blastocyst. Between five and eight days after fertilization, the blastocyst attaches to the lining of the uterus, usually near the top. This process, called implantation, is completed by day 9 or 10. The inner cells develop into the embryo, and the outer cells develop into the placenta.
- Some of the cells from the placenta develop into an outer layer of membranes (chorion) around the developing blastocyst. Other cells develop into an inner layer of membranes (amnion), which form the amniotic sac. When the sac is formed (by about day 10 to 12), the blastocyst is considered an embryo. The amniotic sac fills with a clear liquid (amniotic fluid) and expands to envelop the developing fetus, which floats within it.

6. Most internal organs and external body structures get built in this stage. Most organs begin to form about three weeks after fertilization, which equals five weeks of pregnancy. (Doctors date pregnancy from the first day of the woman’s last menstrual period, which is typically two weeks before fertilization).

- At the end of the 8th week after fertilization (10 weeks of pregnancy), the embryo is considered a fetus. Almost all organs are entirely formed by about ten weeks after fertilization (which equals 12 weeks of pregnancy). The exceptions are the brain and spinal cord, which continue to form and develop throughout pregnancy.
- By about 24 weeks: The fetus has a chance of survival outside the uterus. The lungs continue to mature until near the time of delivery. The brain accumulates new cells throughout pregnancy and the first year of life after birth.

Materialistic View

7. The above process describes the steps in the formation of the “physical body” of a new human being. **It cannot identify the time “when the mental stuff” is activated, i.e., when that inert zygote becomes alive.**

- Some say “life of the new baby” starts when the heartbeat starts, and at the other extreme some say when the baby is capable of surviving outside the womb; see, for example, [“WebLink: When Does a Human Life Begin? 17 Timepoints.”](#)
- According to Buddha Dhamma, the new life starts when a *gandhabba* (or *patisandhi viññāṇa*) “descends to the womb and takes possession of the zygote.” That happens very early, within a day or two of the formation of the zygote; see, [“Buddhist Explanations of Conception, Abortion, and Contraception.”](#)

8. Besides the above hurdle, the materialistic view cannot explain how that single cell or the zygote gives rise to a complex human with many trillions of different types of cells.

- Even though we all start with a single cell, the cells in different parts of our bodies are very different. Liver cells are different from heart cells, and the cells in the brain — called neural cells or neurons — are much more diverse.
- Furthermore, how do these cells know when to start building different cells for liver, heart, brain, arms, legs, etc.?

9. These issues have been studied in detail even since Watson and Crick discovered the double-helix structure of the [DNA](#) (Deoxyribonucleic acid) molecule back in 1953. We have discussed the complexity of a cell, so now we can summarize these findings as follows:

[\[WebLink: What is DNA?\]](#)

- DNA strand in a cell has the necessary “code” (similar to computer code) to how to build the whole body consisting of trillions of cells.
- This DNA, or the blueprint for the whole body, is in every cell. However, the proteins and body parts generated by each cell are different. How does each cell “know” which part of the “code” to read?
- I am skipping a lot of details. Those who are interested should read two excellent books (References 1 and 2 below). The former is by an evolutionist and the latter by a creationist. However, it is not necessary to study this complex issue in detail; it is enough to “get the basic idea.”

The structure of the DNA double helix. The atoms in the structure are colour-coded by element and the detailed structures of two base pairs are shown in the bottom right.

Fundamental Problems with the Materialistic View

10. Two key issues remain unresolved. The first is, how did this complex DNA structure evolve, starting with simple molecules?

- In 1953, Stanley Miller and Harold Urey mixed chemicals in a simulated “early-Earth atmosphere” and produced amino acids — precursors of DNA. It received much publicity as a significant clue to the origin of life. But that is a far cry from making a working cell in a laboratory. No one has even come close to that in the 65 years following that “breakthrough.”
- The videos in my previous posts discuss this problem at length; see, “[Origin of Life – There is No Traceable Origin](#)” and “[Living Cell – How Did the First Cell Come to Existence?](#).”

11. There is an even more critical issue: Is it even possible for such a complex “genetic code” to evolve?

- Those of us who have written computer programs know that even a simple program requires “planning” and would not work unless it is free of “bugs.” Even though it is relatively easy to “fix a bug” with KNOWLEDGE of the code, it is unimaginable that a bug in such a sophisticated program can “get fixed” via a random “trial and error” process. In such a random process, it is more likely to “add more errors” to code than fixing an existing error.
- The following review paper summarizes current status: “[WebLink: pdf file: Koonin and Novozhilov- Origin and Evolution of Universal Genetic Code – 2017.](#)”
- For those who like to find more details, I recommend Ref. 3 below. The author is offering 10 million dollars to anyone illustrating the feasibility of the evolution of genetic code; see, “[WebLink: evo2.org: Evolution 2.0.](#)” I recommend watching the video there. It is not really about the prize; he explains why it is an impossibility.

12. Darwin’s original theory of evolution predicted a “gradual evolution” of SPECIES, i.e., simple lifeforms evolving to complex lifeforms. However, “neo Darwinism” of the present time is trying to tackle the following key issues.

- Recent studies reveal that the GENETIC CODE is virtually the same for many species, ranging from mice to humans (in animals with a few cells, the genome is small). In other words, the DNA in mice essentially has the code to start a human life, but those sections in the program are NOT TRIGGERED for mice; see Ref. 1 for details.
- **That is a critical point. The CODE Is virtually the same in many lifeforms, but the “correct sections of the code” must be triggered for each species. It is as if someone had planned for all lifeforms in advance!**
- It is just that different parts of the code get activated for different species! **That raises the second issue. WHO (or WHAT in the code) triggers specific genes to be enabled in different species AND at the right time (e.g., fingers come after the arms)?**
- That is possibly why some evolutionist scientists are switching to the creationist side (Dr. Francis Collins, the director of the Human Genome Project is an example). There has not been a third alternative (because most people do not know — or understand — Buddha’s version).

In the next post, I will discuss problems associated with the creationist view (*sassata ditthi*).

5.2.8.2 Wrong View of Creationism (and Eternal Future Life) – Part 1

August 12, 2019

Introduction

1. The concept of eternal future life is built into most of the religions today. It comes in two varieties.
 - In Abrahamic religions (Christianity, Judaism, and Islam), one is born only once. Then at the end of this life, one is either taken to heaven or hell for eternity.
 - In Hinduism, one has born before, will reborn again and again, until one is born in the *Mahā Brahma* realm. Then one will live there forever.
 - Both varieties require a Creator (God or *Mahā Brahma*).
 - (Please note that the intent of my post is just to lay down the **facts** (to my knowledge). If I have miswritten something, please post a comment at the discussion forum or send me an email at lal@puredhamma.net. I would be happy to correct any errors.)
2. In the time of the Buddha, there was only the latter view associated with a future eternal life. However, in both the above cases, the expectation is that one will have eternal life at the end. Such a view of eternal life was called *sassata diṭṭhi* by the Buddha (“*sassata*” means eternal).
 - As we recall from my previous post, “[Views on Life – Wrong View of Materialism](#),” this is the opposite of the wrong that life ends with death in this life. That was called *uccheda diṭṭhi* (“*uccheda*” means cut off) by the Buddha.
 - As we know, the Buddha explained 62 types of wrong views in the [WebLink: suttacentral: Brahmajāla Sutta \(DN 1\)](#). However, the two main wrong views REGARDING LIFE are the above. Some of those 62 wrong views are on whether the world is eternal or not, and whether the world is finite or not.

Eternal Life in Hinduism and Abrahamic Religions

3. In the [WebLink: suttacentral: Brahmajāla Sutta \(DN 1\)](#), the Buddha explained how some people at that time concluded eternal soul or *atta* (*ātma* in Sanskrit/Hinduism).
 - There were *yogis*, even before the Buddha, who could attain (*anāriya*) *jhāna* and with them the ability to recall past lives. Some were able to recall hundreds and thousands of past lives. One may change the form of birth (human, *deva*, etc.), but each birth associated with “oneself.”
 - Some of them had cultivated *abhiññā* powers to higher levels, where they could “see” very far back. They could see many destructions/re-formations of the world (i.e., many *mahā kappās*). Even for such long times, they could see their “*ātma*” or “*atta*” taking different forms, but it was the “same self” who acquired such various forms.
 - The Buddha gave an analogy in the *Brahmajāla Sutta*. A person may live in a particular city for several years during childhood, move to another to go to school, get a job in a yet another city, and eventually retire in yet a different country. But that person has the perception that it was “me” who was at all those different places, with different physical bodies. Going through different lives is similar; there is a perception of “me” or “self” or “soul” (*ātma/atta*).
4. Now we can see a difference in views of Abrahamic religions and Hinduism.
 - The concept of rebirth is firmly in Hinduism. That is coming for a long time even before the Buddha Gōtama. It is based on the experience of ancient *yōgis* who had cultivated the ability to look at past lives.
 - On the other hand, rebirth is entirely absent in Abrahamic religions. So, the origin of human life in Abrahamic religions is purely materialistic. The only requirement is to have a zygote created by the union

of the mother's egg and father's sperm. Therefore, there is some overlap here with the materialistic view of life; see, "[Views on Life – Wrong View of Materialism.](#)"

- However, as far as the end of life is concerned, both Abrahamic religions and Hinduism have a similar view. That one attains eternal life at the end.

Issues Only Relevant to Abrahamic Religions

5. The other difference between Abrahamic religions and Hinduism is that in the former, one is born only once AND gets only this life to work towards getting eternal life in heaven. If one misses that opportunity, one will be committed to the hell for eternity.

- The Bible clearly says one dies only once and then faces judgment ([WebLink: biblia.com: Hebrews 9:27](#)). The Bible never mentions people having a second chance at life or coming back as different people or animals. [WebLink: biblia.com: Matthew 25:46](#) says explicitly that believers go on to eternal life while unbelievers go onto eternal punishment. As I understand, Judaism and Islam have the same concept.
- I wonder what happens to a baby dying very young. Does it go to heaven or hell? What about a mentally disabled person? It does not seem to be fair if they are committed to hell for eternity. If they do get qualified to be born in heaven, it would be better to skip this life (be killed as a baby) and be born in heaven right away.
- I may not be aware of the details on that issue. But it is an important issue. As I mentioned earlier, I welcome comments. The goal is to have a clear and correct picture of different world views.

6. Since this is the "first life" for any human alive today (since there is no rebirth process in Abrahamic religions), the following question arises. Why is it that people are born healthy/with disabilities, poor/rich, beautiful/ugly, etc.?

- To put it another way, is each of us a "new creations of the Creator"? If so, why did he choose to create some of us with disabilities, for example? If we did not have prior lives, there was no basis to differentiate among new births.
- Furthermore, was the "soul" of an existing individual created at the time of his/her conception or birth?
- There are simple questions that need answers, in my opinion.

7. I do understand that the Creator God is supposed to have "breathed life" to Adam and Eve made them in his image. But not to animals; they do not have a soul in Abrahamic religions).

- Animals are made of the same "stuff" as humans. As I discussed in the previous post, many animals have DNA that is 99% the same as those for humans; see, "[Views on Life – Wrong View of Materialism.](#)"
- Animals are supposed to be there for the consumption of humans. That also does not seem to be logical.

Issues Only Relevant to Hinduism

8. The *Purush-Sukta*, a section of the *Rig Veda*, describes the divine origin of human beings into the four social groups, or castes, that comprise Hindu society: *Brahmin*, *Kshatriya*, *Vaishya*, and *Sudra*. According to the *Purush-Sukta*, *brahmins* born from the mouth of the Brahma, *kshatriya* from the arms, *vaishya* from the thighs, and *sudra* from the calves.

- This categorization comes at the beginning of the *Agganna Sutta* (DN 27). Vāsetṭha, himself a *brahmin*, tells the Buddha that other *brahmins* say to him that he should not associate with lower-caste people. Followers of the Buddha came from all four castes. They tell him that, "Only *brahmins* are genuine children of *Brahmā*, born of his mouth, offspring of *Brahmā*, created by *Brahmā*, heirs of *Brahmā*."
- The Buddha tells Vāsetṭha that all people today are womb-born.

- Then he proceeded to give an account of how all “first humans” at the beginning of this *Mahā Kappa* were born instantaneously (*ōpapatika* births) with *brahma*-like bodies, and how they “evolved” over the past several billions of years to end up with “womb-born births”; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- The current series on the “[Origin of Life](#)” will provide more details from that *sutta*. Darwin’s theory of evolution is somewhat correct for the appearance of increasingly complex animal species over time. It is not right to say that humans have “evolved from animals.” Furthermore, a “first living cell” can’t evolve from inert matter to form the primitive animal species either, as we have discussed in recent posts.

9. As in the case of a Creator God in Abrahamic religions, why did *Mahā Brahma* create four classes of humans at the beginning, per #7 above? Why not create them all equal?

- Did *Mahā Brahma* also create animals as well? Can humans be born as animals? If so, do animals have a *ātma*?
- I may be ignorant of these issues. One problem that I have had with Hinduism is that there are so many different versions. One good example is that in some Hindu temples animal sacrifice is carried out regularly. On the other hand, there are other Hindus who abstain from eating meat, let alone killing animals!
- The best way to clarify these issues is to start a discussion at the discussion forum. Then I can revise this post based on that discussion if needed. I have opened a new topic to discuss any of the posts in the “Origin of Life” series: “[Questions on Posts in the “Origin of Life” Subsection](#).”

I will discuss apparent problems associated with all creator-based religions in the next post.

5.2.8.3 Wrong View of Creationism (and Eternal Future Life) – Part 2

August 19, 2019

In the previous post, “[Wrong View of Creationism \(and Eternal Future Life\) – Part 1](#),” we discussed some problems associated with creationism. We will continue that discussion.

How Did the Creator Come to Existence?

Now we can get to the issues which are common to Abrahamic religions and Hinduism.

1. First of all, the inevitable question is, how did the Creator (God or *Mahā Brahma*) come to existence? The Principle of Causality, the foundation of modern science, says things do not happen or materialize without causes.

- The idea of a Creator as “the First Cause” has a long history; see the Wikipedia article, “[WebLink: wikipedia: Cosmological argument](#).”
- Logically it cannot be defended, but it has come to be a belief for those who have faith in a Creator.

2. In the previous post, we saw a crucial difference between Buddhism and Hinduism. (Even though the concept of rebirth is there in both.) In Hinduism, there is the belief of an everlasting existence in the *Mahā Brahma* realm (or reunification with the *Brahman*).

- Of course, a similar concept is there with Abrahamic religions too, with eternal life in heaven or hell.
- However, the idea of rebirth is absent in Abrahamic faiths.
- **Let us now focus on the issue of “eternal life” after death**, which is in Abrahamic religions and Hinduism.

3. In Abrahamic religions, the Creator God lives in the heavens. If one lives a moral life, one will get to live “in the heavens” forever; see the Wikipedia article, “[WebLink: wikipedia: Heaven in Christianity](#).”

- In Hinduism, the Creator Brahma lives in a Brahma realm; see the Wikipedia article, “[WebLink: wikipedia: Brahma](#).” One can be born there, by living a moral life and by cultivating *jhāna*.
- Therefore, all Creator-based religions assume the existence of a heavenly plane where life is permanent. Once born there, one will live forever without ever dying.

Nothing in This World Is Forever

4. Stars in the heavens appear to be serene and shiny. Even though we see beautiful and calm “starry nights,” the outer space is a violent place.

- In reality, a typical star converts *millions of tons of mass into energy every second*, with ***each gram releasing as much energy as an atomic bomb!***
- Within the range of our telescopes, there are several supernova explosions per second. A supernova is the explosion of a star at the end of its lifetime.
- Therefore, even though our ancestors thought that Gods reside among those nice-looking stars, and the heavens are stable and peaceful, the reality is very different.

5. The Buddha’s world view (which is based on experience, as we will discuss in upcoming posts) is that no existence is everlasting. Life in any heavenly realm (*Deva* or *Brahma* realms) is finite, even though some can be very long lifetimes.

- At the time of the Buddha, Abrahamic religions were not there. He has addressed the issue of everlasting life in the *Mahā Brahma* realm in several *suttā*. We will discuss that in future posts.
- Before that, let us look at the scientific evidence that any type of matter (which essential for life) has a finite lifetime.

6. A permanently-existing heavenly body is in contradiction with modern science as well as with Buddha’s description of 31 realms where every life ends at some point. Even though *Deva* and *Brahma* realms have long lifetimes, they are not free of death.

- In current scientific theories, the whole universe will run down in several billion years.
- Furthermore, each star is either destroyed in a violent blast (some are called “supernova”) or will be subjected to “heat death” reaching the white dwarf stage; see the Wikipedia article, “[WebLink: wikipedia: Star](#).”
- In Buddha Dhamma, clusters of star systems (*cakkavāla*) get destroyed periodically. Even though higher-lying realms do survive, living beings in those realms also have finite lifetimes. After many billions of years, those star systems re-form. So, it is a cyclic process where destruction is followed by rebirth (re-formation), just like for a living being; see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

The Problem of Suffering

7. Then there is the critical issue of why would a Creator let the man that he created to suffer? He could have created a suffering-free world.

- The general explanation in Christianity is that Adam and Eve sinned.
- But the Creator could have made it not possible for Adam and Eve to sin. Furthermore, it does not make sense for the descendants to be punished for the sins of Adam and Eve.
- And why is it that some are born to suffer (mentally retarded or handicapped, for example)? What is the explanation for some people born that way? Also, why are some born poor, compared to others who are born rich?

8. As I mentioned in a previous post, "[Views on Life – Wrong View of Materialism](#)," some scientists like Francis Collins and James Tour have given up belief in the theory of evolution. They have become proponents of creationism since they do not see another option.

- We discussed James Tour's views in the post, "[Origin of Life – There is No Traceable Origin](#)."

9. Francis Collins has written a book about why he changed his views to become a creationist. I have written a post to critically examine the issues that he could not explain with creationism: "[The Language of God](#)" by [Francis Collins](#)." Please read that post for details, but the following are the key points.

- As I pointed out there, Dr. Collins faced the same difficulties as C. S. Lewis in trying to explain why God left room for suffering.
- Why would God allow the existence of Satan and the associated immoral behavior by people? The main conclusion was that God chose to give the man free will, and the man abused it. But God could have given free will without the existence of Satan or the ability to sin.
- The existence of "Moral Law" (the ability to differentiate right from wrong) is the fundamental basis for his belief in God. However, that argument works for all religions.
- These are critical issues that do not have answers in creationism world views.

Debate Between Materialists and Creationists

10. In the last few posts, I presented the two sides as Evolutionists and creationists. However, some creationists do not have a problem with Darwin's theory of evolution if it just pertains to the "evolution of species."

- The critical issue for them is about the "origin of life" and not the evolution of species. In other words, many creationists agree that once life got started with simple life-forms, more complex life-forms evolved gradually.
- In fundamental terms, the critical question is, "how did the first cell come to existence"?

11. Of course, the evolutionists believe that the first living cell also evolved, starting from inert atoms and molecules.

- However, evolutionists have very little to say about how a first cell came to existence. I have read many books by evolutionists, and they mainly discuss just the evolution of species. They have very little evidence or even feasibility of how complex DNA molecules assembled, starting with simple atoms and molecules in random chemical reactions.
- They have even less to say about how the genetic code could have evolved. As I emphasized in previous posts, it is hard to imagine how such a program could develop in a random process. We know that computer codes do not "evolve." Furthermore, any accidental changes in the working computer code will only break that code, not make it better!

Intelligent Design Argument

12. As I mentioned above, some scientists have convinced themselves that a living cell with DNA code can't evolve. However, they are not comfortable with the concept of a Creator God.

- They have come up with the concept of "intelligent design." They do not explicitly invoke a Creator God but insist that a higher intelligence must have designed a living cell.
- That is also called the "Teleological argument." See the Wikipedia article, "[WebLink: wikipedia: Teleological argument](#)."

13. As explained in that Wikipedia article, the phrase “argument from design” was first used by William Paley, an English clergyman, in 1802. He said that if one finds a clock on the beach, one can safely conclude that the watch must have had a designer. In the same way, complex living beings must have had a “designer.”

- Modern advocates of the intelligent design argument point out that a cell is much more complicated than a watch, and that it could not have evolved due to random processes.
- However, that does not solve the problem. Such a “designer” must have super-human capabilities, and thus is not that different from the idea of a Creator. The idea of a creator or a designer runs contradictory to the Principle of Causation, upon which science is based (see #1 above).

Summary

14. The existence of permanent life and suffering are two critical problems with the creator-based origin of life. However, there are many related issues.

- Can the life of a human arise randomly? In other words, why are humans born under very different conditions of health, wealth, beauty, etc.? Neither evolutionists nor creationists (or “intelligent designers”) can explain it. They all say, “it just happens that way.”
- The second issue has to do with the origin of life (not the evolution of species). How did life originate? For example, how did the first cell with its complex double-helix DNA structure AND the genetic code come to existence? The two sides have different explanations for that issue.

15. Materialists believe that a living cell can arise via random jostling of atoms and molecules which are inert “matter.” The critical question here is, is it at all possible for that to happen in a random process? **Another significant issue that we have not even discussed is: How can feelings, perception, desires, hopes, etc. arise from “dead matter”?**

- Creationists (and those who believe that a creator or a designer with super-human intelligence in “intelligent design”) created living cells. That creator gave life to inert matter. There the question is, how did that creator or designer come to existence?

Buddhist Explanation

16. **In Buddha Dhamma, this “intelligent designer” is none other than Nature.** The life itself was not created but has existed forever. That is consistent with the Principle of Causality. Of course, Buddha provided (indirect) evidence in terms of a fully self-consistent “theory.”

- **Furthermore, the mental qualities of a human are the CAUSES of existence (rebirth):** It is not possible to create a life-stream. All existing life-streams have ALWAYS existed. That life-form takes different forms in different existences (not only human and animal, but among 31 possible realms). See, [“What Reincarnates? – Concept of a Life-stream.”](#)
- **Future existences of a given life-stream DEPEND on the “mental qualities” (and actions, speech, thoughts that arise BASED ON those mental qualities) of that life-stream.**
- **Suffering and pleasure exist in this world. Both arise due to previous actions (*kamma*). And one’s deeds are based on one’s mental state at that time.**

17. **When one understands those key concepts, one will “see” that there is no “attā” or “soul” or “ātma” going from birth-to-birth.** That is the first stage of *Sammā Diṭṭhi*. Causes (*kamma*) and conditions lead to corresponding outcomes (*kamma vipāka*) per *Paṭicca Samuppāda*. That understanding is the key to removing “*sakkāya diṭṭhi*.”

- We will first discuss those “mental qualities” next. It is essential to understand those to discuss Buddha’s teachings of life. **His world views were not speculation but based on his ability to “see” how life**

progressed over trillions of years in the past. It is NOT JUST a logical or philosophical argument, even though it is self-consistent.

- It is critical to understand the essential points discussed so far to continue with upcoming posts. I recommend re-reading #16 and #17 until those key ideas are grasped at least vaguely.

5.2.8.4 Buddhist Worldview – Introduction .1

August 26, 2019

Introduction

1. The Buddhist worldview is somewhat complicated but is self-consistent. In the previous three posts, we discussed the two dominant world views of evolutionism and creationism. The Buddha categorized them respectively as *uccheda ditthi* and *sassata ditthi* in the “[WebLink: suttacentral: Brahmajāla Sutta \(DN 1\)](#).” **When one removes both those wrong views, one would have removed *sakkāya ditthi* and attained the *Sotāpanna* stage of *Nibbāna*.**

- In both those world views, there is the idea of an “existing person.” Evolutionists say that “a person” ends with the death of the physical body. Creationists say that the “soul” or the “ātma” of “a person” will get an “everlasting life” at some point. See the discussion so far at “[Origin of Life](#).”
- The Buddha taught that the existence of such “a person” is illusory. At each moment, there is an experience that arises due to past causes AND based on prevailing conditions. That “conditional cause and effect” or the Principle of Causality is called *Paticca Samuppāda*. **However, those experiences and any physical sufferings are real.**

2. Thus, in the Buddhist worldview, “a person,” at a given time, may be defined as a “set of *gati*” or “character qualities.” Those *gati* are the conditions to bring about the results (*vipāka*) of past actions (*kamma*). When one gets rid of those “*gati*,” that will lead to the stopping of those sense experiences burdened with suffering. That is *Parinibbāna* or “full release from suffering.” **However, the perception (*saññā*) of such “a person” will be there until one attains the *Arahanthood*.**

- That is a very brief summary. With this post, we will start discussing the details.

3. The “material or physical world” takes precedence in current dominant world views of evolutionism and creationism. Evolutionists consider mental aspects as secondary and to arise from inert matter. Thus, they believe the mind is an emergent phenomenon.

- Even the creationists do not pay much attention to the diverse mind phenomena. They believe that the mind is separate from matter and that the Creator created both.
- Buddha has taught material aspects briefly but focused on the mind in great detail. Furthermore, he has explained that the opposite of materialism is the correct worldview. **That is, instead of mind phenomena arising from inert matter, the mind is the precursor to matter.**
- That may sound astounding. That is why we need to go through the steps slowly. But it is essential first to remind ourselves that it is not possible to create a brand-new “life-stream” or a “new living being.”

A Life-Stream (Rebirth Process) Has No Beginning

4. All living beings (an infinite number of them) have lived from a time that has “no traceable beginning.” That is a cornerstone of the Buddhist worldview.

- The Buddha declared that as, “*Anamataggoyam, bhikkhave, saṃsāro.*” That means “**bhikkhus, there is no discernible beginning to the rebirth process.**” This statement is in every *sutta* in the “[WebLink: suttacentral: Anamatagga Samyutta](#)” in *Samyutta Nikāya* (SN).
- You and I have existed “forever.” We will continue to live in one of the 31 realms until we attain the Arahant hood and then attain *Parinibbāna*. *Parinibbāna* means “complete Nibbāna.” That is completely separating from this world of 31 realms. No more rebirths in this world. No more suffering.
- I have discussed this in detail in the post, “[Origin of Life – There is No Traceable Origin.](#)”

5. The above statement of a life existing from a time with no traceable beginning may seem to be contradictory to the fundamental concept that nothing in this world lasts forever. There is no contradiction.

- At any time, a given “life-stream” has a *hadaya vatthu* (seat of mind) and several *pasāda rūpa* ranging from zero (in *arūpāvacara* realms or planes) to five (in *kāma* realms). *Hadaya vatthu* and a set of *pasāda rūpa* are the “*manomaya kāya*” that every living being has. It is unimaginably small (smaller than an atom in modern science). **That *manomaya kāya* keeps changing as the life-stream moves among the 31 realms.**
- The *manomaya kāya* is a “mental body.” But “body” here means a “collection,” the collection of *hadaya vatthu* and a set of *pasāda rūpa*. One’s “mental body” weighs much less than a mustard seed. In fact, at the moment of conception (“*paṭisandhi viññāna* descending to the womb), our “physical body” consists only of a single cell (zygote), as we discussed in “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya”.](#)”
- In humans and animals, this *manomaya kāya* is the same as *gandhabba*. For *brahmā*, *manomaya kāya* is all they have!
- The “mental body” (*gandhabba*) is what controls the massive physical body of a human or an animal.

A Worldview Based on Experience

6. The Buddhist worldview is not a theory or speculation. The Buddha could “see” each of the 31 realms of this world. He could “see” how a life-stream moves from one realm to another based on *kamma vipāka* and prevailing conditions, i.e., *Paticca Samuppāda*.

- Many *suttā* describe Buddha’s and his disciples’ visits to *brahma* and *deva* planes. Others describe visits of *brahmā* and *devas* to the human world (mainly to listen to the discourses of the Buddha and to ask questions from the Buddha).
- For example, in the *Vinaya Piṭaka*, it is described that billions of *devas* and *brahmā* were there to listen to the first discourse of the Buddha, *Dhammacappavattana Sutta* (SN 56.11). The *Brahmanimantanika Sutta* (MN 49), describes how the Buddha visited the realm of the *Mahā Brahma* to explain to him that his existence is not eternal; see, “[Anidassana Viññāna – What It Really Means.](#)”
- One time, a brahmin came to the Buddha and asked whether the Buddha believes in the existence of *devas*, *brahmā*, *apāyā*, etc. The Buddha told him that he “sees” them and communicates with them. If someone comes across the name of that *sutta*, please let me know: lal@puredhamma.net. I will add that reference here.
- August 28, 2019: Reader Siebe sent me the following reference: “[WebLink: suttacentral: Devadūta Sutta \(MN 130\)](#)” that describes “hells” or “*niraya*.” A translation at: “[WebLink: accesstoinsight.org: Devaduta Sutta: The Deva Messengers.](#)” A similar *sutta* about some realms located close to Earth are described in the “[WebLink: suttacentral: Ātānātiya Sutta \(DN 23\)](#).” A translation there, “[WebLink: suttacentral: The Ātānātiya Discourse \(DN 23\)](#).” Also, see my post on August 28, 2019, at the discussion forum on,

“[WebLink: Pure Dhamma Forums: Questions on Posts in the “Origin of Life” Subsection.](#)” It discusses “life in hell.”

- More information on hells at: “[Does the Hell \(Niraya\) Exist?](#).” I revised and updated that post on August 29, 2019.

7. More than 2500 years ago, the Buddha described the “physical world” consisting of billions of galaxies with billions of stars in each galaxy (with different names of course).

- On the other hand, even a few hundred years ago, modern science’s view of the universe was that it included only the Solar system.
- In the early 1600s, Galileo invented the telescope. He first saw that the Moon is similar to the Earth in composition, that the stars are no different from our Sun. With more powerful telescopes, we now know that there is an unbelievable number of stars (with planets around them) out there.

8. However, the Buddha taught that studying the physical structure of the universe is not beneficial. While it is an exciting subject, studying that would not solve the “problem of suffering.” We have only a limited time in this life, and we must focus on the task of removing future suffering.

- Regarding that aspect, one should focus on one’s inner world. In particular, on the issue of how suffering-filled rebirths materialize due to one’s thoughts, speech, and actions. We do not need telescopes or other fancy instruments for that. We can use our minds.
- By the way, by focusing on the mental phenomena, one can also find much more about the physical world with billions of galaxies WITHOUT any scientific instrument. That is how the Buddha knew more about the universe than modern scientists.
- Therefore, the Buddhist worldview can provide a complete description of how our world. The Buddha explained how an infinite number of “life-streams” takes different forms in a rebirth process that has no beginning.

What is One’s World?

9. A given person’s world is what he/she experiences. What exactly do we experience?

- We see forms with our eyes, hear sounds with ears, taste with tongues, smell with the nose, body touches with physical bodies. Those are the five physical sense faculties and the five types of “external entities” experienced by them. Modern science still thinks the mind is an “emergent phenomenon” arising from the brain.
- However, in Buddha Dhamma, the mind is much more critical than those five physical senses, and we will see why.

10. With the mind, we remember past events, think about concepts like mathematics or Buddha Dhamma, and plan for the future. That latter is the most crucial task by the mind. We think about, plan, and initiate activities by generating *saṅkhāra* in mind.

- Most such activities start due to ignorance (*avijjā*) about the real nature of this world. That is why the *akusala-mūla* Paticca Samuppāda cycle begins with “*avijjā paccayā saṅkhāra.*” We create good/bad kamma via *saṅkhāra*, which lead to defiled *viññāṇa* via “*saṅkhāra paccayā viññāṇa.*”
- When *viññāṇa* become strong enough, they can become *paṭisandhi viññāṇa* that fuel the rebirth process. We will discuss this later. **That is how the mind creates future existences in the Buddhist worldview.**

Our World Consists of Twelve *Āyatana*s

11. The “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” describes in detail the sensory experience in the Buddhist worldview. For an English translation see, “[WebLink: suttacentral: The Six Sets of Six \(MN 148\)](#).” We will discuss this *sutta* in detail.

- In that *sutta*, the Buddha labeled our six types of internal sense faculties as six “internal *āyatana*” (*ajjhātikāni āyatanāni*). Furthermore, he called the six external entities sensed by them as “external *āyatana*” (*bāhirāni āyatanāni*). From now on, we will use the terms “internal *āyatana*” and “external *āyatana*.”
- As I emphasize often, it is best to learn what is meant by some critical Pāli words and use those Pāli words. In many cases, there are no exact English translations. Note that in the above English translation of the *sutta*, the word “*āyatana*” translated as “base.” When we start discussing *Paticca Samuppāda*, you will see why it is better to use the Pāli term, *āyatana*.
- In summary, our world consists of twelve *āyatana*. Material wise, there is NOTHING ELSE in the world. The Buddha called those twelve “*sabba*” or “all”; see, [WebLink: suttacentral: Sabba Sutta \(SN 35.23\)](#).

12. The [WebLink: suttacentral: Āyatanavibhaṅga](#) provides details on the twelve *āyatana*. For example: “*Tattha katamaṃ cakkhāyatanaṃ? Yaṃ cakkhu catunnaṃ mahābhūtānaṃ upādāya pasāda attabhāvaparipāpanno anidassano sappaṭigho, yena cakkhunā anidassanena sappaṭighena rūpaṃ sanidassanaṃ sappaṭighaṃ passi vā passati vā passissati vā passe vā, cakkhumpetaṃ cakkhāyatanaṃpettaṃ cakkhudhātupesā cakkhundriyampetaṃ lokopeso dvārāpesā samuddopeso paṇḍarampetaṃ khetampetaṃ vatthumpetaṃ nettampetaṃ nayanampetaṃ orimaṃ tīrampetaṃ suñño gāmpeso. Idaṃ vuccati “cakkhāyatanaṃ.”*”

Translated: “What is *cakkhāyatana*? It is that *cakkhu pasāda* derived from the four great elements. It is **invisible** (*anidassano*), makes contact (*sappaṭighena*) with visible (object).”

- I have just translated the first part with an important fact: One cannot see the *cakkhāyatana*. **It is NOT the eyes.** We will discuss in the next post how eyes act like cameras, just capturing the signal from the object. The brain processes that signal, which then is passed on to the *cakkhāyatana*.
- **In the same way, *sotāyatana, ghāṇāyatana, jivhāyatana, kāyāyatana* are all invisible.** Those five are the *pasāda rūpa* that I mentioned above. They are in the *manomaya kāya*, around the *hadaya vatthu* (seat of mind). Also see, “[Rūpa \(Material Form\)](#).”
- The *hadaya vatthu* and five *pasāda rūpa* are in the *manomaya kāya* overlap the heart in the physical body. That is why the *manomaya kāya* comes out when the heart is stressed, like during some heart operations; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

Internal and External *Āyatana*

13. The six INTERNAL *āyatana* (*cakkhu, sota, ghāṇa, jivhā, kāya, and mana*) are responsible for detecting sensory inputs.

- They are all very fine *rūpa* (traces of matter) at the *suddhatthaka* level, i.e., they are the smallest units of matter.
- However, their ability to detect external *rūpa* comes from the *kammic* energy embedded in them. Those *kammic* energies induce rotation and spin modes, i.e., those *suddhatthaka* start turning and spinning just like electrons in an atom. That is why they called units of ten or *dasaka*. For example, *cakkhu rūpa* is called a *cakkhu dasaka*. It has a *suddhatthaka* (eight units of matter) and two units of energy (one in rotation and one in spin). See, “[The Origin of Matter – Suddhatthaka](#).”
- Yes. The Buddha knew about rotation and spin before modern science. “Energy” can be in **spin** (*bramaṇa* in Pāli; *bramaṇa* or බ්‍රමණ in Sinhala) and **rotation** (*paribbramaṇa* in Pāli; *bramaṇa* or භ්‍රමණ in Sinhala). See, “[31 Realms Associated with the Earth](#).”

14. There are six types of EXTERNAL *āyatana* (*vaṇṇa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and *dhamma rūpa* or *dhammā*).

- Most times, *vaṇṇa rūpa* are called *rūpa rūpa* or just *rūpa*. In the *Chachakka Sutta*, they are just called *rūpa*. Those are the ones we see with our eyes. Many people assume that those are the only *rūpa*. That is because they do not perceive sound as a form of *rūpa*, for example. But a sound-wave carries energy.
- Even modern science accepted that energy and matter are indistinguishable only after Einstein found the connection between energy and matter with his famous equation, $E = mc^2$.
- *Gandha* or smell is associated with fine particles of odor that flow through the air and get into our noses. *Rasa* or taste comes from the food we eat. *Phoṭṭhabba* or touch is with solid matter. So, those are also *rūpa*.
- Yes. Some of *dhamma rūpa* or *dhammā* (sensed by the mind) are also *rūpa*. *Dhammā* are called *sukhuma rūpa* because they are below the *suddhaṭṭhaka* stage. See, “[What are Rūpa? – Dhammā are Rūpa too!](#).” Also, the mind can detect memories (*nama gotta*) and concepts (like mathematics) too.

15. We have discussed all types of matter (and energy) in our world within the Buddhist worldview. In the next post, we will discuss how our mental experience (through *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*) arise when internal *āyatana* come into contact with external *āyatana*.

5.2.8.4 Contact Between Āyatana Leads to Vipāka Viññāṇa

.2

September 2, 2019; revised November 14, 2019

Introduction

1. *Vipāka viññāṇa* arise due to *kamma vipāka*. In the previous post, we introduced the concept that our sensory experiences occur due to six internal *rūpā* and six external *rūpā*.

- Those six types of internal types of *rūpā* are “internal *āyatana*.” In mundane terms, those are our eyes, ears, nose, tongue, body, and the mind.
- With those, we experience sights, sounds, smells, tastes, body touches, and *dhammā* (memories, concepts, and our hopes). Those *rūpā* are external to us, and they are “external *āyatana*.”
- You may wish to review the previous post, “[Buddhist Worldview – Introduction](#).”

Awareness of Living Things and Living Beings

2. When we look at a tree, for example, that is contact between our internal *āyatana* (eyes or more correctly *cakkhu pasāda rūpa*) and external *āyatana* (tree in this case). That leads to a mental phenomenon that we call consciousness (in this case *cakkhu viññāṇa*). It just means we are “aware of that tree.”

- Humans and animals generate such “awareness” or consciousness when seeing, hearing, smelling, tasting, external *rūpā*.
- However, we know that plants and trees also seem to be aware of the external world and can even respond in some cases. For example, a plant or a tree can “turn” towards sunlight. Their roots grow towards sources of water, and away from dry soil, etc.

3. There are a couple of “mental factors” (or *cetasika*) that are not exclusively “mental.” They can arise even without a mind. Those two are *vedanā* and *saññā*.

- *Vedanā* comes from (“ve” + “danā”) which means “විම දැනවීම”(vīma dānavīma meaning “being aware”) in Sinhala. That means to “become aware of something.” **When we make contact with an**

“external *āyatana*” via our six senses, we become aware of that external *rūpā*; that is *vedanā*. See, “[Vedanā \(Feelings\)](#).”

- At the fundamental level, *Saññā* means “recognition” of an object or a person or a concept, for example. In general, it is the recognition of an “external *āyatana*” or “external *rūpā*.” See, “[Saññā – What It Really Means](#).”
- Therefore, plants and trees have a basic form of *vedanā* and *saññā*. **A plant can “feel” when sunlight falls on it (*vedanā*), and recognize that as sunlight (*saññā*).**

4. However, a plant CANNOT generate *saṅkhārā* (thoughts) about those *vedanā* and *saññā*. One may ask: “Then how does a plant turn towards sunlight?.”

- Plants are like robots. A moving robot may have sensors that can detect obstacles in the way. That involves *vedanā* and *saññā* in the elementary sense.
- That robot may also have a computer in it which can instruct how to go around an obstacle, for example.
- The working of a plant is very similar. A plant seed has necessary “programs” installed in its cells to deal with the external environment. We discussed this a little bit in my posts on “living cells.” See, the old posts in “[Origin of Life](#).”
- Therefore, some “live things” like plants can generate *vedanā* and *saññā*, but they CANNOT create *saṅkhārā* and *viññāṇa*. We remember that *saṅkhārā* and *viññāṇa* arise via, “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.”

Two Types of *Viññāṇa* of a Living Being

5. A **living thing** like a tree may have *vedanā* and *saññā*. But only a **living being** like a human or an animal has a full set of mental phenomena: *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa*.

- In other words, only living beings have minds with which they can generate *saṅkhārā* (loosely called thoughts), which in turn leads to *viññāṇa*.
- Now we will focus on two types of *viññāṇa* that arise in a living being upon a sensory contact between one of its “internal *āyatana*” and the corresponding “external *āyatana*.”
- For simplicity, let us consider the contact between *cakkhu* and *vaṇṇa rūpā* (or *rūpā rūpā* or simply *rūpā*). In mundane terms, this means “contact” between eyes and a form or an object (such as a tree).
- However, It is essential to keep in mind that **it is the *cakkhu pasāda rūpā* in the mental body (*gandhabba*) that “sees” the *vaṇṇa rūpā* or the image captured by the eyes.** See, #11 through #14 in the post, “[Buddhist Worldview – Introduction](#).”

Vipāka Viññāṇa – No Strong *Kamma* Done

All our INITIAL sensory experiences are due to the results of our past *kamma*, i.e., they are *kamma vipāka*.

6. When eyes (or more correctly *cakkhu pasāda rūpā*) and *vaṇṇa rūpā* come into contact, *cakkhu viññāṇa* arises. ***Cakkhu viññāṇa* is “seeing.”**

- ***Cakkhu viññāṇa* arises due to *kamma vipāka*. In the same way, *sota*, *ghāṇa*, *jivhā*, and *kāya viññāṇa* are ALL “*vipāka viññāṇa*.”**
- Some *mano viññāṇa* are *vipāka viññāṇa*. For example, when we recall a past event that is a *mano viññāṇa* that cannot generate strong *kamma*.
- **There is no strong *kamma* done by *vipāka viññāṇa*.** By “strong *kamma*,” I mean *kamma* that can lead to future rebirths. Only *mano saṅkhārā* are involved in *vipāka viññāṇa* (via “*avijjā*”

paccayā saṅkhārā” and “*saṅkhārā paccayā viññāṇa*.” I will discuss that in the sub-section, “[Paṭicca Samuppāda – Not “Self” or “No-Self.”](#)”

- What is essential at this point is to remember that only *mano viññāṇa* can be either *vipāka viññāṇa* or *kamma viññāṇa* (we discuss below the second category). The other five types of *viññāṇa* (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya viññāṇa*) are only *vipāka viññāṇa*.

7. “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” describes the arising of such *vipāka viññāṇa*: “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ, ghāṇañca paṭicca gandhe ca uppajjati ghānaviññāṇaṃ, jivhāñca paṭicca rase ca uppajjati jivhāvīññāṇaṃ, kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ, manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ.*”

- For example, *cakkhu viññāṇa* arises when a *rūpa* makes contact (*paṭicca*) with *cakkhu pasāda rūpā*. As we discussed in #12 of the previous post “[Buddhist Worldview – Introduction](#),” *cakkhu* here DOES NOT mean “eyes”; it means “*cakkhu pasāda rūpa*.”
- When the eyes capture an image of a tree, that image is processed by the brain and then passed along to the *cakkhu pasāda rūpa* that is in the mental body or *manomaya kāya*. In the case of a human or an animal, *manomaya kāya* is the same as *gandhabba*.
- *Vipāka viññāṇa* do not generate strong *kamma*. For example, *cakkhu viññāṇa* means just “seeing,” *sota viññāṇa* means only “hearing,” etc. Just because one sees or hears, one does not do any strong *kamma*.

***Vipāka Viññāṇa* Could be “Consciousness”?**

8. Therefore, *vipāka viññāṇa* DO NOT arise due to *Paṭicca Samuppāda*. They occur when our sense faculties come to contact with external *rūpā*, as described in #7 above. Those *rūpā* can be six types: *vaṇṇa rūpā*, *sadda*, *gandha*, *rasa*, *phoṭṭhabba*, and *dhammā*.

- The contact of an internal *āyatana* with an external *āyatana* leads to the “awareness” of that external *rūpā*.
- Therefore, *vipāka viññāṇa* could be the closest to the English word, “consciousness.” Even then, there are some *mano saṅkhārā* that arise with a *vipāka viññāṇa*. Therefore, it is better not to refer to even *vipāka viññāṇa* as just consciousness.
- **That is why the Buddha described *viññāṇa* as a magician.** But this “magic show nature” is easier to see with *kamma viññāṇa* that we discuss below. The mind on its own creates *kamma viññāṇa* via *saṅkhārā* (“*saṅkhārā paccayā viññāṇa*”).

9. When we become conscious of an external *āyatana* (or an external *rūpā*), we may get interested in it. (We need to remember that external *rūpā* include visible objects, sounds, smells, tastes, bodily touches, or memories),

- That is when we start generating NEW *KAMMA*. That will happen **IF** we get attached to that sensory experience via greed or anger, for example.
- Those CONSCIOUS thoughts (called *saṅkhārā*) lead to a new type of *mano viññāṇa*. Those *viññāṇa* arise via “*avijjā paccayā saṅkhārā*” followed by “*saṅkhārā paccayā viññāṇa*.” Such *viññāṇa* are *kamma viññāṇa*.
- Such *kamma viññāṇa* MAY arise as the next step following the generation of any of the six types of *vipāka viññāṇa*. **That happens ONLY IF we get attached to the initial *vipāka viññāṇa*.**

Kamma Viññāṇa* – How We Create New *Kamma

10. We do *kamma* when we start generating conscious thoughts (*vacī* and *kāya saṅkhārā*) with INTENTION. The Buddha said, “*Cetanāhaṃ, bhikkhave, kammaṃ vadāmi*” or, “*bhikkhus, I say that kamma is one’s intention.*” ([WebLink: suttacentral: Nibbedhika Sutta – AN 6.63.](#)) When we think, speak, and act with specific INTENTION (good or bad) that leads to the generation of *kamma* (good or bad).

- However, **those initial *mano saṅkhārā* (associated with *vipāka viññāṇa*) arise AUTOMATICALLY.** Since the intention is involved indirectly, those *mano saṅkhārā* cannot bring about rebirth.
- To generate strong *kamma*, we must CONSCIOUSLY and DELIBERATELY create *saṅkhārā*.
- Such “strong *saṅkhārā*” are *vacī* and *kāya saṅkhārā*. As we have discussed before, *vacī saṅkhārā* involves “talking to oneself” and also speech. *Kāya saṅkhārā* leads to bodily actions.
- In other words, **we do *vacī kamma* and *kāya kamma* with those *vacī saṅkhārā* and *kāya saṅkhārā*.** Of course, *vacī kammā* are lying, gossiping, etc., and *kāya kammā* are stealing, killing, etc.
- Stated yet another way, we generate speech and actions that can lead to future rebirths only via *vacī* and *kāya saṅkhārā*.

11. For those who are familiar with *Abhidhamma* (others can skip this and move on to #12): A sensory event discussed in #7 starts a *pañcadvāra citta vīthi* with 17 *cittā*. The *vipāka viññāṇa* occurs at the beginning of the *citta vīthi*. For example, in a “seeing event,” it is a *cakkhu viññāṇa*.

- Then, the mind accepts that sensory input with *sampaticchana* and *santirana citta*. It is in the next *citta* of *votthapana* that our minds MAKE decisions on how to respond to that sense input BASED ON our *gati* (character qualities).
- Then based on that determination, seven *javana citta* run consecutively. It is with *javana citta* that we respond (think, speak, and act).
- That is a very brief summary. More details at “[Citta Vīthi – Processing of Sense Inputs.](#)”

Kamma Viññāṇa Arise Due to “Saṅkhāra Paccayā Viññāṇa”

12. Suppose one sees an appealing object and gets attached to it. One may then start thinking, speaking, and even taking action on trying to enjoy that sight again and again. That leads to the generation of *kamma* via *mano viññāṇa* (generated via *vacī* and *kāya saṅkhārā*.)

- The same happens if one gets annoyed or angry about something we see. Then one would be generating angry thoughts, speech, action. Those are also *mano viññāṇa*. **Such *mano viññāṇa* are “*kamma viññāṇa*.”**
- Of course, both those cases arise due to *avijjā*. **We get attached (or get stuck) to a given sensory input because we like it or dislike it (both are done with *taṇhā*; see below).** Both happen due to *avijjā*, not knowing the “true nature.” One comprehends the true nature when one attains “*yathābhūta ñāṇa*.” We will discuss this in future posts.

13. **We can sort out the difference by seeing that all *kamma viññāṇa* have *saṅkhārā* as precursors.** They arise when we think, speak, act based on greed, anger, and ignorance. I will explain just the case of attachment (*taṇhā*) via greed.

- For example, when we first see something attractive, we AUTOMATICALLY get the perception of “liking it.” Those INITIAL and AUTOMATIC thoughts are *mano saṅkhārā*. These arise due to our *gati*.
- If we start pursuing such thoughts CONSCIOUSLY AND WILLFULLY, then we are generating *vitakka* and *vicāra* (which means consciously thinking about it). Those are *vacī saṅkhārā*. We may also speak out with such *vitakka/vicāra*, and *vacī saṅkhārā* are also responsible for speech.

- If our mind gets firmly attached, we may take actions using the body. Those bodily actions are due to *kāya saṅkhārā* generated in mind.

14. Now, we can see the difference between *vipāka viññāṇa* and *kamma viññāṇa*. *Vipāka viññāṇa* do not have *saṅkhārā* involved.

- On the other hand, *kamma viññāṇa* ALWAYS arise due to *saṅkhārā* generated via *avijjā*. Those are the *viññāṇa* that can lead to future *vipāka* (and even rebirth) via *akusala-mūla Paṭicca Samuppāda*.
- In other words, *kamma viññāṇa* are the *viññāṇa* arising via “*avijjā paccayā saṅkhārā*” followed by “*saṅkhārā paccayā viññāṇa*.”
- That process continues with “*viññāṇa paccayā nāmarūpa*,” etc. and ends up in “*bhava paccayā jāti*,” “*jāti paccayā jarā, maraṇa*,” and “the whole mass of suffering.”
- That is why those created with *saṅkhārā* are *kamma viññāṇa*.

Summary

15. To summarize what we discussed in this post:

- ***Cakkhu, sota, ghāṇa, jivhā, and kāya viññāṇa* are ONLY *vipāka viññāṇa*. They cannot lead to new rebirths.**
- ***Kamma viññāṇa* are those *viññāṇa* that COULD lead to future rebirths.**
- ***Mano viññāṇa* can be “*vipāka viññāṇa*” or “*kamma viññāṇa*.”**

16. We will discuss more details in the next post. I am proceeding slowly to emphasize these fundamental ideas. It is crucial to be able to understand what is MEANT by a given critical key Pāli word. Then we can use that Pāli word, without having to explain its meaning again.

- I hope by now you can appreciate why it is not correct to translate *viññāṇa* as just “consciousness”.
- In the same way, *taṇhā* is NOT just greed. *Taṇhā* includes getting attached via anger too; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).” Also, see #12 above.
- There are several keywords like that, including *anicca* and *anatta*.
- It is critical to understand the meanings of such key Pāli words since there are no equivalent English words.

5.2.8.4 How Do Sense Faculties Become Internal Āyatana?

.3

September 8, 2019

Introduction

1. Sense faculties are a key concept in Buddha Dhamma. In mundane usage, we are used to identifying sense faculties as eyes, ears, nose, tongue, and the body.

- However, in Buddha Dhamma, there are two different Pāli words depending on the usage of those sense faculties.
- The sense faculties of a normal human are “**internal āyatana**.” With those, an average person experiences the outside world AND **forms attachments to them**.

- Then those external *rūpā* become **“external āyatana”** (for example, “my house”, “my friend”, etc); see, **“[Contact Between Āyatana Leads to Vipāka Viññāna.](#)”** **Therefore, external āyatana are the external rūpā that one gets attached to.**

2. An *Arahant* has removed all greed, anger, and ignorance from the mind. The sense faculties of an *Arahant* are *indriya*. With his sensory faculties, an *Arahant* experiences **“external rūpā”** such as “a house”, “a person”, etc. without any attachment. That house may be an elegant house where he lived some time back. But now it is just a house. That person could have been a “close friend” at that time, but now just another human being. Of course, the *Arahant* will recognize the house to be the one he lived in as a child and that the person was his friend.

- **In brief, a sense faculty is an *indriya* if there is no “attachment.” It becomes an internal āyatana if one is attracted to it or repulsed by it. In the same way, an external rūpā becomes an external āyatana if one becomes attached to it.**
- The Pāli word for attachment is “*taṇhā*.” It is critical to realize “attachment” can take place via greed, anger, revulsion, or ignorance. Once “attached”, one just keeps thinking about it (that means generating *sāṅkhāra*; see below). Also, see **“[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”**

How Do *Indriya* Become Internal *Āyatana*?

3. First, let us further clarify the difference between an *internal āyatana* and an *indriya*.

- We have six sense faculties, not just the five mentioned above. They are eyes (*cakkhu*), ears (*sōta*), nose (*ghāṇa*), tongue (*jivhā*), body (*kāya*), and the mind (*mano*).
- Our initial sense inputs (what we see, hear, etc) are due to *kamma vipāka*. **At the moment we experience them, we are using our sense faculties as *indriya*.** For example, when we see an attractive person while on the road, that is just “seeing the event” with the *cakkhu indriya*.
- However, based on those initial sense experience, we may INTENTIONALLY use those *indriya* to enjoy that sensory experience again and again. Then those *indriya* become *āyatana*. In the above example, if we get attached to that attractive person and keep looking at that person, then we are using our eyes as *cakkhāyatana* (*cakkhu āyatana* rhymes as *cakkhāyatana*.)
- **Therefore, an initial sensory event is captured by an *indriya*.** But just after receiving that sensory input, we tend to use that sense faculty as an internal *āyatana*. That happens if we get attached or form “*taṇhā*”; see #2 above.
- There is no equivalent English word for *āyatana*, so we will keep using *indriya* and *āyatana* from now on.

4. Let us take the example of two people eating a delicious cake. One is an average human (X) and the other a *Arahant*. Here the sense faculty is taste (*jivhā*).

- Both will generate the same kind of *jivhā viññāna* when they first taste it. That is just the taste of the cake. If the sensory elements in the tongue and the brain are working normally, both will be likely to find that cake “tasty.” That “good taste” is a *kamma vipāka*. (By the way, there is an infinite number of *kamma bīja* waiting to bear fruit, including such a “small *vipāka*” as tasting a piece of cake.)
- The difference becomes apparent just after tasting the cake. The *Arahant* would forget all about that taste, even though he/she would have felt the “good taste.” It was just a sensory experience and thus the *Arahant* was using that sense faculty as an *indriya*.
- On the other hand, X may “fall in love” with that tasty cake. She may ask for another serving. **Now she is using that sense faculty as an *āyatana*.** She will be accumulating NEW *kamma* with such actions.

How One *Indriya* Can Lead to Many *Āyatana* (*Salāyatana*)

5. In many cases, when we experience a sensory event due to one *indriya*, we may start using some or all of the six *indriya* as *āyatana*. Then the set of *indriya* becomes *saḷāyatana*.

- In the above example of a tasty cake (which is a *kamma vipāka* for both), they both experience “a tasty cake.” While the *Arahant* will not have any more thoughts about that taste, the average human (X) may be just getting started. She may ask for another piece even if she is not hungry.
- Let us analyze the situation carefully. The *Arahant* may accept for a second piece if he is hungry. That request was not made because of a greedy thought. Thus, the tongue (or more precisely the *jivhā pasāda*) has NOT become a *āyatana*.
- If X asks for another piece even if she is not hungry, that is definitely due to craving for that taste. Then her tongue has become a *āyatana*. If she is hungry, her request could be based on BOTH hunger and craving. So, now her tongue (more precisely *jivhā pasāda*) is still a *āyatana*, but the difference is not as clear cut.

6. Whether or not X’s *jivhā pasāda rūpā* (internal *indriya* for tasting) has truly become a *āyatana* or not may become more clear if she takes further action.

- She may smell it and say, “it smells good too.” She may keep saying how good the taste is, and ask for the recipe or inquire about where to buy one.
- Now many of her sense faculties have become *āyatana*. *Ghāṇa pasāda rūpā* (for smelling) has now become *ghāṇāyatana* (*ghāṇa* + *āyatana*).
- She is thinking about how to go about tasting that cake again. Therefore, the mind (*mana*) has become *manāyatana* (*mana* + *āyatana*).
- If she starts writing down the recipe, her body (*kāya*) is helping out too, acting as a *kāyāyatana* (*kāya* + *āyatana*).
- Therefore, when more than one *āyatana* become engaged, the set of *āyatana* (called *saḷāyatana*), may come into play. But it all started with just one sensory input, in this case eating a piece of cake.

Indriya Become Āyatana With Saṅkhāra

7. The easiest way to figure out whether an *indriya* has become an *āyatana* or not is to check whether one has started generating CONSCIOUS thoughts about that sensory input or experience.

- Interest in a sensory input leads to attachment to it via greed, revulsion, or ignorance.
- For example, the smell of good perfume can lead to thinking about buying it. Seeing an enemy, one may generate angry thoughts. In some situations, one may get confused about what to do and make the wrong decisions.
- **Such CONSCIOUS thoughts are *vacī* and *kāya saṅkhāra*.**
- *Vacī saṅkhāra* are “talks to oneself” and possibly speaking too. First, greedy/angry/ignorant thoughts are generated and those may lead to speaking out (lying, gossiping, etc).
- *Kāya saṅkhāra* involve bodily actions, for example, hitting, stealing, killings, etc. Here one would be using *āyatana* since one would need to look and hear in addition to moving body parts.

8. Most of the time we use our sense faculties as *indriya*: we see, hear, etc many things in a day but ignore most of them. But when we experience something we have a craving for, then we start using our sense faculties as *āyatana*.

- The *akusala-mūla Paṭicca Samuppāda* cycle operates only when we use our sense faculties as *āyatana*.
- Those *saṅkhāra* do not arise in an *Arahant*. That is because such *saṅkhāra* arise due to *avijjā*, i.e., they arise via “*avijjā paccayā saṅkhāra*.”

- An *Arahant* ALWAYS uses his/her sense faculties as *indriya*. He/she will see, hear, etc just like an average human, but will not get “attached to” anything. Therefore, the *akusala-mūla Paṭicca Samuppāda* cycle does not operate for an *Arahant*.

Abhisāṅkhāra* Are Stronger Versions of *Sāṅkhāra

9. Some of those “extra activities” that we do with *āyatana* could be *abhisāṅkhāra*. Just eating a cake is not *abhisāṅkhāra*; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha](#).”

- The distinction between *sāṅkhāra* and *abhisāṅkhāra* is clear-cut when those conscious thoughts (and therefore speech and actions) become immoral.
- Generating thoughts of anger on a person is *abhisāṅkhāra*. Then telling a lie about that person is also *abhisāṅkhāra*. Both are *vacī kamma* done with *vacī (abhi)sāṅkhāra*.
- Stealing something or hitting someone is a *kāya kamma* done with *kāya (abhi)sāṅkhāra*.
- Therefore, obviously immoral thoughts, speech, and actions are based on *abhisāṅkhāra*. They are *apuññābhisāṅkhāra (apuñña + abhi + sāṅkhāra)* or immoral strong *sāṅkhāra*.

10. We can get some insights by analyzing the case of a young person (Z) becoming an alcoholic due to association with bad friends. As a child, Z may see a bottle of alcohol and would not generate any second thoughts about it. It would just be a “seeing event” and Z would be only using his eyes (or more precisely *cakkhu pasāda rūpā*) as *cakkhu indriya*.

- But Z had some bad friends and they persuaded him to start drinking. He has now become an alcoholic. If he sees a bottle of alcohol now, he would immediately think about having a drink. Of course, he would have a drink if he is at a party. If he is at home, and the bottle belongs to his father, he may steal a drink from it. If he is traveling by himself and sees a bar, he may go in and have a drink.
- It could get even worse. He may be drinking at a party and may get into an argument with someone. Suppose that leads to a fight and he kills that person. He may get the death sentence or at least go to jail for a long time. But a much worse outcome awaits him at his death. He would be born in an *apāya*.
- I hope you can see that *vacī* and *kāya sāṅkhāra* are behind all those. In fact, they are strong *sāṅkhāra*. They are thus *abhisāṅkhāra*. If he kills someone, that is due to an *apuññābhisāṅkhāra*. That would qualify him to be born in an *apāya*.

11. There are also *puññābhisāṅkhāra (puñña + abhi + sāṅkhāra)* or moral strong *sāṅkhāra*.

- For example, feeding a hungry person or giving to charity are *kāya kamma* done with strong *kāya sāṅkhāra*. They are both *puññābhisāṅkhāra*.
- Such strong *puñña kamma* done with *puññābhisāṅkhāra* lead to good rebirths (in human and higher realms).

How Do External *Rūpā* Become External *Āyatana*?

12. The moment an *indriya* becomes an internal *āyatana*, the corresponding external *rūpā* becomes an external *āyatana*.

- Let us consider the following example. You are walking down a street and see a person coming toward you at a distance. Without recognizing who it is, your eyes are working only as *indriya*. But as the person gets closer, you recognize him as one of your friends. At that moment, your *cakkhu indriya* has become a *cakkhāyatana*. At the same time, that external *rūpā* of a “person” has now become a “friend.”
- To take that one step further, suppose after some time you get into an argument with that friend and it escalates to the point that he has become an enemy. Now if you see him on the road, you will recognize

him as an enemy. At that moment of seeing him, your *cakkhu indriya* will again become an internal *āyatana*, and his body that you see will become an external *āyatana*.

- However, those two external *āyatana* are very different. In one case you saw a friend and in the other an enemy, even though that external *rūpā* (body of that other person) was the same.

13. We can find many examples in our daily lives to see how an *indriya* becomes a *āyatana*. In another example, suppose you park the car on the side of the road and go to a restaurant to eat. When you come back, you see that someone has bumped his car into it and there is a scratch on it. You, of course, get upset.

- Suppose after a while you sell that car. Then a few days later, you see that it has been totally destroyed in an accident. But now you are not upset about the same car getting destroyed. When you see that badly-damaged car, your *cakkhu indriya* does not become an internal *āyatana*. And that external *rūpā* (the car) does not become an external *āyatana*.
- The only difference was that you had given up the attachment to that car the moment you sold it. It is no longer “your car.” It became just another car, the moment you gave up the “ownership” of the car.

How to Stop *Indriya* Becoming *Āyatana*?

14. That last example illustrates how one ends suffering at the *Arahanthood*. When one no longer attaches to ANYTHING in this world, one’s mind will not be perturbed by anything. That includes knowing that one day one’s own body will die.

- However, **that state of mind of *Arahanthood* cannot even be comprehended by an average human.** It is a long process from being an average human to an *Arahant*.
- We must follow the path step-by-step. Those attachments to “worldly things” CANNOT be forcefully removed from one’s mind. The first step is to comprehend the unfruitfulness and danger of doing IMMORAL things in order to get sensory enjoyment. See, [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#)
- However, it is good to get an overview of the “big picture” or the fundamentals of Buddha Dhamma at the beginning. That is necessary to discard the wrong views about this world including *kamma* and *kamma vipāka*, and the validity of the rebirth process. With wrong views about such fundamental concepts, one cannot even start on the Noble Eightfold Path.
- That is why this series on [“Origin of Life”](#) is so important. One must evaluate all existing views (which we summarized in the early posts in this series). The Buddhist view is more complex and it will take several more posts to complete.

5.2.8.4 *Indriya* Make Phassa and *Āyatana* Make Samphassa

.4

September 15, 2019; revised November 13, 2019

Summary of “Worldview of The Buddha” So Far

1. We are discussing the [“WebLink: suttacentral: Chachakka Sutta \(MN 148\)”](#) that describes in detail the sensory experience in the Buddhist worldview. As we will see, this *sutta* explains how each person’s world arises due to his/her actions.

- Each living being’s existence as a human, *deva*, animal, etc. has arisen due to past actions. Those previous actions (*kamma*) resulted due to sensory experiences at that time.
- If one does immoral actions (*pāpa kamma*) to gain/maintain sensory pleasures, *kamma vipāka* of those *kamma* lead to rebirths in “bad realms” called *dugati*. The word *dugati* comes from “*du*” + “*gati*” or “bad *gati*.” [*du-* : *dur-* prefix [Sk. *duḥ*, *duḥ*] Evil, bad, difficult. 惡的, 不好的, (困) 難的.]

- On the other hand, meritorious deeds (*puñña kamma*) lead to rebirths in “good realms” or *sugati* realms. The word *sugati* comes from “*su*” + “*gati*” or “good *gati*.” [*su*- prefix : kind, good, easy. 善的, 好的, 容易的]
- However, due to ignorance, living beings tend to do many more immoral deeds than moral ones. Therefore, more than 99% of the rebirths are in *dugati* realms. That is why the rebirth process is “filled with suffering.” See, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)”

With *Tanḥā*, *Indriya* Become *Āyatana*

2. Our sensory experiences constitute “our world.” We experience six types of sensory inputs (*rūpa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, *dhammā rūpa*) with six kinds of *indriya* we have (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, *mano*). When the corresponding pairs make “contact” (*phassa*), one of the six matching types of *viññāṇa* arise (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano viññāṇa*.) Those are *vipāka viññāṇa*. See, “[Buddhist Worldview – Introduction.](#)”

- Average humans go beyond experiencing *vipāka viññāṇa*. They deliberately make more sensory contacts to “enjoy them more.” Then the six *indriya* become six internal *āyatana*, and the six types of external *rūpa* become external *āyatana*. See, “[Contact Between Āyatana Leads to Vipāka Viññāṇa.](#)”
- An *indriya* makes “just contact” or “*phassa*.” **When sensory contacts are done “with attachment or *tanḥā*,” those *indriya* become internal *āyatana*.** That is the crucial concept explained in the previous post, “[How Do Sense Faculties Become Internal Āyatana?](#)”
- You may want to re-read the above posts if something is not clear. Of course, I would be happy to answer any questions.

The Transition from Just a Sensory Contact to *Kamma* Formation

3. Even for an average human, the INITIAL CONTACT between an internal *āyatana* and an external *āyatana* does not lead to the generation of strong *kamma*. For example, only when we see a beautiful thing or a person (called *rūpa rūpa* or just *rūpa*), that we become aware of that *rūpa*. (There are *mano saṅkhāra* that arise automatically. *Mano saṅkhāra* cannot lead to strong *kamma* responsible for rebirth. We will discuss that later.)

- However, for anyone who has not reached the *Arahant* stage, sense faculties are labeled as “internal *āyatana*,” and external *rūpa* are labeled “external *āyatana*.” That is evident in the *Chachakka Sutta* (MN 148).
- Only an *Arahant* uses his/her sense faculties as *indriya* all the time.

4. In the *Chachakka Sutta* (MN 148), that initial contact — for example between *cakkhāyatana* (*cakkhu*) and *rūpāyatana* (*rūpa*) — is stated as “***Cakkhuṅca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ.***” Similar statements are there for other five pairs, the last one being “*manaṅca paṭicca dhamme ca uppajjati mano viññāṇaṃ.*”

- We will focus on the progression of what happens due to the contact between *cakkhu* and *rūpa* (eyes and an external object in mundane terms.) Other types of contacts will lead to similar results.
- As stated in the *sutta*, the “attachment” step starts with the next paragraph. Regarding the contact between *cakkhu* and *rūpa*, it says, “***Cakkhuṅca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, tiṇṇaṃ saṅgati phasso.***” (Note that each successive paragraph of the *sutta* is the next step that the mind takes.)

What is “*tiṇṇaṃ saṅgati phasso*”?

5. The phrase “*tiṇṇaṃ saṅgati phasso*” is commonly mistranslated as “the meeting of the three is contact.” What are those three? Are they *cakkhu*, *rūpa*, and *cakkhuvīññāṇa*? That is not correct, because the

“contact” (*phasso*) leads to “*phassa paccayā vedanā*” as we will discuss below. This “*phassa paccayā vedanā*” arises AFTER *cakkhu viññāṇa*.

- **That short verse is a KEY verse in the whole sutta.** It expresses how an *indriya* becomes *āyatana* due to one’s *gati*. Those are the *gati* for attachment (*taṇhā*) via craving or dislike.
- “*Tiṇṇaṃ*” is three and “*saṅgati*” (“*san*” + “*gati*”) are “*gati* contaminated with *san*.” Normal humans have *gati* based on three fundamental root causes: *lobha* (greed), *dosa* (anger/hate), and *moha* (no comprehension of the Four Noble Truths). That is why “*san*” is a keyword in Buddha Dhamma; see, [“What is ‘San’? Meaning of Sansāra \(or Samsāra\).”](#) [*saṅgati* :[f.] association with. *gati* :[f.] going; career; course; passing on to another existence; destiny; behaviour.]
- Just like the word “*san*,” another critical Pāli word that has lost its significance over the years is “*gati*.” I have explained this word in detail in many posts. See, for example, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)”](#) and [“9. Key to Anapanasati – How to Change Habits and Character \(Gati\).”](#)

Phassa in “*Tiṇṇaṃ Saṅgati Phasso*” Is *Samphassa*

6. Therefore, following that initial sensory contact, one MAY form a like/dislike for the seen, heard, smelled, tasted, touched, or memory that came to mind (*dhammā*). But it happens within a fraction of a second of the initial *cakkhu viññāṇa*.

- For example, a young lady looking at a dress may form a liking for it. Another person seeing his enemy will develop a dislike. A teenager may get attached to a particular song, etc.
- Such mental contacts — with likes/dislikes or “*san*” — happen instantaneously, due to our “*gati*.” We do not have any control over it.
- However, there is a lag time between that initial reaction and our subsequent conscious actions. Therefore, we still have time to control our speech or bodily actions. Even if bad thoughts come to our minds, we can stop any speech or bodily actions. That is what we do in “*kāyānupassanā*” in *Satipatthāna* meditations. See, [“9. Key to Anapanasati – How to Change Habits and Character \(Gati\)”](#) and [“Mahā Satipatthāna Sutta.”](#)
- Those contacts (*phassa*) done with “*san*” are *samphassa*. **Here, “*san*” + “*phassa*” combine to rhyme as “*sanphassa*.” But “*samphassa*” rhymes better.** In the same way, “*saṅsāra*” (“*san*” + “*sāra*” or “good”) is commonly pronounced — and written — as “*saṃsāra*.”

No *Samphassa* for an *Arahant*

7. An *Arahant* has no “*gati*” left. All defiled “*gati*” arise due to *lobha*, *dosa*, *moha*. Therefore, an *Arahant* does not attach (*taṇhā*) to any sensory event. In other words, “*tiṇṇaṃ saṅgati phasso*” does not take place in an *Arahant*’s mind. Also, note that attachment (*taṇhā*) can be due to attraction (liking) or aversion (dislike). See, [“Tanhā – How We Attach Via Greed, Hate, and Ignorance.”](#)

- That is why an *Arahant* will never elevate his *indriya* to “internal *āyatana*.” Therefore, any external *rūpa* sensed by a given *indriya* will be “just a *rūpa*.” No matter how attractive a person is or how tasty a given food, etc. there will be no attachment to it. A bribe of any value will not be able to entice an *Arahant*.
- In the same way, even if someone cuts his/her arm off, there will be no anger generated in an *Arahant*’s mind.
- Such a mindset is incomprehensible to an average human. **That is WHY one should not even contemplate that far on the Path.** When we are on a long journey on foot, we focus on the next mile, not the final stretch hundreds of miles down the road. However, it is good to have a general idea about the whole terrain.

8. The state of mind of an *Arahant* could seem “hard-to-achieve” even to an *Anāgāmi*, even though it may no longer seem incomprehensible.

- For a *Sotāpanna*, the mindset of an *Anāgāmi* seems “out-of-reach.” As we know, the *Anāgāmi* stage is reached by getting rid of cravings for sensory pleasures. It is not easy to remove our deeply-embedded desires for sensory pleasures. For an average human, this would be impossible. But a *Sotāpanna* has seen the “*anicca* nature.”
- However, a *Sotāpanna* will not be tempted to do immoral actions to enjoy sensory pleasures. A *Sotāpanna* could be living a normal life of a “householder,” one will NEVER engage in any “*apāyagāmi* actions.” Those are immoral deeds that makes one eligible to be born in the *apāyā*. For example, a *Sotāpanna* will not engage in extra-marital affairs.

“*Phassa Paccayā Vedanā*” Is Actually “*Samphassa jā Vedanā*”

9. Now we get to the next verse in the *Chachakka Sutta* (MN 148): “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā.*”

- (I hope you see the way the *sutta* makes gradual progression. “*Phassa paccayā vedanā*” is the third step in the progress of the sensory experience. But all these steps — including more steps in the rest of *sutta* — happen within a split second. Only a Buddha can “see” these details in this fast process that occurs in mind.)
- From the above discussion, it is clear that “*phassa paccayā vedanā*” should be “*samphassa paccayā vedanā.*” **In some *suttā*, it is written as “*samphassa jā vedanā.*” Here “*jā*” means “born due to.” **In other words, it is a *vedanā* that arises due to “*samphassa.*”****
- Therefore, this is the SECOND TYPE of *vedanā* that can arise due to a sensory event. That CAN BE stopped from arising. That type of *vedanā* does not occur in an *Arahant*.

The difference in Sensory Experience Between an Average Human and an *Arahant*

10. “*Tiṇṇaṃ saṅgati phasso*” and “*phassa paccayā vedanā*” are two critical steps in the progression of the sensory experience.

- Those two steps state how anyone without full comprehension of *Tilakkhaṇa* (*anicca, dukkha, anatta* nature) COULD generate additional types of *vedanā*.
- Now we need to recall something important from the earlier posts, “[Contact Between Āyatana Leads to Vipāka Viññāna](#)” and “[How Do Sense Faculties Become Internal Āyatana?](#)” In those two posts, we discussed the initial sensory contact, for example, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ.*” That gave rise to a *vedanā* common to both an average human and an *Arahant*.
- As we discussed in the previous post, both an average human and an *Arahant* would feel the “sweetness” of a piece of cake. You may want to go back and read those two posts to refresh your memory.
- Now it is those two steps of “*tiṇṇaṃ saṅgati phasso*” and “*phassa paccayā vedanā*” that COULD generate ADDITIONAL *vedanā* of attachment (to the cake in that example) in an average human. Such *vedanā* DO NOT arise in an *Arahant* since there are no attachments left.

Summary

11. I am taking the two extreme cases of an average human and an *Arahant* to explain the critical concepts in the *Chachakka Sutta* (MN 148). In many key *suttā*, key ideas are just briefly stated, i.e., they are in either “*uddesa*” or “*niddesa*” versions. See “[Sutta – Introduction.](#)”

- I hope you can see that key *suttā* like the *Chachakka Sutta* (MN 148) need detailed explanations. That is the “*paṭiniddesa*” version of a *sutta*.
- That is why it is of minimal benefit to translate such a *sutta* word-by-word. There is no need to study many *suttā*. Understanding a few *suttā* in detail can lead to a good understanding of the core teachings of the Buddha.
- Therefore, it is essential to understand these fundamental ideas. If something is not clear, I would be happy to explain further.

12. We will discuss the types of *vedanā* that can arise due to “*phassa paccayā vedanā*” or more accurately, “*samphassa jā vedanā*.” See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”

An Aside (Extra Information)

13. The steps we have discussed so far, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā*” are just a part of the more general statement, “*saḷāyatana paccayā phasso; phassapaccayā vedanā,..*” in *Paṭicca Samuppāda*.

- In the [WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#), the terms “*phassa*” and “*vedanā*” are clarified as “*samphassa*” and “*samphassa jā vedanā*.” That applies only in the case of average human acting with *avijjā* (i.e., in *Paṭicca Samuppāda* and for the *Chachakka Sutta* (MN 148).
- “*Phassa*” in *Paṭicca Samuppāda* is explained in the *Vibhaṅga Sutta* (SN 12.2): “*Katamo ca, bhikkhave, phasso? Chayime, bhikkhave, phassakāyā—cakkhusamphasso, sotasamphasso, ghānasamphasso, jivhāsamphasso, kāyasamphasso, manosamphasso. Ayaṃ vuccati, bhikkhave, phasso.*”
- “*Vedana*” in *Paṭicca Samuppāda* is explained in the *Vibhaṅga Sutta* (SN 12.2): “*Katamā ca, bhikkhave, vedanā? Chayime, bhikkhave, vedanākāyā— cakkhusamphassajā vedanā, sotasamphassajā vedanā, ghānasamphassajā vedanā, jivhāsamphassajā vedanā, kāyasamphassajā vedanā, manosamphassajā vedanā. Ayaṃ vuccati, bhikkhave, vedanā.*”
- If you do not see the connection, don’t worry about it. We will discuss all types of *vedanā* in the next post. I just mentioned it for the benefit of those who may be able to see the connection. Everything in the *Tipiṭaka* is self-consistent.

5.2.8.4 Citta – Basis of Our Experience and Actions

.5.1

September 22, 2019; revised November 14, 2019

Introduction

1. We have been discussing the first few verses of the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” in the series on, “[Is There a “Self”?](#).” It is a good idea to take a break and look at what we have learned from a different point-of-view.

- The Buddha called himself a “*vibhajjavādi*.” That means he explained things in great detail by diving and subdividing a given entity or concept to examine it at more fundamental levels.
- That is very much like what the scientists are doing today. They first explained the matter in terms of molecules, and then with atoms. Later, they found that an atom consists of a nucleus and electrons in orbitals around it. Then they probed the nucleus and discovered that more fundamental particles (with names like gluons, and quarks) make up the nucleus.
- By probing deeper, physicists also came up with Quantum Mechanics. Matter and energy are “quantized” on a small scale. That just means they come in “packets” or “quantā” (the singular is “quantum.”)
- More than 2500 years ago, the Buddha taught that matter and energy are quantized. The smallest “quantum” in Buddha Dhamma is a *suddhāṭṭhaka*. But that is not relevant to the present discussion.

Sensory Experience is Quantized – It comes in “Packets”

2. I am not going to have a discussion on Quantum mechanics here. But I want to look at the “Chachakka Sutta (MN 148)” from a little bit different point-of-view. That will break the tradition of providing boring translations of *suttā*, and I hope will also provide better insights into the material in the *sutta*. This discussion would be beneficial before we move to the next section of the *sutta*.

- As you will see below, scientists are just beginning to take the mental phenomena seriously. They have made a bit of progress. But they are not even close to having a detailed analysis of mental phenomena that the Buddha did over 2500 years ago.
- Mental energy is also quantized, even though we may feel like thoughts are continuous. The smallest unit in Buddha Dhamma is a “*citta*.” A *citta* lasts less than a billionth of a second. **We cannot experience a single *citta*.** Even though it is conventionally translated as “a thought”, that is not correct.
- What we usually think of as a “thought” consists of billions of *cittā* (The plural of *citta* is *cittā*, but sometimes I tend to write that as *cittā* just because that is easier for most people.) By the way, *citta* is pronounced “chiththa.”

What is a Thought?

3. Let us first see the progress that science has made over the past 50 years or so. Science is still at a very early stage regarding the mind. But they have made some progress recently and we will show them to be fully consistent with Buddha Dhamma. In fact, those findings help explain deeper concepts in Buddha Dhamma.

- Only fifty years ago, scientists thought that computers can “become conscious” just by increasing the processing speeds. Now there are computers that are much faster, but they, of course, do not have consciousness. We will discuss later why computers will never become conscious.
- The following is a presentation entitled, “What is a Thought?” by Henning Beck, a scientist studying brain phenomena.

[WebLink: youtube: What is a Thought? How the Brain Creates New Ideas | Henning Beck | TEDxHHL](#)

A Computer Does Not Have Perception (*Saññā*)

4. At 4:00 minutes, we see a “face” made up of fruits and vegetables. Even though it is not a real human face, it takes us just a split second to realize that it represents a face.

- But as Mr. Beck points out, a computer will never be able to recognize the representation of the human face depicted there.
- At 9:20 minutes he starts a discussion on the identification of a chair. Again, a computer runs into a problem identifying “less obvious” structures that can serve as chairs.
- In both these instances, what the computer is missing is *saññā* (loosely translated to English as “perception”). Even animals can recognize objects relevant to their survival. A dog, for example, can instantly recognize its owners and any other pets living in the house. It can recognize foods that it likes, etc. See “[Saññā – What It Really Means.](#)”

Vedanā, Saññā, Joy, Sadness, etc. Cannot Arise in a Brain

5. Around 6:00 minutes, Mr. Beck starts talking about human thought. All he (and other scientists) know right now is that our thoughts rise very fast. But they do not have any explanation of how thoughts with feelings (*vedanā*), perception (*saññā*), joy, etc. can arise out of a brain made of inert atoms and molecules.

- A brain is not that different from a computer, in the sense that atoms and molecules are the building blocks of both. Both can process information. But a brain processes information in a very different way compared to a computer. It involves billions of neurons working as a team. Scientists are not even close to figuring out how the brain processes information.
- In the future, scientists may be able to figure out how those neurons are able to process information much faster than a computer with a thousand-times higher processing speeds.
- However, they will still NOT be able to figure out how a human or animal can recognize their surroundings AND generate emotions (happy, sad, etc.)
- Around 11:00 minutes he discusses the difference between learning and understanding. That is an excellent point.

Vedanā, Saññā, Joy, Sadness, etc. Arise in the “Mental Body”

In a previous post, “[Contact Between Āyatana Leads to Vipāka Viññāna,](#)” I mentioned that plants and trees have a basic form of *vedanā* and *saññā* (see #3,#4 there.) However, plants and trees CANNOT generate emotions like joy and sadness. A tree does not have a mind or a “mental body” created by kammic energy.

6. In the same way, a brain cannot generate a thought. How can feelings and emotions come out of an entity made of inert atoms and molecules? The “mental body” of a living being is created by *kammic* energy.

- There has to be a LIVING BEING to generate a *citta*, the basic unit of consciousness. For a human being, the essence of that LIVING ENTITY is not the physical body, but the mental body.
- **That “mental body” is alternatively called a *manomaya kāya* or *gandhabba*.** It consists of a *hadaya vatthu* (seat of mind) and five *pasāda rūpa* located around it (for seeing, listening, smelling, tasting, and touching.) The mental body is not like the “physical body.” It is more like an “energy body” that gives life to the inert and dense physical body.
- A *manomaya kāya* may be visualized as an “energy field” within the physical body with the *hadaya vatthu* and five *pasāda rūpa* overlapping the region of the physical heart.

7. Our brains do not have the capability to identify objects. It cannot generate emotions like joy and sadness. As we discussed in #4 above, even animals can identify things and generate feelings and emotions.

- It is the **mental body (*manomaya kāya* or *gandhabba*)** that generates emotions like joy and sadness as well as *vedanā, saññā*.

- More precisely, those mental phenomena arise in the *hadaya vatthu* (seat of mind) of the *gandhabba*.

8. The details are not critical, but that basic mechanism is important to understand. A brain does not see, hear, smell, taste, or touch. It is the seat of the mind (*hadaya vatthu*) that experiences all those.

- That is why a human body is just a shell that supports the mental body (*manomaya kāya* or the *gandhabba*). At the death of the physical body, that *manomaya kāya* leaves the body instantly. When we touch a dead body, it is obvious to us that there is no “life” there.
- A living body is like a “live wire” with an electric current flowing through. One will get an “electrical shock” by touching it. But if there is no electric current, it is just a metal wire.
- In the same way, it is the *manomaya kāya* that gives “life” to an inert physical body.

The *Manomaya Kāya* Changes from Existence to Existence

9. What happens to the *manomaya kāya* at the end of existence? To make this clear, let us take the case of a *Brahma* dying and getting a human existence. That transition from a *Brahma* to a human happens at the moment of death of that *Brahma*. It is called the “*cuti-paṭisandhi*” moment (“*cuti*” means dying and “*paṭisandhi*” means getting a new existence.)

- That *Brahma* had a seat of the mind (*hadaya vatthu*) and two *pasāda rūpa* (for seeing and hearing). On the other hand, in the new existence, the human would have five *pasāda rūpa* (for seeing, listening, smelling, tasting, and touching). Furthermore, the *hadaya vatthu* of the human would be different from that of a *Brahma*.
- Therefore, the *manomaya kāya* of in the new human existence is very different from that of the *Brahma*.
- Suppose that at the end of that human existence, that human gets an animal existence. Then at that “*cuti-paṭisandhi*” moment, that new animal existence would have its own set of *hadaya vatthu* and five *pasāda rūpa*.

10. Those three existences are very different, even though it is the same “life-stream.” So, what is there to be taken as a “soul” or a “self”?

- That is why the Buddha said there is no “soul” or a “self” or a “*ātma*” going from one birth to another. In the above example, the same “life-stream” that started as a *Brahma* became a human, and then an animal. **What is the ESSENCE that defines a “soul” or a “self” or a “*ātma*”?**
- The details on that are in the post “[Chachakka Sutta – No “Self” in Initial Sensory Experience.](#)” First, let us look into the mechanism of *citta* generation.

A *Citta* Has *Vedanā*, *Saññā*, and Many Other “Built-In” Mental Factors

11. A *citta* is the fundamental unit of cognition, which we do not feel by itself. It comes in bunches of 12 or more *cittā*. Those “bunches” or series of *cittā* are *citta vīthi*. What we “feel” or “experience” is a vast number of such *citta vīthi*.

- Any *citta vīthi* that arises due to sensory input from one of the five physical senses has 17 *cittā*. It is a *pañcadvāra citta vīthi*.
- On the other hand, a *citta vīthi* arising directly in the mind (due to *dhammā*) may have varying numbers of *cittā*, with a minimum of 12 *cittā*. That is a *manodvāra citta vīthi*.

12. What we usually call a “thought” is the cumulative effect of billions of such *citta vīthi* that arise PER SECOND.

- Each of those *cittā* has at least seven mental factors (*cetasikā*). Those universal *cetasikā* include *vedanā* and *saññā*. *Vedanā cetasika* makes one FEEL a sensory input. The *saññā cetasika* is the one which recognizes that sensory input.

- **Only a living being can generate that fundamental unit of cognition (*citta*) within a billionth of a second, with built-in seven or more *cetasikā*.**
- That is why a computer or a robot will NEVER become conscious. **Only *Kammic* energy can create a *manomaya kāya* with the seat of the mind (*hadaya vatthu*).**

Important Role of the Brain

13. Even though the brain itself cannot generate *citta*, it plays a critical role in getting the information about the sense object to the *hadaya vatthu*. More details at [“Brain – Interface between Mind and Body.”](#) Let us briefly discuss the series of events following the capture of an image by our eyes.

- The retinas at the back of the eyes send the captured image to the visual cortex in the brain through the optical nerve. That part of the brain then analyzes the signal to a form that can be understood by the mind. That information is sent to the *cakkhu pasāda rūpa* in the *manomaya kāya*. Then the *cakkhu pasāda rūpa* makes a contact with *hadaya vatthu*, which vibrates 17 times due to that “impact.”
- Those 17 vibrations of the *hadaya vatthu* correspond to the generation of a *citta vīthi* with 17 *cittā*. That is the origin of a *cakkhudvāra citta vīthi*. It is not necessary to learn those details. But those interested can find details at [“Does any Object \(Rūpa\) Last only 17 Thought Moments?.”](#)
- Sensory inputs coming through the other four physical senses (ears, nose, tongue, and the body) work the same way.

14. Just remember that the sensory input comes to a *pasāda rūpa* in the mental body AFTER the sensory signal is processed by the brain. For example, when we see a tree, the image of the tree received by the eyes is processed by the brain first.

- Then the brain transmits that processed signal to the *cakkhu pasāda rūpa*, which in turn transfers it to the *hadaya vatthu*.
- It is the *hadaya vatthu* that “feels” or “experiences” that image and “sees” the tree.
- But even a sensory experience that we “feel” arises due to a series of “sensory packets.” For example, when we see a tree, that image does not come in continuously. It comes in “packets” or “snapshots.”
- In fact, that is similar to how a video camera or a movie film works. We will discuss that in the post [“Vision Is a Series of “Snapshots” – Movie Analogy.”](#)

5.2.8.4 Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event

.5.2

September 29, 2019; revised November 15, 2019

We are discussing the [“Worldview of the Buddha.”](#) It may be a good idea to print out the posts in there for referral while reading subsequent posts. It is CRITICAL to understand the material discussed so far to follow future posts.

All Our Activities Start With a Sensory Trigger

1. We know that we are alive because we are aware of the external world. We can see an object, hear a sound, smell an odor, taste food, and feel the touch of something or someone. Furthermore, we can recall past events (part of *dhammā*).

- All our sensory experiences start with a “trigger event” that comes through one of our six sense faculties. If we see, hear, smell, taste, touch something that grabs our attention, then we start thinking, speaking, and taking action on that particular sight, sound, odor, taste, and touch.
- Also, a thought about a past event or a planned event (*dhammā*) may come to our mind, and we could get started that way too.

2. We usually go through our daily chores based on what we do routinely. We get up in the morning and get ready for work (school) on a working day. Those "to do tasks" come to one's mind automatically as *dhammā*.

- Such a "planned or routine day of work" could be disrupted by an unexpected event. One may get a phone call from the boss asking to go to a meeting at a different location. A child may may down with fever and a visit to a hospital may be required. Again, a sensory trigger is there.
- We may also set up an alarm to get up at a particular time. When the alarm goes off in the morning, we get up and recall that we have to get ready for a specific task.
- It is a good idea to think about what one goes through during a day. We can see that all activities start with "sensory triggers."

A Sensory Trigger is an "Ārammaṇa"

3. Each activity starts with a "trigger," which is a sensory event. **That is a "ārammaṇa" in Pāli.** We consciously and deliberately start looking at an object when we become interested in that object. Then it becomes a "new *ārammaṇa*." That may prompt us to take further action.

- For example, a short interaction with a person may trigger an interest in that person. Then that may lead to further contacts.
- We get exposed to many sensory inputs as we go through the day. But only specific sensory inputs catch our attention and make us think about them. A strong sensory input that gets our attention is a *ārammaṇa*.
- If X is listening to the television in the background while eating, X's focus is on the meal. However, if X hears on the TV that terrorist attack just took place in a major city, X's attention would focus on that news story. X may stop eating and go and watch the television to get more information. That is a new *ārammaṇa*.

4. There is always an "*ārammaṇa*" to initiate an action, and **there are only six types of *ārammaṇa*** per "Chachakka Sutta (MN 148)."*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ, ghānañca paṭicca gandhe ca uppajjati ghānaviññāṇaṃ, jivhāñca paṭicca rase ca uppajjati jivhāviññāṇaṃ, kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ, manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ.*"

- For example, the second on the list says that "ear-consciousness (*sota viññāṇa*) happens when ears (more precisely *sota pasāda*) come to contact with a sound (*sadda*)." In the above example, X heard about a terrorist attack.
- That sensory event could then start a whole series of new actions. In the example of #3 above, X stopped eating and went to the television to watch it.
- You should think about this basic idea of how a sensory event (seeing, hearing, etc. leads to a whole set of actions during a given day. This idea was first introduced in the post, "[Contact Between Āyatana Leads to Vipāka Viññāna](#)."

Two Different Meanings of Paṭicca

5. We translated the verse, "*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*" as "...*cakkhu viññāṇa* arises when a *rūpa* makes contact (*paṭicca*) with *cakkhu pasāda rūpā*." See, #7 of "[Contact Between Āyatana Leads to Vipāka Viññāna](#)." That was further elaborated in the next post, "[Indriya Make Phassa and Āyatana Make Samphassa](#)."

- Some English translations state that as, "dependent on the eye and forms, eye-consciousness arises." They translate *paṭicca* as "dependent on" presumably because *Paṭicca Samuppāda* is translated as "Dependent Origination."

- But *paṭicca* is a Pāli word that has somewhat different meanings depending on the context. Let us clarify that first.

6. It is fine to translate *Paticca Samuppāda* as “Dependent Origination.” That is because the steps in *Paticca Samuppāda* are CONDITIONAL statements. For example, “with *avijjā* (ignorance) as **condition**, *sankhāra* arise.” One could also state that as “arising of *sankhāra* is dependent on the presence of *avijjā*.” However, conditionality comes from the word “*paccayā*” not from “*paṭicca*.” See, “[What Does “Paccayā” Mean in Paticca Samuppāda?](#).”

- Therefore, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” should not be translated as, “**dependent on the eye and forms, eye-consciousness arises.**” **It is more than just dependence.** It is “coming together” or “coming to contact” of *cakkhu* and *rūpa* that gives rise to *cakkhu viññāṇa*. “***Paṭicca*” happens with only those events that grab our attention.**
- **There is also a deeper meaning of *paṭicca* in *Paṭicca Samuppāda***, where it is the combination of two words “*pati*” + “*icca*.” When one attaches willingly to moral (or immoral) deeds, one ends up with corresponding “births” (“*sama*” + “*uppada*.”) See, “[Paticca Samuppāda – “Pati+ichcha” + “Sama+uppāda”.](#)” That is why I do not translate *Paticca Samuppāda* as “Dependent Origination.” There is more than “just dependence” in *Paṭicca Samuppāda*.
- However, in verse “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*,” *paṭicca* means “coming together” or “contact.” Here there is no “intention.” It is *cakkhu* and *rūpa* making contact. That is very clear in SN 12.53 and SN 12.54, in verse, “*telañca paṭicca vaṭṭiñca paṭicca telappadīpo jhāyeyya*.” OR, “an oil lamp (*telappadīpo*) burns while the wick (*vaṭṭiñca*) is together with oil (*telañca*).” If one does not add oil to the lamp, the wick will burn out quickly. There is no involvement of the mind there. Thus, the “*pati*” + “*icca*” etymology does not apply here.

Where Does *Paṭicca* Happen?

7. It is essential to remember that “*cakkhu*” (or *cakkhāyatana*) is not physical eyes (the Pāli word for the physical eye is “*nayana*”). “*Cakkhu*” is the *cakkhu pasāda rūpa* that lies close to the *hadaya vatthu* (seat of the mind), and *hadaya vatthu* **overlaps the physical heart**. That is far away from the brain.

- This *cakkhu pasāda rūpa* is the “internal *āyatana*.” **It is commonly referred to as “*cakkhu*.”**
- **The brain processes an image received by the eyes and then sends it to the “*cakkhu*.”** We discussed in the post, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”
- Furthermore, the “*rūpa*” is the image of the external object (external *āyatana*). To be precise, it is a “*vanna rūpa*” (or “*rūpa rūpa*”) in this case.
- When that *rūpa* makes contact with the *cakkhu*, the *cakkhu* in turn “hits” the *hadaya vatthu* (seat of the mind) and transfers that *rūpa* to the mind, that is the event, “***Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*.**”
- That contact gives rise to the *cakkhuvīññāṇa in mind*. Therefore, that sensory experience arises in mind close to the physical heart. It does not occur in the brain (or at the eyes)! You may want to refresh memory by reading #12 of the post, “[Buddhist Worldview – Introduction](#).”

8. In the example discussed in #3 involves an *ārammaṇa* coming through as a sound (*sadda rūpa*). Here the “sound *rūpa*” received by the *sota pasāda rūpa* (shortened to just “*sota*”) is the “*sadda*” in “*sotañca paṭicca sadde ca uppajjati sotavīññāṇaṃ*.”

- Any external sensory input is a form of energy. That is why they are all *rūpa*. There is some confusion because most times a “*rūpa rūpa*” or a “*vanna rūpa*” is just written as a “*rūpa*.”
- A sound is a *sadda rūpa*. You can figure out the other three: *rasa rūpa*, *gandha rūpa*, and *phoṭṭhabba rūpa*.

- A thought coming directly to the mind is a “*dhammā*” or a “*dhamma rūpa*.” Note that there is no separate “*pasāda rūpa*” for *dhammā*, which makes contact directly with the *hadaya vatthu*.

Vipāka Vedanā Arise With That Initial Vipāka Viññāṇa

9. Let us consider “hearing a sound.” That is “*sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ*.” This *sotaviññāṇa* is a *vipāka viññāṇa*, as we discussed in “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

- As we have discussed, *vedanā* and *saññā* arise with each *citta*. Therefore, there are a *vedanā* and *saññā* associated with that *sota viññāṇa* (which is a *citta*.) In other words, we know that we heard the sound (*vedanā*), and we recognize what the sound is (*saññā*). **The *vedanā* that arises with that *vipāka viññāṇa* is a *vipāka vedanā*.**
- At this stage, the mind receives the sensory event. All *vedanā* associated with that initial sensory event is a neutral (*upekkhā*) *vedanā*. However, there are some *somanassa* or *domanassa vedanā* that arise due to *kāma guṇa* (even in an *Arahant*.). The next post, “[Kāma Guna – Origin of Attachment \(Tanhā\)](#)” will discuss this issue. However, no *dukkha/sukha vedanā* arise in this step of, “*sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ*.” That holds true for other sensory faculties as well, except for the physical touch (*kāya*.)
- Therefore, the only exception is “*kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ*.” The sensory contact through the physical body can generate a *dukkha vedanā* if it is due to an injury. It can lead to a *sukha vedanā* if it is due to a body massage.
- We will discuss *sukha*, *dukkha*, *somanassa*, *domanassa*, and *upekkhā vedanā* below.

The Second Type of *Vedanā* is “*Samphassa jā Vedanā*”

10. In the post, “[Indriya Make Phassa and Āyatana Make Samphassa](#),” we looked further into the “Chachakka Sutta (MN 148): “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā*.” Those we discussed the second type of *vedanā* due to “*phassa paccayā vedanā*.” There we discussed how the second type of *vedanā* arises due to “*samphassa*.” It is a good idea to review that post.

- That second type of *vedanā* is due to “contact with defilement in mind” or “*san*” or “*anusaya*.” And that depends on each person, i.e., how strong a *tanhā* is generated via greed, anger, or ignorance. **Therefore, this “*samphassa-jā-vedanā*” is mind-made.**
- An *Arahant* would experience the first type of *vedanā*, the *vipāka vedanā*. The second type of *vedanā* would NOT arise in an *Arahant* because he/she does not have a defiled mind.
- Now we can categorize *vedanā* using a different scheme. That will show that *dukkha/sukha vedanā* arises ONLY due to the physical body. Other types of sensory contacts lead to unpleasant/pleasant *vedanā* (*domanassa/somanassa*) in the MIND.

Two Types of *Vedanā* (*Kāyika* and *Cetasika*)

11. As we saw above, ALL *vedanā* belong to those two types discussed above: *vipāka vedanā* and *samphassa-jā-vedanā*. However, there are other ways to categorize *vedanā*. The Buddha has taught us how to examine a given entity or a concept in many different ways. Once one understands them, it is easy to see which analysis is appropriate for a given situation.

- The Buddha categorized *vedanā* up to 108 types. However, we do not need to discuss all of them. We will consider only those that are relevant to common situations.

- First, ALL *vedanā* belong to two categories of *kāyika vedanā* (those felt on the body) and *cetasika vedanā* (those arising in mind.) Of course, all of the *vipāka vedanā* and *samphassa-jā-vedanā* are in these two new categories. It is just a different way to look at them.
- Those *vedanā* felt in the physical body (*kāya*) are ***kāyika vedanā***. All other *vedanā* are ***cetasika vedanā***; they arise in mind.

Three Types of *Kāyika Vedanā*

12. Then the *kāyika vedanā* can be three types: ***dukkha vedanā***, ***sukha vedanā***, ***adukkhamasukha vedanā***.

- We can see that ***dukkha vedanā*** due to injuries, body aches, etc. are *kāyika vedanā*. Those *vedanā* are felt AT A LOCATION in the body. We feel a finger cut at the finger. Similarly, a back massage gives a ***sukha vedanā*** on the back.
- We remember that *vedanā* means “becoming aware of.” So, those *vedanā* due to bodily contacts that do not generate *dukkha* or *sukha* (i.e., neutral) are “*adukkhamasukha*” (neither painful nor pleasant), and that rhymes as, “*adukkhamasukha*.”

Three Types of *Cetasika Vedanā*

13. Those *cetasika vedanā* similarly belong to three major types: *domanassa vedanā*, *somanassa vedanā*, and *upekkhā vedanā*.

- The word “*domanassa*” comes from “*do + manasa*” or “a depressed mind.” Similarly, “*somanassa*” comes from “*so + manasa*” or “a pleasant mind.” Of course, *upekkhā vedanā* is neither *domanassa* nor *somanassa*. It is neutral, and we feel that sensory input.
- Note that while the *adukkhamasukha vedanā* is associated with body touches, *upekkhā vedanā* is associated with all other sensory inputs.

Relationship to *Vipāka Vedanā* and “*Samphassa-jā-Vedanā*”

14. Now, these *cetasika vedanā* can be either *vipāka vedanā* or “*samphassa-jā-vedanā*.”

- As we have discussed, *samphassa-jā-vedanā* depends on the mindset of the person (more precisely on one’s *anusaya* or *gati*.) Three people looking at the same person X may generate different types of *samphassa-jā-vedanā*. A friend of X will generate a *samphassa-jā-vedanā* that is of *somanassa* type. An enemy of X will generate a *samphassa-jā-vedanā* that is of *domanassa* type. A third person who does not know X may generate only feel a *samphassa-jā-vedanā* that is of *upekkhā* type.
- Since there are six types of *samphassa-jā-vedanā*, we can see that there could be 18 types of *vedanā* associated with them. Each one could be *domanassa*, *somanassa*, or *upekkhā*.
- In the “[WebLink: suttacentral: Atthasata Sutta \(SN 36.22\)](#),” the Buddha has discussed 108 types of *vedanā*. But for many situations, the above types of *vedanā* are sufficient for our discussions.

5.2.8.4 **Kāma Guṇa – Origin of Attachment (Taṇhā)**

.5.3

October 6, 2019

Kāma guṇa are pleasurable things in this world. It is because of *kāma guṇa* that we tend to attach (*taṇhā*) to worldly things via either greed or anger (based on ignorance.) Based on *kāma guṇa* we AUTOMATICALLY generate *sāmisā vedanā*. *Sāmisā vedanā*, in turn, COULD lead to *taṇhā* (attachment to worldly things.)

Summary of the Previous Post

1. In the previous post, we first categorized *vedanā* into two types: *vipāka vedanā* and *samphassa-jā-vedanā*.

- Then, later in the post, we categorized *vedanā* differently. Those *vedanā* felt in the physical body (*kāya*) are *kāyika vedanā*. All other *vedanā* types arise in mind, and they are *cetasika vedanā*. Of course, *vipāka vedanā* can be *kāyika vedanā* or *cetasika vedanā*. However, *samphassa-jā-vedanā* are all *cetasika vedanā*.
- Then *kāyika vedanā* can be three types: *dukkha vedanā*, *sukha vedanā*, *adukkhamasukha (adukkhamasukha or neither dukkha nor sukha) vedanā*.
- One may need to review that post: "[Vipāka Vedanā and "Samphassa jā Vedanā" in a Sensory Event.](#)"

A Few Observations Based on the Previous Post

2. Now I need to add a few more comments. First, those *kāyika vedanā* are all *vipāka vedanā*. Those are the ones that contribute to physical suffering (injuries, sicknesses, etc.) and bodily comforts (like in a body massage.) Therefore, *dukkha vedanā*, *sukha vedanā*, and *adukkhamasukha vedanā* are all *vipāka vedanā*, and they arise only with "bodily contacts" (*kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ*.)

- All other types of *vipāka vedanā* come through eyes ears, nose, tongue, and the mind. Unlike *vipāka vedanā* that come through the physical body, they are NOT *kāyika vedanā*.
- Those are, **at that moment**, all *upekkhā vedanā*. We see, hear, smell, taste, or *dhammā* comes to the mind. They are, "*Cakkhuñca paṭicca rūpe ca uppajjati cakkhaviññāṇaṃ, sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ, ghānañca paṭicca gandhe ca uppajjati ghānaviññāṇaṃ, jivhāñca paṭicca rase ca uppajjati jivhāviññāṇaṃ, and manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ.*" Note that "*kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ*" does NOT appear here.
- Then, *samphassa-jā-vedanā* arise following those initial *vipāka vedanā*. For example, following hearing a sound (*sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ*), two more steps take place before *samphassa-jā-vedanā* arise. They are in the "Chachakka Sutta (MN 148): "*sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā.*" As we discussed In the previous post, *phassa paccayā vedanā* is *samphassa-jā-vedanā*. Those are *vedanā* that arise due to greed, anger, and ignorance.
- Now, in this post, we will discuss that last step in detail. Why do humans get attached to some sensory inputs via greed and to others via aversion (dislike)?

What Are Kāma Guṇa?

3. The Buddha said that this world is filled with eye-pleasing sights, ear-pleasing sounds, etc. for all five physical senses. Each existence in the *kāma loka* has its own set of "attractive and enticing sensory objects." **The Buddha called them *kāmaguṇa* or "sensual qualities."** As we know, *kāma* means sensual. "***Guṇa***" means "**qualities**" or "**characteristics.**" Even though *kāmaguṇa* is one word in the *Tipiṭaka*, I like to write it as two words, "*kāma guṇa*" since that helps remember the meaning.

- For example, humans like certain types of food. Each animal species has its own "favorite foods." Lions and tigers like to eat meat. Cows don't eat meat, and they eat grass. Pigs like to eat all sorts of rotten food.
- As humans, we enjoy certain sights, sounds, tastes, smells, and bodily contacts. As long as one has a human body, it is not possible to avoid generating a *sukha vedanā* due to such sensory contacts. Even *Arahants* feel those.

***Kāma Guṇa* Are Enticing Objects, Sounds, Tastes, Odors, and Bodily Contacts**

4. Such *sukha vedanā* arise immediately AFTER the initial *vipāka vedanā*. As we discussed in the previous post, all *vipāka vedanā* due to sensory contacts other than bodily contacts are *upekkhā vedanā*. They are neutral.

- However, immediately following that initial contact, *kāma guṇa* comes into play. Many *suttā* discuss *kāma guṇa*, and they all have the following clarification of what it is. The “[WebLink: suttacentral: Nibbānasukha Sutta \(AN 9.34\)](#),” states, “***Pañcime, bhikkhave, kāmaguṇā. Katame pañca? Cakkhaviññeyyā rūpā iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā, sotaviññeyyā saddā, ghānaviññeyyā gandhā, jivhāviññeyyā rasā, kāyaviññeyyā phoṭṭhabbā, iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā. Ime kho, bhikkhave, pañca kāmaguṇā.***”
- **Translated:** “There are these five types of sensual qualities (*kāmaguṇa*). Which five? There are forms (*rūpā*) experienced with eyes that are agreeable, pleasing, charming, endearing, enticing, and leading to desire. There are sounds (*sadda*) that are agreeable, pleasing, charming, endearing, enticing, and leading to desire (and similarly for the other three senses.)

***Vedanā* Due to *Kāma Guṇa* Are Not “*samphassa-jā-vedanā*”**

5. However, this *somanassa vedanā* that arises due to *kāma guṇa* are NOT the “*samphassa-jā-vedanā*.” *Somanassa vedanā* due to *kāma guṇa* arises in an *Arahant*, as well as in an average human.

- Let us clarify with some examples. Sugar or honey has a “*kāma guṇa*” of sweetness. That holds for everyone from an average person to an *Arahant*. A beautiful woman will be seen as such by anyone from an ordinary person to an *Arahant*.
- However, “***tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā***” in #2 above does not occur in an *Arahant*. Even though an *Arahant* will experience *somanassa vedanā* due to *kāma guṇa*, **an *Arahant* would NOT get attached to that “pleasant/sensual feeling.”**
- Therefore, even though an *Arahant* would feel the tastiness of honey, he/she would not generate any craving for more. An *Arahant* has comprehended that desire for ANY worldly pleasures (sights, sounds, smells, tastes, and body touches) will only lead to future suffering. But it is essential to realize that one CANNOT and SHOULD NOT suppress such desires with sheer will power. **That understanding comes after the *Sotāpanna* stage.**

Vedanā* Due to *Kāma Guṇa* Are *Sāmisa Vedanā

6. There is a unique name for those “automatically-arising” *vedanā* due to *kāma guṇa*. They are ***sāmisa vedanā***.

- The word *sāmisa* has origins in the keyword “*āmisa*,” which means “associated with the sensual world” or “*kāma loka*.” Thus, *sāmisa sukha vedanā* mean a “pleasant feeling” that arises due to the nature of the *kāma loka*. [*āmisa* :[nt.] food; flesh; bait; gain. (adj.) material.]
- An *Arahant*, as well as an average human, will experience similar “*sāmisa vedanā*.” Any sensory event of *kāma loka* is a *sāmisa vedanā*. We will briefly discuss the types of *sāmisa vedanā* below.
- We remember that the original *viññāṇa* (*cakkhu, sota, ghāna, jivhā, kāya*) resulted due to a *vipāka*. *Vipāka vedanā* associated with those are *upekkhā vedanā*. (The only exception was *kāya viññāṇa*, which could give rise to *dukkha, sukha, or adukkhamasukha vedanā*.)
- Immediately following those *vipāka vedanā*, *kāma guṇa* comes into play, and *sāmisa vedanā* arises automatically.

- It is only after the generation of *sāmisa vedanā* that “*tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā*” comes into play.

Kāma Rāga Is Getting Attached to Sāmisa Vedanā

7. The human world is full of enticing sights, sounds, tastes, odors, and bodily comforts. Those are not *kāma*. They are *kāma guṇa*. Getting attached to them and cultivating *kāma saṅkappa* (or *vacī saṅkhāra* or *vitakka/vicāra*) is *kāma* (and *kāma rāga*).

- The “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)” states, “*Saṅkappa rāgo purisassa kāmo, Nete kāmā yāni citrāni loke...*”

Translated: “A person’s *kāma* is getting attached and thinking about (*saṅkappa rāga*) those pleasing things in this world (*citrāni loke*). Those beautiful things in the world are not *kāma*.”

- I highly recommend the post “[Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha](#).” It has more information that will help understand the concepts better.

Difference Between *Samphassa-jā-Vedanā* and *Sāmisa Vedanā*

8. Now we can see the difference between *samphassa-jā-vedanā* and *sāmisa vedanā*.

- First, *sāmisa vedanā* are common to ALL HUMANS, including *Arahants*. They are the sweetness of sugar or pleasing odors like perfumes.
- On the other hand, *samphassa-jā-vedanā* are highly PERSONAL. They do not arise in *Arahants*. **For others, how strongly they arise depends on one’s *gati* AND the specific *ārammaṇa*.**
- We also need to understand that *samphassa-jā-vedanā* arise BECAUSE OF *sāmisa vedanā*. One gets attached to sensory inputs because they are enticing. As long as one does not see the “hidden suffering” in those enticing sights, sounds, etc., one is bound to generate craving for them.
- Getting attached to *ārammaṇa* is “*taṇhā*.” One can get attached via greed, anger, or ignorance. Let us discuss that briefly since it is crucial.

Taṇhā – Getting Attached via Greed, Anger, or Ignorance

9. Just like there are “pleasing and enticing things” in the *kāma loka*, there are also “unpleasant things.” For example, rotten food tastes terrible, and we do not like loud or high-pitched noises. Humans generate *sāmisa dukkha vedanā* when exposed to such sensory inputs or *ārammaṇa*.

- Nonetheless, we get “attached” to them also. We complain about bad tasting foods or harsh noises and may take actions to avoid them.
- That is why “*taṇhā*” means “getting attached to *ārammaṇa* via either greed or anger.” We also get attached to *ārammaṇa* due to ignorance, not knowing the true nature of them. See, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”
- We get attached via greed and ignorance DUE TO *sāmisa sukha vedanā* and *sāmisa upekkhā vedanā*. It is essential to realize that while everyone feels *sāmisa vedanā*, not everyone attaches via *sāmisa vedanā* the same way.

Samphassa-jā-Vedanā Depend on One’s Gati And The Specific Ārammaṇa

10. We have already discussed how *samphassa-jā-vedanā* arise due to one’s character/habits (*gati*) and specific *ārammaṇa*. See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#).”

- An *Arahant* does not have any *gati* left (other than those without *kammic* consequences), and thus would not generate *taṇhā* and, therefore, would not generate *samphassa-jā-vedanā*.
- All others attach to *ārammaṇa* in different ways and at different levels. Whether one attaches to *ārammaṇa* depends on that particular *ārammaṇa* AND one's *gati*. For example, teenagers are likely to *gati* to attach to loud music, whereas an older adult may dislike such music. In each category of food, odors, sex, etc. some people attach more than others.
- It is essential to avoid “bad *ārammaṇa*.” If one associates with those who drink excessively or are engaged in drug use, it is hard to avoid getting involved with such activities.
- In the same way, it is easier to cultivate good habits (*gati*) by associating with those who already have good *gati*. Then one will mostly be exposed to “good *ārammaṇa*.”

Summary

11. So far, we have discussed the progression of events when a sensory input comes in per “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#).” For example, when an external object is the *ārammaṇa*, the series of events start with, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*.” At that initial stage, it is just a *vipāka viññāṇa*. See, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).” Then in the subsequent posts, we have been discussing the progression, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā*.” Now we can summarize those steps as follows.

- First, a *ārammaṇa* (in this case, a visual object) catches one's attention with a *vipāka viññāṇa*. In this case, it is a *cakkhuvīññāṇa*.
- Immediately, the *kāma guṇa* comes into play, and one experiences a *sāmisa sukha vedanā* if it is a mind-pleasing object. That happens whether one is an average human or an *Arahant*.
- Then the next part of the above verse, “*tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā*” happens in mind (within a fraction of a second.) One's “*san gati*” come into play. If one has a tendency to be attracted to that particular type of object, then one would attach to that object. If it was an object that one truly dislikes, one would generate *sāmisa dukkha vedanā* and would still attach with dislike or anger.
- Now, another average human MAY NOT get attached either way. That is because that particular *ārammaṇa* may not be his/her “type,” i.e., he/she may not have an interest in it. On the other hand, an *Arahant* WILL NOT get attached (via like, dislike, or ignorance) to ANY *ārammaṇa*.

Next Post

12. It took us a few posts to cover that, but I think it is essential to get these basic ideas clarified. It may not take that long to go through the rest of the *sutta*.

- Another essential point from the discussion so far is that sensory events are discrete. They do not come in continuously. The mind handles ONE *ārammaṇa* at a time. However, since the mind is very fast, it APPEARS that we are seeing, hearing, smelling, tasting, and feeling body touches all at the same time.
- In the next post, we will discuss this critical point.

5.2.8.4 Vision Is a Series of “Snapshots” – Movie Analogy

.5.4

October 13, 2019; revised November 15, 2019

Vision – How Do We See an Object?

1. Vision or “seeing” appears to us as continuous. We see people moving around, vehicles moving, animals running around, etc. However, in reality, “seeing” happens due to a series of “snapshots” that our physical eyes take. Please bear with me as I set the stage with the following Pāli terms. It is not necessary to know these Pāli terms in detail, but try to get the basic idea.

- A key idea behind Buddha Dhamma is that we experience only one *citta* (loosely translated as a thought) at a time and that *citta* is focused on ONE *ārammaṇa*. In other words, while the mind is registering a visual event, it cannot hear, smell, taste, or feel a touch.
- Even when we focus on “seeing,” it does not happen continuously. The mind can process only one *cakkhuvāra citta vīthi* (with 17 *cittā*) at a time. The mind processes that *cakkhuvāra citta vīthi* with three more *manodvāra citta vīthi*. At the end of those *citta vīthi*, the mind has captured a ‘snapshot’ of the object and recognized it. That is one “snapshot” of a moving object.
- Our “seeing of a moving external object” within a few seconds involves many such “snapshots.” Our perception of a moving object is the result of all those “snapshots.” We do not see the individual “snapshots.”

Movie Analogy – Series of Snapshots

2. We can simplify and understand the above process using an analogy. What I stated above is — in principle — what happens when we watch a movie.

- **When making a movie, a video camera captures many static pictures (snapshots) of a scene.** Then those snapshots are projected to a screen at a certain rate. If the playback speed is too slow, we can see individual pictures, but above a certain “projection rate”, it looks like real motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](https://www.youtube.com/watch?v=7G11o111111)

- A movie projector projects static pictures to the screen at a rate of about 30 frames a second, and we see the movie as a continuous progression of events. If the projection rate is low, we can see it frame by frame or as individual “snapshots.” When projected at 30 frames a second, we do not perceive those static pictures. Then we perceive a continuous progression without any gaps.
- More details in the post, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)”
- **That is why the Buddha said that the mind (or *viññāna*) is a magician.** We perceive a streamlined world, even though the reality is that our sensory faculties detect only a series of “snapshots,” **It is the mind that conceals the reality and gives us a perception of a continuous progression of events.**
- It is critical to understand this point. It helps getting rid of *sakkāya diṭṭhi*, as we will discuss in the next post.

Mind and the Brain – Two Different Entities

3. In an early post on this series, I pointed out that *cakkhāyatana* is *cakkhu pasāda rūpa*, not the physical eyes. See, #12 of “[Buddhist Worldview – Introduction.](#)”

- That *cakkhu pasāda rūpa* (or simply *cakkhu*) is part of the *gandhabba*, our “mental body.” The *gandhabba* has the seat of the mind (*hadaya vatthu*) surrounded by the five *pasāda rūpa* corresponding to vision, hearing, taste, smell, and touch.
- When our physical eyes capture an image of an external object, that image goes to the visual cortex in the brain. The signal is processed there and then transmitted to the *cakkhu pasāda rūpa*, which then makes contact with the *hadaya vatthu*. That contact (*phassa*) leads to the arising of *cakkhu viññāna* at the *hadaya vatthu*. More details at, “[Brain – Interface between Mind and Body.](#)”

- By the way, that is the step, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” discussed in #7 in the post, “[Contact Between Āyatana Leads to Vipāka Viññāna.](#)”

4. Therefore, the brain is like a computer that helps convert the image sent by the physical eyes to a form that can be sensed by the *hadaya vatthu*, the seat of the mind. Therefore, vision involves a somewhat complex process.

- Similar processes take place for the other four physical sensory events. For example, when the physical ears capture a sound, that signal goes to the auditory cortex in the brain for processing. That signal then goes to the *sota pasāda rūpa*, which in turn makes contact with *hadaya vatthu* to transfer. That gives rise to *sota viññāṇa* via, “*sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ.*”

Reviewing the Whole Series Could Be Helpful

5. It may need some effort to understand this sequence of events. But that is really necessary in order to comprehend the overall process before we get to the next post.

- It is a good idea to print all the posts in the subsection, “[Worldview of the Buddha](#)” up to now and go over them carefully. There are about eight posts up to now.
- It is not necessary to understand the DETAILS of #6 and #7 below. But it is good to get the general ideas involved. I am providing this information to show that new findings in science are not only compatible with Buddha Dhamma but also help explain the key concepts in Buddha Dhamma.

The Brain Processes Visual Signals at About 30 Frames per Second

6. A recent study has reported that the minimum time needed for recognition of a static picture is about 13 milliseconds (Ref. 1). That means we should be able to see such snapshots projected at 77 frames per second at the highest rate. However, that is probably “pushing it” and not comfortable for the brain to handle. That is probably why movies use a projection rate of about 30 frames per second as mentioned in #2 above.

- It is interesting to note that the time for neural information to reach the brain takes about 15 to 30 milliseconds (References 49, 50 in Ref. 2). Therefore, a projection rate of 30 to 50 frames is compatible with that measurement too.
- A millisecond is a thousandth of a second.

Same Analysis Holds For Other Four Physical Senses

7. A similar set of rules are valid for hearing as well. Another recent study (Ref. 2) found that sounds could be recognized at rates up to 30 sounds per second. That corresponds to a “sound packet” of a duration of about 33 milliseconds that can be detected and recognized.

- However, people speak at a much slower rate of 150 words per minute. That is about 2 words per second, much less than 30 possible words per second that would be possible according to the above study. So, there is no problem with hearing what other people speak, even if someone talks faster than the average rate.
- There are no studies available at this time from science for the other three sensory events (taste, smell, and body touches). But the same process holds for those as well.

Aside – Cognition (*Saññā*) Requires More Than Detection

The following points (#8, #9) are “asides.” It is information that is not necessary but could help those with familiarity with *Abhidhamma*.

8. We must keep in mind that “experiencing a sensory input” is much more complex than just receiving that sensory input. For example, the mind needs to not only see an object or hear a sound, but it needs to recognize what it is and also need to generate a *vedanā*.

- As an example, when the sound “apple” is heard, the mind needs to know what an “apple” is. Someone who does not speak English would not know what is meant by the word “apple.” But for those who speak English AND have had experience of eating apples would have MEMORIES of those. Therefore, the mind needs to compare the received sensory with past memories to recognize what it is!
- The mind does that very fast with the help of the *manasikāra cetasika*. As you may know, *manasikāra* is one of the seven universal *cetasika* that arises with each *citta*. Thus, the mind is able to recognize a sensory input instantaneously, as soon as it receives a “data packet.”
- More details at, [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)

Aside – Process In Abhidhamma Language

9. Actual “seeing” or vision takes place at *hadaya vatthu*. Same for the other four types of sensory events. For example, let us consider a “packet of data” sent from the physical eye to the brain. The brain processes that information and transmits to the *cakkhu pasāda*. As you may remember, the five *pasāda rūpā* (*cakkhu, sota, ghāna, jivhā, kāya*) surround the *hadaya vatthu*. Now the *cakkhu pasāda* makes contact with the *hadaya vatthu* by hitting it. That causes the *hadaya vatthu* to vibrate 17 times, much like a gong hit by an iron rod vibrating for a certain fixed number of times.

- The 17 vibrations of the *hadaya vatthu* correspond to the 17 *cittā* in a *citta vīthi*. Such a *citta vīthi* is a *pañcadvāra citta vīthi* because one of the five physical senses or *pañcadvāra* (“*panca*” or five + “*dvāra*” or “door”) initiates it.
- Imagine a blade clamped at one edge and hit on the un-clamped side. The blade will vibrate. It vibrates for a certain FIXED number of times. For a given material, that number is fixed. The same thing happens when a *pasāda rūpa* makes contact with the *hadaya vatthu*. The *hadaya vatthu* vibrates 17 times, with each vibration leading to the arising of a *citta*. **That is the origin of a *citta vīthi* with 17 *cittā*.** Those 17 vibrations are a form of energy called a *hadaya rūpa*.

10. The misconception that any *rūpa* has a lifetime of 17 thought moments arose because of not understanding the difference between a *rūpa* (which is the image of an external object) and a *hadaya rūpa* (which is just the 17 vibrations of the *hadaya vatthu*).

- In other words, this information packet is received and processed by the *hadaya vatthu* within those 17 *cittā*. The information is complete by the fourth *citta* (fourth vibration of the *hadaya vatthu*) and then the rest of the *citta* in that *citta vīthi* deal with this information. Three more *citta vīthi* run by the *hadaya vatthu* itself completes the process. Those additional *citta vīthi*, initiated by the mind, are *manodvāra citta vīthi*. Here, *manodvāra* means the “mind-door.”
- Details of #9 and #10 at, [“Does any Object \(Rūpa\) Last only 17 Thought Moments?.”](#)

The mind is Fast But the Brain is Slow

11. Thus we can see that there is a vast **difference** in time between the two processes involved. The physical body acquiring data takes the time of the order of 10 milliseconds. The mind processing that information within a billionth of a second (using one *pañcadvāra citta vīthi* and three *manodvāra citta vīthi*.)

- Even if the five senses keep sending data continuously, the mind is “just sitting there” most of the time. Let us examine this in a bit detail: Suppose the brain keeps sending data from the eye non-stop. Since each “packet” takes, say ten milliseconds, then in a second, there will be 100 “data packets” of vision coming in. If the brain is going at full speed, it can send at most 500 (=100×5) “data packets” from all five physical senses in a second. **Then the mind will be spending less than a millionth of a second in**

processing all that data. **During a movie that lasts two hours, the mind will be active probably less than a second in total.** Of course, this is a very simple analysis and the actual values could be higher, especially when taking into account the interaction of *dhammā* with the mind directly, i.e., “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ.*”

12. During those “gaps,” the *hadaya vatthu* also interacts (both ways) with the *mana indriya* in the brain. **In particular, it gives instructions to the brain (via *mana indriya*) on how to control the physical body in response to the sensory inputs.**

- **Thus, the mind is just sitting there most of the time.** That “idle state” of the mind is the “*bhavaṅga*” state.
- **A key point here is that the mind spends only a VERY SHORT TIME experiencing the SENSORY INPUTS. There is no “self” watching a movie.** However, the mind gives the illusion that there is a “self” watching the movie. Details are in the next post, “[Chachakka Sutta – No “Self” in Initial Sensory Experience.](#)”
- The above is a very brief discussion. Of course, there are more details, but one can hopefully get the basic idea. Please ask questions if something is not clear. It is critical to understand this post.

Summary

13. The critical point embedded in the [WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#) is **that there is no “self” experiencing the external world.** We have been discussing the initial steps in sensory events addressed by that *sutta*.

- The key message in the *sutta* is that the mind DOES NOT experience the external world CONTINUOUSLY. Instead, the mind is active only for very brief periods of time when receiving inputs from the five *pasāda rūpa*. As we above it is the brain that is “on” much longer than the mind. **Once the brain processes information packets, the mind absorbs that information within a “blink of an eye.”**
- On the other hand, the brain has a heavy workload while watching a movie. It has to process audio and video inputs at a rapid rate for the duration of the movie. One could get a headache if one watches two movies at a stretch. But even during that time, the mind is mostly in the *bhavaṅga* state. There is no “self” watching the movie. It is just a series of events taking place. **The mind is “putting all those “events” together and giving the appearance of a continuous progression of events.** Thus one has the perception that “I am watching a movie.”
- Details are in the next post, “[Chachakka Sutta – No “Self” in Initial Sensory Experience.](#)”
- **Later on, we will also discuss why it is also incorrect to say that there is “no-self.”**

5.2.8.4 Chachakka Sutta – No “Self” in Initial Sensory Experience .5.5

October 19, 2019; revised #12 on September 28, 2020

Cha chakka – Six Sets of Sixes

1. We have finished discussing the six steps in the *Chachakka Sutta*. Let us briefly summarize the “six sets of sixes” (*Cha chakka*.)

- The *sutta* first lists the “six sets” or “six collections.” “*Cha ajjhattikāni āyatanāni veditabbāni, cha bāhirāni āyatanāni veditabbāni, cha viññānakāyā veditabbā, cha phassakāyā veditabbā, cha vedanākāyā veditabbā, cha tanhākāyā veditabbā.*”

That means: “One needs to understand the following “six sets of sixes”: Six **internal āyatana**, six **external āyatana**, six classes of (**vipāka**) **viññāna**, six classes of **phassa**, six classes of **vedanā**, six classes of **tanhā**. Let us briefly state what they are. I have explained them in detail in preceding posts.

- Six internal āyatana are: “*Cakkhāyatanaṃ, sotāyatanaṃ, ghānāyatanaṃ, jivhāyatanaṃ, kāyāyatanaṃ, manāyatanaṃ.*”
- Six external āyatana are: “*Rūpāyatanaṃ, saddāyatanaṃ, gandhāyatanaṃ, rasāyatanaṃ, phoṭṭhabbāyatanaṃ, dhammāyatanaṃ.*”
- Six classes of (*vipāka*) *viññāna* are: “*cakkhuvīññāna, sotavīññāna, ghānavīññāna, jivhāvīññāna, kāyavīññāna, manovīññāna.*”
- The six classes of *phassa*: “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññānaṃ, tiṇṇaṃ saṅgati phasso*” and similarly for the other five (**i.e., they are six types of “san phassa”**),
- Six classes of *vedanā*: “*phassa paccayā vedanā*” arising due to each of the preceding six types of “*san phassa*.”
- Six classes of *tanhā*: “*vedanā paccayā tanhā*” due to the preceding six types of *vedanā*.
- It could be a good idea to print out the Pāli version of the *sutta* so that you can track which section of the *sutta* a verse under discussion is.

***Chachakka Sutta* Describes Initial Sensory Experiences Based on a New Ārammaṇa**

2. About the first fourth of the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” discusses the following steps: “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññānaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā tanhā.*” (**repeated for all six sense faculties.**)

The *sutta* describes the automatic and instantaneous response to a new ārammaṇa. With several posts, we discussed in detail all those steps. Very briefly, those steps are (just focusing on the *cakkhu viññāna*):

- With the coming together (contact) between *cakkhu* (or *cakkhu pasāda rūpa*) and a *rūpa* (which is a “snapshot” of that external *rūpa*), *cakkhu viññāna* arises. ***Cakkhu is NOT the physical eyes; “seeing” happens only when a rūpa makes contact with cakkhu pasāda.*** Please review previous posts as needed.
- If that *rūpa* has a *kāma guṇa*, one may get interested in it (if one has the corresponding “*san gati*”). The next step takes place ONLY IF one has such matching *gati* for that *rūpa* or that *ārammaṇa*.
- If one has matching “*san gati*,” then a corresponding “*samphassa-jā-vedanā*” arises AUTOMATICALLY. See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”
- The next step, “*vedanā paccayā tanhā*,” happens if that “*samphassa-jā-vedanā*” is strong enough to take further action. We discussed that last step in, “[Kāma Guṇa – Origin of Attachment \(Tanhā\).](#)”

A Ārammaṇa triggers sensory Experiences

3. Therefore, the *sutta* describes the series of events that take place when a new *ārammaṇa* comes to the mind via one of the six internal sense bases (internal *āyatana*).

- **It is essential to see that ALL these activities happen AUTOMATICALLY and INSTANTANEOUSLY. They do not require CONSCIOUS thinking. There is no INTENTION involved.**
- That is a critical point to understand. You might say, “I can use any of the sensory faculties (internal *āyatana*) anytime I want to.” That is true. But think about any event, and you can ALWAYS trace it back to a *ārammaṇa* that comes to mind on its own.
- For example, when you are walking down a crowded street, you may see, hear many things. But one sight or sound could stop you and start doing something else. You may see an eye-catching item in a store window, stop to look at it, and then go inside to buy it. That was triggered via, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.*” **The *sutta* describes what happens ONLY at the MOMENT that you saw the item.** Once you get “attached to it,” you start generating *vacī saṅkhāra* (consciously thinking about the item) and *kāya saṅkhāra* (go inside the store). That is the “*kamma* generation” stage. We will discuss that in later posts.
- Even in the middle of a discussion, one may get a new idea, and then everyone may start talking about that new idea he/she presented. The conversation changes to a new topic with the new *ārammaṇa*. That happened with a *dhammā* (an idea) which came to the mind via “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ.*”

Chachakka Sutta Describes Only *Kamma Vipāka*

4. All the steps in #2 above happen within a fraction of a second. There is no conscious thinking involved. **They are all *kamma vipāka*.**

- Of course, that process describes only those events immediately following the INITIAL sensory contact. One can deliberately experience that sensory contact again and again after the initial experience. For example, one may keep looking at an interesting sight or keep listening to a pleasing sound. **That is when one accumulates a new *kamma* (if done with greed, anger, or ignorance).** We will discuss those steps in future posts involving *Paticca Samuppāda*.
- **Results of past *kamma* automatically lead to *kamma vipāka*. Based on them, we create new *kamma*. That is how the rebirth process continues.**

Sensory Inputs – One “Packet” At a Time

5. As I discussed in detail in the previous post, all our sensory inputs are first processed by the brain in “packets.” The brain can process those six types of data in parallel (at the same time). Each “packet” is about one-hundredth of a second (10 milliseconds) in duration. Then those processed signals arrive at the seat of the mind (*hadaya vatthu*) located on the mental body (*manomaya kāya* or *gandhabba*). The mind, in turn, analyzes only ONE packet of information at a time. See the previous post, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

- For example, while the mind is processing a “sight” or *rūpa rūpa*, it CANNOT process a “sound” or a “*sadda rūpa*.” The mind switches to another sensory input after analyzing that “snapshot” of sight. **Of course, our eyes and ears do not “die” moment-to-moment. It is just that “*cakkhu*,” for example, is ALIVE (or ACTIVE) only while the mind is processing input from the physical eyes.**
- Therefore, ONLY ONE internal *āyatana* is “ALIVE” at a given moment. Our “*cakkhu*” comes alive while the mind is receiving a “snapshot” of an external *rūpa*. The “*sota*” is alive (or active) only during a brief moment of receiving a “bit of sound” like just a word. **They come to the mind in “packets,” not as a continuous stream. But it SEEMS that we experience them all at the same time since the mind processes all inputs at a fast rate.**

- The following example may help to get the basic idea. We have seen those signposts where a message runs one letter at a time, but at a fast rate. Only one letter is in display at a given moment. But within a fraction of a second, that letter turns off, and the next letter turns on, and so on. Since it happens fast, we can read the message.
- The mind is extremely fast. It is able not only to put together such a stream of incoming signals but also to separate the six sensory inputs. In the previous post (see #8 there), I briefly mentioned that the mind does this with the help of the *manasikāra cetasika*.
- More details at [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)

If *Cakkhu* Is “*Attā*,” It Must Be Alive (or Operational) All The Time

Now let us discuss the next verse in the *sutta*. It helps understand what is meant by the critical Pāli words *attā* and *sakkāya diṭṭhi*.

6. We have the perception that there is a “self” that sees, hears, tastes, smells, touches, and recalls *dhammā* all at the same time.

- However, we do not experience all six sensory inputs at the same time. Even with just one sensory input, the mind receives only a brief “snapshot” of it at a time. See, [“Vision Is a Series of “Snapshots” – Movie Analogy.”](#)
- In other words, our six internal *āyatana* of *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano* arise ONLY if a corresponding *ārammaṇa* appears. As I have emphasized, our physical eyes, ears, nose, tongue, and body are not our internal *āyatana*. See, [“Buddhist Worldview – Introduction.”](#)
- Therefore, “one’s self” is not there in ANY of those 36 entities. **All those come to existence momentarily and pass away. That happens from time-to-time only when a *ārammaṇa* is registered.**
- **That is a critical conclusion that is related to “*anattā*.”** It will also become clear that *anattā* is different from *anatta* (without the long “*ā*.”) Let us discuss *anattā* in detail now.

A “Self” Is Not Involved in The Preceding Processes

7. After going through the steps in #2 above, the next part of the *sutta* starts with the verse, “*Cakkhu attā’ti yo vadeyya taṃ na upapajjati. Cakkhussa uppādopi vayopi paññāyati. Yassa kho pana uppādopi vayopi paññāyati, ‘attā me upapajjati ca veti cā’ti iccassa evamāgatam hoti. Tasmā taṃ na upapajjati: ‘cakkhu attā’ti yo vadeyya. Iti cakkhu anattā.*”

Loosely translated: “If anyone says, ‘The *cakkhu* is self,’ (or “seeing” is mine or “it is I who sees”) that is not tenable. **An arising and disappearing of *cakkhu* (not the physical eye) is evident.** If *cakkhu* is ‘self,’ that would imply: ‘my self arises and disappears’ OR ‘I come into being momentarily and disappear.’ **That is why it cannot be argued that ‘The eye is self.’** Thus *cakkhu* is ‘not-self’ or ‘*anattā*.’ (“*na attā*” for “not *attā*” rhymes as “*anattā*,” just as “*na āgāmi*” rhymes as “*Anāgāmi*.”)

- That verse is then repeated for the other five entities related to *cakkhu*, i.e., *rūpa*, *cakkhu viññāna*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, *taṇhā* (due to *cakkhu samphassa-jā-vedanā*.) The last verse in that series is, “*Iti cakkhu anattā, rūpā anattā, cakkhuvīññāṇaṃ anattā, cakkhusamphasso anattā, vedanā anattā, taṇhā anattā.*”
- Then that is repeated for the six entities associated with *sota*, *ghāna*, *jivhā*, *kāya*, and *mano* (6 x 6). The last verse is, “*Iti mano anattā, dhammā anattā, manovīññāṇaṃ anattā, manosamphasso anattā, vedanā anattā, taṇhā anattā.*” At this point, we are about halfway through the text in the *sutta*.
- Therefore, there is no “self” to be found in any of those.
- Now let us discuss two other *suttā* briefly to make those points clear.

Bāhiya Sutta – “Diṭṭhe Diṭṭhamattaṃ Bhavissati”

8. In the [“WebLink: suttacentral: Bāhiya Sutta \(Udāna 1.10\),”](#) the Buddha tells Bāhiya, “*Tasmātiha te, bāhiya, evaṃ sikkhitabbaṃ: ‘diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati’*ti.

Translated: “Bāhiya, you should train yourself the following way. At any moment, what you see (*diṭṭhe*) is just a snapshot (*diṭṭhamattaṃ* is literally, “trace of a sight.”) What you hear (*sute*) is a brief sound (*sutamattaṃ*.) What you experience with taste, smell, and touch (*mute*) is a trace of that (*mutamattaṃ*.) Your *viññāna* (*viññāte*) is a trace of *viññāna* (*viññātamattaṃ*.)

Then the Buddha further explains, “*Yato kho te, bāhiya, diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati, tato tvaṃ, bāhiya, na tena; yato tvaṃ, bāhiya, na tena tato tvaṃ, bāhiya, na tattha; yato tvaṃ, bāhiya, na tattha, tato tvaṃ, bāhiya, nevidha na huraṃ na ubhayamantarena. Esevanto dukkhassā*” ti.

Translated: “**Since what you see (*diṭṭhe*) is just a snapshot** (and similarly for others), Bāhiya, **there is no “you” (involved) there**; because of that Bāhiya, should not get attached (*na tattha*); if you do that, **Bāhiya, “you” are not in this existence (*nevidha*) or another existence (*na huraṃ*) or in between those two (*na ubhayam antarena.*)”** That (understanding) is the end of suffering (*Esevanto dukkhassā*” ti.)

My comments:

- **That means it is incorrect to say there is a “self” experiencing those traces of sensory events. Those are just results (*vipāka*) of past *kamma*, i.e., causes bring corresponding results.** We will explain this further with the *Mālukyaputta Sutta* below.
- **However, the above description may give the impression that everything is deterministic. That is not so, and that will become clear when we address what happens following the initial “vipāka stage.”**
- Many people incorrectly translate “*mattaṃ*” to English as “only.” For example, most current translators translate “*diṭṭhe diṭṭhamattaṃ*” as “seeing is only seeing.”
- *Diṭṭhamatta* means “a snapshot” (literally a “trace of seeing.”). For example, *appamatta* means “insignificant.” “*appa*” means “little” and “*matta*” means “a trace.” *Matta* is “*mātra*” in Sanskrit and “මොර” in Sinhala. As we discussed in the previous post, it is the mind (or the *viññāna*) that gives us the illusion of a continuous sensory experience implying an “experiencer.” That is why the Buddha said that *viññāna* is a magician. See #2 of, [“Vision Is a Series of “Snapshots” – Movie Analogy.”](#)

Mālukyaputta Sutta – Same Verse In More Details

9. Those above verses in #8 are also in the [“WebLink: suttacentral: Mālukyaputta Sutta \(SN 35.95\),”](#) where the Buddha tells *bhikkhu* Mālukyaputta, “*Ettha ca te, mālukyaputta, diṭṭhasutamutaviññātabbesu dhammesu diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati. Yato kho te, mālukyaputta, diṭṭhasutamutaviññātabbesu dhammesu diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati; tato tvaṃ, mālukyaputta, na tena. Yato tvaṃ, mālukyaputta, na tena; tato tvaṃ, mālukyaputta, na tattha. Yato tvaṃ, mālukyaputta, na tattha; tato tvaṃ, mālukyaputta, nevidha, na huraṃ, na ubhayamantarena. Esevanto dukkhassā*”ti.

- That is very similar to *Bāhiya Sutta* above. However, now *bhikkhu* Mālukyaputta recounts what he understood. That is very informative.

***Mālukyaputta Sutta* – What Happens If One Gets Attached**

10. *Bhikkhu* Mālukyaputta then says that he understood what the Buddha meant by the above verse. He explains his understanding:

*‘Rūpaṃ disvā sati muṭṭhā,
Piyaṃ nimittaṃ manasi karoto;
Sārattacitto vedeti,
Tañca ajjhosa tiṭṭhati.*

*Tassa vaḍḍhanti vedanā,
anekā rūpasambhavā;
Abhijjhā ca vihesā ca,
cittamassūpahaññati;
Evaṃ ācīnato dukkhaṃ,
ārā nibbāna vuccati.’*

Translation:

“When one sees a form (*rūpa*) without mindfulness (i.e., without knowing that it is just a trace of “seeing”), one gets attached to that (*nimitta* or *ārammaṇa*),
One experiences it with an infatuated mind (with greed)
And **remains** bound to it.

“Many feelings flourish within,
Originating from the mind thinking about many related *rūpa* (*anekā rūpasambhavā*);
Greed and anger as well
By which one’s mind becomes disturbed;
For one who accumulates suffering thus
Nibbāna is far away.

***Mālukyaputta Sutta* – What Happens If One Does Not Get Attached**

11. *Bhikkhu* Mālukyaputta then says the following about how one needs to train oneself to attain *Nibbāna*:

*‘Na so rajjati rūpesu,
rūpaṃ disvā paṭissato;
Virattacitto vedeti,
tañca nājjhosa tiṭṭhati.*

*Yathāssa passato rūpaṃ,
sevato cāpi vedanāṃ;
Khīyati nopacīyati,
evaṃ so caratī sato;
Evaṃ apacīnato dukkhaṃ,
santike nibbāna vuccati.’*

Translation:

“When one sees a form with mindfulness (with proper understanding)
One is not inflamed by lust for forms;
One experiences it with a dispassionate mind
And does not hold on to it tightly.

“For one acting mindfully in such a way
Without attaching to the form,
Even while one experiencing those feelings;

Suffering is exhausted, not built up
For one not piling up suffering thus,
Nibbāna is near.

Next Post

12. From what *bhikkhu* Mālukiya putta stated above, we can begin to see that it is not correct to say that it is “no-self,” either. After the “*vipāka* stage” that comes with a new *ārammaṇa* is over, it is possible to “take control” of the sensory experience. **That is possible ONLY IF one comprehends that *anattā* nature involved in the *vipāka* stage.** Without that understanding, one would have *sakkāya diṭṭhi* as the *sutta* points out next.

- **Aside for those who are anxious to see why it is not correct to say that it is “no-self,” either:** At the end of the *vipāka* stage (at the step, “*vedanā paccayā taṇhā*”), a new phase of the sensory experience starts. That is the “*kamma* accumulation” stage. That new phase could last a long time if the mind is firmly attached to that *ārammaṇa*. One may think about more ways of enjoying that *ārammaṇa*, may speak about it, and may do things to pursue that *ārammaṇa*. **All those are *saṅkhāra*, and they lead to *kamma viññāṇa* via, “*saṅkhāra paccayā viññāṇa*.”**
- However, *Chachakka sutta* starts at the *vipāka* stage (with a sensory experience) and shows how one starts accumulating *kamma* ONLY IF one has *saṅgati* (if one has the corresponding “*saṅ gati*”). See #2 above. That decision to “get attached” is made at the *voṭṭhapana* stage of a *citta vithi*. See, #15 of “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#).”
- Details of that “*kamma* accumulation” process will depend on whether one would still have *sakkāya diṭṭhi*. That means one does not realize that there is no “self” or “*attā*” involved in that initial sensory experience due to *kamma vipāka*.
- That is the next verse in the *Chachakka Sutta*, which we will discuss in the next post.

5.2.8.4 Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma” .5.6

October 26, 2019; revised November 1, 2019

Summary of *Chachakka Sutta* Up to This Point

1. The *Chachakka Sutta* (MN 148) describes in detail what happens when a new *ārammaṇa* (thought object) comes to the mind. The mind may “attach” (*taṇhā*) to that *ārammaṇa* via greed, anger, or ignorance. Let us briefly summarize those steps. All relevant posts are at, “[Origin of Life](#).”

- First, depending on the specific internal *āyatana* involved, one of six *vipāka viññāṇa* arises. Those are *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, or *mano viññāṇa*. Such a *viññāṇa* does not create *kammic* energy. It is just “seeing,” “hearing,” “smelling,” “tasting,” “touching,” or “recalling a memory or an idea.”
- **Then the mind “makes contact” with “*saṅ gati*.”** If one has *gati* to attach to that *ārammaṇa* via greed, anger, or ignorance, then the mind GENERATES corresponding *somanassa*, *domanassa*, or *upekkha vedanā*. They are *samphassa-jā-vedanā* or mind-made *vedanā*.
- The mind “attaches” to that *ārammaṇa* if such a “mind-made” *vedanā* arises. Here one can attach (*taṇhā*) via greed, hate, or ignorance.
- The keyword *ārammaṇa* was introduced in the post, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#).”

The Unique Situation For an *Arahant*

2. Only the first step happens in an *Arahant*. There is no attachment to any *ārammaṇa*. Only the experience of *kāma guna* (such as the sweetness of sugar or the bitterness of lemon) is there. See, "[Kāma Guna – Origin of Attachment \(Tanhā\)](#)."

- However, an *Arahant* would also feel *kāyika* (bodily) *vedanā* due to injuries, sicknesses, etc. Those are *dukkha*, *sukha*, or *adukkhamasukha vedanā*. Note that *somanassa/domanassa vedanā* based on those *kāyika* (bodily) *vedanā* are not experienced by an *Arahant*.
- Anyone other than an *Arahant* MIGHT attach to a particular *ārammaṇa*. Whether or not that attachment happens, depend on the "*san gati*." It is not that everyone attaches to every *ārammaṇa*.

Deeper Aspects of the *Chachakka Sutta*

3. We also discussed the "deeper aspects" involved in those steps.

- Only one of the six types of *viññāṇa* arises in mind at any moment due to a specific *ārammaṇa*. When we see, do not hear, smell, taste, touch, or think AT THAT BRIEF MOMENT. That is because only one *citta vīthi* focused on one sensory input can be present at any moment. Put it in another way, **only one *pasāda rūpa* can make contact with the *hadaya vatthu* (seat of the mind) at a given time.** The mind analyzes that sensory contact with four *citta vīthi* JUST FOCUSED ON that particular sensory input.
- For example, when the mind is analyzing a "packet of sound," it just focuses on that sound. The mind DOES NOT and CANNOT see, taste, smell, etc. during that brief time. Thus sensory inputs are analyzed in "packets." Each "packet" is only one of six possible types (sight, sound, taste, smell, touch, or recall of *dhammā*.)
- We analyzed that in terms of recent findings from modern science. The mind takes "snapshots" of each sensory input separated by about a hundredth of a second (10 milliseconds.) Since that happens very fast, we "feel like" we are "seeing continuously." That is an illusion created by the mind, just like we perceive a set of snapshots as a continuous movie. See, "[Vision Is a Series of "Snapshots" – Movie Analogy](#)."
- Not only that, but we feel that we are seeing, hearing, tasting, smelling, touching, and thinking all at the same time. But the reality is that the mind receives only one "snapshot" at a time. The mind has the astounding capability to combine "data packets" from the "six doors" without mixing them up!

What is *Ghāna Saññā*?

4. The fast mind gives the illusion that there is a "person" or a "self" or an "*attā*" experiencing those sensory events. That incorrect perception is "*ghāna saññā*" or a "perception of solidity."

- I had not used that term "*ghāna saññā*" previously. It is a word that describes the illusion that the mind creates by taking a series of "snapshots" and linking them together to provide a "continuous sensory experience."
- As we discussed, that is what happens when we watch a movie too. The illusion of continuous motion results with the projection of a series of "static pictures." See, "[Vision Is a Series of "Snapshots" – Movie Analogy](#)."

5. **Therefore, any sensory event is just a brief "snapshot." It lasts a brief moment and goes to the past. That is the critical point to understand.** Bāhiya understood that point instantly and attained the *Arahanthood*. But he had cultivated the path almost to the end, and just needed a "little push" to get there. That is what we discussed in the previous post, "[Chachakka Sutta – No "Self" in Initial Sensory Experience](#)."

- The mind has the astounding capability to recall preceding "snapshots," and to put it all together to present a "continuous sensory experience." That is why the Buddha called *viññāṇa* a magician.

6. We also have a “*ghāna saññā*” about our physical body. We perceive that our bodies are solid, but as I have explained in a previous post, our bodies are “mostly empty.” That is because those atoms and molecules which make up our bodies are mostly empty. see, #7 – #10 of the post, “[Mystical Phenomena in Buddhism?](#).”

- I keep summarizing the discussion up to now since there is a lot of material embedded in those verses. Now, let us discuss the next verse in the *sutta*.

Next Verse in the *Chachakka Sutta* – *Sakkāya Samudaya*

We have discussed up to the verse which ends with, “*Iti mano anattā, dhammā anattā, manoviññāṇaṃ anattā, manosamphasso anattā, vedanā anattā, taṇhā anattā.*” Now we are getting to the critical conclusion reached from those earlier verses.

7. The next verse in the *sutta* starts with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā—cakkhuṃ ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; rūpe ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; ...*”

- *Sakkāya* here refers to *sakkāya diṭṭhi*. *Samudaya* (“*san*” + “*udaya*”) means “arising (due to) *san*.” *Gāmini* means “path.” *Patipada* means an “action plan” or simply one’s behavior. Thus, *sakkāyasamudayagāminī paṭipadā* means, “the behavior that leads to the arising of *sakkāya diṭṭhi*.”
- Then it says, *sakkāya diṭṭhi* arises because one believes that “*cakkhu* is mine, *cakkhu* is what I am, *cakkhu* is my “self.”
- The *sutta* then repeats that for all other five entities associated with “seeing.” They are *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā* (that results from *cakkhu samphassa-jā-vedanā*.)
- Then it is repeated for the other five internal *āyatana*: *sota*, *ghāna*, *jivhā*, *kāya*, *mano*.

Re-cap on the Initial Sensory Experience Due to *Kamma Vipāka*

8. All our discussions on the first half of the *sutta* led to the CRITICAL conclusion in the above verse. In simple terms, “there is no EXPERIENCER” experiencing those initial sensory inputs. As we remember, those INITIAL sensory inputs come in as *kamma vipāka*.

- Let me emphasize this point. Any sensory experience starts without direct initiation by the “experiencer.” For example, one FIRST sees an object via “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.*” But that does not happen by chance. It is ALWAYS a *kamma vipāka*.
- A *kamma vipāka* experienced through the physical body (*kāya*) can be comforting (*sukha*), painful (*dukkha*), or neutral (*adukkhamasukha*). For example, one gets to lie on a comfortable bed due to a good *kamma* done in the past. A bad *kamma* done in the past leads to an injury. Both happen via “*kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ.*”

9. All other INITIAL sensory EXPERIENCES START with *adukkhamasukha vedanā*. We see, hear, smell, taste, or a thought comes to the mind. The last one is, “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ.*” All those generate *adukkhamasukha vedanā* (neutral feeling).

- However, based on all six initial sensory contacts, we may instantly generate *somanassa* or *domanassa vedanā* due to *kāma guṇa*. For example, it is natural for a human (including *Arahants*) to experience an appealing taste when tasting sugar or upon seeing an attractive person.
- Based on those are “mind-made” feelings or “*samphassa-jā-vedanā*.” They are different from *dukkha/sukha vedanā* associated with sensory contacts with the body (*kāya*.)

- Now, based on such **somanassa or domanassa vedanā due to kāma guṇa**, an average human MAY generate **samphassa-jā-vedanā**. That will happen IF the mind “get stuck” ((*taṇhā*) on that sensory input. Of course, an *Arahant* WILL NOT generate those **samphassa-jā-vedanā**.
- That was discussed in, “[Kāma Guna – Origin of Attachment \(Tanhā\)](#).”

Taṇhā* Leads to *Upādāna* via *Paṭicca Samuppāda

10. That is a critical step in *Paṭicca Samuppāda*, not discussed in the *Chachakka Sutta*. That *sutta* explains only the *KAMMA VIPĀKA* stage. That step of “*taṇhā paccayā upādāna*” starts the “new *kamma* GENERATION” process.

- I hope now you can see that ALL of our *kamma* generation activities start when a new *ārammaṇa* comes to the mind. That starts with, “*salāyatana paccayā phasso*” step in the *Paṭicca Samuppāda* cycle. It is the “*taṇhā paccayā upādāna*” step that starts a new *Paṭicca Samuppāda* cycle with “*avijjā paccayā saṅkhāra*.”
- That is a CRITICAL point. I will take the time to explain this “*taṇhā paccayā upādāna*” step. That way, one can get insights into how *Paṭicca Samuppāda* operates. Then one can begin to get an idea of the importance of understanding key concepts of Buddha Dhamma.

A New *Paṭicca Samuppāda* Process Starts Only if One Starts Acting with *Avijjā*

11. Next, the *Chachakka Sutta* states the REASONS why a given person may START to going through the *kamma* generation stage starting with *avijjā*. See, “[Chachakka Sutta – No “Self” in Initial Sensory Experience](#).”

- **One would pursue a given *ārammaṇa* (the sight, sound, etc.) ONLY IF one perceives that it is worthwhile or beneficial to him or her.** That perception comes from the wrong view that those sensory experiences are one’s own. As we discussed, that wrong view is *sakkāya diṭṭhi*.
- One with *sakkāya diṭṭhi* does not realize that those experiences are just results of causes from the past. That they are *kamma vipāka*. Then one tries to get control of the situation by either trying to maintain a “good experience” or by trying to avoid a “bad experience.” **Therefore, it is POSSIBLE for ANYONE with *sakkāya diṭṭhi* to go through the “*taṇhā paccayā upādāna*” step.**
- However, a *Sotāpanna* (who has removed *sakkāya diṭṭhi*) may still do immoral deeds. Obviously, a *Sotāpanna* would NOT do *apāyagāmī* deeds. But he/she may still do less-strong immoral deeds. That is because a *Sotāpanna* still has wrong perceptions (*viparita saññā*.) **It is only at the *Arahant* stage that one would have removed both wrong views AND wrong perceptions.** I will explain this in a future post after concluding the discussion on the *Chachakka Sutta*.

12. **However, not everyone with *sakkāya diṭṭhi* will go through the “*taṇhā paccayā upādāna*” step.** Different people “attach” to different types of *ārammaṇa*.

- For example, if a beautiful woman starts working at a workplace, everyone will see her as beautiful. But only a few will get “attached” and start thinking about asking her for a date. There could be one person who may “fall in love head over heels” at first sight of her.
- That is why we cannot say there is “no-self” either. Until one attains the *Arahanthood*, there will be a “dynamic self” who gets attached to some things in this world. I say a “dynamic self” because there is no “fixed self” in the sense of a soul or a “*ātma*.” See, “[What Reincarnates? – Concept of a Life-stream](#).”

Attachment (*Taṇhā*) Can Happen Due to Greed, Anger, or Ignorance

13. In the above example, we discussed getting attached to the sight of a beautiful woman. But as we have discussed before, one can “attach” to a *ārammaṇa* via anger or ignorance too.

- Seeing an enemy, one will instantly generate anger in mind via the steps in the *Chachakka Sutta*. Here, the *samphassa-jā-vedanā* generated is a *domanassa vedanā*. It is a stressful *vedanā*. But still one “attaches” to that *ārammaṇa*, and will start making bad *vacī saṅkhāra* (i.e., conscious thoughts of anger) in mind.
- On the other hand, the *samphassa-jā-vedanā* generated in the example discussed in #12 above (upon seeing a beautiful woman) is a *somanassa vedanā*. That person “attaches” via greed.
- In some situations, there could be confusion on how to respond to a *ārammaṇa* and still get “stuck.” That is due to *avijjā*.

Taṇhā* Leads to *Upādāna* Depending on One’s Level of *Avijjā

14. Having one or more of the following views lead to *sakkāya diṭṭhi*.

- The physical body (*kāya*) is mine, it is what I am, and it is my “self.” Furthermore, all associated bodily functions are mine, they are what I am, and they are my “self.” Those are: seeing or *cakkhu*, hearing or *sota*, tasting or *jivhā*, smelling or *ghāna*, touching or *kāya*, thinking or *mana*. See #6 above.
- Then one also tends to associate some external *rūpa* the same way. Those are *rūpa rūpa* (or *vanṇa rūpa* or simply *rūpa*), *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and *dhamma rūpa* or *dhammā*. For example, “this is my house; my song; this is my cake; my favorite scent; my comfy bed; these are my thoughts.”
- One may also perceive that all of one’s mental aspects (*cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā*) are all one’s “self.” Of course, the same with other mental aspects associated with other sense faculties. There are 36 (6 X 6) such entities that the *sutta* lists. See, [“Chachakka Sutta – No “Self” in Initial Sensory Experience.”](#)

Pañcupādānakkhandhā* as *Sakkāya Diṭṭhi

15. Those 36 entities are also known as “*pañcupādānakkhandhā*.” Here, *Pañcupādānakkhandhā* comes from “*pañca*” + “*upādāna*” + “*khandha*” or the five aggregates, to which one gets attached. See, [“Chachakka Sutta – No “Self” in Initial Sensory Experience.”](#)

- If you carefully look at those 36 entities, they include *rūpakkhandha*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and the *viññāṇakkhandha*. However, one does not take all of those to be “mine.” For example, out of all the houses in this world, one may claim to own one or a few homes. Out of all humans, one may have a set of people that one considers to be “mine.” For example, my parents, wife, children, friends, etc.
- Therefore, it is only a small fraction of the *pañcakkhandha* that one has “attachments to.” Those attachments can vary from very strong (my body is the strongest) to decreasing levels for friends, and neighbors, etc.
- Thus, *pañcupādānakkhandhā* is a small fraction of the *pañcakkhandha*.
- The [“WebLink: suttacentral: Sakkāyapañhā Sutta \(SN 38.15\)”](#) DEFINES *sakkāya* as *pañcupādānakkhandhā*: “*Sakkāyo, sakkāyo ’ti, āvuso sārīputta, vuccati. Katamo nu kho, āvuso, sakkāyo ’ti? “Pañcime, āvuso, upādānakkhandhā sakkāyo vutto bhagavatā, seyyathidaṃ—rūpupādānakkhandho, vedanupādānakkhandho, saññupādānakkhandho, saṅkhārurupādānakkhandho, viññāṇupādānakkhandho. Ime kho, āvuso, pañcupādānakkhandhā sakkāyo vutto bhagavatā ’ti.*”

Other Ways of Describing *Sakkāya Diṭṭhi*

16. It is possible to describe *sakkāya diṭṭhi* in somewhat different ways. However, all of those are inter-consistent. The following posts discuss some of those. Please let me know if you find any inconsistencies (lal@puredhamma.net) or we can discuss it at the discussion forum.

- [Sakkāya Diṭṭhi is Personality \(Me\) View?](#)
- [Sakkāya Diṭṭhi and Tilakkhana](#)
- [Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views](#)

Wrong Views of *Nicca* and *Sukha* Lead to the Wrong View of *Attā*

17. **One gets attached to things that one perceives to be *nicca* and *sukha*.** *Nicca* (pronounced “nichcha”) means we believe we can keep them in the way we want or like. *Sukha* means we think we will be happy by getting “ownership” of them.

- Then one takes “ownership” of them. One considers those to be “one’s own” or “*attā*.” That attachment can vary from very strong to less strong. One’s own body and mental qualities (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* regarding one’s own body) gives the strongest sense of *attā*.
- Then comes one’s spouse, children, etc., one’s house, cars, etc., one’s relatives and friends, etc.
- Therefore, the hardest to remove is the sense of *attā* with regards to one’s own body.
- IT CANNOT be removed by will-power. It comes only from understanding the *anicca*, *dukkha*, *anatta* nature of this world. What we discussed up to now play a significant role in that understanding. There is no “experiencer.” A sensory input comes in as a result (*kama vipāka*) of a previous cause (*kamma*.)

5.2.8.4 An Apparent “Self” Is Involved in Kamma Generation

.5.7

November 2, 2019; revised November 6, 2019

Introduction

1. In this post, we will discuss why someone with *sakkāya diṭṭhi* believes in a “self” (knowingly or unknowingly) and **accumulates *kamma* with that wrong view.**

- In previous posts in this series, we discussed why there is no “Experiencer.” Thus, there is no need for the existence of a “self” to describe an INITIAL sensory experience.
- However, anyone with *sakkāya diṭṭhi* has the wrong view of a “self” experiencing sensory inputs. Based on that mistaken view, steps are taken to maintain a “good experience” or to stop a “bad experience.” Therefore, we could say that there is a “Doer” as long as there is *sakkāya diṭṭhi*. **That is why it is not correct to say that there is “no-self” either.**
- By the way, that does not mean we do not need to take action to prevent bad outcomes. The key idea is to realize the unfruitfulness of doing immoral actions in response to sensory inputs.
- The *Chachakka Sutta* (MN 148) describes in detail what happens when a new *ārammaṇa* (thought object) comes to the mind. **The mind may “attach” (*taṇhā*) automatically** to that *ārammaṇa* via greed, anger, or ignorance. Let us briefly summarize those steps. It is critical to follow these steps. All relevant posts are at [“Worldview of the Buddha.”](#) The main subsection is [“Origin of Life.”](#)

Posts on the Background Material

2. In earlier posts, we discussed that INITIAL sensory experiences DO NOT require a “self.” However, they do not happen arbitrarily or randomly either. Those sensory experiences have causes (or reasons); they are *kamma vipāka*.

- Some *kamma vipāka* bring in suffering, such as injuries, sickness, etc., while other *vipāka* results in pleasurable experiences, such as good food, comfortable living, etc. Those are ALL experienced via the physical body (*kāya*.) They are NOT illusions. There is real suffering (and some pleasures too.)
- All other INITIAL sensory experiences do not DIRECTLY lead to pain or pleasure. Seeing, hearing, smelling, tasting, and recalling memories, etc. are “neutral” sensory experiences at that moment.

3. However, based on those sensory inputs, *somanassa* or *domanassa vedanā* arise automatically in mind. Those are “mind-generated” *vedanā* based on “*kāma guṇa*.” All humans (including *Arahants* experience the sweetness of sugar or bitterness of some medicines.) These are the same as “*samphassa-jā-vedanā*.” See, “[Kāma Guna – Origin of Attachment \(Tanhā\)](#).”

- Then, based on those *samphassa-jā-vedanā*, a given person may attach (*taṇhā*) to that particular sensory event (*ārammaṇa*.) Only an *Arahant* is guaranteed not to attach.
- That is the summary of about a fourth of the Pāli text in the *Chachakka Sutta* (MN 148). That completes the six sets of six.

No “Self” Involved in the Initial Sensory Experiences

4. As we have discussed, the next verse in the *sutta* is, “*Cakkhu attā’ti yo vadeyya taṃ na upapajjati. Cakkhussa uppādopi vayopi paññāyati. Yassa kho pana uppādopi vayopi paññāyati, ‘attā me upapajjati ca veti cā’ti iccassa evamāgataṃ hoti. Tasmā taṃ na upapajjati: ‘cakkhu attā’ti yo vadeyya. Iti cakkhu anattā.*”

Loosely translated: “If anyone says, ‘The *cakkhu* is self,’ (or “seeing” is mine or “it is I who sees”) that is not tenable. **An arising and ceasing of *cakkhu* (not the physical eye) is evident.** If *cakkhu* is ‘self,’ that would imply the following: ‘my self arises and ceases’ OR ‘I come into being momentarily and cease to exist.’ **That is why one cannot argue that ‘The eye is self.’** Thus *cakkhu* is ‘not-self’ or ‘*anattā*.” (“*na attā*” for “not *attā*” rhymes as “*anattā*,” just as “*na āgāmi*” rhymes as “*Anāgāmi*.”)

- Then the next fourth of the Pāli text in the *Chachakka Sutta* (MN 148) states that the above conclusion holds for all 36 entities (“six sets of sixes”) involved in the initial sensory experience. Six **internal āyatana**, six **external āyatana**, six classes of (*vipāka*) *viññāṇa*, six classes of *phassa*, six classes of *vedanā*, six classes of *taṇhā*.
- See, “[Chachakka Sutta – No “Self” in Initial Sensory Experience](#)” for details on that.
- Then we discussed the next verse in the *sutta* starting with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā.*”

Attā Translated as “Self” Is Not Correct

5. The Pāli word “*attā*” does not really mean “self” even though I used that translation above. That translation is quite common these days. **We will go with that until we finish discussing *Paṭicca Samuppāda*. because it does help to get the *sakkāya diṭṭhi* idea of across below.** If I try to discuss the real meaning of *attā* right now, that could lead to confusion.

That is in fact why the Buddha refused to answer Vaccagotta’s question about whether or not there is an “*attā*.” See, “[WebLink: suttacentral: Ānanda Sutta \(SN 44.10\)](#).”

- Vaccagotta comes to the Buddha asked “*kiṃ nu kho, bho gotama, atthattā ti?*” OR “Master Gotama, is it correct to say that there is an “*attā*”?”
- **Note that “*atthattā*” is “*atthi attā*” where “*atthi*” means “exists.” Vaccagotta meant in this case “*attā*” to be “self.”** Thus, Vaccagotta meant: “Is it correct to say that a “*self*” exists?”
- The Buddha remained silent, and Vaccagotta asked the question again in the negative form. The second time, he asked: “*Kiṃ pana, bho gotama, natthattā ti?*” or, “Master Gotama, is it **not** correct to say

that there is a “self?”.” Seeing that the Buddha is refusing to answer his question, Vacchagotta got up and left.

- Note that “*natthattā*” is made up of three words: “*naatthi attā*,” which negates “*atthattā*.” Just as these days, many people were confused about the Pāli word “*attā*” and the Sanskrit word “*ātma*.” The latter meaning is closer to a “soul”
- I will discuss this *sutta* when I will come back to discuss “*attā*” in detail, after discussing *Paṭicca Samuppāda*. By the way, Vacchagotta understood the concept later on and became an *Arahant* too.

The Origin of the Wrong View of *Sakkāya Diṭṭhi* – *Sakkāya Samudaya*

6. The *sutta* then states that the wrong view of *sakkāya diṭṭhi* arises BECAUSE one does not realize the above facts. Without knowing those facts, one tends to BELIEVE that there is a “self” experiencing those very first sensory events.

- Then, if it is was a “good experience,” one would try to maintain that pleasant experience and also plan to experience it again in the future. In the case of a “bad experience,” one would do the opposite to try to avoid such “bad experiences.”
- The more one engages in either kind of such activity, the wrong VIEW of a “self” (*sakkāya diṭṭhi*) grows.

7. That explanation is in a short verse starting with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayaḡāminī paṭipadā—cakkhuṃ ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; rūpe ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; ...*”

- We discussed this verse in detail in the last post, “[Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma.”](#)”
- So far I have summarized the discussion up to now. Now, we can discuss the next verse of the *sutta*.

Next Verse in the *Chachakka Sutta* – *Sakkāya Nirodhaya*

The verse in #7 above explains how *sakkāya diṭṭhi* ARISES. The new verse below explains HOW *sakkāya diṭṭhi* WILL STOP FROM ARISING.

8. The next verse in the *Chachakka Sutta* (MN 148) starts with, “*Ayaṃ kho pana, bhikkhave, sakkāyanirodhagāminī paṭipadā—cakkhuṃ ‘netam mama, nesohamasmi, na meso attā’ti samanupassati. Rūpe ‘netam mama, nesohamasmi, na meso attā’ti samanupassati ...*”

The word *Nirodha* comes from “*nir*”+“*udaya*,” where “*nir*” means to stop and “*udaya*” means “arise.” Thus *nirodha* means to prevent something from arising.

- *Gāmini* means “path.” *Paṭipadā* means an “action plan” or one’s behavior. Thus, *sakkāyanirodhagāminī paṭipadā* means, “the behavior that leads to STOPPING the arising of *sakkāya diṭṭhi*.”
- Then it says, that will happen when one “SEES” that “*cakkhu* is NOT mine, *cakkhu* is NOT what I am, *cakkhu* is NOT my “self.” Here, “*netam*” means “*na*” + “*etaṃ*” or “it is not.”
- That is because, in reality, there is no “self” or a “soul” or a “*ātma*” that is associated with a living being. The sensory experiences arise due to past causes. Yet, we cannot explain the response of an average human to those sensory experiences without the assumption of a “self.” The response of an average human to such sensory inputs can only be explained by taking into account his/her mindset of believing in a “self.”
- (Once we discuss *Paṭicca Samuppāda*, it will become clear why future suffering arises BECAUSE of that wrong view of *sakkāya diṭṭhi*. That is how *sakkāya diṭṭhi* can be removed. Only then we can also understand the real meaning of *atta/attā* (and *anatta/anattā*.) I do not want to get into that issue right now, because that will confuse many people.)

9. The *sutta* then repeats that for all other five entities associated with “seeing.” They are *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *tanhā* (that results from *cakkhu samphassa-jā-vedanā*.)

- Then it is repeated for the other five internal *āyatana*: *sota*, *ghāna*, *jivhā*, *kāya*, *mano*. Please go through those verses.
- **However, it may NOT be easy to “see” that there is no “self” involved in sensory experiences.** We have had the wrong view of *sakkāya diṭṭhi* for virtually forever! That is why we are in this never-ending rebirth process.
- **To remove that strong *diṭṭhi*, we need to see the “true nature,” i.e., need to cultivate “*yathābhūta ñāṇa*.”**
- We will focus on that in detail in upcoming posts. However, this *sutta* briefly states the basic process.

Sakkāya Nirodhaya Starts With Vedanā

10. The key to arriving at that UNDERSTANDING is stated in the next verse of the *sutta*, starting with, “*Cakkhuñca, bhikkhave, paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassapaccayā uppajjati vedayitaṃ sukhaṃ vā dukkhaṃ vā adukkhamasukhaṃ vā.*”

Translated: “*Bhikkhus*, dependent on the eye and forms, eye-consciousness arises; then the mind makes contact with “*saṅ gati*”; that contact with “*saṅ gati*” leads to the arising of “mind-made” feelings **felt** as pleasant or painful or neither-painful-nor-pleasant.”

- Regardless of the sense faculty, those “mind-made” *vedanā* or “*samphassa-jā-vedanā*” CAN ARISE based on *kāma guṇa* AND one’s *gati*.
- We discussed this part of the verse already in the posts, “[Indriya Make Phassa and Āyatana Make Samphassa](#),” “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#),” and “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).”

Getting Attached to *Vedanā* Leads to the Growth of *Anusaya*

11. Then the subsequent verses introduce a critical word, *anusaya*. Based on *sukha vedanā*, *dukkha vedanā*, and *adukkhamasukha vedanā*, three corresponding types of *anusaya* result: *rāgānusaya*, *paṭighānusaya*, and *avijjānusaya*.

- Let us start with the verse that explains the origins of *rāgānusaya*: “*So sukhāya vedanāya phuṭṭho samāno abhinandati abhivadati ajjhosāya tiṭṭhati. Tassa rāgānusayo anuseti.*”
- **Translated:** “When one experiences a *sukha vedanā*, if one delights in it, welcomes it, and thinks and speaks highly of it, gets absorbed in it, then the underlying tendency for *rāga* (*rāgānusaya*) gets stronger (i.e., *rāgānusaya* will grow).”
- Here, *rāgānusaya* comes from “*rāga*” + “*anusaya*.” Now we need to get an idea about the meaning of *anusaya* first.

What is *Anusaya*?

12. *Anusaya* is usually translated as “**latent tendencies**.” That does give the basic idea. Such “latent tendencies are in our *gati*. *Anusaya* and “*gati*” are closely related. See, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)](#)” and “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- Everyone has a set of *gati* (habits/character qualities). Each person has his/her own set of things/activities that one likes and dislikes. Some of these are not moral or immoral.

- But we also have moral (ethical) *gati* and corrupt (bad) *gati*. Here moral/immoral have a wide range, and we will discuss that later. But those deeds have *kammic* consequences. Those are the *gati* that are relevant.

13. **By the way, notice that now we are talking about a “person” or a “self” who has *sakkāya diṭṭhi* (and *gati* and *anusaya*)!** That is why it is not correct to say that there is “no-self” either.

- When we keep doing what we are used to doing, that habit will only GROW. That also means *anusaya* will grow and that growth due to the activity is “*anuseti*.”
- *Arahants* do not have moral/immoral *gati*, but they do have *kammically* neutral *gati* (habits). Such practices include doing things in specific ways.

Rāga Anusaya* Grows by Getting Attached to Mind-Made *Sukha Vedanā* or *Somanassa Vedanā

14. What the *sutta* states in the verse of #10 are the following. When a “pleasing *ārammaṇa*” comes to the mind, it may delight in that *ārammaṇa*. If so, it will welcome that *ārammaṇa* and will “get absorbed in it.” That means the person would think highly about it, speak highly about it, and act on it to sustain that *ārammaṇa*.

- For example, if X sees an object that X likes, X will keep looking at it and start thinking about how good it is. X may tell another how good it is. Even later on, X may plan to experience that sight again. Those activities involve *vacī* and *kāya saṅkhāra*.
- That is how the *Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- Here, *avijjā* is the ignorance of believing that there is a “self” experiencing that sensory input.

Those *Viññāṇa* Are *Kamma Viññāṇa*

15. We remember that there could be six types of *viññāṇa* in the INITIAL sensory event that takes place due to *kamma vipāka*. Those are *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, or *mano viññāṇa*. They are ALL *vipāka viññāṇa*, which makes one aware of the sensory input.

- **However, *viññāṇa* in “*saṅkhāra paccayā viññāṇa*” generates *kamma viññāṇa*.** Such *kamma viññāṇa* can ONLY be *mano viññāṇa*. They have embedded energy because that person has decided to take further steps to enjoy that sensory experience again and again.
- In the *Abhidhamma* language, those *saṅkhāra* have *javana* power. They create *kammic* energy for that *kamma viññāṇa*.
- In other words, that “person” has to spend time and effort to enjoy that sensory experience again. He has now created a “*kamma bija*” or expects a specific outcome.

16. For example, if a person X saw and “attached” to an expensive item in a store, X would talk about it with the spouse and make plans to come up with the money to pay for it. Until X buys that item, that “*viññāṇa*” will be there. The critical point here is that X already HAD a *rāga anusaya* for it, and by engaging in those follow-up activities, X “added” more energy to that. That addition is “*anuseti*.”

- Different people have different types of *anusaya*. That is why not everyone attaches to a given *ārammaṇa*. Furthermore, each person’s levels of *anusaya* CAN change with time. That *anusaya* can be REMOVED too, and that is the way to *Nibbāna*.
- As you can imagine, the other two types of *anusaya* will “build up” the same way. With a “bad” *ārammaṇa*, *dosa* or anger arises and, *paṭighānusaya* (*paṭigha anusaya*) strengthens.
- Finally, it is the *avijjānusaya* (*avijjā anusaya*) that builds up when acting with *avijjā*. We will discuss more on that in the next post.

Difference Between *Diṭṭhi Vipallāsa* and *Saññā Vipallāsa*

I do not want to leave this post without clarifying the following point.

17. In the discussion forum at puredhamma.net, a legitimate question was asked: “Since a *Sotāpanna* has removed *sakkāya diṭṭhi*, why is that a *Sotāpanna* would still value sensory pleasures, and may even commit some immoral deeds?”

- As we know, a *Sotāpanna* is not incapable of doing ONLY “*apāyagāmi*” deeds that could lead to rebirths in the *apāyā* (plural of *apāya*.)
- There is a difference between “SEEING” (*diṭṭhi*) the real nature of this world and having corresponding PERCEPTIONS (*saññā*) about that real nature. It is important to understand what is meant by *saññā*; see, “[Saññā – What It Really Means.](#)”
- The Pāli word “*vipallāsa*” means “confusions” or “distortions.” Wrong views lead to *diṭṭhi vipallāsa* and wrong perceptions lead to *saññā vipallāsa*. More details at “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”
- With that terminology, a *Sotāpanna* has removed *diṭṭhi vipallāsa* but still has *saññā vipallāsa*.

18. In other words, the wrong views about a “self” (*sakkāya diṭṭhi*) go away at the *Sotāpanna* stage. But the perception of a “self” (*asmi māna*) goes away in stages and disappear only at the *Arahant* stage.

- Only an *Arahant* has no *saññā vipallāsa* and *asmi māna*.
- **That is also why we CANNOT say that “there is no-self.”** Until the attainment of *Arahanthood*, there is a perception of a “self.”
- **The critical point is that It is wrong to approach the analysis of sensory experiences based on a “self” or “no-self.” Instead, we can explain everything in terms of causes and effects or *Paṭicca Samuppāda*.**
- Then it will also become clear that the Pāli word “*attā*” does not really mean a “self” or a “soul” or a “*ātma*.”

Gati (Habits/Character) Determine Births – Samsappanīya Sutta5.2.8.4 **Tañhā – The Origin of Suffering**
.6.1

November 9, 2019

Tañhā Is Attachment, Not Craving

1. *Tañhā* is a badly misunderstood Pāli word. The common translation is “craving,” and that is wrong. The craving usually is associated with a pleasurable *ārammaṇa*.

- *Tañhā* means attachment to ANY *ārammaṇa*. It could be something that one likes OR dislikes OR even neutral (it may be just curiosity.)
- We may attach to a beautiful object or a person to varying degrees. It could just mean pausing to take a “second look” at something. It could be a much stronger attachment like “falling in love at first sight” with a person.
- But we also stop and take a second look at a person who just got run over by a car and died. That is not a pleasant sight, but we still got “attached” to that sight. We may think about it for a little while and then forget about it. But seeing one’s worse enemy on the street will lead to a stronger “attachment.” One may generate repulsive thoughts and may even say something harsh to that person.
- The point is that *tañhā* leads to further “mind action” or “conscious thoughts” about a *ārammaṇa*. We discussed that in, “[Kāma Guna – Origin of Attachment \(Tañhā\)](#).”

Tañhā – The Origin of Suffering

2. *Tañhā* is also the origin of future suffering. The Buddha defined the “origin of suffering” or “*dukkha samudaya*” as follows in his first discourse, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)”: “*Idaṃ kho pana, bhikkhave, dukkhasamudayaṃ ariyasaccaṃ—yāyaṃ tañhā ponobbhavikā nandirāgasahagatā tatrataṭṭhānandīnī, seyyathidaṃ—kāma tañhā, bhava tañhā, vibhava tañhā.*”

- **Translated:** “*Bhikkhus*, what is the **Noble Truth of the origin of suffering**—It is attachments (*tañhā*) based on seeking delight (*nandirāga*) in various things here and there, which leads to rebirth—that is, attachments to sensual pleasures (*kāma tañhā*), to the existence (*bhava tañhā*), and the view of a single life (*vibhava tañhā*.)
- The three types of *tañhā* discussed at “[Kāma Tañhā, Bhava Tañhā, Vibhava Tañhā](#).”

3. Interestingly, in the “Cūḷavedalla Sutta (MN 44), the same verse describes the origin of *sakkāya diṭṭhi*: “*sakkāyasamudayo sakkāyasamudayo’ti, ayye, vuccati. Katamo nu kho, ayye, sakkāyasamudayo vutto bhagavatā*” *ti?* “*Yāyaṃ, āvuso visākha, tañhā ponobbhavikā nandirāgasahagatā tatrataṭṭhānandīnī, seyyathidaṃ—kāma tañhā bhava tañhā vibhava tañhā; ayaṃ kho, āvuso visākha, sakkāyasamudayo vutto bhagavatā*” *ti.*

- That is not surprising since all immoral actions originate with the wrong view that worldly pleasures need to be pursued at any cost.
- If one does strong immoral deeds (*pāpa kamma*), one will be eligible for suffering in the *apāyā*. Even the desire to enjoy sensory pleasures will bind one to the *kāma loka*. The desire for *jhānic* pleasures leads to getting trapped in *rūpa* and *arūpa loka*. But there is no long-term happiness anywhere in any realm.
- That is because regardless of where the next birth is, one is not free from the *apāyā* in the long run. The possibility of rebirth in the *apāyā* will be there until one attains the *Sotāpanna* stage by removing *sakkāya diṭṭhi*. All possible suffering ends when one fully comprehends *dukkha samudaya* at the *Arahant* stage. We will discuss that in detail in the future.

The Meaning of *Tañhā* (*Pada Nirutti*)

4. Many Pāli words have their meanings in the word itself. Uncovering the meaning of a word that way is “*pada nirutti*.” For example, “*sakkāya*” comes from “*sath*” + “*kāya*” or taking an aggregate of things or a collection (*kāya*) to be beneficial (*sath*.) That is why *sakkāya diṭṭhi* originates when one considers that the five aggregates to be one’s own and thus beneficial. [*nirutti* : (f.) [Sk. nirukti, nis+vac] one of the Vedāṅgas (see *chaḷaṅga*), explanation of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]

- *Tañhā* means getting “fused” or firmly attached. The word *tañhā* comes from two words. “*Thāna*” (pronounced like “thatch”) means “place” (නොන in Sinhala) and “*hā*” meaning getting fused/welded or attached (නොන in Sinhala). Note that “*tan*” in *tañhā* pronounced like in “thunder” and “*hā*” is pronounced like in “harm.”
- That is consistent with the meaning derived from the *Chachakka Sutta*. See “[Kāma Guna – Origin of Attachment \(Tanhā\)](#).”

Three Types of *Tañhā*

5. The verses in #2 and #3 refer to three types of *tañhā*. They are *kāma tañhā*, *bhava tañhā*, *vibhava tañhā*.

- Each category represents the origin of a particular way attachment can happen. As we can imagine, *kāma tañhā* originates due to our inherent *kāma guṇa*. There are sights, sounds, smells, tastes, touches, and *dhammā* that we like to experience. If access to such things is blocked, we again get attached, but this time with anger.
- *Bhava tañhā* arises in those who believe in rebirth. They would like to be born as a human, *deva*, or a *Brahma* based on their *gati*.
- Those who do not believe in rebirth have *vibhava tañhā*.
- Let us discuss them briefly.

Kāma Tañhā

6. In *kāma loka*, all five physical sense faculties are present. Getting attached to anything via the five sense faculties is *kāma tañhā*.

- Furthermore, attachment arising from the desire to enjoy taste, smell, and body touch can happen only in *kāma loka*. Those three require a “solid body” as we can imagine.
- In the *rūpa lokas*, living beings do not have “solid bodies.” Yet, they can see and hear without having physical eyes or ears.
- Therefore, in *rūpa lokas*, *tañhā* arise only due to sights and sounds. Thus an *Anāgāmi*, who will be born in a *rūpa loka* has some *rūpa tañhā* and *sadda tañhā* because he/she may like to see a Buddha statue or listen to a discourse.
- In *arūpa lokas*, there is only the mind. Therefore, an attachment can be only to *dhammā*.

Bhava Tañhā

7. *Bhava tañhā* arises from attachment to “any existence.” Thus *bhava tañhā* is present in *kāma loka*, *rūpa loka*, and *arūpa loka*, i.e., all 31 realms.

- Even in the *kāma loka*, there may be people who do not enjoy the “*kāma*” or sense pleasures; but they still want to live a quiet, peaceful life. They mostly have *bhava tañhā*. They may like to be in a secluded

place, cultivating *jhāna*; that is their desired “*bhava*.” If they develop *jhānā*, they will be born in *rūpa loka* or *arūpa loka* due to their new “*gati*.”

- There are other subtle forms of “*bhava*” too. Some like to become famous, earn a title, to get a high-profile job or a responsibility, etc. These attachments are not associated with sensual pleasures. They are also due to *bhava taṇhā*.

Vibhava Taṇhā

8. *Vibhava taṇhā* arises from the wrong view of materialism (*uccheda diṭṭhi* in the time of the Buddha; *uccheda* pronounced “*uchcheda*”). One believes that life ends at death. Here the mind is assumed to a byproduct of the body (brain). And thus, when the body dies, that is the end of the story.

- Therefore one believes that one needs to enjoy all possible pleasures of this life before dying. Such a person would typically have *kāma taṇhā* as well as *vibhava taṇhā*.
- It is easy to have *vibhava taṇhā* in modern society. That is especially true if one has not heard about the Buddha's message about a more complex world with 31 realms and a rebirth process. Our human sensory faculties cannot access such “hidden” aspects of this world. One believes only what one can see.

Taṇhā Does Not Directly Lead to Rebirth

As we have seen in previous posts, for an average human, SOME *ārammaṇa* WILL automatically generate *taṇhā* within a split second. Only in an *Arahant*, *taṇhā* would NOT arise for ANY *ārammaṇa*. That is a crucial message of the *Chachakka Sutta* (MN 148.)

9. However, *Taṇhā* does not directly lead to rebirth (new existence). *Paṭicca Samuppāda* does not say, “*Taṇhā paccayā bhavo*.” Instead, it is, “*Taṇhā paccayā upādāna*,” followed by “*upādāna paccayā bhavo*.”

- To make a new existence (*bhava*), the mind needs to “pull that *ārammaṇa* close” and start generating conscious thoughts about it. That happens because one either likes it or dislikes it. That is the “*Taṇhā paccayā upādāna*” step.
- That “*Taṇhā paccayā upādāna*” step is a bit involved. When the mind attaches to a *ārammaṇa*, it starts “examining” that *ārammaṇa*. That “examination” involves *vitakka/vicāra* or *vacī saṅkhāra*.
- **That is when one STARTS acting with *avijjā* and generate *saṅkhāra* (and thereby *kamma viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”)** That is the start of a new *Paṭicca Samuppāda* cycle.
- More details in follow-up posts at, “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’](#).” A simpler explanation of *Paṭicca Samuppāda* in the section, “[Paṭicca Samuppāda](#).”

All relevant posts are at, “[Origin of Life](#).”

5.2.8.4 **Paṭicca Samuppāda – A ‘Self’ Exists Due to Avijjā** .6.2

November 16, 2019; November 17, 2019

Introduction

1. The “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” discusses six parameters associated with each of six entities. The six parameters are internal *āyatana*, external *āyatana*, *viññāṇa*, *phassa*, *vedanā*, *taṇhā*. They are associated with each of the six types of internal *āyatana* we have: *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano*. Thus, there are thirty-six entities discussed.

- The focus of attention is *ārammaṇa*. For example, a woman walking in a shopping mall stops and looks at a dress in a shop window. A dress in the window has caught her attention. That dress is *ārammaṇa*.

- We MAY get attached (*taṇhā*) to a *ārammaṇa* coming through any of the six senses. That “**getting attached or getting stuck**” (*taṇhā*) to that *ārammaṇa* happens, **for example with *cakkhu***, via the following process. “***Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.***”
- We discussed that process in detail in the earlier posts of the sub-section “[Worldview of the Buddha](#).”

***Taṇhā* (Getting Stuck to a *Ārammaṇa*) Happens Instantaneously**

2. An “eye-catching object” is a *rūpa ārammaṇa* or *rūpārammaṇa* (a new word). With a *rūpārammaṇa*, a *cakkhu viññāṇa* (sensation of seeing) arises via “***cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.***” (In the same way, *saddārammaṇa*, *ghānārammaṇa*, *jivhārammaṇa*, *kāyārammaṇa*, *dhammārammaṇa* give rise to *sotaviññāṇa*, *ghanaviññāṇa*, *jivhāviññāṇa*, *kāyaviññāṇa*, and *manoviññāṇa*.)

- **Within a split-second of that, the mind COULD be stuck (*taṇhā*)** in that *ārammaṇa*.
- If that *ārammaṇa* is mind-pleasing, the mind MAY attach (“getting stuck” could be a better way to say it) via greed. If it is repulsive, “getting stuck” MAY occur via anger. Even if it is a neutral *ārammaṇa*, “getting stuck” can happen with ignorance.
- I know I keep repeating same things. But repetition is KEY to retention.
- Even though we focused on the *Chachakka Sutta*, the above sequence of events is in many *suttā*. Some of the prominent *suttā* are MN 18, SN 12.43 through SN 12.45, and several *suttā* in SN 35. **It is critical to understand that this process happens automatically within a split-second.**

***Taṇhā* Arises Due to *Sakkāya Diṭṭhi* (*Diṭṭhi Vipallāsa*) AND *Asmi Māna* (*Saññā Vipallāsa*)**

3. The sequence of events in #1, #2 does not require a “self.” That sequence happens in an instant without any CONSCIOUS thinking.

- IF an attachment or “getting stuck” (*taṇhā*) results, that is because one has “*gati*” to attach to such a *ārammaṇa*. That is there because one has wrong views of a “self” (*sakkāya diṭṭhi* or *diṭṭhi vipallāsa*) AND also the wrong perception (*saññā vipallāsa*) of a “self.”
- The wrong view of a “self” goes away at the *Sotāpanna* stage, and the incorrect perception of a “self” (*saññā vipallāsa*) goes away entirely only at the *Arahant* stage.
- With the removal of *sakkāya diṭṭhi*, the tendency to do “*apāyagāmi* deeds” will stop. However, until the *Arahant* stage, one will still have *saññā vipallāsa*, and thus *asmi māna*, and will be capable of doing less severe immoral deeds (*akusala kamma*).
- That was discussed together with the terms *diṭṭhi vipallāsa* and *saññā vipallāsa* in the post, “[An Apparent “Self” Is Involved in Kamma Generation](#).” It may be a good idea to re-read that post and also the post, “[Vision Is a Series of “Snapshots” – Movie Analogy](#).” There is no self” in ultimate reality, but one will have a sense or perception of a “self” until attaining the *Arahant* stage.

***Taṇhā* – The Origin of Suffering**

4. The previous post (“[Tanhā – The Origin of Suffering](#),”) I pointed out **TWO** critical facts:

- **FIRST**, *taṇhā* (attachment or “getting stuck” to various *ārammaṇa*) is the ORIGIN of suffering. That is the First Noble Truth on suffering. That *taṇhā* could be due to a pleasing OR unpleasant *ārammaṇa*.
- However, *taṇhā* by itself, CANNOT AUTOMATICALLY lead to suffering. If that were the case, no one would be able to attain *Nibbāna*. That is because, as we have discussed, *taṇhā* happens within a fraction of a second of capturing the *ārammaṇa*.

- Therefore, the **SECOND** critical fact is the following. **Unless one pulls that ārammaṇa in and starts thinking about it (vitakka/vicāra)**, one WILL NOT accumulate *abhisankhāra* (and thus *kamma viññāṇa*.) That would be done with *avijjā* (with the wrong perception of a “self.”) [*vitakka/vicāra* is of *akusala* type while *savitakka/savicāra* is of *kusala* type]
- That second process takes place starting with the “*taṇhā paccayā upādāna*” step in *Paṭicca Samuppāda*. We will discuss this below.

There is a “Self” Doing *Kamma* With Wrong Views and Wrong Perceptions

5. That is why it is not correct to say that there is “no-self.” For anyone who has not yet attained the *Arahant* stage, the perception of a “self” is there. See, “[An Apparent “Self” Is Involved in Kamma Generation.](#)”

- As we discussed, *taṇhā* (getting attached to or “getting stuck” with a *ārammaṇa*) NEVER arises in an *Arahant* based on ANY *ārammaṇa*. That is automatic. It is not that he/she consciously avoids *taṇhā* at that moment. The key is that an *Arahant* has removed ALL “*gati*” leading to any attachment (*taṇhā*.)
- **The key to understanding *Paṭicca Samuppāda* is to comprehend how *gati* can be removed (and thereby *taṇhā* stopped).** We will be discussing this in the next few posts.

Dukkha Nirodha (Stopping of Future Suffering) is Cessation of *Taṇhā*

6. The Buddha defined the “stopping or the cessation of suffering” or “*dukkha nirodhaya*” (Third Noble Truth) as follows in his first discourse, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)”:

“*Idaṃ kho pana, bhikkhave, dukkhanirodham ariyasaccaṃ—yo tassāyeva taṇhāya asesavirāganirodho cāgo paṭinissaggo mutti anālayo.*” [*asesa* :[adj.] entire; all. *cāgo* : abandoning, forsaking; resigning, sacrificing, giving away; self-sacrifice, liberality. *paṭinissaggo* : forsaking, getting rid of. *mutti* :[f.] release; freedom.]

Translated: “*Bhikkhus*, what is the Noble Truth of the cessation of suffering—it is the complete cessation of *taṇhā*, the giving up and relinquishing of it, freedom from it by losing all desires (also called “*āsava*”) for things in this world (*anālayo*).

- The word *anālaya* comes from *na* + *ālaya* or “not desiring.” As we have discussed, one attaches (*taṇhā*) to a *ārammaṇa* via greed only because one craves for and desires things with *kāma guṇa*. If one is blocked from getting that then one may “attach” with anger. Therefore, craving or desire is at the root of *taṇhā*. *Dosa* (or *patigha*) is the “second manifestation of *lobha* or greed. See, “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).” [*ālaya* :[m.] 1. abode; roosting place; 2. desire; attachment; 3. pretence.]
- That is why *Nibbāna* is also “*āsavakkhaya*” or “*āsava*” + “*khaya*” or “removal of “*āsava*.”
- I try to introduce these key Pāli words gradually and as needed.

Paṭicca Samuppāda – Both “Self” and “No-Self” Are Incorrect Approaches

7. It is not beneficial to start with the concept of either a “self” or “no-self.” But we HAVE TO use terms like “our thoughts,” “he spoke,” and “she did that,” etc. That is because those things ARE DONE by an average human with the perception of a “self.” **Besides, we CANNOT communicate with each other without using such terminology.** Even the Buddha said things like, “I will go there” or “I was born in such an existence in the past.”

- But we need to “see” and understand the following. **Causes (old kamma) and conditions (paccayā) lead to results (kamma vipāka).** Then, based on such *vipāka*, **we take actions** that create new *kamma*, which, in turn, will bring more *vipāka*. That is how the rebirth process continues!
- **The wrong view (sakkāya diṭṭhi) and wrong perception (asmi māna) of a “self” leads to such activities.** *Paṭicca Samuppāda* explains that process.
- As long as one has those wrong views and perceptions of a “self,” one will have certain *gati* (character.) Based on those *gati*, causes (*kamma*) for future results (*vipāka*) accumulated. When those *vipāka* bring results, more *kamma* generated. So, there is no end to this cyclic process. That is why there is no end to that cycle of *kamma* and *vipāka*!
- Those *gati* will diminish as one starts comprehending the true nature of this world. With that comprehension, wrong views and perceptions will lessen and eventually go away. That is the way to *Nibbāna*. It starts with *Sammā Diṭṭhi* (removal of *sakkāya diṭṭhi*), seeing the true nature of this world. Of course, one must first get rid of the ten types of *micchā diṭṭhi* to get to mundane *Sammā Diṭṭhi*. See, [“Buddha Dhamma – In a Chart.”](#)

The sequence of Events In #1 Above Are in *Paṭicca Samuppāda*

8. The Pāli verse in #1 above from the *Chachakka Sutta* is “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.*” The steps stated in that verse are the same as “*salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā*” in *Paṭicca Samuppāda*.

- The steps “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso*” in the *Chachakka Sutta* merely describe in more detail what happens with the “*salāyatana paccayā phasso*” step in *Paṭicca Samuppāda*. Of course, “*salāyatana*” refers to all six sensory inputs, and *cakkhu* in “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso*” refers to one of those six.
- ***Paṭicca Samuppāda* cycle usually does not start with “*avijjā paccayā saṅkhārā.*”** There must be a REASON to begin acting with *avijjā*. The reason is “getting attached to sensory input,” i.e., *taṇhā*. And that happens because we have certain “*gati*” that have been built-up over past lives due to the ignorance of the Four Noble Truths, i.e., due to *avijjā*!
- Initial “attachment” (*taṇhā*) ALWAYS happens with the steps discussed in the *Chachakka Sutta* and embedded in the above verse. Any of the six sensory inputs can trigger it, and the sixth one is *mano*: “*mānañca paṭicca dhamme ca uppajjati manovīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.*”
- **Therefore, it is essential to realize that in real life, *Paṭicca Samuppāda* does NOT start with “*avijjā paccayā saṅkhārā.*” It begins with “*salāyatana paccayā phasso*” and proceeds to “*phassa paccayā vedanā, vedanā paccayā taṇhā.*”**
- It is only at that stage that a given “person” may start acting with *avijjā* and thus start the complicated step, “*taṇhā paccayā upādāna.*”

Based on Attachment (*Taṇhā*), One Starts Acting With *Avijjā*

9. Let us discuss that critical step, “*taṇhā paccayā upādāna.*”

- *Taṇhā* means attaching or “getting stuck” with a particular *ārammaṇa*. It is not correct to say that *taṇhā* is “craving.” When one sees an enemy, one does not generate *taṇhā* via craving. Instead, the mind gets “stuck” in that *ārammaṇa* of an enemy with anger or dislike.
- If it is a “good *ārammaṇa*,” the mind will try to enjoy it more. If it is distasteful, then it will try to stop that. Either way, mind MAY generate (*abhi*) *saṅkhārā* with *kammic* consequences.

- For example, a person with a tendency (*gati*) to engage in stealing may try to steal an “eye-catching item” from a store. Stealing is a bad *kamma*, and thus he/she will accumulate “bad *kamma*” that could bring “bad *vipāka*” in the future.

What Does *Upādāna* Mean?

10. *Upādāna* means “pulling the *ārammaṇa* closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”).

- Once getting attached (*taṇhā*) to a *ārammaṇa*, we do not let it go. The mind “pulls that *ārammaṇa* in.” First, we start consciously thinking about it and may talk about it. Both those involve *vacī saṅkhāra* (*vitakka/vicāra*).
- If we get “worked up,” we may take bodily actions. We may hug a person we like or hit a person we don’t like. *Kāya saṅkhāra* in mind LEAD TO such physical actions. The brain helps carry out actions according to those intentions that arise in mind. See, “[Brain – Interface between Mind and Body.](#)”
- By the way, *mano* (or *citta*) *saṅkhāra* automatically comes to our minds. They involve *vedanā/saññā*. They do not involve conscious thinking (*vitakka/vicāra*.)
- It is with the “*taṇhā paccayā upādāna*” step that we start doing “*avijjā paccayā saṅkhāra*” and start a new ***Paṭicca Samuppāda* cycle.**
- We will discuss *saṅkhāra* in detail in the next post.

5.2.8.4 .6.3 Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?

November 23, 2019

Saṅkhāra Create Causes for Future Suffering

1. *Paṭicca Samuppāda* (PS) describes how future suffering arises due to *saṅkhāra* done with *avijjā*. Intention plays a big role and it depends on one level of *avijjā*.

- The PS cycle starts with “*avijjā paccayā saṅkhārā*” and ends with “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’ti.*” And then it says, “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti.*” or “that is how this whole mass of suffering arises.”
- Therefore, the PS cycle, in general, addresses ALL TYPES of future suffering. That includes bad *kamma vipāka* DURING a given life and also stronger *kamma vipāka* that lead to future REBIRTHS. In particular, rebirths in the four lowest realms (*apāyā*) lead to the worst kinds of suffering.
- All these FACTS appear in a long list of short *suttā* (plural of *sutta*) in the *Āṅguttara Nikāya* (10), starting with the “[WebLink: suttacentral: Sādhū Sutta \(AN 10.134\)](#)” and ending at AN 236 (over one hundred *suttā*!)
- English translations for those *suttā* are available at the Sutta Central site: “[WebLink: suttacentral: Dasakanipāta.](#)” Thanks to reader “y not” for providing the reference.
- I have translated several of them to English at, “[Āṅguttara Nikāya – Suttā on Key Concepts.](#)”

Suffering (and Pleasures) Arise Due to *Kamma Vipāka*

2. According to those *suttā*, suffering (*dukkha*) arises due to the *vipāka* (results) of *akusala kamma* or *apuñña kamma* (simply translated as immoral deeds.)

- In the same way, pleasures (*sukha*) result from *kusala kamma/puñña kamma* (simply translated as moral deeds.)

- **There is a big difference between *kusala kamma* and *puñña kamma*.** We will discuss that difference in the future after we discuss *anicca* and *anatta*.
- **Until then, we may use *kusala/puñña* and also *akusala/apuñña* without much distinction.** So, at this point, we are just assuming that *kusala/puñña kamma* are “good” and *akusala/apuñña kamma* are “bad.”
- Even though we loosely translate *kusala/akusala kamma* as *moral/immoral deeds*, *kammā* are done via **bodily actions, speech, or thoughts.**

***Dasa Akusala* – Seeds for Future Suffering**

3. At a fundamental level, the Buddha identified three categories of *akusala kamma*. Those done with **bodily actions** (*kāya kamma*) are killing, stealing, sexual misconduct. There are four types of *kamma* done with **speech** (*vacī kamma*.) They are lying, slandering, harsh speech, and gossiping. Finally, three types done with **thoughts** (*mano* or *citta kamma*) are excess greed, excess anger, and wrong views.

- Those ten types of *akusala kamma* (***dasa akusala***) in Pāli are: *Pāṇātipāto*, *adinnādānaṃ*, *kāmesumicchācāro*, *musāvādo*, *pisuṇā vācā*, *pharusā vācā*, *samphappalāpo*, *abhijjhā*, *byāpādo*, *micchā diṭṭhi*.
- Those are the ten types of *akusala kamma* separated into three categories.

All Types of *Kamma* Originate In the Mind

4. When we look at the ten types *akusala kamma*, we can clearly see why *kamma* DOES NOT mean JUST bodily actions. The way of THINKING, as well as SPEAKING, contribute to the accumulation of *kamma* which can bring *vipāka* in the future.

- It is critically important to understand this point. Some people speak very nice words and even appear to be engaged in “good deeds” but have very bad intentions/mindsets. For example, someone may pretend to speak nicely but could be thinking bad thoughts to him/herself about the person they are talking to.
- Going through the motions of good actions/speech DOES NOT count for GENERATING good *kammic* energy.

The Buddha clarified this point very clearly. In the [WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#): “***Cetanāhaṃ (cetanā aham)***, *bhikkhave*, *kammaṃ vadāmi*. ***Cetayitvā kammaṃ karoti—kāyena vācāya manasā.***”

That means: “**Intention, I tell you**, is *kamma*. One does *kamma* **having intention (in mind)**—via **body, speech, and thoughts.**

- Therefore, *kammic* ENERGY for ALL ten types of *kamma* are GENERATED in the mind. **Stated another way: MIND creates *kammic* energy associated with all ten types of *kamma*.**
- I cannot emphasize enough the importance of understanding this CRITICAL point.

Intentions are in *Saṅkhāra*

5. It is *cetanā* in *javana citta* that PREPARES *kamma viññāṇa* or *kamma bija* using various types of *cetasika*. Such *kamma viññāṇa* or *kamma bīja* are PART OF *dhammā*.

- Some *dhammā* are just memories. This will be discussed in the next post. “Mind, Saṅkhāra, Dhammā, Kamma – Critical Connections.”

6. What we discussed in #4 above can be stated in Buddha’s terminology as follows. **The mind generates three types of *saṅkhāra*: *mano*, *vacī*, and *kāya saṅkhāra*. All three types of *saṅkhāra* arise in the mind.**

- How do those intentions end up as speech and bodily actions?
- It is the brain that “carries out” bodily movements and speech INTENDED in *kāya saṅkhāra* and *vacī saṅkhāra*. The brain gets the body parts to move, with the help of the muscles and the nervous system. Speech, similarly, generated via the movement of the tongue and the muscles in the mouth area.
- Therefore, *kāya saṅkhāra* LEAD to *kāya kamma* (killing, stealing, sexual misconduct.) *Vacī saṅkhāra* LEAD to *vacī kamma* (lying, slandering, harsh speech, and gossiping.) *Mano* (or *citta*) *saṅkhāra* LEAD to *mano* (or *citta*) *kamma* (excess greed, excess anger, and wrong views.)

Mind/Physical Body to Pilot/Airplane Analogy

7. The seat of the mind (*hadaya vatthu*) is where thoughts arise. The *hadaya vatthu* is part of the *manomaya kāya* or mental body or the *gandhabba*. The *hadaya vatthu* is constant contact with the brain.

- In other words, the MIND decides what to do, and the brain carries out those commands. An analogy is how an airplane flies. The pilot makes decisions on where to go and the on-board computer carries out those commands.
- More details on that at, [“Brain – Interface between Mind and Body.”](#)
- Modern scientific evidence on the importance of the *hadaya vatthu* is only at an early stage. The following quote is from [“WebLink: heartmath.org: Exploring the Role of the Heart in Human Performance.”](#) “The heart is the most powerful source of electromagnetic energy in the human body, producing the largest rhythmic electromagnetic field of any of the body’s organs. The heart’s electrical field is about 60 times greater in amplitude than the electrical activity generated by the brain.”
- However, *hadaya vatthu* is NOT the heart. It is in the mental body (*gandhabba*) but close to the physical heart

Not All Saṅkhāra Will Have Kammic Consequences

8. Even though *Paṭicca Samuppāda* just states, “*avijjā paccayā saṅkhārā*,” not all *saṅkhāra* will have *kammic* consequences. Stated in a different way: We do not act with *avijjā* all the time.

- For example, ANY bodily movement involves *kāya saṅkhāra*. If one’s mind decides to stand up, the brain gets that done by moving leg muscles. That does not have any *kammic* energy to bring future *vipāka*. Therefore, not all bodily actions have *kammic* consequences.
- **Saṅkhāra with kammic consequences are “strong saṅkhāra” or “abhisāṅkhāra.”** Let us discuss that in detail first.

9. If you swing your arm, that is a *kāya kammā*, because that action involved moving a body part. That action was initiated by *kāya saṅkhāra* generated in the mind. But that does not have *kammic* consequences (except for the movement of the arm.)

- Now, if you swung your arm to get hold of a cup, that is also a *kammically* neutral action (*kammā*) or a just a *saṅkhāra*. You did not do either a moral or immoral act. The intention was to grab a cup, and that did not involve any *sobhana* or *asobhana cetasika*. **That action is a *kiriya*** (*kriyā* in Sanskrit or කිරියා in Sinhala).
- On the other hand, if you swung your arm to hit someone, then it was done with anger. So, the *dosa cetasika* (an *asobhana cetasika*) was in your thoughts. Thus, it was an *apuññābhisāṅkhāra* (*apuñña abhisāṅkhāra*). That *apuññābhisāṅkhāra* in the mind led to an *akusala/apuñña kammā* or an immoral deed.
- If you put your arms together to pay respects to the Buddha, it is a *puññābhisāṅkhāra* (*puñña abhisāṅkhāra*.) The *saddhā cetasika* (a *sobhana cetasika*) is in the mind. We can also call it a *kusala/puñña kammā* or a moral deed.

- Therefore, “good or bad” *cetasika* (mental factors) are the ones that bring **intention** to thoughts. The *cetanā cetasika* is in ALL thoughts. The *cetanā cetasika* just incorporates the other relevant “good or bad” *cetasika* to a given thought to convey the “intention.”

Assāsa Passāsa (Breathing) Is Kāya Saṅkhāra

10. The very basic *kāya saṅkhāra* are involved in breathing. It is also the most IMPORTANT *kāya saṅkhāra* since we cannot live without breathing.

- Any type of *saṅkhāra* involves *cetanā* and thus *saṅkhāra* involves *citta vīthi*. It does not seem like we breathe intentionally. That is because no *javana citta* are present in those *citta vīthi* that are associated with breathing. They are *parittārammana citta vīthi*. That means they are “weak.”
- Of course, breathing has no *kammic* consequences. It is just a “bodily action,” but a critically important one.

Apuññābhi saṅkhāra, Puññābhi saṅkhāra, and Āneñjābhisāṅkhāra

11. We introduced two new words above that are relevant in generating *kammic* energy: *apuçñābhisāṅkhāra* and *puññābhisāṅkhāra*. Here, *apuçñābhi saṅkhāra* lead to *akusala* (or *apuçñā* or immoral) *kamma*. Good, moral deeds, speech, or thoughts with *kammic* energy involve *puññābhisāṅkhāra*.

- There is a third type of *abhisāṅkhāra*: *āneñjābhisāṅkhāra* (*āneñja abhisāṅkhāra*). These types of *saṅkhāra* are in the minds of those who cultivate *arūpāvacara jhāna*, the highest four *jhāna*.
- *Apuññābhisāṅkhāra* lead to rebirth in the *apāyā*. These, of course, lead to *akusala kamma*.
- *Puññābhisāṅkhāra* leads to rebirth in the human, *deva*, and *rūpāvacara Brahma* realms. *Puñña kamma* is done with such *puññābhisāṅkhāra*. Note that cultivating *rūpāvacara jhāna* is a *puñña kamma*.
- *Āneñjābhisāṅkhāra* leads to rebirths in the *arūpāvacara Brahma* realms.

Saṅkhāra in Paṭicca Samuppāda Are Abhisāṅkhāra

12. Even though the first step in *Paṭicca Samuppāda* is simply, “*avijjā paccayā saṅkhārā*,” it really refers to *abhisāṅkhārā*.

WebLink: [suttacentral: Pattecasamuppāda Vibhaṅga](#), explains the term “*avijjā paccayā saṅkhārā*” in *akusala-mūla Paṭicca Samuppāda* (that leads to suffering) as follows: “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuçñābhisāṅkhāro, āneñjābhisāṅkhāro, kāyasāṅkhāro, vacīsāṅkhāro, cittasāṅkhāro.*”

Translated: “What is *avijjā paccayā saṅkhārā? Puññābhisāṅkhāra, apuçñābhisāṅkhāra, āneñjābhisāṅkhāra, kāyasāṅkhāra, vacīsāṅkhāra, cittasāṅkhāra.*” (here, *citta saṅkhāra* is the same as *mano saṅkhāra*).

- Those are all *abhisāṅkhāra*, even though the verse is simplified as “*avijjā paccayā saṅkhārā*.”
- Two categories of *saṅkhāra* are mentioned there. One category refers to types of *kamma* accrued (*Puññābhisāṅkhāra, apuçñābhisāṅkhāra, āneñjābhisāṅkhāra*.)
- The other category points out the three modes: body, speech, or mind (*kāya saṅkhāra, vacī saṅkhāra, citta saṅkhāra* or *mano saṅkhāra*).
- This is clarified in several *suttā* as well. for example, [WebLink: suttacentral: Saṅgīti Sutta \(DN 33\)](#): “*Tayo saṅkhārā—puññābhisāṅkhāro, apuçñābhisāṅkhāro, āneñjābhisāṅkhāro.*”

13. Therefore, the word *saṅkhāra* can have different meanings in different contexts. That is why *saṅkhāra* SHOULD NOT be translated as just “mental formations.”

- I hope you can see that translating *saṅkhāra* as just “mental formations” does not provide much insight. Once one understands the basic concepts discussed above, it will be easier to see the real meaning of different types of *saṅkhāra*.
- We will discuss *kāya*, *vacī*, and *mano saṅkhāra* in detail in the next post. Then the critical connection of *vitakka/vicāra* with *vacī saṅkhāra* will become clear.
- Also, see “[Complexity of the Mind – Viññāna and Saṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

All posts at “[Origin of Life](#).”

5.2.8.4 .6.4 Vacī Saṅkhāra – Saṅkappa (Conscious Thoughts) and Vācā (Speech)

November 30, 2019; December 1, 2019 (new #14 also added)

Introduction

1. *Vacī Saṅkhāra* is looking into a *ārammaṇa* deeper (*vitakka*), and, in detail (*vicāra*). We introduced that in a previous post but will discuss it in a bit more detail here.

- *Vācā* is, of course, speech. *Saṅkappa* has been translated as “thoughts or intention.” Here, we will see that *saṅkappa* means “thoughts with intention.” We will also discuss how *vacī saṅkhāra* relates to both *vācā* and *saṅkappa*.
- The first four steps in the Noble Eightfold Path are *Sammā Diṭṭhi*, *Sammā Saṅkappa*, *Sammā Vācā*, and *Sammā Kammanta*. One’s thoughts depend on one’s views, and one’s speech and actions depend on how one thinks. This is why *Sammā Diṭṭhi* comes first, and also why “having correct views” about the nature of this world is at the forefront.

2. There are various types of *saṅkhāra*. In the previous post, we discussed categorizing *saṅkhāra* in two different ways.

- Three types depending on whether they lead to bodily actions, speech, or thoughts: *kāyasaṅkhāra*, *vacīsaṅkhāra*, *cittasaṅkhāra*.
- There are three more types according to future *vipāka*: *Puññābhisāṅkhāra*, *apuññābhisāṅkhāra*, *āneñjābhisāṅkhāra*. These are discussed at #14 below.
- Let us first review the first category briefly and then focus on *vacī saṅkhāra*. I explained *kāya* and *citta* (or *mano*) *saṅkhāra* in recent posts.

Three Types of *Saṅkhāra* Responsible for Actions, Speech, and Thoughts

3. There are succinct statements in the [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#) on the types of *saṅkhāra* generated in mind:

“*Tayome, āvuso visākha, saṅkhārā—kāyasaṅkhāro, vacīsaṅkhāro, cittasaṅkhāro*”*ti*.

– There are three types of *saṅkhāra* – *kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*.

“*Katamo paṇāyye, kāyasaṅkhāro, katamo vacīsaṅkhāro, katamo cittasaṅkhāro*”*ti*?

– What are *kāya saṅkhāra*, What are *vacī saṅkhāra*, What are *citta saṅkhāra* (or *mano saṅkhāra*)?

“*Assāsapassāsā kho, āvuso visākha, kāyasaṅkhāro, vitakkavicārā vacīsaṅkhāro, saññā ca vedanā ca cittasaṅkhāro*”*ti*.

– *Assāsa passāsā* are *kāya saṅkhāra*, ***vitakka vicāra* are *vacī saṅkhāra***, *saññā* and *vedanā* constitute *citta saṅkhāra*.

“*Kasmā panāyye, assāsapassāsā kāyasaṅkhāro, kasmā vitakkavicārā vacīsaṅkhāro, kasmā saññā ca vedanā ca cittasaṅkhāro*”*ti*?

– Why are the three types of *saṅkhāra* categorized in that way?

“*Assāsapassāsā kho, āvuso visākha, kāyikā ete dhammā kāyappaṭibaddhā, tasmā assāsapassāsā kāyasaṅkhāro. Pubbe kho, āvuso visākha, vitakketvā vicāretvā pacchā vācaṃ bhīdati, tasmā vitakkavicārā vacīsaṅkhāro. Saññā ca vedanā ca cetasikā ete dhammā cittappaṭibaddhā, tasmā saññā ca vedanā ca cittasaṅkhāro*”*ti*.

– *Assāsa passāsā* (breathing in and out) is associated with the body (movements). Thus, *assāsa passāsā* is *kāya saṅkhāra*.

– ***Vitakka/vicāra* arise before speech “breaks out.”** Therefore, *vitakka/vicāra* are *vacī saṅkhāra*.

– *Saññā* and *vedanā* are associated with any *citta*. Thus, *saññā/vedanā* are *citta saṅkhāra*.

No Kammic Consequences for *Citta (Mano) Saṅkhāra*

4. *Citta (mano) saṅkhāra* does not have strong *kammic* consequences that can result in rebirth. As mentioned above in #3, they encompass *vedanā* and *saññā*, which are in ALL *citta*. Therefore, even *vipāka citta* have *citta (mano) saṅkhāra*.

- As we discussed in the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#),” any thought goes through nine stages within a billionth of a second. The early stages are *citta* and *mano*. Those two stages already have *vedanā* and *saññā*.
- Bad (*asobhana*) or good (*sobhana*) mental factors (*cetasika*) are incorporated to thought **only in the latter stages of that nine-step process. Furthermore, such *cetasika* involve in those latter stages ONLY IF there is an attachment (*taṇhā*) and one is consciously thinking about a *ārammaṇa*.**
- **The six steps described in the *Chachakka Sutta* happen within a split second.** There is no time to “think” and thus there cannot be any *vacī* or *kāya saṅkhāra*. See #6 below.

Vacī or *kāya saṅkhāra* Can Lead to *Abhisāṅkhāra*

5. *Vacī* or *kāya saṅkhāra* MAY ALSO lead to actions that do not have *kammic* consequences. Such “harmless” *vacī* or *kāya saṅkhāra* cannot become *abhisāṅkhāra* that can bring future *vipāka* including rebirths.

- Breathing or walking to the kitchen to get a glass of water involves such “harmless” *kāya saṅkhāra*. Thinking about what needs to be done at work tomorrow or talking to the spouse about dinner plans involve such *vacī saṅkhāra*.
- Other *kāya* and *vacī saṅkhāra* lead to actions and speech that have *kammic* consequences. Those lead to *abhisāṅkhāra*. Such *abhisāṅkhāra* “prepare or give rise to” ***saṅkhata***. Thus, *saṅkhata* are entities that are “prepared” via *saṅkhāra* or “arise” due to *saṅkhāra*. *Paṭicca Samuppāda* describes that process and we will get to it.

No *Vacī* or *Kāya Saṅkhāra* Involved in Initial Sensory Experience

6. Some thoughts that have gone through the nine stages do not involve conscious thinking. Thus, no *vacī* or *kāya saṅkhāra* are possible in such thoughts. Those are the *vipāka citta* described in the *Chachakka Sutta* (MN 148.)

- As we discussed in the recent posts, the six steps in the *Chachakka Sutta* take place due to *kamma vipāka*. During that *vipāka* stage, first, one of the six types of *viññāṇa* experienced. They all are *vipāka viññāṇa*. They are *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano viññāṇa*. The last step is “*vedanā paccayā taṇhā*.”
- **In all those six steps, one does not get to think.** They happen automatically. It is important to realize that one consciously generates *vacī* or *kāya saṅkhāra* with *sobhana* or *asobhana cetasika*. Only *mano saṅkhāra* (without *kammic* consequences) generated in those six steps.

Paṭicca Samuppāda Starts With “Saḷāyatana Paccayā Phassa”

7. As we discussed in previous posts, the *Paṭicca Samuppāda* cycle starts not with “*avijjā paccayā saṅkhāra*,” but with “*saḷāyatana paccayā phassa*.” This is why we spent a lot of time discussing the *Chachakka Sutta* (MN 148.) It may be a good idea to review those posts.

- There has to be a *ārammaṇa* strong enough to generate interest. For example, seeing an attractive/repulsive figure, tasting something tasty/bitter, hearing a soothing/loud noise, etc.

8. Such *vipāka viññāṇa* come about via, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” through “*mānañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*” per *Chachakka Sutta*. We discussed in a previous post that those steps are equivalent to “*saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā*” steps in *Paṭicca Samuppāda*. See, “[Paṭicca Samuppāda – A “Self” Exists Due to Avijjā.](#)”

- In other words, during the *vipāka* stage, “*avijjā paccayā saṅkhāra*” followed by “*saṅkhāra paccayā viññāṇa*” DOES NOT take place, as we can clearly see.
- After getting to “*vedanā paccayā taṇhā*” with the initial sensory event on a new *ārammaṇa*, the next step in the *Paṭicca Samuppāda* cycle starts. The next step is “*taṇhā paccayā upādāna*.” **That is when *kamma viññāṇa* arises because we start acting with *avijjā*.**
- Let us see how *vacī* and *kāya saṅkhāra* arise once one gets attached and gets “stuck” in a *ārammaṇa* (*taṇhā*.) That is the beginning of a complex process involved in the “*taṇhā paccayā upādāna*” step.

Vitakka/Vicāra Initiate Abhisāṅkhāra

9. When one is “stuck” with a particular *ārammaṇa*, one starts CONSCIOUSLY thinking about it. That involves *vitakka* and *vicāra* mental factors (*cetasika*.) **That means one starts “looking into that *ārammaṇa* deeper (*vitakka*), and, in detail (*vicāra*).**

- We can get an idea with the following example. Suppose we go to a showroom to buy a car. If we get interested in a certain car, we examine it carefully. We ask questions from the salesman and get more information about that car. In the same way, when we get interested in any *ārammaṇa*, we start thinking about different aspects of it.
- In particular, when we like a given *ārammaṇa* (that car could be one), we start imagining how nice it would be to have it parked on the driveway. How the neighbors may be impressed by it. In many cases, we start “daydreaming” about how we will enjoy it. Those are all *vacī saṅkhāra* with *vitakka* and *vicāra*.
- Of course, we may also start talking about how good it is. Speaking out also involves *vitakka/vicāra*.
- If any of those thoughts involve “bad” (*asobhana*) *cetasika* (like greed), then such conscious thoughts become *vacī abhisāṅkhāra*.

10. If we really get interested in a *ārammaṇa*, we may take action too. We may go to other showrooms to look at similar models and compare prices. We may search the internet for other car dealers in the area, etc.

- Such actions involve moving body parts. As we will see below, *kāya saṅkhāra* lead to those actions.

- If those thoughts involve “bad” (*asobhana*) *cetasika*, then such *kāya saṅkhāra* becomes *kāya abhisāṅkhāra*.
- More information at, “[Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra.](#)” I recommend reading that post to get further details and *Tipiṭaka* references.

Saṅkappa Means Thinking and Thus Vacī Saṅkhāra

11. *Mahācattārīsaka Sutta* (MN 117): “*Katamo ca, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo? Yo kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamaṅgino ariyamaggaṃ bhāvayato takko vitakko saṅkappo appanā (fixing of thought on an object) byappanā cetaso abhiniropanā (application) vacīsaṅkhāro—ayaṃ, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo.*”

Translated: “What, *bhikkhus*, is *sammā saṅkappa* that is noble, blameless, supramundane, a factor of the noble path? The thinking, re-thinking, thinking with “*san*” (*saṅkappa*), absorption, absorption with defilements, directing of mind, verbal formation (*vacī saṅkhāra*) — in one whose mind is noble, whose mind is devoid of *āsava* (*anāsavo*), who is on the noble path. That is *sammā saṅkappa* that is noble and a factor of the path.

- Thus, it is very clear that *Sammā Saṅkappa* means generating thoughts focused on making progress on the Path.
- They are “Noble *vacī saṅkhāra*” with the comprehension of *anicca, dukkha, anatta* and thus focused on *Nibbāna*.
- **By the way, such *saṅkhāra* arise in the *Kusala-Mūla Paṭicca Samuppāda*” starting with “*kusala-mūla paccayā saṅkhāra.*” Note the difference from the *Akusala-Mūla Paṭicca Samuppāda* that starts with “*avijjā paccayā saṅkhāra.*” We will discuss the *Kusala-Mūla Paṭicca Samuppāda* in the future in this series. It is discussed in the *Paṭicca Samuppāda* section, “[Kusala-Mūla Paṭicca Samuppāda.](#)”**

Not All Saṅkhārā Are Due to Avijjā (and Taṇhā)

12. Now we can see how one starts doing *saṅkhāra due to avijjā* only IF one is attached via *taṇhā*. That is the beginning of a *Paṭicca Samuppāda* cycle: “*avijjā paccayā saṅkhārā.*”

- However, not all *saṅkhāra* create *kamma viññāṇa* that can bring good or bad *kamma vipāka*. For example, one may get thirsty (that is due to a *ārammaṇa* too) and may decide to go to the kitchen to get a glass of water. Walking to the kitchen involves *kāya saṅkhāra* (to get the body to move.) But that intention is neither good nor bad. It is *kammically* neutral. It was not due to *avijjā*.
- All bodily activities, including breathing, are done with *kāya saṅkhāra*. But “*avijjā paccayā saṅkhārā*” comes into play ONLY IF bad or defiled intentions are in the mind. There is no *avijjā* or *taṇhā* involved in breathing or the activities mentioned above (thus they DO NOT lead to *abhisāṅkhāra*).

Apuñña Abhisāṅkhārā Done with Avijjā (and Taṇhā)

13. Now let us consider the actions of a thief. A person is in the waiting room to see a doctor and sees that someone has dropped a wallet. The moment he sees the wallet, his mind attaches to it (*taṇhā*). Then he thinks that there could be some money in the wallet and that it is an easy way to get some “free money.” Those conscious thoughts are *vacī saṅkhāra*. Then he picks it up and puts it in his pocket. That last step involves *kāya saṅkhāra*.

- Here he did bodily actions with *kāya saṅkhāra*. He did that because he did not realize the future bad consequences of stealing. Thus “*avijjā paccayā saṅkhārā*” generated bad thoughts of picking the wallet AND putting it in his pocket.

- While he was doing that he had “bad *saṅkhāra*” (with bad *cetanā*) in his mind. The *cetanā* (intention) was to steal. Such bad *saṅkhāra* are *apuñña abhisāṅkhāra*. Both *vacī* and *kāya saṅkhāra*, in this example, were *apuñña abhisāṅkhāra*.

***Puñña Abhisāṅkhārā* Also Done with *Avijjā* (and *Taṇhā*)**

14. In the previous post, “[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)” (under #12) I pointed out briefly that ***puññābhisāṅkhāra* and *āneñjābhisāṅkhāra*** are also done with *avijjā*.

[WebLink: suttacentral: Patīccasamuppāda Vibhaṅga](#), explains the term “***avijjā paccayā saṅkhārā***” in ***akusala-mula Patīcca Samuppāda*** (that leads to suffering) as follows: “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro, kāyasāṅkhāro, vacīsāṅkhāro, cittasāṅkhāro.*”

Translated: “What is ***avijjā paccayā saṅkhārā***? ***Puññābhisāṅkhāra, apuññābhisāṅkhāra, āneñjābhisāṅkhāra, kāyasāṅkhāra, vacīsāṅkhāra, cittasāṅkhāra.***” (here, *citta saṅkhāra* is the same as *manō saṅkhāra*).

- ***Puññābhisāṅkhāra*** are, of course, Moral and good deeds.
- ***Āneñjābhisāṅkhāra*** involve cultivating *arūpāvacara jhāna*.
- When a person who has not comprehended *anicca, dukkha, anatta* engage in those two types of “good *saṅkhāra*,” they are still done with *avijjā*! **That is because one has not yet grasped the dangers in remaining in the rebirth process.**
- To get the basic idea, let us briefly consider the following example.

15. Now let us consider the same scenario with another average human. But this person has good, moral *gati*. He is always trying to do moral things and tries to abstain from doing immoral things.

- This person will pick up the wallet and take it to the receptionist. The person who dropped the wallet may come back looking for it. It is possible that the wallet had not only his driver’s license but possibly credit cards and money. So, our good samaritan saved a lot of stress and work for the wallet owner.
- That is an example of a *puñña abhisāṅkhāra*. But if it is an *abhisāṅkhāra*, that MUST have been done via “*avijjā paccayā saṅkhārā*.” Is that not a contradiction since he did a “good deed”?
- To get the answer to that question we need to understand the difference between the mundane eightfold path and the Noble Eightfold Path.

Two Eightfold Paths – Mundane Eightfold Path and the Noble Eightfold Path

16. **The Buddha said that there are two eightfold paths (*Mahācattārīsaka Sutta*, MN 117).** One is the mundane path, where one does good deeds without the comprehension of the “real nature of this world (*yathābhūta ñāṇa*).” **One gets to the mundane path by first getting rid of the ten types of *micchā ditṭhi*.** I have discussed the two paths in the post, “[What is Unique in Buddha Dhamma?](#)”

- **Once one gets rid of the ten types of *micchā ditṭhi*, there is another critical step involved before one can get to the Noble Eightfold Path.** One must learn the “real nature of this world” or the *anicca, dukkha, anatta* nature from a Noble person who learned that from a Noble person too. That lineage goes back all the way to the Buddha. See, “[Four Conditions for Attaining Sotāpanna Magga/Phala.](#)”
- Only a Buddha can discover the *anicca, dukkha, anatta* nature by himself. All others need to learn that from a Noble person (*Ariyā*.) That is why most people are only exposed to the mundane eightfold path.

- We will get to discuss the *anicca, dukkha, anatta* nature in upcoming posts, once we finish going through the steps in *Paṭicca Samuppāda*. Of course, it has been discussed in the sub-section, “[Anicca, Dukkha, Anatta](#).” The current series on “[Origin of Life](#)” is an attempt to get there in a systematic way.

5.2.8.4 .6.5 **Taṇhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda**

December 7, 2019; December 10, 2019

We Do Have Control Over Our Destiny

“*Taṇhā Paccayā Upādāna*” is a critical step in *Paṭicca Samuppāda* (PS). That is where we can take CONTROL of the PS process. Before addressing that it is a good idea to review the actual progression of events leading to the PS process.

1. We started this series by discussing the *Chachakka Sutta*. That *sutta* describes the initial events that trigger the PS process. As we saw, “*saḷāyatana paccayā phassa*” step is where a new PS cycle gets started. See, “[Buddhist Worldview – Introduction](#).”

- A mind does not arbitrarily start generating *saṅkhāra* (corrupt or immoral thoughts) due to *avijjā*. That is why I say that a PS cycle does not begin with “*avijjā paccayā saṅkhāra*.” See the previous post, “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#).”
- Our focus is on the types of *abhisāṅkhāra* that can bring “bad *kamma vipāka*” in the future. Therefore, we are discussing the “*akusala-mūla PS*.”

***Paṭicca Samuppāda* Initiated by “*Saḷāyatana Paccayā Phassa*”**

2. First, there must be a reason for a mind to generate *abhisāṅkhāra* (evil or immoral thoughts.) The Buddha pointed out that there are three primary reasons: *lobha* (greed), *dosa* (hate or anger), and *moha* (not knowing about *kamma/vipāka* and rebirth at the base level and not realizing the *anicca, dukkha, anatta* nature at a deeper level.)

- One MUST be tempted by greed or anger to do such bad *kamma*. That happens ONLY IF there is a STRONG sensory input coming through the six senses. For example, one generates angry thoughts if one sees an enemy. One may think about stealing only if one sees a valuable item and generates greed.
- That is why “*saḷāyatana paccayā phassa*” is the step that INITIATES *kamma* generation via the PS cycle. *Saḷāyatana* means the six internal *āyatana* or the six sense faculties (eyes, ears, nose, tongue, body, and mind.)
- The “*saḷāyatana paccayā phassa*” is the step is the combination of two steps. For seeing, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññānaṃ, tiñṇaṃ saṅgati phasso*.” Then the mind quickly goes through the “(sam)*phassa paccayā vedanā*” and “*vedanā paccayā taṇhā*” steps to end up with “*taṇhā*” or “attachment to that *ārammaṇa*” in a split-second! We CANNOT stop those steps. They are automatic. They can take place as long as we have *taṇhā*.
- We discussed that at length in several posts in discussing the *Chachakka Sutta*. See, “[Is There a “Self”?](#)”
- **Removing *taṇhā* involves controlling the next step in PS: “*taṇhā paccayā upādāna*.”** That is what we will focus on now.

Difference Between *Moha* and *Avijjā*

3. Once one gets “attached” to a *ārammaṇa*, one is CAPABLE of doing *akusala kamma* (immoral deeds.) Some people are not even aware that immoral acts (bad *kamma*) can lead to unpleasant *vipāka* in the future. Some of those bad *kamma* can lead to suffering-filled rebirths in *apāyā*. **That is the base level of**

moha, where one is morally blind. Someone with *moha* could do such immoral deeds without any remorse. See, "[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā.](#)"

- *Moha* is reduced to the *avijjā* level when one gets rid of the ten types of *micchā diṭṭhi*. Even at the lower level of *avijjā*, one is still CAPABLE of doing such "*apāyagāmi* actions" if the sensory input is strong enough. One could live a "moral life" most of the time but could end up taking a large bribe or engage in sexual misconduct if the *ārammaṇa* is strong enough. For example, one may not have taken a bribe for most of the life, but be tempted "if the price is high enough."
- Even after one attains the *Sotāpanna* stage, one may still do some *akusala kamma*, but one's mind WILL NOT allow doing any "*apāyagāmi* deeds." We will discuss that in the future.
- Right now, we are focusing on understanding how an average human accumulates bad *kamma* starting at the "*saḷāyatana paccayā phassa*" step in *Akusala-Mūla* PS. By an average human, I mean a "moral person" who has removed the ten types of *micchā diṭṭhi* but has not yet comprehended *Tilakkhaṇa* (*anicca, dukkha, anatta*.)

A "Moral Person" May Be Tempted to Do *Apāyagāmi* Deeds

4. Such a "moral person" has reduced *moha* to the *avijjā* level, but still is capable of doing "*apāyagāmi*" deeds. Even though he/she may act morally most of the time, he/she has "hidden defilements" (*āsava*) that can come to the surface (as *anusaya*), if triggered by a tempting sensory input. That is what we discussed in #3.

- I hope you can get an idea of what is meant by *āsava* and *anusaya* by re-reading #3 and #4. *Āsava* means "sleeping defilements." They can be "awakened" by a robust sensory input (*ārammaṇa*) and brought up to the mind as "*anusaya*." See, "[Āsava, Anusaya, and Gati \(Gathi\).](#)"
- *Āsava* is like the gun powder in a matchstick. Striking that match on a rough surface will produce light. In the same way, when a defiled mind (with *avijjā*) comes into contact (*phassa*, or more accurately *samphassa*) with a strong *ārammaṇa* (say an attractive person), that could make greed or desire (*anusaya*) come to the mind.
- Having such *āsava* is the same as having "bad *gati*." As one reduces *āsava* (by following the Eightfold Path), one's undesirable *gati* will also decrease.

Taṇhā Is There As Long as One Has Bad *Gati* and *Āsava*

5. The critical point in the *Chachakka Sutta* is the following. One MAY get attached (*taṇhā*) to a given *ārammaṇa* as long as one has "defiled *gati*" or the four types of *āsava*: *diṭṭhāsava*, *kamāsava*, *bhavāsava*, *avijjāsava*. All of them have greed, anger, and ignorance (of the Four Noble Truths) as their origins. See, "[Conditions for the Four Stages of Nibbāna.](#)"

- Within a split-second of that *ārammaṇa* coming to the mind, the mind gets attached (*taṇhā*.) Then, if one acts unwisely (*ayoniso manasikāra*), one will go through the "*taṇhā paccayā upādāna*" step in PS and will accumulate NEW *kamma*.
- However, an *Arahant* will not get attached to ANY *ārammaṇa*, and that is why the *Akusala-Mūla* PS process does not take place for an *Arahant*.
- Therefore, the key to *Nibbāna* is to see how one can get rid of *taṇhā*. I hope you can see that this is equivalent to removing *gati*, *āsava* (and thereby *anusaya* or cravings.)

Connection to the Eightfold Path

6. The key to getting to *Nibbāna* is to understand what happens in the "*taṇhā paccayā upādāna*" step. That is the first step after the last step, "*vedanā paccayā taṇhā*" discussed in the *Chachakka Sutta*.

- **Any bad *kamma* that one had done in the past is embedded in one's *taṇhā*. As we saw above, as long as one has “defiled *gati*” or *āsava*, one WILL have *taṇhā*. The way to reduce and eventually remove *taṇhā* is to reduce and eliminate one's bad *gati*.**
- Please go through the above material and previous posts to make sure the above conclusions are understood. We cannot remove *taṇhā* by sheer will power. We need to follow the Eightfold Path to reduce and eliminate WRONG views, thoughts, speech, actions, way of living, efforts, and wrong mindfulness that will direct one towards wrong *samādhi* (mindset.) In Pāli, those who are on the “wrong or immoral path” have *micchā diṭṭhi*, *micchā saṅkappa*, *micchā vācā*, *micchā kammanta*, *micchā ājīva*, *micchā vāyāma*, *micchā sati*, and *micchā samādhi*.
- When one understands the PS process (including the critical “*taṇhā paccayā upādāna*” step), one will be able to see the need to get rid of those wrong eight factors. Then one will cultivate “*Sammā*” versions of them: *sammā diṭṭhi*, *sammā saṅkappa*, *sammā vācā*, *sammā kammanta*, *sammā ājīva*, *sammā vāyāma*, *sammā sati*, and *sammā samādhi*.

Vacī Saṅkhāra* Responsible for *Upādāna

7. When one gets “attached” or “get stuck” in a *ārammaṇa* due to *taṇhā*, the FIRST THING that happens is that DEFILED thoughts arise in one's mind AUTOMATICALLY. Those are *mano* (or *citta*) *saṅkhāra*.

- For example, if one sees a beautiful person, one may generate lustful thoughts automatically. If one sees one's arch-enemy, one may create angry thoughts, etc. Such defiled thought arise due to “hidden defilements” (*āsava*) or “bad *gati*.”
- However, within moments, we become aware of such thoughts. At that stage, many of us continue to generate similar defiled thoughts CONSCIOUSLY. As soon as we become aware of them, they are now *vacī saṅkhāra*. At this stage, we are analyzing that *ārammaṇa* in various ways (*vitakka/vicāra*.) We may also start speaking about it. Both types are *vacī saṅkhāra*. We have discussed that in detail in several posts. See, “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#),” “[Difference Between Tanhā and Upādāna](#)” and “[Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra](#).”
- **With *vitakka/vicāra* (*vacī saṅkhāra*), our interest in that *ārammaṇa* will get stronger.** Then we may take physical actions involving *kāya saṅkhāra*.
- By the way, ***vacī saṅkhāra* (talking to oneself without speaking) is the same as *saṅkappa*. *Vacī saṅkhāra* also leads to speech (*vācā*)** as we discussed before.
- Of course, *kāya saṅkhāra* leads to bodily actions.

8. We start accumulating new *kamma* when we start generating *vacī* and *kāya saṅkhāra*.

Per #7, *vacī saṅkhāra* lead to *micchā saṅkappa* and *micchā vācā*. *Kāya saṅkhāra* leads to *micchā kammanta*. Now we can tie those up with the following that I have discussed in previous posts.

- *Mano* (*citta*) *saṅkhāra* arise first (and automatically) and do not involve conscious thinking. They DO NOT have *kammic* consequences.
- However, both *vacī* and *kāya saṅkhāra* that may follow WILL HAVE *kammic* consequences. **In other words, *micchā saṅkappa*, *micchā vācā*, *micchā kammanta* are “bad *kamma*.”**

Avijjā* Is the Ignorance of Bad Consequences of *Taṇhā

9. What we discussed above in #6 through #8 are all associated with the “*taṇhā paccayā upādāna*” step in PS. When the mind automatically “attach to a *ārammaṇa*” (*taṇhā*), it starts generating *saṅkhāra* via “*avijjā paccayā saṅkhāra*.” That is how new PS processes get starts.

- If one does not realize the harmful consequences of getting attached via greed, anger, or ignorance, that means one is acting with *avijjā* AT THAT TIME.

- It is critical to note that a “given person” DOES NOT act with *avijjā* all the time. **Whether one will start thinking and acting with *avijjā* depends on the nature of the *ārammaṇa* (whether it matches his/her *gati*) and how strong the *ārammaṇa* is.**
- If one does get “attached” or “get stuck” with a *ārammaṇa*, then one will start “pulling it closer.” One wants to think about it, speak about it, and take action.
- ***Upādāna* means “pulling it closer (in one’s mind)”** (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”).

10. That is how the “*taṇhā paccayā upādāna*” step starts a **new PS cycle** with “*avijjā paccayā saṅkhāra*.”

- One will start generating *vacī saṅkhāra* without speaking first. **Those are *micchā saṅkappa*.** For example, upon seeing an enemy, a person X may generate evil thoughts about that person.
- If emotions become stronger, X may speak out. In the above example, X may say something harsh to that person. **Those are *micchā vācā*.**
- If that person also responds in kind and the situation escalates, X may hit that person. That is a ***micchā kammanta***. That action initiated by *kāya saṅkhāra*.
- All those *vacī* and *kāya saṅkhāra* arise via “*avijjā paccayā saṅkhāra*.”

***Paṭicca Samuppāda* May Not Proceed Linearly**

11. Now we can see how complicated the “*taṇhā paccayā upādāna*” step is. It went back to the “*avijjā paccayā saṅkhāra*” step to initiate a new PS cycle.

- Now, those *vacī saṅkhārā* and *kāya saṅkhārā* lead to *kamma viññāṇa*, via “*saṅkhāra paccayā viññāṇa*” (and the rest of the PS cycle ending in “the whole mass of suffering.”)
- Such *kamma viññāṇa* are focused on hurting that person in the example of #10. That *viññāṇa*, in turn, leads to more *vacī* and *kāya saṅkhāra* via “*viññāṇa paccayā saṅkhāra*.” Note that this is the reverse of “*saṅkhāra paccayā viññāṇa*.”
- Therefore, PS steps do not necessarily go just one way. They can go backward. They can jump to different places in the cycle. As we saw, it jumped from the “*taṇhā paccayā upādāna*” step to the “*avijjā paccayā saṅkhāra*” step.
- However, when one understands the basic concepts, one will be able to figure out or “make sense” of such complexities.

Connection to *Ānāpānasati* and *Satipaṭṭhāna*

12. That is also why it is CRITICAL to stop the *vacī saṅkhāra* that arise immediately following the *mano saṅkhāra*. In that initial stage, speech has not “broken out yet.” We just become aware that we are generating lustful/hateful thoughts.

- We MUST stop *vacī saṅkhāra* as they start arising. Then they will not lead to “bad speech” (via more *vacī saṅkhāra*) or “bad actions” (via *kāya saṅkhāra*.) This is discussed in the “[WebLink: suttacentral: Vitakkasanthāna Sutta \(MN 20\)](#).”
- That is the key to doing the correct *Ānāpānasati bhāvanā* and *Satipaṭṭhāna bhāvanā*! See, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#).”
- We will discuss that and more steps in PS in the upcoming posts.

5.2.8.4 Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa .6.6

December 14, 2019; revised December 15, 2019

Summary of Discussion Up To Now

1. In the subsection on “[Worldview of the Buddha](#),” we are discussing how the Buddha explained the sensory experience. More importantly, the Buddha taught how a “living being” generates *kammic* energies for future existences (*bhava*) based on “attachment” (*taṇhā*) to a given sensory experience. As we have discussed, “attachment” can happen due to greed, hate, or an unwise mindset.

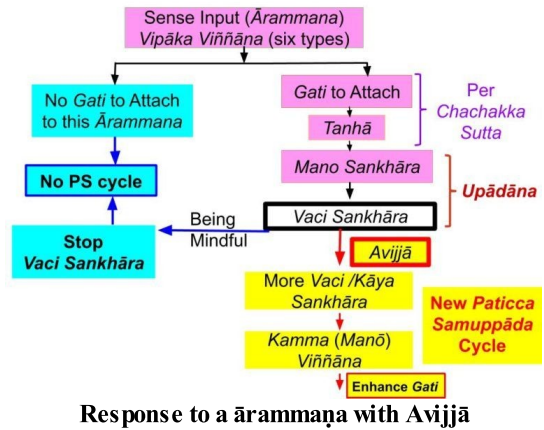

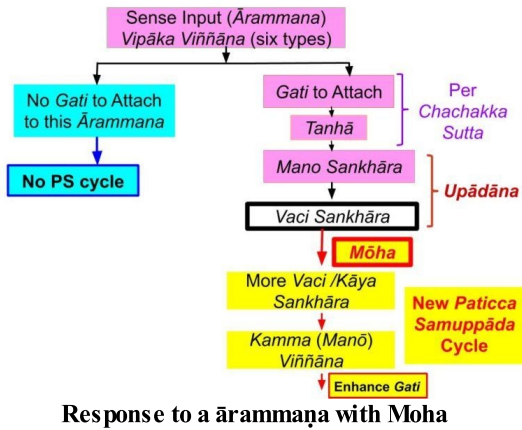

- First, we discussed how a sensory event starts when a *ārammaṇa* (sight, sound, smell, taste, touch, *dhammā*) comes to the mind when one of the six senses (internal *āyatana*) comes into contact with an external *āyatana*. Becoming aware of sensory input is one of the six types of *vipāka viññāṇa*: “*cakkhu viññāṇa, sota viññāṇa, ghāna viññāṇa, jivhā viññāṇa, kāya viññāṇa, mano viññāṇa.*” [*Indriya* (sense faculty) and *āyatana* (defiled sense faculty) have totally different meanings. For example, eyes are *indriya* when we just happen to see things, but they BECOME *āyatana* when they are used for pleasure, i.e., to deliberately look at sensual things to enjoy them.]
- **Those six types of *viññāṇa*, including *mano viññāṇa*, are *vipāka viññāṇa*.** They DO NOT generate *kammic* energy. They are “experiences.”

2. Then, one MAY “attach to” or “get stuck in” that sensory experience INSTANTLY. That means generating *taṇhā*. Then the “*taṇhā paccayā upādāna*” step automatically follows. That is a step in the middle of the *Paṭicca Samuppāda* (PS) cycle.

- One will attach (*taṇhā*) only if one has “defiled *gati*.” That means one likes or dislikes that sensory experience (could be connected with ignorance too.) If one attaches, then one will start thinking and speaking (with *vacī saṅkhāra*) and even may take actions (with *kāya saṅkhāra*) with a DEFILED MIND. That means those *saṅkhāra* arise via, “*avijjā paccayā saṅkhāra.*” That is part of “*upādāna*” or “pulling that *ārammaṇa* close.”
- Therefore, what we summarized here in #2 is how the “*taṇhā paccayā upādāna*” step in PS initiates a new PS process that starts at “*avijjā paccayā saṅkhāra.*” That is how the PS cycle begins in real life, beginning with a *ārammaṇa* (as detailed in the *Chachakka Sutta* (MN 148).

Summary in Charts

3. Since it is CRITICAL to understand what we discussed above, I have made the charts below to help us with the discussion.

Response to a ārammaṇa by an Arahant

One can download the charts for easy reading/printing: [“WebLink: PDF_file: Response to a ārammaṇa with Moha,”](#) [“WebLink: PDF_file: Response to a ārammaṇa with Avijjā,”](#) and [“WebLink: PDF_file: Response to a ārammaṇa by an Arahant.”](#)

- *Paṭicca Samuppāda* referred to in ALL the above charts is the “*Akusala-Mūla Paṭicca Samuppāda*.” That PS process leads to future suffering.
- **Therefore, saṅkhāra that do not arise in an Arahant are ONLY “bad or immoral saṅkhāra.”** An Arahant will still generate *mano*, *vacī*, and *kāya saṅkhāra* to think, speak, and take actions. He/she will be engaged in “*puñña kriyā*” or “moral deeds.” Such “moral deeds” are NOT “*puñña abhisāṅkhāra*” because one does them with full comprehension of the *anicca* nature. We will discuss this critical point later.

Difference Between *Moha* and *Avijjā*

4. Let us start with the chart on the left. That chart is for an extreme case of a “totally morally-blind” person. That mind is covered with defilements (*moha*.) Such a person would, just like an animal, go along with any temptation that comes to the mind. His/her “bad *gati*” will only get stronger.

- The chart in the middle applies to a wide range of humans with *avijjā*. *Avijjā* is a lower form of *moha*. When one removes the ten types of *micchā diṭṭhi*, *moha* reduces to the *avijjā* level. Any human who knows right from wrong is an average human. It also includes those who are *Ariyā* (*Sotāpanna Anugāmi* and above) but not yet attained *Arahanthood*.
- Of course, any *Ariya* (Noble Person) is INCAPABLE of doing *apāyagāmi* deeds. An *Anāgāmi* is INCAPABLE of craving for sensual pleasures, etc. Therefore, as one move to higher stages of *Nibbāna*, one will “attach to” less and less *ārammaṇa* (sensory inputs.)
- But any average human — no matter how “moral” by conventional standards — is CAPABLE of doing even an *apāyagāmi* deed. The *ārammaṇa* must be strong enough to be tempted.

- An *Arahant* has a totally-purified mind and has no “bad *gati*” left. Therefore, he/she WILL NOT initiate an “*Akusala-Mūla Paṭicca Samuppāda*” cycle under ANY circumstance. That is indicated in the third chart.

Difference Between *Vipāka Viññāṇa* and *Kamma Viññāṇa*

5. Above charts also help us clarify the difference between *vipāka viññāṇa* and *kamma viññāṇa*. Any sensory EXPERIENCE is a *vipāka viññāṇa*. *Vipāka viññāṇa* can come in through any of the six sense faculties, as shown at the top of the charts. Every living being, including an *Arahant*, experiences *vipāka viññāṇa*. In other words, ANY living-being can see, hear, etc.

- If one attaches (*taṇhā*) to a *ārammaṇa*, then that initiates the step “*taṇhā paccayā upādāna*” step in PS. That means one starts “pulling that *ārammaṇa* close (*upādāna*).” First, one starts thinking about it with *vacī saṅkhāra*. One does that with the sense of a “me” involved in the sensory experience. **As we have discussed, there is no need for a “me” or a “self” to experience a sensory input.** See, “[Chachakka Sutta – No “Self” in Initial Sensory Experience.](#)”
- Therefore, at the beginning of that “*taṇhā paccayā upādāna*” step, one starts generating *saṅkhāra* about that *ārammaṇa* with the “*avijjā paccayā saṅkhāra*” step in PS. That is when a PS cycle starts at the “beginning” and then runs through the end.
- The next step in PS after the “*avijjā paccayā saṅkhāra*” step is “*saṅkhāra paccayā viññāṇa*.” **That *viññāṇa* is a *kamma viññāṇa*.** Since it arises ONLY in mind, that is a *mano viññāṇa*. This *kamma viññāṇa* appears at the bottom of the FIRST TWO charts. **An *Arahant* does not generate *kamma viññāṇa*.** Therefore, *kamma viññāṇa* is absent in the third chart.

Kamma Viññāṇa Generated with the View (*diṭṭhi*) and Perception (*saññā*) of “Me” or a “Self”

6. From the last bullet of #5, it is clear that one’s mind will NOT go through the *Akusala-Mūla* PS at ANY TIME only if one is an *Arahant*.

- That is because it is ONLY an *Arahant* would have “seen” the futility of attaching to ANY sensory input (*ārammaṇa*.) **There is no sense of a “me” or a “self” in an *Arahant*.**
- That is a point that we will discuss in detail in upcoming posts. But it is good to know about that point ahead of the time. It is CRITICAL to understand the material presented so far to be able to “keep up” with the upcoming posts when we discuss *sakkāya diṭṭhi*.
- As we can see, ANYONE below the *Arahant* stage WILL attach to at least a few sensory inputs. That is because anyone below the *Arahant* will have at least a trace of *avijjā anusaya* left.
- It is impossible for an average human even to comprehend that. That is why the Buddha emphasized that it is not correct to say that a “self” does not exist. **The point is that for ANYONE below the *Arahant* stage of *Nibbāna*, a “self” with “*gati*” exists!**
- However, anyone above the *Sotāpanna Anugāmi* can “see” that it is unfruitful to take anything in this world to be “mine,” and also can lead to future suffering. That “seeing” is “with wisdom” and is *lokuttara* (or *lokottara*) *Sammā Diṭṭhi*. A fish biting the tasty bait on a hook does not “see” that it will be subjected to much suffering. Just like that, an average human cannot “see” the suffering hidden in sensual pleasures. We will discuss details in future posts.
- One becomes a *Sotāpanna Anugāmi* when one comprehends *Tilakkhaṇa* (*anicca, dukkha, anatta*) to some extent. Even after that, the *saññā* (perception) of a “me” will be there. That perception will reduce with higher stages of *magga phala* and will disappear at the *Arahant* stage.

Starting with a “Self” or “No-Self” is not the correct approach

7. As we summarized in #5 above (and discussed in the post mentioned there), attachment to a *ārammaṇa* happens instantly. That requires no conscious thinking and thus is NOT possible to stop. As long as one has “bad *gati*,” one MAY attach to some sensory inputs (*ārammaṇa*.)

- The way to eliminate *tanhā* is to reduce and finally remove one's “bad *gati*.” Luckily, humans have the ABILITY to do that by understanding the PS process.
- Indeed, there is a “self” in the PS process. However, that is not an unchanging “self” like a “soul” or a “*ātma*.” I call it a “dynamic self,” see “[What Reincarnates? – Concept of a Life-stream.](#)” That “self” disappears when one attains the *Arahant* stage!

8. **Therefore, until one becomes an *Arahant*, there is a “self” that CAN make decisions on how to respond to sensory input.** As shown in the middle chart above, anyone can stop any “bad *vacī saṅkhāra*” that arises when tempted by a given sensory input. If that fails, one can stop *kāya saṅkhāra* that lead to physical actions. **In simple words, that means one should stop any bad conscious thoughts, bad speech, or bad (immoral) deeds as soon as one becomes aware of them.**

- When one becomes a *Sotāpanna Anugāmi* by comprehending *Tilakkhaṇa* to some extent, one's “*apāyagāmi gati*” will disappear.
- Until then, one can practice *Ānāpānasati* or *Satipaṭṭhāna Bhāvanā* to stop some temptations. One does not need to have formal meditation sessions. It is utterly useless to have formal meditation sessions and not to act with mindfulness when one goes through daily activities. That is when one generates most of the defiled thoughts and actions.
- Formal meditations become more relevant after getting to the *Sotāpanna* stage. That is why “*bhāvanāya pahātābbā*” comes last in the *Sabbāsava Sutta* (MN 2). There, “*dassanena pahātābbā*” of “removal via correct vision” is first on that list. That is the “correct vision” required to be a *Sotāpanna*. One must first understand what to meditate on!

***Kamma Viññāṇa* Have Future Expectations**

9. What is the real difference between a *vipāka viññāṇa* and a *kamma viññāṇa*?

- ***Vipāka viññāṇa* provide the sensory experience.** One sees with *cakkhu viññāṇa*, hears with *sota viññāṇa*, tastes with *jivhā viññāṇa*, smell with *ghāna viññāṇa*, feel touch with *kāya viññāṇa*, and thoughts coming to the mind with *mano viññāṇa*.
- ***Kamma viññāṇa* arise via “*avijjā paccayā saṅkhāra*.”** When one gets attached to a *ārammaṇa* via greed or hate, for example, one has an EXPECTATION. If one likes the *ārammaṇa*, one wants more of it. If one dislikes it, one wants it to go away.
- Thus when one consciously thinks (*vacī saṅkhāra*) and takes actions (*kāya saṅkhāra*), there are “expectations” embedded in such *saṅkhāra*. Those *saṅkhāra* lead to *kamma viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”

10. **Those “expectations” in *kamma viññāṇa* are energies generated by the mind in *javana citta*. They stay “out there in the world” as *dhammā*.** Those are part of the *dhammā* in “*manaṅca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.”

- Therefore, just like the other five types of *rūpa* are “out there in the world,” *dhammā* are “out there,” too. They can be detected by the *mana indriya*, just like a sound detected by the *sota indriya*, for example. That is how our future expectations periodically come back to our minds, i.e., how we remember our plans for the future. **Sigmund Freud called that the “subconscious.”** Of course, he had no idea about the actual mechanism.
- ***Dhammā* are *rūpa* too.** But they are just energies that are below *suddhaṭṭhaka*. They are “*anidassanaṃ appaṭighaṃ dhammāyatanapariyāpannaṃ*.” They “cannot be seen or touched.” See, “[What are Rūpa? – Dhammā are Rūpa too!](#)”

- The other five types of *rūpa* sensed via the five physical sense faculties are above the *suddhaṭṭhaka* level. Modern science is only aware of those five types.
- We will discuss *dhammā* in detail in the next post.

All posts on the new series at, "[Origin of Life.](#)"

5.2.8.4 .6.7 **Icchā (Cravings) Lead to Upādāna and to Eventual Suffering**

December 21, 2019

***Upādāna* Is a Key Concept That Has Been Hidden**

1. The Buddha declared that his Dhamma or teachings on suffering “has not been known to the world” before him. In his first discourse, *Dhammacakkappavattana Sutta* (SN 56.11), he “defined” *dukkha* or suffering.

Idaṃ kho pana, bhikkhave, dukkhaṃ ariyasaccaṃ:

jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhāṃ, appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ (yam pi icchaṃ) na labhati tampi dukkhāṃ—saṅkhittena pañcupādānakkhandhā (pañca upādāna khandhā) dukkhā.

Translated: *Bhikkhus*, What is the Noble Truth of Suffering?

“Birth is suffering; getting old is suffering; getting sick is suffering; dying is suffering. Having to associate with things that one does not like is suffering and having to separate from those things one likes is suffering. **If one does not get what one wants/craves (*icchā*), that is suffering** – in brief, the origin of suffering is the “**pulling close**” (*upādāna*) of the five aggregates of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (*pañcupādānakkhandha*). [*iccha* :[adj.] (in cpds.), wishing; longing; desirous of.]

- Any person knows that “Birth is suffering, getting old is suffering, getting sick is suffering, dying is suffering. Having to associate with things that one does not like is suffering. Having to separate from those things one likes is suffering.” That part is known to the world.
- May be it is a bit harder to understand birth to be suffering, but ANY birth ends up with decay and death at the end, so it is not that difficult to “see.”

The “Hard-To See” Suffering That Is Hidden

2. What is “previously unheard” is that **craving (*icchā*) for sensory attractions leads to suffering eventually**. When one craves something, one would start thinking and speaking (*vacī saṅkhāra*), and doing things (with *kāya saṅkhāra*) to “get possession” of it. That “pulling close” of “mind-pleasing” things is “*upādāna*” (“*upa*” + “*ādāna*” as we discussed before.) [*Upādāna* means “pulling it closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”). [*ādāna* : (nt.), taking up; grasping.]]

- Since we do not “see” that hidden suffering, we tend to do immoral deeds to get possession of such “mind-pleasing” things. That means generating *saṅkhāra* due to our *avijjā* (ignorance of the core teachings of the Buddha, including the *Paṭicca Samuppāda* process.)
- The harsh consequences of such immoral deeds (*kamma vipāka*) may not be seen immediately, or even in this life. That is why it is hard to “see” this hidden suffering.
- That is contrary to our daily experiences. We do everything to get to live a luxurious life with a beautiful house, an attractive spouse, a nice car, etc. We do not see “any bad consequences” of the efforts that we put in the pursuit of those “mind-pleasing things.”

A Fish Does Not “See” the Hidden Suffering in a Delicious Bait

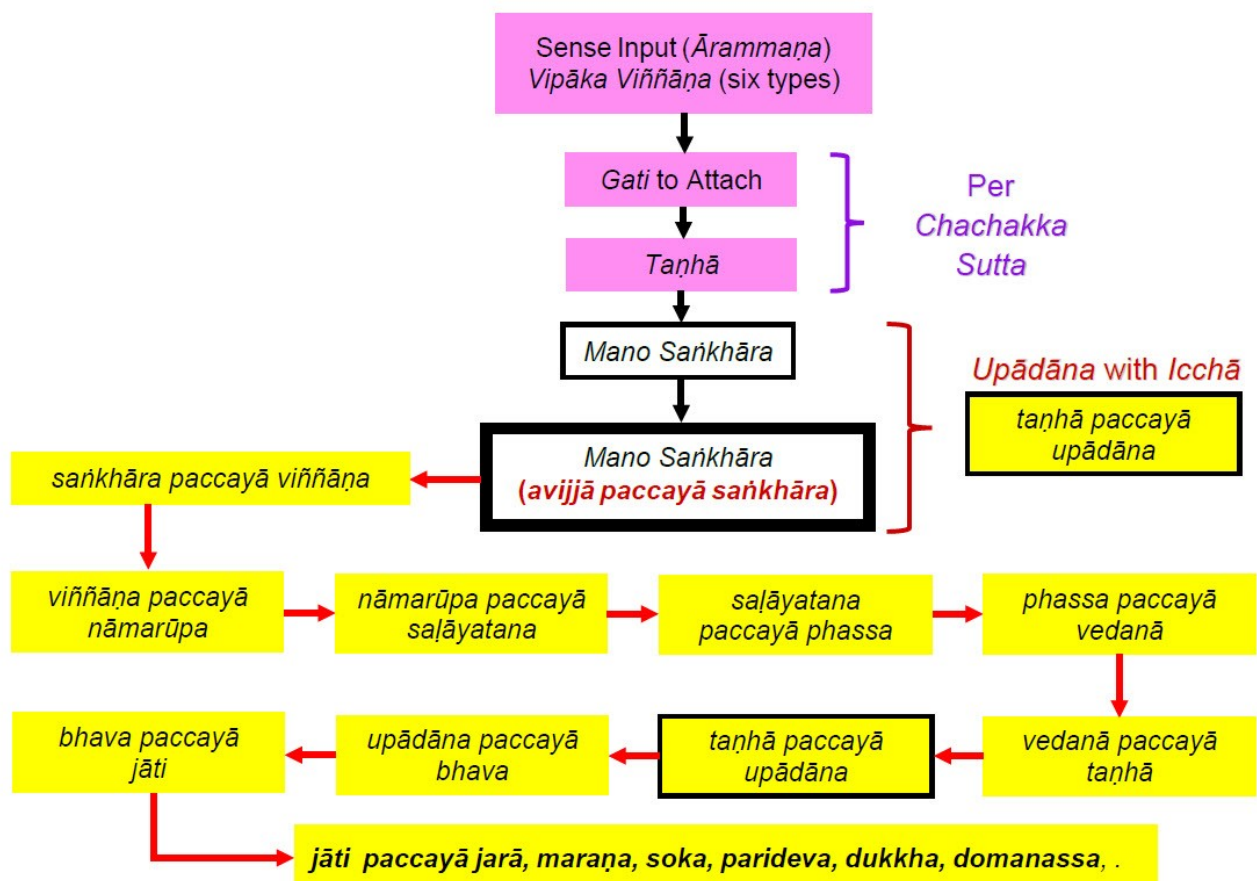

3. As we will discuss, we are not any different than a fish biting into a tasty bait, say, a worm. That fish does not see the hook hidden in the “delicious worm.” It will be subjected to much suffering once it bites the worm, and the hook attaches to its mouth.

- The difficulty in our case is that the deeds we do to get those sensory pleasures may not show their CONSEQUENCES in this life. That is why it is useless to follow Buddha Dhamma if one does not believe in rebirth or *kamma/vipāka*.
- All that we tend to crave (*icchā*) are PARTS OF the five aggregates (*pañcakkhandha*). That small part is *pañcupādānakkhandha*. We like certain types of *rūpa* (people and things), certain types of *vedanā* (feelings), etc.
- That is why it is critical to understand how “pulling close” (*upādāna*) of sensory inputs (*ārammaṇa*) lead to future suffering. The *akusala-mūla Paṭicca Samuppāda* (PS) ends up in “*jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” or the “whole mass of suffering.”

Craving (*Ichchā*) Starts the *Paṭicca Samuppāda* Process That Leads to Suffering

4. In the previous two posts, we discussed how an external sensory input (*ārammaṇa*) triggers the “*taṇhā paccayā upādāna*” step in the PS. See, “[Taṇhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda](#)” and “[Moha/Avijjā and Vipāka Viññāna/Kamma Viññāna](#).”

- Continuing on that discussion, let us look at how that future suffering arises. The following chart summarizes what we discussed. It shows all the steps in the PS process, starting with “*avijjā paccayā saṅkhāra*” to the end, “*jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” or the “whole mass of suffering.”

Open pdf for viewing or printing: [“WebLink: PDF-file: *Ichā to Upādāna to Suffering.*”](#)

***Idappaccayatā Paṭicca Samuppāda* Example**

Idappaccayatā Paṭicca Samuppāda explains phenomena occurring in real-time, as they happen. That is easier to interpret compared to *uppatti Paṭicca Samuppāda*, which describes events leading to future lives, especially in rebirths. [*idaṃ* :[(Nom. and Acc. sing. of ima) nt.] this thing. *paccayatā* :[f.] causation. *idappaccayatā* : (*idaṃ* + *paccayatā*) [f.] having its foundation on this, i.e., causally connected.]

5. Let us revisit a simple example that we discussed in #13 of the recent post, [“*Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\).*”](#)

A person is in the waiting room to see a doctor and sees that someone has dropped a wallet. The moment he sees the wallet, his mind attaches to it (*taṇhā*). Then he thinks that there could be some money in the wallet and that it is an easy way to get some “free money.” That happens within moments of him seeing the wallet.

- “Seeing the wallet” is a *cakkhu viññāṇa* that resulted via, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ.*” Within a split-second, he attaches to it (*taṇhā*) as we discussed in the posts on *Chachakka Sutta* (MN 148.)
- Then he starts thinking about how much money can be in that wallet, and how to pick it up without being noticed. Those are *vacī saṅkhāra* that arise due to his ignorance (*avijjā*) about the harmful consequences of them. Thus, his mind has generated “*upādāna*” for the wallet because he has a craving (*icchā*) for money.
- Thus, his mind starts the step, “*taṇhā paccayā upādāna*” in *Paṭicca Samuppāda* (PS.)

Initiation of a new *Paṭicca Samuppāda* Process

6. Therefore, the “*taṇhā paccayā upādāna*” step now leads to the start of a brand new PS process with “*avijjā paccayā saṅkhāra.*” We discussed that in the previous post, [“*Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa.*”](#)

- Those conscious thoughts about the wallet are *vacī saṅkhāra*. Now those *saṅkhāra* lead to a NEW *kamma viññāṇa*. That *viññāṇa* has the expectation of picking up the wallet and keeping it for himself. That is a *mano viññāṇa* that arises in his mind, and is different from the *cakkhu viññāṇa* of “seeing the wallet.”
- Now, that *kamma viññāṇa* leads to “*nāmarūpa* formation” in his mind. He runs various scenarios in his mind (*vitakka/vicāra*), both regards to picking up the wallet without being noticed and also what he can do with the money in the wallet. That is “*viññāṇa paccayā nāmarūpa.*”
- That immediately leads to the involvement of several internal *āyatana*. For example, he may look around to see whether anyone is watching. He may stand up and see whether the receptionist can see that area where he is sitting, etc. That is “*nāmarūpa paccayā salāyatana.*”
- That, in turn, leads to “*salāyatana paccayā (sam)phassa.*” The defilements (or “*saṅ*”) in his mind affect all his thoughts and activities. That generates mind-made *vedanā*)”*phassa paccayā (sam)phassa jā vedanā*) followed by “*vedanā paccayā taṇhā*” and “*taṇhā paccayā upādāna.*” Those are the steps described in the *Chachakka Sutta*. See, the previous posts in this series: [“*Worldview of the Buddha.*”](#)

Strengthened *Upādāna* Leads to a Temporary *Bhava*

7. His mind is now back to the “*taṇhā paccayā upādāna*” step in the PS process, and it reinforces that *upādāna*. The above steps may be repeated many times in his mind as he sits there and contemplates various aspects. Those, by the way, are *vitakka/vicāra*.

- With the strengthening of the *upādāna*, now he is born in the existence (*bhava*) of a thief. That is “*upādāna paccayā bhava*.” Then immediately, he is “born” (*jāti*) a thief. That is “*bhava paccayā jāti*,” By the way, in *uppatti Paṭicca Samuppāda*, *jāti* can happen much later. The “*bhava*” remains energized as *dhammā*; see below.
- Now that “thief” goes and picks up the wallet and puts it in his pocket. Now, “stealing of the wallet” is accomplished. That is the “*maraṇa*” or “death” of that particular *jāti* as a thief.
- However, there is more to it than just *maraṇa*. “*Jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” will also follow.
- Even though he got what he wanted, his mind is very agitated. Even though there was no one else in the waiting room, he wonders whether the receptionist somehow saw his act. Also, now a new thought comes to his mind as to whether there is a video camera in the room. That “mental stress” is part of *domanassa*.

The Process Is Over, but the Consequences Will Prevail

8. It is possible that there was a video camera in the room. If so, he could be charged with theft a few days later. Those are part of the “mass of suffering” due to that immoral act of stealing.

- But the critical point is the following. Even if he did not get caught, he would definitely be paying for his immoral action in the future. The *kammic* energy of that immoral deed will follow him, waiting for an opportunity to bring a corresponding “bad *vipāka*” at some point.
- *Kammic* energy is in *dhammā* (with long “a” at the end, not as in Buddha Dhamma.) Let us address that in brief.

Dhammā Are Energies Created by Mind – With *Kamma Viññāṇa*

9. *Dhammā* are the underlying energies (or “*kamma* seeds” or “*kamma bīja*”) created by the mind.

- A seed has the POTENTIAL to give rise to a tree under proper conditions like good soil, water, and sunlight. In the same way, *dhammā* (a *kamma bīja*) has the POTENTIAL to give rise to things (both living and inert) in this world.
- That is how such *dhammā* (or *kamma* seeds) can bring *vipāka* in the future.
- Just like an ordinary seed needs soil, water, and sunlight to germinate and bring about a tree, *dhammā* need proper conditions to bring about corresponding *vipāka*. That is also why *kamma* is not deterministic. For example, Aṅgulimāla killed 999 people. That *kammic* energy was there even after Ven. Aṅgulimāla attained *Arahantship*. However, with that *Arahantship*, his mind became pure, and any conditions to bring about the *vipāka* of those bad *kamma* could not materialize. See, [“Account of Aṅgulimāla – Many Insights to Buddha Dhamma.”](#)
- I will discuss the role of *dhammā* in the next post.

Icchā (Cravings) Lead to *Upādāna* and to Eventual Suffering

10. What we discussed above is the key message embedded in the First Noble Truth of *Dukkha Sacca*.

- It is craving (*icchā*) for “mind-pleasing sensory attractions in the world” that lead to *taṇhā* and *upādāna* and to eventual suffering.
- **Based on *icchā*, we get “stuck in attractive sensory inputs” (*taṇhā*), and try to keep that *ārammaṇa* as close as possible in the mind (*upādāna*.)** We do that in our minds by generating unwise thoughts (*vacī saṅkhāra*), that leads to unwise speech (more *vacī saṅkhāra*) and immoral actions (based on *kāya saṅkhāra*). That is the start of an *akusala-mūla* PS process, “*avijjā paccayā saṅkhāra*.”

- That process, of course, inevitably leads to the last step in the PS process, “*jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” or the “whole mass of suffering.”

11. The “[Icchā Sutta \(SN 1.69\)](#)” summarizes the importance of the *icchā*. One time, a *deva* came to the Buddha and asked:

“*Kenassu bajjhatī loko,* “By what is the world bound?
kissa vinayāya muccatī; By the removal of what one is freed?
Kissassu vippahānena, What is it that one must abandon
sabbam chindati bandhanan”*ti.* To cut off all bondage?”

[*bajjhatī* :[pass. of bandhati] is bound or captivated; is caught.

vinaya :[m.] discipline; the code of monastic discipline; removal.

muccatī :[muc + ya] becomes free; to be saved or released.

vippahāna : (nt.) [vi+pahāna] leaving, abandoning, giving up.

chindati :[chid + ṃ + a] cuts; severs; destroys.

bandhana :[nt.] bound; fetter; attachment; imprisonment; binding; bondage; something to bind with.]

The Buddha replied:

“*Icchāya bajjhatī loko,* “By **cravings**, one is bound to the world;
icchāvinayāya muccatī; By the removal of desire one is freed
Icchāya vippahānena, Craving is what one must give up
sabbam chindati bandhanan”*ti.* To cut off all bondage.”

- But, of course, craving for “mind-pleasing things” cannot be removed by just will power. One must understand the bad consequences of such cravings. That understanding comes through via moral living AND learning true and correct Buddha Dhamma.
- That is why *Sammā Diṭṭhi* comes first in the Noble Eightfold Path. The other steps in the Path will follow once one comprehends the teachings. But a badly corrupt mind is unable to grasp those teachings and that is why moral living is a pre-requisite.

5.2.8.4 Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections .6.8

December 28, 2019

Introduction

1. From the previous posts on *Paṭicca Samuppāda* in this series, we can make the following conclusions:

- The MIND generates different types of *saṅkhārā*. They are involved in all thoughts (*mano* and *vacī saṅkhārā*), speech (*vacī saṅkhārā*), and bodily actions (*kāya saṅkhārā*.)
- Therefore, *saṅkhārā* (generated with *avijjā*) are responsible for all ten types of *akusala kamma*. Of those ten, three with the mind, four with speech, and three with the body.
- Such *kamma* create energies (or *kamma bija*) that are released to the world as “*dhammā*.” We will discuss some details here. This word *dhammā* is different from *dhamma* (teachings) in Buddha Dhamma.
- Please review those previous posts as needed: “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’](#)”

Manopubbangamā Dhammā – Mind Is the Precursor of All

2. The first *Dhammapada* verse is “[Manopubbangamā Dhammā](#).” There are, in fact, two verses that go together. Those two verses have the following meanings:

- All things and phenomena have mind as their forerunner. They all are mind-made. **If one speaks or acts with an evil mind (i.e., engages in *dasa akusala*), then suffering (*dukha*) will follow just as the wheels of a cart follow the footsteps of the ox that is pulling the wagon.**
- All things and phenomena have mind as their forerunner. They all are mind-made. **If one speaks or acts with a purified mind (i.e., engages in *dasa kusala* and *puñña kamma*), happiness (*sukha*) follows one like one's own shadow.**

***Dhammā* Are Energies Created by Mind – With *Mano Viññāṇa* (*Kamma Viññāṇa*)**

3. **As I briefly stated in a previous post, *dhammā* are the underlying energies (or “*kamma seeds*” or “*kamma bīja*”) created by the mind.** See, “[Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa.](#)”

- A seed has the POTENTIAL to give rise to a tree under proper conditions like good soil, water, and sunlight. In the same way, *dhammā* (a *kamma bīja*) has the POTENTIAL to give rise to things (both living and inert) in this world.
- *Paṭicca Samuppāda* describes the complex process of a *dhammā* (a *kamma bīja*) giving rise to future lives. It also explains the arising of the external world that sustains life as well. We will address just the first part for now.
- The “seeds” here — *dhammā* (a *kamma bīja*) — are “created and fed” by “*kamma viññāṇa*.”
- Only the mind can generate *kamma viññāṇa*. Such *kamma viññāṇa* arise via, “*saṅkhārā paccayā viññāṇa*” in *Paṭicca Samuppāda*. **Since that happens ONLY in mind, *kamma viññāṇa* are ALWAYS *mano viññāṇa*.** A *kamma viññāṇa* has ENERGY. Such *kamma viññāṇa* encompass our future hopes and expectations.
- All the other five types of *viññāṇa* (*cakkhu viññāṇa*, *sota viññāṇa*, *ghāna viññāṇa*, *jivhā viññāṇa*, *kāya viññāṇa*) are ALWAYS *vipāka viññāṇa*. *Mano viññāṇa* could be EITHER *vipāka* or *kamma viññāṇa*. To recall how *vipāka viññāṇa* arise, see, “[Chachakka Sutta – No “Self” in Initial Sensory Experience.](#)”
- *Vipāka vedanā* that we experience arise with *vipāka viññāṇa*. See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”

An Example Of a “Mild” *Kamma Viññāṇa*

4. Let us consider an example of how a *kamma viññāṇa* arises and how it could grow with *saṅkhārā*.

- Suppose X needs to buy a car. He saw a car in a showroom and “fell in love with it.” **Here the impactful *ārammaṇa* was that moment of seeing his “dream car.”** A *kamma bīja* was born at that time with that expectation via “*saṅkhārā paccayā viññāṇa*.”
- He goes home and thinks about how to finance the purchase. He talks to his friends about how beautiful the car is, etc. All those are *vacī saṅkhārā* based on that car. Then he may go back to the showroom to look at it again and even to get a better price for the car. Those would involve *kāya saṅkhārā*.
- Every time he thinks, speaks and acts on issues relating to that car, he is “feeding that *viññāṇa*” for buying the vehicle. That happens with “*saṅkhārā paccayā viññāṇa*,” and makes that *viññāṇa* stronger. We could also say that the *kamma bīja* or *dhamma* associated with that *viññāṇa* would grow.
- The stronger that *viññāṇa* becomes, the more often will it “come back” to his mind (as a *dhammā*) via “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.” **That is what Sigmund Freud called “the subconscious.”** Of course, Freud had no idea of the working of the subconscious via *kamma viññāṇa*.
- Now, one day, X buys the car. At that time, the *kamma viññāṇa* (*kamma bīja*) for that expectation will go away. Even if he did not buy the car, that *kamma viññāṇa* (*kamma bīja*) would have died if he lost

his job unexpectedly and realized that he could not afford the car. In either case, it would no longer be in his “subconscious.”

An Example Of a “Strong” *Kamma Viññāṇa* Associated with a *Pāpa Kamma*

5. In the above example, we considered a relatively “mild” *kamma*. Even though there was some greed involved, that *kamma* (buying a car) was not a *pāpa kamma*. A *pāpa kamma* is a strong *akusala kamma* that could make one eligible for rebirth in the *apāyā*. Let us consider an example.

- Suppose X now wants to kill another human out of anger. The moment that he decides on that, his *vacī saṅkhāra* creates a new *kamma bīja* (and a *kamma viññāṇa*) on deciding to kill. His mind is “stuck with the idea of killing that person.” That is *tanhā*. The conventional translation of *tanhā* as “craving” is not quite right.
- From that moment, any time that X is thinking about how to carry out the killing, that *kamma bīja* (*kamma viññāṇa*) will grow. It happens via “*saṅkhāra paccayā viññāṇa*,” where *saṅkhāra* are *vacī saṅkhāra* involved in his planning. This is “*upādāna*” (“*upa*” + “*ādāna*” or “keeping it close in the mind.” He often thinks about how to kill that person. He dwells on it.
- Then, one day, X decides to shoot that person. Then he may go and buy a gun. That involves *kāya saṅkhāra*, and those will also contribute to the growth of that *viññāṇa* (*kamma bīja*.)
- Then X shoots and kills that person. That is the strongest *kamma* and it is a *kāya kamma* done with *kāya saṅkhāra*. But all those *vacī* and *kāya saṅkhāra* involved were *abhisāṅkhāra*.
- **However, unlike in the previous case in #4 above, that *kamma viññāṇa* (*kamma bīja*) does not go away.** That is because it is an *akusala kamma*. Even though the expectation accomplished, that *kamma viññāṇa* will instead be “established in the *kamma bhava*.” It will “follow him” **just as the wheels of a wagon follow the footsteps of the ox** in #2 above. That *kamma viññāṇa* will be “with him” for billions of years waiting for an opportunity to bring its results (*vipāka*.)

Abhidhamma Explanation

6. **The following information is relevant but not essential.** I include it for those who are familiar with *Abhidhamma*. It is a good idea to read it in any case, to get the basic idea. Our minds create ENERGY when we focus on *ārammaṇa*. When a mind “gets strongly attached” to a *ārammaṇa*, a particular type of *citta vīthi* (*atimahantarammana* or *mahantarammana*) that runs in the mind.

- Towards the end of such a *citta vīthi*, seven especially powerful *citta* (*javana citta*) arise. Those *javana citta* generate and release *kammic* ENERGY to the world. Those ENERGIES are *dhammā* or *kamma bīja*.
- Such ENERGIES generate in the steps, “*avijjā paccayā saṅkhārā, saṅkhārā paccayā viññāṇa, viññāṇa paccayā nāmarūpa*” in *Paṭicca Samuppāda*. That, of course, takes place during *citta vīthi*.
- These *kammic* energies generated in *javana citta* lie below the *suddhātṭhaka* level. A *suddhātṭhaka* is the smallest unit of matter in Buddha Dhamma. See, “[The Origin of Matter – Suddhatṭhaka](#).” [*suddha* : [pp. of sujjhata] become clean or pure. *aṭṭhaka* :[nt.] a group of eight.]
- That is a very brief explanation. One could read about *citta vīthi* in *Bhikkhu Bodhi’s* book, “Comprehensive Manual of Abhidhamma.” As I said, it is not necessary to fully understand that process. But that could fill “some gaps in the picture.”

Dhammā Are Rūpa Too!

Dhammā are also *rūpa* in Buddha Dhamma. As we have discussed, *dhammā* are pure energy that lies below “tangible matter” above the *suddhātṭhaka* stage.

7. Those energies released to the “unseen world” or “immaterial world” stay there as *dhammā*. Therefore, *dhammā* are “out there” in the world, just like other types of *rūpa*.

- Another name for *kamma viññāṇa* or *dhammā* is *kamma bīja*. In Buddha Dhamma, such energies also come under the category of “*rūpa*.” More on that below.
- While scientists can detect any of the other five kinds of *rūpa* with their instruments, *dhammā* can be detected only by the *mana indriya* in the brain.
- Let me first clarify what I mean by “unseen world” or “immaterial world.” The world that we can “see” or “interact with” consists of the following. There are solid objects (people, animals, trees, houses, etc.) that we “see” with our eyes. They are “*rūpa rūpa*” or simply “*rūpa*.” There are sounds that we hear (*sadda rūpa*.) Things that we smell are odors (*gandha rūpa*.) We taste the essence (*rasa rūpa*) in the food we eat. And we touch solid objects (*phoṭṭhabba rūpa*.)
- *Dhammā* are in a different category compared to other types of “tangible *rūpa*.” It may be a good idea to read the post “[Our Two Worlds: Material and Immaterial.](#)”

8. Long before Einstein made the connection between matter and energy via his famous $E = mc^2$ equation, the Buddha treated both matter and energy as “*rūpa*.”

- With advances in physics, now it is well-established that matter and energy are indistinguishable. For example, now scientists accept that light consists of particles (photons.)
- Some of those “*rūpa*” we can directly see, and we also know how others arise. For example, “*sadda rūpa*” are sound energy. Still, scientists know that sound propagates through the air via “pressure waves.” We are familiar with the five types of “*rūpa*” that we sense with our five physical senses (eyes, ears, nose, tongue, body.)
- Scientists have not been able to detect *dhammā*, and are unaware of them. They think memories are “stored in the brain.” That definitely is not compatible with the ability to recall past lives by many, including some children. Of course, the Buddha was able to recall past lives as far back as he wished (without seeing a “beginning.”) See, “[Origin of Life – There is No Traceable Origin.](#)”

Dhammā Are Anidassana Rūpa

9. **The following information is relevant but not essential.** It is a good idea to read it in any case, to get the basic idea. The Buddha stated that “*dhammā cannot be seen or made contact with* (other than with the *mana indriya*.) *Dhammā* are “*Vedanākkhandho ... pe ... viññāṇakkhandho, yañca rūpaṃ anidassanaṃ appaṭighaṃ dhammāyatana pariyaṇannaṃ.*”

- That verse is in “[WebLink: suttacentral: 2.3.2. Dukanikkhepa](#)” of the Dhammasaṅgaṇī under the subsection 2.3.2.2.3. Sanidassanaduka.
- The critical point to remember is that *dhammā* include our memories (which are just records without energy) AND *viññāṇa* (which include *kamma viññāṇa* with *kammic* power.)

10. There is a lot to grasp here, but the main points are the following.

1. *Dhammā* (used normally in plural) **include** *kamma viññāṇa* or *kamma bīja*.
2. *Dhammā* **also include** memories from the past, including those from past lives. It is just that one may not be able to recall past lives until one attains *jhāna* and cultivates “*pubbenivāsānussati ñāṇa*.”
3. Those *dhammā* (including memories or “*nāma gotta*”) are “out there” too, just like the other five types of *rūpa* are “out there.” But an average human is unaware of *dhammā*. It takes a Buddha (with a perfectly purified mind) to uncover such details about the world.
- That is why I stated that *dhammā* are in the “unseen world” or “immaterial world.” Details at “[Our Two Worlds: Material and Immaterial.](#)”

***Dhammā* Behave Differently Compared to “Normal *Rūpa*”**

11. *Rūpa* or “matter” behaves very differently below the *suddhātṭhaka* level. Again, we do not need to get into details, but it is essential to make that connection. For those who are interested, details at [“The Origin of Matter – Suddhatṭhaka.”](#)

- As we discussed, those “gross or dense *rūpa*” that we detect with the five senses are the only *rūpa* that modern science is aware of.
- However, when scientists started studying “matter” at very low density (like electrons and photons), they ran into problems. “Matter” at the sub-atomic level behaves very differently, and those investigations led to the discovery of quantum mechanics. For example, electrons and photons do not obey the same laws as large particles like stones or tennis balls.
- Even though scientists have made progress with quantum mechanics, they are still unable to explain some phenomena at the sub-atomic level. One key issue is that such “quantum particles” like electrons and photons seem to be interacting instantaneously across long distances. This phenomenon is known as “quantum entanglement.” See, [“Quantum Entanglement – We Are All Connected.”](#)

12. Those *dhammā* are *kamma bīja* lie below the *suddhātṭhaka* level. They interact with the *mana indriya* instantaneously.

- All other types of *rūpa* detectable with the five physical senses are above the *suddhātṭhaka* level. However, some sub-atomic particles (closer to the *suddhātṭhaka* level) like electrons display the ability to interact instantaneously among themselves, just like *dhammā*. See, [“Quantum Entanglement – We Are All Connected.”](#) Quantum physicists are mystified by this effect.
- However, the Buddha explained all that 2500 years ago. That is what I have tried to explain to the physics community over the past few years. They do not see that connection yet. But at some point, they will have to. For those of you who have a physics background, [“Quantum Mechanics and Dhamma.”](#)

Those *Dhammā* Could Bring *Vipāka* via *Vipāka Viññāṇa*

13. Under proper conditions (*paccayā* in *Paṭicca Samuppāda*), *kamma viññāṇa* (or *dhammā*) COULD bring corresponding results (*vipāka*) and the associated *viññāṇa* are ***vipāka viññāṇa***. That happens via all SIX sense faculties. As we discussed in previous posts, “*cakkhuṅca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ*” through “*mānaṅca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.” All those are ***vipāka viññāṇa***.

- In other words, ***vipāka viññāṇa*** materialize via all six sense inputs (eyes, ears, tongue, nose, body, and mind.) We discussed that in several earlier posts on the *Chachakka Sutta* (MN 148.)
- As we discussed in #2, #3 above, ONLY *mano viññāṇa* can also be ***kamma viññāṇa***. Such ***kamma viññāṇa*** arise via “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa*.”

Summary

14. It is the MIND that generates *saṅkhārā* with INTENTIONS to do, speak, or think. Such *kāya, vacī,* and *mano saṅkhārā* lead to *kamma* done with actions, speech, and thoughts.

- The strong *saṅkhārā* or *abhisāṅkhārā* generates *kammic* energy that are released to the world. Such energies are alternatively referred to as *dhammā, kamma bīja, or kamma viññāṇa*. They can bring *vipāka* during a lifetime or bring future rebirths.

15. We have covered a lot of material in this post. It is not possible to go to details (if we do, we will not get to finish the discussion on *Paṭicca Samuppāda* for a long time!)

- Feel free to ask questions. That is the only way for me to gauge whether I am proceeding too fast.

- It is not necessary to try to learn *Abhidhamma* in a rush. However, it is a good idea to try to understand the basic concepts.

5.2.8.4 **Paṭicca Samuppāda – From Mind to Matter**

.6.9

January 11, 2020

Where is the “Mind-to-Matter” Step in *Paṭicca Samuppāda*?

1. *Akusala-mūla Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and ends with “*bhava paccayā jāti, jāti paccayā jarā, maraṇa,..*”

- The first step involves generating defiled thoughts (*mano, vacī, and kāya saṅkhāra*) due to *avijjā* (not being aware of the Four Noble Truths.) In the end, that leads to births of physical bodies (*jāti*) that will then undergo old age and death.
- **How do thoughts lead to the births of human beings and other living beings?**

Javana Citta Create Energy!

2. I laid the foundation for this post in a recent post, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.](#)” Please review that as needed.

- The critical point is that our thoughts (specifically *javana citta*) CREATE energy! That may be hard to believe.
- Even a few hundred years ago, many people thought that the Buddha taught some other things that were “hard to believe.” For example, Buddha taught that there are an uncountable number of planetary systems like our Solar system in the universe. However, before Galileo invented the telescope, people believed that Earth was at the center of the universe! See the “[WebLink: en.wikipedia.org: Geocentric model.](http://en.wikipedia.org:Geocentric_model)”
- Even after reading the previous post mentioned above, many of you may not have caught on to the fact that the mind creates energy. And that is what leads to the “arising of physical bodies” in future existences (rebirths.) You may want to read that post after reading this one, and things will become more clear.

Thoughts Create “Seeds” That Can Give Rise to Physical Bodies

3. In that previous post, we discussed that such minute amounts of energies created by our thoughts are PART OF *dhammā* (with a long “a” at the end.)

- Of course, such minute amounts of energy cannot DIRECTLY create massive/dense bodies like ours.
- When a living being grasps a new existence (*bhava*), only a “mental body” or “*manomaya kāya*” for the new life appears. It is a “mental body” since it is mostly mental with only a trace of matter. **Very little kammic energy is enough to create that “mental body.”**
- This “mental body” or “*manomaya kāya*” is the same as a *gandhabba* or a “*paṭisandhi viññāṇa.*” **One creates one’s future via one’s *saṅkhāra* (i.e. that is the way one THINKS). *Paṭicca Samuppāda* describes that process.**
- That is why it is CRITICAL to understand the previous three posts: “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.](#)” “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)” and “[Cloning and Gandhabba.](#)”

4. The word “*kāya*” in Buddha Dhamma means a “collection.” Thus, this “body” that is created by *kammic* energy consists mostly of the four “mental aggregates.” **It has only a trace of matter (much smaller than an atom in modern science.)**

- However, it has all five aggregates of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. Of course, the “*rūpa kāya*” is unbelievable small, but the “four mental aggregates are the same as those experienced by a living person with a physical body.”
- That “mental body” or “*manomaya kāya*” is the same as *gandhabba*! However, after the initial formation, *gandhabba* can “solidify” somewhat by “taking in scents or aroma.” Hence the name “*gandhabba*” (“*gandha*” + “*abba*” or “taking in scents.”)
- For details on *gandhabba*, see, “[Mental Body – Gandhabba.](#)”

It is *Kamma Viññāṇa* That Sets Up Energy for a New Existence (*Bhava*)

5. There are no “*rūpa*” in PS steps up to “*viññāṇa*.” As we have discussed, a *kamma viññāṇa* that arises via “*saṅkhāra paccayā viññāṇa*” is a type of “*rūpa*” because it has “energy.” As Einstein showed with his famous equation, $E = mc^2$, energy is also a manifestation of matter. Again, see “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.](#)”

- **Then at the next step, there is “*nāmarūpa*.” That is where a conventional “*rūpa*” becomes “live.”** That is precisely what happens when a “*paṭisandhi viññāṇa* descends to a womb” and makes an inert zygote become alive! That occurs at the “*viññāṇa paccayā nāmarūpa*” step in *Uppatti* PS.
- The post “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” explains how a “*paṭisandhi viññāṇa*” leads to the creation of a “new human body.”
- Sexual intercourse only creates the “material basis” for a new life. An egg (from the mother) combines with sperm (from the father) to form a single cell, a zygote. **That zygote is inert (a *rūpa*),** just like the egg and the sperm. An existing “**mental body” or a *gandhabba* (*nāma* with energy)** needs to merge with that zygote to form the ***nāmarūpa* or the fetus (with mind and body).**
- Sexual intercourse is not necessary to form the zygote or the “material base” for a new “physical body.” A zygote can be created in a laboratory, but still requires eggs from the mother; see, “[Cloning and Gandhabba.](#)”

“*Nāmarūpa Paccayā Saḷāyatana*” in *Uppatti Paṭicca Samuppāda*

6. That “live person” or the fetus will grow for nine months to complete the formation of all six sensory faculties. That is the “*nāmarūpa paccayā saḷāyatana*” step in *uppatti* PS. As we know, “*saḷāyatana*” represents the “six sensory faculties” of a living being with a “body and mind.”

- Therefore, the transition starts with the step “*saṅkhāra paccayā viññāṇa*,” Then, it goes through the “*viññāṇa paccayā nāmarūpa*” step, before finalizing the formation of a “human with six sensory faculties” at the “*nāmarūpa paccayā saḷāyatana*” step.
- However, it is essential to understand that a “*paṭisandhi viññāṇa*” leading to a rebirth must have been cultivated previously. Such a *viññāṇa* “builds up” over MANY “[Idappaccayatā Paticca Samuppāda](#)” cycles that take place DURING a life or even over many lives.

Example of an Alcoholic Making an “Animal *Bhava*”

7. Let us consider an example to illustrate how one cultivates a *paṭisandhi viññāṇa* suitable for an animal over time. Let us consider an alcoholic/drug addict. I am not talking about a person who takes an occasional drink. Instead, this person has an addiction to alcohol or drugs.

- As we have discussed in recent posts on the *Chachakka Sutta* (MN 148), one starts thinking about a certain *ārammaṇa* (in this case, drinking) when thought about that *ārammaṇa* comes to mind as a *vipāka viññāṇa*. In this particular case, it could be seeing an alcohol bottle, hearing about an upcoming party, or just habitually remembering that “it is time to have a drink.”

- As explained in those posts, one's mind quickly gets to “*taṇhā*” (or “getting stuck” in that *ārammaṇa*.) Thus, a PS process would start at the “*taṇhā paccayā upādāna*” step. See, “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering.](#)”
- That is when one starts THINKING about that *ārammaṇa* that came to the mind. That is the “*avijjā paccayā saṅkhāra*” step of a new PS cycle.

***Nāmarūpa* in “*Idappaccayatā Paṭicca Samuppāda*” Are Just “Visuals”**

8. Suppose the alcoholic/drug addict in our example is sitting at his desk at work. Due to his habit, an upcoming party may come to his mind via “*manañca paṭicca dhammē ca uppajjati manoviññāṇaṃ.*”

- Of course, he will be instantly “stuck in that *ārammaṇa*,” and the “*taṇhā paccayā upādāna*” step in PS gets him started on “*avijjā paccayā saṅkhāra.*” Thus, he starts thinking about the experience that he is going to have in the upcoming party. Those are *vacī saṅkhāra*.
- That leads to the arising of a *viññāṇa* (anticipation or the expectation of the possible enjoyments) via “*saṅkhāra paccayā viññāṇa.*” **The *javana citta* in his thoughts start creating energy for that *viññāṇa*.**
- That involves visualizing “party scenes” at the upcoming party and also his past experiences in similar situations. He will imagine the friends who will be there, what kind of alcohol, food, and other types of entertainment will be there. **These are all “*nāmarūpa*” or visuals that arise in his mind.** These *nāmarūpa* are very much like what we experience in a dream, just visuals.

Some of those *Viññāṇa* and *Nāmarūpa* Cultivated Could be Compatible with Animal Mindsets

9. Some of those *viññāṇa* and *nāmarūpa* cultivated by the alcoholic/drug addict in our example could be compatible with those of animals. That is a critical point.

- During some of these parties, alcohol or drug usage could get to extreme levels. Some people may pass out and could be unable to walk. They will be dragging themselves on the floor like animals.
- Some may be engaging in sexual misconduct. Such bodily actions are more potent than such cultivating *vacī saṅkhāra*. However, in most cases, it is the cultivation of *vacī saṅkhāra* (thinking about such activities with *vitakka/vicāra*) that lead to bodily actions.
- Both kinds of *saṅkhāra* lead to the growth of *paṭisandhi viññāṇa* suitable to bring about an animal birth in the future (in an *Uppatti* PS process.)

***Nāmarūpa* In “*Viññāṇa Paccayā Nāmarūpa*” Are Two Kinds**

10. It is critical to note that the “*nāmarūpa*” discussed in #8 are different from those in #5.

- The *nāmarūpa* in #8 helps build that *viññāṇa* via the backward step, “*nāmarūpa paccayā viññāṇa.*” When the alcoholic is making those ‘visualizations,’ he is cultivating that *viññāṇa*. Thus, each is helping grow the other. That often happens in “[Idappaccayatā Paṭicca Samuppāda](#)” cycles.
- For example, Ven. Sariputta in the “[WebLink: suttacentral: Naḷakalāpī Sutta \(SN 12.67\)](#)”: “*Seyyathāpi, āvuso, dve naḷakalāpiyo aññamaññaṃ nissāya tiṭṭheyyuṃ. Evameva kho, āvuso, nāmarūpa paccayā viññāṇaṃ; viññāṇa paccayā nāmarūpaṃ;..*” OR “Just as two sheaves of reeds might stand leaning against each other, so too, with *nāmarūpa* as condition, *viññāṇa* comes to be. With *viññāṇa* as condition, *nāmarūpa* comes to be..”
- **On the other hand, the “*viññāṇa paccayā nāmarūpa*” step happens only once in *uppatti* PS cycles.** That involves a special “*paṭisandhi viññāṇa*” (*gandhabba*.) When that *paṭisandhi viññāṇa* (or *gandhabba*) descends to the womb, it merges with the zygote and creates a new “*nāmarūpa*” or a “live

fetus.” See, #5 above and the posts referred to there, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”

It Is Important to Review Related/Past Posts Often

11. Another thing to remember is that even a given PS cycle does not proceed in just one direction. All those steps, as with many others in PS, go backward too. For example, “*viññāṇa paccayā nāmarūpa*” and “*nāmarūpa paccayā viññāṇa*” steps may go back and forth strengthening each other in many cases (see #8, #9 above.)

- I have explained this in several previous posts in this series: “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’](#)” A vital case discussed in “[Tanhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda](#).”
- There is a lot to grasp in this post. Please make sure to read the related posts mentioned above, so that these concepts are well-understood.
- It is critical to have a good idea about these concepts to see how one makes one’s future rebirths. Furthermore, the type of rebirth CORRESPONDS to the kind of *abhi(saṅkhāra)* cultivated with “*avijjā paccayā saṅkhāra*.”
- That is how “mind to matter” transitions take place. **And this is why the Buddha said that the mind is at the forefront.**
- All relevant posts at, “[Origin of Life](#).”

[Kamma and Paṭicca Samuppāda – Introduction](#)

[Kāma Assāda – A Root Cause of Suffering](#)

[Gati \(Habits/Character\) Determine Births – Samsappanīya Sutta](#)

March 27, 2020

The uniqueness of Buddha Dhamma (Buddhism)

Kamma and *Paṭicca Samuppāda* are closely related, with *saṅkhāra* bridging the gap. We will get to the role of *saṅkhāra* in the next post.

1. Many Eastern religions (Buddhism, Hinduism, Jainism, Sikhism) believe in *kamma* and rebirth. So, what is the difference in Buddhism?

- *Abrahamic* religions do not believe in rebirth. But they also teach that the way to get to a state of permanent happiness is to live a moral life. That means one needs to do good *kamma* and avoid doing bad *kamma*.
- On the other hand, all religions other than Buddhism are based on finding a permanent existence of happiness in a heavenly world. **Buddha Dhamma does not promise sensory pleasures in a heavenly realm. Attachment to sensory pleasures is what leads to future suffering.**
- By the way, Buddhism is not a religion. It is a fully self-consistent world view. When one comprehends that world view, one can see a permanent solution to the problem of suffering.
- **Understanding the Four Noble Truths** first requires understanding that **suffering exists in the rebirth process**. That understanding will reveal three more truths at the same time. (i) The Causes of future suffering, (ii) that those causes CAN BE REMOVED, and (iii) the WAY to stop that suffering from arising. **Therefore, it is necessary to first understand the “previously unknown suffering” that the Buddha revealed to the world.**

2. Buddhism (Buddha Dhamma) says the following.

- (i) There is no existence in this world where suffering is absent permanently. There are existences in higher-realms that are almost suffering-free, but they also have limited lifetimes.
- (ii) Even if one does good deeds and lives a moral life, one can have bad future births because of *kamma* from previous lives.
- (iii) On the other hand, even if one has lived immorally in this life, it is possible to attain *Nibbāna* in this life.
 - **Those three points may not be clear. In the next few posts, I will address those issues.**
 - The answers to those questions will also clarify the following. **The Buddha taught that it is not a good starting point to insist on whether a “self” exists or not.** Instead, we need to start by investigating how future births (and thus future suffering) arise. Just like in science,
 - Like science, Buddha Dhamma is based on the Principle of Causality. Nothing can happen without causes. **Yet, NOT all causes inevitably lead to their outcomes.** That is a crucial point to understand too.

Causes and Conditions Bring Future Births

3. If all causes just lead to their consequences, then *kamma* would lead to deterministic outcomes. For example, some religions teach that immoral deeds WILL lead to their results. So, they try to find ways to remove existing bad *kamma*. That is what the Buddha also tried to do for six years while striving to attain the Buddhahood.

- **On the night of his Enlightenment, the Buddha discovered that causes could bring their effects (results) ONLY if the right conditions are there.** That is *Paṭicca Samuppāda*, the Principle of Causes and Conditions. But one must understand what those conditions are. That is why *Paṭicca Samuppāda* is a profound concept.
- By the way, *Paṭicca Samuppāda* pronounced, “paticcha samuppaada.” The way Pāli words are written is different from standard English; see, [“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and [“Tipitaka English” Convention Adopted by Early European Scholars – Part 2.](#)”
- *Paṭicca Samuppāda* explains how causes lead to their effects UNDER suitable conditions. **Therefore, we do not need to remove past *kamma*. We can purify our minds so that CONDITIONS for those bad *kamma* to bring *vipāka* will be absent.** That is how Aṅgulimāla, who killed almost a thousand people, was able to attain the *Arahanthood*; see below.
- Since this principle of CAUSES and CONDITIONS is a crucial point, let us discuss this a bit more with that analogy of a seed.

An Example of the Requirement of Conditions

4. An apple seed has the POTENTIAL to bring an apple tree to life, so the CAUSE is there in the seed.

- Suppose one prepares a plot by preparing the soil, providing water, and plants the seed there. If sunlight is also available, the apple seed will germinate, and an apple tree will grow. Those are the necessary CONDITIONS for that apple seed to germinate and give rise to an apple tree.
- However, if one keeps the apple seed in a cool, dry place, it will not germinate, i.e., necessary CONDITIONS are not present in that case for an apple tree to come to life. After a long time, the seed will become a “dud” and will never be able to give rise to a tree.
- Furthermore, when an apple seed is planted, a mango tree will not result from that, only an apple tree. **The RESULT (*vipāka*) is according to the CAUSE (*kamma* or more specifically *kamma bīja*).**

Example From *Tipiṭaka* – The account of Aṅgulimāla

5. In the same way, someone who attains the *Arahanthood* may have done highly immoral deeds even in the present life. But he/she would have eliminated the CONDITIONS that can bring the results of those deeds to fruition.

- The account of Aṅgulimāla is a good example to illustrate this point. He had killed almost a thousand people. Thus he had done enough bad *kamma* to be born in the *apāyā* many times. Yet he was able to attain the *Arahanthood* in a few weeks! See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma.](#)”
- When one does a bad *kamma*, a *kamma bīja* (*kamma* seed) is created. Under suitable conditions, that *kamma* seed can “germinate” and lead to a new birth, just as a seed can lead to the birth of a plant. We will discuss how such a *kamma* seed is created by one’s powerful thoughts (*javana citta*.)
- However, unlike in the case of plant seed, even potent *kamma* CANNOT bring *vipāka* to an *Arahant* to bring rebirth. In the case of Aṅgulimāla, the strong bad *kamma* of killing almost a thousand people was done in the same life that he attained *Parinibbāna*. At his death, those *kammic* energies were there, but his mindset would not grasp them, i.e., the “*upādāna paccāyā bhava*” step in PS would not take place.
- Of course, we need to discuss that last point in detail in the upcoming posts.

6. Furthermore, the result (if it manifests) is compatible with the *kamma*. That is analogous to only an apple tree arising due to an apple seed. *Akusala kamma* (an immoral deed) will only lead to a birth in the *apāyā*. It will not lead to a birth in the human realm or a higher realm.

- Similarly, a *kusala kamma* (a good deed) will not lead to a birth in the *apāyā*. It will only lead to a birth in a good realm.
- Most importantly, even if the causes are there, corresponding results (*vipāka*) would not materialize if necessary conditions are not fulfilled.
- We all have done uncountable *kusala* and *akusala kamma* in our previous lives. **We need to be mindful to make conditions for good *kamma* to bring their *vipāka* AND for bad *kamma* not to bring their *vipāka*.**
- So, we can see why both CAUSES and CONDITIONS play roles in our daily life and in the rebirth process.

“Self” and “No-Self” Are Misleading Concepts

7. We can get some insights about the concept of a “self” from the fact that an *Arahant* would not have a rebirth. **If a permanent “self” existed, it would be impossible for an *Arahant* to attain *Parinibbāna* and to end the rebirth process.** That means there was no everlasting “self” like a “soul” or an “*Atman*” or “*ātma*.”

- However, that *Arahant* was possibly born in most of the 31 realms uncountable times in the past. During a human existence, for example, there was a “self” living his/her life. He/she was making his/her decisions.
- When that *Arahant* was born an animal, it would have had the mindset of an animal. When born in a *Deva* realm, that *Deva* would have enjoyed sensual pleasures for a long time.
- **Therefore, the idea that there is “no-self” while one is living life does not make sense either.** There is obviously “a self,” making decisions about how to live life. Even a wild animal has to decide how to get the next meal.

8. We can summarize as follows. While we live this life, we cannot deny that we exist. On the other hand, the idea of a “self” is a temporary one. That ‘self’ keeps changing even during life, but will change drastically when grasping a “new *bhava*.” Thus, it is also not correct to talk about an “everlasting self.”

- The “sense of a self” goes away entirely only at the *Arahant* stage. Until then, we need to try to comprehend WHY it is unfruitful to take anything in this world to be “mine.”
- That does not mean one needs to start giving away everything that one owns. We have responsibilities to fulfill. Furthermore, the “giving” and “letting go” will happen AUTOMATICALLY as the mindset changes. I have personally experienced that.
- **Another critical point is that having the “big picture” helps clarify many issues.** That may sound contradictory, but that is true. See, “[The Framework of Buddha Dhamma](#).”

The Bigger Picture of 31 Realms

9. As we discussed in many previous posts, our world is much more complicated than what we can experience with our limited senses. I will summarize some relevant key points to the current discussion.

- The 31 realms in our world belong to three types of “*loka*” or “worlds.” The “*kāma loka*” has 11 realms, including the human realm. There are 16 realms in “*rūpa loka*” where *rūpāvacara Brahmā* live. Then, there are four realms in “*arūpa loka*” for *arūpāvacara Brahmā*.
- Those higher-lying two *lokā* are the simplest. In those 20 realms, there is only *jhānic* pleasure. A human can experience all those by cultivating *jhāna*. The lower four *jhānā* correspond to the *jhānic* experiences of the 16 *rūpāvacara Brahma* realms. The higher four correspond to the four *arūpāvacara Brahma* realms. All those *Brahmā* do not have “dense bodies” like ours. Their “bodies” have very little matter. They are even harder to “see” than even *gandhabbā*.
- The remaining 11 realms are in the *kāma loka*. Sensory pleasures associated with eating, smelling, and body touches are available only in those 11 realms. Living beings in those 11 realms have relatively “dense solid bodies” or *karaja kaya*. There is a complex variety of “bodies” in *kāma loka*. We can see very high complexity even within the animal realm. In general, *Devā* in the six realms have “bodies” much lighter than ours but denser than *Brahma*.

What Leads to Rebirth in Different Realms?

This has answers from the close relationship between *kamma* and *Paṭicca Samuppāda*, where **saṅkhāra** plays a key role.

10. To be born in those higher 20 realms, a human must cultivate *jhānā*.

- It is not necessary to follow Buddha Dhamma to cultivate either type of *jhānā* and to be born in those higher 20 realms. *Anāriya* (or non-Noble) meditation techniques (breath and *kasina* meditations) can be used to cultivate those *anāriya jhāna*.
- However, that birth in a *Brahma* realm lasts only for the duration of the life there. Then one will be born back in the *kāma loka* based on the strongest *kamma vipāka* that comes to the mind of that *Brahma* at the dying moment.
- Rebirths in various realms in the *kāma loka* are much more complex. We will discuss those in the next post, where we will discuss the role of *saṅkhāra*.

Summary

11. We have discussed other ways of looking at the basic principles in Buddha Dhamma before. See, for example, “[The Framework of Buddha Dhamma](#).”

- The above is a simple summary of yet another way. We will continue to explore the connection between *kamma* and *Paṭicca Samuppāda* in the next post.
- It is essential to grasp the basic framework from different “vantage points.” Then we can slowly get into more profound aspects.
- Reviewing the “bigger picture” from different angles is necessary to get an idea of the beginning-less rebirth process. The world is complex, and understanding it is like putting together a big jigsaw puzzle. It takes a real effort, but it becomes joyful when one gets some traction.
- Once one starts understanding the essential aspects, one will see the value of the Buddha, his *Dhamma* (teachings), and the *Sangha*, who understood this profound Dhamma and transmitted it faithfully over 2500 years. **That is the real faith** (*saddhā*.)
- All previous posts in the series at “[Origin of Life](#).”

Kāma Assāda – Sensory Pleasures

1. *Kāma assāda*, or simply “*kāma*,” means “sensory pleasures.” See, “[What is “Kāma”? It is not Just Sex.](#)”

- We all like and crave sensory pleasures. An average human likes to eat tasty foods, smell perfumes, and experience soothing bodily contacts, including sex. He/she also wants to see related objects and listen to related sounds. Thus, an average human enjoys such sensory events through all five physical senses.
- Besides, we also tend to endlessly think about such “pleasures” and how to get more of them. Thus, we use all six senses to “enjoy sensual pleasures.” **That leads to *kāma taṇhā*, one of the three types of *taṇhā*: *kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*.**
- The Buddha pointed out that we are trapped in the suffering-filled rebirth process because of this tendency to value sensory pleasures or *kāma assāda*. That is another way to discuss the “previously unknown suffering” that the Buddha introduced in his first discourse, *Dhammacakkappavattana Sutta*. The dangers in *kāma assāda* stated there as one extreme way to live life, or “*kāmasukhallikānuyogo*.”
- It is important to note that Buddha rejected the opposite extreme, too (“*attakilamathānuyogo*.”) There is no need to force oneself to eat less or to eat not-tasty food, be subject to unpleasant bodily contacts, etc. The “middle way” is to live a simple life away from both extremes and to contemplate and comprehend the “true nature of this world 31 realms.”
- It is not easy to comprehend the bad consequences/danger (*ādīnava*) of *kāma assāda*. We will go through a systematic analysis.

Connection to the Previous Post

2. In the previous post, we discussed that causes (*kamma bīja*) are not enough to bring about their results (*kamma vipāka*.) Just because one has done bad *kamma* does not mean one will have to face adverse consequences, especially unfortunate rebirths. The same is true for good *kamma*.

- We all have done enough good and bad *kamma* to sustain the rebirth process over billions of years. However, even Aṅgulimāla, who killed almost a thousand people, was able to nullify that *kamma*. He did that by purifying his mind (attaining *Arahantship*) and removing *avijjā* and *taṇhā* that fuel the *Uppatti Paṭicca Samuppāda* process.
- That indirect way of “overcoming” a *kamma bīja* is called *kammakkhaya*. It does not destroy any previous *kamma bīja*. Instead, one would remove the conditions for such *kamma bīja* to “germinate.” As we know, the removal of *avijjā* will stop the tendency to attach to “worldly things” (*taṇhā*). Then, the “*upādāna paccayā bhava*” step in *Uppatti Paṭicca Samuppāda* will not take place.

- The key message of the Buddha was that the rebirth process in “this world” is filled with suffering. When one comprehends that “hidden suffering” of “this world,” one will strive to overcome the rebirth process and to attain *Nibbāna*.
- “This world” (“*ayaṃ loka*”) consists of three *loka*: *kāma loka* (with 11 realms,) *rūpa loka* (with 16 realms,) and the *arūpa loka* (with four realms.) As we know, at the *Sotāpanna* stage, one overcomes rebirths in the four lowest realms (*apāyā*.) Rebirths in all realms in *kāma loka* will stop at the *Anāgāmi* stage. At the *Arahanthood*, rebirths in all three *lokā* (i.e., in all 31 realms) will end, and *Nibbāna* realized.

Most Living Beings Are Trapped in the Four Lowest Realms (*Apāyā*)

3. Over 99% of the living beings are trapped in the four lowest realms (*apāyā*) in the *kāma loka*. It is extremely difficult to get rebirth in a higher realm.

- For example, there are less than eight billion people on Earth. But there are a million times more ants on Earth! **There are a trillion types of lifeforms on Earth**; see, “[WebLink: sciencealert.com: The Largest Study of Life Forms Ever Has Estimated That Earth Is Home to 1 TRILLION Species.](http://sciencealert.com)” These are mind-boggling numbers! That is not counting the other three realms in the *apāyā* that we cannot see.
- While it is hard to get rebirth in the human and Deva realms, it is EVEN HARDER to get rebirths in *rūpa loka* and *arūpa loka*, collectively called *Brahma loka*. That is because one has to overcome (at least temporarily suppress) *kāma rāga* (craving for sensory pleasures) to get a birth in a *Brahma* realm. If one can attain a *jhāna*, that means one has at least temporarily suppressed (during this lifetime) attachment to sensory pleasures, especially desire for sex.
- That is why it is tough for most people to attain *jhāna*.

Easy to Describe and Hard to Imagine Life in the Two *Brahma Loka*

4. Those *Brahmā* do not need “solid, dense bodies” like ours since they have overcome the desire for physical touch, taste, and smell. Solid, dense bodies are required for those three sensory contacts.

- *Rūpāvacara Brahmā* still have cravings for seeing and listening. But those two functions can be achieved without dense bodies and just with the two corresponding *pasāda rūpa*. A *pasāda rūpa* is a *suddhaṭṭhaka* that is “energized” by *kammic* energy. A *rūpāvacara Brahma* also has *hadaya vatthu* (seat of mind), another “energized” *suddhaṭṭhaka*.
- Those living-beings in the highest *loka*, the *arūpāvacara Brahma loka*, have only the mind. They have given up the desire to see and hear as well. Thus, they just have *hadaya vatthu*, just a single *suddhaṭṭhaka*!
- It is not easy for an average human to even imagine such lifeforms. Only a Buddha can discover such details about the “wider world of 31 realms.”
- Anyway, the point is that it is much easier to explain the lifeforms in the highest 20 realms. Furthermore, they mainly experience *jhānic* pleasures. Therefore, even sensory experience is easy to explain. That was briefly discussed in the previous post, “[Kamma and Paticca Samuppāda – Introduction.](#)”

Eleven Realms in *Kāma Loka* Are Very Complex – Simplest Are the *Deva* Realms

5. Compared to the higher-lying 20 *Brahma* realms, life in the 11 realms in *kāma loka* is very complex.

- The 6 *Deva* realms in the *kāma loka* are the simplest. They have *opapātika* births (instantaneous births) without a “growth stage” like ours. Even though they have all five physical senses, their “physical bodies” are much less dense, almost like the *gandhabbā*.

- As we have discussed, a *gandhabba* is born with a mental body that is similar to a *Brahma*. That means just with a *hadaya vatthu* and a set of *pasāda rūpa*. Then that *gandhabba* can absorb aroma (scents) and become a bit denser, but still cannot be seen by average humans. See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).” A *Deva* is similar to a *gandhabba* that has a “bit more dense body” than just the mental body.
- *Devā* enjoy sensory pleasures and do not experience significant bodily ailments or diseases. Thus, the main difference between them and *Brahmā* is while *Brahmā* enjoy *jhānic* pleasures, *Devā* enjoy sensual pleasures or *kāma assāda*.

Complexity Starts at the Human Realm

6. As we know, suffering is the highest in the lowest four realms including the animal realm.

- Therefore, the human realm is unique. Some humans enjoy life, almost like some *Devā*, without even any health problems. Then are others who suffer almost like some animals due to either financial or health issues. Furthermore, a human could cultivate *jhāna* and enjoy *jhānic* pleasures like *Brahmā*.
- *Brahmā* and *Devā* are content with their sensual or *jhānic* pleasures. It is mostly those who had attained *magga phala* as humans who are interested in following the Path. On the other hand, those in the *apāyā* do not have the mental capacity even to comprehend Dhamma.
- That is why the human realm is the best-suited to follow the Noble Path. Humans can comprehend Dhamma. Furthermore, other than a relatively few, they do experience enough suffering to be motivated to think about the problem of suffering.
- In this and a few upcoming posts, we will focus more on the reasons for living-beings to be born in all these different realms. That will help us understand the critical principles of *Paṭicca Samuppāda*.

Overview of the Three Lokā

7. We know that causes are not ENOUGH to bring rebirths in respective realms, as discussed in the previous post, “[Kamma and Paṭicca Samuppāda – Introduction](#).” But causes are NECESSARY to bring rebirth in a given realm. Without a cause, there cannot be a rebirth in a given realm.

- As discussed in that post, one MUST cultivate a *jhāna* to get rebirth in a *Brahma* realm. A *rūpāvacara jhāna* leads to rebirth in one of 16 realms in the *rūpāvacara Brahma* realms (in *rūpa loka*). An *arūpāvacara jhāna* will lead to rebirth in an *arūpāvacara Brahma* realm (in *arūpa loka*).
- **Of the three types of loka, kāma loka is the “default loka” for living beings.** Living beings have cravings for sensory pleasures (*kāma assāda*), and that is *kāma rāga*. One who has very strong *kāma rāga*, and is willing to do immoral deeds to enjoy them, has *lobha*.
- Those with *lobha* also have a higher version of *paṭigha*, and that is *dosa*. One acting with *lobha/dosa* can do immoral deeds (*pāpa kamma*) and make *kamma bīja* suitable to bring rebirths in the *apāyā* (four lowest realms in *kāma loka*).
- To summarize, *lobha/dosa* are strong versions of *kāma rāga/paṭigha*; see, “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā](#).”
- Those with *kāma rāga/paṭigha* are capable of engaging in moral actions (*puñña kamma*.) Such *puñña kamma* are the causes to bring “good rebirths” in the human realm or the six *Deva* realms.
- The bottom line is that living-beings in *kāma loka* have strong cravings for sensual pleasures (*kāma rāga*.) Until those cravings are removed, it is not possible to overcome rebirths in *kāma loka*.
- As we know, even a *Sotāpanna* has *kāma rāga*. Only an *Anāgāmi* has removed *kāma rāga*.

Craving for Sensory Pleasures Is the Root of Most Suffering

8. From the above discussion, it should be clear that suffering in the rebirth process can be attributed to the innate tendency of living-beings to crave sensual pleasures (i.e., to have *kāma rāga*.)

- When they do immoral deeds (*pāpa kamma*) in their pursuit of sensual pleasures, they build-up *kammic* energies (*kamma bīja*) to bring about rebirths in the *apāyā*.
- Even those who just enjoy sensual pleasures (without doing immoral deeds like killing, stealing, sexual misconduct, etc) they cannot “escape” the realms in the *kāma loka*. This is clear in the “*taṇhā paccayā upādāna*” and “*upādāna paccayā bhava*” steps in *Paṭicca Samuppāda*.
- In order to overcome or transcend the *kāma loka*, one MUST lose the cravings for sensual pleasures or *kāma assāda*. I will try to use the term “*kāma assāda*” in the future since it relates directly to *kāma loka*. Here “*assāda*” means “pleasures” and thus *kāma assāda* are sensual pleasures (taste, smell, and touches including sex.)

Dangers in *Kāma Assāda*

9. What we discussed above is an essential teaching of the Buddha that is hidden these days. **The Buddha described “*kāma assāda*” or just “*kāma*” to be very dangerous.**

- [*Bhaya Sutta \(AN 6.23\)*](#) says: “ ‘*Bhayan*’*ti*, bhikkhave, *kāmānametaṃ adhivacanaṃ*; ‘*dukkhan*’*ti*, bhikkhave, *kāmānametaṃ adhivacanaṃ*; ‘*rogo*’*ti*, bhikkhave, *kāmānametaṃ adhivacanaṃ*;...” OR “ ‘**Danger**’, ‘**suffering**’, ‘**disease**’,...are terms for **sensual pleasures**.”
- [*Bhaya Sutta \(AN 8.56\)*](#) says, “ ‘danger’ is a term for sensual pleasures. ‘Suffering’, ‘disease’, ‘infected wound’, ‘pierced by spear’, etc. are terms for sensual pleasures. And why is ‘danger’ a term for sensual pleasures? Someone who is caught up in sensual greed and shackled by lustful desire is not freed from dangers in the present life or in lives to come. That is why ‘danger’ is a term for sensual pleasures..”
- See the English translations there for more details.
- There are many *suttā* that emphasize the hidden dangers in *kāma assāda* or *kāma rāga*. For example, [*Mahādukkhakkhandha Sutta \(MN 13\)*](#), [*Cūladukkhakkhandha Sutta \(MN 14\)*](#), [*Cūladhammasamādāna Sutta \(MN 45\)*](#), and many others discuss the *ādīnava* or “bad and dangerous consequences of indulging in sensual pleasures, i.e., dangers of *kāma assāda*.”
- I have given the links to the Pāli versions of those *suttā* at Sutta Central. One can access translations to several languages, including English, by clicking on the “down arrow” above the name of the *sutta*.

10. We will make the connection of various types of rebirths to *saṅkhāra* and *Paṭicca Samuppāda* in the next post.

- More on *assāda* and *ādīnava* at, “[Assāda, Ādīnava, Nissarana](#).”
- All posts in this series at, “[Origin of Life](#).”

April 11, 2020

Gati (Habits/Character) is a key concept

1. *Gati* (Habits/Character) is a key concept that has been hidden for hundreds of years, just like the true meanings of *anicca* and *anatta*. I just did a search for the keyword “*gati*” on *Tipiṭaka* at the Sutta Central and came up with “[WebLink: suttacentral: 515 results of search for gati](#).” At the end of the post, I will discuss one *sutta* as an example, which describes how one with “crooked *gati*” is a candidate to be “reborn crooked.”

- Any given person thinks, speaks, and acts based on his/her views. If started with wrong views, one tends to go in the wrong direction. That is why *Sammā Diṭṭhi* or “correct views” comes first in the Noble Eightfold Path.

- *Avijjā* and *micchā diṭṭhi* go together. See, for example, “[WebLink: suttacentral: Avijjā Sutta \(SN 45.1\)](#).”
- Any person will have a certain set of *gati* at a given time, based on *avijjā* and *micchā diṭṭhi* at that time. As one makes progress on the path, *avijjā* and *micchā diṭṭhi* will be reduced and one’s bad *gati* will be reduced too.
- *Gati* is a common Sinhala word with the same meaning as in Pāli, so it would be easier for a Sinhala-speaking person to understand this post (ගනි. “ඉලු ගනි” කිව්වෙහෙට්තමිඉලු උපතක් ලබන්න පුළුවනි.)
- The Buddha explained that if one cultivates “dog *gati*” that could lead to rebirth as a dog in the “[Kukkuravatika Sutta \(Majjhima Nikaya 57\) – Kammakkhaya](#).”
- An introduction to *gati* at, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#).” Further information at, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”
- It is also important to know the difference between standard English and “*Tipitaka* English.” See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”

Five Main Types of *Gati*

2. The Buddha explained that there are five main types of *gati*. The [WebLink: suttacentral: Gati Sutta \(AN 9.68\)](#): “*Pañcimā, bhikkhave, gatiyo. Katamā pañca? Nirayo, tiracchānayoṇi, pettivisayo, manussā, devā—imā kho, bhikkhave, pañca gatiyo. Imāsaṃ kho, bhikkhave, pañcannaṃ gatīnaṃ pahānāya ... pe ... ime cattāro satipaṭṭhānā bhāvetabbā*”ti.”

Translated: “*Bhikkhus*, there are five character qualities (*gati*). What five? (Those belonging to) hell, the animal realm, the ghost realm, humans (*manussā*), and *Devā*. To eliminate those five types of *gati*, you should cultivate *Satipaṭṭhānā*.”

- In the [WebLink: suttacentral: Saṅgīti Sutta \(DN 33\)](#): “*Pañca gatiyo—nirayo, tiracchānayoṇi, pettivisayo, manussā, devā*.”
- By the way, *Saṅgīti Sutta* provides definitions of many key Pāli words.
- It is to be noted that all six *Deva* and 26 *Brahma* realms are included in the *Deva* category in many *suttā*, including the *Dhammacakkappavattana Sutta*. See #7 of, “[Dhammacakkappavattana Sutta – Introduction](#).”

3. In many English translations, the Pāli word “*gati*” is mistranslated as “destination.” But the correct translation is “habits/character” as explained in detail in the links in #1 and also at #8 below. We can also see that in other *suttā*, for example, in the *Mahāparinibbāna Sutta* (DN 16.)

- In the [WebLink: suttacentral: 9. Anāvattidhammasambodhiparāyana \(DN 16\)](#) section of *Mahāparinibbāna Sutta*, Venerable Ānanda asks the Buddha about several people who had recently died: “*sālho nāma, bhante, bhikkhu nātike kālaṅkato, tassa kā gati, ko abhisamparāyo?*” OR “the monk named Sālha has passed away in Nāḍika. What is his *gati* (that led to the new birth) and **where has he been reborn?**”
- However, it is true that one with “bad *gati*” (or *dugati*), for example, will have a “bad destination” (or *duggati*.) Similarly, one with “good *gati*” (or *sugati*), will have a “good destination” (or *sugati*.) Note the subtle difference in *dugati* and *duggati*, whereas the same word “*sugati*” is used for both “*gati*” and “destination.”
- Now, let us look at the connections between *gati*, *saṅkhāra*, and rebirths in various realms.

Connection to *Paṭicca Samuppāda*

4. As we know, *Paṭicca Samuppāda* dictates future existences (*bhava*) and births (*jāti*.) One generates (*abhi*)*saṅkhāra* due to *avijjā* and engages in three types of *abhisāṅkhāra*. This was discussed in detail in

the posts, "[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)" and "[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#)." It is essential to understand those posts.

- As explained there, those three types of *abhisāṅkhāra* are, *Puññābhisāṅkhāra* (*puñña abhisāṅkhāra*), *apuññābhisāṅkhāra* (*apuñña abhisāṅkhāra*), and *āneñjābhisāṅkhāra* (*āneñja abhisāṅkhāra*).
- Those lead to various types of rebirths, per *Paṭicca Samuppāda*.

5. We can understand the connection between those three types of *abhisāṅkhāra* and the five types of *gati*, in simple terms, as follows.

- *Apuñña abhisāṅkhāra* (in the mind) lead to the ten types of *akusala kamma* and thus lead to rebirths in the *apāyā*. In other words, such *kamma* committed by those with *niraya*, *tiracchāna*, and *peta gati*.
- On the other hand, one with *manussa* or *deva gati* does *puñña kamma* with *puñña abhisāṅkhāra*. They lead to rebirths in the human, *Deva*, and the 16 *rūpāvacara Brahma* realms. It is to be noted that cultivation of the four lower *jhāna* falls under *puñña abhisāṅkhāra*.
- *Āneñja abhisāṅkhāra* are cultivated while practicing the highest four *jhānā* leading to rebirths in the four *arūpāvacara Brahma* realms. It is interesting to note that “*āneñja*” means “un-dying” and thus “permanent.” Ancient *yogis* (including Ājāra Kālāma and Uddaka Rāmaputta) thought these realms have infinite lifetimes and equated rebirths there to the cessation of the rebirth process. Of course, the Buddha found out that those also have finite lifetimes, even though extremely long, lasting eons (billions of years).
- Also see, "[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#)" and #14 of "[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#)"

Good Realms Are *Sugati* and Bad Realms Are *Duggati*

6. There are several *suttā* that discuss various types of behaviors that lead to good and bad rebirths. Those with “good *gati*” tend to reborn in “realms with good *gati*” or “*sugati*” (“*sukha*” + “*gati*.”) On the other hand, those with “bad *gati*” tend to reborn in “realms with bad *gati*” or “*duggati*” (“*dukkha*” + “*gati*.”)

- For example, see, "[WebLink: suttacentral: Dukkha Sutta \(AN 5.3\)](#),” “[WebLink: suttacentral: Dukkha Sutta \(AN 6.75\)](#),”

7. The last verse of the “[WebLink: suttacentral: Vīṇopama Sutta \(SN 35.246\)](#)” is informative: “*Evameva kho, bhikkhave, bhikkhu rūpaṃ samanvesati yāvatā rūpassa gati, vedanaṃ samanvesati yāvatā vedanāya gati, saññaṃ samanvesati yāvatā saññāya gati, saṅkhāre samanvesati yāvatā saṅkhārānaṃ gati, viññānaṃ samanvesati yāvatā viññānaṃ gati. Tassa rūpaṃ samanvesato yāvatā rūpassa gati, vedanaṃ samanvesato ... pe ... saññaṃ ... saṅkhāre ... viññānaṃ samanvesato yāvatā viññānaṃ gati. Yampissa taṃ hoti ahanti vā mamanti vā asmīti vā tampi tassa na hotī”ti.*”

Translated: “So too, *bhikkhus*, a *bhikkhu* investigates a *rūpa* to see the connection to *gati* in that *rūpa*, he investigates feelings to see the connection to *gati* in those feelings, he investigates a perception to see the connection to *gati* in that perception, he investigates *saṅkhāra* to see the connection to *gati* in that *saṅkhāra*, he investigates *viññāna* to see the connection to *gati* in that *viññāna*. Through those investigations, whatever notions of ‘I’ or ‘mine’ or ‘I am’ had occurred to him before no longer occur to him.”

- The Buddha described a living being as a “collection” of the five aggregates: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāna*. A living-being, in any of the 31 realms, arises due to a certain *paṭisandhi viññāna* cultivated with a certain *gati*.
- What this deep *sutta* is saying that when one understands the *Paṭicca Samuppāda* process, one would be able to “see” how various types of *gati* lead to **corresponding rebirths**.

- Now we will discuss the [WebLink: suttacentral: Samsappanīya Sutta \(AN 10.216\)](#) which explains how a human can be reborn a “creeping creature” like a snake. [*sappana* :[nt.] crawling. *saṃsappi* : [aor. of saṃsappati] crept along; crawled; moved slowly.]

Samsappanīya Sutta (AN 10.216)

8. In this sutta, the Buddha has explained that one who engages in *dasa akusala* has “**bad gati**” or “*dugati*” or “crooked/bad character.” Such people are eligible for rebirth in “bad realms” or “**duggati**.”

- Similarly, one who abstains from *dasa akusala* has “**good gati**” or “*sugati*” or “straight/good character.” Such people are eligible for rebirth in “good realms” or “**sugati**.”

I am going to skip some standard verses and translate (explain) the critical verses to provide the essence.

- “*Bhikkhus*, I will explain to you how creeping, crooked creatures like snakes are born in this world.”

“Crooked *Kamma*” Done With “Crooked *Gati*” Lead to “Crooked Births”

9. “And what, *bhikkhus*, is that explanation of the Dhamma on creeping creatures? *Bhikkhus*, living-beings are the owners of their *kamma*, the heirs of their *kamma*. **They have *kamma* as their origin, *kamma* as their bondage, bound to their *kamma*.** Whatever *kamma* they do, good or bad, they will inherit the corresponding *vipāka*.

- In the following, the numbers refer to each of the *dasa akusala*.

(1) “Consider **someone who destroys life**. He is murderous, bloody-handed, given to blows and violence, merciless to living beings. He is crooked in bodily actions, speech, and thoughts. His bodily *kamma*, verbal *kamma*, mental *kamma* are all crooked. His ***gati* is crooked and his rebirth is crooked (*ḥimhā gati*, *ḥimhupapatti***, where “*ḥimhā*” is “crooked” and “*ḥimhupapatti*” is “*ḥimhā*” + “*upapatti*”).

- For one with a crooked *gati* and rebirth, I say, there is one of two destinations: either the exclusively painful hells or a species of creeping animal. And what are the species of creeping animals? The snake, the scorpion, the centipede, the mongoose, the cat, the mouse, and the owl, or any other animals that creep away when they see people.
- **Thus a being is reborn from a being, meaning one is reborn through one’s deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

(2) “Similarly, someone takes what is not given ... (3) ... engages in sexual misconduct ... (4) ... speaks falsehood ... (5) ... speaks divisively ... (6) ... speaks harshly ... (7) ... indulges in idle chatter ... (8) ... is full of greed ... (9) ... has a mind of ill will and intentions of hate ... (10) ... holds the ten types of *micchā diṭṭhi*. He creeps along by body, speech, and mind. His bodily *kamma* is crooked ... His *gati* crooked and his rebirth is crooked....

- **Thus a being is reborn from a being, meaning one is reborn through one’s deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

“Straight *Kamma*” Done With “Straight/Honest *Gati*” Lead to “Good Births”

10. “*Bhikkhus*, beings are the owners of their *kamma*, the heirs of their *kamma*. They have *kamma* as their origin, *kamma* as their relative, *kamma* as their resort. Whatever *kamma* they do, good or bad, they are its heirs.

(1) “Consider someone **who has abandoned the destruction of life**. With the weapons laid aside, conscientious and kindly, he dwells compassionate toward all living beings. He does not engage in crooked bodily actions, speech, and thoughts. His bodily *kamma*, verbal *kamma*, mental *kamma* are all straight. His *gati* are straight and his rebirth is straight (good.)

- For one with a straight *gati* and rebirth, I say, there is straight *gati* (***uju gati***; where “*uju*” means “straight”) and births (***ujupapatti***). They have rebirths in either pleasurable heavens or eminent families, such as those of affluent householders, families that are rich, with great wealth and property, abundant gold and silver, abundant treasures and belongings, abundant wealth and grain.
- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

(2) “Having abandoned the taking of what is not given, someone abstains from taking what is not given ... (3) ... abstains from sexual misconduct ... (4) ... abstains from false speech ... (5) ... abstains from divisive speech ... (6) ... abstains from harsh speech ... (7) ... abstains from idle chatter ... (8) ... is without longing ... (9) ... is of goodwill ... (10) ... holds correct views. He does not creep along by body, speech, and mind. His bodily *kamma* is straight ... His *gati* are straight and his rebirth is straight....

- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

“*Bhikkhus*, beings are the owners of their *kamma*, the heirs of their *kamma*. They have *kamma* as their origin, *kamma* as their relative, *kamma* as their resort; whatever *kamma* they do, good or bad, they are its heirs.

11. Again, it is necessary to understand the posts, “[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

5.2.8.5 Wider Worldview of the Buddha

[The Framework of Buddha Dhamma](#)

[The Suffering \(Dukkha\) in the First Noble Truth](#)

[Dangers of Ten Types of Wrong Views and Four Possible Paths](#)

[Sammā Ditthī – Only One Leads to the Noble Path](#)

[Fear of Nibbāna \(Enlightenment\)](#)

5.2.8.5 The Framework of Buddha Dhamma

.1

February 22, 2020; revised February 25, 2020

Introduction

The framework of Buddha Dhamma identifies the critical foundation upon which Buddha's teachings can be understood.

1. We have finished the section on “[Worldview of the Buddha](#).” There we discussed Buddha's analysis of sensory events, i.e., how we experience the external world. However, we have not addressed the “real nature” of that external world.

- With this post, I will be starting a new section on the “Wider Worldview of the Buddha.” This section describes a world that includes 29 more realms than the two that we are familiar with, i.e., human and

animal realms. The Buddha explained how any living being keeps moving from one realm to another in the rebirth process that has no discernible beginning (and no end until attaining *Nibbāna*.)

- The First Noble Truth on suffering is NOT about the suffering that we feel due to diseases, bodily pains, etc. **even though that is a tiny fraction.** It is about the much worse possible suffering in future lives, where most suffering will be in “undesirable realms.”
- To understand the “suffering” that the Buddha said we could stop, it is essential to understand that “wider worldview.”
- The Buddha laid out the critical components of that framework in the first two discourses that he delivered. In the word-by-word translations of the *sutta*, this “wider worldview” of the Buddha is just glossed over. No one seems to pay much attention to these key concepts, without which there is no point in doing further analysis. It is like trying to learn calculus without learning addition/subtraction first.

The First Two Discourses of the Buddha

2. *Dhammacakkappavattana Sutta* (SN 56.11) was the first discourse delivered by the Buddha. The five ascetics Koṇḍañña, Bhaddiya, Vappa, Mahānāma, and Assaji, listened to it several days after the Buddha attained Enlightenment (*Buddhahood*.) All five ascetics reached the *Sotāpanna* stage after several days of explaining by the Buddha.

- Then with the delivery of the second *sutta*, [WebLink: suttacentral: Anattalakkhana Sutta \(SN 22.59\)](#), all five ascetics attained the *Arahanthood*.
- Later on, Ven. Sariputta delivered the [WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#) to a gathering of *bhikkhus* to explain further details of the *Dhammacakkappavattana Sutta*.
- Therefore, a good understanding of Buddha Dhamma is possible with a discussion of those three *suttā*.

The Framework of Buddha Dhamma

3. *Dhammacakkappavattana Sutta* has most of the essential concepts, even though it is in a highly condensed form.

In the document, [WebLink: pdf download: Dhammacakkappavattana Sutta – Printout](#), I have divided the *sutta* to 14 sections, You may want to download and print for reference. We will discuss that document first. It has the framework of Buddha Dhamma.

- The name of the *sutta* comes from the combination of three terms: *Dhamma*, *Cakka*, and *Pavattana*. *Dhamma* here means the Buddha Dhamma or the true nature of existence. *Cakka* means “wheel.” *Pavattana* means to “set in motion” AND to “maintain.”
- Therefore, this first *sutta* “gets the Wheel of Dhamma in Motion.” **It has all the critical concepts of Buddha Dhamma.**
- As in many Pāli terms, the word “*dhammacakkappavattana*” comes from the combination of three above words, with an additional “p” just before *pavattana*. As we discussed before, *pañcakkhandha* is the combination of *pañca* with *khandha* with an extra k in tying up the two words.
- Sometimes the *sutta* referred to as the *Dhamma Cakka Pavattana Sutta* without combining those three words.
- Let us go through the *sutta* from the beginning. I will refer to sections #1 through #14 in the document above. We will first go through the main ideas without going to detail.

The “Middle Path” Recommended by the Buddha – Sections 1 and 2

4. Section #1 can be summarized as follows. “*Bhikkhus*, two extremes should not be followed by you. What two? The pursuit of sensual pleasures, which is low, vulgar, the way of the average ignorant person. The

other is the pursuit of rituals that involve subjecting one to extreme hardships. Without veering towards either of these extremes, the *Tathāgata* followed the middle way of living a simple life leading to *Nibbāna*.”

- That middle path is the Noble Eightfold Path of *Sammā Diṭṭhi*, *Sammā Saṅkappa*, *Sammā Vācā*, *Sammā Kammanta*, *Sammā Ājīva*, *Sammā Vāyāma*, *Sammā Sati*, and, *Sammā Samādhi*.

Four Noble Truths – Section 3

5. **The First Noble Truth of suffering:** Birth is suffering, aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering. **Not to get what one wants (*icchā*)** is suffering. In brief, clinging (*upādāna*) to the five aggregates is suffering.

- **The Second Noble Truth of the origin of suffering:** It is this *taṇhā* which leads to repeated rebirths. That *taṇhā* is three-fold: *kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*.
- **The Third Noble Truth of the cessation of suffering:** It is the remainderless fading away and cessation of the three types of *taṇhā*.
- **The Fourth Noble Truth of the way to the cessation of suffering:** It is the Noble Eightfold Path or the Middle Path of *Sammā Diṭṭhi*, *Sammā Saṅkappa*, *Sammā Vācā*, *Sammā Kammanta*, *Sammā Ājīva*, *Sammā Vāyāma*, *Sammā Sati*, and, *Sammā Samādhi*.

The Previously Unheard Dhamma (Teaching) of Suffering in The Wider World – Sections 4 – 7

6. Sections 4 through 7 state how the Buddha attained the *Buddhahood* via comprehending — through *Paticca Samuppāda* — the *tiparivaṭṭaya* (**three ramparts or walls of bondage to this world**) that has **never been known to the world** (except during the times of previous Buddhā): “.*pubbe ananussutesu dhammesu..*”

- We will discuss Sections 4 through 7 in more detail later. Right now, we are taking a quick look at the framework of Buddha Dhamma outlined in the *sutta*.
- However, it is essential to discuss the verse, “.*pubbe ananussutesu dhammesu cakkhuṃ udapādi, ñāṇaṃ udapādi, paññā udapādi, vijjā udapādi, āloko udapādi,*” that appears 12 times in the Sections 4 through 7. It is critical to understand this verse.

7. When the Buddha attained the *Buddhahood* via comprehending this Dhamma that has never been known to the world, five unique pieces of knowledge arose in him at that moment: *cakkhu*, *ñāṇa*, *paññā*, *vijjā*, and *āloka*.

- Here “*cakkhu*” is the “Dhamma eye,” the ability to “see” the true nature of this world. We can loosely translate *ñāṇa* and *paññā* as “knowledge” and “wisdom.”
- The next one is “*vijjā*” (the Sanskrit word is “*vidyā*”). That is the “ultimate science” about the world, what I called the “[The Grand Unified Theory of Dhamma](#).” “A Buddha Is the greatest scientist that comes to the world very infrequently.
- Simultaneously with the comprehension of *vijjā*, one is removed from “this material world” or “*āloka*” (“*ā*” + “*loka*”). The word “*āloka*” has other meanings, including “light,” which we will discuss later.

Three “Rounds” or Bondage to Overcome – Section 8

8. “*Tiparivaṭṭa*” means the **three rounds** of bondage. One may visualize a living-being trapped inside the inner wall, a prison with three concentric walls or ramparts. To be freed (i.e., to get to *Nibbāna*,) all three barriers must be overcome. The 31 realms of this world (discussed below) divide into three sections with those three walls.

- **The first** is to be released from the *apāyā* (four lowest realms), via the *Sotāpanna* stage, by removing the wrong views about existence in the 31 realms. **This requires the first stage of *Sammā Diṭṭhi* or grasping the framework of Buddha Dhamma that we are discussing now.**
- In the **second round**, one overcomes the *kāma loka* (realms 5 through 11, which include the human realm and 6 *Deva* realms). That happens via two stages. A *Sakadāgāmi* will not be reborn with bodies subjected to diseases. Thus there will be no more rebirths for a *Sakadāgāmi* in the five lowest realms (*apāyā* and the human realm.) Then, at the *Anāgāmi* stage, *kāma rāga* and *paṭigha* go away, and one is released from births anywhere in the *kāma loka*. That means complete cessation of *kāma taṇhā*.
- In the **third round**, any linkage to anywhere in the 31 realms removed. The mind becomes free of attachment to any trace of matter, and the *Arahant* stage attained. See, “[What Are Rūpa? \(Relation to Nibbāna\)](#).” That is complete cessation of *bhava taṇhā* and *vibhava taṇhā*.

The Result of *Arahanthood (Parinibbāna)* Is No More Rebirths – Section 9

9. The rebirth process among the 31 realms in this world is a crucial concept to understand. More details in #13 below. The “suffering” in the First Noble Truth is the harsh levels of suffering in the four lowest realms (*apāyā*.) **Even if one spends millions of years in a *Deva* realm, that “pleasurable time” is insignificant because one will spend much more time in the *apāyā* in the LONG RUN.**

- We will discuss that in detail, with *Tipiṭaka* references, as we proceed. But here I want to point out that the verse, “*Ñāṇaṅca pana me dassanaṃ udapādi: ‘akuppā me vimutti, ayamantimā jāti, natthi dāni punabbhavo’*” *ti*.
- There, *ayamantimā* is “*ayam antima*,” where “*ayam*” is “this” and “*antima*” means “last”), and *punabbhavo* is “*puna bhava*,” where “*puna*” is “repeated,” and “*bhava*” is “existence in THIS WORLD.”
- Thus, the above verse means: “The knowledge and vision arose in me: ‘Unshakable is the liberation of my mind. **This is my last birth. There will be no more rebirths for me.**’”
- Upon *Parinibbāna*, one is no longer born anywhere in the 31 realms of THIS WORLD. One is free of any future suffering.

Venerable Koṇḍañña Attains The *Sotāpanna* Stage – Section 10 and 14

10. At the end of the discourse, Venerable Koṇḍañña attained the *Sotāpanna* stage of *Nibbāna*. Venerable Koṇḍañña understood the essence of the “framework of Buddha Dhamma”: “*yaṃ kiñci samudaya dhammaṃ sabbaṃ taṃ nirodha dhamman*” *ti*.

- That verse means: “Whatever *dhammā* that give rise to things in this world are subject to cessation.” **Therefore, it is possible to stop any existence in this world from arising.**”
- We all have gone through innumerable lives filled with suffering in the rebirth process because we never understood how to stop future lives from arising. **Of course, until a Buddha is born in the world, humans are NOT AWARE of the existence of the other 29 realms, including the four lowest realms (*apāyā*) filled with suffering.**
- Many of you must be wondering WHY would one ever want to stop future lives! That is an important issue that we will discuss in the next post.
- That involves the rebirth process in the “wider world of 31 realms” that only a Buddha can “see” upon Enlightenment. That is the “*..pubbe ananussutesu dhammesu..*” or “**previously unknown nature of this world**” that we discussed in #6 above.

11. At the end of the *sutta* (in Section 13), it says that the Buddha saw that Ven. Koṇḍañña has attained the *Sotāpanna* stage and declared: “Koṇḍañña has understood! Koṇḍañña has indeed understood!”

- That is how Venerable Koṇḍañña acquired the name “*Añña* Koṇḍañña—Koṇḍañña Who Has Understood.”

The Wheel of the Dhamma Set in Motion – Section 11 and 12

12. With the Wheel of the Dhamma set in motion by the Blessed One, the earth-dwelling *devā* (*bhummā devā*) belonging to the *cātumahārājikā devā* realm raised a cry. “At Baraṇasi, in the Deer Park at Isipatana, the **Wheel of the Dhamma has been set in motion** by the Blessed One. It cannot be stopped by any ascetic or brahmin or *Deva* or *Māra* or *Brahma* or by anyone in the world.”

- **That Wheel of the Dhamma is still in motion.** It is supposed to be in effect for roughly 2500 more years for a total of 5000 years.
- Those *bhummā devā* are part of the *Cātumahārājika Deva* realm but reside among humans (even though we cannot see them). They first became aware of the *desanā* and notified their higher-lying main realm with their cries.
- *Devā* of the higher-lying *cātumahārājikā devā* realm then repeated that cry which then progressively transmitted to the other *Deva* realms lying further away from the Earth.

The 31 Realms of Existence – Section 13

13. Section 13 is long and takes a significant part of the *sutta*. That section names the 6 *Deva* realms and 15 out of 16 *rūpi Brahma* realms. See the document, [WebLink: pdf download: Dhammacakkappavattana Sutta – Printout](#). Most of this section missing in many published versions of the *sutta*, including that at Sutta Central. However, this section is essential for a couple of reasons.

- First, it clearly shows that the Buddha indeed described a “wider world” than experienced by us, consisting of 31 realms; see, “[The Grand Unified Theory of Dhamma](#)” and “[31 Realms of Existence](#).”
- Second, it says that many *Devā/Brahmā* from those realms listened to the *desanā*. Starting from the 6 *Deva* realms, it lists 15 *rūpi Brahma* realms (except the *asañña* realms, where beings have only a physical body and thus cannot listen to a *desanā*). Numerous *Devā* and *Brahmā* attained various stages of *Nibbāna*.
- Note that the Buddha discussed the contents of the *sutta* in detail with the five ascetics overnight, until Ven. Koṇḍañña reached the *Sotāpanna* stage. It took further discussions over several days before all five reached the *Sotāpanna* stage. Delivery of the second *sutta*, *Anattalakkhaṇa Sutta* (SN 22.59), took place after that.

14. Section 13 lists how the news progressively propagated to higher-lying realms, and eventually, *Devā* from all those 21 realms came to listen to the *desanā*.

- As you can see those realms match the names listed in the following post: “[31 Realms of Existence](#)” and “[31 Realms Associated with the Earth](#).”
- Note that all of those realms referred to as *Deva* realms in the *sutta*, regardless of whether they belong to the 6 *Deva* realms or the *rūpi Brahma* realms.
- Of course, only five humans (the five ascetics) were present. Any living-being in the lowest four realms cannot comprehend Dhamma. Also, *Brahmā* in the four *arūpi* realms do not have ears to listen to. Thus section 13 lists 21 realms. Not listed are the four lowest realms, the *asañña* realm, and the four *arūpi Brahma* realms. Many other *suttā* mention those other realms.

We will discuss the details of this “framework of Buddha Dhamma” in upcoming posts.

5.2.8.5 The Suffering (Dukkha) in the First Noble Truth .2

February 29, 2020

Introduction

1. In the previous post, “[The Framework of Buddha Dhamma](#)” we discussed the framework of Buddha Dhamma as laid out by the Buddha in the *Dhammacakkappavattana Sutta* (SN 56.11.) That is the “view from the 30,000 feet.”

- The “30,000-foot view” is a common phrase that describes getting to a high enough level to see the “big picture.” The next time you are in a commercial airplane and cruising around 30,000 feet, take a look out the window and note what you see—some clouds, large swaths of land, maybe a mountain range. The reality is you’re too high up to see much of anything with any precision.
- Take a helicopter-ride between 500 to 1,000 feet, and you’ll be able to recognize what you’re looking at, with the benefit of seeing it from a new, higher perspective.
- Starting with this post, we will take a “1000-foot view” of the Buddha Dhamma by getting into a bit more detail, specifically on the First Noble Truth.
- First of all, we need to figure out “the suffering” that the Buddha wanted us to understand.
- By the way, I have discussed these ideas previously over the past five years. However, the website now has over 500 posts. Therefore, this series of posts is an excellent way to present a systematic approach. I will refer to existing posts as needed. Please make sure to read them.

What Is the “Previous Unheard” Suffering (*Dukkha*)?

2. In #6 and #7 of the previous post, we mentioned that the verse, “*.pubbe ananussutesu dhammesu cakkhuṃ udapādi, ñāṇaṃ udapādi, paññā udapādi, vijjā udapādi, āloko udapādi,*” that appears **12 times** in the Sections 4 through 7 of the *sutta*. See, [WebLink: pdf download: Dhammacakkappavattana Sutta – Printout](#).

- The word “*ananussutesu*” comes from “*na*” + “*anussuta*” or “not heard.” *Pubbe* means “previous,” and thus “*.pubbe ananussutesu dhammesu..*” means a **Dhamma (teaching) that has never been known to the world** (except during the times of previous Buddhā.)
- The First Noble Truth is “*Dukkha Sacca*” so it should state “the previously unheard suffering.” That is in Section 3 of the printout and #5 of the previous post. Remember that “*sacca*” is pronounced as “sachcha.” See the two posts on “*Tipitaka English*” at “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”
- **The First Noble Truth of suffering: Birth is suffering, aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering. Not to get what one wants (*icchā*) is suffering. In brief, clinging (*upādāna*) to the five aggregates is suffering.**

First Noble Truth of suffering

3. In the above statement on the **First Noble Truth of suffering**, I have highlighted **in blue the “previously unheard parts.”**

- Anyone knows that “aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering.”

- Anyone would also agree that “**Not to get what one wants (*icchā*) is suffering.**” But it has more profound implications that an average human would not contemplate. One needs to know the “broader worldview” to see those more profound implications, as we will see later.
- But why did the Buddha say that “**Birth is suffering**”? Why did he state that “**In brief, clinging (*upādāna*) to the five aggregates is suffering**”?
- It is NOT correct to translate the word “*saṅkhittena*” as “in brief.” The verse, *saṅkhittena pañcupādānakkhandhā dukkhā* has a deeper meaning than “**In brief, clinging (*upādāna*) to the five aggregates is suffering**”? We will discuss that later.
- Instead, it is easier to get started with Section 8 of the printout on “*Tiparivaṭṭa*.” We discussed that briefly in #8 of the previous post. We will expand it a bit more here.

***Tiparivaṭṭa* – The Three Rounds of Bondage**

4. The word “*tiparivaṭṭa*” comes from “*ti*” for three and “*vaṭṭa*” for “round” (actually a circular wall.) A “*parivaṭṭa*” is a complete circular wall. Thus, the word *tiparivaṭṭa* provides a good visualization of a living-being trapped in the middle of prison with three concentric walls.

- Most suffering is within the first barrier or the first round. Once one overcomes the first barrier, one is free from the four lowest realms (*niraya*, *peta*, *asura*, and animal.)
- The next reduced level of suffering is in between the first and second walls, which correspond to seven realms (human and six *Deva* realms.) Suffering and happiness both present in the human realm. The six *Deva* realms have much less suffering and much higher levels of “pleasures” compared to the human realm.
- The twenty *Brahma* realms lie between the second and third “walls.” Sixteen of those are in the *rūpāvacara Brahma* realms and the other four in higher *arupāvacara Brahma* realms. There is hardly any suffering in these higher realms. Even humans, who can cultivate *jhāna*, can experience such “*jhānic* pleasures.”
- The 31 realms discussed in “[31 Realms of Existence](#)” and “[31 Realms Associated with the Earth](#).”

Much More Suffering Than Pleasures in the Rebirth Process

5. So, why don't we just do good deeds (*kamma*) and be born in a *Deva* realm and enjoy such “heavenly pleasures”? Or, cultivate *jhāna*, be born in a *Brahma* realm, and enjoy *jhānic* pleasures” for millions of years? **The problem is that such “pleasures” are very short-lived (in the rebirth process.)** The overall rebirth process subjects any living-being to much more suffering due to the following reasons.

- Any given living-being spends MUCH MORE time in the lowest four realms compared to the higher-lying realms. In particular, getting a human existence is VERY rare. See “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”
- Suffering in the lowest four realms is unbearable, as described in many *suttā*, for example, *Devaduta Sutta* (MN 130.) The animal realm is relatively better than the other three, and we can see the suffering in that realm.

Power of *Kammic* Energy

6. Birth in any realm is due to one's deeds (*kamma*.) Good deeds lead to “good births” and evil deeds to “bad births.” There is a high-level of “mental energy” (*kammic* energy) associated with strong (good or bad) *kamma*.

We can get a good idea of this “*kammic* energy” by looking at an angry person. Angry thoughts manifest as changes in the physical body. His/her face becomes distorted and unpleasant to look at. That angry person also has “pumped up” energy to strike another person or even to kill another person.

- Such “powerful thoughts” (*javana citta*) can arise while doing bad or good deeds. **They are the source of *kammic* energy that gives rise to births in different realms.**
- The lifetime in any realm depends on the strength of the corresponding *kammic* energy.
- Humans tend to do immoral deeds (*akusala kamma*) in their desire (*icchā*) to “enjoy life.” *Akusala kamma* lead to rebirths in the lowest four realms (*apāyā*.) Thus it is essential to learn about the laws of *kamma*. However, they are NOT deterministic, as we will discuss.
- A good sutta to read about rebirths in bad realms due to *dasa akusala* and also rebirths in good realms due to the avoidance of *dasa akusala* is “[WebLink: suttacentral: Pathamanirayasagga Sutta \(AN 10.211\)](#).” That link gives two English translations.
- Also, see “[Āṅguttara Nikāya – Suttā on Key Concepts](#)” where *dasa akusala* and *dasa kusala* discussed with many short *suttā*.

Wider Worldview Is Necessary to Understand the “Previously Unheard Suffering”

7. From the above, it must be clear that “suffering” in the First Noble Truth is NOT what we perceive to be suffering. Everyone KNOWS about that “mundane suffering” associated with aches and pains, diseases, injuries, etc.

- As we saw in #4 above, we need to be MOST concerned with possible future suffering in the four lowest realms (*apāyā*.) Thus, we first need to figure out how to stop rebirths in the *apāyā*. As we saw in the previous post, that is accomplished by reaching the *Sotāpanna* stage of *Nibbāna*.
- **Some people engage in “breath mediation” to alleviate their day-to-day stresses, or even to cultivate mundane *jhāna*.** Although that will give temporary relief, **that is not the “suffering” that the Buddha was concerned with.**
- To put it in a different way, the “mundane suffering” is included in *vedanā*. Specifically, it is the “*kāyika dukkha vedanā*” associated with the physical body or “*domanassa vedanā*” associated with mental stress. **Even “*jhānic* pleasures” are *vedanā* and belong to “this world” (specifically to *Brahma* realms.)**
- But one needs to “see” the “previously unheard suffering” in future rebirths (especially in the *apāyā*) with wisdom (*paññā*.) That is “*lokuttara Sammā Diṭṭhi*” needed to comprehend the First Noble Truth.

How Can We Believe This “Previously Unheard Teachings” of the Buddha?

8. This is another critical issue that we need to discuss. Many concepts discussed above are not self-evident. We have not seen first hand any harsh suffering in the *apāyā*, except for in the animal realm.

- We do that by first looking at the “preliminary material” taught by the Buddha. When we can see the self-evident truth in them, our confidence in Buddha’s teachings on things that we cannot see for ourselves will grow. That is building faith/confidence (or *saddhā*) in the Buddha and his teachings (Buddha Dhamma.)
- One needs to go through primary and secondary schools before being eligible for a college education. In the same way, one needs to learn the fundamental principles in Buddha Dhamma first.
- **Understanding the laws of *kamma*, the validity of the rebirth process and associated concepts are essential.** That is cultivating “conventional *Sammā Diṭṭhi*.”
- **Only after that one can comprehend “*lokuttara Sammā Diṭṭhi*” (and the ability to “see” the harsh sufferings in the *apāyā*.)**
- The Buddha clarified that in the *Mahā Cattārīsaka Sutta* (MN 117). I will discuss it in the next post.

Good or Bad Deeds May Bring Their Results Much Later

9. That is another CRITICAL issue. We tend to think only about “near-term results” of our actions. For example, person X may kill someone while robbing that person’s house. X may not be caught and live a luxurious life with the valuables stolen from that house.

- However, person X’s immoral deed (*kamma*) will not go unpunished by Nature. The corresponding result (*kamma vipāka*) can materialize in a future life, if not in this life. A strong bad *kamma* like killing a human can even be responsible for rebirth in one of the four lowest realms. In the same way, one who does a good *kamma* like engaging in compassionate deeds may be reborn in a *Deva* realm.
- *Kammic* consequences of either kind of action (good and bad) are stringent. Nature enforces them automatically. There is no “higher-being” reviewing one’s deeds. There is a built-in mechanism in Nature to take into account various complexities automatically. Such laws of *kamma* can be complicated, but we can get a good general idea. We will discuss them in the future.
- But most people tend to believe just what they can experience for themselves. Not believing in rebirth is a strong wrong view that, by itself, can lead to rebirth in the *apāyā*. **That is why one needs to remove the ten types of wrong views well before being able to grasp the “previously-unheard teachings” of the Buddha.**

There is No Permanently “Good” or “Bad” Person

10. No one is a “good person” or a “bad person” forever. Until one becomes at least a *Sotāpanna Anugāmi*, one’s character/habits (*gati*) can change. *Gati* (pronounced “gathi”) is a crucial Pāli word even though very few people are aware of it these days. So, that is another topic that I will be discussing in detail.

- One with “good *gati*” is likely to do more “good deeds,” and another with “bad *gati*” is likely to do more of “bad deeds.”
- However, even one with “good character” may do evil deeds if the temptation is high enough. For example, we often hear about “good people” arrested for bribery or rape charges.
- In the same way, even a person labeled as a “bad person” may do meritorious deeds under certain conditions.
- One’s family, friends, and associates play significant roles in the formation of new *gati* and getting rid of old *gati* (good or bad.)
- More details at, [“9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).”](#)

Having Wrong Views Is a Major *Akusala Kamma*

11. Any realm has a finite lifetime. One will NEVER live in a “good realm” forever or be trapped forever in a “bad realm.” **Each of us has been in most of the 31 realms, many times over.** The rebirth process has no discernible beginning. See, [“Origin of Life – There is No Traceable Origin.”](#)

- In general, good deeds (*kusala kamma*) lead to good rebirths (those in the human and higher realms.) Evil deeds (*akusala kamma*) lead to bad existences (the lowest four realms or the *apāyā*.)
- One key factor that many people are not aware of is the following. Even if one does not do any “conventional immoral deeds,” **just having wrong views about the world is one of the *dasa akusala*.** See [“Ten Immoral Actions \(Dasa Akusala\).”](#)
- Most people consider immoral deeds to be only “bad bodily deeds” (killing, stealing, sexual misconduct) and “bad speech” (lying, gossiping, slandering, harsh speech.)
- That is the key to understand the first stage (first round in the *tiparivaṭṭa*) of the First Noble Truth.

12. However, there are three *akusala kamma* done with the mind, i.e., just with one's THOUGHTS. Those are greedy thoughts (*abhijjhā*), angry thoughts (*vyāpāda*), and wrong views (*micchā diṭṭhi*).

- Those three kinds of evil THOUGHTS lead to bad speech and bodily actions. Furthermore, wrong views are the root cause of greed and anger as well, as we will see.
- **It may be hard to believe, but wrong views are the main reason that most humans are reborn in the *apāyā*.** See "[How the Buddha Described the Chance of Rebirth in the Human Realm](#)."
- With this post, we are just expanding the worldview a bit more. Some people may be aware of these facts, but many people are not aware of them. I want to make sure everyone is on-board.

In the upcoming posts, we will discuss the above issues in detail. It is not beneficial to try to understand deep *suttā* without having a good understanding of the "essential fundamentals."

5.2.8.5 Dangers of Ten Types of Wrong Views and Four Possible Paths

.3

March 7, 2020; revised March 9, 2020

Introduction

1. We started this series of posts with "[The Framework of Buddha Dhamma](#)" to understand the details in the *Dhammacakkappavattana Sutta* (SN 56.11.) As we noted, *Dhammacakkappavattana Sutta* provides only an outline of the framework of Buddha Dhamma. Then in the subsequent post, "[The Suffering \(Dukkha\) in the First Noble Truth](#)," we noted that the Buddha pointed out that there are two "good paths" and "two bad paths."

The [Mahācattārīsaka Sutta \(MN 117\)](#) describes those four paths. Any given person is on one of those four paths at a given time.

- One could be on **two paths that are certain to lead to much suffering in the *apāyā*.**
- There are also **two "good" paths.** One COULD lead to rebirths in "good" realms. The other is the Noble Path leading to *Nibbāna*.
- **It all depends on the types of views about the world.** One with the **ten types of *micchā diṭṭhī* (wrong views) will be on one of the two paths leading to much future suffering.**
- We will discuss the "two bad paths" in this post and the "two good paths" in the next post.

2. **One who has removed the ten types of *micchā diṭṭhī* initially have mundane *Sammā Diṭṭhī*.** They are on the path towards "good rebirths." However, that is NOT a guarantee for all future rebirths, since one could switch back to having wrong views in the future.

- **Someone who has removed the ten types of *micchā diṭṭhī* CAN go beyond that and remove the possibility of switching back to wrong views by comprehending the "real Nature," i.e., gain "*yathābhūta ñāṇa*."** That means comprehending *Tilakkhaṇa* or the *anicca, dukkha, anatta* nature. At that point, one will be on the Noble Path and WILL reach *Nibbāna* within a limited number of rebirths in good realms.
- I will only discuss sections of the [Mahācattārīsaka Sutta \(MN 117\)](#) to discuss the four types of possible paths. The Pāli version and translations to several languages are at that link.

Steps to *Nibbāna* – *Sammā diṭṭhi*, *Sammā Samādhi*, *Sammā Vimutti*

3. At the beginning of the *sutta*, the Buddha says: "*Bhikkhus*, I shall teach you ***sammā samādhi* with its necessary supports (*saupanisaṃ* or "with *upanisa*") and essentials (*saparikkhāraṃ* or "with *parikkhāra*".)**

“What is Noble *sammā samādhi* with its necessary supports? Those are *sammā diṭṭhi*, *sammā saṅkappo*, *sammā vācā*, *sammā kammanto*, *sammā ājīvo*, *sammā vāyāmo*, *sammā sati*. That is *sammā samādhi*, reached with the purification of mind, and equipped with those seven supporting factors.”

- It is to be noted that one starts the Noble Path with *Sammā Diṭṭhi* or the “right views.” That sequentially lead to *Sammā Samādhi* or the eighth factor.
- *Sammā Diṭṭhi* leading to *Sammā Vimutti* (or *Arahanthood*) is reached in TWO STEPS. The first stage of mundane *Sammā Diṭṭhi* is reached by getting rid of the ten types of wrong views (*micchā diṭṭhī*.)
- Once one completes the mundane path with mundane *Sammā Diṭṭhi*, one is able to start comprehending *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*.) At that point, one is a *Sotāpanna Anugāmi* and is on the Noble Path. He/she can get to “total release from all suffering” (*Sammā Vimutti*) via four stages of *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, *Arahant*.

Ten types of wrong views (*Micchā Diṭṭhī*)

4. “**Therein, bhikkhus, sammā diṭṭhi (right view) comes first.** And how does the right view come first? **One understands the wrong views (*micchā diṭṭhī*) as the wrong views and right view as the correct view. That is one’s right view.**”

“**And what are the wrong views?**”

- (i) No profit in giving (*dāna*.)
 - (ii) No corresponding benefits in making offerings in a large scale.
 - (iii) Respecting and making offerings to those with higher virtues has no merits.
 - (iv) Good and bad actions (*kamma*) do not lead to corresponding results (*vipāka*.)
 - (v) This world (*ayaṃ loko*) does not exist.
 - (vi) *Para loka* (of *gandhabba*) does not exist.
 - (vii) Mother is not a special person.
 - (viii) Father is not a special person.
 - (ix) Living-beings cannot be reborn spontaneously (*sattā opapātikā*.)
 - (x) There are no virtuous recluses in the world who have seen for themselves by direct knowledge and declare this world and the *para loka* exist.
- **Those are the wrong views.** These are stated precisely the same way in over 30 *suttā* in the *Tipiṭaka* because of their importance. A partial list for such *suttā*: SN 24.5, AN 3.117 through AN 3.119, AN 10. 211, MN 42, MN 110, MN 41, MN 60, MN 76, DN 5, DN 34.

Why Are Those Views Bad? – Laws of *Kamma*

5. Before proceeding with the *sutta*, we need to ask, “why are those views bad and why are they so critical?”

- As we have discussed in the previous two posts, the worldview of the Buddha is VERY different from that of an average human. An average human is unaware of the existence of 31 realms and the endless rebirth process within those 31 realms.
- The mechanism that sustains the rebirth process within the 31 realms is the fact that *kammā* (specifically meritorious and immoral actions) have their corresponding *vipāka*. The **first four wrong views** are associated with not having a good understanding of *kamma/kamma vipāka*.
- Rebirths among the 31 realms are based on *kamma vipāka* (results of previous *kamma*.) We discussed that briefly in #6 in the previous post, “[The Suffering \(Dukkha\) in the First Noble Truth.](#)”

6. There is a rebirth process WITHIN the human existence (human *bhava*,) where one is repeatedly reborn with a human body many times. In between those human rebirths, that life-stream is in the *para loka* as a *gandhabba* (i.e., just with a “mostly mental” body.) That is why there are so many rebirth stories, where especially children, talk about their previous human lives (*jāti*.) On the other hand, it is very difficult to get a human existence (*bhava*.) **It is necessary to understand the difference between *bhava* and *jāti*.**

- Most people reject the laws of *kamma* because they cannot “see” the consequences of some deeds (*kamma*) in this life. But all causes lead to results. But there **must be the right conditions** for the results to appear. A seed does not germinate until the right conditions arise. See, “[What Does “Paccayā” Mean in Paticca Samuppāda?](#)” That is why there is a “time delay” between *kamma* and *kamma vipāka*.
- Buddha Dhamma is amazingly self-consistent. It just takes an effort to see these “inter-connections.” If one becomes interested and makes an effort, there will be many “Aha!” moments. That is when one starts having “real faith” or “*saddhā*.”

Why Are Those Views Bad? – Rebirth Process Within 31 Realms

7. It is very frustrating to be in the *para loka* as a *gandhabba* without a physical body. One cannot eat, smell, or touch (and have sex.) One is in the *kāma loka* BECAUSE one craves those sensory pleasures. **On the spiritual side, it is impossible to concentrate and make any progress on the path either.** That is why one should be grateful to the mother and father for providing an opportunity to be born with a physical body. The **wrong views number five through eight** arise because one is unaware of that process involving “this world that we experience” and the “*para loka* of the *gandhabbā*.”

- For a crude, but good, visualization of the *gandhabba* and *para loka* see the post, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept.](#)”
- The **ninth wrong view** arises because one is not aware of the existence of realms other than the human and animal realms. Many living-beings (*sattā*) are reborn spontaneously (*opapātikā*) in many of those realms. In such births — unlike in the human and animal realms — one is not born a baby and grows to an adult; rather, the birth is in the “final form.” Of course, many living beings do not have dense physical bodies like ours.
- Finally, it is possible to cultivate (*Ariya* or *anariya*) *jhāna* and be able to see one’s previous lives. It is not easy to develop *abhiññā* powers to see previous other existences (*bhava*) such as previous existence in animal or *Deva* realms, for example. However, it is relatively easy to see one’s past human lives WITHIN the current human *bhava*. Many can do that even today, including some children (rebirth accounts.) Discarding such true statements as “mere speculation” is the **tenth wrong view**.

Those With *Micchā Diṭṭhi* Are Destined to be Reborn in *Niraya*

8. As clearly states in the following *sutta*, those with *micchā diṭṭhī* end up in *niraya* (the lowest of the *apāyā*.) On the other hand, those who do not have any of the ten types of *micchā diṭṭhī* (and thus have mundane *sammā diṭṭhi*) are likely to be reborn in the higher realms at or above the human realm (collectively labeled *sagga*.)

The [Ditthi Sutta \(AN 4.212\)](#) is short:

- “*Catūhi, bhikkhave, dhammehi samannāgato yathābhataṃ nikkhitto evaṃ niraye. Katamehi catūhi? Kāyaduccaritena, vacīduccaritena, manoduccaritena, micchā diṭṭhiyā—imehi kho, bhikkhave, catūhi dhammehi samannāgato yathābhataṃ nikkhitto evaṃ niraye.*
- *Catūhi, bhikkhave, dhammehi samannāgato yathābhataṃ nikkhitto evaṃ sagge. Katamehi catūhi? Kāyasucaritena, vacīsucaritena, manosucaritena, sammā diṭṭhiyā—imehi kho, bhikkhave, catūhi dhammehi samannāgato yathābhataṃ nikkhitto evaṃ sagge”ti.*

Translated:

- “*Bhikkhave*, those who proficient in four types of *dhammā* (these are sometimes specifically called *adhammā* or “bad *dhammā*”), are bound to be born in the *niraya*. Those four types are bad conduct with body, speech, and mind, and **having wrong views.**” **Those are *dasa akusala*.**
- “*Bhikkhave*, those who proficient in four types of *dhammā*, are bound to be born in the good realms. Those four types are good conduct with body, speech, and mind, and **having removed wrong views.**” **They are *dasa kusala*.**
- Of course, *niraya* (hell) is the lowest realm of the 31 realms. A good *sutta* to read about rebirths in bad realms due to *dasa akusala* and also rebirths in good realms due to the avoidance of *dasa akusala* is “[Pathamanirayasagga Sutta \(AN 10.211\)](#).” That link gives two English translations.

Two Paths for Those With *Micchā Dittī*

9. Towards the end of the *Mahācattārīsaka Sutta*, the Buddha states that there are two paths (and 20 factors) with correct views (*vīsati kusala pakkhā*) and two paths (and 20 factors) with wrong views (*vīsati akusala pakkhā*). There are forty factors in all, and hence the name *mahā cattārīsaka*: “*Iti kho, bhikkhave, vīsati kusala pakkhā, vīsati akusala pakkhā—mahā cattārīsako dhammapariyāyo pavattito appaṭivattiyo samaṇena vā brāhmaṇena vā devena vā mārena vā brahmunā vā kenaci vā lokasmiṃ.*”

Mahācattārīsaka Sutta (MN 117) does not go into details about the two paths with wrong views. However, there are several *suttā* in the *Aṅguttara Nikāya* (AN 4.204 through AN 4.210) that specifically discuss those two paths for those with wrong views.

- [Dasakamma Sutta \(AN 4.204\)](#) states that one who engages in *dasa akusala* (that includes having wrong views) is an **immoral person (*asappuriso*).**
- If that person also encourages or teaches others to engages in such activities, then he/she becomes a **highly-immoral person (*asappurisena asappurisataro*).** Here, *asappurisataro* with “*taro*” at the end emphasizes the intense immorality. **Note that a highly-immoral person has the same types of wrong views, but they are much more ingrained or established in the mind.**
- The opposites are valid for a **moral person (*sappuriso*)** and a **highly-moral person (*sappurisena sappurisataro*).**
- *Dasa akusala* discussed at, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

10. The [Pathamapāpadhamma Sutta \(AN 4.207\)](#) states the same in another revealing way. “*Katamo ca, bhikkhave, pāpo? Idha, bhikkhave, ekacco pāṇātipātī hoti ... pe ... micchādittīhiko hoti. Ayaṃ vuccati, bhikkhave, pāpo.*”

- That means a person who engages in *dasa akusala* (including killing, stealing,..wrong views) is a ***pāpo*** or an **immoral person.**

The next verse: “*Katamo ca, bhikkhave, pāpena pāpataro? Idha, bhikkhave, ekacco attanā ca pāṇātipātī hoti, paraṇca pāṇātipāte samādapeti ... pe ... attanā ca micchādittīhiko hoti, paraṇca micchādittīhiyā samādapeti. Ayaṃ vuccati, bhikkhave, pāpena pāpataro.*”

- If that person then also encourages others to engages in such activities (or teaches wrong views), then he/she becomes a **highly-immoral person (*pāpena pāpataro*).**

Note that the two *suttā* uses two different words to indicate an immoral person, *asappuriso* and *pāpo*. Both mean “an immoral person.”

Summary

11. Those **with extreme wrong views** (i.e., highly-immoral persons) can get to *micchā vimutti* (and become someone like Hitler or Pol Pot in Cambodia.) It is extremely difficult to change the mindset of such a

person. However, it is possible to do that as illustrated in the example of Āṅgulimāla who had killed almost a thousand people but attained *Arahanthood*, see, “[Account of Āṅgulimāla – Many Insights to Buddha Dhamma.](#)”

- In the next post, we will discuss the two “good paths” with two corresponding “correct views” in detail. Here one first gets to the **mundane *Sammā Diṭṭhi* by cultivating ten factors that are opposites of the ten factors in *micchā diṭṭhi*.**
- We will see that one with mundane *Sammā Diṭṭhi* can get to ***Ariya sammā diṭṭhi* by learning the true teachings of the Buddha on the Four Noble Truths.** Specifically, one needs to comprehend that the “suffering” in the First Noble Truth is the suffering associated with the rebirth process.
- When one starts comprehending the First Noble Truth by grasping the *anicca, dukkha, anatta* nature of this world, one becomes a *Sōtapanna Anugāmi*. That understanding becomes complete at *Arahanthood* and one attains ***Sammā Ñāṇa* (by fully comprehending “*yathābhūta ñāṇa*”) and *Sammā Vimutti* (release from all future suffering.)**
- We will discuss that in the next post and complete the discussion on the *Mahācattārīsaka Sutta* regarding the four possible paths.

5.2.8.5 **Sammā Diṭṭhī – Only One Leads to the Noble Path**

.4

March 14, 2020

Introduction

There are two types of *sammā diṭṭhī* or “right views.” Only one belongs to the Noble Path and leads to *Nibbāna*.

1. We are continuing the series of posts on “[Wider Worldview of the Buddha.](#)” In the previous post, we started a discussion on the [Mahācattārīsaka Sutta \(MN 117\)](#) to clarify the four worldviews and four possible paths.

- There are “two good paths” and the Noble Eight-fold Path is the only path to *Nibbāna*.
- In the previous post, “[Dangers of Ten Types of Wrong Views and Four Possible Paths](#)” we discussed the “two bad paths.” In this post, we will discuss the “two good paths.”

Two Types of *Sammā Diṭṭhi*

2. After discussing the two “bad paths” for those with the ten types of *micchā diṭṭhī* in the *Mahācattārīsaka Sutta*, the Buddha asks: “What, *bhikkhus*, is right view? **Right view, I say, is twofold:**

- **There is the right view that is tainted with cravings (*sāsavā* or with *āsavā*), meritorious and bringing good *vipāka*.**
- That “good path” is available to the world even in the absence of a Buddha. Ancient *yogis* were there before the Buddha (like Āḷāra Kālāma and Uddaka Rāmaputta) who lived moral lives and even cultivated the highest *jhāna*. They were able to get “good rebirths.” However, that is a temporary solution to the saṃsāric suffering, since one can “fall back” from that “good path” and be born in the *apāyā* in the future.
- **Then there is the right view that is Noble (*Ariya*) and without cravings (*anāsavā* or without *āsavā*), supramundane (*lokuttarā*), a factor of the Noble Path.”**

Sammā Diṭṭhi* for the Noble Path Includes Comprehension of *Tilakkhaṇa

3. The difference between those two paths is CRITICAL. We need to discuss that in detail.

- The first, mundane right view, is mostly followed by those who “live a moral life.” That could be just following the five precepts, for example, as many people do. However, to attain *Nibbāna*, one needs to comprehend the “unfruitful, and dangerous nature” of this world (*Tilakkhaṇa*) or the “real Nature,” i.e., gain “*yathābhūta ñāṇa*.”
- **Upon Enlightenment, the Buddha discovered that living a moral life, by itself, CANNOT solve the problem of suffering in the rebirth process.** Following a moral life COULD lead to a future “good rebirth.” However, since we have also done both good and bad deeds in our past lives, such bad deeds done in the past CAN bring births in a bad realm. Of course, we do not know what kind of good/bad deeds we have done in our past lives.
- To start on the Noble Path leading to *Nibbāna*, we need to understand that our cravings for sensory pleasures are ultimately the root cause of suffering. Those cravings (*āsava*) lead to *taṇhā*. See, “[Tanhā – The Origin of Suffering](#).”
- Then the “*taṇhā paccayā upādāna*” step in *Paṭicca Samuppāda* leads to “*upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan'ti*”, i.e., the “whole mass of suffering.”
- That is a brief summary. We will discuss that in detail in upcoming posts. Let us first discuss *sammā diṭṭhī* for the mundane path.

Mundane *Sammā Diṭṭhī*

4. After saying that there are two right views (#2 above,) the Buddha asks: “And what, *bhikkhus*, is the **right view that is tainted with cravings (*sāsavā* or with *āsavā*)**, meritorious and bringing good *vipāka*? ” and explains that is the view where one believes that,

- (i) There is profit in giving (*dāna*.)
- (ii) More profit in giving generously.
- (iii) Respecting and making offerings to those with higher virtues is beneficial (*bhikkhus*, Noble Persons, *yogis*, etc.)
- (iv) Good and bad actions (*kamma*) lead to corresponding results (*vipāka*.)
- (v) This world (*ayaṃ loko*) does exist.
- (vi) *Para loka* (of *gandhabba*) does exist.
- (vii) Mother is a special person.
- (viii) Father is a special person.
- (ix) Living-beings can be reborn spontaneously (*sattā opapātikā*.)
- (x) There are virtuous recluses (like Āḷāra Kālāma and Uddaka Rāmaputta) in the world who have seen for themselves by direct knowledge and declare this world and the *para loka* exist.

Those are the **(mundane) right views that are tainted with cravings**. They are meritorious and bring good *vipāka*.

- **As you remember from the previous post, the above are the opposites of the ten types of wrong views (*micchā diṭṭhī*.)** Those who have those ten “good factors” can get “good rebirths” as discussed in #2.

Why Is Mundane *Sammā Diṭṭhī* a Prerequisite for *Ariya Sammā Diṭṭhī*?

5. The main goal of a Buddhist is to STOP all future suffering in the rebirth process.

- How can one start on the Noble Path to stop the rebirth process, if one does not even believe in the rebirth process?
- But how do we know that there is a rebirth process with much suffering? How can we believe that there are 31 realms in this world instead of just two realms that we can see?

6. As we discussed briefly in #2 above, those were known to the world even before the Buddha. There were *yogis* like Āḷāra Kālāma and Uddaka Rāmaputta who had cultivated *abhiññā* powers and were able to see their past lives as well as could confirm the existence of higher *Deva* and *Brahma* realms.

- Therefore, it is possible to verify the above ten factors even in the absence of a Buddha in the world.
- Even without *abhiññā* powers, one is able to come to the logical conclusion that those ten factors are indeed true. Accounts of past lives from children all over the world and Near-Death Experiences (NDE) of many heart-patients provide evidence. See, “[Evidence for Rebirth](#)” and “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#).”

Inviolable Axioms – Could Be Self-Evident for an Undefined Mind

7. The core teaching of the Buddha is that our efforts in seeking happiness within the rebirth process are futile. **The only way to reach a state where there is absolutely NO suffering is to disengage from the rebirth process.**

- Seeking that goal REQUIRES the following “axioms” in the terminology of science.
 1. Existence of the 31 realms.
 2. The rebirth process.
 3. The laws of *kamma* that determine how rebirths take place.
 4. Existence of *gandhabba* and *para loka* that makes it possible for many human (and animal) rebirths within a single existence.
- An axiom in science is a “fundamental truth” that is taken to be “self-evident.” However, the above axioms may not be “self-evident” until explained in a logical way. After all, there were *yogis* like Āḷāra Kālāma and Uddaka Rāmaputta these days who could see past lives. Waharaka *Thero* had some such capabilities, but unfortunately, we have lost that resource.
- By the way, evidence for the *gandhabba* from the *Tipiṭaka* discussed at, “[Gandhabba State – Evidence from Tipiṭaka](#).” Other evidence discussed at, “[Evidence for Rebirth](#)” and “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#).”

Buddha Dhamma: Non-Perceivability and Self-Consistency

8. **However, those axioms CAN become self-evident** if one spends enough time contemplating the laws of *kamma*. They are logical and self-consistence. For example, see, “[Complexity of Life and the Way to Seek ‘Good Rebirths’](#)” and “[What is Kamma? – Is Everything Determined by Kamma?](#)”

- As we know, one cannot learn higher mathematics like calculus without learning basic arithmetic first, then algebra, and so on. Buddha Dhamma describes the laws of nature. **Nature’s laws are much more complex than advanced mathematics or quantum mechanics.**

9. There is an additional factor involved too. The ability to understand becomes easier when one starts “cleansing one’s mind.” That does not just mean following some precepts (even though they are an important part). See, “[The Importance of Purifying the Mind](#).”

- One has to start on the mundane path, live a simple life (away from both too much sensory pleasures and also hardships). One’s mind will become less stressful and less agitated.
- As one lives a moral life and keeps learning (and seeing the self-consistencies) one’s faith in the teachings will grow. See, “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”

The “Previously Unheard” Teaching

10. Even though the “good path” followed by *yogis* like Āḷāra Kālāma and Uddaka Rāmaputta led to the cultivation of *abhiññā* powers and even “good rebirths,” it did not lead to the end of suffering. That is because one would still be engaged in the rebirth process.

- All births, even in the highest *Brahma* realms, have finite lifetimes. At the end of those long lifetimes, previous bad *kamma* can and will bring rebirths in lower realms.
- Rebirths in the lowest four realms (*apāyā*) are unavoidable until one fully comprehends the true nature of this world described by the Three Characteristics of Nature or *Tilakkhaṇa* (*anicca, dukkha, anatta.*) That essentially means any “good” existence in the 31 realms cannot be maintained. Future rebirths in the *apāyā* cannot be avoided until one comprehends *Tilakkhaṇa*.

All Births (*Jāti*) End Up in Suffering

11. From *Paṭicca Samuppāda*: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’ti*”

- “**The whole mass of suffering**” is inevitable for each *jāti* (birth) because each birth ends up in death. Any birth (even in good realms) **MUST** come to an end. That is the harshest suffering to face (in the sense of leaving behind everything.)
- A birth does not happen without *bhava* (existence.) Therefore it is critical to understand what *bhava* and *jāti* are. **That is why one needs to understand the mundane right views of (v) through (viii) in #4 above**, BEFORE trying to understand what is meant by *Nibbāna* (the stopping of ALL future suffering by stopping ALL future *jāti*.)
- One grasps a new *bhava* (existence) at the end of the current *bhava*, **ONLY** because one has cravings for “worldly pleasures” (whether sensual pleasures or *jhānic* pleasures). Those inevitably lead to *taṇhā, upādāna, bhava, jāti* and then “**the whole mass of suffering**” is inevitable.
- **One CANNOT stop those cravings** as long as one values those sensory/*jhānic* pleasures; in other words, until one gets rid of *avijjā* or the ignorance of the Four Noble Truths.
- Now we get to the verse that requires a good discussion to understand the *Ariya Sammā Diṭṭhi* that come at the forefront of the *Ariya Aṭṭhaṅgika Magga* or the **Noble Eight-fold Path**.

The *Ariya Sammā Diṭṭhi*

12. Next verse from the *Mahācattārīsaka Sutta* (after the verse in #4): “*Katamā ca, bhikkhave, sammādiṭṭhi ariyā anāsavā lokuttarā maggaṅgā? Yā kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamaṅgino ariyamaggaṃ bhāvayato paññā paññindriyaṃ paññābalaṃ dhammavicayasambojjhaṅgo sammādiṭṭhi maggaṅgaṃ—ayaṃ vuccati, bhikkhave, sammādiṭṭhi ariyā anāsavā lokuttarā maggaṅgā.*”

- There are many factors summarized in that verse. But we can get started with the following.

“And what is the **right view that is Noble, without cravings** (*anāsavā* or without *āsavā*), and is a factor of the Noble Path leading to *Nibbāna*? Note that in the *sutta*, the word *lokuttarā* means “*loka*” + “*uttara*” where *loka* is “this world” and *uttara* implies “better than.” Thus, ***lokuttarā maggaṅgā*** means “a factor of the Noble Path **that overcomes this world**, leading to *Nibbāna*.”

- As we mentioned in the first two posts in this series on “**Wider Worldview of the Buddha**,” Buddha’s teachings were “previously unknown to the world.”

- That “previously unknown part” is to see the suffering hidden in what we perceive to be “pleasures”. Such pleasures — whether sensory pleasures or *jhānic* pleasures — belong to this world. They are temporary. Furthermore, people tend to do immoral things in seeking such pleasures.

The Suffering Hidden in Sensory Pleasures

13. *Āsava* are our hidden cravings. They come to the surface triggered by mind-pleasing (or unpleasant) thought-objects (*ārammaṇa*.) See, “[Paticca Samuppāda – A “Self” Exists Due to Avijjā.](#)”

- Then one attaches to that *ārammaṇa* via greed or anger depending on whether the *ārammaṇa* is mind-pleasing or distasteful. That is *taṇhā*. Whether one gets attached or not depends on one’s *gati*. We have discussed this in detail in earlier posts in the “[Worldview of the Buddha.](#)”
- The key to attaining *Nibbāna* (*āsavakkhaya* or the removal of *āsava*) is to understand how to get rid of our *gati* to attach (*taṇhā*) to various *ārammaṇa*. As we will see, that has origin in our ignorance of the true nature of this world. What we perceive to provide happiness actually leads to suffering.
- The best analogy is a fish who bites into a tasty bait not realizing the dangers hidden in that bait (a tasty worm.) Imagine the suffering associated with a hook piercing one’s mouth. Of course, that suffering ends up in an agonizing death due to lack of oxygen since the fish is unable to breathe outside water.
- In the same way, we do not “see” the long-term consequences of our cravings for sensory/*jhānic* pleasures. That is the core idea embedded in *Tilakkhaṇa*. We will discuss that in detail in the upcoming posts.

5.2.8.5 Fear of Nibbāna (Enlightenment)

.5

March 18, 2020

Introduction

1. I have presented an outline of the Buddha Dhamma in the “[Wider Worldview of the Buddha](#)” subsection. As explained there, the key message of the Buddha is that future suffering can be stopped only by stopping the rebirth process, i.e., by attaining *Nibbāna*. Now I need to clarify a few things.

- The main issue that I want to address is the “fear of *Nibbāna*.” **That arises with the wrong view of “I exist.”** Then the implication is that by stopping the rebirth process “I will be extinct.” **It is also a wrong view to say that “I do not exist.”** It is true that “I exist now as a human.” In the future, I may exist as *Deva*, *Brahma*, or an animal, based on the cumulative effect of my *kamma* (causes) up to now.
- If I attain the *Arahanthood* in this life, then after my death I will not exist anywhere in the 31 realms of this world. I would merge with *Nibbāna*.
- These days there are many unfruitful discussions about whether a “self” exists or not. As the Buddha pointed out, that is the wrong starting point to discuss life-cycle. **A given life-stream evolves according to causes (*kamma*.)** When the ability for past *kamma* to bring their *vipāka* is stopped (i.e., *taṇhā* or *upādāna* stopped,) then that process will stop and one merges with *Nibbāna* at the death of that last physical body.
- The Buddha clearly stated that *Nibbāna* exists. See, “*Nibbāna* “Exists”, but Not in This World.”
- I have discussed the Buddhist concept that while a “self with *gati*” exists until one attains *Nibbāna*, that is NOT a “permanent self” like a soul. See, for example, “[Anattā \(Mundane Interpretation\) – No “Unchanging Self.”](#)” “[An Apparent “Self” Is Involved in Kamma Generation,](#)” and “[Paticca Samuppāda – A “Self” Exists Due to Avijjā.](#)” Also see, “[Yamaka Sutta \(SN 22.85\) – Arahanthood Is Not Annihilation but End of Suffering.](#)”

2. We will re-visit that deeper concept in upcoming posts again, in a systematic way.

- First, I would like to explain in simple terms that there is no need to be fearful about “stopping the rebirth process.”
- I did a Google search and found the following comments by two people in online discussion forums. Those are representative of the comments of many others and thus I would like to address those.

First Myth – Fear of “Vanishing” or “Extinction” Equated to *Nibbāna*

3. The following are extractions from the comments of Person 1.

- “I started taking the Buddhist path not long ago, less than three years ago. At that time, life felt too heavy and it felt like it was pushing me towards not wanting to *play the game* anymore. So Buddhism seemed like the way to go.”
- **“I can’t forget the first time I faced the idea of vanishing from this existence forever, the true death; never being able to come back once I ‘saw it’. Nevertheless, I kept investigating.”**
- “Then I contemplated the idea of being trapped in this. Existence has no way out, anywhere you go there is still existence. In other words ‘What if it has been like this for millions, billions of years, maybe even for eternity?’”
- “But if enlightenment is the only escape, **I am afraid of never being able to come back.** I am afraid everything is just an illusion, that there aren’t others, just images and I’m alone. Sometimes I fear there isn’t even enlightenment to save me. My question is: Am I going crazy? Am I getting it all wrong?”

There Are Those Who Want to “End the Existence”

4. First of all, think about the mindset of those who commit suicide. Why do those people want to leave this world? Most of them probably do not believe in rebirth. But they just “wanted out” because they could not bear whatever the suffering that they were experiencing.

- In fact, that is the mindset of living-beings in the *apāyā*. They just want to “end it all.” But no matter how much they “want out,” that will not happen. That is a good example of the suffering expressed by the Buddha in the verse, “*yampicchaṃ na labhati tampi dukkhaṃ,*” or “not to get what one desires (*icchā*) is suffering”, in the *Dhammacakkappavattana Sutta* (SN 56.11.)
- In the [WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#), Ven. Sariputta explains the meaning of that verse: “*Katamañcāvuso, yampicchaṃ na labhati tampi dukkhaṃ? Jātidhammānaṃ, āvuso, sattānaṃ evaṃ icchā uppajjati: ‘aho vata mayaṃ na jātidhammā assāma; na ca vata no jāti āgaccheyyā’ti. Na kho panetaṃ icchāya pattabbaṃ.*”
- **Translated:** “In a living-being subject to (some) births the **wish (desire) arises**, ‘Oh, may I not be subject to such a birth, and may that birth not come to me.’ But **such a desire will not be fulfilled** (and thus one will be subjected to suffering.)”

5. Thus, it is only when faced with physical pain/mental stress that one wishes it would just go away. Many people become interested in Buddhism when they run into either physical problems (getting sick or starting various body ailments due to old age) or mental problems (day-to-day stresses or even depression.)

- They can, of course, get relief from those issues by living a simple life and abstaining from immoral deeds.
- But then they start reading about *Nibbāna* as “ending of one’s existence” and then they freak out. That is what happened to Person 1 above.

Life in “Good Realms” Is Short-Lived

6. We normally do not realize the kind of harsh suffering experienced by many living beings. Of course, we can see only the animal realm other than the human realm. Even then, we do not pay much attention to the

suffering of animals. In fact, we are conditioned to “not see” or “not recognize” the suffering of many animals that is in full display.

- For example, people enjoy watching animal shows on TV where, for example, a tiger chases a deer, catches up with it and eats it alive.
- Those who enjoy fishing do not see the suffering of a fish that is subjected to excruciating pain, with its mouth pierced by the hook, and unable to breathe outside water. But unlike some animals, fish cannot show emotion, which is a part of their *kamma vipāka*.
- On the other hand, we can clearly see many animals showing their suffering by either yelling out or by their facial expressions.
- **All those animals had been humans at some point in the rebirth process!**

7. Suffering in the other three realms of the *apāyā* is much worse. Therefore, those are the births (*jāti*) that we would not want for sure.

- The point is that as long as we are in the rebirth process, such births cannot be avoided. Such births are much more likely than human birth just based on the statistics we can verify.
- For example, there are less than eight billion people on Earth. But there are a million times more ants on Earth! There are a trillion TYPES OF lifeforms on Earth; see, “[WebLink: sciencealert.com: The Largest Study of Life Forms Ever Has Estimated That Earth Is Home to 1 TRILLION Species](http://sciencealert.com/The-Largest-Study-of-Life-Forms-Ever-Has-Estimated-That-Earth-Is-Home-to-1-TRILLION-Species).” These are mind-boggling numbers! That is not counting the other three realms in the *apāyā* that we cannot see.
- That is why the Buddha said that a human *bhava* (existence) is VERY rare. Any “pleasures” that we experience as a human is of VERY SHORT duration. The suffering that the Buddha taught was the suffering in the rebirth process where a given living-being spends much more time in the *apāyā*.
- Now we turn to the issue of “fear of non-existence in this world.”

We Are “Effectively Not in Existence” During at Least a Third of a Day

8. Even though we may fear “extinction out of existence,” we are not aware of “our existence” during sleep. We are not conscious while we sleep, especially during the deep sleep cycle. Most of the time, we go to sleep and until we wake up the next morning, we are completely unaware of our existence in the world.

- We don’t think about that normally. But I became acutely aware of this fact when I was made unconscious for over 9 hours during my brain surgery. I remember losing consciousness after the injection of the drug. The next thing I was aware of was when I came out of the drug-induced unconsciousness state.
- While unconscious or in deep sleep, we are (effectively) “not in this world.”
- When an *Arahant* dies, it will be like in such an “unconscious state (as far as this world is concerned)” forever. But he/she would have merged with *Nibbāna*. The Buddha clearly stated that *Nibbāna* exists. We just cannot explain it in terms of the concepts (*rupa, citta, cetasika*) in this world. See, “[Nibbāna “Exists”, but Not in This World.](#)”
- There is no overlap between “this world of 31 realms” and *Nibbāna* (full *Nibbāna* or *Parinibbāna*.) They are mutually exclusive. One is either “in this world” or “in *Parinibbāna*.” Either the Buddha or any of the *Arahants* who have passed away are not in this world anymore.
- Once an *Arahant* dies and merges with *Nibbāna*, there will be no more deaths. Attainment of *Nibbāna* is by removing ALL causes for the birth and death cycle (with complete removal of *avijjā*.) That is why *Nibbāna* is also called “deathless.”

Comments of Person 2

9. The second comment that I chose was from Person 2. Some of the selected parts are below.

- “..I was meditating yesterday and had this weird “experience.” **It freaks me the hell out because it was like I was never there.** I’m just feeling scared now after that experience. It felt extremely beautiful to me yesterday but right now I’m just freaking out for some reason. My mind is just racing with the thought “I don’t want to die” and I’m just having an existential crisis.”
- “I’m wishing I never did any of this meditation or consciousness work in the first place because it’s making me think that I can delude myself into thinking I’m alive but I’ve always been dead and have just been an empty void. I feel like I’m going insane. I’m just feeling a wave of negativity.”
- “I know that the way I’m phrasing it is silly but **I’m just curious about people who are completely enlightened (if such a thing is 100% possible).** Are these people like talking corpses? All these words can come out their mouth and it looks like they’re alive, but they’re really dead?”

Can One Lose Perception While Meditating?

10. The first part of Person 2’s comment is to do with meditation. What he experienced was a “perception-less meditative state” or an “*asañña samādhi*.”

- Such a state is reached by focusing on getting rid of ALL thoughts that come to the mind. That is NOT Buddhist meditation. In Buddhist meditation, one stops ONLY those thoughts that are immoral. One would CULTIVATE good or moral thoughts.
- One who cultivates such an *anāriya* meditation may be reborn in the *asañña* realm. That realm has a very long lifetime and there are no thoughts arising. It is like being unconscious for a billion years! Of course, that life will also end and one would be back in another realm.

Is An Arahant a Zombie?

11. Now, let us discuss the second highlighted comment from Person 2. An *Arahant* does not lose perception like in the case above in #10. A living *Arahant* “engages with the external world” just like anyone else.

- The only difference is that a living *Arahant* WILL NOT generate greedy, angry, or unwise thoughts.
- But he/she will recognize people as his/her mother, friend, an attractive person/object. He/she will experience the sweetness of sugar or the bitterness of vinegar, etc. Until the death of the physical body, an *Arahant* will live like any other human.

Nibbāna is Escape From Suffering – Two Types of Nibbāna

12. The Sinhala word for *Nibbāna* is “*Nivana*” or “*Niveema*” (නිවන/නිවේම.) That means “a cooling down.”

- [WebLink: suttacentral: Ādittapariyāya Sutta \(SN 35.28\)](#) is one of the early discourses of the Buddha. In that *sutta*, the Buddha compared said that the world is burning. That means the mind of anyone who embraces the world as good and fruitful is always “burning” or “under stress.” That stress goes away at the first stage of *Nibbāna* (*saupādisesa Nibbāna*) experienced by a living *Arahant*.
- However, a living *Arahant* has a physical body that arose due to past *kamma*. That body can experience bad *kamma vipāka* from the past. After the death of that physical body, an *Arahant* will not be reborn and that is the end of any and all suffering. That is *anupādisesa Nibbāna* or *Parinibbāna* (full *Nibbāna*.)

13. Finally, if anyone has other issues related to this topic, this is a good time to discuss them. This kind of discussion will help clarify issues that I may not have thought about, but others may have.

5.2.8.6 Worldview of the Buddha – Explanatory Material

[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#)

[Mental Body Versus the Physical Body](#)

[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)

[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#)

5.2.8.6 Ghost 1990 Movie – Good Depiction of Gandhabba Concept

.1

January 17, 2020

Introduction

1. I have been trying to get across the concept of a *gandhabba* (or mental body or *manomaya kāya*) over several years now. But I don't think many readers have a good grasp of the concept. One critical problem is that sometimes it is tough to explain a new concept with just words.

- Then a couple of days ago, I remembered that 1990 movie “Ghost” that I had watched at that time. I only had a vague recollection of the film, so I watched it again. It became instantly clear to me that it would help me make “some key clarifications” with the aid of that movie. After watching the movie, I abandoned the post that I was writing and started on this post.
- A description of the movie and the plot is in the Wikipedia article “[Ghost \(1990 film\)](#).” **However, one MUST watch the movie and read the following discussion to be able to get a good understanding of the *gandhabba* concept.** A free version of the full movie is available online.

The Background (Up to 23 Minutes)

2. From the above article: “Sam Wheat, a banker, and his girlfriend Molly Jensen, a potter, renovate and move into an apartment in Manhattan with the help of Sam's friend and co-worker Carl Bruner. One afternoon, Sam confides in Carl his discovery of unusually high balances in obscure bank accounts. He decides to investigate the matter himself, declining Carl's offer of assistance. That night, Sam and Molly are attacked by a mugger who shoots and kills Sam in a scuffle before stealing his wallet. Sam sees Molly crying over his body and discovers **he is now a ghost**, invisible and unable to interact with the mortal world.”

- The ghost, of course, is the *gandhabba* or the *manomaya kāya* of Sam. The movie clearly shows some of the features of the *gandhabba* that I have tried to explain with words. When Sam dies, his *gandhabba* comes out of the dead body. Initially, he does not even realize that he has died. By the way, if one dies such a sudden death, there is no time to feel the physical pain.
- So, Sam is confused when he sees his dead body and his girlfriend, Molly, crying. It takes him a little while to realize what happened. He sees his own bloodied body held up by Molly. He tries to touch the body, and his fingers “go through the dead body.” We can disregard the next few moments showing the “white light” coming to “take him to heaven.” This will be discussed in #12 below.
- When a human dies suddenly by a gunshot, likely, his “*bhava*” will not change. So, Sam probably has more time left in the human *bhava*, but he now has to stay in the “*gandhabba* state” until a matching mother's womb becomes available for his next human birth. See, “[Bhava and Jāti – States of Existence and Births Therein](#).”
- In any case, according to the movie script, Sam's mind is focused on Molly, and thus the “white light” goes back without him.

Gandhabba Is Not a “Scary Misty Ghost”

3. Many of you may have imagined that a *gandhabba* is like a “scary misty ghost” as depicted in popular cartoons. However, a *gandhabba* coming out of a body is a “complete imprint” of that human including the clothes that he/she had been wearing.

- Thus, Sam’s ghost or Sam’s *gandhabba* looks just like Sam when he died, complete with whatever he was wearing. That is part of the “*utuja kāya*” or the “fine body” around the “mental body.” That mental body by itself is just a few *suddhātṭhaka*.
- However, when that *gandhabba* is pulled into a womb, the *utuja kāya* is shed and only the “pure mental body” of a few *suddhātṭhaka* merge with the zygote in the womb. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”

At the Hospital (Up to 26 minutes)

4. An ambulance takes Sam’s body to the hospital, and he keeps staying by the dead body trying to make sense of things. Of course, with that “mental body,” he can go anywhere he wishes.

- While he is sitting by his dead body, another *gandhabba* (old guy) comes and talks to him. They also watch another patient dying and his “ghost” or *gandhabba* taken to heaven with the “white light.” As the old guy says, most of the dead go to hell and not heaven.
- **Then an attendant comes and takes his dead body “right through him.” That is what I try to say that a *gandhabba* has a “very subtle fine body.” It is just an “energy body” or a “force field.”**
- His *gandhabba* body” has only a trace of matter. Solid objects can go right through, and “he” can go through solid objects!

Sam’s Ghost (*Gandhabba*) Learning About the *Gandhabba* World (*Para Loka*) – (Up to 54 minutes)

5. Sam sees another “*gandhabba* woman” walking through a tombstone at his funeral. Later on, at Molly’s place, he goes “through a door” for the first time. Sam’s killer comes to Molly’s apartment, and Sam follows him back to the killers’ apartment. On the subway train ride, Sam meets a violent “subway ghost” who has learned how to move physical objects with mind power. Later on, Sam would learn from him how to focus mental energy and to move physical objects.

- That is possible per Buddha Dhamma. Even though most *gandhabbas* do not have such an ability, a few of them may also get such capability due to “*puñña iddhi*” or due to exceptional past *kamma vipāka*.

6. Anyway, Sam finds out that the name of his killer is Willie. In Willie’s neighborhood, Sam also meets psychic Oda Mae, a charlatan pretending to communicate with spirits of the dead. However, it turns out that Oda’s mother actually had such capabilities, and after the meeting with “Sam’s ghost,” Oda is also able to hear his voice.

- That is also possible per Buddha Dhamma. Some humans are born with *puñña iddhi* to be able to hear and/or see *gandhabbas*. It is possible that such accounts (over long periods) are responsible for the “cartoon versions” that we come across in books and movies such as this movie.
- Sam persuades Oda Mae to help him. They still have a hard time convincing Molly. But Molly is finally convinced by the personal details that Sam provides through Oda.

At this point, you may want to watch the movie. **I will be revealing the storyline from this point.** If you want to enjoy the film, it is a good idea to finish watching the movie and then to read the rest of this post.

Sam’s Friend Carl – (Up to 72 minutes)

7. Molly decides to contact Carl, who was a friend and co-worker of Sam. She tells him that Sam’s ghost found out that his killer was Willie. Carl promises to check on that.

- Molly goes to the police, and they don't believe the story either. The detective says there is no record on Willie, but Oda Mae has a history of deceiving people.
- Meanwhile, Carl goes to meet Willie and Sam follows him. Sam is shocked to find out that it was Carl who hired Willie. It turns out that Sam had a bank code in his wallet for an account that had four million dollars, and Carl wanted Willie to get Sam's wallet. But things did not go as planned, and Willie shot and killed Sam.
- Later on, Carl goes back to Molly and tries to seduce her. Sam gets into a rage and lunges at Carl. Of course, he cannot make contact, but he was astonished to see that he was able to knock a picture off a table.

Sam's Ghost Learns How to Make Bodily Contact – (Up to 78 minutes)

8. Sam then remembers the “subway ghost” who can move physical objects with mind power. He goes back to the subway and learns how to focus the mind power to move physical objects.

- In Buddha Dhamma, that is possible via cultivating *jhāna*. As we discussed before, there are rare cases where a *gandhabba* would be able to make physical contact via *puñña iddhi*. However, this aspect of the movie is unlikely to happen in real life.
- This is why it is not fun to be a *gandhabba*. Some *gandhabbas* (ghosts in the movie) can see and hear humans. But they are frustrated that they cannot touch, eat food, or smell scents like humans do. There is a scene in the movie where the “subway ghost” says he would give anything to smoke a cigarette (@ 76 minutes.)
- (I have mentioned in previous posts that a *gandhabba* can “take in various types of scents” and become a bit denser. That is a different mechanism than inhaling through the nose (a *gandhabba* only has an imprint of a nose and not a real nose.)

Mind Power – (Up to 78 minutes)

9. The “subway ghost” explains to Sam that he has no physical body even though he seems to be wearing clothes etc. He says, “you’ve got no body (meaning no physical body), son. It is all up here” and points to the head. (But of course, the seat of the mind is not in the head. It is close to where the physical heart normally is.)

- Subway ghost says, “If you want to move something, you’ve got to move it with your mind. You’ve got to focus all your anger, all your love, all your hate, and push from all the way here, **from the middle of your stomach**. And let it explode like a reactor.” (That turns out to be the right place!)
- That is a CRITICAL point. Even from our own experience, we know that when we try to do something hard, the “push” comes from the heart area, and not the head.
- The real power is in our thoughts (specifically *javana citta*.) That power can be highly focused when one is in a *jhāna*. But it is when one is in *jhāna samāpatti*, that one can focus the mind power and even CREATE matter! See, “[Mystical Phenomena in Buddhism?](#).” [*samāpatti* :[f.] attainment; an enjoying stage of meditation.]

Oda Mae Is Now a Genuine Psychic Reader – (Up to 80 minutes)

10. Oda Mae is no longer a fake. She can make contact with many “ghosts” or *gandhabbas* in the *para loka*. As you see, the *para loka* co-exists with our *loka*; it is just that we cannot see those in the *para loka*.

- However, she is now in trouble since Carl knows her identity. The story gets interesting now and there are no more “technical details” that need to be discussed here.
- If there are questions, we can discuss them at the discussion forum. This is a very complex subject, but I hope you get a general idea.

Other Relevant Points – Births in Different Realms

11. A human *gandhabba* (ghost in the movie) comes out of a dead body ONLY IF that person has more *kammic* energy left for human *bhava*. That is the case in many instances, especially if one dies by a gunshot as in this case.

- However, if the *kammic* energy for human *bhava* runs out at the moment of death, then an entirely different event takes place. Let us consider specific cases of a human dying and grasping an animal, *Deva*, and *Brahma bhava*.
- If the dying human grasps an animal *bhava* (say a dog), then instead of a “human ghost” it is a “dog ghost” or a “dog *gandhabba*” that comes out of the dead body. That “dog *gandhabba*” will not stay in that vicinity. It will be attracted to somewhere there are dogs with matching *gati*. Then it will stay there until a suitable womb becomes available, at which point it will be drawn into that womb.
- A very different thing happens if a *Deva bhava* is grasped by the dying human. In that case, **there will be no “ghost” or *gandhabba* coming out of the dead body.** Instead, a full-blown *Deva* will appear in a matching *Deva* realm instantaneously. If a *Brahma bhava* is grasped, a *Brahma* will appear at the matching *Brahma* realm.
- What we discussed in that last bullet is a critical point. **There is no “being” going from here to the *Deva* or *Brahma* realm** (located far above the Earth.) The human dies here and *Deva* (or *Brahma*) is born there. Due to a past cause (*kamma*), a *Deva* or a *Brahma* is born at the appropriate location.

Other Misconceptions in the Movie

12. The movie shows that “good people” like Sam get to go to heaven (though the white light) and “bad people” like Carl and Willie are taken to hell by “hell beings.” But Buddha Dhamma has a different picture of rebirth.

- First, hell and heaven (*Deva* realms) are not the only two “destinations.” One can be born among any of the 31 realms, including the animal realm that we see.
- The second is that one’s human *bhava* does not normally end at death. A human *bhava* can last thousands of years and unless one has used up all that time, one could be reborn with a human body again. In that case, the “mental body” corresponding to the human *bhava* (i.e., human *gandhabba*) comes out of the dead body and has to wait until a matching womb becomes available.
- There is an exception to the rule in the last bullet. If one has done a *ānantariya kamma* (like killing a parent or cultivate a *jhāna*) then one’s **human *bhava* will end at death** even if there is more *kammic* energy left. In the first case, one will be born in hell and in the second (*jhāna*) one will be born in a *Brahma* realm.
- There are few other inconsistencies in the movie, but those are the major ones.

Pāli Word for Ghost is “*Bhūta*”

13. Another interesting point is that the Pāli word for “ghost” is “*bhūta*.”

- *Bhūta* in Pāli (and Sinhala, බුදු) means an entity that one cannot really grasp.
- For example, scientists are trying to figure out the fundamental “blocks” that all matter is made of. They initially thought an atom would be the smallest unit of matter. Then they found out that an atom is made of electrons, protons, and neutrons. They kept probing deeper and now are down to levels where it is hard to distinguish between “matter” and “energy.”
- The four great elements (*cattāri mahābhūtāni*) in Buddha Dhamma are *paṭhavī*, *āpo*, *tejo*, *vāyo*. But they can NEVER be detected individually. They ALWAYS come in packets called “*suddhāṭṭhaka*.” A

suddhāṭṭhaka has those four great elements and four more elementary units. Even that unit cannot be “seen” and is said to be at the “*bhūta* stage.”

- A *gandhabba* (ghost in the above discussion) has only three *suddhāṭṭhaka* (they are called *dasaka* because when vibrational and rotational “modes” are added to become “ten units each.”
- To be visible to our eyes, billions and billions of such *suddhāṭṭhaka* need to be piled up. Now we can see that a *gandhabba* hardly has any “matter.” That is why it is called “ghost” or a “*bhūta*.”

One Last Thing

14. At 109 minutes, Oda Mae “lets” Sam to get into her physical body so that Molly will be able to “touch him” for the last time.

- That is possible according to Buddha Dhamma. If a human is willing, a *gandhabba* can “get into” that physical body.
- Even if the human is not willing, but has a “weak mind,” a rogue *gandhabba* can “get in.” It is said that the human is now “possessed.” Such cases are still reported in Sri Lanka and the human is said to be “possessed by a demon.” But it is usually a *gandhabba* with bad character and not a demon.
- By the way, I was very much moved by that last scene. This is part of the suffering that we tend to be unaware of or even disregard. It is a good example of “*piyehi vippayogo dukkho*” OR “separation from what is loved is suffering.” We will all face that at least at the moment of death. We will have no choice but to leave all that we love.

There are many more details like that. But the above discussion should provide the basic ideas involved with a *gandhabba*. As the Buddha admonished, we will never be able to uncover and sort out all such complexities. But it is good to be aware of the general ideas involved.

5.2.8.6 Mental Body Versus the Physical Body

.2

February 2, 2020

Essential Facts for this post

1. The mental body is far more important than the physical body. Let me first summarize the relevant conclusions from the “[Origin of Life](#)” section for this post.

- The mind does not exist by itself. **There must be at least a trace of matter for the mind to exist.** That is a critical point in Buddha Dhamma that many people do not realize. The “seat of the mind” is called “*hadaya vatthu*.” It is unbelievably small and is created by *kammic* energy when a living being grasps a new existence. In addition to *hadaya vatthu*, up to five “*pasāda rūpa*” are created by the *kammic* energy at that time.
- That package, *hadaya vatthu* together with the set of *pasāda rūpa* is the “smallest unit of existence.” It is called the “*manomaya kāya*” because the energy for the creation of it comes from the *kammic* energy based on a strong past *kamma*. See, “[Origin of Life – One Creates One’s Own Future Lives](#).”
- In the 20 *Brahma* realms (out of 31 realms in this world) that “*manomaya kāya*” is all they have. They do not need a physical body with “flesh and blood” because those *Brahmā* do not experience taste, smell, or touch.
- When a living being is born in the human realm, it is born with that “*manomaya kāya*” which is given a special name of *gandhabba*. When a suitable womb with “matching *gati*” appears, that *gandhabba* is drawn into it and merges with the zygote there. That “living zygote” first grows into a baby (by taking in food from the mother.). After born, that baby grows into an adult with a body weighing a hundred plus pounds (or tens of kg.) Details in #4 below.

- Thus, it is clear that virtually all physical matter in a human body comes from food.

The Critical “Body” Is Not “Physical Body” But “Mental Body” (*Manomaya Kāya*)

2. Therefore, in most of the realms below the *Brahma* realms, there is an “additional body,” the “physical body.”

- That physical body is required ONLY to provide sensory inputs on tastes, smells, and touches.
- In contrast to the physical body, the mental body has “something extra” that makes it ALIVE, as we will discuss below. It is quite clear that the “physical body” is secondary to the “mental body” (*manomaya kāya* or the *gandhabba*.)
- In fact, the mental body can perform the other functions (seeing and hearing) BETTER if it is not trapped inside the physical body.
- The lady in the following video was born blind. She could not see only because there was something wrong with her PHYSICAL eyes, the optic nerve, or the visual cortex in the brain. Once the *gandhabba* (mental body) came out, she was able to see for the first time in her life:

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](https://www.youtube.com/watch?v=...)

- In the previous post, “[Origin of Life – One Creates One’s Own Future Lives](https://www.youtube.com/watch?v=...),” I added another relevant video a day after that post was published. You may want to watch that video too. Both these videos present powerful evidence of not only the existence of *gandhabba* but also why it is the “essence of a human.” The physical body is just a shell.
- **All mental activity occurs in the *gandhabba* or the mental body.** However, we cannot taste, smell, or touch without that physical body.

Relevance to *Satipaṭṭhāna Bhāvanā – Paṭikūlamanasikāra Pabba*

3. In the [WebLink: suttacentral: Mahā Satipaṭṭhāna Sutta](https://www.dhammadownload.com/suttacentral/Mahā_Satipaṭṭhāna_Sutta) (DN 22,) the Buddha allocated several sections under the *Kāyānupassanā* section to discuss the physical human body.

- The subsection on 1.4. *Kāyānupassanā Paṭikūlamanasikāra Pabba* describes the 32 parts of the human body. That title is incorrectly translated as “Applying the Mind to **Repulsiveness** of the Body.” That section is there to show that the physical body of a human is just a “collection of parts.”
- The Buddha never emphasized “repulsiveness” of anything. (He only emphasized the “unfruitfulness” of getting attached to “mind-pleasing” things in this world.)
- If one starts contemplating that one’s body is repulsive (as many people mistakenly do,) that only leads to *paṭigha* (friction) in the mind. Such a mindset is not conducive to meditation.

Relevance to *Satipaṭṭhāna Bhāvanā – Dhātumanasikāra Pabba*

4. The next subsection, 1.5. *Kāyānupassanā Dhātumanasikāra Pabba*, points out that the physical body only has four great elements (*pathavī dhātu, āpo dhātu, tejo dhātu, vāyo dhātū.*) Bodies of any other living beings are, as well as inert objects, also have the same four great elements. There is NOTHING in the PHYSICAL BODY of a human being that is different compared to an animal or an inert object.

- In the language of modern science, all those have the same atoms and molecules.
- There is nothing special about the composition of the human body. The basic unit of a living cell is the same for a human as an animal. See the video in #9 of the post, “[Origin of Life – There is No Traceable Origin](https://www.youtube.com/watch?v=...).” That post started the series of posts on “[Origin of Life](https://www.youtube.com/watch?v=...).” We will be referring back to those posts often.

- If there is anything “special” in a human or animal body, that is the cell. We remember that a human physical body starts with just a single cell (zygote) and, of course, a *gandhabba*. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”
- By the way, plants have cells too. A tiny seed grows to a big tree because of cell division. However, only humans and animals have mental bodies, that set them apart from plants. Plants cannot think.

Relevance to *Satipaṭṭhāna Bhāvanā – Navasivathika Pabba*

5. Then the section on 1.6. *Kāyānupassanā Navasivathika Pabba* is about contemplating on what happens to that physical body after one dies.

- Once the *gandhabba* or the *manomaya kāya* leaves a dead physical body, that physical body is no different from a log of wood.
- It is the *manomaya kāya* that keeps a physical body “live” and “warm.” As soon as the *gandhabba* leaves for good, the physical body loses the “aliveness.” Our dog died several years ago, and I was shocked when I touched its dead body. It was cold and rigid, just like a piece of wood. The body warmth may be there for a little while because it takes some time to lose the body heat.
- In the days of the Buddha, most dead bodies were taken deep into the forests and discarded. Then wild animals would come and eat those bodies. If a body is not eaten by animals, it will start decaying and will start smelling bad. Then it will lose the flesh over time, and only the bones would be left. Even those bones will degrade and become dust in the long term.
- This *Navasivathika Bhāvanā* needs to be done in that fashion, to realize the unfruitfulness of getting overly attached to the physical body. Of course, we need to keep it in good shape by eating healthy and exercising regularly. If the physical body becomes out-of-shape that will lead to illnesses and much discomfort. We need to live a comfortable (not luxurious) life in order to be able to make progress on the Path.

The Uniqueness of the Mental Body (*Manomaya Kāya*)

6. It helps a lot to realize that one’s physical body cannot be taken as one’s essence.

- Even the mental body does not have an essence since that also will be discarded when a new existence (*bhava*) is grasped.
- However, the mental body is ESSENTIAL to make progress on the Path. The mental body of human existence is “hard to get” and thus we should utilize it now that we have that rare opportunity.

Why Is Mental Body Unique?

7. **The mental body (*gandhabba*) is VERY DIFFERENT from the physical body.** The mental body has a few of the smallest units of matter (*suddhāṭṭhaka*) TOGETHER with the essential elements of LIFE. Those ESSENTIAL elements are the *hadaya vatthu* and a set of five *pasāda rūpa*. **Those are the only LIVE things in a human (or an animal.)**

- The *hadaya vatthu* is the “seat of the mind” and where thoughts (*citta*) arise.
- We experience the five physical sensory inputs with the five *pasāda rūpa*.
- **Those essential items (collectively called *gandhabba*) are created by *kammic* energy and sustain the human *bhava*.**

How the Mental Body Controls the Physical Body

8. A live physical body has a *gandhabba* (mental body) in it. In the post “[Our Mental Body – Gandhabba](#),” we discussed a good analogy of how the mental body controls the physical body (see #8 in that post.)

- That *gandhabba* consists of a UNIQUE set of seven items called “*dasaka*” or “packages of tens.” Those are listed in #9 of the post “[Gandhabba Sensing the World – With and Without a Physical Body.](#)” In many posts, I often refer to six entities: *hadaya vatthu* and five *pasāda rūpa*.
- Different types of *dasaka* are formed just by incorporating **one mode of spin (*bramana*) and one mode of rotation (*paribramana*)** to a *suddhātṭhaka* (smallest unit of matter.) That is how an inert *suddhātṭhaka* becomes ALIVE. **When the *kammic* energy wears out, those motions stop, and that is the end of that existence (*bhava*.)**
- Details are in the two posts, “[Our Mental Body – Gandhabba,](#)” and “[Gandhabba Sensing the World – With and Without a Physical Body.](#)” One can get a deeper understanding by reading those posts. It is good to have at least a general idea.

The Mental Body Is Created by *Kammic* Energy

9. In fact, as we have discussed, when ANY living being grasps ANY new existence a corresponding mental body is created by the *kammic* energy. That mental body matches the particular *kamma* that was responsible for the new existence (*bhava*.)

- If that *kamma* was a *pāpa kamma* done with anger (say the killing of a human,) then the new *bhava* could be in a *niraya* (hell.) If that *kamma* was a *puñña kamma* done with compassion (say taking care of an invalid or sick person,) then the new *bhava* could be in a *Deva* realm. See, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma.](#)”
- Both those two scenarios could be true of ANY person who is below the *Sotāpanna Anugāmi* stage.
- The point is that even if one did not kill a human in the CURRENT life, that could have been done in a previous life. **We have no idea what we have done in our previous lives. That is the danger in the rebirth process.**

Gandhabba (Mental Body) Is Unique to Human and Animal Realms

10. We started the series with five posts (“[Origin of Life – There is No Traceable Origin](#)” to “[Cloning and Gandhabba](#)”) that laid the basic foundation of the Buddha’s description of life. As summarized in that first post, Buddha taught that there is no “traceable beginning” to life. That means each of us has existed (among the 31 realms of this world) “forever.”

- The next four posts specifically dealt with life in the human realm. It is a bit complex because human life involves a physical body (collection of material body parts) in addition to the mental body created by *kammic* energy. That same picture also holds for the animal realm.
- Living beings in all other realms just have “one integrated body.” For example, a *Brahma* only has a “body” very similar to the human mental body (*gandhabba*.) Such a “body” is “mostly mental” and the amount of matter is million-times smaller than a mustard seed. Of course, it expands to the size of the human body while inside the human body (it is like an energy field.)
- A *Deva* has a bit more dense “material body,” but is still invisible to us. Again, it has no *gandhabba*-type separate mental body.
- Beings in the lower realms may have denser bodies, but again do not have separate mental bodies.
- We need to focus more on human life. The growth of a “human body” **starting with an inert single cell** in the mother’s womb cannot be explained without the concept of *gandhabba*. That is why I published those four posts on *gandhabba* at the beginning of the series.

Summary

11. It is the mental body that is much more important than the physical body due to the following reasons.

- The “essence of a human” is the mental body that has the *hadaya vatthu* (seat of the mind) and the five *pasāda rūpa* (that “sense” visuals, sounds, tastes, smells, and touches.) Those entities are what constitute “the mind.” The ONLY WAY those can be created is via our *kammic* energy in our thoughts (specifically *javana cittā*.)
- The mental body (*gandhabba*) controls the physical body.
- A physical body lives only about a hundred years, while the mental body (*gandhabba*) may last many hundreds of years.
- However, we also need a healthy physical body to live a healthy life. We especially need a healthy brain since all external sensory inputs are first processed by the brain.

5.2.8.6 “Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1

February 8, 2020; added #13 (pronunciation guide) on July 23, 2020

Background

1. Just three months after the *Parinibbāna* (passing away) of the Buddha, the First Buddhist Council (*Dhamma Sangāyanā*) took place. The leading disciples of the Buddha realized the importance of organizing the teachings of the Buddha accumulated over 45 years. That process was organizing the material into “three baskets” (*Tipiṭaka*) was completed only at the Third Council held 200 years after the *Parinibbāna* of the Buddha.

- The material in the *Tipiṭaka* was transmitted mostly verbally from one generation to the next over roughly the first four hundred years. It was only at the Fourth Council that the *Tipiṭaka* was written down.
- The *Tipiṭaka* (or the Pāli Canon) was written down at the turn of the first century, 2000 years ago, in Matale, Sri Lanka. Pāli is a spoken language and does not have its own script. The *Tipiṭaka* was written with the Sinhala script.
- See details at “[Preservation of the Buddha Dhamma.](#)”

Writing Pāli Words in English – Different Convention

2. There are two specific issues in writing Pāli words in any language. Note that this is **not** regarding translation to English.

- Pāli is a phonetic language, meaning words need to provide the original sounds. Many words have their meanings explicit in the way they sound. See, “[Why is it Necessary to Learn Key Pāli Words?](#)”
- However, In “Standard English,” the same letter combinations may yield different sounds. For example, “**th**” is pronounced differently in “**them**” than in “**thief**.” Therefore, “Standard English” writing will lead to problems in writing Pāli words.
- The second problem is that Pāli words written with “Standard English” become very long. I see many Sri Lankans writing “*anicca*” as “*anichcha*” (අනිච්චා in Sinhala) because that is how it is pronounced. I also used to write “*gati*” as “*gathi*” since that is how it is pronounced.
- However, we need to adhere to the convention adopted by the Early Europeans (in the late 1800s) to avoid confusion.

3. When the early Europeans started writing the Pāli *Tipiṭaka* using the English alphabet (which originated from the Latin alphabet), they realized the necessity to represent the original sounds in an “unambiguous and efficient” way.

- We will call the convention they adopted “*Tipiṭaka* English.”
- That “*Tipiṭaka* English” convention is DIFFERENT from “Standard English.”

- Let us first address the “sound” issue.

English “th” Sound Depends on the Word

4. We know that “th” represents a different sound in the word “them” than in “thief.”

- A **phoneme** is the smallest contrastive segment in a language. In other words, they are the smallest building blocks that make the difference between two different words. The term *digraph* describes a combination of two letters that represent only a single phoneme.
- In words like them, father, and writhe, the *digraph* is **th (voiced)**, and the **phoneme** is /th/. This is the “ඳ” sound in Sinhala, as we will see below.
- On the other hand, in words like thief, Catholic, and both, the *digraph* is **th (voiceless)** and the **phoneme** is /t/. This is the “ඵ” sound in Sinhala.
- Don’t worry about the above technical terms. **The point here is that one MUST be aware of the correct “Standard English” when pronouncing those English words.**
- That was one reason to adopt a new “*Tipiṭaka* English” convention. Now, let us discuss the second reason.

Pāli Words can become very long in “Standard English”

5. Now let us see why the “Standard English” convention leads to long words written with the English (Latin) alphabet. Let us take a simple Pāli word, “*citta*“. In the original *Tipiṭaka*, it was written as “චිත” in Sinhala.

The “ch” sound in English is seen, for example, in “china” and “chain.” It takes two English letters to produce the “ච” sound. In the same way, the “ඵ” sound requires two letters, “th,” in English as in “Thailand” or “both.”

- Therefore, in “Standard English,” “චිත” would be reproduced as “**chiththa**.”
- As you can see, to write that word using “Standard English,” it would take eight letters instead of five letters in “**citta**.”
- With more complex Pāli words, the corresponding “Standard English” reproduction would be cumbersome. **That seems to be the second reason for using a different “*Tipiṭaka* English” convention; see below.**

Evolution of “*Tipiṭaka* English”

To address both the above issues, a “*Tipiṭaka* English” convention was adopted in the 1800s, as we discuss below. If you have not grasped what I am trying to get to, you will see it below.

6. I came across an old book, by James D’Alwis, published in **1870 (Ref. 1)**, that describes the historical process of cataloging the Pāli literature found in Sri Lanka (called Ceylon at that time.) The book is available at Amazon.

- The seed for the project was a request by a government agent in 1868 to the “Chief Translator to Government” to assist with a project in India to collect and compile Sanskrit literature.
- In 1869, the Chief Translator to Government replied that nearly all Sanskrit manuscripts in Ceylon were “importations from India.” He suggested that it would be worthwhile to initiate a similar effort to collect and compile the Pāli and Sinhalese manuscripts that existed in Ceylon.
- That proposal was approved in early 1870. James D’Alwis, who had done some work on Pāli/Sinhalese literature and Buddhism, was selected to collect and compile such manuscripts mainly from Buddhist temples (“*pansalas*.”)

- Mr. D’Alwis was a civil servant of the British Government at that time. At that time, there was a concerted effort by the English civil servants to recover and preserve all ancient literature that they came across in the Asian countries. See, “[Background on the Current Revival of Buddhism \(Buddha Dhamma\)](#).”
- The above background is confirmed by Dr. Malalasekera’s account in **Ref. 2**, pp. xv-xvii.

The Original Convention for “*Tipiṭaka* English”

7. The goal was to collect all Pāli manuscripts and write them with the English (Latin) alphabet. The early work by Mr. D’Alwis followed (as quoted from p. xxviii of the book) “the system sanctioned by Government in the Minute, which is published in the Appendix.”

- A full-page in the Appendix has the complete alphabet of the Sinhala language (and the corresponding English script adopted.) Download here: [Complete Orthography – Sinhala to English](#)
- That page (on p. 234 of the book) has the Sinhala alphabet, together with the Latin letters adopted to represent those sounds (**adopted on August 28, 1866.**) That was the first version of the “*Tipiṭaka* English” convention. As we will see below, one more change was adopted based on a recommendation by D’Alwis.
- It may be difficult to read that page. The following is an enlarged section containing the consonants.

| <i>Consonants.</i> | | | | | |
|--------------------|------|-------|------|------|-------|
| Gutterals ... | ක k | ඛ kh | ග g | ඝ gh | ඛ් ඛ් |
| Palatals ... | ච ch | ඡ chh | ජ j | ඣ jh | ඤ ñ |
| Linguals ... | ට t | ඨ th | ඳ d | ඬ dh | ණ ñ |

| Dentals | ත t | ඵ th | ද d | ධ dh | න n |
| Labials | ප p | ඵ ph | බ b | භ bh | ම m |
| Semi vowels | ය y | ර r | ල l | ළ l | ව v |
| Sibilants | ස s | ශ s' | ශ sh | හ h | |

- Now, let us discuss some of the adopted conventions in “*Tipiṭaka* English.”

Only “t” Represents the “ක” Sound

8. The letter “ක” in Sinhala represents the sound “th” is in Thailand or north. But the “*Tipiṭaka* convention” is to use “t.”

- Therefore, Thailand in “ordinary English” becomes “Tailand” in “*Tipiṭaka* English.”
- The word “gati” is pronounced as “gathi,” where **the sound “th” is in Thailand**. But the “*Tipiṭaka* English” convention is to write as “gati.”
- The word “*Tipiṭaka*” also starts with the “ṭh” sound. In “Standard English,” it would be, “*Thipiṭaka*.”

Anatta in “Standard English” would be “anaththa.”

- Therefore, words become significantly shorter with the “*Tipiṭaka* English” convention. With more complex words with the “ch” and “th” sounds, the corresponding English words can become very long.

Only “d” Represents the “ḍ” Sound

9. Another is the “ḍ” sound, pronounced like “**this**.” In “*Tipiṭaka* English,” the letter “**d**” represents the “**th**” sound in “**this**” or “**that**.”

- For example, the Pāli word “ḍaṣṣa” in “*Tipiṭaka* English” is “**d**asa.” which needs to be pronounced like the “**th**” sound in “**the**” or “**that**.”
- Of course, the word “dasa” appears in “dasa akusala” for “ten immoral deeds.”
- More examples are *sadda*, *hadaya* and *Deva*.

The “ḥ” Sound In the Above Table is With “ch”

10. It is interesting to see that the above Table (in #7) has the “ḥ” sound In the represented with “**ch**” as in “Standard English.” **Thus the decision to just use “c” to represent the “ḥ” sound was made later on.**

- The text in D’Alwis’s book represented that “mixed convention.” On p. 136, for example, the name “Kacchchāna” appears. In modern texts, it is “Kaccāna.”
- The word “*vivichhati*” (විච්ඡතී in Sinhala) appears on p. 73 as “*vivichhhati*,” where “ch” represented the “ḥ” sound and “chh” represented the “ḥḥ” sound. We can see why they decided to make that change too!
- By the time “*The Dhammasangani*” by Edward Müller came out in **1885 (Ref. 3)**, they had adopted the current convention to use “c” to represent the “ḥ” sound.

Current Convention – Only “c” Represents the “ḥ” Sound

11. For example, the letter “ḥ” frequently appears in Pāli verses, and it has the “**ch**” sound (as in **chai** tea). In “ordinary English,” the Pāli word *anicca* (අනිච්ඡ) would be “anichcha.” You can see why that would lead to very long words in English. I used to do that too, and I still see some Sri Lankans writing words that way.

- Therefore, in almost all cases, **a single English letter “c” represents the “ch” sound in “*Tipiṭaka* English.”**
- Note that “chai tea” would be “cai tea” in “*Tipiṭaka* English”!

“*Tipiṭaka* English” Conventions Hold Everywhere

12. The “ṭh” sound is ALWAYS represented by “**t**,” and, following are some examples that we use often.

- *Atta*, *Anatta*, *gati*, *sota*, *tanhā*, *tejo*, *Tilakkhana*, *Tisarana*, *āyatana*

The “ḍ” sound is ALWAYS represented by “**d**” as in the following:

- *Hadaya*, *sadda*, *dosa*, *Deva*, *desanā*, *diṭṭhi*, *dukkha*, *dugati*, *pasāda*

Finally, the “ḥ” sound is ALWAYS represented by “**c**” as in the following:

- *Anicca*, *citta*, *cakkhu*, *cuti*, *paccayā*, *sacca*, *rūpāvacara*, *cetasika*, *cetanā*

The above words are pronounced in the audio below:

5.2.8.6 “Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2

.4

February 15, 2020; added #12 (pronunciation guide) on July 23, 2020

Introduction

1. In the previous post, we discussed the reasons for the adoption of a “*Tipiṭaka* English” convention to write Pāli words by the European scholars in the 1800s. It is necessary to read that post first: [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#).”

- As we discussed, those early European scholars realized the importance of the need to preserve the “Pāli sounds” as much as possible. Of course, the other requirement was to keep the corresponding English version short.
- In that post, we discussed the adoption of “**t**,” “**d**,” and “**c**” to represent the “**ṭ**,” “**ḍ**,” and the “**ṇ**” sounds in Pāli.
- Here we will continue that discussion. The “**ṭ**” (with a “dot” underneath the “t”) represents the “**ṇ**” sound in Pāli.
- Then there are **aspirated** sounds “**th**,” “**dh**,” “**ch**,” and “**ṭh**” respectively for the “**t**,” “**d**,” “**c**,” and “**ṭ**” sounds. SOME of those “aspirated words” represent “emphasized versions” of the “unaspirated words.” I will explain it below.

We Need to Be Familiar With the “Tipiṭaka English” Convention

2. As I mentioned in the previous post, the above convention went into effect before the year 1900. Thus all Pāli documents compiled by the Pāli Text Society are consistent with this convention.

- It seems that the **Pāli texts (with the English alphabet)** available at the Sutta Central website are directly from the Pāli Text Society. **Those texts are accurate.** For example, here is the [“Dhammacakkappavattana Sutta \(SN 56.11\)”](#) that was the first discourse delivered by the Buddha.
- It is an excellent idea to examine that *sutta* (and try pronunciations of those Pāli words) with the guidelines provided with my two posts on the “*Tipiṭaka* English” Convention.

- Many of my posts at the puredhamma.net website are not entirely consistent with the “*Tipiṭaka* English” Convention, but I will try to make them compatible gradually. I have been trying to “upgrade” several posts each week in recent months.
- Of course, as I have repeatedly pointed out, many **English translations** of Pāli words at Sutta Central site are **not correct**. Examples include *anicca*, *anatta*, *Ānāpāna Bhāvanā*, and *viññāṇa*. See, for example, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”
- Now let us continue with the introduction to the “*Tipiṭaka* English” convention.

Only “ṭ” Represents the “ṛ” Sound

2. The “ṛ” sound in Pāli is the “ta” sound in English, as in “**T**om.” The “ṛ” sound in Pāli is ALWAYS represented by “ṭ.” **Note the “dot” underneath the “t.”**

- Some examples are *Paṭicca*, *paṭigha*, *paṭiloma*, *paṭisandhi*, *paṭipadā*.
- In the previous post, we saw that the “ṭ” sound is ALWAYS represented by “t” (without the “dot” underneath the t.)
- The word *Tipiṭaka* is an excellent example of both sounds, the “t” and the “ṭ.” I hope you can catch the difference in the audio in #4 below.

Aspirated Versions

3. Now let us consider the “aspirated versions” of those four sounds that we have discussed so far. We need to keep in mind that we are dealing with “*Tipiṭaka* English” and NOT “Standard English.”

- **The aspirated version accompanies a forceful expulsion of air.** If you hold a thin piece of paper in front of the mouth, it should move when you make an “aspirated sound.”
- The following video explains that for English words. But it is the same idea.

[WebLink: youtube: Aspirated sounds](#)

Putting Emphasis on “ṛ” Sound to Make the “ṛ” Sound

4. The “ṭ” (“ṛ”) sound, when aspirated with “ṭh,” becomes the “ṛ” sound. It is not that common to have the “ṭh” by itself. An example is *ṭhapetvā*, meaning “placement.”

- In most cases, the “ṭ” sound is in a word just before the “ṭh” sound as in *aṭṭha* (අත්ථ for number 8.)
- Here are more examples of the “ṭ” (“ṛ”) AND “ṭh” (“ṛ”) sounds coming together: *diṭṭhi* (දිට්ඨ for view), *sandiṭṭhika* (සන්දිට්ඨික for “seeing ‘saṇ’”), *aṭṭha* as in *aṭṭha purisapuggalā* and *aṭṭhaṅgika*, *kammaṭṭhāna*, *satipaṭṭhāna*.
- In #2, we mentioned some example words with the “ṭ” sound: *Paṭicca*, *paṭigha*, *paṭiloma*, *paṭisandhi*, *paṭipadā*.
- Compare all those with the following words with just the “t” (“ṭ”) sound: *atta* (අත්ථ for the truth), *satta* (සත්ථ for living being; note that *Bodhisatta* is a living being who is striving to attain the *Buddhahood*.)
- Here is the pronunciation of the unaspirated *paṭicca*, *paṭigha*, *paṭiloma*, *paṭisandhi*, *paṭipadā* AND aspirated *ṭhapetvā*. Both aspirated and unaspirated in *aṭṭha*, *diṭṭhi*, *sandiṭṭhika*, *aṭṭhaṅgika*, *kammaṭṭhāna*, and *satipaṭṭhāna*. Also, *Tipiṭaka*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-1](#)

Putting Emphasis on “ṭ” Sound to Make “ṛ” Sound

5. The sound “**th**” is the “aspirated version” of “**t**” as in *Samatha* (සමථ in Sinhala) in *Samatha Bhāvanā*. The word *ratha* (රථ for “vehicle”) is another.

- Here are more words with both the “**t**” and the “**th**” sounds: *tathāgata* (තථගත), *natthi*, *atthi*, *yathābhūta*, *hadaya vatthu*.

6. There are a few words with both aspirated and unaspirated versions. For example, when the “*atta*” (අත්ත) refers to the meaning “truth,” it is (the “true-ness”) emphasized with the word “*attha*” (අත්ථ).

- There are a few words like that where the **meaning is emphasized with the aspirated version**. We will discuss that with examples from the *Tipitaka* later on. Two more such words addressed in #8 below.
- Many other words do not have such an “emphasized” and “non-emphasized” versions. Here are some examples with ONLY the “**th**” sound: *vithi*, *Itthi*, *Samatha*, *Thero*, For example, **there are no words as viti**, **Itti**, **Samata**, or **Tero**.
- Here is the pronunciation of *Samatha*, *ratha*, *tathāgata*, *natthi*, *atthi*, *yathābhūta*, *hadaya vatthu*, *vīthi*, *Itthi*, *Samatha*, *Thero*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-2](#)

Putting Emphasis on “**ඳ**” Sound to Make the “**ධ**” Sound

7. The sound “**dh**” is the “aspirated version” of “**d**” as in *Dhamma* (ධම්ම). More examples of words with the “**dh**” sound: *Dhamma*, *adhamma*, *dhātu*, *gandha*, *gandhabba*, *middha*, *nirodha*, *saddhā*, *andha*, *sandhi*, *sādhū*, *paṭisandhi*, *samādhī*.

- Both the unaspirated and the aspirated sounds are in words, *Dhammapada* (ධම්මපද in Sinhala) and *Buddha* (බුද්ධ), i.e., both the **dh** and **d** sounds appear. More examples: *passaddhi*, *iddhi*, *middha*.
- Here is the pronunciation of *Dhamma*, *adhamma*, *dhātu*, *gandha*, *gandhabba*, *middha*, *nirodha*, *saddhā*, *andha*, *sandhi*, *sādhū*, *paṭisandhi*, *samādhī*, *Dhammapada*, *Buddha*, *passaddhi*, *iddhi*, *middha*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-3](#)

Putting Emphasis on “**ච**” Sound to Make the “**ඡ**” Sound

8. The sound “**ch**” (“**ඡ**”) is the “aspirated version” of “**c**” (“**ච**”) as in *chanda* (ඡන්ද) meaning “desire.” The unaspirated is in *calana* (චලන), meaning “movement.”

- Most Pāli words with the “**ch**” sound also have the “**c**” sound coming first. Some examples are, *iccha*, *vicikicchā*, *appiccha* (*appa iccha*), *macchariya*, *micchā*, *micchācāra*, *micchāvācā*, *pariccheda*, *gacchati*, *uccheda*.
- Two more critical Pāli words have the aspirated version emphasizing the meaning of the unaspirated version, just like in the case of *atta/attha* discussed above in #6.
- Those two are *icca/iccha* (ඉච්ච/ඉච්ඡ) and *anicca/aniccha* (අනිච්ච/අනිච්ඡ). The two aspirated words emphasize the meanings of unaspirated words. We will discuss that in the next post.
- Here is the pronunciation of *chanda*, *calana*, *iccha*, *vicikicchā*, *appiccha*, *macchariya*, *micchā*, *micchācāra*, *micchāvācā*, *pariccheda*, *gacchati*, *uccheda*, *icca*, *iccha*, *anicca*, *aniccha*.

[WebLink: mp3 file: Pali words Tipitaka English Post 2-4](#)

Connection to Key Concepts in Buddha Dhamma

9. The next post will focus on some specific subtleties in Pāli that will help clarify some key concepts, including *anatta*.

- Over the past year, I have realized that many misconceptions could be easily avoided by looking at a few Pāli words and their inherent meanings.
- For example, the Pāli word *atta* has two different meanings. Furthermore, the word *attha* emphasizes just one of those two meanings.
- Similarly, the meanings of the words *icca* and *anicca* become emphasized in *iccha* and *aniccha*.

Many of Posts at Puredhamma.net May Not be Up To “Tipiṭaka English” Convention

10. I became aware of this issue gradually over the past several months. During that time, I have progressively taken into more of the above rules. I will try to stick to this convention in future posts and will gradually revise old posts to be compatible too. That will take some time.

- All Pāli literature at the Sutta Central website seems to be compatible with the “Tipiṭaka English” convention. The “legacy site” with the Pāli Tipiṭaka is at “[SuttaCentral](#).”
- Once you select a *sutta*, you can access translations to several languages using the “hamburger icon” on the top left.
- Of course, all translations there have errors, especially with keywords like *anicca*, *anatta*, *Ānāpāna Bhāvanā*, and *viññāṇa*.

Singular to Plural in Pāli

11. The following issue is not somewhat unrelated, and many people could be aware of it. But I would mention it here since it is essential to know.

- Many Pāli nouns ending in “short *a* (/ə/)” converted to plural by replacing that “short *a*” with a “long *a*” or *ā*.
- For example, *Deva*, *Brahma*, *sutta*, *citta*, *apāya*, *gandhabba*, *jhāna* are singular and the corresponding plural are *Devā*, *Brahmā*, *suttā*, *cittā*, *apāyā*, *gandhabbā*, *jhānā*.
- Finally, Pāli Glossary pages with pronunciation available at “[Tables and Summaries](#).”

Pāli Alphabet with Illustrations & subtitles

12. The following video could be very useful in learning the Pāli alphabet (in English.) Moreover, it provides excellent instructions on pronunciation.

[WebLink: youtube: PALI 101 – Pāli for Beginners – Level 1 - Pāli Alphabet with Illustrations & subtitles](#)

5.2.9 Origin of Life – One Creates One’s Own Future Lives

January 25, 2020; revised January 26, 2020 (video inserted in #15)

Introduction – Origin of Life

1. In the first post in this series, I pointed out that there is no traceable “beginning” to the life of any existing living being. See, “[Origin of Life – There is No Traceable Origin](#).”

- However, any living being’s FUTURE LIVES are created by that living being.
- It is critical to understand how one’s mindset and thoughts (in particular *abhisankhāra*) can lead to different types of rebirths. That is the basis of Buddha Dhamma and is explained in *Paṭicca Samuppāda* (PS.)

- In simple terms, “bad thoughts/mindset” lead to “bad births” and “good thoughts/mindset” lead to “good births.” The problem is that most are “bad births” and those infrequent “good births” do not last long.
 - The Buddha said, “One who sees *Paṭicca Samuppāda* sees the Dhamma. One who sees the Dhamma sees *Paṭicca Samuppāda*.” See, [“Paṭicca Samuppāda – ‘Pati+ichcha’ + ‘Sama+uppāda’.”](#)
2. In the first several posts in “[Origin of Life](#),” we discussed the background material necessary to understand how a complex **physical body of a human** starts with a single cell, a zygote.
- However, **the most important part of a human is not the physical body, but the mental body**. It goes by various names in Buddha Dhamma, *manomaya kāya* and *gandhabba* being the most common. However, that mental body arises due to a *paṭisandhi viññāṇa* and remains as a *kamma bīja* until coming to the mind of a living being at the beginning of a new existence (*bhava*) as a *dhammā*.
 - Average humans focus only on keeping the physical body in good condition. It is much more beneficial to improve the “mental body.” That way, one will be able to stop ALL FUTURE SUFFERING.

Critical Role of *Paṭicca Samuppāda*

3. The seed (*kamma bīja*) for a future existence (*bhava*) is the *paṭisandhi viññāṇa* cultivated via “*saṅkhāra paccayā viññāṇa*” in PS. I briefly discussed/explained that with [nine recent posts on *Paṭicca Samuppāda*](#) (PS.) The last of those posts, [“Paṭicca Samuppāda – From Mind to Matter”](#) came to that conclusion.

- In many previous posts, we have discussed that *paṭisandhi viññāṇa*, *gandhabba*, *kamma bīja*, and *dhammā* are very similar terms. See, [“Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.”](#)
 - When grasping a new human existence, that *paṭisandhi viññāṇa* becomes a human *gandhabba* with the complete blueprint of that human. See, [“Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.”](#)
 - Then we discussed the 1990 movie “ghost” to provide visualization of a human *gandhabba*. A *gandhabba* has only a trace matter. An average human cannot see a *gandhabba*. **However, it has the complete “blueprint” for a human**. See, [“Ghost 1990 Movie – Good Depiction of Gandhabba Concept.”](#)
 - That *gandhabba* then gives rise to a fully-grown human as explained in the two posts, [“Buddhist Explanations of Conception, Abortion, and Contraception”](#) and [“Cloning and Gandhabba.”](#)
4. There is a lot of information summarized above using different terms. In the following, I will try to organize that in a systematic way and will also describe the “bigger picture” within the 31 realms of existence.

The General Process of Grasping an Existence (*Bhava*)

5. In broad terms, there are three main existences (*bhava*) but they branch out to thirty-one. Existence in the *kāma bhava* (i.e., 11 realms in *kāma loka*), *rūpa bhava* (16 realms in *rūpāvacara Brahma loka*), and *arūpa bhava* (4 realms in *arūpāvacara Brahma loka*.) The 11 realms in *kāma loka* are the 4 realms in the *apāya*, one human, and six *Deva* realms.)

- **Thus, there are 31 existences (*bhava*) in this world. Any living being belongs to one of those.** Each such existence has a finite lifetime. Some are fixed and others are variable. *Deva* and *Brahma* realms have fixed lifetimes. Lower realms starting with the human realm have variable lifetimes. See, [“31 Realms of Existence.”](#)
- However, when a living being grasps a new existence in ANY realm, the duration of that existence WILL BE fixed. For the human and lower realms, that lifetime depends on the *kammic* energy that “feeds” that particular existence. For example, one human may have that human existence for 10,000 years and another may have only 900 years.

Each *Bhava* Starts With a Mind-Made Body (*Manomaya Kāya*)

6. Any living being (other than an *Arahant*) will grasp (or latch onto) a new existence when the current existence runs out of its lifetime. At that moment, *kammic* energy for the new existence creates a “**mind-made body**” or a *manomaya kāya*.

- That transition from one existence (*bhava*) to another happens with an *uppatti* PS process. Specifically, that happens with the “*upādāna paccayā bhava*” step in that *uppatti* PS cycle.
- But it is a *paṭisandhi viññāṇa*” created via “*saṅkhāra paccayā viññāṇa*” step in PS that is responsible for that new existence (*bhava*.)
- In other words, the *kammic* energy embedded in that *paṭisandhi viññāṇa* is the energy that creates the *manomaya kāya* of the new existence (*bhava*.) **Thus, *manomaya kāya* has only a tiny bit of energy that was created by the mind.**
- **That *manomaya kāya* does not die until the end of that *bhava*. Living beings in each and every realm will have a *manomaya kāya*.**
- Details are at the nine posts on PS, “[Paticca Samuppāda – Not ‘Self’ or ‘No-Self’.](#)”

Brahma Realms Only Have *Manomaya Kāya*

7. A *manomaya kāya* has a *hadaya vatthu* (seat of the mind) and UP TO five *pasāda rūpa* (that enable experiencing the external world.) The *hadaya vatthu* is different for different realms and also has INDIVIDUAL characteristics. **Thus even two humans will have different *hadaya vatthu* embedding their personal characteristics.** The following is a brief summary of different realms.

- The four highest *Brahma* realms (*arūpāvacara Brahma* realms) have ONLY the *hadaya vatthu*. Those *Brahmā* can only think.
- *Brahmā* in the 16 *rūpāvacara Brahma* realms have *hadaya vatthu* and TWO *pasāda rūpa*: *cakkhu* and *sota pasāda rūpa*. They can see and hear with just those *pasāda rūpa*. They do not have physical bodies, and thus do not have eyes and ears like us. Their “seeing” does not require light and they “see” things far away. In the same way, they can hear sounds that are far away. But they need to “direct their attention” to a particular location to see or hear.
- All those *Brahmā* in the 20 *Brahma* realms have only *manomaya kāya*.

Living Beings in *Kāma Loka* Realms Have Denser Bodies In Addition to *Manomaya Kāya*

8. Things become complex when we get to the 11 realms in the *kāma loka*.

- *Devā* in the six *Deva* realms have *manomaya kāya* with *hadaya vatthu* and five *pasāda rūpa*. They also have “physical bodies” like ours but at a much finer level. Those “subtle bodies” are also created by *kammic* energy and thus *Devā* are born with their “full bodies.” That means they do not grow or get old but just die at the end of their lifetimes. There is only one “*jāti*” within a *Brahma* or *Deva bhava*. We cannot see either *Brahmā* or *Devā*.
- Human “structure” is the same as that of the *Devā* but, of course, human physical bodies are much denser. Furthermore, human “structure” has many common features with the animal realm. The other three lower realms in the *kāma loka* are more complex and we will not discuss them here.
- Let us briefly discuss the features of the human and animal realm. I will address only the human realm, but most of those features are the same for the animal realm.

There are Multiple *Jāti* Within a Human *Bhava*

9. A human also has a *manomaya kāya* with a *hadaya vatthu* and five *pasāda rūpa*. But a human can exist in TWO forms.

- **ONE:** Much of the time in the human *bhava*, it stays with JUST the *manomaya kāya*. That state is normally referred to as the *gandhabba* state. A *gandhabba* is like a *Brahma* in the following aspect. A *gandhabba* can see and hear without the aid of physical eyes and physical ears. Even though it has five *pasāda rūpa*, it cannot touch, taste, or smell since there is no dense physical body.
- **TWO:** A human will have a “dense physical body” only after that *gandhabba* (*manomaya kāya*) gets into a womb and creates a physical human body.
- It is good to contemplate how such a tiny amount of energy in a *manomaya kāya* can “build” a human body that can weigh over a hundred pounds (or many kilograms.)

A *Gandhabba* for a Human Is Like a Seed for a Tree

10. A good point to start is to think about how a tiny seed grows into a huge oak tree.

- That seed has the blueprint for the whole tree. The seed germinates and pulls in food and water from the soil to grow into a large tree. The tree trunk, limbs, and leaves are all made from the food and water extracted from the soil.
- In the same way, the “seed” for a full-grown human is a zygote, which is a single cell. But a zygote by itself cannot grow into a human. A “human mental body” (or a *gandhabba*) needs to merge with the zygote to start the process. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”
- The mental body or the *gandhabba* has the blueprint for a full-grown human. Some features of the physical body come from the parents via the zygote.

11. We saw that the seed takes all the “building material” from the soil to grow to a tree. A “live zygote” grows first by taking food from the mother to become a baby. Once outside the womb, that baby starts eating food and becomes a grown human.

- This is why the physical body is secondary to the mental body (*gandhabba*.) **All mental activities are with the *gandhabba*. Furthermore, a *gandhabba* is fully human. It just does not have a dense body to be able to touch, eat, or to smell odors.** See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”
- The physical body is just a shell. The *gandhabba* makes all the decisions. The physical body is needed for the *gandhabba* to experience touches, tastes, and odors. See, “[Gandhabba Sensing the World – With and Without a Physical Body](#).”

The Lifetime of a *Gandhabba* Is the Length of Human *Bhava*

12. Therefore, within a human *bhava*, there can be many “human births” (*jāti*.) See, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- When a physical body dies, the *gandhabba* comes out and waits for another womb. However, **that *gandhabba* state in between two human lives is not an *antarābhava* because it is within the SAME human *bhava*.** See, “[Antarābhava and Gandhabba](#).”
- A human *jāti* lasts around a hundred years, but a human *bhava* may last thousands of years.
- Those different human births (*jāti*) within a human *bhava* will have similar characteristics. The physical appearance will change since those of parents influence via the zygote. But the successive lives usually have similar *gati* and also tend to have close geographic locations of birth.

- A good example is Dhammuwan, who is now a Sri Lankan, but was born in India at the time of Buddhaghosa 1500 years ago; see, "[Boy Who Remembered Pāli Suttā for 1500 Years.](#)" More rebirth accounts at, "[Evidence for Rebirth.](#)"

How Does a *Gandhabba* (or a *Brahma*) See and Hear Without Eyes and Ears?

13. In the movie "ghost" we saw that a *gandhabba* can see not only other *gandhabbā* (which is the plural for *gandhabba*) but also humans and anything else in the world. See, "[Ghost 1990 Movie – Good Depiction of Gandhabba Concept.](#)" How is that possible without having physical eyes and ears?

- Our understanding of nature is extremely limited. Before modern science made some technical breakthroughs within the past hundred years or so, we would not have believed that it would be possible to "see" an event happening thousands of miles away, in real-time. Yet, we do that with televisions now and don't think twice about it.
- These days we can record such visuals with micro-sensors that are so small that they are hard to see. Details at, "[Gandhabba Sensing the World – With and Without a Physical Body.](#)"

14. When a human *gandhabba* is born (at a *cuti-paṭisandhi* moment of grasping a new *bhava*), the following amazingly miniature "sensors" are made by *kammic* energy.

- They are *hadaya vatthu* (seat of the mind) and five *pasāda rūpa* (*cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*.) Of course, the *ghāna*, *jivhā*, and *kāya pasāda rūpa* REQUIRE signals from a physical body (of odors, tastes, and touches) to function.
- The *cakkhu* and *sota pasāda rūpa* can detect visuals and sounds without the aid of eyes and ears. The *cakkhu pasāda rūpa* is the smallest entity that can "see." *Sota pasāda rūpa* is the smallest entity that can hear.
- Evidence for the existence of *gandhabba* (*manomaya kāya*) has accumulated over the recent years, as we discuss now.

Seeing and Hearing With the "Mental Body" (*Gandhabba*)

15. People who had Near-Death Experiences (NDE) say they could see and hear even though their physical bodies (and the brains) were "clinically dead." They say they were watching doctors operating on their bodies from the ceiling. Their "mental bodies" (*gandhabbā*) had come out of the physical body. The book "Consciousness Beyond Life" by physician Pim van Lommel (2010) gives detailed accounts of case studies of NDE experienced by people undergoing heart operations. Here is a youtube video on the subject:

[WebLink: youtube: Near Death Experiences & Evidence of the Afterlife](#)

- Some people can have Out-of-Body Experiences at will; see, "[Manomaya Kāya and Out-of-Body Experience \(OBE\).](#)" They can remove their *gandhabba kāya* from the physical body at will. Then they do not need eyes and ears to see and hear.
- Even though there are people who say they can teach others how to do that, I don't think that is possible. That ability is due to a *puñña iddhi* or due to past good *kamma*.

16. It is critical to realize that there phenomena that cannot be explained with our ordinary sensory experiences. Only a Buddha can discover these "hidden" facts about a wider world with 31 realms.

- However, the Buddha said that average humans are not capable of fully comprehending the characteristics of living beings in various realms. It is good to know the basic facts, but it does not serve any purpose to try to rationalize them with the limited sensory faculties we have.
- Yet any average human is capable of figuring out that these explanations are self-consistent and help clarify many of our experiences. That confidence will grow as one starts following the Path (i.e., not only

living a moral life but also learn the true nature of this world.) The mind becomes purified and is able to ‘see’ at deeper levels.

Why Do We Have Physical Bodies?

17. We need physical bodies to be able to touch (and for sex), taste foods, and to smell odors. But a physical body comes with a price. We have to endure all kinds of diseases including cancer, body aches, the decay of body parts, etc. *Brahmā* and *Devā* do not experience those, but of course, death is inevitable to all.

- Furthermore, it is a burden to “carry around” this heavy body. As I have mentioned before, even breathing requires an effort (but only asthma patients feel that.) It is such a relief to come out of the physical body, as described by those who have had NDE or OBE experiences.
- However, **if one is forced to stay with the *gandhabba* body for a long time**, one will start “missing” the ability to touch, taste, and smell. That is why all human *gandhabbā* desperately wish to be able to get into a womb to get a human birth.
- The point is that a *gandhabba* with an unimaginably small “body” can experience everything better, except the ability to touch, taste, and smell.

Why Are There So Many Different Terms for *Kammic* Energy?

18. Even though *viññāṇa*, *kamma bīja*, *dhammā*, and *gandhabba* are related, those terms are used in different contexts. Here is one way to remember how these different terms appear in different situations.

- First, energy for future *vipāka* (including future rebirths) created via “(abhi)*saṅkhāra paccayā viññāṇa*.”
- Such tiny amounts of energies stay in the “*nāma loka*” (out there) as *kamma bīja* (*kamma* seeds.) See, [“Our Two Worlds: Material and Immaterial.”](#)
- When the conditions are right, a strong *kamma bīja* can give rise to a new existence (*bhava*) when those *kammic* energies come back to the mind as *dhammā*.
- Such a new existence are grasped as *paṭisandhi viññāṇa*. That *paṭisandhi viññāṇa* gives rise to a *manomaya kāya*, which has a special name of *gandhabba* for human and animal realms.
- *Manomaya kāya* means “a body made by the mind.” **That is how we create our own future lives!**
- If you do not fully understand the above, you can read the previous posts in this series, or ask questions. It may take a little while to fully comprehend all relationships.

19. We have now finished the first phase of Buddha Dhamma dealing with the origin of life. **Life is not created by a Creator. It does not arise arbitrarily either.** We discussed those two extreme views earlier in “[Origin of Life](#)” series.

- Those concepts discussed above could be new to many, and thus may take some time to understand or get used to. But I assure that there is complete self-consistency of what I have described and also consistency with the *Tipiṭaka*. My suggestion is to print out this series of posts and to have them ready for quick reference. If there are any questions, please comment at the forum or send an email: lal@puredhamma.net.
- We will discuss several significant implications that can be reached with this “correct world view” of the Buddha in future posts.

5.3 Good Explanations – Key to Weeding Out Bad Versions of Dhamma

1. Today, we have many different religions, world views, cults, and even different versions of the Buddha Dhamma: *Theravāda*, *Mahayana*, *Zen*, *Vajrayana* (Tibetan), etc. Actually, *Zen* and *Vajrayana* both originated from *Mahayana* (see, "[Historical Timeline of Edward Conze](#)"); thus *Theravāda* and *Mahayana* are the two main categories. How could one decide which one to choose?

2. Here is a good example of an obvious inconsistency:

In *Mahayana* Buddhism, one is supposed to take a vow as to not to attain Enlightenment (*Nibbāna*) until ALL BEINGS are ready to attain *Nibbāna*. Whoever came up with this idea did not understand that there are an infinite number of beings.

- On this Earth alone, scientists estimate that there are 10 trillion of just ants (million ants for each human being!). It also displays a lack of understanding that most beings are incapable of attaining *Nibbāna*, until a human or *deva* birth is attained, which are rare events; see, "[The Grand Unified Theory of Dhamma](#)."
- As the Buddha advised in the *Kalama Sutta*, everyone needs to examine the different options and choose the one that is without any contradictions.

3. In Buddha's time, there was of course no "science" that educated the masses about the physical world. Even though the Buddha referred to the innumerable world systems and innumerable beings in them, people just had to believe those only based on faith. Today we are fortunate to have a well-established scientific method to rule out "bad theories" and to focus on "good theories."

- This method cannot match the Buddha's method of deciding by EXPERIENCE that he advised in the *Kalama Sutta* as mentioned above, but it gives a filtering mechanism to weed out the stuff that is clearly not worth pursuing. Thus the scientific method can be used as "pre-screening" to get rid of obviously unsuitable paths or "theories."

4. What is the "scientific method"?

An acceptable "theory" must have,

- power (ability) to explain as many things that we experience in this world,
- consistency, i.e., not one explanation can be inconsistent with another within the same theory,
- the power to predict, i.e., point out things that are still unknown but could be verified in the future.

5. If one would want to read more about the scientific method, I can recommend two books: "The structure of scientific Revolutions" by Thomas Kuhn is a classic; "The Beginning of Infinity" by David Deutsch is a recent and more easy-to-read book which also discusses infinity which is a key concept in Dhamma.

6. Thus explanatory power, consistency, and the power of prediction are the three measures of the validity of a scientific theory. Buddha Dhamma is a theory about existence for someone who has not yet "seen" its validity.

- My goal with this website is to present the Dhamma as a scientific theory. I will try to point out the explanatory power of the Dhamma, that there are no inconsistencies in Dhamma, and that many things in the Dhamma that were so far ahead of the times and only now are being confirmed by science.
- In the following video Dr. Deutsch explains the start of the scientific revolution on a few hundred years ago.

[WebLink: YOUTUBE David Deutsch: A new way to explain explanation](#)

- As explained above, science proceeds via conjectures (theories) that are continually tested. There are no conjectures in Buddha Dhamma. The truths revealed in Dhamma are still being re-discovered by science. The vagaries of life can only be explained in terms of Buddha Dhamma; see, "[Complexity of Life and the Way to Seek Good Rebirths](#)."

7. Buddha Dhamma is not a religion in the normally accepted sense of the word “religion.” The Buddha never said that he can take someone to “salvation” if someone believed in him. **One attains *Nibbāna* by purifying ONE’S OWN mind.** The Buddha just showed WHY one should strive for *Nibbāna* and HOW to purify one’s mind by following the Noble Eightfold Path.

- Buddha Dhamma is a complete description of existence, or nature. A Buddha discovers the laws of nature appears by his own mental efforts. It is for us to decide whether that world view makes sense to us, and then to use the Path he showed to attain *Nibbāna*, the state of unconditioned, permanent happiness.
- One could start on the Path of the Buddha in a gradual manner, verifying for oneself the benefits at each step; see, “[Living Dhamma](#).”

5.3.1 **Consciousness and the Brain**

I think Professor John Searle is one of the great philosophers of today who have the right ideas about consciousness. If he comes to learn about pure Dhamma, he may be able to articulate his points even better. Here is one of his presentations:

[WebLink: YOUTUBE: Consciousness & the Brain](#)

5.3.2 **Matter Creates Mind or Mind Creates Matter?**

The deep meaning of “*Manopubbangama Dhamma, mano setta manomaya*”, is that mind is the origin of everything. This is unfathomably a strange statement at first, but when one studies Abhidhamma, it becomes clear why this is true.

Before I get into the details, it is important to know that some scientists are beginning to realize this. Even though they cannot yet make the right connection, they can see that the reality has to be that way. It will be interesting to see whether how much progress they can make, without really approaching the problem other than from Buddha Dhamma.

Anyway, let us listen to these “new ideas” from a special group of scientists. They are indeed new from their perspective, since they have not been exposed to Buddha Dhamma, which is at the moment is hidden for most people.

In the following video a group of scientists discuss why the time has come to change the paradigm:

[WebLink: YOUTUBE: Consciousness & Quantum Physics](#)

Here is a presentation by Dr. Robert Lanza who’s book “Biocentrism” basically says that life did not arise from matter (universe), but the universe arose from life (pretty much agreeing with the Buddha Dhamma):

[WebLink: YOUTUBE: Robert Lanza on theory of Biocentrism](#)

5.4 Consciousness – A Dhamma Perspective

- [What is Consciousness?](#)
- [Consciousness Dependence on Number of Dimensions](#)
- [Six Kinds of Consciousness in Our 3-D World](#)
- [Expanding “Consciousness” by Using Technology](#)
- [Expanding “Consciousness” by Purifying the Mind](#)
- [What is Mind? How do we Experience the Outside World?](#)

5.4.1 Consciousness Dependence on Number of Dimensions

For an introduction to consciousness, see, [“What is Consciousness?”](#)

1. When we look deeply into the issue of consciousness, we come to realize the unimaginable possible varieties of life. Let us start with the issue of dimensionality. Humans live in a four dimensional world; in other words, humans are aware of four dimensions -three dimensions of space plus time.

- Even though we used to think time being different from spatial dimensions, with his Theory of General Relativity, Einstein demonstrated that space and time are interrelated. He showed that the force of gravity can be explained as perturbations in the space-time fabric due to mass.
- Can there be beings existing in higher dimensions that we are not aware of?

2. Of course, we cannot even begin to imagine more than four dimensions (or more than three spatial dimensions). However, it is easier to think of, and visualize, lower number of dimensions.

- Imagine a two-dimensional creature living on your kitchen table. An ant would be the closest real example, if we imagine that the ant cannot see above the table (a real two-dimensional creature would have only a length and width and no height). Now if we put a hand on the table, the 2D creature could see part of the projection of the hand on the table. Now if we take the hand off the table, as far as the 2D creature is concerned, the “hand” disappeared; it cannot “see” any part of the hand if it is off the table, and thus it has no “awareness” of that hand existing anywhere. It does not exist in its “2-D universe”
- For an amusing story of a 2D creature, see “Flatland: A Romance of Many Dimensions” by Edwin A. Abbott (2002). It was written in 1884 by Abbott, a mathematician.
- Here is a “fun video” from Dr Quantum which illustrates the idea:

[WebLink: YOUTUBE Dr. Quantum in Flatland](#)

3. Therefore, the “awareness” of the 2D creature on the kitchen table surface is limited to its 2D world. It is not aware of anything outside the surface of the table (if it is a “2D world” the surface can extend to infinity and as far as our 2D creature is concerned it would not have “an end”). Furthermore, a 1-D world embedded in that 2D world would be a line on that surface. A 1-D creature in that 1-D world will not see anything that lies outside the line. Thus, the 2-D creatures can go in out of the 1-D world by crossing that line!

- It is clear that the consciousness of a 1-D creature is very limited, not necessarily by its mental capabilities, but just by the dimensions of the “world” that it is in. A 2-D creature has an expanded consciousness compared to the 1-D creature. We in the 3-D world have even farther expanded consciousness. (It must be kept in mind that one needs to incorporate the time dimension in all the above cases where only the space dimensionality was considered).

4. Therefore, if our world has more than three spatial dimensions, there may be other worlds that we are not aware of, since our consciousness is limited to the three spatial dimensions.

- Thus, there may be beings in different dimensions that we are not aware of. We may be able to see “projections” of them if there is some overlap in 1, 2, or 3 dimensions. If there is no overlap at all, then we will not be able to see them at all, i.e., we will not be “conscious” of the presence of them.
- For example, in the low dimensionality case we considered above, if a 2-D creature crosses over the “1-D line world”, the 1-D creature will see a “dot” during the time when there is an overlap of the 2-D creature with the line. Yet, if the “1D world” lies above the table top, there is no overlap and the both creatures will not be conscious of the presence of each other’s worlds.

5. It is possible the “see” beings other than humans and animals by developing certain *jhānic* (*abhiññā*) powers. There were many yogis even before the Buddha who could access and interact with such beings. One does not have to attain *Nibbāna* to do that, and there are *Arahants* who have not developed such powers. In fact, the Buddha discouraged people from interacting with such beings, particularly with those in the lower realms.

- “Our world” is much more complex than what is grasped by our senses, even though technology has enabled us to expand our consciousness; see, “[Expanding Consciousness using Technology](#).” Yet, we can expand consciousness even more by purifying our minds; see, “[Expanding Consciousness by Purifying the Mind](#).” A purified mind can see the truth in the Buddha’s wider world; see, “[The Grand Unified Theory of Dhamma](#).”
- And our lives do not end with this one; see, “[Evidence for Rebirth](#).”
- Those two facts constitute the basis of the true nature of existence, and need to be thought about critically; one cannot comprehend the message of the Buddha until one at least has some idea about this “big picture.”

Next, “[Six Kinds of Consciousness in our 3-D World](#)”,

5.4.2 Six Kinds of Consciousness in Our 3-D World

Having looked into the issue of the “awareness” or consciousness issue related to dimensions, now we turn to our familiar 3-D space. Even here the possibilities are endless, as we see below.

1. We become aware of our surrounding “objects” (i.e., visual objects, sound, smell, taste, tangible objects) using the five “external senses” of eye, ear, nose, tongue, and the body. We see visual objects with our eyes, sounds with our ears, smell with our nose, taste with the tongue, and touch or feel with our body.
 - Correspondingly, the Buddha stated that there is eye-consciousness, ear-consciousness, nose-consciousness, tongue-consciousness, and body-consciousness. The cognitive processes that involve those “five physical doors” are called five-door processes.
 - In addition to the above mentioned five traditional physical senses, in Buddha Dhamma there is mind and the associated mind-consciousness, since we are also conscious about mind objects such as thoughts and visual images. The mind-consciousness is also involved in each of the five-physical-door processes.
2. Note that the Buddha did not mention brain in the mind-consciousness, and he used the term “mind element” without mentioning the brain. This is because the mind belongs to the “*manomaya kāya*” and the brain belongs to the “physical body”; see, “[Manomaya Kāya and Physical Body](#).”
 - Also note that five “*indriyas*”: “eye”, “ear”, etc are not the physical eye, physical ear, etc. The five *indriyas* are called internal *rūpa* or *pasāda rūpa* that are extremely fine and cannot be seen. The physical eye is different from the *pasāda* eye *rūpa*; but the physical eye is needed for seeing for normal humans.
 - When one develops the mind, it is possible to see without the physical eye, and also much more (like beings in other realms). **Similarly, the mind is not the brain, but the brain is needed for a normal human for the mind to work.**

3. Therefore, our consciousness is limited by our six senses; we perceive the “world” as we sense it with our six senses.

- The “world” or “the universe” is much more complex than we perceive. This is one reason that we think everything around us is permanent, and is why it is so hard for us to understand the true nature of “this world”, i.e., *anicca, dukkha, anatta*.
- With our “enhanced consciousness” from our scientific and technological advances, recently we have realized that even our universe is not permanent; it came into being some 14 billions years ago and will eventually re-collapse or disintegrate.
- Furthermore, as I mentioned elsewhere, we can still “see” only 4%-6%% of the “stuff” in the universe. The other 96% or so is termed “dark energy” and “dark matter” by the scientists because we do not know what that 96% consists of; see, “The 4% Universe”, by Richard Panek (2011). Thus, even though we have vastly expanded our awareness, we are far from being conscious of the “world as it really is.”

4. In Buddha Dhamma, the above discussion with six sense bases applies specifically to humans, but in general applies to many but not all animals as well as other beings in the “sense sphere” (*kamaloka*).

- The Buddha categorized all the living beings that are subject to the rebirth process in the *saṃsāra*, and the categorization is according to the consciousness. Beings in the other planes of existence have totally different kind of consciousness compared to humans or animals.
- For example, beings in the *Arupaloka* (“form-less sphere”) have only the mind consciousness, since they do not have physical bodies. Before getting into that discussion, let us first discuss different aspects of consciousness that we see around us.

5. Even though the “beings” in the “sense-sphere” that includes humans and animals in general have five external sense-doors (eye, ear, nose, tongue, and body), there are many exceptions.

- For example, some animals do not have fully-developed five external senses. Others have different types of sense doors; a jellyfish has eyes, but no brain for information processing, so its visual consciousness is still very limited. It can distinguish between dark and illuminated areas, and that is about all. On the other hand, a dog has visual consciousness comparable to humans, and it can possibly catch a rabbit by chasing it.
- A bat does not have visual consciousness, so it cannot hunt during the day time, but has different consciousness using radar that enables it to hunt at night. So, it is clear that the “consciousness” or “awareness” has many different “avenues” (for example, humans become aware of their surroundings by using sight, hearing, smell, taste, touch, and thoughts).
- Lower life forms may have less avenues of consciousness, and the degree of consciousness can vary too (a jellyfish has minimal visual consciousness). In a few cases, we may be less conscious than an animal. For example, a bat would be much more conscious about surroundings in the dark, compared to a human.

6. Even though most of the animals have the same five physical senses as humans, they are “aware” of only their immediate environment.

- But the contemporary humans are aware of the existence of a huge Black hole at the center of our Milky Way universe that is millions of light years away.
- Humans used to have much limited awareness even a few hundreds years ago, before the advent of the telescope and the microscope. Since then humans have slowly built up our awareness by using technology; see, “[Expanding Consciousness by Using Technology](#).”
- However, we need to keep in mind that a complete theory of consciousness (Buddha Dhamma) was described by the Buddha 2500 years ago. It had been hidden for possibly close to 2000 years, at least in its pure form.

7. Therefore, it is clear that “the awareness” or the “consciousness” can come in different flavors as well as different levels of intensity, even within the “sense sphere” (*kamaloka*):

- The humans and *devas* in the *kamaloka* have the highest levels of consciousness (especially mind-consciousness).
- In the “form-sphere” (*rupaloka*), the consciousness level in general is higher, even though they have only visual, auditory, and mind-consciousness; their minds are at a much higher level.
- The beings in the “form-less sphere” (*arupaloka*) do not have physical bodies at all, and have highly developed minds and thus have even higher levels of consciousness.
- Those three levels of consciousness are called *lokiya* (mundane).
- Beings in the three mundane levels have finite lifetimes, and a given “being” wanders through possibly all these different planes in the unfathomably-long *samsāra* (rebirth process). Even a sentient being born in the *arupaloka* may end up in the lowest level (*apāya*) in the *kamaloka*, depending on the unspent *kamma*.

8. The higher levels of consciousness are supermundane or “beyond mundane” (*lokuttara*), and there are four levels of supermundane consciousness with *Nibbāna* achieved by the *Arahants* being the highest.

- The first three levels of supermundane consciousness are Stream Enterer (*Sotāpanna*), Once-Returner (*Sakadāgāmi*), and Non-Returner (*Anāgāmi*).
- As one progresses on the Path, the consciousness starts to clear up, first by removing the five hindrances (*panca nivarana*) at the *Sotāpanna* stage.
- Consciousness is totally purified by the *Arahant* stage; the pure mind becomes totally separated from any trace of matter (four great elements or *satara mahā butha*) at the death of the *Arahant*, and thus the *Arahant* is not reborn anywhere in the 31 realms and his/her mind becomes free, *Nibbāna*.
- All the suffering we experience is due to trying to satisfy the “body” that is attached to the mind. When attachment to that body (which is subjected to decay and death) is severed, the worldly bonds are broken (*Nibbāna*) and the mind attains the complete “cooled down” (*Nivana*); see, “[How to Taste Nibbāna](#),” and “[Nibbāna – Is It Difficult to Understand?](#).”

Next, “[Expanding Consciousness by Using Technology](#)”,

5.4.3 Expanding “Consciousness” by Using Technology

1. Focusing on the human world, we can expand our “awareness” or consciousness in two ways so that we can be more “aware” of the “world” around us.

- One is using the scientific approach and by developing new techniques that enable us to “see” or “be aware” of things that are not directly accessible to our senses.
- For example, we have infrared sensors that allow us to see in the dark; we have constructed particle accelerators that allow us to “see” elementary particles; we can even “see” supernova explosions that happen millions of light years away using our sophisticated instruments. In the latter two cases, we do not actually see with our eyes, but we are aware of the existence of these events.

2. However, it must be noted that we can “see” only about 6% of the “stuff” that our universe is made of. Scientists don’t know what the rest of the “stuff” is made of and have labelled it as “dark matter” and “dark energy.”

- This means we are “not aware” of 94% of our own universe! For those interested, you can also do a Google search on dark energy and dark matter and learn more.

3. The scientific methods which have been developed over only the past few hundred years are still at a very early stage; even though science and technology has greatly expanded our “awareness” of the external world, according to Buddhism there is much more to be explored, i.e., our consciousness is still very limited.

- We have not been able to contact any life form outside the Earth, even though scientists now accept the existence of life outside the earth to be a certainty.
- Possible existence of life forms that exist in the “form-sphere” and the “form-less sphere” are not even contemplated at this time.

Next, “[Expanding Consciousness by Purifying the Mind](#)”,

Also see, “[Quantum Mechanics and Dhamma](#).”

5.4.4 Expanding “Consciousness” by Purifying the Mind

The other approach to expand our consciousness is by following Buddha Dhamma so that we can “see things as they really are.”

1. Twenty five hundred years ago, the Buddha achieved the ultimate state of the mind and became “all knowing” (or “perfectly conscious”). He came to know about the boundless universe, the endless cycle of rebirths, and about the complex process of cause and effect (*paṭicca samuppāda*) which sustains everything in the universe.

2. By developing scientific instruments (starting with simple telescopes and microscopes we have now developed very sophisticated instruments), we have been able to expand our “awareness.”

- For example, within the past century, we have expanded our awareness of the vast space around us, and now we know not only that our universe is possibly infinite in extent, but there may be other parallel universes as well. Yet, what the science has achieved so far is nowhere close to the level achieved by the Buddha.

3. As humans, we may get close to the ultimate knowledge using the scientific approach some day well into the future (especially if we are able to take into account the consciousness, and mind in general, into science), but we can get there in a lifetime by developing our minds following the path laid out by the Buddha.

- Today’s Science and technology, for all their impressive “material achievements”, are still at very early stages with respect to the mind phenomena.

4. According to Buddha Dhamma, one is said to achieve full and clear consciousness (*anidassana viññāṇa*), i.e., that person will be able to “see the whole world as it is”, when he/she achieves *Nibbāna*. This does not mean that a person who achieves *Nibbāna* will be an expert on relativity or quantum mechanics. Relativity and quantum mechanics provide only partial explanations, and even then just for materials aspects of the world.

- When one achieves the ultimate knowledge (*Nibbāna*), by definition, relativity or quantum mechanics become irrelevant, since they account for only some of the behavior of impermanent and transient matter. Matter is secondary to mind.

5. Furthermore, even for people with good meditative skills, it is possible to expand their consciousness by accessing higher planes of existence for brief times using meditative states (*jhāna*), i.e., by controlling and focusing the mind.

- Even before the Buddha, ancient Yogis were able to access such meditative states via concentration meditation (*samatha bhāvanā*). For example, when Prince Sidharatha became an ascetic on the way to the Buddhahood, he first followed two well-known *yogis* at that time, Alara Kalama and Uddaka

Ramaputta, who were able to achieve very high states of *jhāna* (that belong in the *rupaloka* and *arupaloka*) via concentration meditation.

- However, it will be explained in the future that these *jhānic* achievements of such *yogis* can be traced back to Buddha Kassapa who lived before Buddha Gotama.

6. Even today, people from other religions also could experience such states when they get deeply absorbed in prayer or any type of deep mental concentration; this has nothing to do with a particular religion. However, like everything else, such states are transitory; none of these states is permanent other than *Nibbāna*.

- And *Nibbāna* is not possible to attain via concentration meditation alone, and for that the unique Buddhist system of insight meditation (*vipassana bhāvanā*) is needed whereby *anicca*, *dukkha*, *anatta*, *Paṭicca Samuppāda* (Dependent Origination or “cause and effect”) and the Four Noble Truths (that the existence in *saṃsāra* is *dukkha*, attachment or craving as the origin of the *dukkha*, *Nibbāna* is the cessation of *dukkha*, and the Eightfold Path is the path to cessation of *dukkha*) are understood.

7. To recap, according to Buddha Dhamma, “beings” exist in different planes of existence with different levels of consciousness; different planes can exist in different dimensions as well as in different physical locations (such as planetary systems in this or other universes, for example). Beings are categorized according to their level of consciousness, and the humans lie somewhere in the middle (but still at a very unique place, as is discussed in “[The Grand Unified Theory of Dhamma](#)”)

8. Being “aware” or having consciousness is only one aspect of a living being’s mental composition; in Pāli, consciousness is *viññāṇa*. The other mental constituents that makes up a living being are feeling (*vedanā*), perception (*saññā*), and mental volitions (*saṅkhāra*). Consciousness is nothing more than “being aware.” Based on consciousness, the other three, collectively called mental factors (*cetasika*), arise.

- For example, when we “see” an object that is pure visual consciousness. Based on the visual, we next recognize the object based on our familiarity with the object. This is perception (*saññā*). These are discussed more in, “[The Five Aggregates \(Pañcakkhandha\)](#).”

9. The chief characteristic of perception is the cognition of an object by the way of a previous acquaintance. It is perception that enables one to recognize an object that has been perceived by the mind through the senses. According to Abhidhamma, “Its procedure is likened to the carpenter’s recognition of certain kinds of wood by the mark he had made on each; to the treasurer’s specifying certain articles of jewelry by the ticket on each..”

- It happens automatically since the mind compares the observed image with the stored images of people we know and quickly makes the “match.” (I was happy to see that scientist Jeff Hawkins has described this very well in scientific terms in his book “On Intelligence”; this book is a worthwhile read to see how scientists are slowly making progress!). Of course, the more frequently the memory is refreshed of the image, the easier it is to recognize.
- Sometimes people, especially young children, are able to recognize people and material objects from their past lives.

10. Modern neuroscientists and philosophers are struggling with how to even define these “mental characteristics.” They have come up with the term “qualia” to represent the subjective aspect of sense experience.

- In his book “Second Nature: Brain Science and Human Knowledge” (2006), Gerald M. Edelman, a neuroscientist, states (p. 14): “..The property most often described as particularly mysterious is the phenomenological aspect of consciousness, the experience of qualia. Qualia are, for example, the greenness of green and the warmth of warmth. But several students of the subject, myself included, go beyond these simple qualities and consider the whole ensemble of conscious senses or experiences to be qualia. Many consider explaining qualia to be acid test of a consciousness theory. How can we explain not only qualia but all the other features of consciousness? The answer I propose is to look into how the brain works, formulating a global brain theory that can be extended to explain consciousness...”

- **In Buddha Dhamma, the qualia are the mental factors (*cetasika*), and they are built-in to a sentient being and are strictly individualistic, so by definition they cannot arise just from inert matter; but the scientists are trying to derive them from matter.**

11. An interesting read on various ideas of different philosophers' and scientists' reasoning on how to explain consciousness and associated mental aspects such as qualia is given in the book, "Conversations on Consciousness" by Susan Blackmore (2006).

12. Let us consider, for example, the visual recognition of a person, say Joe Smith. With the recognition of Joe Smith "feelings" arise together with a whole host of mental volitions, which are fifty two in number in total, and we immediately feel a certain way about Joe Smith based on our past experience. For example, if hatred, one of the possible 52 mental volitions, arise when we see Joe Smith then we could be acquiring bad *kamma* as well if we let our mind cultivate those feelings further.

13. It needs to be emphasized that pure consciousness does not entail recognition of an object. It is only a sort of awareness – awareness of the presence of an object. When the eye comes in contact with a color, for instance blue, visual consciousness arises which simply is awareness of the presence of a color; but it does not recognize that it is blue. There is no recognition at this stage. It is perception (*saññā*) that recognizes that it is blue. The term "visual consciousness" is a philosophical expression denoting the same idea as is conveyed by the ordinary word "seeing." Seeing does not mean recognizing. The same is true for other forms of consciousness.

- *Viññāṇa*, which incorporates all mental factors including *saññā*, *vedanā*, etc. has all these mental factors in addition to the pure awareness.

14. Using a somewhat different nomenclature, a "being" in the sense sphere can also be represented by just five "heaps of things" or aggregates (*kandha*), i.e., *pancakkandha* (pronounced as "panchakkandha", *panca* meaning five and *kandha* means a "heap"): consciousness (*viññāṇa*), feeling (*vedanā*), perception (*saññā*), volitions (*saṅkhāra*), and form or materiality (*rūpa*); see, "[The Five Aggregates \(Panñakkhandha\)](#)."

- These five components co-exist; they are born together at conception. It is not possible to separate *nama* from *rūpa* or the four mental aggregates from each other. Therefore, *nama* does not arise from *rūpa* as scientists believe today; ***nama* and *rūpa* arise together from the moment of conception in the mother's womb.**

15. The Buddha did tell his disciples that what he taught them was just a minute fraction of his knowledge about "this world", and what he has taught is sufficient to achieve *Nibbāna* and cut short the *sansāric* journey filled with *dukkha* (unsatisfactoriness and suffering). He did not want people to spend their precious time in this human life studying things like the origin of the universe or the origin of life which would serve no purpose in achieving *Nibbāna*. The following passages are from the *Simsapa Sutta*:

- Once the Buddha was staying at Kosambi in the *Simsapa* forest. Then, picking up a few *simsapa* leaves with his hand, he asked the monks, "What do you think, monks: Which are more numerous, the few *simsapa* leaves in my hand or those overhead in the *simsapa* forest?"
- "The leaves in the hand of the Blessed One are few in number, Lord. Those overhead in the *simsapa* forest are much more numerous."
- "In the same way, monks, those things that I have known with direct knowledge but have not taught are far more numerous [than what I have taught]. And why haven't I taught them? Because they are not connected with the goal, do not relate to the rudiments of the holy life, and do not lead to disenchantment, to dispassion, to cessation, to calm, to direct knowledge, to self-awakening, to Unbinding. That is why I have not taught them."
- "And what have I taught? 'This is *dukkha*... This is the origination of *dukkha*... This is the cessation of *dukkha*... This is the path of practice leading to the cessation of *dukkha*': This is what I have taught. And why have I taught these things? Because they are connected with the goal, relate to the rudiments of

the holy life, and lead to disenchantment, to dispassion, to cessation, to calm, to direct knowledge, to self-awakening, and to Unbinding. This is why I have taught them.”

16. But nowadays one may be justified to spend a little time to convince oneself that Buddha Dhamma is indeed compatible with the contemporary “scientific knowledge”, because that will enable one to build faith in Buddha Dhamma.

- **However, when one probes deeper into understanding the key concepts in Dhamma one realizes that it is not a matter of science proving Buddha Dhamma to be correct, but rather science is at a very early stage of discovering the true nature of the world as described by Dhamma.**

17. Let me close with an example on the difference between technological progress on expanding consciousness versus that by the purification of the mind. The modern world was not aware of the existence of microscopic living beings until the advent of the microscope by Leeuwenhoek in the late 17th century: [WebLink: WIKI: Antonie van Leeuwenhoek](#).

- However, a person who has developed meditation and attained higher *jhānā* can “see” such microscopic beings. There is this story in the *Tipiṭaka* about a *bhikkhu* who had developed *abhiññā* powers, but not yet had attained *Arahanthood*. One day he was about to drink a glass of water, when he realized that there were numerous microscopic living beings in the water. He tried to filter them out in vain and got depressed. The Buddha saw this and told him that, “it is not possible to live “in this world” without hurting other beings; the only thing we can do is to attain Nibbāna as soon as possible and get out of this world.”
- Thus one can attain much more “knowledge” about this world by developing the mind. We can probe deeper into the microscopic world by using the scientific knowledge achieved over hundreds of years, but we can “see” much more by just purifying the mind in a lifetime.

Also see, “[Quantum Mechanics and Dhamma](#).”

5.4.5 What is Mind? How do we Experience the Outside World?

Revised January 17, 2019

1. Everything that we experience comes through six “doors” or “*āyatana*” we have to the outside worlds: eye, ear, nose, tongue, body, and the mind. Through those six doors we can see pictures, hear sounds, smell odors, taste food, feel things physically by touch, and be aware of concepts (say, mundane things like remembering past events or make plans about future events, or think about a black hole in the middle of the universe or a mathematical concept).

- The six sense faculties (and the corresponding six external “*āyatana*” which are *rūpa*, *sadda*, *gandha*, *rasa*, *pottabba*, *dhamma* or visuals, sounds, smells, tastes, touches, and concepts) are what the Buddha called “*sabba*,” or “everything.” These are 12 *āyatana* (6 internal and 6 external).

2. All those sense experiences are done with *citta* or thoughts. But this is probably not a good translation. We normally associate a “thought” with an idea or one visual event, etc., a moment of “experience.” But *citta* is very fast and no one can experience a single *citta* which lasts a billionth of a second or less; see, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#).”

- **Don’t be fooled by the title of that post.** It has a simple description of how the “mind” puts together all six sense inputs to give the illusion that we see, hear, smell, taste, touch, and think all at the same time (at least start reading at #3 there).
- It is a good idea to also read the posts, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” and “[Viññāna – What It Really Means](#)” first.

3. When we look at an object, the “eye” generates visual consciousness (*cakkhu viññāṇa*): Comprehending what is seen is accomplished via a series of very fast thought processes. **There are billions of thoughts per second, so each *citta* or thought moment is billionth of a second;** see, “[The Grand Unified Theory of](#)

Dhamma.” Let us see how the mind “sees” an object in a series of very fast “snapshots” alternating between the “eye” and the “mind”:

- The “eye” captures a snapshot of the object and the brain transfers that captured information to mind: that process takes 17 thought moments or *cittā* (let us abbreviate it as TM); this series of TM is called a “**sense input *citta vīthi*” (or *pañcadvāra citta vīthi*)**. Next the mind analyzes that “imprint” with three *citta vīthi* that involve only the mind. These latter “**mind-only *citta vīthi*” (*manodvāra citta vīthi*)** are shorter, around ten TM, and try to discern what the object is. It may first try to discern the color of the object for example.
- Then the “eye” takes another snapshot and transfers that “imprint” to the mind, which in turn receives it in a *pañcadvāra citta vīthi* containing 17 TM, analyzes that in 3 more *manodvāra citta vīthi* containing about 10 TM, and makes better sense of the color. This “back and forth” process goes on until the object is determined.
- This process is slowed down only due to the time needed for the brain to put together the information captured by one of the five sense faculties (*pañcadvāra*), for example, the eyes. This time is of the order of 10 milliseconds; see, “[What is a Thought?](#).” Thus there can only be about 100 (600 if they are processed in parallel) or so “sense events” per second; since science show that the brain has different regions for processing different sense inputs, the latter number (600) is probably right.

4. Since these *citta vīthi* run very fast, once the brain sends an “information packet” to the mind it is processed very quickly, within billionth of a second. Thus the process is slowed down only by the brain.

Still, everything about the object is grasped in a small fraction of a second.

- Now, many of you may be thinking, “this looks like some far off theory made up by someone.” The Buddha said he experienced everything that he taught. Phenomena in this fast time scale are discernible only to a Buddha.
- Once the Buddha explained the key aspects to Ven. Sariputta, it was Ven. Sariputta and his group of *Bhikkhus* that developed the Abhidhamma, where all these details were worked out. It took generations of *bhikkhus* to develop the Abhidhamma to the final form that was recited at the Third *Sangayana* (Buddhist Council) and was written down in the *Tipiṭaka* in 29 BCE (we know that there were many *Arahants* before 100-200 CE; see the timeline in “[Incorrect Theravāda Interpretations – Historical Timeline](#)”). For us, the truth of these minute details become apparent as all observable phenomena are EXPLAINED using all three forms of Dhamma in the *Tipiṭaka: Sutta, Vinaya, and Abhidhamma*).

5. As all this information comes in, the mind recognizes the object; this is ***saññā* or perception**. Based on that recognition **feelings (*vedanā*)** are generated (for example when we see a friend we generate a happy feeling; if it is someone we don’t like, it is a unhappy feeling, etc).

- Once everything about the object is grasped, then if it is an “interesting object”, the mind may start its own “wheeling around” process: the “*pati + iccha sama+uppada*” or *paṭicca samuppāda* process leading to the **accumulation of *saṅkhāra***: see, “[Paṭicca Samuppāda – Introduction](#),” “[Nibbāna – Is it Difficult to Understand](#),” “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#),” and other related posts. All these tie up together, but one needs to be a bit patient since there are many inter-coupled concepts.

6. Thus experiencing a visual object in the above example generates all kinds of mental phenomena: *vedanā*, *saññā*, *saṅkhāra*, and during this whole process we have the *viññāṇa* or *citta* flowing. *Viññāṇa* is the momentary consciousness, a *citta*. In the above example, it alternates between visual consciousness (*cakkhu viññāṇa*) and the mind consciousness (*mano viññāṇa*).

- The baseline state of a *citta*, i.e., when the mind is not looking at an external object or thinking about it, is called “*bhavaṅga*.” Here we do not “feel” anything, for example when we are in deep sleep. The mind falls back to the *bhavaṅga* state even in between *pañcadvāra citta vīthi*.

7. Same kind of process happens with any of the five physical senses (the “back and forth switching” between the sense faculty and the mind). **When someone is just remembering a past event or planning something, those are exclusively mind processes (only *manodvāra citta vīthi* take place).**

Now let us look at some details on how the mind processes all the “signals” from the real world where multiple “signals” come in.

- When we watch a movie, what happens is the projector projects about 30-50 static pictures per second on the screen; a movie is a series of static pictures. When the projection rate is above 30 frames a second or so, our eyes see a continuous movie, not individual frames. **Thus even though *cittā* run at billions per second, we do not “experience” them individually, not even close.**
- This fast rate of *citta vīthis* (which, as we saw above run at about 100 *citta vīthis* per second) also make it possible to perceive all six inputs from the outside world “simultaneously”; at least we experience them as “simultaneous.” For example, we can be watching a movie and enjoying some popcorn; so we see and hear the movie, and taste popcorn and feel the popcorn cup, and also may be thinking about something related to the scene on the screen; all at the “same time.”
- *Citta vīthi* just alternate among the six sense inputs; it is possible only because there are hundreds of *citta vīthi* per second. Since it happens so fast, we experience them all as “simultaneous”, just like the static pictures projected at a fast rate on a movie screen are perceived as a continuous “movie.”
- Not only that, but the mind can ignore a multitude of “signals” that are of no interest to one’s own habits (“*gathī*”) or cravings (“*āsavas*”). And those depend on the individual. Two friends could be walking on the street, and one (woman) stops abruptly and starts looking at a dress on a shop window. The other (man) looks at it, shrugs, and wants to move on; he would not have even noticed it.

8. As we saw, information to the mind comes via the brain. All five physical sense inputs (vision, hearing, smell, taste, touch) come through the brain. Thinking about concepts involves the brain too (those involve only the *manodvāra citta vīthi*), and that happens much faster compared to the processes associated with the five physical senses; we will discuss that later.

- When someone gets old, the brain starts functioning less efficiently; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” Or, the brain may get damaged due to a *kamma vipāka*; for example, getting Alzheimer’s disease is a *kamma vipāka*.
- As the body gets old, various other body parts also start functioning less efficiently and are also vulnerable for many *kamma vipāka* to come to fruition. *Kamma vipāka* are not deterministic; they come to bear fruit only when conditions become suitable (see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#)”). Thus meditation and regular exercise help keep both the body and the mind (through an efficiently working brain) in good condition.

9. In any case, the mind goes to the “baseline or dormant state” called “*bhavaṅga*” even in between these *citta vīthi*. When the mind is fairly inactive, say when someone is dozing off, the mind is mostly in the *bhavaṅga* state. When someone is unconscious or in deep sleep, it is in the *bhavaṅga* state for the whole duration. When seeing a dream, the mind is active.

- Even when *citta vīthis* run at a fast rate of about 600 per second (say, while watching a movie or while playing a competitive sport), the mind drops to the *bhavaṅga* state while the brain is processing those “10 millisecond information packets”, as discussed above.
- The above discussion is all about receiving information from the outside world and then getting attached to “things” (“*taṅhā*”), generating *mano saṅkhāra*, etc.

10. Based on that process, we may decide to take further action too, either verbally or bodily, thus generating *vacī saṅkhāra* and *kaya saṅkhāra*: We may speak or do some physical activity. All those are done with the mind too, and each action done with thought process or *citta vīthi*.

- This is why the Buddha said, “*mano pubbangama dhamma, ,,,*”, i.e., “mind precedes everything that we do...” We **cannot even lift a finger without generating a *citta vīthi*, i.e., without the initiation by the mind.** The physical body, with the brain acting as a “sophisticated control center”, helps the mind to achieve whatever physical activity it wishes; see, “[Neuroscience says there is no Free Will? – That is a Misinterpretation!](#).”

Further reading: “[A Comprehensive Manual of Abhidhamma](#),” by Bhikkhu Bodhi (2010). This book has summarized *citta* and *cetasika* very well. But discussions on *paṭicca samuppāda* or *anicca, dukkha, anatta* are not correct.

Next, “[What is Consciousness?](#)”,

5.5 Consistencies with Science

- [Second Law of Thermodynamics is Part of Anicca!](#)

The following posts discuss cases where current theories of science are consistent with Buddha Dhamma.

- [Quantum Entanglement – We Are All Connected](#)
- [Infinity – How Big Is It?](#)
- [Gödel’s Incompleteness Theorem](#)
- [Truine Brain: How the Mind Rewires the Brain via Meditation/Habits](#)
- [How Habits are Formed and Broken – A Scientific View](#)

5.5.1 Second Law of Thermodynamics is Part of Anicca!

Revised January 12, 2020

1. As we saw in the post, “[Anicca – True Meaning](#),” *anicca* describes one of the three basic characteristics of “this world,” namely no matter how hard we try, “we cannot maintain things to our satisfaction in the long term.”

2. What does the Second Law of Thermodynamics say? It basically says, “things in a closed system go from order to disorder unless energy is put into the system to keep the order.” Thus we can maintain a sort of stability (or “keep things the way we like them to be”) by striving or working hard.

- But as we get old, our ability to do this wanes, and ultimately we becomes too weak to do anything or die. It does not matter how much money we have accumulated. All sense pleasures lose their vigor as the body gets old, and money or will power cannot maintain them.

3. A successful business person could say, “look at all the wealth that I created. I have achieved what I wanted.” It is actually a good accomplishment, but can he really enjoy all that in the long term? Even all that money cannot maintain a simple thing like the taste of food when he gets really old, not to mention the fact that all that wealth will be left behind at death.

- However, when we are young, it SEEMS that we CAN maintain things to our satisfaction. This is why it is hard to explain *anicca* to a young person. A young boy will say, “look at the muscles I built over the past year by working out at the gym! I am invincible.” A young woman will say, “I look much more beautiful now than I was a year ago.”
- Yet, blossoming at around twenty or so years is just the beginning of a slippery slope. In the end all those strong muscles will fade, and the beautiful figure will sag and decay. That is the reality.

[WebLink: YOUTUBE: Done Got Old](#)

4. We can see the effects of the Second Law of Thermodynamics at different levels. A nice hot cup of coffee will cool down with time, and we will have to re-heat to enjoy it again. An ice cream bowl will melt if not kept cold by putting it in the refrigerator which uses energy to run.

- Mom will come and clean a child’s room, only to find the next day that it is back to the chaotic state; she will need to go through all that work again to get it back to presentable condition.
- We build a house with a beautiful garden, only to find that we will have to do repairs to the house and much work is needed to keep the weeds out of the garden and grass cut, etc.
- The Sun will power our planet for another few billion years, and then it will die. Long before the Sun dies, the Earth will get destroyed.

- Even our universe will “run down” in 15 billion or so more years.

5. Thus, we can see that the concept of *anicca* is a universal characteristic of this world. Things can be maintained EVEN WITH EFFORT only up to a certain time, and NOT forever.

- The Second Law of Thermodynamics describes the impermanence or the “root cause” for *anicca*. Even though the scientists understand this impermanence, they do not necessarily PERCEIVE that in their minds with regards to themselves. That is the difference between “impermanence” and *anicca*.
- **Just like a scientist who has contemplated on the Second Law of Thermodynamics, anyone who is trying to cultivate “*anicca saññā*” by contemplating on impermanence is nowhere close to *Nibbāna*; see, “[Saññā – What It Really Means.](#)”**
- Thus, like those young people mentioned above, we all have the wrong PERCEPTION that “we can maintain things to our satisfaction,” i.e., we have the false perception of *nicca*, not the actual reality of *anicca*.

6. Even when our universe dies, many come into existence. This process has been going on for eternity, and so have we. We have been in the rebirth process forever.

- The problem is that most of those lives were not as good as this one; we have suffered unimaginably, and unless we get out of this predicament, such future suffering is not avoidable. That is the *anicca* nature; see, “[Anicca – Inability to Keep What We Like.](#)”

7. **But the good news is that our minds can become free of this non-stop rebirth process by decoupling from this unstable material base.** We are reborn in this “material world” because of our perception of “*nicca*,” i.e., we believe that we CAN find some suitable place with permanent happiness in this world.

- Once we grasp the reality of “*anicca*,” our minds will automatically start becoming free, and we will start feeling the *nirāmisā sukha* arising from this detachment from the material world; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).”
- That is another way to look at the reality and our choices.

5.5.2 Quantum Entanglement – We Are All Connected

Revised January 21, 2016 (#6); March 13, 2018; September 22, 2019

1. When we get deep into Buddha Dhamma, we will see that the mind creates EVERYTHING in this world. That is why the Buddha said, “*mano pubbangama dhamma.....*”, i.e., the mind is the precursor to everything. But let us proceed at a slow pace.

- By the way, dhamma is “what we bear” in this world (“*darana deya*” in Sinhala); this means absolutely everything in this world. And all dhamma are *anatta*, i.e., fruitless, or there is nothing substantial in any dhamma (it does not mean “no-self” or “*anathma*”); see, “[Anicca, Dukkha, Anatta – Wrong Interpretations,](#)” and “[Anicca – True Meanings.](#)”

2. Everything happens due to causes and conditions; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).” Also, this world is not four dimensional (3 space dimensions and time) as we experience, but is multi-dimensional; see, “[What Happens in Other Dimensions.](#)” This is why we see only two realms (human and animal) out of the 31 realms of existence; see, “[The Grand Unified Theory of Dhamma.](#)” Just because we cannot experience directly or is not proven by science YET is not reason to discard them. **But the current string theories do predict a 10 or 11-dimensional world.**

- What can be explained with Buddha Dhamma? Everything in this world. See, “[Complexity of Life and the Way to Seek “Good Rebirths”](#),” for some examples.
- Also see, “[Origin of Life.](#)” This series explains how the mind creates EVERYTHING in this world.

3. Furthermore, science has been confirming many things that ordinary people rejected as “impossible” over the past few hundred years; and that activity started increasing over the past hundred years since the advent of quantum mechanics and relativity; see, “[Dhamma and Science – Introduction](#).” That should give us more confidence on Buddha Dhamma. **That is *saddhā*, or faith-based on evidence.**

4. Here we will discuss yet another recent finding in science that makes the process of rebirth more easily “explainable.” **Please note that I am not trying to verify Buddha Dhamma by science. It is the other way around. I am saying that science is far behind Buddha Dhamma.** Science is now trying to catch up just the material aspects of how this world works and has not made any significant progress on how the mind works.

- In the essay, “[Evidence for Rebirth](#),” we saw that a person who dies in one geographical location is reborn in another. The consciousness does NOT transmigrate as is believed in some other religions. However, some form of energy leaving one place must instantly appear at another.
- What about the speed of light barrier for anything or any information to travel, based on Einstein’s Special Theory of Relativity? It turns out that we are in a unique time in history. Buddha’s teachings are beginning to be, even if not absolutely confirmed, at least elevated to the level of possibility by Western science. For millennia, numerous people had strong enough faith to believe Buddha’s words and to commit their entire lives to pursue *Nibbāna*. (Actually it is not blind faith. If one studied the Dhamma / Abhidhamma carefully, one can verify that it must be true).

5. In 1935, Einstein, Podolsky, and Rosen published a paper that showed that if quantum mechanics is correct, then a particle can somehow “know” what another particle, even if separated from it by a large distance, is doing. Einstein derisively called this “spooky action at a distance” and dismissed the prediction. Even though his theories led to the foundation of quantum mechanics, Einstein was firmly opposed to quantum mechanics throughout his lifetime.

- However, in 1964, physicist John Bell proposed an experiment to test this concept. Those are experiments on “violation of Bell’s inequality.” Several experiments carried out since 1997 proved that Einstein was wrong. The experimenters created “entangled particles” which shared a wave function. In 1997 Nicholas Gisin did the first experiment with entangled photons, in which they were sent seven miles apart via optical fibers. When they reached the ends of these fibers, the two photons were forced to make random choices between alternative, equally possible pathways.
- There was no way for the photons to communicate with each other, “classical” physics would predict that their independent choices would bear no relationship to each other. But when the paths of the two photons were adjusted correctly and the results compared, the independent decisions by the paired photons always matched. There was no real way for them to communicate with each other. The responses were instantaneous, even though at the speed of light the two events were separated by about 26 milliseconds.

6. Since then, that same experiment has been repeated with electrons and ions as well. This effect is called the “quantum entanglement.” It leads directly to other related concepts such as “holographic universe” and “interconnectedness.” **The conclusion seems to be that entangled particles can be interconnected even if they are situated across the universe!**

- In late 2015, “nonlocality of nature” or the violation of Bell’s inequality was confirmed in three “loophole-free” experiments; see the pdf, “[WebLink: PDF File: Wiseman-Death by experiment for local realism-Nature-2015](#).”
- And the first of those experiments is: “[WebLink: Hensen-Loophole-free Bell Inequality-Nature-2015](#).”
- Details at “[Quantum Mechanics and Dhamma](#).”

7. The following fun video by Dr Quantum illustrates the basic idea of quantum entanglement:

[WebLink: YOUTUBE: Dr Quantum - Entanglement](#)

8. Quantum entanglement could be intimately connected (and can be “explained” easier) with a universe that is multi-dimensional (like the proposed 11-dimensional string theory). If you have read the post on [“Consciousness Dependence on Number of Dimensions,”](#) it will be easier to follow my simple (and crude) illustration:

- Think about a two-dimensional “world”, say, the kitchen floor and consider an ant on the floor as a “two-dimensional being”; which means we assume that the ant can see only those things that make direct contact with the floor. If a chair is there, the ant can see only four “impenetrable circles” where the legs of the chair touch the floor. For the ant, those four “circles” are not connected. They lie far apart from each other. However, if we lift that chair, all four “circles” will be removed simultaneously. For the ant, this means that the four “circles” were “entangled” or connected to each other. Of course we can see that there were connected via the rest of the chair in the third dimension, above the floor.
- Same way, things that appear to us as “far apart” (say New York and Houston) may be connected via a dimension that we cannot see. A person dying in New York may be born instantaneously in Houston, because those two “places” may have a direct path via a hidden dimension.
- Those “entangled particles” in #5 above may travel far apart from each other. But they could be connected via a hidden dimension. Just like the ant in the above example is not aware of the rest of chair, we are not aware of the existence of such hidden dimensions.

9. However, quantum mechanics is not restricted to working on “intellectual” problems such as above. Those are, what the man-on-the-street calls “abstract stuff.” Most of the “things” that we grow accustomed to happen to be byproducts of quantum mechanics. Those vary from computers and cell phones to lasers and nuclear bombs.

- So, these new observations do indeed make more plausible the concept of a connection across the universe. But there is no point in wasting valuable time on trying to find answers to questions such as the end of the universe or beginning of life. That is what the Buddha advised.
- We are fortunate to be born in the human world, which is an infrequent event. See, [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#) Thus, one should diligently work towards achieving liberation (*Nibbāna*). In realms below the human world, life is too painful, and life in heavenly worlds is too blissful for one to focus on working toward *Nibbāna*.

Is the Universe Multi-Dimensional? – Another Emerging Possibility

It was Einstein’s dream to work out such a Grand Unified Theory, but he was unable to do so. Many scientists are trying to accomplish this goal, and the newest theories are called string theories. No Grand Unified Theory exists yet, but the closest is a version of string theory called the M-theory. M-theory says that ours is a 11-dimensional universe, even though we can see only four dimensions (including time). So, could there be life existing in other dimensions that we cannot observe? That is another possibility. I briefly discuss this possibility under the heading, [“What Happens in Other Dimensions?”](#) [Consciousness Dependence on Number of Dimensions]

Consciousness and Quantum Mechanics

March 13, 2018: I have started a new section [“Quantum Mechanics and Dhamma,”](#) where a new interpretation of quantum mechanics is presented. I explain why quantum theory cannot explain consciousness.

Next, [“What is Mind? - How do we Experience the Outside World?”](#),

5.5.3 Infinity – How Big Is It?

Revised June 3, 2018; January 19, 2020

Introduction

1. What is the largest number you can think of? Well, just add one, and you have a larger number! There are some large numbers that we are aware of. With record budget deficits of the developed nations in trillions of dollars (and the total nominal value of all the derivatives traded around the world approaching a thousand trillion dollars, or a quadrillion dollars), trillion and quadrillions are indeed large numbers.

- Even though a trillion rolls off the tongue not very different from a billion, a trillion is much bigger than a billion. If you spend a billion dollars a day, it will take a thousand days to spend a trillion dollars.

How to Represent Large Numbers?

2. The number of molecules in a cubic centimeter of gas is 2.7×10^{18} or 2.7×10^{18} (this a simple way to express big numbers; instead of writing 10000, we write 10^4 or 10^4). Since electrons are even smaller, you would think there would be a humongous number of electrons in the observable universe; the estimated number is around 10^{87} . This is of course a very large number, but is not infinity by any means.

- That should give you an idea of the power of an exponent. Each time the exponent goes up by one, the number becomes ten times bigger. So, even though 10^{87} may not look that big compared to 10^{18} , it is a humongous increase. Another large number should be the distance from the Earth to the edge of the observable universe, and it is estimated to be about 46 billion light-years or around 10^{23} miles. Even though such large numbers are hard to be contemplated in our minds, they are all finite.

What Is a Googol?

3. There are some famous large numbers. A Googol is 10^{100} , which is unimaginably vast compared to even the number of electrons in the universe (10^{87}). As an aside, the internet company Google was to be named Googol, but someone made a mistake, and Google was the name given. A Googolplex is a whopper; it is 10^{Googol} or $10^{(10^{100})}$. There are many such “famous large numbers.”

- Yet, you can add one to any of these large numbers and always get a bigger number. Therefore, no number, however large, is still finite.

[WebLink: YOUTUBE: Googol and Googolplex by Carl Sagan](#)

Infinity – Beyond Any Conceivable Number

4. So, the mathematicians coined the term “infinity” to denote an indefinitely great number; The word comes from the Latin *infinitas* or “unboundedness.” Since infinity is uncountable, it has some strange characteristics: whatever you add to (or multiply by) an infinity (even if it is another infinity), you still end up with infinity.

- The famous German mathematician David Hilbert illustrated the “abnormal” properties associated with infinity using the idea of a “infinity hotel,” which has an infinite number of rooms. The “infinity hotel” always has a vacancy: the management can always ask the person occupying the N th room to move to the $(N+1)$ th room, $(N+1)$ th room to move to the $(N+2)$ th room, and so on, and thus give the N th room to the new guest. Even if an infinite number of new guests arrive, the hotel can accommodate all of them!

Infinity Is Real

5. That is not to say that infinity is a useless or bogus concept. The arguments described above are valid. Mathematicians cannot do many integrations without infinity. Physicists use infinity all the time (but they try to end up with finite physical values).

- The concept of infinity is real (and weird). For example, a line of any finite length has an infinite number of points, whether it is an inch or thousand miles. The invention of calculus by Newton and Leibniz helped handle some of the problems arising from such situations.

Space and Time – Infinite!

6. In the physical sense, infinity is a rather vague concept meaning “larger than anything that could in principle be encompassed by experience.” For example, space is infinite, and as far as our sophisticated instruments allow us to “see”, there is no end.

- Our universe is possibly infinite in extent, since the scientists can “see” only to a finite extent.
- What about time? If our universe started at the Big Bang, that inflationary theory says there are multiple, parallel universes.
- According to the “cyclic theory” model, which is an alternate theory, the same universe comes to a “Big Crunch” which leads to another Big Bang, and whole process keeps repeating. So, there is no beginning to time either; time is infinite.
- According to the “cyclic theory” model, which is an alternate theory, the same universe comes to a “Big Crunch” which leads to another Big Bang, and whole process keeps repeating. So, there is no beginning to time either; time is infinite.
- By the way, both those theories are not correct, according to Buddha Dhamma. It is individual star systems (called “*Cakkāvāta*”) that undergo birth-destruction cyclic process.
- I will write more in the future, but see the discussion: “[WebLink: Multiverse: Different Physical Laws and Different Dhamma?](#).” It is the lifetime of a *Cakkāvāta* (like our Solar system) that is called a *Maha Kappa* (great eon) in Buddha Dhamma.

Samsāra (Rebirth Process) Goes Back Infinite Time!

7. The Buddha used a great eon as the measurement unit to help his followers visualize the enormous length of *samsāra*. A great eon (*mahā kalpa* or *mahā kappa*) is said by the Buddha to be longer than the time it would take a man to wear away a mountain of solid granite one *yojana* (about 7 miles) around and one *yojana* high, by stroking it once every hundred years with a silk cloth.

- These days scientists use the word “aeon” to denote the duration of a universe (from the “big bang” either to a “big crunch” or just fading away). But a *Maha Kappa* means the lifetime of our Solar system. Our universe has “no beginning.” In the future it will be shown that the “Big Bang theory” is not correct (which says that our universe came to existence from nowhere in a “Big Bang.”) See the discussion: “[WebLink: Multiverse: Different Physical Laws and Different Dhamma?](#).”

Buddha's Analogy Consistent With Modern Science

8. Just for fun, I estimated the mass of the material that needs to be removed by the silk cloth each time (this happens every 100 years). Using a 7-mile cube of stone with a density of 2515 kg per cubic meter, I calculate the mass of the mountain to be 3.5×10^6 kg.

- Assuming the lifetime of our Solar system to be 5 billion years, I calculate the mass removed by each stroke is about 36 grams or about 1.2 ounces. This appears to be a reasonable number!
- When we try to visualize the wearing off a mountain we can imagine how long a time that is. Yet, that is still nothing compared to the length of the *samsāra*. As I said, infinity is a concept that is hard to wrap one's mind around!

Another Analogy of the Buddha

9. One day the *Bhikkhus* asked the Buddha how many “great eons” had already passed and gone by. The Buddha told them, “Suppose, *Bhikkhus*, there were four disciples here each with a lifespan of hundred years, and each day they were each to recollect a hundred thousand great eons. There would still be great eons not yet recollected by them when those four disciples pass away at the end of hundred years. Because, *Bhikkhus*, this *samsāra* is without discoverable beginning.”

- An fascinating book that talks about such hard to grasp ideas (in science) involving infinity is “The Beginning of Infinity: Explanations That Transform the World” by David Deutsch.
- Infinity is a mind-boggling concept. For example, one question that comes up frequently is the following. We have had infinite time to attain *Nibbāna*. So, why have all living beings not attained *Nibbāna* yet?
- I have discussed that at, “[The Infinity Problem in Buddhism](#).”

Summary

10. Each of us (including all living beings today) has “lived” for an infinite time. There is no traceable beginning to life, per Buddha. See, “[Origin of Life – There is No Traceable Origin](#).”

- During much of that time, each of us suffered much more than any brief stretches of pleasure. That is because births in “good realms” (like human, Deva, and Brahma realms) is rare. See, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”
- Most of our past births had been in the four lower realms (including the animal realm) where suffering dominates.
- That is why the Buddha admonished us to strive hard to attain *Nibbāna* to avoid such harsh suffering in future rebirths.

Detailed discussion at the subsection, “[Origin of Life](#).”

5.5.4 Gödel’s Incompleteness Theorem

1. Mathematician Kurt Gödel, in his Incompleteness Theorem, proved that it is impossible to find complete “truth” or “complete explanations” of a system from WITHIN a system.

- No theory that any scientist discovers is, thus, cannot be proven to be the “ultimate truth.” This is another way of saying that by examining the parts one cannot get the complete picture of the system, IF one is within the system.

2. The Buddha transcended “this world” by developing his mind; see, “[The Grand Unified Theory of Dhamma](#)” for a description of the 31 realms of existence.

- This is again something that cannot be proven by a human being. One accepts, as I have, of the truth of that by examining the evidence: that the Buddha was able to explain so much about “this world” 2500 years ago. By “this world” it is meant not only the Earth or even this universe, but total existence.

3. The only way to disprove what I stated above is to find inconsistencies within the Buddha Dhamma (this is the same method used by the scientists in assessing scientific theories). I have not found any.

- If you find anything inconsistent about the Buddha Dhamma, that is because there have been numerous “alterations” over the past 2500 years. But if you find any inconsistencies at this site, please let me know. If there are any, that is due to my possible carelessness or ignorance and I should be able to fix them.
- In fact, this is the only way to get rid of any inconsistent “bits and pieces.” Just like if you have a piece of a puzzle at the wrong place that will only hinder the progress of solving the puzzle, having wrong information somewhere will only slow down our progress in “figuring out the pure version of the Buddha Dhamma.”
- However, I do believe that the “big pieces of the puzzle” are in correct places here.

4. Kurt Gödel would have really enjoyed Buddha Dhamma. It would have been tremendous if he was alive to go through the material here and point out any inconsistencies. Many of the scientists that I admire, including Einstein, Feynman, Gödel, Heisenberg, de Broglie, Sagan, and many more would have been able to easily grasp the message of the Buddha, but unfortunately they never came across the pure Dhamma; David Bohm came close.

- I hope the current generation of scientists and philosophers will get an opportunity to examine the pure Dhamma.

5. I do not want wrong impressions to come out of this post. I love science and physics in particular. Before discovering the pure Dhamma, physics was my passion and I still try to keep up with new findings.

- Yet I have realized that discovering how inert matter behave is a minute fraction of the knowledge about the whole existence. We cannot even discover everything about matter, until we start finding out more about the mind. The Buddha said, “*mano pubbangama Dhamma...*,” or “the mind precedes everything in this world....”

6. Let me give some examples. Albert Einstein introduced his Special Theory of Relativity in 1905 and his General Theory of Relativity in 1915. The first showed that Newton's Three Laws of Motion were only approximately correct, breaking down when velocities approached that of light. The second showed that Newton's Law of Gravitation was also only approximately correct, breaking down when gravitation became very strong.

- We could not see anything wrong with Newton's laws of motion until we developed technologies that transcended our “level of consciousness”; see, “[Expanding ‘Consciousness’ by Using Technology.](#)” They worked well within our “probing sensitivities.” Even today, scientists do not use relativity equations to map out rocket trajectories to the Moon; Newton's equations are good enough to that.
- In the same way, everything that science discovers just expands our horizons, but never will provide the “ultimate answers.” We can find “everything about this world” just by purifying our minds; see, “[Expanding ‘Consciousness’ by Purifying the Mind.](#)”
- The above statements may not mean much right now. However, I ask you to be patient and go through the material at the website, and gradually you may realize what I am trying to say.

7. A “good theory” is all about “testable predictions.” As I stated on the home page, I try to present material on Buddha Dhamma as a “theory on how the nature works.” As I pointed out in many essays, many of the “predictions” or “statements” about the nature of this world have proven to be correct by science over the years, especially during the past few hundred years.

- I can make another prediction just for the records. Darwin's theory of evolution will be proven to be only partly correct, and only for limited spans of time. The theory of evolution is correct only over the recent past of this planet, where we can trace the past events using techniques such as radiocarbon dating; the oldest dates that can be reliably measured by radiocarbon dating go back to around 50,000 years ago. Even if we put the limit at a million years, that is only a tiny fraction of over four billion year lifespan of the planet.
- What is correctly stated in the theory of evolution is that species arise when conditions become suitable for them to arise AND for them to survive.

8. However, it is dangerous to talk about concepts that are not amenable to our minds. That will lead only to “loss of faith.” It would be impossible to explain to someone who time traveled to the present time from several hundred years ago, how a light bulb can light up just by flipping a switch. There is no way for that person to “grasp” the concept of an electric current; he/she would believe it to be a “magic trick.”

- The Buddha never revealed any details of the nature that were not discernible to at least his top disciples at that time. Let me give an example from the *Tipiṭaka*. One time Ven. Moggallana, who was only second to the Buddha in *Abhīññā* (supernormal) powers, saw a large number of beings in the *peta* realm

near the Gijjakuta mountain. Beings in the *peta* realm have very fine bodies that can be seen by those with *abhiññā* powers, and some varieties have such fine bodies that only a few people with highly-developed *abhiññā* powers can see them.

- So, none of the *Arahants* that were there who had *abhiññā* powers, could see them and they told Ven. Moggallana, “how come we cannot see them?.” Ven. Moggallana told them to ask the Buddha. The Buddha told those *Arahants* that he had actually seen them previously. When the *bhikkhus* asked why the Buddha did not mention it to them, he told them that, “If I tell you something that you cannot verify by yourselves, that will only lead to doubts. That is why I did not mention it. But now that Moggallana has seen them, there is at least one person there to confirm it.”

9. Even today there are people with *abhiññā* powers that can see some of these beings in other realms. My teacher *Theros* say they can see them and I have no reason to doubt them. Developing *abhiññā* powers requires being able to get to the fourth *jhāna* AND then working to develop those powers. So, it is not an easy task. If I ever get to that stage, I will mention that here.

- Developing *abhiññā* powers or even *jhānā* is not necessary to attain *Nibbāna*. One can even attain the *Arahanthood* without developing any *jhāna* ahead of the time.
- What is important is to experience the “cooling down” of *Nibbāna* even without getting to the *Sotāpanna* stage. That itself provide incentive to continue with the practice; see, “[How to Taste Nibbāna.](#)”

References

For those who would like to read more on this subject, the following references could be useful. However, I do not encourage anyone to “go off the track.” I included this section to make the point that all existing scientific theories are incomplete, because they all were generated within the system. The Buddha was able to transcend “this world” and thus was able to provide a complete world view.

5.5.5 **Triune Brain: How the Mind Rewires the Brain via Meditation/Habits**

Revised December 20, 2016; September 21, 2020

The triune brain model of the brain is no longer widely discussed. However, it provides a simple way to look at three major functions of the brain, as we will see below.

Triune Brain – Three Major Components of the Brain

1. Triune means “consisting of three.” The human brain, which is the most advanced for all animals, shows how different animals have “different levels” of consciousness.

- The brain has three distinctive regions (see the figure below): (1) brain stem (labeled “reptilian” in the figure), (2) limbic system, (3) cerebral cortex or just cortex (labeled “neo-cortex” in the figure).
- Details in Ref. 1. We will summarize very basic features of the “three parts” of the brain.

Reptilian Brain (Brain Stem and the Cerebellum)

2. The brain stem (reptilian brain maybe a misnomer, since reptiles have limbic systems) is the most primitive and all developed animals have it. It governs automatic physiological functions such as the heart rate, respiration, digestion, etc.

- And that is all lowest-ranked animals can do (automatically). They are almost like fully-automated robots.

The Limbic System

3. Animals with somewhat higher intelligence have a limbic system in addition to the brain stem. But still no triune brain.

- It coordinates sensory reception, memory, and unconscious emotional reactions. These animals with the limbic system — like snakes and lizards — just react spontaneously to external influences.
- Humans tend to do that too. In case of a threat, the limbic system instantaneously and automatically makes the “fight or flight” decision. We could say that automatic *mano saṅkhāra* arise via the limbic system. See, “[Saṅkhāra – What It Really Means.](#)”
- It is quite clear from the definition of an *Arahant* that even this instantaneous response can be completely tamed by cultivating wisdom (*paññā*), i.e., by following the eightfold path.

The Cerebral Cortex (Neocortex)

4. The cerebral cortex (learning brain; neo-cortex in the figure) is the most advanced part of the brain; it can make “rational decisions” by contemplation but it is time delayed. Therefore, it is called the “thinking brain.” The cortex is responsible for language capability, logic, reasoning, learning and critical thinking, the good stuff. All primates have it, but of course the humans have the largest.

- The cortex is responsible for language capability, logic, reasoning, learning and critical thinking, the good stuff. All primates have it, but of course the humans have the largest.
- The cortex is involved in generating *vacī* and *kaya saṅkhāra* that arise with a time delay. By controlling our *vacī* and *kaya saṅkhāra*, we have the ability to change our *gathi*. This is the “modern scientific rationale” behind the basis of Buddha Dhamma; see the “[Living Dhamma](#)” section.

5. All our sense inputs are processed in the cortex before they are sent to the *hadaya vatthu* or the “seat of the mind” that is located in the *gandhabba* close to our physical heart.

- Since it takes time for our brains to analyze the “incoming data”, normally there is about 100th of a second time delay between incoming sense inputs and our mind generating thoughts about that sense input.
- The brain can handle only one sense input at a time. This means it can handle only about 100 sense inputs in a second. So, even though our minds generate an initial response quickly, the follow-up “thoughts” are delayed due to this “processing delay” in the brain.
- I will discuss this in more detail (and it has been discussed in bits and pieces in the posts on the *gandhabba*, but the key point is that our actions and thoughts are “slowed down” by this pre-processing in the cortex.
- That pre-processing is minimal in even in “higher animals” with small cortexes, like dogs and apes. This is why humans are unique. We have a large cortex that not only slows down the response time, but also helps us “analyze the situation” rationally.

Ways to Improve Brain Functionality

6. Neural pathways in the brain strengthened by:

- Repeated application (meditation included). Repeated activity forms both good and bad habits as we discussed in several posts, and is the key in molding the character (*gati*); see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavā\)](#)“, and other related posts.
- Good foods and regular exercise increase the production of Dopamine and other good chemicals.
- Exercise and meditate! It will keep you healthy and alert; see, “[‘Spark’ by John Ratey](#)” for information on the value of a good exercise program.

Brain Plasticity

7. Until about the late 1980s there was wide belief that one had just to live with the brain that one was born with. But since then the ability of the brain to change (neuroplasticity of the brain) has been demonstrated and studies on the effects of meditation on the brain have become an active research field.

- Of course, 2500 years ago the Buddha said that the mind is the precursor to everything. The mind does not arise from the brain. It controls all body parts, including the brain. See, “[Brain and the Gandhabba.](#)”
- The key is that insight meditation should DRASTICALLY change neural wirings. However, there have not been any brain scans of someone who has cultivated the “correct versions” of *Satipaṭṭhāna* and *Ānāpānasati* meditation.
- There are other posts at the site which describe this “re-wiring” of the cortex that leads to change in our *gati*. See, for example, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

Effects of Meditation on the Brain

8. As shown in the references below, there is compelling scientific evidence that even mundane versions of meditation improve both the cortex AND the limbic system.

- Those studies show that basic *Samatha* meditation helps, but *Mettā Bhāvanā* (compassion meditation) is particularly effective.
- It must be noted that Tibetan *Samatha* (breath meditation) or *Mettā Bhāvanā* (mundane version) are *anariya* versions. For the *Ariya* versions, see, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#)” and “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#)“. I am quite positive that a brain scan of an *Ariya* (Noble person) will yield more interesting results.

- For example, we also know that meditation affects breathing patterns (thus the brain stem). Therefore, meditation affects overall brain function. An *Arahant* can stop breathing for up to 7 days in *Nirodha Samapatti*. It will be extremely interesting to see a brain scan of an *Arahant*.

The malleability of the Neocortex and the Limbic System

9. The following case illustrates the complex role played by the brain. A developed left brain (of the neo-cortex) indicates compassion for others and enhanced happiness for oneself, and a relatively larger right side indicates aggressive character.

- Here is the link to a video showing the results of brain scans of an advanced meditator who had done loving-kindness meditation for a long period of time compared to 150 non-meditators.

[WebLink: YOUTUBE: Matthieu Ricard: The habits of happiness](#)

The discussion on the brain scan data is from about 17:00 to about 18:20 minutes if you don't want to watch the full video.

- We must also keep in mind that Tibetan loving-kindness meditation is an *anariya* version of the *Mettā Bhāvanā*; see below.

Humans Have Control Over Their Lives

10. Furthermore, we are not programmed by our genes, environment, or even our past *kamma*. However, all of those can affect our destiny. The most powerful is our mind. In other words, *citta niyama* dominates *kamma niyama*.

- As the saying goes, “you can do anything that you put your mind to”. This is the true basis of free will.

11. Even though the scientists are making some progress regarding the mind, the brain is not the mind, just as the physical eye is not the *cakkhu pasada rupa*; see, “[Manomaya Kaya \(Gandhabba\) and the Physical Body](#)“, and other related posts. Yet it is essential to keep the physical eye (and other physical sense faculties) as well as the brain in good condition for the whole body and the mind to work properly.

- Finally, the triune brain model is no longer widely discussed. However, it provides a simple way to look at three major functions of the brain.

5.5.6 How Habits are Formed and Broken – A Scientific View

Revised November 26, 2018

1. We are lucky to be in an age when many of the Buddha’s teachings are not only confirmed but also strongly supported with additional evidence that were not possible during the time of the Buddha.

- This is another instance where the evidence is coming from research on the workings of the brain.

2. The Buddha basically said to follow the following procedure to break a bad habit and to instill a good habit:

- i. understand the reasons why a certain habit is bad,
- ii. stop engaging in activities that enhances the habit,
- iii. deviate the mind from such bad activities by focusing on opposing good activities,
- iv. contemplate on the “release” or “cooling down” that has already resulted by following the above procedure, strengthen the resolve to stay on course, and keep doing (i) through (iii).

With time, the bad habit(s) will go away and the good habit(s) will take hold. There comes a time when one will automatically follow this procedure; it becomes a “way of life.”

3. The reasoning behind is based on the key factors that we discussed in the previous posts; see, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)”](#) and [“Habits, Goals, and Character \(Gati or Gathi\)”](#):

- We do many things automatically (i.e., without being mindful or without deliberate thinking); these are done via our habits that we formed during this life or even coming from previous lives.
- There are both good and bad habits. We want to keep and cultivate good habits and discard bad habits.
- Changing (cultivating) habits first require some “external adjustments” like one’s physical environment, friends, etc and, more importantly, the four steps listed above.

4. Beginning in the early 1990’s or so, scientific investigations in several fields (effects of meditation on the brain, behavioral studies on animals and humans, neurology, etc) have come to similar conclusions.

- We will discuss these in detail in the future, but here I want to just point out the main similarities. Furthermore, discussing how the mechanism takes place in the brain provides an alternative way to visualize these changes.
- We are indeed fortunate to live at a time when we have evidence from science to provide additional evidence.

5. As I pointed out in the posts on the *manomaya kāya* and the physical body, our physical body is “prepared” by the *kamma* seed that was the cause for this life. But the *manomaya kāya* is constantly making “adjustments” to the physical body based on the current status of the mind.

- Many *kamma vipāka* are “built-in” even at the conception; some may be avoidable by taking care of the body (exercise, food, etc), and the mind (contemplation, meditation, etc), but some may not be avoidable because they are so strong: We will never know when a cancer, an accident, or even a natural calamity can drastically change our lives; this is *anicca*, “the inability to maintain our lives the way we would like to.”
- Thus we need to spend at least sometime to work towards a meaningful solution to the “problem of existence.”
- Another factor we need to remember is that our “*sansāric* habits” are built-in to our brain. We keep changing/adding such habits as we grow up, influenced by our family, friends, and the society in general.

Thus one's "character" (*gati*; pronounced "gathī") are in constant flux, either by choice or influenced by the environment.

6. This is a key point: We need to make sure that we do not "go with the flow", i.e., let past *kamma* or our environment determine our future.

- As humans, we have the capability to change our destiny. We DO HAVE free will, unlike an animal. Since we do not know what our next existence is going to be, we need to make sure to get on the "right path" as soon as possible.
- Even 100 years of this life is NOTHING compared to millions and billions of years life in "unknown territory" in the future; thus we need to make use of this opportunity.

7. As we discussed in the "[Truine Brain – How the Mind Rewires the Brain via Meditation/Habits](#)", only the humans have a developed neocortex, that makes possible "thinking, and decision making." The animals either do not have it, or have a primitive version of it.

- Therefore, the animals basically only use the "mid brain" or the "limbic system", where decisions are made FOR THEM according to their ingrained habits that have evolved over many, many lives (as we discussed, the physical body is formed based on the *manomaya kaya*). The response from the limbic system is instantaneous, and the animals can only REACT to external stimuli.
- All *sansāric* habits are built-in to the limbic system, and the animals react according to the way the limbic system is wired up; this may change some during growing up due to external environment, but the main "character qualities" (*gati*) do not change very much. That is why you see adorable dogs as well as vicious dogs. Even our pets have "a personality."
- We can change their personalities by teaching them things, but they are unable to do it on their own. It is easier to "teach" more evolved animals like monkeys because they have a bit of a neocortex.

8. But we humans have a neocortex that is well-developed and is capable of much more than we normally believe it to be capable of. **It is this neocortex that makes us, humans, different from animals (actually, it is more accurate to say that "our current bhava" is superior to an "animal bhava").**

- Even though we also REACT first, especially to a threatening stimuli, our "thinking brain" starts to kick in quickly, especially with training. Many people get into trouble because they are "REACTIVE", i.e., they do not try to develop the habit of using the "thinking brain."
- But we can be PROACTIVE. We can teach ourselves to "take corrective actions" even if we do some things on impulse. Even if the initial reaction to a sudden temptation is to "take it and enjoy it" or "hit him" or "kill that annoying dog", we can always take a breath, stop ourselves, and think about the consequences of such actions. This is what we call "mindfulness."
- Some people are more proactive than others even at birth (via *sansāric* habits). Some people change from being reactive to proactive or other way around even without knowing due to the particular environment they grow up in.
- The key point is that we can WILLFULLY change from being reactive to proactive; we all are reactive at least to some stimuli: the one's we have "*taṇhā*" for! In other words, we like to get attached to certain things and like to dislike other things with PASSION; see, "[Tanhā – How we Attach via Greed, Hate, and Ignorance.](#)"

9. In terms of science the key is in the neurons in the brain, and how we can train our neocortex to fire the right sets of neurons more frequently. The "frontal lobes" of the neocortex is the command center for brain activities.

- The frontal lobes can be visualized as the boss. If it is a lazy boss, it will just assign duties to the limbic system to carry out things "as usual."

- But if the boss is energetic and always looking for ways to “improve things”, then it will start investigating new approaches. And once better approaches are found, it will get them “hard wired” and they will essentially become the “new limbic system.”
- This is the key to “developing a new you” by discarding bad habits and developing good habits. Essentially you need to get the frontal lobes to be an active, energetic boss for the brain.

10. Dr. Jeffrey Schwartz is a psychiatrist specializing in treating Obsessive Compulsive Disorders (OCD), and has pioneered in using “habit makeovers” to treat OCD. He has written several books, but I highly recommend the two books, “The Mind and the Brain” and “You are not Your Brain.”

He has developed a “Four Step” method to change one’s habits that give rise to OCD:

1. Identify the problem area.
2. Recognize the need to change.
3. Deviate from automatically “going along” with old ways and re-direct attention to “new paths.”
4. Re-assess the situation, and keep working on accelerating the process.

11. He has kept records of brain scans of his patients which clearly show the improvements in the brain with time, and of course most patients are able to get rid of their compulsive behavior.

- The key is to slow down the “firing of neurons” associated with a bad habit and to increase the firing of neurons associated with an opposing good habit.
- There is a rule called Hebb’s rule that says, ‘neurons that fire together, wire together.’ The more one keeps doing a certain activity, a set of neurons start to fire together and that neural connection gets stronger by the day. It is just like strengthening one’s arm by “doing more liftings” with it.
- In the same way, when one is decreasing the use of a certain activity, the set of neurons allocated for that activity gets weaker, fewer neurons participate, and eventually it loses being a habitual act.

12. Here is a figure from Dr. Schwartz’s book, “The Mind and the Brain” (p. 362), that illustrates the “re-wiring” of a new network in the brain and the concomitant weakening of a network for an undesirable habit :

4 The quantum rules allow both states—“release” and “don’t release”—to co-exist. Early in therapy, however, the wave representing “release neurotransmitter” in the OCD circuit has a higher probability than the wave representing “release neurotransmitter” in the garden circuit. The patient is much more likely to go to the sink.

increases the probability that neurotransmitter will be released in that circuit, not the “wash” circuit.

5 By expending mental effort and thus unleashing mental force, however, the OCD patient is able, by virtue of the laws of quantum mechanics, to change the odds. Focusing attention on the “garden” thought

6 The OCD patient can now act on this thought and go to the garden. This increases the chance that, in the future, the “garden” circuit will prevail over the “wash” circuit.

7 If the patient regularly goes to the garden instead of the sink, neuroplasticity kicks in: brain metabolism changes in a way that strengthens the therapeutic circuit. As a result, future OCD urges are easier to overcome.

[WebLink: PDF file: Habit Formation Figure](#)

This figure explains how a patient who had an obsessive disorder to constantly wash his hand, got rid of that habit by WILLFULLY stepping outside to the garden when he got the urge to wash hands. As he kept doing it, the wiring to “wash hands” got weakened, and instead wiring for “stepping outside” got stronger, and eventually he lost the compulsive urge to wash his hands too often.

13. The same principle has been used to get rid of such annoying habits as well as serious disorders. We can use the same procedure to stay away from immoral habits and cultivating moral habits; this is the basis of “*ānāpāna*,” see, “[9. Key to Ānāpānasati – How to Change Character and Habits \(Gathi\)](#).”

5.6 Inconsistencies with Science

Revised March 4, 2018

1. We all are impressed by the scientific advances made during the past 100 years or so making our lives easier and more productive. I am actually a cheerleader for scientific and technological advances.

- Physics had been my passion since high school days, and that changed when I started learning Buddha Dhamma several years ago. I still love and work on topics of interest in physics (and science in general). Fortunately, I am finding that those two interests are not mutually exclusive, and there is significant overlap. In fact, this section is the result of my two overlapping interests.

2. The following posts discuss cases where current theories of science are not consistent with Buddha Dhamma. I believe that science will recognize the primary nature of the mind in the future, and will discard the current notion that the mind (consciousness) arises out of inert matter.

- [Neuroscience says there is no Free Will? – That is a Misinterpretation!](#)
- [The Double Slit Experiment – Correlation between Mind and Matter?](#)
- [Vision \(Cakkhu Viññāna\) is Not Just Seeing](#)

3. Despite the advances in science and technology, there is much about the human mind that science does not understand, and has not even begun to understand. **Western science is based on the five physical senses, leaving out the most important one, the mind.**

- At the present time, in 2016, scientists have the wrong view that consciousness originates in the brain.
- All scientific theories relating to the mind are based on this wrong hypothesis. However, Buddha Dhamma says not only that mind is a sense of its own, but it is the most powerful of all six senses.

Here is a post from the Abhidhamma section that has a deeper analysis on the brain-mind connection:

[Brain – Interface between Mind and Body](#)

5.6.1 Neuroscience says there is no Free Will? – That is a Misinterpretation!

Revised April 22, 2016; revised November 15, 2019; September 6, 2020 (update at the end of the post)

Libet's Experiment

1. In 1983, Benjamin Libet conducted an experiment **apparently showing** that our brain makes decisions before we become aware of it. When a person moves a finger, the brain activity appears to start before the person actually makes that decision.

- There have been numerous follow-up experiments since then. All those experiments seemed to confirm this observation, even though the time delays vary.
- Scientists and philosophers are quite puzzled and some are very worried that we are just zombies run by a program in our brain.

2. Here is a video clip that illustrates the basic experiment:

[WebLink: VIMEO: Neuroscience and Free Will](#)

Here is a recent youtube video on the same subject:

[WebLink: Youtube: Do humans truly have Free Will?](#)

Does Libet's Experiment Prove There is No Free-Will?

3. Since Libet published his results, scientists and philosophers have been debating whether these experiments show that man has no free will:

[WebLink: WIKI: Neuroscience of free will](#)

- Also, see the recent post, "[Mind Is Not in the Brain](#)" and follow-up posts at "[Buddha Dhamma – A Scientific Approach](#)"

Refined Follow-Up Experiments

4. The second recent experiment is a bit more refined. Let us summarize that experiment:

- The person randomly decides (no pre-planning) to press a button at some time. Let us take this time to be TM (M for the mind) making the decision.
- He presses the button at TF, which is recorded electronically (F for using the finger to press the button).
- At the same time that he decides to press the button, he is watching the clock and makes a mental note of the "time" and after hitting the button, records that time too: TE (E for using the eye to see the time on the clock). It is important to note that TE is the time that the MIND says it saw the clock.
- Finally, his brain activity is recorded by the sensors attached to his head. Let us take the recorded start of brain activity to be TB.

Here is a summary from the researchers (you can click on the figure to expand and then hit the back button on the browser to get back):

So, the researchers conclude that since brain activity started at TB before, either (i) him pressing the button (at time TF) , or (ii) him recording the "clock" **at the time TE when he made the decision**, the brain activity started before he made the decision.

- The problem is that **they ASSUME that the time, TE, that one gets off the clock is the same as the time, TM, that the mind makes the decision to press the button.**

Explanation From Buddha Dhamma

5. In Buddha Dhamma, the mind is the precursor to every action that we do with the body. The mind's decisions are implemented by the brain. The brain is just a very sophisticated computer.

- Buddha's explanation of the mind is very thorough. The basic ideas at "[Moral Living and Fundamentals](#)" and "[Essential Abhidhamma – The Basics](#)."

- More detailed analyses on how the mind and the brain work together at “[Buddha Dhamma – A Scientific Approach](#),” and “[The Grand Unified Theory of Dhamma](#)” and “[Mental Body – Gandhabba](#),”
- Deeper aspects discussed in the “[Abhidhamma](#)” section.
- Some of the basic aspects are discussed below.

Brain Is The “Control Center”

6. The brain is the control center for the mechanical body to carry out both these tasks ASSIGNED BY THE MIND. The brain gets the finger to push the button and the physical eye to look at the watch.

- Now the mind is in the *manomaya kāya* and is lined up with the heart of the physical body. The mind and the brain are connected by a signal system that is analogous to how television or radio signals are transmitted (very fast, possibly electromagnetic). The brain communicates with the five senses via the nervous system, and those communications are slower.
- Thus the brain gets the message from the mind to “press the button” and to “watch the clock.” Thus TB is ALWAYS later than TM.
- Modern science has shown that, “It normally takes 0.4 – 0.6 seconds for the nervous system to activate available muscle motor units to contract,.....” (see, at the very end of the article: [WebLink: WIKI: Motor control](#)). The finger movement involves muscles in the arm, and the eye movement involves muscles in the head and the eye).
- Both actions of “watch the clock” and “press the button” are initiated by the brain (with the help of the central nervous system) per mind’s instructions. The eye function circuitry can be logically thought to be a bit faster than the mechanical finger moving. Thus “watching clock” gets done first with the eye, and a little time later the finger has pushed the button. So, here is the time sequence per Buddha Dhamma (you can click on the figure to expand and then hit the back button on the browser to get back):

6. The mind initiates all movements of the body. Here, it is the mind that starts off the brain activity, i.e., TB is later than TM. The brain activity starts AFTER the mind decides to take action because the brain needs to get the signal from the mind. The seat of the mind (*hadaya vatthu*) lies close to the physical heart, far away from the brain.

- Now the brain needs to carry out those two functions of pressing the button and look at the clock. The vision circuitry is faster. The mechanical movement of the fingers is slower (it involves moving muscles), and thus pushing the button happens a bit later.

Back to Libet’s Experiment

7. **Now, let us go back to the first experiment.** The only difference here is that the person is not recording the time. He just presses the left or right button. So, there are just two events recorded now instead of three events. All we have to do is to remove TE from the above two graphs.

- It is simpler: His mind decides to push the button. The mind directs the brain to push either the left or right finger, and it takes some time for the brain to mobilize the muscles to move the finger. The time sequence is the same as in the same figure. The mind decides (TM), the brain starts working on it (TB), and the sensors attached to his head record that brain activity (wiggly line). Finally, the finger pushes the button (TF).
- As in the other experiment, **the mistake is to assume that finger pushing happens SIMULTANEOUS with the mind's decision.** But the mind only gets the brain (the computer) to initiate the complex sequence of events to work the muscles in the arm and hand to move the finger, and that is the lag time.

An Analogy

8. The body is like a mechanical instrument, say, a sophisticated tank that is used to fire at the distant object. The operator is like the mind. He aims the gun barrel using sophisticated computer-controlled circuitry and then fires the gun. He can drive the tank where ever he wants. But things do not, **and cannot**, happen simultaneously with the operator's decision. The gun needs to be moved into position before it is fired.

- The mind is controlling the body just like that. The finger (and the eye) in the above case(s) are just two instruments helping with the two tasks of pressing the button (and reading the clock), and the brain is the "control center" that oversees both those activities on the command of the mind.
- The connection between the body and the mind is explained in the post, "[Brain – Interface between Mind and Body](#)" and other posts on the *gandhabba*.

Thoughts Arise in Hadaya Vatthu, Not In The Brain

9. The "seat of the mind" (*hadaya vatthu*) is in the *manomaya kāya* (also called *gandhabba*). Thoughts arise there, not in the brain. The brain is a very sophisticated computer and controls the physical body per instructions given by the mind. At death, the *manomaya kāya* with the mind leaves the body and both the body and the brain become lifeless. See, "[Ghost in the Machine – Synonym for the Manomaya Kāya?](#)," "[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)," and "[Manomaya Kāya and Out-of-Body \(OBE\) Experience](#)."

- Therefore, we are not robots controlled by a program running in our brain. The brain is just a sophisticated mechanical instrument that helps the mind with coordinating the tasks (like the computer in the tank in the above example that is helping the tank operator). But there are certain functions like breathing that the brain carries out without input from the mind. We will discuss those in an upcoming post soon.
- Any person has the POTENTIAL to do things in a scale that is unimaginable to us. We just do not realize the power of our minds; see, "[Power of the Human Mind – Introduction](#)," and the follow-up posts.

September 6, 2020 update:

There have been a few recent experiments that reduce the delay between TE and TF in #4 above. The following is the most recent paper on the subject: "[WebLink: sciencedirect.com: Sanford-Libet's Intention Reports are Invalid-2020](#)"

- To quote from the abstract of the above paper: "...We argue that Libet's intention reports are invalid and explore the phenomenology of intention in the Libet's experiment."

5.6.2 The Double Slit Experiment – Correlation between Mind and Matter?

Revised March 13, 2018; November 15, 2019

Introduction

1. The failure of a materialistic approach to explain consciousness is becoming ever more apparent; see Refs. 1 and 2 below.
 - The materialistic approach, of course, is to explain mental phenomena to arise in the brain that is composed of inert matter.
2. A number of scientists/philosophers are hoping that quantum mechanics can come to the rescue (Ref. 3,4).
 - They say that even though deterministic Newtonian mechanics is unable to explain consciousness, quantum mechanics can (because quantum mechanics does not have such an apparent deterministic nature.)

Quantum Mechanics to the Rescue?

3. Quantum mechanics (QM) is different from other branches of physics where one can get the intuitive idea of what is taking place.
 - What we are currently doing with QM can be called a “black box” approach. When we apply the correct equations, we get the right results. Einstein did not like this at all. Yet, to his frustration, all his predictions of the inadequacy of QM did not materialize AND the predictions of QM have been correct to amazing accuracy.
4. Those experiments, the results of which can only be explained by QM, **appear to be** non-deterministic in nature.
 - This has compelled some scientists to investigate whether there is a connection between QM and the mind, which IS non-deterministic. Two experiments, in particular, have been at the forefront of these discussions. The “double-slit experiment” and the “Schrödinger’s cat experiment.”
5. My intent in this essay is to challenge the two prominent assumptions on this postulated relationship between QM and the mind:
 - i. Even if QM and the mind are non-deterministic in their own rights, there is no special reason to believe that there is an apparent connection between them.
 - ii. There is nothing really “non-deterministic” about QM, other than the indeterminacy depicted by the Heisenberg uncertainty principle. That is just on the accuracy of a given measurement.

Quantum Mechanics Is Not Intrinsically Psychophysical

6. Let us look into (i) first. Henry Stapp is a leading physicist who argues that quantum theory will ultimately provide an explanation for consciousness. In his book, “Mindful Universe” he says (p.2), “... quantum theory itself is intrinsically psychophysical as designed by its founders, and as used in actual scientific practice, it is ultimately a theory about the structure of our experience that is erected upon a radical mathematical generalization of the laws of classical physics.”
 - My basic point is that quantum theory is NOT psychophysical; there is no way to accommodate “subjectivity” in QM. Where is the “mind connection” in the theory of QM?
 - There are others who work on theories that try to explain consciousness as arising from quantum effects in the brain; see, for example, “Conversations on Consciousness”, by Susan Blackmore (2006). No one

has clarified how these theories make the connection between “psyche” and “physical” in “psychophysical.”

The “Observer Effect” in QM

7. Let us review one experiment that has become the main demonstration for the “observer effect” in QM, the “double-slit experiment.” Here is a short video by Dr Quantum to illustrate the “paradox” of the double slit experiment:

[WebLink: YOUTUBE: Dr Quantum Double Slit Experiment](#)

8. The two main points of this experiment are:

- a. the particles behave like waves when both slits are open, and
- b. this “wave nature” goes away when the path of the particle is “observed” or monitored.

Bohmian theory of Quantum Mechanics

9. There is a version of QM called the Bohmian theory or the Pilot Wave theory that was developed by the late David Bohm. It does use the Schrodinger’s equation which is used to track the propagation of a “pilot wave.” The theory is explicitly non-local, i.e., quantum entanglement is built-in.

- With this theory, each solution of the wave equation describes a DETERMINISTIC path for the particle, and statistical average agrees with the experiments and the results of the standard QM calculations.
- The actual trajectories have been harder to measure not because of a “mind effect,” but because an observation can disturb the particle trajectory itself. Recent experiments have been conducted to “weakly” measure a system without appreciably disturbing the trajectories. Those experimental results are consistent with the predictions of Bohmian theory (Ref. 5).

Thus the role played by Bohmian mechanics in these “QM experiments” is just like role statistical mechanics played in thermodynamics.

- Here is a very short video of the INDIVIDUAL trajectories for a double-slit experiment calculated using the Bohmian theory. There is nothing “mysterious.” **Each particle has a definite trajectory. There is no “observer effect.”**

[WebLink: YOUTUBE: Bohmian Trajectories in the Double-Slit Experiment](#)

- When it is attempted to observe the path of an individual particle, the coherence of the system or the pilot wave is disturbed and the interference pattern goes away. Thus there is no “observer effect,” in the sense of bringing “subjectivity” in.

“Schrödinger’s Cat” Thought Experiment

10. Another famous experiment that has been the subject of much discussion is the “Schrödinger’s cat” thought experiment. This experiment suggested by Schrödinger back in 1935, involves a cat in a closed chamber.

- A radioactive sample in the chamber, if undergoes decay within a given period of time, triggers the release of a hammer that breaks a vial of a toxic gas that kills the cat. If conscious observation is required to collapse the wave function, then the fate of the cat is not known until the box is opened. Unfortunately, both the consciousness-based and consciousness-free interpretations of quantum measurement are indistinguishable to the observer outside the box.
- In 2006, an actual experiment was conducted to simulate this experiment. It was reported that, “... measurement alone, rather than conscious observation of a measurement, is sufficient”; see Ref. 6.

No Real “Observer Effect”

11. Thus there is no real “observer effect” in the double slit experiments or in the Schrödinger cat experiment.
- In the double-slit experiment, what an “observer” does is to disturb the coherence of the system, if the disturbance is strong. It does not matter whether the “observer” is human or a mechanical device (in most cases it is non-human); one ALWAYS gets the same result. This is in contrast to real subjective situations. For example, in the stock market, complex subjective decisions are made by millions of people.
 - So, where does the “objectivity” or “intention” – in the sense of the mind affecting the experimental result – come from? “Intent to monitor” is not really a significant subjective decision; just a simple “yes” or “no.”
12. Therefore, it is clear that there was no evidence for “subjectivity” in those experiments even before Bohmian mechanics or the Schrödinger’s cat experiment. Those two pieces of evidence really make that point undeniable. There is no evidence of the mind affecting the outcomes of those experiments.

The Mind Creates Matter, Not the Other Way Around

13. The Buddha stated that the mind is at the forefront; “[Manōpubbangamā Dhammā..](#)” A deeper *Abhidhamma* analysis is available at “[The Origin of Matter – Suddhatthaka.](#)”
- Even though mind affects matter and even CREATES matter, science has not advanced enough yet to confirm that.
14. There has to be a paradigm change in science to explain consciousness. **Any theory based on matter and attempt to treat mental phenomena as a byproduct will not succeed.** The mind is the more fundamental entity and takes precedence over matter.
- Some philosophers are beginning to sense this reality. Even though he does not appear to know anything about Buddha Dhamma, philosopher Thomas Nagel says the following. “The great advances in the physical and biological sciences were made possible by excluding the mind from the physical world... ..But at some point it will be necessary to make a new start on a more comprehensive understanding that includes the mind.” (Ref 1, p.8). Then on p. 15, “...The possibility opens up of a persuasive conception of the natural order very different from materialism – one that makes mind central, rather than a side effect of physical law.”

Consciousness and Quantum Mechanics

March 13, 2018: I have started a new section “[Quantum Mechanics and Dhamma](#),” where a new interpretation of quantum mechanics is presented, and it is discussed why a connection between quantum theory and consciousness **will not be** possible.

5.6.3 Vision (Cakkhu Viññāṇa) is Not Just Seeing

July 15, 2016

1. In 1988, Dee Fletcher almost died due to carbon monoxide poisoning. Her husband found her unconscious just in time to save her life. However, when she recovered, she had lost "sight" in the normal sense of word.

- She could not see and recognize someone standing right in front or read a book.

2. But soon it was realized that she had some peculiar abilities. She could grab a pencil from the hand of a person who held it in front of her, even though she could not actually "see" the pencil or the person.

- Her vision is good enough for picking something up, but not good enough for seeing it!

Since then researchers have done numerous experiments on her, that have led to some astonishing findings about how vision works.

- For example, they tested her with a mailbox with a narrow slit for inserting letters. Even though she could not see the mailbox — let alone the slit or the envelope — she could insert the letter in the slot without any effort. Even when they tilted the slit, she did not have a problem at all! It was as if a phantom inside her was doing that task for her.

3. Another ability of Dee was to be able to walk around the house without bumping into furniture or walls. Since that ability could be due to her familiarity with the house, they took her to an unfamiliar trail and she did not have any problem walking there without tripping over rocks or bumping into trees.

- This disorder is known as **visual agnosia**.
- It turns out that there are two relatively independent visual systems in the brain: One for conscious perception (**visual cortex**), which was severely damaged in Dee. The other was for unconscious control of action (**superior colliculus**), which is largely preserved.

4. A figure of the optical nerve splitting into those two areas in the brain is shown below.

You can download the figure [here](#).

5. The presence of two streams of visual processing in the brain had been known only since 1982. Even though the role of the **visual cortex** in the brain (in producing a “picture in the mind”) had been known before that, the role of a second processing area in the brain (**superior colliculus**) that helps with figuring out the “depth of vision” or how far a given object was proposed in 1982 by Leslie Ungerleider and Mort Mishkin.

- Of course, their model helped explain the symptoms experienced by Dee Fletcher. She had parts of her visual cortex damaged by the carbon monoxide poisoning, while her superior colliculus was left mostly intact. Her eyes were sending the signals to the visual cortex, but the damaged visual cortex could not process that signal.
- By the way, you do not need to know the details of visual cortex, superior colliculus, or any other technical term to get the idea that I plan to convey. I do not know details about them either.

6. Of course, scientists are only aware that those two areas in the brain **contribute** to those two functions. They do not know exactly how the visual cortex gleans information about what the object is (i.e., its visual characteristics) OR how the superior colliculus figures out the dimensions of the object and how far it is at (in order to correctly grab an item both types of information are needed).

- We need to realize that there is “no light” going to the visual cortex and there is no screen at the back of the head that displays the object in question. The optical nerve only transmits a chemical (and electrical) signal. **The visual cortex somehow generates a “picture” for our mind to see.**
- Even more mysterious is how the **superior colliculus figures out the depth of vision** just from that chemical signal coming through the optical nerve.
- We will come back to these issues in upcoming posts, but first let us continue with our discussion on what the scientists know at this time and how they found them.

7. There are many research papers that describe experiments involving Dee Fletcher, and the two principal researchers have written a book on this research: “Sight Unseen – An Exploration of Conscious and Unconscious Vision” by M. A. Goodale and A. D. Milner (2004).

- The above book is a bit expensive. A less detailed account is given in Chapter 4 of V. S. Ramachandran’s popular book, “Phantoms in the Brain” (1998), which is relatively inexpensive. He is a neurosurgeon and has discovered some other interesting findings about the brain that are also described

in this book. We will discuss a couple of those observations (particularly his and others' work on "phantom limbs") in future posts.

- There is also a Wikipedia article on the [WebLink: WIKI: Two-streams hypothesis](#) on vision.

8. The visual problem that is the opposite of that of Ms. Fletcher has also been observed, as described in the book by Goodale and Milner. This syndrome is called the "optic ataxia," and those who have it can "see" and recognize objects very well; but they have difficulty in actions involving objects.

- Those who suffer from optic ataxia, for example, can see the mail box and the slit described in #2 above. However, they have much difficulty in putting a letter through the slit.
- It turns out that these people have their superior colliculus damaged, but the visual cortex works fine.

9. Have you thought about how we can move around without bumping into each other and other objects like trees on the ground and cars on the road? The presence of the two processing streams can BEGIN TO explain how the brain figures out not only "what is in front of us (a human, tree, or a car)" but also "how far is it at and how big it is."

- As mentioned above, part of the signal going through the optical nerve to visual cortex deals with the first task and the other part going to the superior colliculus deals with the "how far and how big" issue.

10. Even though scientists have figured out that those two areas in the brain (visual cortex and the superior colliculus) somehow extract the two kinds of information, **they have absolutely no idea how those areas extract that information from the chemical signal that comes through the optical nerve.**

- Scientists do know that the lens in an eye projects an image of the object to the back of the eye (retina); see the figure above. It is pretty much the same as an image you can see with a lens:

This is pretty much how a camera captures an image:

11. Of course, the film in an old camera undergoes some chemical changes when the image falls on it. Then that film is chemically processed to reveal the picture.

- In the same way, when the image of an object falls on the retina of an eye, the cells on the retina generate a chemical (and electrical) signal. This signal is the one that is transmitted by the optical nerve to the visual cortex and the superior colliculus in the brain. There is no picture transmitted to the brain.
- So, how does the visual cortex generate a visual of the object starting with the chemical signal that comes from the eye?
- Even more puzzling is how the superior colliculus figures out the distance to the object (and the dimensions of the object), solely based on that same signal.

12. Even within the visual cortex itself, there are 30 different areas specialized to carry out different tasks in order to make a “comprehensive picture” of the object.

- For example, the area called V4 deals with the color of the object, but does not care about the direction of motion.
- On the other hand area MT (also called V5) responds to targets in the visual field based on their direction of motion, but does not care about the color of the object. Thus there are multiple tasks done even within the visual cortex by specialized sub-areas.

13. Thus it is clear that the brain is indeed a very sophisticated machine! However, as we will find out in upcoming posts, it is not a typical machine like a computer. **It can change on its own!**

- **While a computer cannot get rid of parts that go bad, the brain can indeed replace or repair bad parts and even make new parts in some cases** (however, when a whole section is damaged, like in the case of visual cortex or superior colliculus such a rejuvenation is not possible). This is what is puzzling the neuroscientists right now. **They have confirmed that these things happen (I will discuss examples in future posts), but have no idea HOW the brain does that.**
- The key to this puzzle is that the physical body is actually controlled by our “mental body” or the *gandhabba*. The *gandhabba* has three components: *kammaja kaya*, *cittaja kaya*, and the *utuja kaya*. **It is actually the *cittaja kaya* that plays the dominant role in CHANGING brain functions.** In other words, it is OUR THOUGHTS that can change the brain!
- Ultimately, one attains *Nibbāna* by gradually transforming one’s own brain. **In other words, getting rid of greed, hate, and ignorance can change one’s brain!** However, even a Buddha can only show how it is done, and one has to make the effort.
- The four types of bodies that we have and the *gandhabba* are discussed in the section “[Gandhabba \(Manomaya Kāya\)](#).” The key functions of the *cittaja kaya* are also discussed in the post, “[Udayavaya Ñāna – Importance of the Cittaja Kaya](#).”

14. We live in a truly opportune time to comprehend the value of Buddha Dhamma. Modern science is providing clues that can be used with Buddha Dhamma to clarify many issues. I believe that Buddha Dhamma is able to guide scientists (and philosophers) in their quest to answer many issues.

- In this series of posts, I hope to suggest some such avenues for scientists to explore, based on Buddha Dhamma, which can also explain many of these “new findings.”
- As I have mentioned many times, these details are not needed to attain *Nibbāna*. However, for most people, future confirmation of such “predictions” hopefully will help build confidence in Buddha Dhamma, and to appreciate its value.
- Of course the real value of Buddha Dhamma is not in exposing such mundane things, but showing the path to liberation from suffering (*Nibbāna*). But it is good to have faith in Buddha Dhamma, so that one can feel confident that one is not wasting one’s precious time in learning Buddha Dhamma.

VI Three Levels of Practice

It is a good idea for anybody to read the first section, because the basic ideas and fundamentals are described in that section.

○ First Section: Moral Living and Fundamentals

▪ Subsection: The Basics

- “The Pale Blue Dot.....”
- “The Law of Attraction, Habits (Gathi), and Cravings (Āsavas)”
- “Habits, Goals, and Character (Gathi)”
- “Wrong Views (Micchā Ditthi) – A Simpler Analysis”
- “First Noble Truth – A Simple Explanation of One Aspect”

▪ Subsection: Calming the Mind

- “Key to Calming the Mind – The Five Hindrances”
- “Solution to a Wandering Mind – Abandon Everything?”
- “Right Speech – How to avoid Accumulating Bad Kamma”
- “Three Kinds of Happiness – What is Nirāmisa Sukha?”
- “Need to Experience Suffering in Order to Understand It?”
- “Does Impermanence Lead to Suffering?”

▪ Subsection: Buddha Dhamma and Buddhism

- “A Buddhist or a Bhouddhaya?”
- “Where to Start on the Path?”
- “What Reincarnates? – Concept of a Lifestream”
- “Recent Evidence for Unbroken Memory Records (HSAM)”
- “Buddhism without Rebirth and Nibbāna?”

▪ Subsection: Dhamma Concepts

- “Kusala and Akusala Kamma, Puñña and Pāpa Kamma”
- “Ten Immoral Actions (Dasa Akusala)”
- “Punna Kamma – Dāna, Sīla, Bhāvanā”
- “The Five Precepts – What the Buddha Meant by Them”
- “How to Evaluate Weights of Different Kamma”
- “What is Kamma? – Is Everything Determined by Kamma?”
- “Account of Aṅgulimāla – Many Insights to Buddha Dhamma”
- “The Four Bases of Mental Power (Satara Iddhipada)”
- “Why is it Necessary to Learn Key Pāli Words?”

▪ Subsection: Buddha Dhamma and Morality

- “Origin of Morality (and Immorality) in Buddhism”
- “Is Eating Meat an Akusala Kamma (Immoral Deed)?”

- [“Do Things Just Happen? – The Hidden Causes”](#)

○ **Second Section:** [Working Towards Good Rebirths](#)

- [“Sansāric Habits and āsavas”](#)
- [“Vagaries of Life and the Way to Seek Good Rebirths”](#)
- [“How to Avoid Birth in the Apayas”](#)
- [“How the Buddha Described the Chance of Rebirth in the Human Realm”](#)
- [“Kamma, Debt, and Meditation”](#)
- [“Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)”](#)
- [“How do we Decide which View is Wrong View \(Ditthi\)?”](#)
- [“Three Kinds of Ditthi, Eightfold Paths, and Samādhi”](#)
- [“Implications of the Rebirth Process in Daily Life and in Society”](#)
- [“What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons?”](#)
- [“Patisandhi Citta – How the Next Life is Determined According to Gathi”](#)

○ **Third Section:** [Seeking Nibbāna](#)

- [“Attha Purisa Puggalā – Eight Noble Persons”](#)
- [“Āsava, Anusaya, and Gati \(Gathi\)”](#)
- [“The Way to Nibbāna – Removal of āsavas”](#)
- [“Kanha \(Dark\) and Sukka \(Bright\) Kamma and Kammakkhaya”](#)
- [“Dasa Samyojana – Bonds in Rebirth Process”](#)
- [“The Cooling Down Process \(Nibbāna\) – How the Root Causes are Removed”](#)
- [“Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?”](#)
- [“How to Cultivate the Noble Eightfold Path Starting with Anicca, Dukkha, Anatta”](#)
- [“Difference Between Giving Up Valuables and Losing Interest in Worthless”](#)
- [“Root Cause of Anicca – Five Stages of a Sankata”](#)

○ **Fourth Section:** [Sotāpanna Stage of Nibbāna](#)

- [“The Sotāpanna Stage”](#)
- [“Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire”](#)
- [“Myths about the Sotāpanna Stage”](#)
- [“Anuloma Patiloma Paticca Samuppāda – Key to Sotāpanna Stage”](#)
- [“Sotāpanna Anugāmi and a Sotāpanna”](#)
- [“Sotāpanna Anugāmi – No More Births in the Apāyās”](#)
- [“Four Conditions for Attaining Sotāpanna Magga/Phala”](#)
- [“Sotāpatti Anga – The Four Qualities of a Sotāpanna”](#)
- [“Sammā Ditthi – Realization, Not Memorization”](#)

- [“Sakkāya Ditthi is Personality \(Me\) View?”](#)
- [“How Does One Know whether the Sotāpanna Stage is Reached?”](#)
- **Subsection:** [“Assāda, Ādīnava, Nissarana”](#)
 - [“Assāda, Ādīnava, Nissarana – Introduction”](#)
 - [“How Perceived Pleasures \(Assāda\) lead to Dukkha”](#)
 - [“Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha”](#)
 - [“Vedanā \(Feelings\) Arise in Two Ways”](#)
 - [“Feelings: Sukha, Dukha, Somanassa, and Domanassa”](#)
 - [“What is “Kāma”? It is not Just Sex”](#)
 - [“Kāma Āsvada Start with Phassa Paccaya Vedanā or Samphassa Ja Vedanā”](#)
- [“Akusala Citta – How Does a Sotāpanna Avoids Apayagami Citta”](#)
- [“What is the only Akusala Removed by a Sotāpanna?”](#)
- **Subsection:** [“Udayavaya Ñāna”](#)
 - [“Udayavaya Ñāna – Introduction”](#)
 - [“Nibbatti Lakkhana in Udayavaya Ñāna”](#)
 - [“Āhāra \(Food\) in Udayavaya Ñāna”](#)
 - [“Udayavaya Ñāna – Importance of the Cittaja Kaya”](#)

6.1 Moral Living and Fundamentals

Basic core concepts in Buddha Dhamma (Buddhism) are discussed. Many misconceptions that persist in both Mahayana and Theravada are discussed.

○ The Basics

- [“The Pale Blue Dot.....”](#)
- [“The Law of Attraction, Habits \(Gathi\), and Cravings \(Āsavas\)”](#)
- [“Habits, Goals, and Character \(Gathi\)”](#)
- [“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis”](#)
- [“Four Noble Truths: Recipe for Problem Solving”](#)
- [“First Noble Truth – A Simple Explanation of One Aspect”](#)
- [“Difference between a Wish and a Determination \(Paramita\)”](#)

○ Calming the Mind

- [“Key to Calming the Mind – The Five Hindrances”](#)
- [“Solution to a Wandering Mind – Abandon Everything?”](#)
- [“Right Speech – How to avoid Accumulating Bad Kamma”](#)
- [“Three Kinds of Happiness – What is Nirāmisa Sukha?”](#)
- [“Learning Buddha Dhamma Leads to Nirāmisa Sukha”](#)
- [“Need to Experience Suffering in Order to Understand It?”](#)
- [“Does Impermanence Lead to Suffering?”](#)

○ Buddha Dhamma and Buddhism

- [“What is Unique in Buddha Dhamma?”](#)
- [“A Buddhist or a Bhouddhaya?”](#)
- [“Where to Start on the Path?”](#)
- [“What Reincarnates? – Concept of a Lifestream”](#)
- [“Recent Evidence for Unbroken Memory Records \(HSAM\)”](#)
- [“Buddhism without Rebirth and Nibbāna?”](#)

○ Dhamma Concepts

- [“Amazingly Fast Time Evolution of a Thought \(Citta\)”](#)
- [“The Amazing Mind – Critical Role of Nāmagotta \(Memories\)”](#)
- [“Kusala and Akusala Kamma, Puñña and Pāpa Kamma”](#)
- [“Ten Immoral Actions \(Dasa Akusala\)”](#)
- [“Puñña Kamma – Dāna, Sīla, Bhāvanā”](#)
- [“The Five Precepts – What the Buddha Meant by Them”](#)

- [“What is Kamma? – Is Everything Determined by Kamma?”](#)
- [“How to Evaluate Weights of Different Kamma”](#)
- [“Account of Aṅgulimāla – Many Insights to Buddha Dhamma”](#)
- [“The Four Bases of Mental Power \(Satara Iddhipada\)”](#)
- [“Why is it Necessary to Learn Key Pāli Words?”](#)
- [Buddha Dhamma and Morality](#)
 - [“Origin of Morality \(and Immorality\) in Buddhism”](#)
 - [“Is Eating Meat an Akusala Kamma \(Immoral Deed\)?”](#)

6.1.1 The Basics

[“The Pale Blue Dot.....”](#)

[“The Law of Attraction, Habits \(Gathi\), and Cravings \(Āsavas\)”](#)

[“Habits, Goals, and Character \(Gathi\)”](#)

[“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis”](#)

[“Four Noble Truths: Recipe for Problem Solving”](#)

[“First Noble Truth – A Simple Explanation of One Aspect”](#)

[“Difference between a Wish and a Determination \(Paramita\)”](#)

6.1.1.1 The Pale Blue Dot.....

Revised March 2, 2020

Even if some of us are not thinking about a “wider world view” or “what happens after death”, all of us want a better world for all of us.

I thought of sharing this marvelous video from the late Dr. Carl Sagan:

[WebLink: YOUTUBE: Carl Sagan - Pale Blue Dot](#)

When I read the writings of all those past scientists like Sagan, Feynman, Einstein, Bohm, Heisenberg, etc., I wonder how much more they could have accomplished spiritually if they were exposed to pure Buddha Dhamma. Yet, I am still impressed by their pure reasoning and compassion for the humanity; they were not just scientists with a narrow focus. They thought deeply about the “purpose of existence.”

Even though science has revealed the unimaginable vastness of space, scientists think our universe is only 15 billion years old. However, each of us has an uncountable number of lives in the past. See, [“Origin of Life -- There is No Traceable Origin.”](#) Not only is our place in the vast cosmos insignificantly small, but our individual existence of about 100 years (in this life) is insignificantly small too.

- Yet, out of countless beings that live on this Earth, we are the only species that is capable of forging our own destiny.
- We need to be mindful not only of the welfare of family and friends but for all other people and beings (seen and unseen).

Do you know why some actions are good and others bad? We may quote some ethical maxims or juggle with philosophical abstractions, but there is a very simple explanation that is called nature: “Good is good

because it leads to happiness and freedom of the heart. Bad is bad because it leads to suffering, and it feels bad.” The Buddha said a moral deed (*puñña kamma*) is one that makes one’s heart “pulsating with joy”; an immoral deed leads to a burdened heart.

Nature encourages morality and punishes immorality via its built-in reward-punishment system, which is none other than the laws of *kamma*. But the punishment is not immediate, and that is why it is hard for people to make the connection. Even if the punishment in question comes to a few lives later, this “time lag” is really not that long since *samsāra* is “beginning-less” and “endless.”

Humans innately know what is right and what wrong. Most bad actions are committed with a mind that is not calm but is agitated. Therefore, we need to learn how to calm our minds: “[Key to Calming the Mind – The Five Hindrances](#).”

By the way, Dr. Sagan’s books like “Pale Blue Dot: A Vision of the Human Future in Space,” “The Varieties of Scientific Experience,” and “Billions & Billions: Thoughts on Life and Death at the Brink of the Millennium” are very informative. These are likely to be available in local public libraries.

Next, “[The Law of Attraction, Habits, Character \(Gathi\), and Cravings \(Āsava\)](#)”,

6.1.1.2 The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)

Revised October 24, 2018; March 2, 2020

1. The saying, “Birds of a feather flock together”, is true and we can see that all around us.
 - We can put people into various categories: sportsmen/sportswomen, thieves, politicians, murderers, churchgoers, environmentalists, liberals, conservatives, etc.
 - In a school, kids tend to get into different groups too: those who play sports, like partying, nerds, geeks, etc.
 - Of course, there may be some overlaps, but we can clearly see people tend to socialize with those who have common interests, likings, etc.
2. This is a universal principle. A basic rule in chemistry is that “like molecules” stay together.
 - We all know that oil and water do not mix together; the two molecules are very different. On the other hand, water molecules (or oil molecules) stay together happily.
3. Buddha Dhamma describes the laws of nature. So it is not surprising that the law of attraction comes naturally out of Dhamma. There are three keywords in Dhamma that are relevant: habits, character (*gati*; pronounced “gathi”, like in “three”), and cravings (*āsavā*); see, “[Habits and Goals, and Character \(Gathi\)](#).” Actually, some of the habits we take from life-to-life, see, “[Sansāric Habits, Character \(Gathi\) and Cravings \(Āsava\)](#).”
4. The law of attraction can be explained with Paṭicca Samuppāda, the principle of cause and effect in Dhamma; see, “[Paṭicca Samuppāda – Introduction](#).”
 - “Pati + iccha” means associate or bind with something one likes. “*sama + uppāda*” means what results (*uppāda*) from that is something similar (*sama*) in kind; i.e., that association leads to an outcome of the same kind.
 - If a child hangs out willingly and enthusiastically with others who like to work hard and enjoy getting good grades, then the child will continue on that path to success. The more a child willingly hangs out with a criminal gang, his mind becomes more attuned to criminal behavior and becomes a criminal capable of doing atrocious crimes.
 - **Thus, in Buddha Dhamma, it says, “*gati* (character) attracts a similar *gati*.”** We will see this developed into very deep meaning.

5. However, Dhamma says this law of attraction does not need to be fatalistic, i.e., one with a set of bad habits/cravings does not have to go down a slippery slope. One CAN change those habits/cravings GRADUALLY and thus change one's character (*gati*).

However, a child is not capable of doing this on his/her own. That is why it is the parents' responsibility to direct the child:

- Parents can make a HUGE contribution in setting up good habits/cravings in a child starting from the point of conception. The love and care the parent feel towards each other are FELT by the fetus. That is as important, perhaps more important, than the food consumed by the mother. A child born into an environment of abuse or violence may develop life-long problems.
- As the child grows, the child's behavior and habits are influenced HUGELY by the parents, friends, and the school environment. It is the responsibility of the parents and teachers to guide the child.

The reason is that the *manomaya kāya* of the child is aware of the surroundings even from the very early stages, even though it does not have any control over the situation; thus it is affected by the "environment"; see, "[Manomaya Kāya and Physical Body](#)."

6. When one becomes an adult, one has full control. Even if the child years were not good, and even if one has acquired a set of bad habits (or even *samsāric* habits that have molded one's character in fundamental ways), it is POSSIBLE to change them.

- One can use the same *Paṭicca Samuppāda* principle to change direction.
- All one needs to do is to change the "*pati+ichcha*" part, i.e., to change one's likings or habits. Then "*sama+uppāda*" will happen automatically. That is nature's law. See, "[Paṭicca Samuppāda](#)."

7. First, though, one needs to convince one's own mind that the current path will lead to a bad destiny; one needs to contemplate the bad consequences of staying on the same wrong path. AND one also needs to contemplate the benefits of cultivating good habits.

- For example, a smoker cannot just make a New Year resolution and stop smoking (a few can, but most cannot). Instead, it is better first to look at all the medical evidence out there that shows strong evidence that one could die early, and also may be burdened in old age with lung problems if one continued smoking. One could talk to someone who has given up smoking and listen to that person's "success story," or think about not having to see the annoyance of those who are around when one lights a cigarette, etc.

8. When one acquires "good habits" (initially slowly and with effort), one is attracted to people, settings, workplaces, environments that further nurture and grow those habits, which in turn change one's character; thus the process becomes self-feeding once started. This is the law of attraction as embedded in *Paṭicca Samuppāda*: "*pati+ichcha*" leading to "*sama+uppāda*."

- This is the law of attraction as embedded in *Paṭicca Samuppāda*: "*pati+ichcha*" leading to "*sama+uppāda*". Thus it is critical to developing a liking (*chanda*) and desire (*citta*) for what one wants to accomplish, and to critically analyze the situation (*vimamsā*), and make an effort (*virīya*); see, "[The Four Bases of Mental Power \(Satara Iddhipada\)](#)." [*vimamsā* : 'investigation, inquiry, pondering', is one of the 4 roads to power (*iddhi-pāda*)]
- When one embraces certain ways and activities (good or bad), those become habits. In Sinhala, it is said that "නිකර කරන දෛශ ගති වනෙවා (*ganna deya gathi venava*)." When one keeps doing this over and over and possibly over numerous rebirths, they get deeply embedded as deep-seated cravings (*āsavā*). Those *gati* (character) also become "*bhava*" as well; whatever that is liked becomes one's existence (*bhava*) or reality; in Sinhala, "තිබෙන බව (*thibena bhava*)".
- When one has a certain character (*gati*) it becomes easy to get into the corresponding "state" or existence; this is one meaning of *bhava*. For example, one with a "drinking habit" is easy to be "born" in that state, i.e., just the sight of a bar may cause that person to get drunk. **This is the concept extended**

in Buddha Dhamma. It is easy to be “born” with those characteristics in new birth (*uppatti bhava*) or even in present life (*pavutti bhava*). This a bit deeper concept discussed in the *Paṭicca Samuppāda* section; see, for example, “[Akusala-Mūla Paṭicca Samuppāda](#).”

9. The problem many people run into is that they would like to change quickly and that does not normally happen. Initial progress could be slow. However, when one gets traction, the process speeds up. It is like trying to reverse the direction of a moving car. One needs to stop going in the wrong direction first. Then when one starts the car facing the right direction, it takes a little while to accelerate and ramp up the speed. See, “[Habits, Goals, and Character \(Gathi\)](#),” and the links there. Let us consider two examples:

- If one wants to be a successful businessman, then one should try to “build up” habits that business people have: knowledge of the particular business, learning relevant skills, hard work, etc. THEN the law of attraction starts working and will pull one to others with similar interests and environments or conditions automatically.
- If a high-school kid wants to go to college, then he/she should make an effort to get into that mindset. Spending more time deciding what kinds of subjects to study and then get “immersed” in it. The parent and teachers can make a big difference by encouraging and guiding in the correct path.
- If someone wants to attain “*nirāmisā sukha*” (see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)”), one needs to spend some time and first learn the true Dhamma. **As one learns, one gets motivated to learn more, because one will start feeling the change in one’s character (*gati*).**

In all cases, one will be attracting external influences (friends, other interests, etc.) conducive to that effort automatically. AND one will lose some of the old influences too. Obviously, the ideal settings for the above examples could be different from each other, but not contradictory. Before trying to attain Nibbāna, a person with family responsibilities will need to fulfill those by making an income to support the family; a child needs to study well and find good employment. If one does not have the necessities of life (food, housing, clothing, and medicine) it is not possible to contemplate, let alone meditate.

10. Finally, the law of attraction works in the *samsāric* rebirth process too.

- Many are reborn to the same families, same geographic locations, etc (within the same “*bhava*”; see, “[Bhava and Jāti – States of Existence and Births Therein](#)”).
- At the moment of death, one’s mind automatically grasps a “matching birth” according to one’s *kamma vipāka*, and also one’s habits and tendencies. One who has lived an immoral life is likely getting a similar outcome in the next life. Someone who “lives like an animal” is likely to become an animal. One who lives like a “Deva” (a being devoid of hate) or a “*Brahma*” (a being devoid of greed and hate), is likely to reborn a *Deva, Brahma*.
- Thus by cultivating good habits and getting rid of bad habits, one CAN change the direction of one’s current life (character) AND future lives too.
- The best way to do this is to be mindful all the time. See the bad consequences of bad actions and bad habits and avoid them; see the good consequences of good actions and good habits and embrace them. At the very basic level, this is what is stated in the *Ānāpānasati, Satipaṭṭhāna Bhāvanā* (taking in what is good and getting rid of what is bad.) See, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

11. Currently, there are several books written on the subject of the law of attraction and how one can use certain procedures to attain goals, build relationships, etc. The Buddha described those and more 2500 years ago.

12. Many people think kamma is deterministic, for example, if one is born to poverty that is one’s destiny, but that is NOT the case. Kamma is not deterministic; see, “[What is Kamma? – Is Everything Determined by Kamma?](#)” The human mind is very powerful, and if used right (by

purifying it and then using it mindfully), the possibilities are endless: see, "[Power of the Human Mind – Introduction](#)" and the two posts following that for more details.

Next, "[Habits, Goals, and Character \(Gati\)](#)," ...

6.1.1.3 Habits, Goals, and Character (Gati or Gathi)

Revised November 26, 2018; revised June 6, 2020

1. As I mentioned before, Buddha Dhamma can be interpreted at three levels; see, "[Foundation of Dhamma](#)." But the key to making progress at ANY LEVEL is to get rid of bad habits and instill good habits because they mold one's character (*gati*) even though the rebirth process.

- The Pāli (and Sinhala) word for "character" is "*gati*" (ගතී) One's character can be changed (for good or bad) via changing one's habits. These habits take deep roots when practiced over many lives, and become deep-seated cravings ("*āsavas*") that form one's character.
- Some habits are harmless. For example, some people have the habit of shaking their legs while sitting. It could be annoying to some, but it is not "morally wrong", i.e., it is not one of the ten defilements; see, "[Ten Immoral Actions \(Dasa Akusala\)](#)."
- But there are other habits, such as drinking, stealing, sexual misconduct, etc that are morally wrong. They belong to the ten defilements of *dasa akusala*. Generating greedy or hateful thoughts can be a bad habit too. Some have a tendency to easily "flare-up."
- Then there could some, like gambling, that could lead to immoral actions.
- There are good habits too. Giving, helping others, teaching, and being compassionate in general.

2. For someone at the highest level, the *Sabbāsava Sutta* explains how one can work towards *Nibbāna* in a systematic way by developing good habits ("*gati*") and removing *āsavas*; see "Key Points from the *Sabbāsava Sutta*" under "[The Sotāpanna Stage](#)."

3. Here we are going to look at it to see how those recommended steps can be used in the day-to-day life, i.e., to live a moral life. Those steps can be used to remove any bad habits. Some example are alcohol or drug use, smoking, and eating too much.

- They can also be used in achieving goals, say lose weight, getting rid of depression, or starting a new business. Achieving goals require building good habits.

4. A habit is something one gets used to by repeating it over and over. Good habits make a life easier to live with, and bad habits lead to bad results. Scientific studies have confirmed that our brains "can rewire its connections" (plasticity of the brain), thus getting rid of bad habits and instilling good ones. The trick is to "stick to a set procedure." Many people give up before giving their brains enough time to "rewire"; this is why many "New Year resolutions" go unfulfilled.

- One way to remove bad habits is to look at the bad consequences of such habits; see, "[The Law of Attraction, Habits, Character \(Gathi\), and Cravings \(Āsavas\)](#)."
- In-depth analysis at, "[How Habits are Formed and Broken – A Scientific View](#)."

5. The seven steps in the *Sabbāsava Sutta* can be helpful for developing good habits for a moral life. These steps basically convince the mind of the benefits of good habits/downside of bad habits and set up a conducive environment.

The 7 steps in the *Sabbāsava Sutta* (interpreted conventionally or mundane or "*padaparama*" interpretation):

1. **Cultivate an understanding.** Learn all about the direct and indirect benefits, what is involved, the best way to go about achieving the goal, etc.

2. **Be discipline.** Avoid getting distracted by things that provide “temporary pleasures”, like a drug addict thinking it is OK to “take a small puff” while working to be free of drugs.
 3. **Association are important.** Associate with knowledgeable people who can help and get to know other helpful resources.
 4. **Patience and tolerance.** (Maintain focus and not get “shaken off” by small inconveniences. Perseverance is critical.
 5. **Avoidance are important as associations.** Dissociating with people who have negative attitudes and avoiding unsafe places, practices, etc.
 6. **Removal of hindrances.** Suppress discouraging thoughts by contemplating on the long-term benefits of the project.
 7. **Bhāvanā or “immersing in the project.”** That means constantly thinking about the main objective and the ways to get there.
6. A good idea of the goal is needed first. One should not undertake a journey without learning about the destination and how to get there. It is a good idea to explore how it can be beneficial to oneself and others (family, friends, and even to society) too.
- Once the overview is done and the decision to undertake the project is made, all steps should be used as appropriate. For example, the first and last items on the above list (understanding and meditating) go hand-in-hand.
7. Those steps can be used by anyone to enhance the quality of life in general, a moral life with a “peace-of-mind.” They are the sensible things to do.
- For example, an important decision for anyone should be to live in a good area not prone to crime, floods, etc.
 - Going out at inappropriate times, in inappropriate places, is just ‘asking for trouble.’
 - It is critical to avoid associating with immoral and also those with negative attitudes.
 - If one carefully goes through the list, it will be clear why all those steps make common sense.

If you would like to read about how these habits develop into deep-seated *sansāric* habits or *āsavas*, see, “[Sansāric Habits, Character \(Gathi\) and Cravings \(Āsava\)](#).” Also, “[The Four Bases of Mental Power \(Satara Iddhipada\)](#),” can be helpful in achieving goals.

Next, “[Wrong Views \(Micchā Ditthi\) – A Simpler Analysis](#)”,

6.1.1.4 **Wrong Views (Micchā Ditthi) – A Simpler Analysis**

Revised November 27, 2017; revised May 12, 2020 (#6)

Micchā means wrong or incorrect and *ditthi* means views. Pronunciation:

[WebLink: Listen to the pronunciation of ditthi](#)

Here it is about the wrong views about our world or our existence. It is the most basic reason why people cannot grasp the message of the Buddha, and that is unfortunate. We all are looking at the world through “colored glasses”; each one has his/her own set of beliefs or “*ditthis*,” so we cannot see the real nature.

- Some facts about nature are hard to believe, and it took the efforts of many scientists to change two common wrong views (*ditthis*) that had been with the humans up to recently: that the Earth is flat and it is at the center of the universe.
1. These days, most of us believe that the Earth moves around the Sun. But it is quite clear that it goes against our experience, and the accepted views were the opposites even a few hundred years ago. We do

not have any direct experience of the motion of the Earth, either its rotation around its own axis or in its orbit around the Sun. And we see ample evidence to the contrary, i.e., for the Sun rotating around the Earth, because we experience a sunrise and a sunset everyday!

- If one looks at the speeds involved it becomes even more harder to believe that the Earth is moving: The Earth moves around its axis at a speed of about 1,040.4 miles/hour (1,674.4 kilometer/hour or 465.1 meter/second) at the equator (and zero at the North and South Poles) and it moves along its orbit around the Sun at an average speed of about 67,062 miles/hour (107,300 kilometer/hour). Thus it is surprising that we have no direct perception of such movements.
- Of course, we do not feel it because everything around us is also doing exactly the same thing. When we travel in a car, we “feel the ride” because we can see the scenery passing by (and because the ride may not be smooth; luckily, the Earth is very smooth in its motions). It is the “relative motion” that we perceive. If two cars are moving in parallel with the same speed, passengers in each car see the other car to be stationary.
- However, after Galileo invented the telescope, people made more precision measurements of the planets and the heliocentric model was needed to explain all those new findings.

2. But there are many people who still believe that the Sun goes around the Earth! To quote a passage from the Wikipedia article, [WebLink: WIKI: Geocentric model](#)

- “..Morris Berman quotes survey results that show currently some 20% of the U.S. population believes that the sun goes around the Earth (geocentricism) rather than the Earth goes around the sun (heliocentricism), while a further 9% claimed not to know. Polls conducted by Gallup in the 1990s found that 16% of Germans, 18% of Americans and 19% of Britons hold that the Sun revolves around the Earth. A study conducted in 2005 by Jon D. Miller of Northwestern University, an expert in the public understanding of science and technology, found that about 20%, or one in five, of American adults believe that the Sun orbits the Earth. According to 2011 VTSIOM poll, 32% of Russians believe that the Sun orbits the Earth.”
- And, there are even some who believe that the Earth is flat: [WebLink: WIKI: Modern flat Earth societies](#)

3. Thus sometimes it is very hard to get rid of certain “wrong views” because of our “experiences” and “gut feelings.” Yet, if one hangs onto such wrong views (in the face of contrary evidence) one cannot get a correct world view. This is why we always need to “look at the big picture”; the “bigger the picture”, the better it is. It is hard to see much details while walking on the ground, but one see a whole lot better looking down from a helicopter.

- Luckily, nowadays, we have the advantage of technology to confirm that the Earth is not flat and that it moves around the Sun.

4. Similarly, it is very hard for many people to believe that humans could be reborn as animals. One argument that was given in a book that refuted rebirth was that “.in that case, the human population should not be changing, but we see an increase of the human population over the past centuries.” Apparently, the author did not even consider that a human could be born an animal. Again, it is matter of a very narrow world view. There are innumerable beings in this world and they can be born in not only in the animal and human realms, but 29 other realms that we cannot see!

- When Darwin presented his theory of evolution, it made a huge psychological impact on the society, which was not ready to accept that humans evolved from animals. It is said that Darwin did not publish his now-famous volume, *On the Origin of Species by Means of Natural Selection*, until 1859, more than 20 years after he had first formulated his theory because he knew that it would create an uproar.

5. The theory of evolution is only partially correct according to Buddha Dhamma; we will discuss this in detail in the future. When conditions for a birth in certain realm are satisfied, the nature has come up with many ways to make that birth take place.

- Accepting the fact that human can be BORN in the animal realm is an even more shocking thing to contemplate for many people. But we should not just go by our instincts, because the world is much more complex than we perceive with our limited senses.
- Even though we consider the life of an animal as “useless”, life is the most important thing in the world even for the lowest worm. All living beings have craving to continue the life they have, regardless of how pathetic it appears to us. Our “smelly bodies” are said to be repulsive to the *devas* who have fine bodies that are free of diseases as well.

6. The Buddha said, “..*bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process”. That statement appears to most people as an exaggeration. That quote is from the post, [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#)

- But as described in that post, modern science is slowly proving that indeed the number of living beings, just in the animal realm, is unimaginably large. Comparatively, the human population of about 7 billion is negligibly small.
- There are more living beings in your backyard soil than the entire human population on Earth!

7. Of course we cannot see the beings in the other three lower realms. But, just because they are not amenable to our senses, we cannot say they do not exist.

- Human vision is restricted to an almost infinitesimal sliver of 400 to 700 nanometers in the wavelength spectrum. Our ears can detect only 20 to 20,000 Hertz audio frequencies. Other animals use their own “bands” above and below that. Human beings have one of the poorest senses of smell of all the organisms on Earth., etc; see the book, [“The Meaning of Human Existence”](#) by Edward O. Wilson, who is a leading biologist.
- Another way to think about this is to contemplate on the fact that there are hundreds of TV or radios broadcasts that can be “tapped into” by having a TV or a radio set to the right channel. Just because we cannot “see” those electromagnetic waves with our eyes, we cannot say they are not all around us. There are other living beings all around us with such fine bodies, we just cannot see them.
- We have only begun “see” other hidden parts of “our world” with the aid of science; see, [“Expanding “Consciousness” by Using Technology.”](#)

8. Even though scientific progress has been impressive, it takes generations to move the “knowledge base” forward; see, [“Dhamma and Science – Introduction.”](#)

- On the other hand, by PURIFYING the mind, one can discern EVERYTHING that is of importance **within a lifetime**; see, [“Expanding “Consciousness” by Purifying the Mind,”](#) and the power of the mind in the posts starting with, [“Power of the Human Mind – Introduction.”](#)
- That is how the Buddha knew about not only the existence of innumerable planetary systems in the universe (many other examples are discussed in other posts), but also about the fact that this life of about 100 years is insignificant in the rebirth process.
- And there is compelling evidence for rebirth; see, [“Evidence for Rebirth.”](#)

9. Without the “correct view” of this world, we will be simply “groping in the dark.” When one has only a narrow and blurred vision, one cannot move forward. If one believes that this is the only life we have, then one could be making bad decisions, that could affect one’s future for billions of years to come.

- That is why it is worthwhile at least to examine the evidence of the “wider world view” of the Buddha, where both space and time are infinite. While modern science has confirmed the infinite extent of space, it has not yet “discovered” the fact that life does not end at physical death; it is just the end of one insignificantly small sliver of the time span of a sentient being.

10. Most people think the First Noble Truth is about suffering in the sense of just physical or mental suffering IN THIS LIFE; that is wrong. Those are RESULTS of past actions (*kamma*). **But that suffering is NOT what the First Noble Truth is about**; it is about the FUTURE suffering that CAN BE stopped.

- **The First Noble Truth is about the suffering that is hidden.** It is the unavoidable suffering for anyone in this cycle of rebirths, until one grasps the “correct world view.”
- This is why the Buddha said, “my Dhamma has never been heard before.” It is hard to grasp until one is willing to spend some time and examine the “bigger picture.” One should not just go by one’s instincts, but rather by the facts.

11. **This is also why** “*sammā diṭṭhi*” or “correct view” comes first in both versions of the Eightfold Path. Yes. There are two versions of the path: One is mundane (*lokiya*) and is easier to grasp. The other is transcendental (*lokuttara*) and requires the comprehension of *Tilakkhaṇa* or the Three Characteristics of this world, i.e., *anicca*, *dukkha*, *anatta*.

- **Before trying to comprehend the *Tilakkhaṇa*, it is imperative that one follows the mundane eightfold path and removes all ten types of *micchā diṭṭhi*; they are discussed in “[Mahā Chattārisaka Sutta \(Discourse on the Great Forty\)](#).”**
- When one starts understanding the validity of laws of *kamma* (i.e., deeds have consequences), rebirth must be true, and there are other realms that we cannot see, one begins to embrace the mundane version of *sammā diṭṭhi*.

12. With that *sammā diṭṭhi*, one realizes that it is not fruitful to: think immoral thoughts (*micchā saṅkappa*), utter inappropriate speech (*micchā vācā*), do inappropriate things (*micchā kammanta*), live an immoral life (*micchā ājīva*), to strive to achieve unfruitful things (*micchā vāyāma*), have an immoral mindfulness (*micchā sati*), and thus get into an immoral state (*micchā samādhī*).

- **Even if we can “get away” from paying for misdeeds in this life, we will have to pay with interest in the future lives. Similarly, any good deeds will be rewarded in future lives, if not within this life itself.**
- Thus, with correct views or *Sammā Diṭṭhi*, one will be automatically following the mundane eightfold path: *sammā saṅkappa*, *sammā vācā*, *sammā kammanta*, *sammā ājīva*, *sammā vāyāma*, *sammā sati*, and thus get to *sammā samādhī*. It all starts with *sammā diṭṭhi*, or the “correct views.”

13. It is not a world view that is amenable to our “experience”, because our sense faculties are limited as we discussed above. But as we make progress, our minds will become clear and we WILL be able to see for ourselves the true nature of this world.

- There is a lot of evidence that what the Buddha said about “the wider world” 2500 years ago are indeed true. We are lucky to be born at the time when efforts of many generations of scientists have confirmed many of his world views, and that should give us confidence (*saddhā*) to take those views serious enough to spend some time examining the evidence. My goal is to present evidence from many aspects, because different people comprehend different aspects.

14. Such a critical evaluation itself could be enough to dispel any wrong views. It is like lifting of a fog and being able to see clearly. When the mind becomes pure, one does not need “evidence from science” to confirm the worldview of the Buddha.

- The *lokuttara* version of *Sammā Diṭṭhi* (which requires the comprehension of *Tilakkhaṇa* to some extent) and the corresponding Noble Eightfold Path is discussed in other posts in the “[Seeking Nibbāna](#)” section. Also, see, “[Buddha Dhamma – In a Chart](#)” and the post referred to in that chart: “[What is Unique in Buddha Dhamma?](#).”

Next, “[Four Noble Truths: Recipe for Problem Solving](#)”, ...

6.1.1.5 Four Noble Truths: Recipe for Problem Solving

1. When solving any problem, there are four steps:
 - One needs to know **what the problem is**, or even realize there is a problem.
 - The reason or the **cause for that problem** (some may be superficial causes but there are **root causes**).
 - **Knowing what kind of end result can be expected by solving the problem** (there may be many possible outcomes depending on the approach).
 - **A procedure to systematically solve the problem** based on the superficial or root causes.
2. Let us discuss several examples. If a car would not start, the cause may not be clear to someone who does not have a technical background in automobiles, but a qualified technician will be able to find the cause quickly.
 - He may find that it is a simple problem of some wires becoming loose in the ignition circuit, or it could be as bad as a problem with the engine itself.
 - The solution of the problem will lead to being able to start the car.
 - And the way to get there depends on the actual problem and going through the standard procedures to solve the problem. If the problem is with a loose wire, one could re-connect the loose wires or just replace that circuit box. If it is a failed engine, one could either replace the engine or if it is a minor problem with the engine, just fix that.
3. Sometimes figuring out the cause or **even figuring out that there is a problem**, may not be obvious. If we get a headache, in most cases we would just take an aspirin or Tylenol and that would “fix it.”
 - But if the headache keeps coming back, then we may realize that there could be a more serious **root cause**. Now we need to figure out why we are getting headaches frequently. First, we look at easy solutions. For example, if we can tie up the timing of the headaches to eating some kind of specific food, we can stop eating that and see whether it goes away.
 - If we cannot figure it out, and if the problem persists, then we go to a specialist again, in this case, a physician. The physician will ask a series of questions and may do a series of tests. The goal is to figure out what causes the headaches, the root cause.
 - The end result of solving the problem again is simple: to be free of headaches. But in the case of recurring headaches, taking an aspirin is not a permanent solution.
 - Depending on results, of the diagnostic tests, the physician may find the root cause to be a cancer. Then that cancer needs to be treated, etc. He will prescribe a method of treatment. If that root cause is removed, then we would have removed the recurring headaches.
 - Thus the correct way to solve a problem has four steps. Correctly identifying the problem, find its root causes, determine the outcome if the root causes are removed, and finding the best procedure to handle the root causes.
4. But sometimes, when a problem arises we tend to do the most expedient thing to get it out of the way and just move on. If the headache goes away until one gets through the day, then one may decide to just take an aspirin and handle it day to day like that.
 - Even when the wife (or husband) says, “You have been taking aspirins almost every day for this many days. Why don’t you see a doctor and see whether there is something else going on?”, we may just continue with the “temporary fix” especially if we are busy.
 - If that person was starting to develop a cancer, then postponing the diagnosis of the “root cause” could be a grave mistake. A cancer cell multiplies very rapidly and could spread to other areas of the body.

- Even though one could get temporary relief by taking an aspirin daily (may be with gradually increasing the dose too), that is NOT the solution. **The end result in the short term could be temporary relief, but one is moving into a much more dangerous outcome.**
 - The ideal solution to the problem is not to be free from the headache temporarily, but to free from the cancer!
5. We can solve many problems by ourselves by following the four-step process. We may need a qualified technician to find root causes of car problems or may need the help of a physician to diagnose the root causes for the recurring headaches to be cancer.
6. The Four Noble Truths handle the most critical problem of all: the suffering associated with existence.
- **First, most of us are not even aware that there is a problem.** Some people do not realize that there is a rebirth process and that most of these rebirths are filled with unimaginable suffering. They are not even know aware that there is a problem.
 - This problem of existence can be seen only by the highly-purified mind of a Buddha.
 - And he found the root causes, that permanent happiness (*Nibbāna*) results from removing the root causes, and the procedure to do that.
 - However, one can find temporary solutions but just fixing the superficial causes. Just like fixing the headache by taking an aspirin, one could find temporary happiness in this life by “trouble-shooting” each problem as it arises. One could even find a bit longer-term solution by working towards a better rebirth. But those are temporary solutions.
7. Thus there is an important difference between **superficial causes and root causes**.
- It is interesting to note that root causes give the exact meaning as the Pāli term “*mūlika hetu*”; “*mūla*” is the root of a tree. If a tree is cut down but if the roots remain intact, the tree may not be killed. It may still sprout new limbs and finally grow to a full-fledged tree.
 - However, removing the deep roots of a tree will permanently kill the tree. Similarly, removing root causes will eradicate the problem completely.
8. In complex situations, the root causes of a given problem may not be obvious. **And that means the ideal solution may not be obvious.**
- When that happens, the problem leads to ever-increasing severity, and may not be solvable after some point, as in the above case of ignoring the headaches for a longer time will only lead to the spread of the cancer and after some point, the cancer may not be treatable.
9. In the case of some possible problems that we can foresee, we do not need to wait until they materialize. For example, all parents tell their kids to get a good education and then a good job, so that those kids will not fall into hardships when they grow up. In that case, the solution is to get a good job and the way to get there is to get a good education.
- But getting a good job does not solve all possible problems: a young person getting a job knows that one could come down with a deadly disease or lose the job in an unpredictable situation. Here again, in terms of mundane reality, there are no perfect solutions. One could eat healthy foods, engage in an exercise program, etc and also purchase health insurance and life insurance, etc.
10. We should play out these scenarios in our heads. We can easily see that the four-step process can solve any problem with varying degrees of success.
- In all these situations, our goal is to “maintain things to our satisfaction.” We want our bodies, and the bodies of our spouses and children, to function well and avoid any ailments or discomfort. And we want our physical belongings (houses, cars, clothes, etc) to function well.

- By following the above four-step process we can fulfill our desires to some extent. We can evade certain problems by eating healthy, exercising, etc. We can get a car to last a long time by doing the required maintenance. Still, all these activities require effort with associated suffering. That is not apparent (these are associated with *saṅkhāra dukkha* and *vipariṇāma dukkha*; see, “[Introduction – What is Suffering?](#).”
- This is because all we can do in those cases is to try to address some superficial causes.
- But eventually, we WILL NOT be able to maintain our bodies to our satisfaction. No matter how well we plan, there comes a time when our bodies start to degrade, even if we do not encounter any major issues like cancer or Alzheimer’s disease; this is part of the *dukkha dukkha*; see, “[Introduction -2 – The Three Characteristics of Nature.](#)”
- Yet, if we do not follow the four-step process in those mundane tasks, we will have many more problems. Therefore, the first thing to do is to make sure one analyzes one’s day-to-day activities and make sure to carefully analyze the problems one encounters (or even better to anticipate future problems) and take necessary precautions.

11. However, tackling superficial causes that we can readily see or discern is what we have been doing since the beginning-less time. Life after-life, we just strive to “maintain things to our satisfaction”, and at ALL TIMES fail at least at the end.

- Most times we suffer trying to “**get things going** in the way we want”, and by the time we achieve at least some success, our bodies start falling apart, so that we will not be enjoying what we have gained with so much effort.
- **Think carefully about any famous personality, whom we believe had achieved their life goals.** They all had to leave behind their achievements in many instances with tragic death, and in their new life those things would not mean anything anyway; they have to start all over. The only things that are carried over to the new life are any good/bad habits or deeds they had cultivated, and not any material gains.

12. **The key point that the Buddha was trying to make was that we do not realize that there is a “problem of existence”**, the first-step in the four step process involving our existence. But since we cannot readily see the rebirth process most of us focus on just this life.

- All we have been doing is to “take aspirins” as headaches resurfaced, instead of finding a permanent solution to the “problem of never-ending headaches.”
- In each and every life so far, what we have done has been to “take aspirins” to try to solve problems temporarily as they inevitably come our way.
- This is the First Noble Truth of “*dukkha sacca*” (pronounced “dukkha sachcha.”) That “existence in this world of 31 realms is filled with suffering, and it is a never-ending process. But that can be overcome permanently.”

13. If we understand how this never-ending process gets the required fuel from (or the root cause for rebirths), then by ELIMINATING those causes we can solve the problem of perpetual suffering permanently.

- This cause of suffering is the Second Noble Truth: “*dukkha samudaya* (where “*samudaya*” is “*san*” + “*udaya*” where “*udaya*” means “to arise”) or how rebirth-fuelling “*san*” is the cause for *dukkha*. The Buddha analyzed this cause in detail and found that it is our attachment (*taṇhā*) to “things in this world” due to our ignorance of the fact that “anything in this world cannot be maintained to our satisfaction” or *anicca*. **Thus stated succinctly, the root cause for our suffering is not realizing *anicca*.**
- *Anicca* leads to *dukkha* (suffering), and thus one becomes *anatta* (helpless). Since this *dukkha* can be overcome, it is called *dukkha*, and thus we have the Three Characteristics of “this world of 31 realms”; see, “[Anatta and Dukkha – True Meanings.](#)”
- Not understanding these three characteristics is called *avijjā* or ignorance.

14. Now the third step is to see that the successful solution to this problem is the attainment of *Nibbāna* or stopping of the rebirth process. This is probably the hardest step to latch on to.

- Our minds are not set up to “see” the suffering one is undergoing, but to contemplate on “possible future happiness.” The Buddha likened this to the case of a cow dragging a fully-loaded cart eagerly when its owner is holding a stack of hay on a pole in front of it. The cow has its mind set on reaching the stack of hay and does not even realize the heavy load it is pulling.
- Even the lowest worm wants to live. It does not see the suffering that it goes through. This is where one needs to spend a lot of time trying to comprehend the message of the Buddha.
- It is only when one truly comprehends that “it is fruitless to struggle to find happiness in this world of 31 realms” that one attains the *Sotāpanna* stage. This is when one sees the truth in the Third Noble Truth, the *nirodha sacca*. *Nirodha* means “*nir*” + “*uda*” or to stop the arising.

15. The Buddha said that when one sees one Noble Truth, one sees all four. Thus at the attainment of the *Sotāpanna* stage, the way to *Nibbāna* also becomes clear.

- The process to remove the root causes of *avijjā* and *taṇhā* is the Fourth Noble Truth, the *magga sacca*, or the Truth of the Path, where “*magga*” is a path. And this path is eightfold and it is the Noble Eightfold Path.
- The Path has to be followed systematically. The first step is to the “correct vision” of *Sammā Diṭṭhi* or the vision to eliminate “*san*.” A *Sotāpanna* has achieved this to a significant extent by comprehending *anicca*, *dukkha*, *anatta* to a certain extent.

16. Therefore, the four-step process stated in #1 above is a basic principle that can be used to solve any problem. That means to solve a mundane problem temporarily and to provide a permanent solution to the ultimate problem of existence. That approach is based on the principle of cause and effect that Nature is based on.

17. ***Nibbāna* does not have a cause. Eliminating all causes lead to *Nibbāna*.** There are six root causes that maintain this world for anyone: greed, hate, ignorance, non-greed, non-hate, non-ignorance. All these are removed via *paññā* or wisdom. It is important to realize that wisdom is NOT non-ignorance. Explanation of that requires another essay.

- But for now, it suffices to say that the four lowest realms of this world are “maintained” via the “bad roots” of greed, hate, and ignorance. The rest of the 31 realms are “supported” by non-greed, non-hate, and non-ignorance, the so-called “good roots.” It is critical to realize that ALL roots lead to attachment to “this material world.” But until one develops wisdom to a certain extent by first removing the “bad roots”, it is not possible even to grasp the meaning of *anicca*, *dukkha*, *anatta*.
- This is why the Noble Eightfold Path is two-fold: the mundane (*lokiya*) Noble Eightfold Path is to be followed first to avoid birth in the lowest four realms and to cleanse the mind to a certain extent.
- Then one follows the transcendental (*lokuttara*) Noble Eightfold Path to attain *Nibbāna* by fully cleansing the mind of all six roots; see, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”

Next, “[First Noble Truth – A Simple Explanation of One Aspect](#)”,

6.1.1.6 First Noble Truth – A Simple Explanation of One Aspect

1. One does not need to be a Buddhist or even heard about the Buddha to know what conventional “suffering” is. Anyone knows that getting sick, getting old, and dying is cause for suffering.

- But then the Buddha said, “these four Noble Truths are not known to the world until a Buddha describes them.”
- Thus the Buddha was talking about a kind of suffering that ANYONE in this world is destined to have either now or in the future. He was mainly concerned with the LONG TERM suffering, in the future rebirth, and how to STOP that from taking place.

2. However, there are some sufferings in this very life that arise due to our current way of life, or what we do or think right now. In this post, I want to address such “SHORT TERM” sufferings that also can be AVOIDED.

- A significant part of our suffering comes from the mind. Whether one lives in a grand mansion or in a hut, this part of suffering is common to us all.
- And even some famous and rich people that we know could not bear this mental pain to such an extent that they committed suicide. From Elvis Presley and Marilyn Monroe to Whitney Houston and Robin Williams, there are many well-known cases; see, [WebLink: WIKI: List of suicides](#) for a long list that extends to the past.
- Suicide Prevention, see : [WebLink: HELPGUIDE: Suicide Prevention](#)

3. Obviously, one can have mostly everything that any one of us can only wish for (health, wealth, beauty, fame, etc), but still, suffer. One could get a glimpse of what the Buddha meant by suffering if one could contemplate on this issue, and that revelation itself could lead to the avoidance of *that kind of suffering*.

- We can get rid of a big part of suffering in the near future by controlling hate or displeasure towards other people. Even though the other party may have done something wrong to us, most of the suffering is inflicted by ourselves. This needs some contemplation to clarify.

4. Suppose I come to know that someone said a bad (and untrue) thing about me to others. The moment I hear this my mind gets agitated. And I could be spending the next hour or two or even the next day or two saying to myself and friends, “I cannot believe that so and so said this about me. Why would he do that?”, and may be even be thinking about how to retaliate. All this time spent on such activity was a burden to the mind. I caused more suffering to myself by just dwelling on it, and by generating more hateful thoughts.

- I could have handled the situation better as following: If I know from past experience that he would not have said it without a reason, I need to talk to him and clarify the situation. If that failed or if I knew that he was “just that type of a person” I just need to stay away from him. We cannot control the behavior of other people. The best thing is to stay away from such people.
- Staying away from “bad company” is critical especially for children. It is imperative for the parents to make sure that their children stay away from bad friends.

5. Another thing that is related is not to try to spend too much of your time and energy to convince other people to see “things your way.” For valid or invalid reasons, each person has a set of beliefs and convictions. I have realized that it causes unnecessary mental suffering to myself and others if I try hard to convince the other party of my own views. I have no right to say my views are better than the views of the others; I just explain things the way I see them.

- Even the Buddha did not try to even advice certain people, because they could have caused long-term harm for themselves by generating hateful thoughts of the Buddha.
- One has to realize that getting rid of *ditthi* or wrong views is the first step in getting some “cooling down.” It is true that palpable “cooling down” can be attained by getting rid of the worst wrong views; see, [“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis.”](#)

6. Then there is extreme greed, that could also lead to unnecessary suffering. Here one needs to make a distinction between two extremes: It is really necessary to avoid physical discomfort on one extreme. But trying to “acquire fancy things” for the sake of pride is the other extreme.

- We do need food, clothes, shelter, and medicine to avoid living a miserable life. Therefore, we need to make a decent living to provide such necessities for ourselves and our families.
- However, if we try to acquire, for example, a “bigger and fancy house”, that could cause anxiety and even suffering especially one is stretching one’s resources to achieve that “extra bit of happiness.” That “extra bit of happiness” could become a nightmare in some cases, for example, if one loses employment or encounters an unexpected expense.

7. One does not need to feel bad about the wealth one has acquired legitimately and to use that wealth for one's comfort. One has already paid for that in the past (a good *kamma vipāka*). In the same way, if one is poor, one needs to understand two things per Buddha Dhamma: First, one is in that situation because of a past cause (bad *kamma vipāka*). Second, and more importantly, one can work oneself out of that situation, because *kamma vipāka* are not deterministic; see, "[What is Kamma? – Is Everything Determined by Kamma?](#)."

8. The key is to live within one's means and strive for a better living condition if one actually does not have enough for a comfortable living. There is so much of "peace of mind" in a simple life, even if one has a lot of wealth. Most people ruin their lives by trying to seek sense pleasures using money. That only gets one on a track that leads to seeking more and more such pleasures and eventually running out options.

- The sad thing is that they do not know there is so much "peace of mind" to be had just by living a simple life with less greed and less hate.

9. It is hard to fathom, but it is true that craving for valuable material things makes one's mind temporarily happy at times but perpetually burdened. This statement needs a lot of thought for clarification.

- The perceived happiness comes from the perceived "value" of the item by one's mind, and if that item is lost or damaged that can lead to much more suffering. Here is a hypothetical situation: A mother dies and her two daughters inherit a supposedly highly valued necklace. Each daughter wants it, and they get into arguments and both come to much mental suffering. Eventually, a wise elder suggests to sell the item and share the money. When they try to sell it, they find that it is of low quality and is really worthless. They had each inflicted so much suffering because of a "perceived value" for that necklace.

10. The real happiness is not having anything to worry about. That does not mean one needs to give away everything one has.

- Using things that are available to oneself and having a greedy mindset are two different things.
- One could be living in a mansion with a peace of mind knowing that all his/her wealth is not forever, and another could be living with a burdened mind in a hut with so much attachment to whatever little he/she has or with jealousy/hatred for what others have.
- On the other hand, one could be living in a mansion with a burdened mind and could even commit suicide, while a poor person who has learned Dhamma could be living in a hut with a peace of mind content with what he/she has and knowing that any hardship is just for a short time (in this life).
- The bottom line is that things happen due to causes, and by controlling our minds we have the power to initiate good causes (moral deeds) and to suppress bad causes (immoral deeds). Some will be effective for the short term and all will be effective for the long term.

Also see, "[First Noble Truth is Suffering? Myths about Suffering.](#)"

Next, "[Difference between a Wish and a Determination \(Paramita\)](#)",

6.1.1.7 **Difference between a Wish and a Determination (Parāmitā)**

1. It is easy to just wish for things, but a real determination has a firm commitment attached to it. A determination is a wish accompanied by a plan to make the wish come true.

- One can drop a stone in water and can wish for it to come back up. That is NOT going to happen.
- Some goals (wishes) can be attained in this life: quitting smoking, passing an exam, getting a good job, etc. But still one has to make an effort, i.e., one has to act with determination to achieve the wish.

2. Other goals can take many lifetimes to attain. These are called "*pāramitā*" (pronounced "pāramithā"). Depending on the goal, a *parāmitā* can take many, many lifetimes. It is said that to become a Buddha, one needs to have a firm commitment carried over billions of lives; that is a *parāmitā*. And it is not like that

someone just makes a wish to become a Buddha; that “*gati*” or the ‘tendency’ has to develop first over many lifetimes, initially starting with the habit of helping others and generally living a moral life.

- Buddha Dhamma is all about causes and effects. If one can understand the causes for something to happen, and then work to make such cause to materialize, the effects WILL follow.

3. We can see that there are many people — some even may not have heard about Buddha Dhamma — making great efforts to help others even at the risk of their own lives. Those people have such *sansāric* habits and they do have goals, even if it may not be clear to them at all times. They are just driven by that *sansāric* habit. If they come across pure Dhamma by any chance, they may be able to focus their efforts accordingly.

- To become an *Arahant* one needs to make a commitment and maintain it over many, many lives. We all are likely to have made that commitment in one or more lives; of course, we do not know. And if we had made such a commitment and have worked on it over many lives, it may be possible to fulfill it in this very life. Even otherwise, we can make a real effort to maintain that “*paramita*” and strengthen it.
- Some make firm determinations to become a *deva*, a *Brahma*, an emperor, or just to be rich; there are millions of things that people wish for, and sometimes make firm determinations on. Some of them can come true in this lifetime itself, especially if that is a firm commitment coming from previous lives. Normally the word “*parāmitā*” is reserved for those commitments that target *Nibbāna*.

4. In physics, there is a simple law that says, “every action has a reaction.” In Buddha Dhamma, there is an even more generalized law: when one keeps doing something, an invisible energy buildup occurs that will result in a *kamma bhava* (potential energy) that will bring about a result (even a birth) of a similar kind.

- During a lifetime, the brain will help achieve goals by rewiring neural connections in the brain when someone keeps trying to develop habits; see, “[How Habits are Formed and Broken – A Scientific View.](#)”
- And such habits may be carried over future lives by embedding in one’s *kamma* seeds (*bīja*); see, “[Sansāric Habits, Character \(Gathi\), and Cravings \(Āsava\).](#)”

5. For example, if one keeps drinking heavily, it WILL become a habit; the brain’s neural connections will get wired-up for it. If done long enough, it will get embedded in one’s psyche (i.e., in *kamma* seeds), and one is likely to be matched up with a mother who has similar drinking habits, and then it is likely that habit to continue in that life too. It takes a determined effort to “unwire” those neural connections, more than just a wish.

- If one keeps doing activities that are suitable for a dog, one will increasingly act like a dog with such habits, and if that is kept up, eventually will be born a dog. It does not matter whether that person wished to be rich or powerful, what matters is what one habitually does. In his/her mind, one made that determination indirectly by acting accordingly.

6. In the same way, when one makes a determination to be “good”, and starts helping out others, and start learning and living by Dhamma, one will be heading to “good births” whether one wishes or not. Then they become deeply-ingrained habits that are taken from birth to birth, and become “*paramitas*.”

- Such dominant *paramitas* may manifest as one’s character (“*gathi*”). As I mentioned previously, we can see such visible “*gathi*” in many people, regardless of their official religion or culture.

7. Thus habits cultivate character (“*gathi*”), and persistence of such strong character qualities or “*gathi*” through many rebirths develop into “*paramitas*.”

- Especially in young children such “*gathi*” may manifest and then it will be easier to cultivate them. For example, in the post on “[Evidence for Rebirth](#)” there is a video of a child reciting complex *suttā*; if he was encouraged to follow that path, he could be able to attain a stage of *Nibbāna* in this very life. Similarly, a child with any kind of natural talent can be encouraged to cultivate it easily, because those are *sansāric* habits.

8. Breaking a bad habit takes time too. It is best to cultivate an opposing good habit, or at least a neutral one so that one has the option of doing something when the urge comes. For example, if one wants to quit smoking, one could start chewing gum instead.

- Both in developing a good habit or breaking a bad habit, one is bound to break the trend once in a while. A child learning to walk will fall many times. That is why one needs to have the perseverance to get back up with a renewed determination.

Whether one is making a determination on a mundane goal or to attain a stage of *Nibbāna*, the posts “[The Four Bases of Mental Power](#),” “[The Law Attraction](#),” and “[Habits, Goals, and Character \(Gathi\)](#)” could provide helpful information.

6.1.2.1 Key to Calming the Mind – The Five Hindrances

Revised August 2, 2016; November 25, 2018; September 9, 2019

[WebLink: YOUTUBE: Buddha's Thoughts](#)

A wandering mind is an unhappy mind! The conclusion of an article in the prestigious journal “Science” which, using real-time input from 5000 people all over the world, confirmed what the Buddha said 2500 years ago; see, [WebLink: A wandering mind is an unhappy mind-Science-Killingsworth-2010](#).

1. Let us think about a few practical examples that we all have experienced.

- When a child is crying, the mother uses a variety of “tricks” to soothe the child. If the child has a fever or headache, simply hugging the child and stroking the child’s head makes the child fall asleep.
- If the child is throwing a tantrum just because he is unhappy with something, by giving his favorite toy could calm him down.

2. The easiest way to calm the mind is to focus it on a neutral object. **There is only one thought arising at a time.** So if one can keep the mind focused on something neutral, then those unwanted thoughts cannot come back. Several techniques are available. Let us discuss a few below.

- Especially when one gets angry, just by stopping and counting to ten at least slows down the *javana* (or the impulse) from running wildly. Do not let unwanted thoughts take over. They multiply very quickly, and then things get out-of-control; for a more in-depth discussion, see, “[Javana of a Citta – Root of Mental Power](#).”
- Taking a few deep breaths helps too. Or, in an angry situation, visualizing a Buddha statue and thinking about its serenity helps also.

3. A popular meditation technique to calm the mind is the “breath meditation.” Go to a quiet place (less bright and less noisy place), sit in a chair comfortably, and concentrate on the in-and-out breath. Most people can feel the breath at the tip of nose or on the lips. If not, one can be aware of the falling of the chest or abdomen. Just fix the mind on any of these and do not let it move to some other thought. Initially, it may be hard, but with practice, it becomes easy. That is called *Samatha* meditation, and some people can even get to meditative *jhānic* states with a lot of practice.

- However, just like with the child’s examples mentioned above, these are just “tricks” to get a temporary solution. Just like the child is bound to throw a tantrum again, any relief from “breath meditation” is only fleeting.

3. Even *Samatha* meditation becomes easier if one lives a moral life. One must at least obey the conventional five precepts of not killing other beings, stealing, lying, engaging in sexual misconduct, or using excessive amounts of alcohol. If one can further abstain from harsh speech slandering, and vain talk, that makes it even better; see, “[Ten Immoral Actions – Dasa Akusala](#),” and “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

- **One must be aware of those precepts 24 hours a day. They are not rituals to be obeyed. One follows them to purify one’s mind. Don’t worry if a precept gets broken once-in-a while. Such occurrences will become less and less with time.**

4. The reason that the mind becomes agitated easily is because of the “gunk” that we have in our minds (they are called *kilesa* or *keles* or mental impurities). All these “gunk” is there due to greed, hate, and ignorance.

- If a mind is free from greed, hate, and ignorance (that is easily said than done), then the mind will be very calm, and nothing in the outside world can perturb that mind; see “[2. The Basics in Meditation](#)” and “[3. The Second Level - Key to Purify the Mind](#)” for details.

5. In a simile, the Buddha compared a calm mind to a clear, calm lake that made the surroundings serene. That lake could become undesirable, an eyesore, if one or more of the following happens. (i) A dark-colored dye is in water, (ii) The lake has boiling water, (iii) Water is covered with moss, (iv) Lake is perturbed by wind, (v) Water is turbid and muddy.

6. Similarly, a peaceful mind will become polluted due to five hindrances (*pañca nīvarana*). They are called “*nīvarana*” because they cover the mind from seeing the right from wrong.

- One cannot see the bottom of a lake if any of the above five factors are present. In the same way, “see things clearly” if those hindrances are there.
- They are *kāmacchanda*, *vyāpāda*, *tina middha*, *uddhacca kukkuccha*, and *vicikiccā*.

7. Extreme sense desire (*kāmacchanda*) is like a dark dye. *Kāmacchanda* (“*kāma*” + “*ichcha*” + “*andha*” means blinded by sense desires).

- Here “*kāma*” means the five sense faculties that belong to the *kāma loka*: eye, ear, nose, tongue, and the body; “*ichcha*” is desire, and “*andha*” is for blind.
- The attraction for something becomes so strong that one’s complete attention is on that object. The mind can lose any control over what is sensible and what is not rational (or immoral).

8. Extreme hate (*vayāpāda* or *vyāpāda*) is like boiling water. We all have seen people who are so enraged that they are out-of-control.

- One could become “animal-like,” and actually one who develops such character (“*gati*”) could end up in the hells (*apāyā*).
- *Vayapada* (“*vayā*”+“*pāda*”) means traveling downward (in the 31 realms): “*vaya*” is destruction and “*pāda*” means “(walking) towards.”

9. *Thina middha* (“frozen mind”) is like moss covering the water. Sleepiness is just a symptom of it. It is a dull mind that has not been exposed to Dhamma.

- When one learns Dhamma, one's mind gets energized. Those meditators who fall asleep during meditation can get rid of that problem by learning pure Dhamma.

10. *Uddacca-kukkucca* (customarily translated as restlessness and brooding), arise because of high-mindedness (*uddhacca*) and low-mindedness (*kukkucca*); in most cases, because of the high-mindedness, one tends to DO lowly things.

- When one has *uddhacca*, one is “drunk” with power, money, etc. When one has *kukkucca*, one is willing to do “lowly things” suitable even for an animal. These are TWO mental factors (*cetasika*).
- Both these characteristics lead to a scattered mind that is incapable of seeing right from wrong; **as a *nīvarana*, they arise together.** After the *Sotāpanna* stage, only *uddhacca* remains as a *cetasika*. It goes away only at the *Arahant* stage.

11. *Vicikicchā* is the tendency to do stupid things because of the ignorance of the true nature of this world. It comes from “*vi*” is twisted, “*ca*” (pronounced “cha”) is thoughts, and “*kiccā*” is an action done with “*iccā*” or cravings.

- For example, the tendency to do immoral actions to get one wants comes from *vicikicchā*. One does not know, or does not care, about the bad consequences of such activities. Thus *vicikicchā* is compared to muddy water. [*kicca* : [nt.] duty; work; service; that which should be done.]
- One must get rid of both the ten types of *micchā diṭṭhi* and comprehend *Tilakkhaṇa* to some extent. That means having a good idea about the real nature of this world. That helps REMOVE the *vicikiccā nīvarana*. But suppressing that is enough to attain *jhānā*.

12. In another simile, the Buddha compared the five hindrances (*pañca nīvarana*) to the darkness that keeps one from seeing the true nature. For example, one who is extremely angry is not aware of the damage done to the other person and for oneself. At least at that moment, hate and anger blind that person.

- A mind “blinded” by the five hindrances can keep on adding “more bad stuff” even without realizing it. If you take a glass of muddy water and add more mud to it, you cannot see much difference. On the other hand, if you take a glass of clean water, you can see the presence of even a bit of dirt.
- Thus when the mind is free of the five hindrances, one can easily see if any evil thoughts come to the mind. Then it is easy to contemplate the possible adverse consequences of such ideas and to remove them. That will keep the mind from becoming perturbed. A mind free of the five hindrances is calm and peaceful.
- **That is why one should listen to discourses or read Dhamma posts preferably at a time when the mind is calm.** Then one can absorb more.

13. **It is important to practice *Samatha* meditation for a short times. That allow one to have a peaceful state of mind during that time. But it does not remove any defilements (ie., the underlying root causes).** *Ariya* meditation leads to the gradual removal of evils; see, “[Bhāvanā \(Meditation\)](#).”

- The reason for these hindrances to be present is the bad habits (“*gati*”) we have developed over many lives. They have become deep-seated cravings (“*āsavas*”) which remain with us as mental impurities (*kilesa*). When one starts on *Ariya* meditation, such bad habits, desires, and mental impurities will decrease. In the simile we talked about in the beginning, the water in that lake will become pure by removing the dye, boiling water, moss, wind, and the mud. In the same way, the lake becomes calm and serene again in the absence of those ROOT CAUSES.
- The hindrances of *thina middha* and *vicikicchā* go away at the *Sotāpanna* stage. Those of *kāmachanda*, *vyāpāda*, and *uddhacca-kukkucca* reduce to *kāma rāga*, *paṭigha*, and *uddhacca*. At this stage, the remaining three are no longer *nīvarana*. *Kāma rāga* and *paṭigha* are lessened at the *Sakadāgāmī* stage and disappear at the *Anāgāmī* stage. *Uddacca* goes away only at the *Arahant* stage.

- Progressive lessening of five hindrances can bring the mind to a stable, peaceful state over time. That happens even before the *Sotāpanna* stage. Then one could feel the increase of the *nirāmisa sukha* that it brings; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

Next, “[Solution to a Wandering Mind – Abandon Everything?](#)”,

6.1.2.2 Solution to a Wandering Mind – Abandon Everything?

Our minds become agitated when we see, hear, smell, taste, touch, or just think about something that we really like or really dislike. Those are called thought objects (*ārammaṇa* in Pāli or *aramuna* in Sinhala). If the thought object is to our liking, our mind starts the “wheeling process” on how to own it or at least to enjoy it for a while; if the thought object is something we dislike, the same “wheeling process” takes off on trying to figure out how to get rid of it; see, “[Nibbāna – Is It Difficult to Understand?](#).”

Living in a busy society, we are bombarded with multiple thought objects continuously. Of course, it can be reduced by going to a quiet place, where there are fewer EXTERNAL objects that could give rise to multiple thoughts; many people do that to find a “bit of peace.” Better yet, we can go to a meditation retreat where we focus the mind on the breath for example, and get a wonderful calmness.

But the problem is that peacefulness, the calmness of the mind goes away when we get back to the “normal life” with normal distractions (multiple thought objects). Is it possible to have a “peace of mind” without going to seclusion?

To understand what actually happens in our minds, let us think about the following case:

1. If you go to a stream, disturb the sediment at the bottom until the water gets dirty, you can fill a glass with that dirty water. It looks brown when stirred well.
2. Now if you set the glass on a table and let it sit there undisturbed, in a little while the dirt will drop to the bottom and the water will become clear.
3. If you stir it again with a stick, the water will be brown again; this is analogous to a thought object that is of great interest to us. **BUT if you try to stir it with a thread**, it will not get stirred; the thread is too weak to stir it. Similarly, we are not disturbed by a thought object that is of no interest to us.
4. If you now take a fine strainer, remove the dirt from that water, and put it back in the same glass, it will now be clear. **Now, if you stir it as much as you want even with a stick**, the water will never become brown.
5. We all have “sediments” (or deep-seated cravings or “*āsavas*”) in our minds that have been brewing/accumulating due to *sansāric* habits (“*gathi*”); see, “[Habits and Goals](#).” Each one has a set of different “sediments” or different habits, i.e., one tends to like certain things AND also dislikes certain other things.
6. So, what happens is when we see something that we like OR dislike, our “sediments” get disturbed. How much it gets disturbed depends on how strongly we like OR dislike it.
 - A strong disturbance may be the sight of a person you really like OR really dislike. But if it is something that does not interest you, it will be like stirring with a thread.
7. During the day, we have innumerable “inputs” coming in through the six senses; these stir up the sediments (“*āsavas*”) inside us and bring out the five hindrances.
 - Our minds are constantly agitated, but we may not even realize it because this is the “baseline state” that we have been used to. But we can at least suppress these five hindrances and make the mind calm; see, “[Key to Calming the Mind – The Five Hindrances](#).”

8. What you are doing in *Samatha* meditation (focusing the mind on the breath) is to let those sediments settle down. You feel peaceful. This is why you don't get the same results consistently. Some days your mind may be especially perturbed by something.
9. This is why people feel great at the end of a long meditation retreat. All the sediments are well-settled.
- But after coming back and getting back to regular routine, all external disturbances are back and the quality of that experience slowly wears out. It may be not completely if one keeps practicing at home.
10. However, an Arahant has removed all the sediments. Even if an Arahant is exposed to any type of sensual/hateful situation, his/her mind will not be disturbed:
- A male Arahant will not be seduced by the most beautiful woman in the world; he will not have any hateful feelings towards a person who just cut off his arm.
 - So, an Arahant is like a pure glass of water that does not have any sediments at the bottom.
11. We don't have to become Arahants to improve the quality of our lives. What we can do is to try to get rid of some of the bad habits that are not good in the long term anyway:
- For example, if we really dislike someone, we can start cultivating *Metta* (loving-kindness) for that person in our mind first. Whenever angry thoughts about the person come to the mind, try to counter that; think about something wonderful or peaceful instead.
 - If we have a craving for alcohol, tasty but unhealthy food, etc, think about the possible bad results, and again try to steer the mind to something else, some other activity.

Of course, this needs to be done gradually. People who make New Year's resolutions sometimes abandon them because they try to just "give up" something in one big step. The mind does not like that; **it likes to change only when it actually experiences the benefits of changing the habit.**

12. Finally, **living a simple, moral life (following the five precepts), goes a long way to reduce such bad habits**, and to have a peaceful mind in the midst of all "possible distractions."
- Simple yet powerful guidelines to achieve a peaceful state of mind are discussed in a step-by-step process in "[Living Dhamma](#)."

Thus it is all about cleaning up one's defilements (bad habits) INSIDE, i.e., in one's mind; see, "[1. Introduction to Buddhist Meditation](#)." Once that is done for all defilements, no outside influence can affect one's composure (see #10 above). One CAN even attain that ultimate stage while staying in the real world.

Next, "[Right Speech – How to Avoid Accumulating Kamma](#)".

6.1.2.3 Right Speech – How to Avoid Accumulating Kamma

Revised May 27, 2018; January 2, 2020

1. The fourth precept of the five precepts for a moral life is right speech. Most people literally take it to mean "not lying."
- But since we know that intention (*cetanā*) is at the root of deciding whether an action is right or wrong, we always need to be careful about what we intend to achieve by what we say.
 - The correct meaning of "lying" is not to utter speech with "bad intentions" to hurt others or to deceive others.
2. If one does a wrong deed, one may be able to deny it in a statement worded in such way as to conform to legality.

- Yet it is registered as false speech in one’s own mind, and thus one is not able to escape the *kammic* consequences.
3. Ven. Ayya Khema, in her book, “Visible Here and Now” (p. 53), has nicely summarized what right speech is NOT:
- If you know something that is not helpful and is untrue, then do not say it
 - If you know something that might be helpful, but is untrue, do not say it
 - If you know something that is not helpful and is true, do not speak about it
 - If you know something that is helpful and is true, then find the right time to say it
4. If you carefully examine the above four statements, they say to prevent from lying, gossiping, and hate or vain speech; these are the four ways one can accumulate immoral *kamma* with speech (see, “[Ten Immoral Actions – Dasa Akusala](#)”).
- Let us look at some of the examples from the *Tiṭṭaka* on how the Buddha himself handled some situations.
5. When the Buddha was at the Jetavanārāmaya for many years, there lived a butcher Cunda “pig killer” right next door. When some *bhikkhus* suggested to the Buddha that he should preach the Dhamma to Cunda, and get him to understand the consequences of his actions.
- But the Buddha explained that if he were to go there and try to do that, Cunda would only generate hateful thoughts (*paṭigha*) Cunda’s mind about the Buddha. Thus Cunda will commit an even worse *kamma*.
 - So, we need to be tactful about our speech.
6. On the other hand, the Buddha walked a long distance to get to Aṅgulimāla just before he was to kill his own mother.
- Aṅgulimāla had killed almost thousand people, but that was on the prompting of his teacher, who was trying to get Aṅgulimāla into trouble. That morning, the Buddha saw what was about to happen and knew that he would be able to convince Aṅgulimāla of the bad consequences of his actions. Aṅgulimāla became an Arahant in a few weeks. See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”
7. In the case of the wanderer Vacchagotta asking the Buddha about whether there is a “self” or “no-self”, the Buddha just remained silent.
- After Vacchagotta left, Buddha’s personal attendant, Ven. Ānanda asked him why Buddha did not explain the concept that it is not correct to say “there is no soul” or “there is a soul” (because there is only an ever-changing life-stream) to Vacchagotta. The Buddha told Ānanda that he did not think Vacchagotta was mentally capable at that time to understand the concept, and that he did not want to confuse him. See the post, “[What Reincarnates? – Concept of a Lifestream](#)” for the correct explanation.
8. The Buddha was endowed with that capability to see other people’s mental status. We do not have that capability. So, we need to use our own judgment.
9. Lying to another human being (with “bad intentions”) may have even worse consequences (depending on the particular case) than killing a being of a lower realm. In some cases, lying may lead to physical harm or even death for others.
- The *kammic* effects of such offenses depends on the status of the being in question and the consequences of the particular action. For example, killing an *Arahant* or one’s own parents is a much worse crime than killing a normal human, and killing any human is much worse than killing any animal; see, “[How to Evaluate Weights of Different Kammās](#).”

10. During the Nazi terror in Germany, many Germans “lied” to the Nazis that they were not hiding Jews in their houses; of course the intention was to save human lives, and thus it was the right thing to do. They acquired good *kamma* for protecting lives.

- We need to realize that “lying” — as meant in as “*musāvāda*” in the five precepts — really means the “intention” involved: “*Musā*” means “wrong or incompatible with morals” and “*vāda*” means “speech”; see, “[What is Intention in Kamma?](#).”
- Therefore, even though they were literally lying, their intention was not a “*musāvāda*,” but actually a “good deed.”

Next, “[Learning Buddha Dhamma Leads to Nirāmisā Sukha](#)”,

6.1.2.4 Three Kinds of Happiness – What is Nirāmisā Sukha?

Revised October 29, 2019

Introduction

1. There are three kinds of happiness:

- Sense pleasures (*āmisā sukha*)
- Mundane meditative (*jhānic*) pleasures
- *Nibbānic (nirāmisā) sukha*

What is *Āmisā*?

2. *Āmisā* means material; “*āmisā dāna*” is offering of material things. Thus *āmisā sukha* is the pleasures that arise from material things. We are familiar with sensory delights. Indulging in sensory pleasures is all we know to be providing happiness. We want to see beautiful pictures or people; hear soothing music; taste good food, etc.

- The drawback of sensory pleasures is that the experience lasts only during that particular sensory event. As soon as we finish eating, for example, the satisfaction goes away. Also, even if we wanted to, cannot keep eating either. We will get sick of it soon enough no matter how good the food is.
- The same is true for any other sensory pleasure. One cannot keep listening to music or watch movies for too long at a stretch.
- However, the craving for any sense pleasure comes back after a while. It is never permanently satisfying.

Jhānic Pleasures

3. People who have been doing *Samatha* meditation (for example, breath or *kasina*) know that it gives a pleasure that is different from any sensory pleasure.

- One could meditate for hours (especially if one gets into a *jhānic* state) and can enjoy it as long as one wants. Furthermore, even after the session, the calming effect is there for a while. It gives a sense of peacefulness that can last for hours.
- If one dies while in a *jhānic* state, then one will be born in the corresponding *Brahma* world (either in the *rūpa loka* or in the *arūpa loka* depending on the *jhānic* state). However, a birth in one of the lowest four realms is not ruled out in the future.
- The ability to get into *jhānic* states could be lost even in this lifetime if one commits an evil *kamma*, or start indulging heavily in sense pleasures.

- *Jhānic* states are attained via TEMPORARY blocking of the evils of greed and hate from the mind by focusing the mind on a neutral object such as breath, rising and falling of stomach, or a *kasina* object, for example.

Nirāmisa Sukha

4. The *nirāmisa sukha* is more permanent even compared to *jhānic* pleasures. That is especially true if one has attained at least the first stage of *Nibbāna*, the *Sotāpanna* stage.

- *Nirāmisa* is the opposite of *āmisa* that we mentioned earlier. Thus *nirāmisa sukha* does not arise due to material things. *Nirāmisa sukha* is purely mental and arises due to dissociation from the stressful material world. It is a relief sensation rather than an enjoyment. Imagine the feeling when a pulsating headache goes away. It is a sense of calm and peacefulness.
- In other words, *nirāmisa sukha* is present in the absence of worldly stresses.
- The *nirāmisa sukha* of a *Sotāpanna* (or above) is permanent. One can get into an *Ariya jhānā* at any time. The *Sotāpanna* status is never lost even through future lives.

Permanent Happiness

5. Upon attaining *Nibbāna* (i.e., Arahant hood), there is nothing else to do. An *Arahant* who has developed higher *jhānā* can even experience the full *Nibbānic* pleasure (*saññā vedayita nirodha sammāpatti*) at will (up to seven days at a time.) The death of Arahant results in permanent *Nibbāna*.

- The four *Nibbānic* states result via PERMANENT removal of greed, hate, and ignorance in four stages. That involves insight (*vipassanā*) meditation, most importantly, on the three characteristics of existence: *anicca, dukkha, anatta*.
- Even before the *Sotāpanna* stage, one can start feeling the *nirāmisa sukha* by systematically removing greed, hate, and ignorance; see, "[How to Taste Nibbāna.](#)"

More information on *nirāmisa sukha* at "[Nirāmisa Sukha.](#)"

6.1.2.5 Learning Buddha Dhamma Leads to Nirāmisa Sukha

Revised April 26, 2020

1. It is good to hear from those who have been able to “get to a peaceful state of mind” by reading posts at this site. This is nothing but early stages of *Nibbāna* or “*niveema*” or “cooling down”, and is also called the “*nirāmisa sukha*.” That is a characteristic of “pure Dhamma” and I cannot take any credit for it. This post explains how it happens.

- In other posts, I have discussed why “formal meditation” is not required to attain the *Sotāpanna* stage; see, for example, “[What is the only Akusala Removed by a Sotāpanna?](#).” Here would like to discuss how this “*nirāmisa sukha*” arises when one reads (or listens) to the true Dhamma, and how that can take one all the way to the *Sotāpanna* stage.
- Before that, I need to point out that the “Search” box on the top right can be very useful in navigating the site when one is looking for specific information. Avoid writing sentences or even phrases, but just enter keywords. One could narrow down the number of posts that come up by adding more relevant keywords.
- By the way, the “Search” box on the top right is very good for finding relevant posts on keywords.
- If you have questions or comments, it is best to make a comment at the discussion forum: “[Forums.](#)”

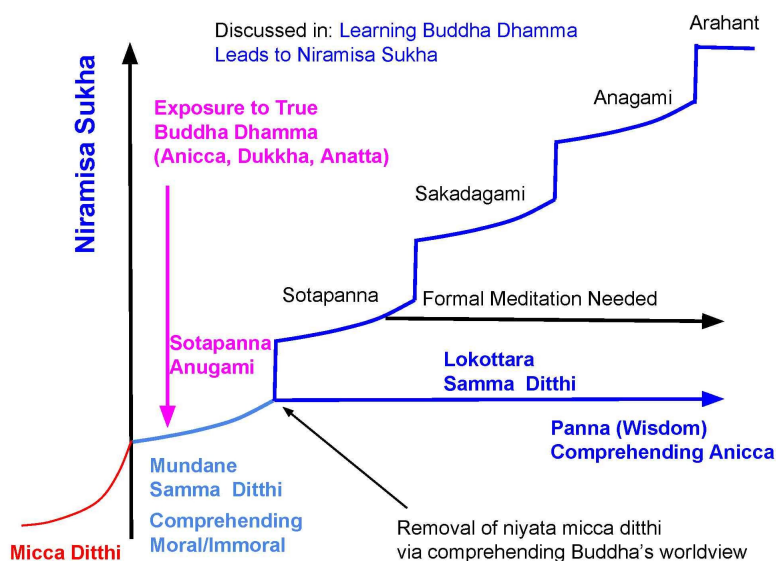

2. Our minds are under stress constantly due to its tendency to know everything that is going on not only at the physical vicinity, but also things that happened in the past or one's hopes for the future.

- That tendency intensifies when we have excessively greedy or hateful thoughts; these two are called *kamachanda* (strong greed) and *vyāpāda* (strong hate), the two key elements of the five hindrances that “cover our minds.” The other three hindrances are basically due to those and also due to our ignorance of how nature operates.
- Think about how “you were on fire” when you got either excessively angry or excessively greedy or lustful.
- When one reads (or listens) attentively to anything of interest, all those hindrances are REDUCED. However, depending on what type of material it is, this suppression may not be very effective. For example, if one is reading a scientific or geography paper, they may be reduced, but if one reading a pornographic novel or listening to rap music, they may actually increase.
- If one is reading Dhamma that is not true Dhamma (or for that matter, any type of religious material), it will still reduce those five hindrances because that material will not induce any greedy or hateful thoughts.

3. However, there is a big difference in reading (or listening to) true Buddha Dhamma. This is, of course, something one can verify for oneself (as many have).

- Listening or reading true Dhamma elevates the “*preethi*” (or “*pūti*”) *cetasika* making one joyful, which in turn makes the body “light”, causes physical calmness, and lead to *samādhi*: “*pūti manassa kayo passadati, passadi kayo sukhantiyati, sukhino samadhiyati.*”
- We will discuss this at a deeper level, in *Abhidhamma*, where we will discuss how various “mind made *rūpa*” like *lahutā* (lightness), *Mudutā* (Elasticity), and *Kammaññatā* (weirdness) can make one's body “light” or “heavy” depending on the mental status; see, “[Rūpa \(Material Form\) – Table.](#)” For example, they are related to the *cetasika* like *kāyapassaddhi* (tranquility of mental body); *cittapassaddhi* (tranquility of consciousness); see, #6 of “[Cetasika \(Mental Factors\).](#)”
- And this *samādhi* is attained via the suppression of ALL FIVE hindrances; **it is commonly called “*Samatha.*”** One does not need to do a special “*Samatha Bhāvanā*” (like the breath meditation) to calm the mind. If one pays enough attention and gets absorbed in the subject matter while listening to a *desanā* or reading Dhamma, one could even attain the *Sotāpanna* stage.

4. This is the *samādhi* (or feeling of well-being) one feels when reading (or listening) to true Dhamma. It is also called the early stages of “*nirāmisā sukha*”; see the chart, “[Nirāmisā Sukha – In a Chart.](#)” It can be printed for reference while reading this post.

- “*Nirāmisā sukha*,” by definition, can be experienced only after one hears the true message of the Buddha: *anicca*, *dukkha*, *anatta*, even though some sense of calm can also be experienced when focusing on any religious activity in general where the difference between what is moral and what is immoral is taught.
 - True *nirāmisā sukha* can be experienced only when one starts seeing a glimpse of the “true nature of this world” and becomes a “*Sotāpanna Anugami*,” i.e., one on the way to become a *Sotāpanna*. This means one is exposed to the true meaning of existence in this world of 31 realms: *anicca*, *dukkha*, *anatta*. **Now, one has the POTENTIAL to become a *Sotāpanna*.**
 - When one strives and comprehends the key message of the Buddha that seeking lasting happiness cannot be realized by staying in this beginningless rebirth process, one attains the *Sotāpanna* stage. Then one can “see” the path to *Nibbāna* and proceed on one’s own. One has removed an “Earth-equivalent of defilements” through *Sammā Diṭṭhi*; this is called “*dassanena pahathabba*,” i.e., “removing defilements via true vision or wisdom”; see, “[What is the Only Akusala Removed by a Sotāpanna?](#).”
 - Higher stages of *Nibbāna* normally need formal meditation techniques. The most comprehensive is given in the *Mahā Satipaṭṭhāna Sutta*. However, the early parts of the *Mahā Satipaṭṭhāna Sutta*, especially the *Kayanupassana* section, is geared towards help attaining the *Sotāpanna* stage.
5. The key difference between a person following the mundane Eightfold Path and the Noble Eightfold Path is the following: **One on the mundane path avoids immoral activities because one is afraid of their consequences. However, a *Sotāpanna* avoids *dasa akusala* because he/she has seen the FRUITLESSNESS of such immoral activities.**
- For example, “What is the point of lying to make money, if that cannot provide one with lasting happiness?” That can be applied to any of the 7 immoral activities done by speech and the body. And that is due to the cleansing of the mind and reduction of the 3 *akusala* done by the mind, where the one of them (*niyata micchā diṭṭhi*) has now been permanently REMOVED; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
 - **Thus the moral behavior (“*sīla*” or “*seela*”) of a *Sotāpanna* comes from within, and it is called the “*Ariyakānta Seela*.”** It is unshakeable and remains in future lives.
 - Just like someone who has really learned algebra instinctively knows how to solve a previously-unsolved algebra problem, a *Sotāpanna* instinctively avoids doing *dasa akusala* of “*apāyagāmī* strength”, i.e., those actions that lead to birth in the *apāyā*. (On the other hand, a person who has only memorized how to solve a few algebra problems can only solve those; he/she is likely to make mistakes in dealing with previously un-encountered problems).
 - Once one sees a glimpse of *Sammā Diṭṭhi*, one can cultivate it further; also the other seven components of the Noble Eightfold Path (*Sammā Saṅkappa*, *Sammā Vaca*, etc) automatically follow.
6. During the time of the Buddha, many people attained the *Sotāpanna* stage during the first discourse they listened to. Attaining higher stages of *Nibbāna* could take more formal meditation by cultivating the basics that one has just grasped.
- Visaka attained the *Sotāpanna* stage at 7 years of age, and could not attain any higher stages until death. King Bimbisara also died as a *Sotāpanna*. Yet they are guaranteed to attain full *Nibbāna* within 7 *bhava*.
 - Upatissa and Kolita attained the *Sotāpanna* stage while listening to a single verse; it took them a few days to attain the *Arahant* stage. They, of course, became the two chief disciples of the Buddha, Ven. Sariputta and Ven. Moggallana.
 - Thus, formal meditation is normally needed to attain the higher stages of *Nibbāna* above the *Sotāpanna* stage. Of course, there are exceptions, like Bahiya Daruchiriya, who attained the *Arahantship* straightaway while listening to a verse uttered by the Buddha.

7. Whenever one become restless (the *uddhacca kukkuccha* hindrance becoming strong) and get the urge to “go watch a movie” or “stop by a friend’s house”, one could try reading (listening to) Dhamma. Similarly, if one gets bored and lethargic (*thina middha* hindrance becoming strong), try the same; ditto for when one is struggling to figure out “how to proceed on a key decision” due to the *vicikicchā* hindrance.

- The “*preethi*” or joyfulness that arises with *samādhi* WILL keep all those hindrances down, especially the *thina middha*. This is the real test of one’s ability to get to *samādhi*. If the state of *samādhi* is at a significant level, one should be able to follow the procedure in #7 above and “not fall asleep” even right after a good meal when one usually gets sleepy.

8. Even though learning Dhamma, in general, will lead to the above-discussed effects, comprehending *anicca*, *dukkha*, *anatta* WILL make a big difference. However, that may take more reading and comprehension of the wider world view of the Buddha: how *kamma* operates, 31 realms of existence, the rebirth process, *paṭicca samuppāda*, etc.

- It is not possible even to suggest which order of topics to choose, because each person is different. And it is imperative that one should not rush through them. **Gradual, steady progress is better than getting the hopes high and feeling depressed if things do not proceed fast enough.**
- What I would suggest, in general, is to first focus on the concepts that one starts understanding easily and slowly expand the “knowledge base” by reading on other relevant links.
- Also, it is a good idea to go back and read some key posts that one has not read for a while. One may grasp more content from the same post when reading at a later time because what is learned in the meantime could expose deeper meanings. I know this by experience. This is the uniqueness of Buddha Dhamma; the learning never ends, rather it just intensifies with added evidence.
- It will stop being a “chore” and will become joyful as one learns more and more. The more one learns the more energized one will become.

9. Even though it may not seem to be a “big deal”, understanding *anicca* (or cultivating the *anicca saññā*) will make a huge change in one’s progress, after one gains some understanding of the basic concepts like rebirth and *kamma*.

- I had struggled intensely for 3-4 years and made an enormous advance in listening to one discourse on *anicca*, *dukkha*, *anatta*. But of course, I had learned a lot of background material by that time and had given a lot of thought to various concepts.
- Still, by knowing what things are really important could make things easier for someone just starting out, or has been “on the wrong path.”
- My hope is that many will be able to attain at least the first stage of *Nibbāna* much more quickly than I did.

6.1.2.6 Need to Experience Suffering in Order to Understand it?

Revised August 18, 2016; Revised February 4, 2017; April 26, 2020

1. It is a common misconception that one needs to experience **harsh suffering** in order to understand what the Buddha meant by the First Noble Truth, that there is “suffering in this world.”

- Thus, especially in the days of the Buddha, some people deliberately lived a miserable life, thinking that it will help understand suffering. They subjected their bodies to various forms of discomfort and even torture.
- This is actually one extreme that the Buddha said NOT to follow: “*atta kilamathānu yoga*,” or subjecting oneself to unnecessary suffering. Closest English translations would be “an ascetic life”, where one forcefully abstains from any comforts.

2. The Buddha never encouraged anyone to deliberately undergo suffering. The suffering that the Buddha talked about is hidden and is about future suffering in this life and in future lives. There are two kinds of “hidden suffering” that the Buddha revealed to the world:

- One is the very harsh suffering in the rebirth process (when one is born in the lowest four realms or the *apāyā*).
- The other is the “incessant distress” that we all undergo even without realizing it: “[The Incessant Distress \(“Pilana”\) – Key to Dukkha Sacca.](#)”
- **Anyone, rich or poor, undergoes this latter type of suffering in this life.** The Buddha pointed out that one could discover this type of hidden suffering and remove it too: “[Starting on the Path Even without Belief in Rebirth](#)” and other posts in the “[Living Dhamma](#)” section.

3. If one needs to suffer more to attain *Nibbāna*, then those who are in the *apāyā* would be the first attain *Nibbāna*! Most of the suffering is experienced when one is born in the *apāyā* or the lower four realms, see, “[The Grand Unified Theory of Dhamma.](#)”

- In order to actually realize the true suffering, whether in this life or in the lower four realms, **one needs to contemplate (*bhāvanā*) with a healthy body and a clear mind.**
- If one is hungry, one CANNOT understand the causes of suffering; rather one will be generating hateful thoughts. The same is true for all four necessities of life: food, shelter, clothing, and medicine. We NEED those things to survive.
- What we should NOT do is to over-indulge in any of the above four necessities of life. That is the other extreme that the Buddha said to avoid: “*kāma sukallikānu yoga,*” or to over-indulge in sense pleasures, i.e., to live a hedonistic life.

4. It is commonly said that the Buddha advocated the “middle ground”, i.e., to avoid both an ascetic life (with self-induced suffering) or a hedonistic (over-indulgent) life. That is true, but there is more to it.

There is a deeper meaning to “*majjima paṭipadā.*” The way to a peaceful existence (or to *Nibbāna*) is to get rid of greed, hate, AND ignorance. The two extremes that we talked about above do involve hate or at least *paṭigha* or “friction” (when subjecting oneself to suffering) and greed (indulging in excessive sense pleasures).

- Just because one stays away from those two extremes does not necessarily mean one is on the “correct path.” The Path is not just a “middle ground” between those two extremes.
- **The key is to learn Dhamma and to systematically reduce greed, hate, and ignorance.**
- Of course, living a life away from the two extremes is conducive — even necessary — to learn Dhamma and to gradually remove defilements from the mind.

5. In between those two extremes, one needs to avoid being influenced by an “intoxicated mind.” In between the above two extremes, people also act in improper ways intoxicated by power, beauty, position, (book) knowledge, lineage, etc as well as by alcohol and drugs. This is due to *avijjā* or ignorance.

- Thus, “*majjhima paṭipada*” really means to follow a simple lifestyle without veering to the extremes.
- Thus *majjhima paṭipadā* is to follow a lifestyle that avoids the corruption of the mind by excess attachments to sense pleasures. On the hand, there is no need to subject one’s body to unnecessary hardships either.

6. In summary, the Buddha recommended a “common sense” comfortable, but simple, life that is conducive to meditation. Here meditation (*Bhāvanā*) is not necessarily “formal meditation.” The Buddha said, “*bhāvanāya bahulīkataya,*” or “contemplate as often as possible.” [*bahulīkata* :[pp. of bahulīkaroti] took up seriously; increased. (adj.), practised frequently.]

- One also needs to be avoiding immoral actions, speech, or thoughts as much as possible, and actually cultivate moral actions, speech, and thoughts. That helps suppress the five hindrances (*pañcanīvaraṇa*)

and have a peaceful state of mind, i.e., one could start experiencing the *nirāmisā sukha* that arises due to a “more pure state of mind.”

7. One can be contemplating the nature of the world as one goes through daily chores. Another aspect of this is the ability to calm the mind; see, “[Key to Calming the Mind](#).”

- A bigger picture implied here is that we need to educate our children so that they can find good employment and thus be able to live without having to worry about those four necessities of life. As they grow up, we need to educate them in Dhamma (how to live a moral life) too, but not at the expense of them getting a good education.

8. **Suffering is NOT the Noble truth on Suffering, i.e., *Dukha* (feeling of suffering) is NOT *dukkha sacca* (the Noble Truth that suffering can be stopped from arising);** *sacca* pronounced “sachcha” and means “truth.”

- The Noble Truth of *dukkha sacca* is about comprehending how suffering ARISES due to greed, hate, and ignorance (of this fact). One can understand that —and take steps to avoid future suffering — by learning Dhamma: *anicca, dukkha, anatta, paṭicca samuppāda*, etc.
- The Buddha said, “This Dhamma is unlike anything that the world has ever seen.” The actual suffering is hidden WITHIN the apparent enjoyments. Also see, “[The Incessant Distress \(Peleema\) – Key to Dukkha Sacca](#).”
- For another description of *majjhima paṭipadā*, see, “[Dhammacakkappavattana Sutta](#).”

Next, “[What is Unique in Buddha Dhamma?](#)”,

6.1.2.7 Does Impermanence Lead to Suffering?

Revised April 26, 2020; June 7, 2020

The following INCORRECT statements are in frequent use in most books in both Mahāyāna and current texts on Theravāda:

1. “We suffer because our bodies are impermanent; they are subject to decay and death.”
2. “We suffer because those things we get attached to are impermanent.”
3. “If something is impermanent, that leads to suffering.”
4. “Since everything in this world is impermanent, everything is suffering”, etc.

Is there a direct correlation between impermanence and suffering? Let us examine those statements.

1. **“We suffer because our bodies are impermanent and are subject to decay and death.”**

- We indeed suffer because OUR bodies are impermanent and are subject to decay and death. But if it is an enemy, do we suffer when that enemy gets sick or die? We suffer if someone we LIKE gets ill or dies, but it is cause for celebration for most people when someone they dislike gets ill or dies.
- The suffering/happiness is directly proportional to the attachment/dislike we have for that person. Suffering due to a loss of one’s child is more compared to the loss of a distant relative. Happiness due to Bin Laden’s death was higher compared to the death of an unknown terrorist. (For a follower of Bin Laden, his death would have led to suffering).

Suffering arises only when things do not proceed as we like. It is the human nature to want the loved ones to be unharmed, and the enemies to come to harm. When either does not happen, that leads to suffering. That is what *anicca* means: the inability to maintain things to our liking.

2. **“We suffer because those things we get attached to are impermanent.”**

- Many things in this world that cause us suffering because they will not stay in the same condition or are destroyed. That is true.
- BUT there are many other “permanent” things in this world (at least relative to our lifetime of 100 years), that are associated with suffering. If one has an illness and that becomes “permanent” would that not be suffering?
- A gold necklace it is not impermanent, i.e., it will last for thousands of years. But the woman who owns one may be robbed of it, and in the process could get hurt too. She could not “maintain that necklace as she desired.”

If ANYTHING causes US suffering, that is because we cannot maintain it to OUR satisfaction, OUR liking.

3. “If something is impermanent, that leads to suffering.”

The following is the conventional (incorrect) translation of Buddha’s words: “*yad aniccaṃ taṃ dukkhaṃ*,” i.e., “if something is **not permanent**, that leads to suffering.” But the correct translation is, “if something **cannot be maintained to our liking**, that leads to suffering.” Let us consider some examples:

- If we have a headache, and if it is not permanent (i.e., it goes away), does that cause suffering? No. However, if the headache becomes permanent, that will lead to suffering.
- If we come down with cancer, wouldn’t it cause happiness if it becomes impermanent?, i.e., if it goes away?
- If a relative (that we do not like) comes to stay with us, would it lead to happiness if the stay becomes permanent or impermanent? Of course, it will cause us happiness if the stay is not permanent and the person leaves.

4. “Since everything in this world is impermanent, everything is suffering.”

The Buddha never said everything in this world leads to suffering. If everything is suffering then everyone will be looking to attain *Nibbāna* as soon as possible. **The reality is that there are sensory pleasures to be had in this world.** Most people do not understand why one should go to all this trouble to “give up all these sense pleasures and seek *Nibbāna*.”

- Taking the “big picture”, out of the 31 realms in this world, there are many realms where suffering is much less. See, “[The Grand Unified Theory of Dhamma](#).”
- But there is unimaginable suffering in the lowest four realms, AND that is what we need to avoid. Even though there are 31 realms, MOST LIVING BEINGS (99.99%+) are in the lowest four realms.
- Thus what is true is that this *samsāric* journey is filled with UNIMAGINABLE suffering. However, one cannot see that unless one learns true Dhamma.
- Even in this life. there is much suffering, especially as one gets old. The suffering is highest close to death if the death is due to an ailment. If one enjoys sex, that ability to enjoy sex will fade away as one gets old. It does not matter how much money one has. Even our taste buds will not give us the same enjoyment from foods as we get old. All our sense faculties will start performing less and less as we get old. That is *anicca*. We cannot maintain things to our satisfaction in the long run.
- Even if we are born in a higher realm where there is much happiness, that existence cannot be maintained. One day, that life will be over, and one WILL end up in a lower realm at some point, and then it will be very hard to get out of there. That is *anicca*.
- Furthermore, if the cause of suffering is impermanence, then it cannot be eliminated, see, “[Would Nibbāna be Possible if Impermanence is the Cause of Suffering?](#).”

In Pāli (or in Sinhala), the word “*icca*” (pronounced “*ichcha*”) means liking. Thus *anicca* (pronounced “*anichcha*”) means not to like.

Therefore, the correct translation of “*yad aniccaṃ taṃ dukkhaṃ*” is “if something **cannot be maintained to our satisfaction**, that leads to **suffering**.” **You can take any example you like and verify for yourself that it is a universal principle, an unchanging characteristic of this world, as the Buddha stated.**

Without understanding the three characteristics of “this world,” it is not possible to grasp the message of the Buddha. Those three characteristics are *anicca*, *dukkha*, *anatta*. Here *anatta* is pronounced “anaththa.” These are the words in the *Tipiṭaka*, that was written down more than 2000 years ago, in 29 BCE.

- The problem started when these words were translated to Sanskrit as *anitya*, *dukha*, *anātma*; this started probably as far back as in the first or second century CE.
- Then those Sanskrit words were translated to English as impermanence, suffering, and “no-self.” **The two worst translations are impermanence and “no-self.”** See, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”
- Those two Sanskrit words, *anitya* and *anātma*, are being used by many in Sri Lanka today as Sinhala words representing the translations of the “Pāli words”, *anicca* and *anatta*. Furthermore, the Pāli word *nicca* (pronounced “nichcha”) was translated to Sanskrit as “*nitya*” (pronounced “nithya”) which means “permanent.” **The Pāli word *nicca* means “something can be maintained to one’s satisfaction and, thus, is fruitful [subha].”**
- However, *nicca*, *anicca*, and *anatta* are “old Sinhala” words with entirely different meanings than *nitya*, *anitya*, and *anātma*. Those words are not in common use today, but when explained, a Sinhala-speaking person can understand the real meaning. Indeed old ladies in villages in Sri Lanka still say “*ane aniccan*” (අනෙ අනිකන) to express the futility of something.

The Buddha stated that those three characteristics, *anicca*, *dukkha*, and *anatta*, are related:

“*yad aniccaṃ taṃ dukkhaṃ, taṃ dukkhaṃ tad anattā*”, or,

“if something is **not *nicca*, *dukha* arises**, and because of that, **one becomes helpless [*anatta*].”**

As mentioned above, as one gets old or gets disabled, these three characteristics will be easier to see for oneself; but then it would be too late because the mind gets weaker as we get old. One needs to learn Dhamma BEFORE the mind (and the body) become weak. Here is a video that shows this clearly:

[WebLink: RANKER: Celebrities Who Have Aged the Worst](#)

Also, see, “[Anicca, Dukkha, Anatta - Wrong Interpretations](#),” and “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#)” for more details.

6.1.3 Buddha Dhamma and Buddhism

“[What is Unique in Buddha Dhamma?](#)”

“[A Buddhist or a Bhuddhaya?](#)”

“[Where to Start on the Path?](#)”

“[What Reincarnates? – Concept of a Lifestream](#)”

“[Recent Evidence for Unbroken Memory Records \(HSAM\)](#)”

“[Buddhism without Rebirth and Nibbāna?](#)”

6.1.3.1 What is Unique in Buddha Dhamma?

Revised November 16, 2019

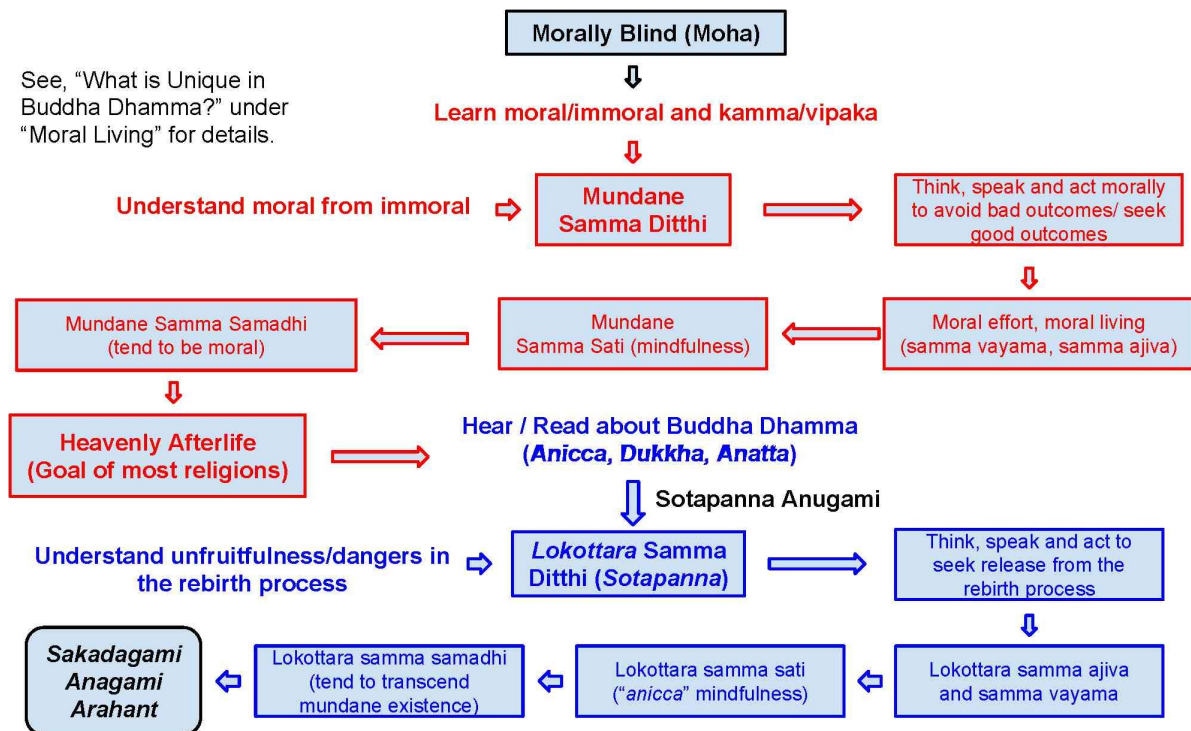

All Religions Are The Same?

1. When I hear the common statement, “all religions are the same, they teach you how to live a MORAL LIFE”, I cringe. That is because I think about all those people who are unaware of the actual message of the Buddha. In particular, this is the mindset of those who follow “secular Buddhism.”

- It is true that most religions teach how to live a moral life. And there is also evidence that atheists may be as moral as religious people are; see, “[WebLink: Morality in everyday life-Science-2014-Hofmann.](#)”
- However, Buddha Dhamma goes beyond that. The Buddha said, no matter how well we live this life that will not help one in the LONG TERM.
- Yet, even to understand that message of the Buddha, one needs to live a moral life first.

Two Paths Described by the Buddha

2. I have made a one-pager, which should be referenced here.

This chart can be viewed in a separate panel by clicking on “[Buddha Dhamma – In a Chart](#)” and printed for reference. There are a few key things that need explanation first:

- The “mundane Eightfold Path” is depicted by the set of boxes in red starting with “mundane *sammā ditthi*.” The next box depicts mundane versions of *sammā saṅkappa*, *sammā vaca*, and *sammā kammanta*.” That means “think, speak, and act morally to avoid bad outcomes/seek good outcomes” and so on until “mundane *sammā samādhi*.”
- Most of these steps (not all) are in other religions as well as in conventional or secular “Buddhism.” They describe how to live a moral life. The goal of most other religions is to gain a (permanent) heavenly life at death. In the current versions of distorted “Buddhism” also, the joys of heavenly lives are highlighted. Sometimes one is even encouraged to “enjoy such heavenly lives” before attaining *Nibbāna*.

What Is “Good Birth”?

3. This misconception in “Buddhism” arises because the rarity of a “good rebirth” has not been comprehended; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)” This is why the Buddha said, “no happiness can be found anywhere in the 31 realms” (which is the true meaning of *anicca*).

- **Even if a heavenly rebirth is attained in the next life, a future rebirth in the four lowest realms (*apāyā*) cannot be avoided without attaining the *Sotāpanna* stage of *Nibbāna*.** A phrase used by some *bhikkhus* in Sri Lanka goes as, “May you attain *Nibbāna* at the time of the Buddha Maithree (next Buddha).” Why not attain *Nibbāna* in this life? *Who is going to give guarantees that one will be born human during the time of the Buddha Maithree?* Everyone should make use of this rare opportunity to be human, *to strive now!*
- Until one comprehends *anicca, dukkha, anatta*, one always values future happiness in permanent heaven (most religions) OR temporary happiness in heavenly worlds (traditional “Buddhists”). The difference between a traditional “Buddhist” and a *Bhauddhaya* is discussed in “[A Buddhist or a Bhauddhaya?](#).”
- One actually starts on the transcendental (*lokuttara*) or the Noble Eightfold Path when one comprehends the dangers of the rebirth process and BECOMES a *Sotāpanna*.
- When one is trying to attain that understanding, one is called a *Sotāpanna magga anugāmi*; see, “[Sotāpanna Anugāmi and a Sotāpanna.](#)”

Two Eightfold Paths

In the “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#),” the Buddha discussed that one must first follow the **mundane eightfold path**. That will remove the ten types of wrong views (*micchā diṭṭhi*) that are listed in #3 of that post. After that one needs to comprehend the *Tilakkhaṇa* (*anicca, dukkha, anatta*) to some extent to start on the **Noble Eightfold Path**.

4. Thus one starts on the Noble Eightfold Path starting with *lokuttara* (transcendental) *sammā diṭṭhi* of a *Sotāpanna* (set of blue boxes). One has seen a “glimpse of *Nibbāna*”, i.e., one KNOWS that permanent happiness is not possible anywhere in the 31 realms and that whatever effort one makes to achieve such a happiness is like chasing a mirage.

- Note the difference in the box next to “*sammā diṭṭhi*” in the two cases. In the mundane path, “*sammā saṅkappa, sammā vaca, sammā kammanta*” are “moral thoughts, speech, and actions” intended to avoid bad outcomes and to seek good outcomes.
- In the Noble path, “*sammā saṅkappa, sammā vaca, sammā kammanta*” are “thoughts, speech, and actions” intended to stop the rebirth process. **One does not do immoral things because there is “no point” in doing such things.** One knows that such things are not only unfruitful but also dangerous, in the long run.
- And one becomes more compassionate towards all living beings (not just humans) because one can see that each living being is suffering because of ignorance of the Buddha’s key message. One also realizes that one needs to fulfill obligations to others in order to “pay back old debts”; one is bound to the rebirth process not only via cravings for worldly things but also via unpaid debts from previous lives.

Noble Eightfold Path

5. The decision to become a *Sotāpanna magga anugami* (the path to the *Sotāpanna* stage) can be made anytime after getting to the “red boxes”, i.e., while one is on the mundane Eightfold Path.

- In a way, a *Sotāpanna magga anugami* is a *Bhauddhaya* in the real sense. See, “[A Buddhist or a Bhauddhaya?](#)” Even though not in the *Tiṭṭaka*, sometimes the word “*Cūla Sotāpanna*” (pronounced “chūla Sotāpanna”) is also used to describe the same person.

- The key is to comprehend the “true nature of this world of 31 realms” that the Buddha described. That says it is not possible to achieve/maintain anything that can be kept to one’s satisfaction (*anicca*). Thus one gets to suffer (*dukkha*), and thus, one is truly helpless in the rebirth process (*anatta*). This realization itself is like lifting a heavy load that one has been carrying, the first true taste of *Nibbāna*.

6. This “change of mindset” for a *Sotāpanna* is PERMANENT, i.e., it will not change even in future rebirths. One has attained an “unbreakable” level of confidence (*saddhā*) in the Buddha, Dhamma, and Saṅgha.

- And a *Sotāpanna* can follow the rest of the 7 steps in the Noble Eightfold Path even without help from others. Thus one will attain the next three stages of *Nibbāna* (*Sakadāgāmī*, *Anāgāmī*, *Arahant*) successively by following those steps.

Mundane Eightfold Path

7. In the *Mahā Chattarisaka Sutta*, the Buddha outlined how one needs to first follow the mundane (“*lokiya*”) Eightfold Path; see, “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).” This is a first NECESSARY step in order to get rid of the worse kinds of “gunk” that has been built up over countless lives.

- The unique message of the Buddha that has been hidden for hundreds of years. What is conventionally practised today is just this mundane Eightfold Path. This is what we call “Buddhism” today.
- That superficial or “secular” Buddhism is not that different from what is advised by most other religions. Thus, it is easier for people to resonate with the mundane concepts in “Buddhism.” *Sammā Dīṭṭhi*, for example, is considered to be the “correct vision” of “how to live a moral life.”
- Of course, that is a first necessary step. That will help one to be able to experience the benefits of moral behavior (even in this life as a “*nirāmisā sukha*”; see “[How to Taste Nibbāna](#)”) and then to comprehend *anicca*, *dukkha*, *anatta*, and to embark on the Noble Eightfold Path to seek permanent happiness or *Nibbāna*.

Next, “[Is Buddha Dhamma \(Buddhism\) a Religion?](#)”,

6.1.3.2 A Buddhist or a Bhauddhayā?

Revised August 18, 2016; revised April 25, 2019

1. The terms “Buddhism” and “Buddhist” were invented by the English, French, and German historians in the nineteenth century when they first came across Buddha Dhamma in India and Sri Lanka.

- The discovery of the “Asoka pillars” in India was followed by the discovery of the Pāli literature on Buddha Dhamma in Sri Lanka and other countries such as Burma and Thailand (together with translated Chinese scripts); of course there were no practicing “Buddhists” or any Buddhist literature in India.

2. Here are two key points that should be the basis of defining the terms:

- Up to that time it was “Buddha Dhamma” or the “Dhamma or Teachings of the Buddha.”
- The word Buddha comes from “*bhava*” + “*uddha*”; here, “*bhava*” means “existence (in the 31 realms)” and “*uddha*” means “removal.” Therefore, Buddha is one who figured out how to stop the rebirth process and thus end future suffering.
- And a person who diligently followed the Path advised by the Buddha was called a “*Bhauddhayā*” (= *bhava* + *uddha* + *yā* = one who strives to stop the rebirth process, i.e., to stop suffering).

3. However, many people today have been exposed to bits and pieces of Buddha Dhamma.

- They are just happy to follow the precepts of moral conduct, do some *samatha* meditation (breath meditation) to relieve the stresses of modern life, and to see where that leads them; see, “[Goenka’s Vipassana](#).”

- That is a perfectly good approach, at least to start off. But Buddha Dhamma is much deeper, and can lead to a state where there is absolutely no suffering, i.e., *Nibbāna*; see, "[Nibbāna](#)."
4. Each person understands Buddha Dhamma differently, mainly based on the level of exposure to "correct Dhamma."
- Thus most people have the following misconceptions: (1) that Buddha Dhamma will help alleviate suffering from physical ailments, (2) that it provides only temporary relief (also called *nirāmisā sukha*) from mental stress (as in breath meditation).
5. However, the Buddha pointed out two forms of hidden suffering that humans are not aware of:
- That incessant distress or agitation that we all feel (but mostly are unaware of) arises due to greed, hate, and ignorance.
 - Immoral deeds that we commit due to these greedy, hateful, or ignorant mindset will lead to much higher forms of suffering in future rebirths (especially in animal and other lower realms).
6. Some do not believe in the rebirth process, so they cannot really "get traction" with the second type suffering associated with the rebirth process.
- Many have experienced the *nirāmisā sukha* while participating in meditation retreats or regular meditation programs at home. However, they do not realize that such *nirāmisā sukha* can be made permanent, by learning pure Dhamma and by comprehending the *anicca* nature of this world; see, "[Starting on the Path Even without Belief in Rebirth](#)" and "[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)"
 - It is only when one starts realizing the *anicca* nature, that one becomes a true *Bhauddhayā* in the sense of its meaning in #2 above.
7. A *Bhauddhayā* starts to realize the futility of staying anywhere in the 31 realms, and at some point will attain the first stage of *Nibbāna*, i.e., become a *Sotāpanna*.
- At that stage one would have made that *nirāmisā sukha* permanent, i.e., if one did not do any meditation for the rest of the life, he/she will retain that *nirāmisā sukha*.
 - A *Sotāpanna* would also be automatically be released from future births in the *apāyā* or the four lowest realms.
 - How that happens is described in other sections of the site, especially in the section, "[Sotāpanna Stage of Nibbāna](#)."
8. Many people initially become Buddhists because of either a desire to learn more about the "wider world", contemplate on the "long-term existence", i.e., the never ending rebirth process, or because they are interested in living a moral life that provides a sense of happiness.
- But in the very strict sense, if one really wants to follow the Path prescribed by the Buddha and become a "*Bhauddhayā*," one needs to first understand what the rebirth process is, and why it is important to stop the rebirth process, i.e., they need to understand *anicca*, *dukkha*, *anatta*.
9. There are no rituals to become either a Buddhist or a *Bhauddhayā*. As one becomes convinced of the Buddha's world view and starts seeing that it is fruitless to HARM ONESELF OR OTHERS to gain anything "in this world", he/she starts becoming a better Buddhist or a *Bhauddhayā*.
- As one becomes a Buddhist/*Bhauddhayā*, his/her personality may start changing without forcefully changing it. That is because one starts seeing the world differently and reacting to outside events differently. It is all about changing perceptions about "this world", i.e., it is all mental.
 - Because of this, one cannot become a *Bhauddhayā* or even a good Buddhist by just following rituals. One becomes a good Buddhist/*Bhauddhayā* by attempting to comprehend the message of the Buddha, and by experiencing the benefits as one progresses.

”*Dhammo ha ve rakkhati Dhammacari,*” i.e., “Dhamma will guide and protect one who lives by Dhamma.” If one really starts becoming a Buddhist/*Bhauddhayā*, one will be able to see the changes in oneself as time goes by (others will start noticing after a bit longer). One’s likings and associations are the first to change.

Next, “[What Reincarnates? – Concept of a Lifestream](#)”,

6.1.3.3 Where to Start on the Path?

This is a very important post. Please read the post through without clicking on any link first, in order to get the main idea that I am trying to convey. You may want to re-read the post several times, clicking on the links to find out more as you digest the key points. **Actually, this is true of all the posts: It is better to read through a given post first to get the main idea, and then to look into the details provided by the links as needed.**

- Anyone reading this website has been exposed to Buddha Dhamma in the past; by “past” I mean beginning-less time. Each of us have been “living” and “dying” innumerable times, in most of the 31 realms of existence; see, “[The Grand Unified Theory of Dhamma](#).” Even though a Buddha appears in the world after very long times, there have been innumerable Buddhas too. Some of you may not believe this, and that is fine. It may make sense later on.

Each of us has listened to a Buddha delivering a discourse, attained the highest *jhānā*, and also been born in the animal and *niraya* (the lowest realm) too. Our character and habits may have changed from “good” to “bad” many times over. Infinite time is very hard to grasp with the mind; see, “[Sansāric Time Scale](#),” and “[Infinity – How Big is it?](#).” Also, you may want to read the excellent book, “The Beginning of Infinity” by David Deutsch (2011) IF you are interested in a “scientific opinion”; actually, the descriptions are very similar in both cases in the sense that many things that sound implausible are not scientifically implausible, and in fact are necessary to explain the scientific data.

- As in this life, it is easy to remember relatively recent events in the *sansāric* journey. Those who can remember past lives, remember only the past one or few lives; see, “[Evidence for Rebirth](#).” The “habits” and “tendencies” that we have are the ones that we have had in the recent rebirths.
- Therefore, for some people, it may be easier to get into a *jhāna* (or to have a good meditative experience) just because they have had that experience in more recent lives; for another person, it may be harder just because that person may not have had that experience for very many births in the recent past.

One should not be discouraged if one’s understanding of Dhamma or “meditation experience” seems to be different from what one hears from others. The important thing is to first determine where one is in the relative scale of things and start at the right place. Most times there is no correlation between this evaluation and one’s “book knowledge” either.

One could use the basic guidelines provided by the Buddha. There are five stages starting with *dana* and ending with *nekkhamma*:

- *Dana* (giving, generosity, caring for others’ well being).
- *Sīla* (moral conduct).
- *Sagga* (literally heaven, but meaning calm and peaceful mind).
- *Ādeenava* (seeing the fruitlessness and the danger of the 31 realms or the rebirth process).
- *Nekkhamma* (losing attachment to “things” in the 31 realms, and working diligently towards *Nibbāna*), which in turn leads to *nissarana* (stop this suffering-filled rebirth process) and thus *Nibbāna*.

These are not clear-cut steps, but are guidelines.

1. Most people, irrespective of the religion, are generous and enjoy giving. Just like *sīla* below, *dana* induces happiness in oneself.
2. In Pāli it is *sīla* (pronounced “seela”); in Sinhala it is “*seelaya*” (“*sisil*” means cooling down and “*laya*” means heart, so cooled heart), and thus is a bit more explanatory.
 - Any act that makes one’s heart to cool down is an act of *sīla*, i.e., it is moral conduct.
 - When we act with compassion, say give a meal to someone hungry or help out an elderly person to cross the street, it makes our heart cool down. On the other hand, when we do something immoral or inappropriate, our heart gets agitated and the heart rate goes up, and the whole body heats up; also see, “[How to Taste Nibbāna.](#)”
 - It is the same compassion, extended to other living beings as well, that makes up the basis of the five precepts: avoiding any act that is harmful to any living being; see, “[The Five Precepts – What the Buddha Meant by Them.](#)”
 - **The humans are at a much higher “consciousness level” compared to animals, so we need to pay special attention not to even hurt the feelings of another human being;** see, “[How to Evaluate Weights of Different Kamma.](#)” It is a good habit also to cultivate *metta* (loving kindness) to all beings; see, “[Kamma, Debt, and Meditation.](#)”
3. When one gets to the *Sagga* stage, it is relatively easy to calm the mind. One starts feeling the *nirāmisa sukha* (see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#)”) or the happiness of “cooling down” by voluntarily “giving up” (and sharing with others) things that one used to be quite possessive of. It is very subtle. One cannot just start giving everything that one owns; that will only lead to *paṭigha* or internal friction. In addition, one has responsibilities and debts to pay; see, “[Kamma, Debt, and Meditation.](#)”
 - Different people get “agitated” due to different “triggers.” This is because we have very different *sansāric* habits: things we really like and things we really dislike; there are several posts on these habits and “*āsavas*.” It is a good idea to make a self-assessment, figure out the “bad triggers” and make an effort to remove them.
 - For example, if one has an “explosive temper” it is a good idea to make an effort to restraint oneself and also to do *metta bhāvanā*. It is important to realize that the anger is within oneself; it is not in an outside person or thing. I could get mad by thinking about person A, but there are many other people who have loving thoughts about the same person A. Same with greed, it is inside of us, not outside. These all originate from our *sansāric* likes and dislikes.
4. While it is hard for some to even start thinking about the ‘bigger picture’ of the 31 realms, and the possible suffering in future rebirths, some others may have thought about this “in the recent past in the *sansāric* rebirths”, and thus may be motivated to explore more.
5. The last stage is for those who have “seen the big picture” and the dangers of staying “in this world of 31 realms”, or at least have some inkling of it. When one starts feeling the *nirāmisa sukha* strongly, and also start seeing the suffering to come in the lower realms, giving up the rebirth process becomes an urgent need, instead of being anxious about “giving up rebirth.” Again, this cannot be forced. One will feel it when one’s mind is ready.
 - This website has posts that could be helpful in any of the above categories. One needs to look around and find the suitable topics; **even though I have tried to put posts into different categories, there may be posts suitable for anyone in any category.**
 - My intention is to add material at all different levels, mainly up to the *Sotāpanna* stage of *Nibbāna*. I hope that will help a wide spectrum of people and also illustrate that Buddha Dhamma describes the ultimate natural laws not only about our human world, but of all existence. Buddha Dhamma is not just a philosophical theory; one can actually experience the improvement in one’s quality of life as one follows the Path.

September 13, 2016: I recently started a new section, “[Living Dhamma](#)” detailing a step-by-step process on how to get started on the Path. One could get started even without belief in rebirth or the existence of 31 realms. There we start by looking at the (hidden) suffering experienced in this life and how to eliminate it.

6.1.3.4 What Reincarnates? – Concept of a Lifestream

Revised August 3, 2016; revised March 27, 2018; September 6, 2019; November 12, 2019; August 22, 2020

Reincarnation Versus Rebirth

Reincarnation is a Hindu concept, where the “*ātma*” or the soul remains the same but takes a different form. The *Rigveda* compares it to a person discarding an old suit and wearing a new outfit.

- In Buddha Dhamma, it is a **rebirth**, since there is no soul to reincarnate. We have accumulated many “*kamma* seeds” (*kamma bīja*) which contain various “habits” and “character” (called “*gati*”) in our long journey through *saṃsāra*. Those lead to different types of rebirths; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”
- At the end of this human existence, the *kammic* energy of the *kamma* seed for the present life is exhausted. At that moment, a new life starts with a new potent *kamma* seed. The selection of a new seed itself is a complicated process and depends on the potency of the available *kamma* seeds, but it happens within a thought-moment.

Pañcakkhandha – Not The Physical Physical Body

1. The *pañcakkhandha* or the five heaps (*khandhas*) that makes a being and “its world” are two inter-dependent entities. One is *rūpa* (form), and the other is *citta* (pronounced *chiththa*). See, “[The Five Aggregates \(Pañcakkhandha\)](#)” for details.

- *Citta* can be crudely called a thoughts, but a thought that we experience has billions of *cittā* in it; see, “[What is a Thought?](#).”
- *Rūpa* is divided into two main categories of internal and external. The external *rūpa* constitutes one’s outer world. The **internal *rūpa*** includes the physical body, as well as the very fine *pasāda rūpa* (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya*) which do the actual “sensing.” *Pasāda rūpa* cannot function without physical eyes, ears, nose, tongue, and the physical body.
- The very fine *pasāda rūpa* are in the “mental body” or the *gandhabba*: “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#).” The physical eye, ear, etc. are like physical instruments that help gather data from outside; see, “[Gandhabba \(Manomaya Kāya\)](#)” section for details.

Concept of a “Life-stream”

2. The combination of the two streams of *citta* and **internal *rūpa*** can be called a “life-stream.” A life-stream is in constant regeneration, moment-to-moment. The *cittā* regenerate very fast (billions in a second), and each *citta* has the other four heaps (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) associated with it. So *rūpa* and *citta* represent the *pañcakkhandha* (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*). I am simplifying this a bit to make it not too complicated.

- In simpler terms, both internal *rūpa* and *citta* are re-generated billion times a second.
- All ***rūpa*** arise and decay according to their nature, and not at a fast rate like *citta*. See, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”
- A *citta* arises and disappears in less than a billionth of a second, but there is a mental factor in each *citta* called *manasikāra* that “remembers the contents in the previous *citta*.” The two psychological factors of

manasikāra and *cetanā* are responsible for providing a sense of a “person” who remembers the past; see, “[Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka.](#)”

- Our memories have been kept intact from the beginning-less time. Recently, evidence has started emerging that some people can remember astoundingly detailed accounts of their memories from many years back. See, “[Recent Evidence for Unbroken Memory Records \(HSAM\).](#)”
- It is not possible to “store” all that information in the brain.

3. *Cittā* flow like a river (many billions a second), and are in discrete packets (like quanta in quantum theory; in fact, these are the smallest quanta anywhere in this world). Our internal *rūpa* also changes rapidly; this is why we change even moment-to-moment.

- But the **external *rūpa*** change at different rates, some lasting very long times (a gold bar, for example), while some change very fast.
- But NOTHING in the world remains the same over long times, even our universe came into existence some 14 billion years ago and will fade away in billions of years. Our Solar system has a lifetime of about five billion years.

A New Existence Can Be Very Different

4. As mentioned in #1, internal *pasāda rūpa* and *thoughts* for the present life run non-stop until the death (with some exceptions, like in the *asañña* realm). At the last thought-moment (called *cuti citta*, pronounced “chuthi chiththa”), a new *kamma* seed comes into play; see, “[Sāṅkhāra, Kamma, Kamma Bija, Kamma Vipāka.](#)” Now both the *rūpa* and *citta* for the new life contain brand new *rūpa*, *vedanā*, *saññā*, *sāṅkhāra*, *viññāṇa* (i.e., a new *pañcakkhandha*); it is a “living being” that may look different, with its own “world.” For example, a “*deva* world” is very different from what we experience.

- The only things that are carried over to the new life are those *kamma* seeds, which contain the “character” or “*gati*” of that life-stream. Energies in *kamma* seeds fade over time if they had not yet brought their *vipāka*.

5. Thus, at the moment of death, *pañcakkhandha* makes a quantum jump (meaning a sizeable instantaneous change).

- Let us take an example. A man has a physical body, which is part of his *rūpakkhandha* (we will make this as simple as possible). Other four *khandha* determine his mental state (*vedanā*, *saññā*, *sāṅkhāra*, *viññāṇa*), where *viññāṇa* is roughly consciousness. Suppose he dies and is born as an elephant. Now the life-stream gets a new *viññāṇa*. The “new” physical body is different, and his “new” consciousness level is much lower than a human’s, now at the base level of an elephant.
- But the set of *kamma* seeds (*kamma bīja*) all got transferred to this new existence (*bhava*). Thus if there are many “good *kamma* seeds” there, there could later be a birth in a human or even higher realm.
- Normally, the rebirth takes place in a physically different location (New scientific evidence for such “actions at a distance” are discussed in “[Quantum Entanglement – We Are All Connected](#)”).

Caterpillar and Butterfly – Not the Same

6. Sometimes a life-stream changes its *rūpa khandha* while in the same physical location. One example is the evolution of a butterfly from a caterpillar. A female butterfly lays an egg. The egg hatches and a caterpillar is born. It eats leaves and metamorphosis into a pupa that hangs like a small sack. The final stage is a butterfly that emerges from that sack.

- Now this butterfly is definitely not the pupa or the caterpillar or the egg. But it is not different from any of the above either. It is the same life-stream. That is why both “soul” and “no-soul” (or “self” and “no-self”) are wrong views. Many people incorrectly translate “*anatta*” as “no-self” with the meaning of “no-soul,” which is WRONG; see, “[Anatta and Dukkha – True Meanings.](#)”

7. Let us look at the caterpillar and the butterfly. The *rūpa khandhas* defining their physical bodies are different. Their *cittā* are different too. One thinks about eating leaves, and the other thinks about drinking nectar. The only commonality between the two lies in the *kamma* seeds (which also keep evolving in a given life).

- Now that life-stream may have *kamma* seeds for a human, *deva*, or a *brahma* too. But none of those got “selected,” probably because they were less potent. So, a butterfly is likely to be born in lower realms for very, very long times, before a less probable “human seed” picked for a new life in a rare statistical event.

Gati are Carried to the Next Existence

8. One’s habits (*gati*) that mold one’s character and the mental impurities (*kilesa*) are carried from life-to-life. Of course, those also keep changing even during a lifetime. I call this the “dynamic personality” of a life-stream in the sense that it is in constant flux. That is another reason why the Buddha rejected “no-self” as well as “self” or “soul.”

- There is nothing that remains the same (i.e., not “self”), but we cannot say “no-self” either, because there is an “identity” in the form of one’s *gati* (and *āsava* and *kilesa*) that survives in the next life. See, “[Habits, Goals, and Character \(Gathi\)](#)”, “[Sansāric Habits, Character \(Gathi\), and Cravings \(Āsava\)](#),” and “[Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)](#).”

9. *Gati* (character/habits) of a given life-stream can change significantly during human life. A human can change his/her destiny, but an animal cannot.

- Out of the 31 realms of existence (see, “[The Grand Unified Theory of Dhamma](#)”), the mind has much less capability in most other realms. Thus, it is very difficult to get rid of bad *kamma* seeds and cultivate good ones while in realms other than the human. Therefore, one should make the utmost effort to get rid of the bad seeds and to develop “good seeds” during this short life span of 100 years or so.
- Also, physical death does not necessarily mean the end of human rebirth. If the *kamma* seed that led to his human life has more *kammic* potential left, a human can be reborn a human again and again. That stops when *kammic* potential is exhausted; see, “[Bhava and Jāti – States of Existence and Births Therein](#)”.
- It is a rare event to get a human existence (*bhava*) for a living being; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).” But during a given human *bhava*, there could be many rebirths. That is why some can recall recent past lives: “[Evidence for Rebirth](#).”

Most Suffering in the Rebirth Process Is In Apāyā

10. **Rebirth process has so much suffering mainly because a given living being is mostly born in the lowest four realms (*apāyā*).** Thus is the need to get out of the rebirth process by attaining *Nibbāna*.

- *Nibbāna* is attained NOT by getting rid of all *kamma* seeds. Getting rid of *kamma* seeds is not necessary. What we need to do is to reduce “the tendency to crave for things in this world (*upādāna*)” by following the Noble Eightfold Path.
- An *Arahant* may still have bad *kamma* seeds left. But his/her mind WILL NOT hold onto any of those at the dying moment (this happens when one truly comprehends the futility of staying in this world or craving for anything in this world); see, “[Anicca – True Meaning](#)“, and “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#)“). Thus, he/she will not be reborn “in this world.”

11. Still one would want to stop accumulating “bad seeds” and to cultivate as many “good seeds” as possible. That will make it more probable of NOT getting a bad birth when one dies. That will also make it easier to attain *Nibbāna* in a future life without being born in a bad realm (in case one does not make it in this life). See the “[Moral Living and Fundamentals](#)” section on how to get started.

- I have made this complicated process probably too simple. But I think it will help one to get the basic idea.
- The concept of an ever-changing life-stream is also discussed in [“Self” and “no-self”: A Simple Analysis.](#)”

No “Discernible Beginning” to the Rebirth Process

12. It is also important to realize that any life-stream does not have a “discernible beginning,” as the Buddha said. Thus each one of us has been going through this process from “beginning-less time.”

- In Buddha Dhamma — unlike in the “Big Bang Theory” of current science — our whole universe did not come to existence some 14 billion years ago. That requires a detailed explanation, but let me give a summary.
- Stars like our Sun have lifetimes of several billion years. At the end of their lifetimes, some of them blow up. Those explosions are supernovae in modern science. Even then, higher-lying *rūpa* realms and *arūpa* realms survive. All living beings move to higher realms before the destruction of the Earth.
- After many billions of years, the “material Solar system” re-forms. Then most of those living beings come back to the Earth as humans with very light “bodies” like *Brahmā*. With time, those “early humans” evolve into humans and animals with “denser bodies.” That is a reverse evolution process, compared to Darwin’s theory.
- Those details are in the *Aggañña Sutta*, and of course, current translations are way off. What is important for now is that the beginning of any life-stream has “no discernible beginning.” A summary of the *sutta* at, [“Buddhism and Evolution – Aggañña Sutta \(DN 27\).”](#)

13. In Buddha Dhamma (as well as in science) nothing happens without a cause: cause and effect. If there was a beginning, who or what gave rise to that beginning? And then what caused “that”? That is why “there is no discernible beginning.” See, [“Origin of Life – There is No Traceable Origin”](#).

- Thoughts are more complex than described above; see, [“Viññāna, Thoughts, and the Subconscious.”](#)
- It is not possible to provide the “whole picture” in a post or even several. You can use the “Search” box on the top right to locate posts relevant to keywords.
- For a more detailed discussion, see, [“Mental Body – Gandhabba.”](#)
- See also, [“What is Mind? How do we Experience the Outside World?”](#)
- One may wonder where one’s memory is stored: see, [“Memory, Brain, Mind, Nāma Loka, Kamma Bhava, Kamma Vipāka.”](#)

More details in the new sections on, [“Origin of Life”](#) and [“Buddha Dhamma – A Scientific Approach.”](#)

6.1.3.5 Recent Evidence for Unbroken Memory Records (HSAM)

Revised October 6, 2018; May 18, 2020

1. A normal human being can remember some “significant events” even from the very early days of this life. And these memories are not just a “summary”, but we recall a significant event in detail. It is like playing back a videotape. We recall the whole scene with pictures sounds, the background, everything. Just recall some past events and one can verify that for oneself.

- There are many cases of “memories from past lives” reported mostly by children. But there are also accounts by some adults under hypnosis; see, [“Evidence for Rebirth.”](#)
- Now there is scientific evidence that our memory records are kept in minute detail somewhere and can be accessed at moment’s notice. Such “detailed records” are called “*nāma gotta*” in Buddha Dhamma.

See, “[Nāmagotta, Bhava, Kamma Bija, and Mano Loka \(Mind Plane\)](#)” and “[Memory Records – Critical Part of Five Aggregates.](#)”

- However, an average human can recall only a small fraction of past events.

2. Strong evidence is beginning to emerge that there is indeed a “complete record” of one’s past (in this life) just like a videotape. These studies started with Jill Price, who contacted a team of scientists in the early 2000’s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program:

[WebLink: YOUTUBE: The woman that never forgets](#)

3. Note that she says she can “see” what happened that day. It is not like she is recalling a “summary” or the gist of what happened. She can actually recall the whole episode in detail. Even the day and date come out effortlessly.

- A team of scientists has studied her for five years and published a paper providing their findings: [A Case of Unusual Autobiographical Remembering-Parker-2006](#)
- She has written a book about her experience: “The Woman Who Can’t Forget”, by Jill Price (2009).
- Jill Price’s story led more people to come forward with their experiences, and ten more such individuals have been studied in detail recently: [WebLink: Behavioral and neuroanatomical investigation-LePort-2012.](#)

4. These individuals have “highly superior autobiographical memory” or HSAM. They are not any smarter than average people, according to those two papers above. The ability to recall their past much more extensively is a “*puññā iddhi*” of a special *kamma vipāka* in Buddha Dhamma. They can focus their minds on any date in the past and “watch” what happened. Then they can say what the weather was like, who they were with, whether any significant world event took place that day, etc.

- This phenomenon is also known as Hyperthymesia; see, [WebLink: WIKI: Hyperthymesia](#). Several other cases of HSAM are mentioned here.

5. Scientists believe that our memories are “stored” in the brain, in the synapses between neurons. I firmly believe that they will be proven wrong. This research is still in infancy, but there has been an explosion of activity within the past 15 years.

- While it is true that synaptic wiring are responsible for habit formation (see, “[How Habits are Formed and Broken – A Scientific View](#)“), it is a stretch to assume that “video-like recordings” of all past events are somehow embedded in neural connections!
- It is true that people without HSAM do have false memories (or have no memories) of past incidents that were not significant for them. But their memories about significant/traumatic memories are astoundingly accurate.

6. There are a couple of key significant facts that come out of these studies on HSAM subjects:

- They can instantly access a “time slot” from many years back that is arbitrarily chosen by someone else. They “re-visit” that time slot and describe, in real-time, what took place with details.
- Since it has been confirmed in 11 subjects, it is not a “random event.”
- It is a stretch to assume that all such details for a period of over 20 years can be stored in biological membranes that regenerate undergo changes continuously.
- It is not a matter of being able to remember. Jill Price describes extensively that it is hard for her to remember any “learning material”; she was an average student.
- Rather, it is a matter of just having a brain that is “wired” to be able to access the “video recorder like” memory stream. It is not something one can develop by studying hard.

7. In Buddha Dhamma, the life of a sentient being is not restricted to the current life. As described in the previous post (“[What Reincarnates? – Concept of a Life-stream](#)”), any given sentient being has been born an uncountable number of times, with no “traceable beginning.”

- And a record of each of those lives is kept intact in the “mind plane”, and can be accessed to different degrees by different people.
- And people who develop *abhiññā* powers via *jhānā* (need to get to at least the fourth *jhāna*) can develop Jill Price’s capabilities and more; they can go back hundreds to thousands to billions of years depending on the level achieved.

8. According to Buddha Dhamma, the brain is just like a computer that helps extract these memory records from the “mind plane.” The mechanism is similar to a television extracting a broadcast signal; I will write a post on this later.

- These memory records are called “*nāmagotta*” (pronounced “*nāma gothhā*”) and they go back for eons and eons and even a Buddha cannot see a beginning; see, “[Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka](#).”
- We can recall only bits and pieces even during this lifetime; this is because our minds are covered by the five hindrances (*panca nivarana*); see, “[Key to Calming the Mind – The Five Hindrances](#).”
- Ancient *yogis* who could get to the *eighth jhāna* could see all past lives in the present eon or *kalpa*. But the Buddha could see numerous eons within a short time.
- This is why it is mostly children who can remember past lives. As they grow up their minds get “contaminated” more and more and these memories are lost. And those cases are different from the HSAM subjects.
- It appears that those individuals with HSAM have some of the capabilities of those who have developed *abhiññā* powers. Since those with HSAM have been reported to have somewhat different brain structures, it will be interesting to see whether those with *abhiññā* powers have similar brain structures as people with HSAM. I believe that it is a matter of the brain wiring to be able to “receive” more information from the “mind plane.”

9. Here is a video on the amazing accounts of a few people with memory capabilities.

[WebLink: youtube: Superhuman Geniuses \(Extraordinary People Documentary\)](#)

- More than anything else, they confirm the fact that memories are held intact in the *mano loka* or the “mind plane”; see, “[The Amazing Mind – Critical Role of Nāmagotta \(Memories\)](#).”
- The brain is the interface between the base of the mind (*hadaya vatthu*) and *mano loka*; see, “[Brain – Interface between Mind and Body](#).” It is just that a few people’s brains can do better in recalling those memories compared to others.

6.1.3.6 Buddhism without Rebirth and Nibbāna?

Revised August 18, 2016; February 14, 2020

I participated in several internet forums on “Buddhism” over 2013 and a part of 2014. One thing that clearly stands out is the fact that there are many people who like Buddhism, but they cannot understand what the big deal is about rebirth, and they cannot comprehend what *Nibbāna* is. Thinking is: Why can’t we have Buddhism without rebirth (because I do not believe in rebirth) and *Nibbāna* (because that seems to be too complicated)?

They are turned off by the concept of rebirth and are mystified by the concept of *Nibbāna*.

- **Rebirth.** I think that the first issue lies in the fact that most major religions are based on three levels of existence: This life, and one of two eternal stages of life thereafter; committed to either heaven or hell for eternity based on what one does in this life. That model is very simple. Buddha's 31 realms of existence with many "unseen beings" seems to be far fetched. Also, the possibility of being reborn as an animal is an abhorrent thought similar to the one people had about "evolving from the monkeys" before the theory of evolution.
- **Nibbāna.** The second issue has become a problem mainly because of *Mahāyāna* doctrines. *Mahāyāna* sect arose basically out of the philosophical analyses of *Nibbāna* by Nagarjuna, Asanga and other *Mahāyāna* forefathers. They could not understand the concept of *Nibbāna* or what happens to an *Arahant* when the *Arahant* dies. So, they came up with concepts like *suñyata* (*suññatā*) or emptiness; see, "[What is Suñyata or Suññata \(Emptiness\).](#)"

1. There are two co-existing facets of Buddha Dhamma:

- The Buddha said, "This Dhamma is unlike anything that the world has ever seen." **It really needs a paradigm change to get into the "new perspective about this world view of the Buddha."** One needs to be able to put aside all preconceived notions to understand the core message.
- However, the Buddha also said, "My Dhamma is good in the beginning, good in the middle, and good at the end." **There is something to be gained from Buddha Dhamma for people who just came to know about it.** This is why I have separated posts into three categories on the site.
- In Bhikkhu Bodhi's book, "In the Buddha's Words", there is a chapter on "The Happiness Visible in this Present Life", where Buddha's discourses to those who did not have aspiration to attain *Nibbāna* but were interested in pursuing moral lives, are described.
- The concepts such as rebirth and *Nibbāna* are paradigm-changing concepts. But as one follows what one understands, these concepts will become clear; I have summarized these two concepts below. But it will take much more effort and reading many more posts if one is really interested in understanding Buddha Dhamma.

2. For those who do not believe in rebirth, there is a simple way to get started without having to believe in the rebirth process. I strongly suggest the following post: "[Starting on the Path Even without Belief in Rebirth.](#)"

3. However, at the end — If one is to benefit fully from Buddha Dhamma — one needs to understand its core message. And that core message is that this life is only but an insignificant time in the cycle of rebirths that we have been on from eternity, and that "our world" is much more complex than we see with 31 realms instead of the two (human and animal realms) that we see. Even more significantly, the suffering in many of the lower realms of existence is much worse than that in the human or even the animal realm.

- That is a LOT of things to accept as a basis. But we are fortunate compared to those who lived even a hundred years ago. Because now we have EVIDENCE to back up this wider world view of the Buddha; see, "[Dhamma and Science – Introduction.](#)"
- And both major *Mahāyāna* sects as well as Theravāda Buddhism believe in rebirth and the concept of *Nibbāna*. All Buddhists (except the type of Stephen Batchelor, who has written some popular books on Buddhism) believe in rebirth and *Nibbāna*. I have seen the label "secular Buddhism" being used to describe those who like other aspects of Buddhism (basically moral living and meditation), but not necessarily rebirth and/or *Nibbāna*.
- **Thus a Buddhist not believing in rebirth/Nibbāna is an oxymoron.** The Pāli or Sinhala word for Buddhist is "*Bhauddhayā*" meaning "a person trying to stop the rebirth process" ("*Bhava+uddha*"). One meaning of Buddha Dhamma is "path or method of removing *bhava* and thus stopping the rebirth process." Buddha means, "one who has removed *bhava* (and attained *Nibbāna*)."
- However, There is no need to forcefully accept rebirth, which gives rise to *sansāric* suffering. **One can start at a point where one can actually experience the other type of hidden suffering in this life that most people can locate and remove:** "[Starting on the Path Even without Belief in Rebirth.](#)"

4. Therefore, one can be a “secular Buddhist”; that could be an intermediate state before becoming a Buddhist. We just need to get the concepts clear. Since there is no formal established way to declare oneself a “Buddhist” (or a need to do that), it is really in one’s own mind whether one is a Buddhist or not. The Buddha clearly stated that each person is at his/her own level of understanding. And there is no need to pretend; what one believes is what it is. **The critical thing is to make sure one is fully informed.**

- One does not become a Buddhist by reciting the precepts. **One becomes a Buddhist gradually as the mind embraces the world view of the Buddha and realizes that the real happiness is attained by comprehending the true nature of this world: *anicca, dukkha, anatta*, and eventually by stopping the rebirth process.**

5. In the mean time, it is important to realize that certain wrong views are bound to have adverse consequences according to Buddha Dhamma. Established (firm) view that there is no rebirth process is one included in *micchā diṭṭhi*, which is one of the (strong) *dasa akusala*, that makes a birth in the *apāyā* (four lowest realms of existence) possible. It is not necessary to firmly believe in rebirth, one should at least leave that as a possibility. What is critical is not to have *niyata* (established) *micchā diṭṭhi*.

- Faith in Buddha Dhamma is different from that in other religions; belief in rebirth or *Nibbāna* are not tenets. One either believes in them or one does not; see, “[Is Buddha Dhamma \(Buddhism\) a Religion?](#).” One MAY change one’s view after looking at the facts, and especially if one can experience the release from one kind of suffering; see, “[Starting on the Path Even without Belief in Rebirth](#)”

6. Finally, it will take a real effort to sort through all different versions of “Buddhism” that are out there. Over two thousand five hundred years, just like now, people have tried to “mold” Buddha Dhamma to a form to their liking, and that is why we have so many versions. **But when that is done, the uniqueness, the real message, gets lost.** We need to keep intact this unique message, with the understanding that not everyone comprehends it right away.

- The key is to discard any version or aspect that does not provide a consistent picture. Buddha Dhamma describe the laws of nature, and there cannot be any inconsistencies. That is what I try to do with this website. If you see something inconsistent on the website, please let me know.
- I use the *Tipiṭaka* (Pāli Canon) as the basis. It was written down over two thousand years ago (**by Arahants who had experienced *Nibbāna***), and is the oldest document encompassing the three main teachings: *Suttā*, *Vinaya*, and *Abhidhamma*.
- I have documented the flaws in both *Mahāyāna* and (to a lesser extent) in current Theravāda books by pointing out the inconsistencies with the *Tipiṭaka*. Also, I show that everything is self-consistent, which is the scientific basis to illustrate the validity of a theory. Newton’s theory on gravity had to be modified because they were not consistent with finer measurements.
- It does not matter what we believe personally. We need to find the true laws of nature that the Buddha discovered. **Laws of nature, like gravity or laws of motion, do not care about what we believe;** see, “[Why it is Critical to Find the Pure Buddha Dhamma.](#)”
- Buddha Dhamma (in its pure form) has withstood all tests to date; see, “[Dhamma and Science – Introduction.](#)” Both current *Mahāyāna* and Theravāda teachings need to be revised back to the original. It can be proven that there are self-contradictions within both sects in addition to contradictions with the teachings of the Buddha. I have a series of posts that point out these “problem areas” starting with, “[Key Problems with Mahāyāna Teachings.](#)”

Having established that rebirth and *Nibbāna* are the “lifeblood” of Buddha Dhamma, now we can turn to the next question: What evidence is there to “prove” rebirth? What is the big deal about *Nibbāna*, which sounds so esoteric?

A. REBIRTH

I have summarized some of the existing evidence for rebirth; see, "[Evidence for Rebirth](#)." I am not sure what will qualify for "proof", but one thing is very clear: A strong case can be made for it. There is evidence from many different areas, and that are consistent with the Buddha's other teachings, for example, the existence of a *manomaya kāya*; see, "[Manomaya Kāya and Physical Body](#)."

- If a person can believe even a SINGLE piece of evidence presented there, it is not possible to explain that without accepting that there is a link between such two lives. Since there is no physical connection between the two lives (that existed many miles apart), the connection must be outside the physical realm, i.e., the mental energy. There is new evidence from "quantum entanglement" that is consistent with the presumption that everything in this world is inter-connected; see, "[Quantum Entanglement – We Are All Connected](#)."
- However, one can actually verify the rebirth process by developing *abhiññā* powers via developing the fourth *jhāna*. One can then "see" one's previous lives; see, "[Power of the Human Mind – Introduction](#)" and the follow up posts. And there are some who have developed such *abhiññā* powers, and this number can be expected to grow. When a significant number of people can verify the rebirth process, it will be accepted. Today, not everyone has traveled outside one's own country. But everyone accepts that all those countries exist, because they believe the accounts of those who have made visits.
- And recent evidence confirm that there is indeed an unbroken memory record, at least in this life; see, "[Recent Evidence for Unbroken Memory Records \(HSAM\)](#)."

B. NIBBĀNA

1. "*Bāna*" in Pāli and Sinhala means "bondage"; thus *Nibbāna* means becoming free of bondage (to this world). We are bound to the unending cycle of rebirths via ten fetters called "*sanyojana* = "san+yojana"; see, "[What is "San"? Meaning of Sansāra \(or Samsāra\)](#)"; *yojana* means bond. *Samyojana* rhymes like called *saṃyojana* and that is normally written.

- The ten *saṃyojana* are removed via the four stages of *Nibbāna*: three at the *Sotāpanna* stage, two reduced at the *Sakadāgāmi* stage and removed at the *Anāgāmi* stage, and the remaining five removed at the *Arahant* stage.
- Removal of the ten *saṃyojana* also removes greed, hate, and ignorance from our minds; the *nirāmisā sukha* increases step-wise at each of the four stages, and the "cooling down" or "*nivana*" becomes complete; see, "[How to Taste Nibbāna](#)." There are many synonyms for *Nibbāna*, and *nivana* (or *niveema*) is one of them. The Sanskrit name "*nirvana*" does not convey any of these meanings.

2. When the mind becomes pure, a being is simply not reborn anywhere in the 31 realms. The mind has attained full release, and unconditioned happiness called *nirāmisā sukha*. Thus *Nibbāna* is stopping the rebirth process; the suffering stops. it is as simple as that. That mind cannot grasp even a fine form of a material body (which is subject to decay and death) anywhere in "the 31 realms." **The mind becomes free of a body that is subject to decay and death (suffering). That is Nibbāna.**

- The *Nibbānic* experience cannot be described by the terminology of "this world"; it is transcendental or "*lokuttara*," beyond "this world"; see, "[Nibbāna "Exists", but Not in This World](#)."
- Also, all we can say about what happens to an *Arahant* at his/her death is that he/she will not be reborn in "this world" of 31 realms. There is no more suffering. The mind is free of bondage to a physical body that leads to so much suffering.
- Many people say, "What suffering? I do not feel that much suffering." But the real suffering is in the lowest four realms; that is why the complete picture of 31 realms of existence is important. Furthermore, there is much suffering that is masked, especially when one is young. As one gets old, it is inevitable that one will start experience suffering at a higher degree, and then face death. Here is a video that illustrates this point:

[WebLink: YOUTUBE: Aging Stars of the Golden Age](#)

3. However, the point is NOT to get depressed about this inevitability. Some people get depressed thinking about old age, and try to “give up” everything to follow the Path of the Buddha.

- It is not even possible for someone who is not familiar with Buddha Dhamma to start working on attaining *Arahanthood* straight away, and it is not advised either. It needs to be done with understanding. As one follows the Path, and learns Dhamma, one could start feeling early stages of *Nibbānic* pleasure (*nirāmisā sukha*) and thus will start having fact-based faith on concepts like rebirth and *Nibbāna*: see, [“Three Kinds of Happiness – What is Nirāmisā Sukha?”](#)
- Have you seen any depressed Buddhist monks? They have given up the worldly pleasures voluntarily, NOT with the mindset of a depressed person. Depression leads to hate; true “giving up” is done with wisdom.

This is only a summary. All these are described in detail with supporting evidence at this website. The key point is that EVERYTHING we observe, all we experience CAN be explained with the complete “world view” of the Buddha of which rebirth and *Nibbāna* are essential foundations.

One does not need to know all that if all one needs is a peace of mind. One could follow the basic guidelines for a moral life that the Buddha provided. However, his key message was that this 100-year life can be only be compared to a “drop of water in a huge ocean” that is the cycle of rebirths filled with suffering. Thus one should at least critically examine the evidence to see whether that message needs to be taken seriously.

6.1.4.1 Kusala and Akusala Kamma, Puñña and Pāpa Kamma

April 27, 2018; revised August 19, 2019

Introduction

1. There are six causes for things to arise in this world: *lobha*, *dosa*, *moha* and *alobha*, *adosa*, *amoha*.

- **Akusala kamma** (immoral actions) done with *lobha*, *dosa*, *moha* give rise to births in the four lowest realms or *apāyā*.
- **Puñña Kamma** (moral deeds) done with *alobha*, *adosa*, *amoha* give rise to births in the human and higher (good) realms.

2. However, births in good planes do not solve the problem of suffering for the long term.

- That is because unless one still has hidden defilement (*anusaya*) and thus can act with *avijjā* and *taṇhā*.
- Therefore, when strong sense attractions become too tempting, one could do *akusala kamma* with *lobha*, *dosa*, *moha*, and then be born in the *apāyā*.

Comprehension of *Tilakkhaṇa*

3. When one comprehends #1 and #2 above, one would have realized the *anicca* nature, which is the following. Existence in any realm WILL NOT bring permanent happiness, or more correctly, it will not REMOVE future suffering.

- When one starts realizing the *anicca* nature, one will start “seeing” the dangers in continuing in the rebirth process. And that comprehension will lead to the gradual “wearing away” of hidden *anusaya*.

4. *Puñña kammā* are meritorious actions that CAN lead to rebirth in the higher realms. However, when one does *puñña kammā* without any comprehension of *Tilakkhaṇa*, there could be *asobhana cetasika* involved. (Especially greed at lower levels, possibly including a desire for something in return for those actions.) Such actions would not count as *kusala kammā*, but they are still *puñña kammā*.

- *Kusala kammā* are actions that lead to the cleansing of the mind and help to stop the rebirth process.
- All *kusala kammā* are *puñña kammā*. But not all *puñña kammā* are *kusala kammā*.

5. That is why the Path is two-fold. When one starts, one will be on the mundane eightfold path and will be doing *puñña kammā*.

- When one switches to the Noble (*Lokottara*) Path as a *Sotāpanna Anugāmi* (with comprehension of *Tilakkhaṇa*), one’s actions will have more and more *kusala* components.
- A big jump from *puñña kammā* to *kusala kammā* is when one attains the *Sotāpanna* stage. However, any trace of *akusala* component due to remaining *avijjā* will be completely removed only at the *Arahant* stage. At that point (for an *Arahant*) such actions are called “*kriya*” or just activities.
- For a discussion on the two paths, see, “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

Switching From the Mundane to Noble Eightfold Path

6. When one is on the **mundane eightfold path**, one knows the difference between moral and immoral. Thus one will (try to) abstain from *akusala kamma* and will make an effort to engage in *puñña kammā* (virtuous deeds).

- That will help one keep away from rebirths in the *apāyā*, and be directed to rebirths in good realms at or above the human plane.

7. With the comprehension of *Tilakkhaṇa*, one will start switching to the Noble (*Lokottara*) Path. One will begin realizing that *anicca* nature leads to *dukkha*, which in turn leads to *anatta* or helplessness when born in the *apāyā*.

- Then one will AUTOMATICALLY start doing moral deeds without any (hidden) expectation of a “good return in terms of good birth.” That is because one has understood that even births in the higher realms WILL NOT solve the problem of future suffering.
- In other words, more and more ***PUNŅĀ kamma* will automatically become *KUSALA kamma*. *Kusala kamma* are better than *puñña kamma*.**
- That is a point that is hard for many people to understand. But it should not be difficult.

8. When one proceeds this way, *lobha*, *dosa*, *moha* will be removed in four stages: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, *Arahant*.

- By the time one gets to the *Arahant* stage, one has eradicated *lobha*, *dosa*, *moha*.
 - By that time, one has also removed *alobha*, *adosa*, *amoha* as well. One will do moral deeds without any expectations for “good births.” That is because one would have seen the futility of getting births in those good realms also.
9. Therefore, the removal of ALL SIX ROOT CAUSES leads to *Nibbāna* (*Arahanthood*).
- However, since an *Arahant* still has a live physical body, previous *kamma vipāka* can result in bring bodily pains like injuries or body pains or sicknesses. But any mental suffering would be gone.
 - Then that *Arahant* attains *Parinibbāna* (full *Nibbāna*) when the physical body dies at his death.
 - AT that point, one attains full *Nibbāna*, and NO MORE SUFFERING will ever materialize.
10. It is essential to understand that *Nibbāna* IS NOT REACHED due to ANY causes. *Nibbāna* results when all six root causes are REMOVED.
- That is why *Nibbāna* is also called *asaṅkhata*, unborn, unmade, unconditioned, etc.
 - On the other hand, *saṅkhata* (things in this world) arise due to those six causes. Words like born, made, conditioned, are associated with *saṅkhata*.

Pāli Word Analysis (*Pada Nirukti*)

11. We can see the difference between *kusala kammā* and *puñña kammā* by looking at Pāli roots of those words. *Kusala* comes from “*ku*” + “*sala*,” where “*ku*” refers to “*kunū*” or *kilesa* or evils, and “*sala*” means “to get rid of.” “*akusala*” is the opposite of “*kusala*.” *Kamma* is an action.
- It is always good to know how Pāli terms originated (“*pada nirukti*”).
 - Therefore, an *akusala kammā* is an action that defiles or contaminates one’s mind (one of *dasa akusala*). Any *kusala kammā* involves an activity that leads to the removal of evils or *dasa akusala* from one’s mind; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
12. The word “*puñña*” is related to joy. The Sinhala word “*pina*” or “*pin*” is associated with “*pinaveema*” or “making one’s heart joyful.”
- Therefore, a *puñña kammā* is an action that makes one’s heart filled with joy. It is usually an action out of *saddha* (faith in the *Buddha*, *Dhamma*, *Saṅgha*). Such activities may not necessarily be *kusala kammā*, but some *puñña kammā* are *kusala kammā* too.
 - For example, when one offers food to the *bhikkhus* (or even to a hungry person) with joy in heart, that is a *puñña kammā* because one does with pleasure. It will be a *kusala kammā* if one has comprehended *Tilakkhaṇa*.
 - Ten types of *puñña kammā* are discussed in, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).”

What Are *Pāpa Kammā*?

13. We talked about *kusala/akusala kammā* and *puñña kammā* but did not discuss the opposite of *puñña kammā*. The opposite of *puñña kammā* is *pāpa kammā*.
- *Pāpa* in Pāli and Sinhala means “evil” or “sinful” actions that are obvious: Killing of a human or routine killing of animals, raping, and *niyata micchā diṭṭhi* are some examples of *pāpa kammā*.
 - So, what is the difference between *akusala kammā* and *pāpa kammā*?
14. The simplest way to state the difference is to say that *pāpa kammā* are the worst of *akusala kammā*.
- Usually, *pāpa kammā* lead to rebirth in the *apāyā*. *Ānantara pāpa kammā* are the strongest, and will even break the “*bhava shakthi*” in a human *bhava*. That will lead to rebirth in the *apāyā* when the current physical body dies (even if more *kammic* energy remains in the current human *bhava*).

- Mild *akusala kammā* can only bring *pavutti vipāka*, i.e., those can bring difficulties and sufferings during even a “good *bhava*” like a human *bhava*.

Some Examples of *Puñña Kammā*

15. Engaging in any moral deed is a *puñña kamma*. Offering flowers and chanting *pirith* (*paritta*) or paying homage to the Buddha, Dhamma, Saṅgha is also *puñña kammā*.

- **The key reason is that one’s mind becomes temporarily free of *pañcanīvaraṇa* (*kāmacchanda*, *vyāpāda*, *thina middha*, *uddhacca kukkuccha*, and *vicikicchā*)** when doing a *puñña kammā*. All those actions make one’s mind joyful and receptive to profound Dhamma. It is good to do them before sitting down to listen to a *desanā*.

16. The following question came up in the discussion forum: “Does circumambulation (walking around) a *stupa* or Buddhist relic brings merits to oneself? Does it matter whether one goes clockwise or counter-clockwise?”

- Circumambulation around a *stupa* or Buddhist relic (usually while reciting a *gātha* or *Tisarana Vandana*) could be a *puñña kamma*. It belongs to the same category as offering flowers and chanting *pirith* (*paritta*).
- Whether there is an effect for clockwise or counterclockwise, I am not sure. If there is, it must be a small effect.
- The short answer is that it can benefit if done with the correct mindset. However, it cannot remove evils (i.e., it is not a *kusala kammā*) by itself. It could be a *puñña kammā* that can set up conditions that will enable oneself to do *kusala kammā*.

17. *Puñña kammā* are NECESSARY to setting up CONDITIONS suitable to cultivate the Noble Eightfold Path that leads to *Nibbāna* (stopping the rebirth process).

- One may also think that doing *puñña kammā* is part of *sīlabbata parāmāsa*. That is not correct. ***Sīlabbata parāmāsa* means one believes that one can ATTAIN *Nibbāna* by doing *puñña kammā*.**

6.1.4.2 Ten Immoral Actions (Dasa Akusala)

Revised October 6, 2016; November 24, 2017; March 9, 2020

Dasa Akusala Connected to *Saṅkhāra*

1. One can do immoral acts with the body, speech, and mind (leading to *kāya*, *vacī*, and *mano saṅkhāra*); see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#).” Actually, one starts committing *mano saṅkhāra* first, some of which lead to *vacī* and *kāya saṅkhāra*.

These are ten immoral acts (*dasa akusala*). They are divided into three categories, as follows:

Three *mano saṅkhāra* (immoral acts done with the mind):

1. *Abhijjā* [*Abhijjhā*] (covetousness; greed for other’s belongings)
2. *Vyāpāda* (ill-will, hatred)
3. *Micchā Diṭṭhi* (wrong views)

Four *vacī saṅkhāra* (immoral acts done with speech):

4. *Musāvāda* (Lying)
5. *Pisuṇāvācā* (slandering)

6. *Parusāvācā* [*Pharusāvācā*] (harsh speech)

7. *Sampappalāpa* (frivolous talk)

Three *kāya saṅkhāra* (immoral acts done with the body):

8. *Pāṇātipātā* (killing)

9. *Adinnādāna* (taking what is not given)

10. *Kāmesu micchācāra* (not just sexual misconduct, but also excessive of sense pleasures)

***Dasa Akusala* Expand to Forty**

2. In Buddha Dhamma (i.e., in nature) it is always one's intention that matters. Based on that, each of those *dasa akusala* expands to 40. For example, it is not only stealing by oneself that matters. Also, getting someone else to steal, helping another's act of stealing, and praising such an action by another also are included.

- In another example, regarding *micchā diṭṭhi* the following also count. Propagating *micchā diṭṭhi* to others, encouraging another to cultivate *micchā diṭṭhi* (say, for instance, that the rebirth process is not valid,) or praising such practices.
- That is how ten *dasa akusala* expand to forty.
- There are ten *suttā* in the *Kammavagga* of the *Āṅguttara Nikāya* that lists those “four divisions” for each of the *dasa akusala*, AN 4.264 through AN 4.273. English translations of those start with: “[WebLink: suttacentral: 264. Killing Living Creatures.](#)” You can click the “next” arrow at the bottom of the webpage to get to all ten *suttā*.
- As one starts avoiding more and more of these forty actions, one will start feeling the early stages of *Nibbāna* or “*nivana*,” i.e., cooling down of the mind. The constant stress, excited-ness of the mind will gradually ease. Also see, “[Root of All Suffering – Ten Immoral Actions.](#)”

A Sotāpanna* Is Free of Only *Micchā Diṭṭhi

3. First of all, it is essential to realize that only an *Arahant* is totally free from doing any of these. Even a *Sotāpanna* may commit some of these at least once-in-a-while. There are six things that a *Sotāpanna* is incapable of: killing mother or father, killing an *Arahant*, injuring a Buddha, knowingly causing schism in *Saṅgha*, and having *micchā diṭṭhi* or wrong views.

- Thus it is inevitable that anyone anyone below the *Sotāpanna* stage could break *dasa akusala*. Even a *Sotāpanna* has **completely removed only *micchā diṭṭhi***. A *Sotāpanna* would not WILLINGLY commit any of the *dasa akusala*, but some COULD happen, except for those six mentioned above; see, “[Key to Sotāpanna Stage – Diṭṭhi and Vicikicchā.](#)”
- What is essential is to realize that one needs to AVOID them if at all possible. It becomes easier as one learns Dhamma and see the benefits of avoiding them.
- However, it must be noted that a *Sotāpanna* has reduced *lobha* (extreme greed, especially for other's belongings) and *dosa* (hate) to reduced levels of *rāga* (craving for sense pleasures) and *paṭigha* (friction or tendency to get upset or angry); see, “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā.](#)”

Two Categories of *Micchā Diṭṭhi*

4. The first category is the ten types of *micchā diṭṭhi* (wrong views) discussed in #5 below.

- The deeper level of *micchā diṭṭhi* is not comprehending the essential characteristics of “this world” of 31 realms; see, “[The Grand Unified Theory of Dhamma](#)” and “[Wrong Views \(Micchā Diṭṭhi\) – A Simpler Analysis.](#)”
- Because of the ignorance of the complete world view, one is likely to have the following three main wrong world views. (i) Everything has sprung without a cause (*ahetuka diṭṭhi*). (ii) Good and bad produce no effect (*akiriya diṭṭhi*). (iii) There is no after-life (*natthika diṭṭhi*).
- A common form of *micchā diṭṭhi* is to assume that if one obeys the five precepts, then one will be exempt from birth in the *apāyā*. That belief itself can lead to the birth in the *apāyā*; see, “[The Five Precepts – What the Buddha Meant by Them.](#)”

5. If someone has these world views, one is likely to carry out immoral acts. They will have acquire *kamma vipāka* leading to rebirth in the *apāyā* (the lowest four realms) in the future, i.e., in future rebirths. **There are ten such specific wrong views or *micchā diṭṭhi* (sometimes just called *diṭṭhi*):**

- (1) No *kammic* benefits in giving, (2) no need to pay back debts (for what others have done for you), (3) no benefits of respecting Noble Ones and also *yogis* with *abhiññā* powers, (4) *kamma* do not have *vipāka*, no *kammic* benefits of taking care of (5) mother and (6) father, (7) this world does not exist (“*natthi ayaṃ loko*“), (8) *Paralowa* does not exist (“*natthi paro loko*“), (9) there are no *opapātika* birth (instant full-formed birth), (10) there are no Noble Ones and *yogis* who can see past lives. [[WebLink: suttacentral: AN 3.117. Vipattisampadāsutta - Distress and Attainment Sutta](#) ‘(1) *natthi dinnam*, (2) *natthi yiṭṭham*, (3) *natthi hutam*, (4) *natthi sukata dukkaṭānam*, *kammānam phalaṃ vipāko*, (7) *natthi ayaṃ loko*, (8) *natthi paro loko*, (5) *natthi mātā*, (6) *natthi pitā*, (9) *natthi sattā opapātikā*, (10) *natthi loke samaṇabrāhmaṇā sammaggatā sammāpaṭipannā ye imaṅca lokam paraṅca lokam sayam abhiññā sacchikatvā pavedentī*’]
- For explanations on (7)-(10), see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”
- In particular, *para loka* is where a human lives in between consecutive human births as a *gandhabba*; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\).](#)”

Niyata Micchā Diṭṭhi

6. What is *akusala* is to hold “*niyata micchā diṭṭhi*” or “established wrong views,” i.e., one is not even prepared to consider, say, that there is a rebirth process. Thus if one has **unwavering** doubts about any one of the ten categories in the above paragraph, then one has **established** wrong views (*niyata micchā diṭṭhi*). Such wrong views can then lead to actions with *kamma vipāka* responsible for birth in the *apāyā*.

- The critical point is that when one has established wrong views, one looks at the world differently without realizing that there are consequences for one’s actions. One would not be aware of that without a Buddha explaining the true nature of the world. That includes the validity of the rebirth process, life in other realms, uncountable number of planetary systems like the Earth, etc.
- As scientists are finding out, there are many things in nature that we do not experience/understand. For example, scientists can only account for 4% of the mass of the universe; they cannot account for the rest (Google “dark matter” or “dark energy”). Thus one needs to keep an open mind and learn more Dhamma to see whether all these make sense.

7. **The only *akusala* completely removed by a *Sotāpanna* is the *micchā diṭṭhi*; see, “[What is the only Akusala Removed by a Sotāpanna?](#)”**

- As explained there, an unimaginably huge amount of defilement is removed at the *Sotāpanna* stage, just via getting rid of *micchā diṭṭhi*, mainly through the comprehension of *anicca*, *dukkha*, *anatta*.

Only a Buddha Knows All About This World

8. A lot of you may be thinking “How do I know all this is true? Is there any evidence for the existence of *rūpa/arūpa lokā*, *apāyā* (hell), or spontaneous birth? ”

- There are a lot of things we do not know about “this world.” We cannot rely on just science to verify/confirm these. Only within the last 100 years or so that science has accepted that our world is bigger than a few galaxies (now science has confirmed that there are billions of galaxies). Whereas the Buddha stated that *cakkavāla* (star systems or planetary systems) come into existence all the time, science has confirmed that only within the past 100 years; see, “[Dhamma and Science – Introduction](#).”
- Furthermore, the newest findings (yet unconfirmed) in string theory indicate that we live in an 11-dimension world, not the 4-dimension world that we experience. For a look at different dimensions, see, “[Consciousness Dependence on Number of Dimensions](#).” Thus, more of Buddha’s teachings will be confirmed with time.

9. It is easy to see that all immoral deeds start as *mano saṅkhāra* (bad thoughts) in the mind. Any of the *vacī saṅkhāra* (speech) or *kāya saṅkhāra* (bodily actions) are done with greed, hate, or not knowing the true nature of the world (ignorance). In particular, the basis for moral behavior comes out of the correct world view. Let us examine this below:

- The fact that there is no discernible beginning to conscious-life (see, “[Samsāric Time Scale, Buddhist Cosmology, and the Big Bang Theory](#)”) means all of us have been going through this rebirth process for an unimaginably long time. Thus we have been born in most of the 31 realms of existence. Not only that, we have been born innumerable times in EACH of those realms (except the realm that is reserved for the *Anāgāmīs*).
- The above fact means each sentient being had been related to any other sentient being at some point in this long *saṃsāra* (rebirth process). **The Buddha said, “it is difficult to find ANY sentient being that was not your father, mother, or a sibling at some point in this long saṃsāra.”** Infinity is a concept that is hard to grasp; see, “[Infinity – How Big Is It?](#)”
- An interesting book that talks about such hard to grasp ideas (in science) involving infinity is, “The Beginning of Infinity: Explanations That Transform the World” by David Deutsch.
- Therefore, not only us humans, but ALL sentient beings, are connected/related to each other. This is why it is wrong to kill any living being, steal from anyone, verbally abuse anyone, etc. **Those are the foundation of morality.** This is WHY it is not good to do any of the ten immoral acts.

Intention is An Important Factor

1. The Buddha said, “*Cetanāhaṃ bhikkhave kammaṃ vadami,*” i.e., “*Bhikkhus, I say that kamma is intention involved.*” We always need to look at the intention to pinpoint whether or what kind of *kamma* was committed.

- Let us take an example: if someone shoots a dog that is attacking a child, one’s intention here is to save the child. On the other hand, if someone is shooting a dog for “target practice”, then there is no excuse. The life of a human is million-fold more precious than that of an animal; see, “[How to Evaluate Weights of Different Kamma](#).”
- Sometimes it is not possible to judge the *kammic* consequences just by looking at the particular act. Only the person committing the act will know whether it is a good or bad intention. Thus normally it is not wise to judge other people’s actions.
- If it is a *mano saṅkhāra* (bad thoughts), the only person who even knows about that is the one who is committing it.

2. In many cases, it is possible for others to “see” when one is committing *vacī* or *kāya saṅkhāra*. But not always. Disciplinary actions against a child by a parent may appear to be *kāya saṅkhāra* (spanking) or *vacī saṅkhāra* (verbal threats), but the parent is likely to have good intentions for the child in most cases.

Also, in many cases, it is not possible for any person to advise another on what to do when conflicting issues are involved. Is it OK to steal some food to feed one's own kids when they are crying in hunger? Is it OK to spank a child when the child is misbehaving? Only the parent can make that decision based on the circumstances.

Also see, "[What is Intention in Kamma?](#)." This post has been updated on February 21, 2018, and provides a simple two-step process to evaluate a given situation.

Relative Weights of *Kamma*

1. **One critical problem many people have is that they try hard to avoid actions with relatively small *kammic* consequences, while unknowingly doing things that have stronger *kammic* consequences. Let us take an example: Suppose we have a large tank of water which is losing water due to many holes at the bottom. Some holes are pinholes, some are a little larger, and there are a few holes that are big and losing water fast. Obviously, one would want to plug those large holes first. Then one would fix the medium-size holes and those pin holes are the last to be fixed.**

- Relative weights of ten immoral acts are not easy to quantify. However, we can clearly see that *kāya saṅkhāra* have higher "*kammic* potential" compared to *vacī saṅkhāra* if they are directed to the same living being; hurting someone physically is worse than verbal abuse.
- Another example: Say someone has hateful thoughts of a particular person all day long. That could be worse than just saying something to that person and "getting the load off the mind." However, even that is not necessary. The best solution is to develop *mettā* (loving-kindness) towards that person and get rid of those hateful thoughts. We always need to realize that we all are trapped in this constant struggle to find happiness in a world that is not set up to provide lasting happiness; see, "[Anicca, Dukkha, Anatta - Wrong Interpretations.](#)"

2. *Kammic* consequences also depend strongly on the "consciousness level" of the living being against whom the immoral act was committed.

- Killing a human will have far stronger consequences compared to killing an animal. This is discussed in the essay, "[How to Evaluate Weights of Different Kamma.](#)"

3. *Dasa akusala* and relative weights of different *kamma* are discussed in the following *desanā*:

[WebLink: Download "Ten Immoral Actions \(Dasa Akusala\)"](#)

- This *desanā* is in the post, "[Root of All Suffering – Ten Immoral Actions,](#)" where you can find the relevant posts mentioned.

Next, "[Puñña Kamma – Dāna, Sīla, Bhāvanā](#)",

6.1.4.3 Puñña Kamma – Dāna, Sīla, Bhāvanā

Revised March 24, 2016; September 14, 2017; major revision with title change April 27, 2018

1. Here we discuss the 10 types of *puñña kamma* (doing meritorious deeds). These can be divided into three groups: *dāna, sīla, bhāvanā*.

- Those are essential for progress in one's mundane eightfold path.
- One must cultivate the mundane path and remove the 10 types of *micchā diṭṭhi* before being able to comprehend the *Tilakkhaṇa* and start on the Noble Eightfold Path; see, "[Buddha Dhamma – In a Chart.](#)"

2. The differences between *kusala/akusala kamma* and *puñña/pāpa kamma* were discussed in a previous post: "[Kusala and Akusala Kamma, Puñña and Pāpa Kamma](#)."

- The ten types of *akusala kamma* were discussed in "[Ten Immoral Actions \(Dasa Akusala\)](#)." The ten types of *kusala kamma* are just the avoidance of *akusala kamma*.

3. As discussed in the above two posts, *kusala kamma* (getting rid of *raga, dosa, moha*) eventually lead to *Nibbāna*. However, *puñña kamma* (meritorious actions) help set the background to attain *Nibbāna*, and thus are also critically important.

- One needs to do both. However, the ability do *kusala kamma* is vastly improved when one starts comprehending *Tilakkhaṇa*; see, "[Anicca, Dukkha, Anatta](#)."
- One not only will be born in "good realms" with *puñña kamma*, but also one will be born with good longevity, health, comfort, and wealth (*ayu, vanna, sapa, bala*) to be able to comprehend *Tilakkhaṇa* and pursue *Nibbāna* with ease.

These ten meritorious actions (*puñña kamma*) are divided into three groups: *dāna* (generosity), *sīla* (moral behavior), and *bhāvanā* (meditation).

Puñña Kamma – Dāna, Sīla, Bhāvanā

***Dāna* (Generosity) group includes:**

1. *Dāna* (giving)
2. Transfer of merits to others (*pattidāna*)
3. Rejoicing (accepting or participating) in other's merits (*pattanumodana*)

***Sīla* (Morality) group includes:**

1. *Sīla* (morality), i.e., observing 5, 8, or 10 precepts
2. Reverence to elders and holy persons (*apacayana*)
3. Pay homage to religious places, take care of such places, etc (*veyyavacca*)

***Bhāvanā* (meditation) group includes:**

1. Meditation (*bhāvanā*)
2. Listening to Dhamma discourses (*Dhamma savana*)
3. Teaching Dhamma (*Dhamma desanā*)
4. Correcting one's wrong views, especially on *kamma* (*diṭṭhijukamma*)

On the last one, see, "[What is Kamma? – Is Everything Determined by Kamma?](#)."

6. Therefore, *dāna, sīla, bhāvanā* constitute the "base" of a life of a moral person.

- The "*dāna* group" helps one overcome one's greed (*lobha*).
- The "*sīla* group" helps removing hate (*dosa*) from one's mind.
- The "*bhāvanā* group" helps removing ignorance (*moha*) from the mind by learning Dhamma and getting rid of the wrong views (*micchā diṭṭhi*).

7. Since *Nibbāna* is removing greed, hate, and ignorance from one's mind, it is clear how these ten actions pave the way for *Nibbāna*. As one engages in these activities more and more, the "cooling down" or "*niveema*" can be experienced; see, "[How to Taste Nibbāna](#)."

- In the *sīla* group of activities, one starts by observing the five precepts, i.e., abstaining from killing living beings intentionally, stealing, sexual misconduct, lying, and getting intoxicated. This last one is normally taken to be intoxication with alcohol or drugs, but it also includes intoxication with money, beauty, power, position, etc.

8. It is always a good idea to keep in mind why these are to be moral actions: Because they help purify one's mind:

- Most people, in order to avoid breaking the five precepts abstain from drinking, but do not hesitate to show off their wealth, beauty, power, etc.; they are “drunk” too.
- Others pay a lot of attention not to lie, but do not hesitate to gossip, slander, or verbally abuse others.
- Also one should realize that a human life has much more weight compared to an animal life; see, “[How to Evaluate Weights of Different Kamma.](#)”
- Most of all, the tenth one is the most potent one that most people neglect to consider. Having established wrong views (*niyata micchā diṭṭhi*) is a very potent immoral action, and thus one needs to understand this clearly; see, “[Ten Immoral Actions \(Dasa Akusala\).](#)”

9. This is why learning Dhamma has a prominent place in the *bhāvanā* section. As one learns the deeper concepts of Dhamma gradually, wrong views are gradually removed. It is not enough to just say, “I will not have these views anymore”, even though making such a determination is good. The mind needs to see evidence to get rid of the wrong views it has. The feeling of the *nirāmisa sukha* when one starts on the Path will make it easier to remove wrong views; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#)”

The High Value of *Puñña Kamma* Done with Understanding

1. If one performs a wholesome deed with the knowledge of *kamma* and its effects and also of *anicca*, *dukkha*, *anatta*, then the wholesome roots will be associated with understanding. The volition is accompanied with all three wholesome roots: non-greed, non-hate, non-delusion. So three-root (*tīhetuka* or “*tī*” + “*hetu*”) wholesome *kamma* is acquired.

- On the other hand, if one performs a wholesome deed without any knowledge of *Kamma* and its effects or the basic unfruitful nature of this world, he is doing it without any understanding. Then the volition will not be accompanied by non-delusion, but only the two roots of non-greed and non-hate. So two-root (*dvīhetuka* = “*dvī*” + “*hetu*”) *kamma* is acquired. These are less meritorious compared to the three-root (*tīhetuka*) *kamma*.

2. A detailed discussion can be found at, “[A Simple Way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\).](#)” We will discuss these effects in detail in the Abhidhamma section too.

- But it is important to realize that the strength of the *kamma vipāka* for a given meritorious act will vary depending on the level of understanding. For example, while just writing check for charity will have its results, much more stronger results will be gained by someone who spends the same amount of money but involves more with giving by thinking about it before and afterwards, and “getting involved” in the process, for example preparing meals for the hungry etc.

3. To acquire this type of superior *kamma*, one should think of the moral action in advance and feel glad for having the chance to do it. Again after performing the action, one should reflect on it and be full of joy thinking about the good aspects of the deed. Furthermore, one can gain more merits by doing a *puñña anumodana* or *pattidana* (transfer of merits to others, #2 *kusala kamma* above) because this amounts to paying off *sansāric* debts; see, “[Kamma, Debt, and Meditation.](#)”

- On the other hand, if one feels lazy or reluctant or jealous or stingy before a moral action such as giving charity, and regrets doing the moral action afterwards, then the moral volition of giving to charity will be surrounded by other unwholesome intentions (*cetana*) and consequently its potentiality will be weakened. The wholesome *kamma* acquired in this case is inferior.

Thus is the importance of learning Dhamma in order to grasp such details and to realize the full benefits one's meritorious actions. Plus, it is interesting to see how all these details "fit into the big picture"; see, "[The Importance of Purifying the Mind.](#)"

Next, "[The Five Precepts – What the Buddha Meant by Them](#)", ...

6.1.4.4 The Five Precepts – What the Buddha Meant by Them

1. The five or eight precepts, of course with different meanings, were there before the Buddha. It is said that on the day the future Buddha, Prince Siddhartha, was born his mother had observed the eight precepts.

- The ancient kings banned the so-called five immoral acts in order to maintain a peaceful society. These were: killing (of probably other people), stealing, sexual misbehavior, lying, and getting intoxicated.
- The *vedic Brahmins* expanded these to include killing of animals. They also expanded to eight precepts which enabled them to attain mundane *jhānā*.
- By the way, except those referring to the God, the Ten Commandments also identify many of these "immoral acts."

2. Just like he did with many existing terminology at that time (*kamma*, the four great elements of *pathavi*, *āpo*, *tejo*, *vāyo*, etc), **the Buddha adopted these precepts, but re-defined what he meant by them.**

- In Buddha Dhamma, all possible immoral acts are included in the *dasa akusala*; see, "[Ten Immoral Actions \(Dasa Akusala\).](#)"
- Therefore, all those are in the five precepts too. When one truly understands Buddha Dhamma, i.e., the nature of this world as embodied in *anicca*, *dukkha*, *anatta*, one sees that these precepts come out naturally from the nature's laws. At that stage, one's mind automatically rejects all *dasa akusala* and thus the five precepts are automatically obeyed; one does not even have to think about them.

3. **For one embarking on the Path prescribed by the Buddha, the conventional five precepts (killing other beings intentionally, stealing, sexual misconduct, lying, and intoxication) are a good start.**

- Furthermore, one needs to recite the five precepts with the understanding that it is not a promise but one's intention is to do the utmost (otherwise the act will itself be a *musāvāda* or a lie). **This is because anyone other than an Arahant is bound to break some of them per their true meanings.**
- But as one proceeds on the Path and experiences the benefits (peace of mind or the early stages of *nirāmisā sukha*), one should try to expand the scope of those five precepts from the conventional meanings. This can be done systematically: when one truly understand the meanings of *anicca*, *dukkha*, *anatta* AND that our existence does not end with this life, one begins to have a more deeper insight.
- **When that happens, the precepts are not followed as a ritual or a set of rules. Rather, one realizes that there is no other moral way to live.**

4. For example, when one realizes that one has been an animal or worse in previous lives, one stops thinking of animals as "mere things" that exist for our pleasure. Furthermore, understanding the laws of *kamma* i.e., taking any life has consequences will make one re-think of just wantonly taking another life.

- But some people go to extremes. They start treating an animal life on the same level as a human life, and then freak out when they have to clear a spider web in cleaning their house. It is inevitable that we will unintentionally kill many small creatures while walking on the ground or even boiling some water. So, one need to get a sense of the relative weights of *kamma*; see, "[How to Evaluate Weights of Different Kamma?](#)"
- What needs to be avoided first is those "pleasure killings" like fishing, hunting, etc.

5. Stealing is not merely acts like shop lifting, but also includes gains by immoral means. In order to live a functional society, we have to do transactions with each other. We just need to make sure we do not take advantage of another person and becoming “morally indebted” to that person.

- *Vinaya* rules (“*vi*” + “*naya*” where “*naya*” is debt and *vinaya* is becoming free debts) in Buddha Dhamma setup for the monks show how to live their lives by properly paying back for the sustenance they get from the lay people.
- When the Buddha said to test any act or concept with “*Dhamma* and *Vinaya*,” he meant that the concept needs to be consistent with *paṭicca samuppāda* (cause and effect) and also consistent with “*rāga vinaya*, *dosa vinaya*, and *moha vinaya*,” i.e., not getting into debt via greed, hate, and ignorance.
- If we gain from someone by unjust means, we will have to pay that debt if not in this life, but in future lives; see, “[Kamma, Debt, and Meditation](#).”

6. The third precept, “*kamesu miccacara veramani sikkha padan samadiyamī*”, is commonly translated as “avoiding sexual misconduct.” But “*kāma*” is not just sexual activity; “*kāma*” includes all sense pleasures that are available in the *kāma loka*. And “*miccacara*” (pronounced “*michchāchāra*”) means “misbehavior” in the sense of “going to extremes.” Thus the real meaning is to not to over-indulge in sense pleasures.

- In fact, excessive drinking, gambling etc are included in this precept.
- We have to use all our five physical senses to live in this world. But we need to have restraints so that we do not abuse them to the extent that we will hurt ourselves or others. Even a simple example of over-eating leads to health problems, which will hurt not only oneself but the whole family.
- **The first three precepts include all three *akusala kamma* done with the body.**

7. The fourth precept on *musāvāda* (lying) in Buddha Dhamma includes all abuses done by speech, including harsh speech, slandering, and gossip which WILL harm oneself and others.

- **Thus the fourth precept encompasses all four *akusala kamma* done with speech.**

8. The fifth is a big one that is almost always misinterpreted. If it included just drinking, it would have been, “*surameraya veramani*.....” That was probably the original verse.

But in Buddha Dhamma it is, “*surameraya majjapama dattana veramani*.....”

In the word, “*sura*”, “*ra*” means “*rāga*” or excess greed, thus “*sura*” means with excess greed; “*meraya*” is delicious. “*Majja*” means intoxication and “*majjapama*” is getting delayed via intoxication. “*Dattana*” means that mindset. Of course, “*veramani sikkha padan samadiyamī*” means “I make a determination to avoid doing such things willingly.”

Thus it should be interpreted as, “avoid the mindset of getting intoxicated by alcohol, drugs, money, power, etc”, anything that can make you “fall behind”:

- All this happen in one’s mind. **One gets intoxicated with greedy thoughts and when one does not get one’s way with them, one generates hate.** And all this happens because one does not understand the true nature of this world, i.e., one has *micchā diṭṭhi* or wrong views.
- To put it another way, one should be careful not to get intoxicated by the five sense inputs or “*kāma āsvada*”; see, “[What is “Kāma”? – It is not Sex.](#)”
- One believes that either, (i) one’s actions will not have future consequences, and (ii) therefore, one just needs to think about how to get what one wants (because there are so many tempting things out there to be had!); one does not realize all that is temporary.
- **Thus in order to really obey the fifth precept one needs to start working on one’s mind. All three *akusala kamma* done with mind are included in this fifth precept; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”**

9. The following scenario is given as an example to illustrate the futility of blindly following precepts: There are many people who live their entire lives without intentionally killing, stealing, engaging in sexual misconduct, lying, or getting intoxicated. But their minds are burdened with greed, hate, or ignorance. Depending on the state of their minds, they may not even get a human birth next time around.

- There is this story about an old woman who followed those conventional five precepts to the letter. Even though she was poor, she was greedy and kept all her money under her pillow. It is said that she was reborn a louse (plural lice) on that pillow, because of her attachment to that money in the pillow.
- And if keeping those precepts will take one to *Nibbāna*, then a cow or a horse living in isolation will be certain to attain *Nibbāna*. They do not kill, steal, lie, or get intoxicated, and if their owners do not have any other animal of that kind, then there is no chance of sexually misbehaving either.
- It is all about purifying one's mind. A pure mind gains wisdom, and will not allow any harmful action by speech or by deed. Such a mind is not burdened, but has "cooled down"; that is the happiness of *Nibbāna*.

10. Another good example (which also clarifies an aspect of *micchā diṭṭhi*) is described in the *Mahā Kammavibhanga sutta* in *Majjima Nikāya*.

- A brahmin by the name of Nigantanathaputta in the days of the Buddha was preaching that everything happens due to *kamma*. He advised his followers to refrain from breaking the five precepts, because that would INEVITABLY lead to the birth in the *apāyā*. He also preached that if someone did not break even a single precept, that person WILL NOT be born in the *apāyā* in the next birth.
- The Buddha said that both were wrong. We have done both good and bad *kamma* in our previous lives and the next birth will be determined by the relative strengths of those and what we do in this life. For example, Aṅgulimāla, who killed nearly 1000 people, was able to attain the *Arahantship* in a week. And Buddha gave examples of those lived a perfectly moral life, but were born in the *apāyā*, because they had bad *kamma vipāka* from previous lives.
- Furthermore, the Buddha said that if someone dies with such misconceptions, that is *micchā diṭṭhi* and one WILL BE born in the *apāyā* just BECAUSE OF that *micchā diṭṭhi*. It is critically important to figure out this point. I meet many people (even Buddhists) who say, "I have not done anything bad to anyone; therefore, I do not think anything bad will happen to me." That is a *micchā diṭṭhi*. The only way to guarantee that one will be exempt from birth in the *apāyā* is to attain the *Sotāpanna* stage of *Nibbāna*.

Next, "[What is Kamma? – Is Everything Determined by Kamma?](#)",

6.1.4.5 **What is Kamma? – Is Everything Determined by Kamma?**

Revised January 28, 2020

Things Happen Due to Causes and Conditions

1. A key concept in Buddha Dhamma is cause and effect. Nothing happens without a cause or a reason.
 - **But even if root causes are there, we can stop them from bringing their results by blocking the CONDITIONS for them to come to fruition (a seed has the potential to bring about a tree, but for that to happen the seed must be given a fertile soil, water, and sunlight).**
 - That is explained with simple terms in, "[Working of Kammā – Critical Role of Conditions.](#)"
 - That is why in *Paṭicca Samuppāda*, "*paccayā*" does NOT mean "it will happen"; see, "[What Does "Paccayā" Mean in Paticca Samuppāda?](#)"

Nature's Laws – *Niyāma Dhamma*

2. Nature enforces this cause and effect via five primary unshakable laws (*niyāma dhamma* or sometimes called *dhammatā*.) The correct word is *niyama* (meaning “fixed,”) but it is commonly called *niyāma*.

- They are *kamma niyama*, *citta niyama*, *utu niyama*, *bīja* (or *bīja*), and *dhamma niyama*.
- We will discuss these in detail in another post. But the point here is that *kamma* is NOT deterministic, other than for *ānantariya kamma* (killing one’s parents or an *Arahant*, injuring a Buddha, etc.) Everything plays out due to a complex process involving all five *niyama dhamma*.

3. First of all, there are actions by individuals that lead to harmful consequences right away. If one jumps from a tall building, one is bound to get hurt or worse. That is a result of ***dhamma niyama*** (law of gravitation is a *dhamma niyama*) which is cause and effect. *Paṭicca Samuppāda* is the ultimate *dhamma niyama*. It explains **how and under what conditions** *kamma vipāka* produces results.

- When something appears in this world, it does not stay the same. It change in unexpected ways (*viparināma*) and eventually destroyed. Thus anything in the world (a *saṅkhata* (*sankata* in Sinhala)) is subjected to the ***utu niyama***. Whatever results that *kamma vipāka* may bring in, they will also eventually go away.
- ***Bīja*** (or *bīja*) ***niyama*** is not relevant to the workings of the plant seeds, as some books explain. It dictates how *kamma bīja* (seeds) lead to their fruits (*vipāka*). A “*puñña kamma seed*” or a “good seed” will always produce excellent results, and a “*pāpa kamma seed*” or a “bad seed” will generate a bad result. A *Sotāpanna* would have made all those *kamma* seeds, that make it possible to have rebirths in the *apāyā*, to be ineffective. Thus a *Sotāpanna* will NEVER be born in the *apāyā*.
- ***Citta niyama*** involves laws associated with the working of the complex mind, and that can affect *kamma vipāka* in a significant way. For example, by purifying the mind, one can attain the *Sotāpanna* stage and thus make INEFFECTIVE all those *kamma* seeds that could lead to birth in the *apāyā*.
- ***Kamma vipāka*** are the root causes for all that happens in this world, **but their effects can be altered and even stopped** by exploiting the other laws of nature. That is what a Buddha discovers when he attains Enlightenment. All *kamma vipāka* are made ineffective at reaching full *Nibbāna* or the *Arahanthood*.

The main point here is that most bad consequences can be avoided by understanding Dhamma, living a moral life, and being mindful (*yoniso manasikāra*).

We Have Done Many Good and Bad *Kamma* in Our Past Lives

4. **In this beginning-less long journey of rebirths called *saṃsāra* (or *saṃsāra*), each of us has done an uncountable number of both good and bad things.** When we do a good or an immoral act, the *kammic* energy associated with that act gives rise to a seed, called a *kamma* seed. It is energy (not a material thing) that stays with our minds until it gets a chance to come to fruition. An apple seed will not germinate and grow into an apple tree until the right conditions (soil, water, sunlight, etc.) appear. In the same way, all our *kamma* seeds lie in waiting for the right conditions to appear. If we allow such “conditions,” we will have to experience the result of that *kamma* or *kamma vipāka* at that time.

- Our *kamma* seeds (*kamma bīja*) are subjected to the *bīja niyama* mentioned above. In either case, a seed gives rise to a plant or a *vipāka* **according to the type of seed**. Someone, who did something terrible that only an animal would do, will pay for that may be with a birth in the animal realm; someone who did an act of generosity may get rewarded accordingly.

Conditions Must be Right to Bring *Vipāka* of Past *Kamma*

5. We can keep an apple seed (for example) in a dry, cool place for a long time. Some seeds have been kept intact for thousands of years. It will not germinate until we plant it in fertile soil and provide water and sunlight. In the same way, a *kamma* seed (good or bad) can lay dormant for a long time until conditions

becomes right for it to germinate. We all have accumulated numerous *kamma* seeds over these repeated rebirths. **What we need to do is to provide conditions for the good *kamma* seeds to germinate and NOT allow conditions for bad ones to germinate.**

- Thus *kamma* is the act, AND *kamma vipāka* is the result of that act. **But since the right conditions need to appear for a *kamma* seed to “germinate,” the *vipāka* may not come until later in the same life, next life, or even many lives later.**
- That is why it is not easy for people to see that their actions will have consequences. *Kamma niyama* is not the only law that is in effect; there are four more as mentioned above, and they all work together. It is a very intricate network. In particular, because there is a *citta niyama* (principle of thoughts), we also have some control over these *kamma vipāka*. **We cannot change any of the five *niyama*, but we can OVERCOME a cause (a power) due to a *niyama* by building an opposing force.**

Being Aware of the Conditions Is Key

6. We can take many steps to suppress the bad *kamma vipāka* coming to fruition and ALSO to get good *kamma vipāka* to come to fruition. **As emphasized above, we all have an unlimited number of both good and bad *kamma vipāka* waiting to bear fruit. Rather than giving in to bad *vipāka* and saying “what to do, this is my *kamma*,” we can find ways to suppress those. And rather than saying “I must not have done any good *kamma*, and this is my fate,” we can probe and locate those hidden good *kamma* seeds and cultivate them.** Let us consider some examples:

- If one does not take care of one's physical body, it may become fertile ground for many bad *kamma vipāka* to come to fruition. If we eat healthily and exercise, the body will not be vulnerable to ailments or injuries.
- The brain needs good food and exercise too. A healthy body and mind exercises such as solving problems, even word puzzles, keep the brain in good condition. But the best is meditation, and *vipassanā* or insight meditation is better than Samatha meditation. For example, even if one's family has a history of Alzheimer's disease, one can possibly avoid getting by keeping the brain active and healthy.

Outcome Can be Changed – Environment And Associations Are Critical

7. One may be born to poverty because of a past *kamma vipāka* that came to fruition at the death of the previous life. But this is NOT a reason to give up. Any person has an unlimited number of good *kamma vipāka* waiting to come to fruition. Indeed, birth to a poor family did not set up optimum conditions. But one has control over the *citta niyama* mentioned at the beginning (see, “[The Law of Attraction, Habits \(Gathi\), and Cravings \(Āsavas\)](#)”). One could use one's mind to overcome this condition and cultivate the background to achieve success.

- That is why the environment is critical to anyone. One needs to surround oneself with optimistic, moral people, who will help cultivate the good qualities that lie dormant. At the same time, one needs to avoid “bad company” that could pull one in the wrong directions. It is not that any person is intrinsically good or bad. Rather, at any given phase of life or even through most of this life, some people may be displaying their “bad habits” that have come to the forefront. One will be affected negatively by associating such people.
- The environment is CRITICAL for young children starting from the time of conception. Even the fetus in the womb is affected by the environment. For example a loving mother and father showing affection to each other positively affects the baby. When the mother is being abused by the father it will be a negative effect.
- It is critical to have a nurturing environment within the family, and also in the school. A significant part of an individual's character is molded by the first 10-15 years of life. That is the time they can acquire habits and once established, it will take a lot of effort to change them. The parents must instill good habits: moral behavior, eating well, exercise, associate with good friends, avoid bad friends, study well, etc.

“Wearing Out” Some *Kamma* Seeds

8. It is also possible to remove many of one’s bad *kamma* seeds.

- When we acquire a “bad *kamma* seed,” we get indebted to another being. In the same way that one can be debt-free by paying off existing loans, one can “payback” old debts accumulated in the cycle of rebirths. That can be done by “transferring merits” when one does good deeds, and also by doing the *Ariya Mettā Bhāvanā*. See, “[Transfer of Merits \(Pattidana\)- How Does that Happen?](#)” and “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).”

Laws of *Kamma* Are Complex

9. The world is VERY complicated. Because all those five *niyama* are acting simultaneously to enforce the “cause and effect,” it is not possible to sort through each and every event in isolation and say, “this is THE reason for this particular event.” There could be a dominant cause in some cases, but most times, it is a combination of several, and most those are from the past.

- The main thing we have remember is that each action by us will have consequences (law of *kamma*). There is nowhere to hide. Even if we can fool the law enforcement sometimes, the nature cannot be fooled.
- We need to make a concerted effort to get rid of bad habits and to acquire and cultivate good habits. A habit can snowball into a *saṅsāric* habit, good or bad (related to law of *citta* and law of *bīja*). The environment is an essential factor in getting rid of bad habits and acquiring/cultivating good habits.
- We need to be constantly aware that there are zillions of *kamma bīja* (good and bad) waiting to be germinated. We should not provide conditions for “bad seeds” to grow. Thus we should avoid bad company, bad environment, etc. We must also provide conditions for “good seeds” to germinate (i.e., study well, provide the necessary conditions to get a promotion or a job, and learn and practice Dhamma). I am sure you can apply these principles to your own life; each one is different.
- Then some things happen due to random events: floods, hurricanes, earthquakes, etc. These come under *utu niyama* or circumstances that occur due to physical causes in the environment. When those happen, thousands of apparently “unconnected” people may be affected the same way. Again, this is partly due to the incredible number of *kamma* we have accumulated in this beginning-less rebirth process. There is ALWAYS something from the deep past that is going to MATCH any circumstance.

Nibbāna Attained via Removing *Upādāna* (and *Taṇhā*)

10. Finally, there is a misconception out there that one needs to get rid of all *kamma* (more accurately *kamma vipāka*) to attain *Nibbāna*. That is entirely false. One reaches *Nibbāna* via removing deep-seated cravings, called *āsavā*; see, “[The Way to Nibbāna – Removal of Āsavas](#).” More details at “[Difference Between Tanhā and Upādāna](#).”

- Another way to say the same thing is to say one needs to remove *lobha*, *dosa*, and *moha* or the defilements in mind.
- However, one could remove most of one’s bad *kamma vipāka* via cultivating *Ariya Mettā Bhāvanā*; see, #5 above.

Some of the main concepts are discussed further in the “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#),” “[Habits and Goals](#),” “[Samsāric Habits and Āsavas](#),” “[The Way to Nibbāna – Removal of Āsavas](#),” and other related posts.

Next, “[Ten Immoral Actions \(Dasa Akusala\)](#)”, \

6.1.4.6 How to Evaluate Weights of Different Kamma

Revised February 21, 2018

In the previous essay, "[Ten Immoral Acts \(Dasa Akusala\)](#)," we looked at the ten different types of acts that will have bad *kammic* consequences.

1. First of all, the most potent of all is *micchā diṭṭhi*. **The only *akusala* completely removed by a *Sotāpanna* is the *micchā diṭṭhi* and in doing that he/she removes an unimaginably huge amount of defilements;** see, "[What is the only Akusala Removed by a Sotāpanna?](#)."

- One critical problem many people have is that they try hard to avoid actions with relatively small *kammic* consequences, while unknowingly doing things that have stronger *kammic* consequences. Let us take an example: Suppose we have a large tank of water which is losing water due to many holes at the bottom. Some holes are pin holes, some are a little larger, and there are a few holes that are big and losing water fast. Obviously, one would want to plug those large holes first. Then one would fix the medium-size holes and those pin holes are the last to be fixed.

2. We can see that many *akusala* are with "acts" that are directed towards other beings, whether it is done bodily, verbally, or just by thought. In principle, a being could be in any one of the 31 realms (see, "[The Grand Unified Theory of Dhamma](#)").

3. **The severity of the consequence of any misdeed (ie., *kamma vipāka*) involving another living being depends strongly on the "level of existence" of the living being from lowest level of realm 1 (*niraya*) to the highest at the 31st realm (fourth *arūpa loka*); Any "*Ariya*" or a Noble Person (who has attained one of the four stages of *Nibbāna*), are at the highest levels regardless of the realm. A hurtful word against an *Ariya* carries thousand-fold bad *kamma vipāka* compared to killing thousand ants.**

- See, "[What is Intention in Kamma?](#)" This post has been updated on February 21, 2018, and provides a simple two-step process to evaluate a given situation.

4. It is difficult to identify whether a given human is just an immoral human or an *Arahant* by just looking at that person. Human realm is unique in many ways.

Thus, we can try to sort out the *kammic* consequences of a given immoral act on the "level of consciousness" of the being that act was directed to:

- **Regardless of the realm**, the highest four levels are *Arahant*, *Anāgāmī*, *Sakadāgāmī*, and *Sotāpanna*. Humans can attain all four levels.
- Out of the 31 realms we can directly experience only the human and animal realms. Thus, normally we need only to evaluate how our actions affect other humans AND animals.
- Since any animal is inferior to any human, we need to pay special attention to how we interact with other human beings.
- In particular, it is not possible to judge whether a given human has attained a *Nibbānic* state. Even by directing hurtful words to an *Ariya* (one who has attained at least the *Sotāpanna* stage), one could be acquiring thousand-fold more bad *kammic* potential compared to doing the same to a normal human.
- In some cases, even the person in question may not know that he/she is a *Sotāpanna*. There may be "*jāti Sotāpannas*," i.e., those who had attained the *Sotāpanna* stage in a previous life and thus born as a *Sotāpanna*, and may not realize it.
- Thus we need to be very careful with dealing with fellow humans in particular.

5. When we say killing is immoral it is implicit that killing is taking the life of any living being. But killing a human has a *kammic* consequence that is much higher compared to killing an animal. Killing a *Sotāpanna* has a even more drastic consequences, *Sakadāgāmī* even higher, *Anāgāmī* even higher, and killing an

Arahant will have the highest, and is of the strongest kind at par with killing a parent (an *anantariya kamma* that will cause the very next birth in an *apāya*).

6. Similarly other immoral acts will have consequences depending on the “consciousness level” of the living being. It is not a matter of one particular living being is “better” than another.

- Rather it is a matter of how valuable that “level” is, and how difficult it is to attain that “level.” One has been born a human because of the merits one has acquired in previous lives; it is extremely difficult to get a human birth as we will discuss in a separate post; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)”
- One becomes a *Sotāpanna* by cultivating moral behavior and by purifying one’s mind; thus a life of a *Sotāpanna* is much more valuable compared to a normal human being.

7. Even among humans who have not attained any *Nibbānic* state, there are “different levels of consciousness”: One who has more wisdom (*paññā*) is at a higher level than one with less wisdom.

- Here wisdom does not mean book knowledge, but knowledge of Dhamma; understanding of the true nature of “this world”, or *anicca, dukkha, anatta*. Thus the possibility of that person attaining a *Nibbānic* stage is more likely, compared to one who has less wisdom.

8. Another important thing is not to worry about things that one does not have any control over. Everyday, we kill so many small animals unintentionally: stepping on them while walking, cleaning the yard, cleaning the house, and even while boiling water.

- We need to remember that “*kamma* is intention.” We are not boiling water to kill any unseen life forms, rather we boil water to make sure we do not get sick by drinking contaminated water.

9. It is not even possible to live “in this world” without harming other beings unintentionally, even though we may be aware that our acts may lead to the destruction of many life forms.

- Once a *bhikkhu* who had developed *abhiññā* powers was getting ready to drink a glass of water, and with his ability to “see” finer things saw that there were numerous microscopic beings in the water glass. He tried to filter them out, but they were too small. The Buddha then explained to him that it is not possible to live without doing things that are necessary to sustain one’s life.
- In another example, suppose one has a wound; if left alone it could lead to one’s death. Thus one needs to apply medication to the wound. However, that wound is infested with numerous microscopic living beings, and they will be killed by the medication.
- Walking on the ground (especially grass) kills many insects; but we cannot live our lives without going places. What matters is our INTENTION. When one is walking, there is no intention of killing living beings.

10. What we need to do is to be careful not to do any harm to even the smallest of the creatures with a hateful or greedy mind. It is the intention, or the state of the mind, that counts.

- There is this story about an old woman who was very careful about not breaking the five precepts. But she was extremely greedy; she was quite stingy, did not give much to charity, and kept all her money under her pillow. Because of that greed, she was born a *peta* (a hungry ghost).
- It is relatively easy to keep the five precepts. What is harder is to purify one’s mind of greedy, hateful, and ignorant thoughts. This is what needs to be accomplished in true “*ānāpānasati bhāvanā*”; see, “[7. What is Ānāpāna?](#)”
- Even though we may not be greedy or hateful in this life, we may have acquired such bad *kamma* in previous lives. This is why the Buddha said even if one lives morally in this life that does not guarantee a good rebirth unless one has attained the *Sotāpanna* stage of *Nibbāna*; see, “[Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire.](#)”

- Buddha Dhamma is all about the mind. **Purifying the mind is the key, not just to follow set rules. Just following precepts will not be enough.**

11. Finally, it is important to remember that hate is worse than greed. Excessive hateful actions lead to rebirth in the lowest realm, the *niraya*. Excess greed lead to rebirth mainly as *petas* (hungry ghosts).

- Mixture of hate and greed lead to rebirth in all four lowest realms, the *apāvā*. Even if one does not carry over the hateful or greedy thoughts to speech or bodily actions, they still count especially if one thinks about them most of the time.
- This is why it is important to develop good meditation habits; see, "[Bhāvanā \(Meditation\)](#)." A mind free of hate and greed becomes less agitated and peaceful; then it leads to wisdom (*paññā*).

More details on weights of different *kamma* at: [12. Key Factors to be Considered when "Meditating" for the Sotāpanna Stage](#). Also see, "[What is Kamma? – Is Everything Determined by Kamma?](#)."

6.1.4.7 Account of Aṅgulimāla – Many Insights to Buddha Dhamma

February 17, 2019; revised March 7, 2020

Introduction

1. Aṅgulimāla had killed 999 people but was able to attain the *Arahanthood* within a few weeks after meeting the Buddha. His life story can help us understand how and why even *vipāka* for such highly immoral deeds can be overcome.

- Even though the laws of *kamma* play an important role in Buddha Dhamma, one can overcome the consequences of such highly immoral actions. That is by comprehending the more fundamental principle of causality: **one can bypass all such *kamma vipāka* (all future suffering) by getting rid of *avijjā* and *taṇhā* (the root causes).**
- The following two posts also discuss *kamma* and *kamma vipāka*: "[What is Kamma? – Is Everything Determined by Kamma?](#)" and "[How to Evaluate Weights of Different Kamma.](#)"

2. I highly-recommend a good account of the life story of Aṅgulimāla here: "[WebLink: accesstoinsight.org: Aṅgulimāla – A Murderer's Road to Sainthood.](#)"

- Reading that account first will help with the discussion below.

Brief Summary of Angulimāla's Life

3. To summarize the critical points in the story of Aṅgulimāla:

- He was called Ahimsaka ("Harmless") as a boy and was an excellent student. He was the best in class at the premier learning institute of that day in Takkasīla (Taxila). His peers were jealous and tried to convince the teacher that Ahimsaka was plotting to take his job.
- The teacher finally believed those false accusations and came up with a way to get Ahimsaka killed. When Ahimsaka finished his studies and asked how he can pay for his education, the teacher said: "You must bring me a thousand human little fingers of the right hand."
- That is how Ahimsaka became a killer and came to be known as "Aṅgulimāla", because he started wearing some of those cut fingers in a garland around his neck.

4. Aṅgulimāla had killed 999 people and was about to kill his mother to get the last finger when the Buddha intervened.

- The quick-witted Aṅgulimāla was able to comprehend a few verses that the Buddha uttered and asked the Buddha to ordain him right there.
- Ven. Aṅgulimāla became an Arahant soon afterwards.
- Later on, the Buddha reminded Ven. Aṅgulimāla that he had now been “born” a *Āriya* (Noble Person), even though he had killed so many people when he was a murderer. This concept of changing “*bhava*” even during a given existence discussed below.

First Observation – Importance of *Gati* and Environment

5. The first thing we can see is that obedient and well-behaved Ahimsika became a murderer because of his teacher’s influence. **External influences (family, friends, etc.) can be a crucial factor in changing one’s *gati* (pronounced “gathi”) loosely translated as “character.”** (Note that Pāli words are written not in “standard English,” but with an adopted “*Tipitaka* English” convention. See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#)”)

- This is why parents must always be on the lookout on what kind of friends a child has. Friends can be a considerable influence on a child.
- This is also true for adults. One must get away from those who pull in wrong directions, and make new associations along “good directions.”
- *Gati* are discussed in many posts at this site. One can find a list of relevant posts by entering “*gati*” in the “Search” box on top right.

Second Observation – There is no “unchanging self”

6. **The second thing we can see is that there is no “unchanging self.”**

- Harmless Ahimsika became a violent murderer in Aṅgulimāla and killed almost 1000 people.
- Then that violent Aṅgulimāla the murderer, became a Noble Person within a short time after meeting the Buddha and within weeks Ven. Aṅgulimāla became an *Arahant* too!

7. In the “bigger picture” of the “three *lokā*” and “31 realms,” we saw that the “life-stream of any living being” can change from “good to bad”, “bad to good”, “good to bad again,” etc. an uncountable times in the beginning-less rebirth process.

- We all have been in the highest *brahma* realm and the lowest *apāya* too. But we all have spent most of that time in the suffering-filled *apāyā*.
- The only way get out of this “ceaseless wandering in the rebirth process (*saṃsāra* or *saṃsāra*)” is to become an *Arahant*, as Ven. Aṅgulimāla did.
- The first step is to attain the *Sotāpanna* stage be free of at least the four lowest realms (*apāyā*).

Third Observation – There is a Causal Link (“Sort of a Self”)

8. **However, as we discussed in the previous post, it is not possible to say that “there is no-self” either.**

- Nothing happens without a reason or a cause (at least one, but usually many causes).
- **A human is reborn an animal or a *brahma* due to a reason.** There is a CONNECTION between two adjacent “*bhava*” or existences.
- Ahimsika did not become Aṅgulimāla without causes. One cause was the influence of his peers on the teacher. Then Ahimsika blindly followed the instructions of the teacher.
- But then all that was reversed due to the influence of the Buddha.

9. That is why it is also incorrect to say, “there is no-self.” There is always a “self” — living at least momentarily — that is responsible for how that “self” evolves in the future.

- But that “changing self” can and will change between “good” and “bad” based on many factors. Key factors are self’s deeds and external influences on that “self” at any given time.

Fourth Observation – Two Types of “*Bhava*” or Existence

10. Another critical point is that one could be born in a “temporary *bhava*” or “temporary existence” DURING this life. As we saw, Aṅgulimāla switched “temporary *bhava*” from an innocent boy to a murderer, and back to an *Arahant*!

- For example, a person who drinks habitually is not drunk all the time. He is in a “drunken *bhava*” or “drunken existence” while he is intoxicated. The next day he is sober and would not be in a “drunken *bhava*” until he drinks again.
- In the same way, one is in an “angry *bhava*” when she gets angry. But after the anger subsides, she is not in that “existence” or “*bhava*” anymore.
- Temporary *bhava* (or transient existences) explained via “*Idapaccayātā Paṭicca Samuppāda*” processes (those operate during a given life) . Even though only one type of *Paṭicca Samuppāda* is presented in the textbooks today, there are different types.

11. When one habitually gets into such a “temporary *bhava*” repeatedly, then that becomes a cultivated *gati* or habit/character.

- In that case, it could lead to a new “*uppatti bhava*” (or “*bhava* associated with rebirth”) too. For example, when one gets angry all the time and then one day kills another human, that could lead to rebirth in an *apāya*. That is a “more permanent *bhava*” that can last a long time.
- That is the more common *Paṭicca Samuppāda* cycle, i.e., the “*uppatti Paṭicca Samuppāda*.”
- The section on “[Paṭicca Samuppāda](#)” is a must-read.

Fifth Observation – Going Back and Forth in the Rebirth Process

12. So, there could be some period in the rebirth process where one mostly does “good deeds”, cultivates “good *gati*,” and thus gets “good *bhava*” and therefore “good births” (*jāti*). We discussed the difference between *bhava* and *jāti* in the post: “[Bhava and Jāti – States of Existence and Births Therein](#).”

- Then, one’s *gati* may change to “bad *gati*,” especially when one comes under “bad influences and associates.” In that case, one may start on a “downward path” and eventually one’s *gati* will become harmful to the extent that one will get a “bad *bhava*.”
- We can see such examples around us. We all have seen good children becoming drug addicts and then becoming even murderers due to bad associations. The opposite happens too, when a violent person may change those bad *gati* and become a “good citizen” under right influences.
- That is what we all have been doing (going back and forth between good and bad existences,) in this beginning-less rebirth process.

Sixth Observation – Aṅgulimāla’s Realization

13. When Aṅgulimāla was chasing the Buddha and could not get even close to the Buddha. To quote from the account referenced above, Aṅgulimāla stopped and called “Stop, monk! Stop, monk!”

“I have stopped, Aṅgulimāla. You stop, too.”

- That got Aṅgulimāla to thinking, and he started asking why the Buddha — while still walking — said that he had stopped. **The Buddha explained that he had stopped his *samsāric* wandering (rebirth process) and had overcome all suffering.**
- That is when Aṅgulimāla gained insight and became Ven. Aṅgulimāla.

14. Therefore, the critical point to understand is that it is NOT ENOUGH just to do “good deeds,” even though that is a must.

- One MUST take another step and realize that we have been trapped in this rebirth process filled with (mostly) suffering due to two reasons.
- Let us briefly discuss those two CRITICAL points.

Seventh Observation – The Critical Discovery of the Buddha

15. First, until a Buddha comes to the world (meaning a human attains the *Buddhahood* by purifying the mind to the greatest extent), humans are unaware of the “wider world view” with “three types of *lokā*” and 31 realms.

- Even though one could be occasionally born in “good realms” at or above the human realm, beings are reborn mostly in the lowest four realms (*apāyā*) **due to misdeeds done in seeking sense pleasures.**
- Of course, there is suffering in any realm, but it is less in higher realms.
- **Therefore, most of the rebirths lead to much suffering. That is the essence of the First Noble Truth.**

16. Secondly, until a Buddha comes to the world, it is not known how to escape from this endless rebirth process filled with suffering.

- There have been, and there will always be teachers who realize that misdeeds lead to unfortunate rebirths and good deeds lead to good rebirths, and teach that to others.
- **But it is only a Buddha that can figure out that doing good deeds is not enough.** One needs to see the *anicca* nature of this world of 31 realms. **That means even if one gets a rebirth in the highest realm with long lifetimes of billions of years, one will end up in despair and eventual death.**
- Then one gets back to the same cycle of rebirths, where one will inevitably do evil deeds (due to cravings or sense temptations) and will be born in the *apāyā*.

Eighth Observation – The Root Cause for Suffering

17. Therefore, the key is to realize that one needs to REMOVE the tendency to be tempted by sense desires.

- One needs to “see” that *anicca* nature, i.e., it is a waste of time to seek happiness in this world. That will sooner or later lead to rebirth in the *apāyā* (*dukkha*). Therefore, in the end, one will become helpless (*anatta*), when born in an *apāyā*.
- **It is not possible to forcefully suppress cravings under “strong sense temptations.” When one sees the “*anicca* nature,” cravings are automatically removed (in four stages of *Nibbāna*).**
- That is the **Second Noble Truth**, the cause of future suffering.

Ninth Observation – The Way to *Nibbāna*

18. Once the “big picture” of the 31 realms — together with how one WILL BE born among them due to one’s actions (*kamma*) — is understood, one would have removed the ten types of *micchā diṭṭhi*.

- That is because that “complete picture” requires the rebirth process, laws of *kamma*, etc.

19. Then one can begin to understand the “unfulfilling and dangerous nature of the wider world of 31 realms” or the “*anicca* nature.”

- That “*anicca* nature” explains how “*dukkha*” or suffering arises, and one will become helpless (*anatta*) in the rebirth process. **Those are three main characteristics (*anicca, dukkha, anatta*) that are called *Tilakkhaṇa*** (and they are inter-related).
- That is when one attains the *Sotāpanna* stage of *Nibbāna*.

20. **That is why *anicca* has nothing to do with “impermanence,” and “*anatta*” has nothing to do with a “self” or a “non-self.”**

- That knowledge about *Tilakkhaṇa* or the “true nature of this world” is available only in Buddha Dhamma.
- Until a Buddha comes to this world and **DISCOVERS** that “bigger picture,” no one will be able to see that “bigger picture.” Thus humans are unaware of the dangers in remaining in this cycle of rebirths filled with suffering.

Tenth Observation – *Kamma Vipāka* Will be Effective Until Death of an *Arahant*

21. Even though Ven. Aṅgulimāla had attained the *Arahanthood*, he was getting injured by “stone-throwers” regularly. Most of the time, those stones were not directed at him, but he was getting hit accidentally.

- As described in the above essay, “with blood running from his injured head, with his bowl broken, and with his patchwork robe torn, the venerable Aṅgulimāla went to the Blessed One. The Blessed One saw him coming, and he told him: “Bear it, *brāhmanā*, bear it, *brāhmanā*! **You have experienced here and now the ripening of *kamma* whose ripening you might have experienced in hell over many a year, many a century, many a millennium.**”
- If Aṅgulimāla died without being saved by the Buddha, he would have suffered in the *apāyā* for an unimaginable time!

22. As we had discussed before, even a Buddha cannot avoid some of *kamma vipāka*. The physical body in this life arose due past *kamma*, and many aspects associated with that body cannot be changed.

- At the death of the physical body, there are no more rebirths anywhere in the 31 realms. Then, there is no way for any *kamma vipāka* to materialize (come to fruition). That is why the physical death of an *Arahant* is called “*Parinibbāna*” or “complete *Nibbāna*.”
- There will be absolutely no suffering after the *Parinibbāna*.

23. Therefore, we can see that there are many insights in the accounts of notable personalities in the *Tiṭṭaka*. They are all consistent with the core teachings.

6.1.4.8 The Four Bases of Mental Power (*Satara Iddhipāda*)

I used to have this post titled, “The Four Factors of Accomplishment.” I changed it because those words do not do justice to these four mental qualities. They are called *satara Iddhipāda* in Pāli or Sinhala, meaning factors that are critical to accomplishing any goal, whether mundane or transcendental.

- *Iddhi* is conventionally taken to mean “magical” powers. Those *yogis* who could see things that are far away, hear sounds that are far away, read minds of others, etc., were supposed to have *iddhi* powers. They acquired those powers by harnessing the power of these four factors to **KEEP THEIR DEFILEMENTS SUPPRESSED**.
- When one works towards attaining *Nibbāna*, one can use the same factors to **REMOVE** defilements from the mind.

- One could use the same factors to attain mundane goals, such as achieving financial independence, excelling in academics or a sport, improving health, etc.

They are *chanda* (liking, but close to an obsession), *citta* (thoughts), *virīya* (effort), and *vīmaṃsā* (analysis). *Chanda* is NOT greed, it is the determination to attain a goal.

- Any innovator, business person, scientist, architect, in fact anyone who is an expert at his/her occupation, knows these factors are critical, even though they may not have thought about them.

1. One needs to have an liking (more like an obsessed liking) for the project; this is called ***chanda*** which we can translate as liking. It is not greed, but pure in quality and grows to become a life goal.

2. When one has this “obsession”, one keeps thinking about it all the time. When one gets up at night to go to the bathroom, one thinks about it; it is the first thing that comes to mind when one wakes up. This is called ***citta***; we will call it thought or contemplation.

3. Thus one makes one’s best efforts (***virīya***) to achieve the goal. This is what makes swimmers get up early morning to do laps, a scientist/innovator forgets about his/her meal, an innovator stays awake thinking about how to make improvements to his products, etc.

4. One is always on the lookout for any faults or possible improvements in current efforts. If the concepts involved do not make sense, one is always looking for a better explanation, a better way to make something, etc. This is reasoning/investigating (***vīmaṃsā***).

- These factors are mutually supportive of each other. Because of this, once getting started (slowly), **they can lead to explosive growth**; these factors feed on each other, and the project becomes self-sustaining. This is called exponential growth. Thus it is hard to calculate the time taken to finish the project by linear extrapolation.
- The same is true for someone starting on the Path. Initially, it takes time to absorb the concepts. But IF THE CONCEPTS ARE CORRECT (i.e., no contradictions), then progress is made very quickly. The principle of *paṭicca samuppāda* starts working and one will be attracting resources that will help in ways one would not have even thought about; see, [“The Law of Attraction, Habits \(Gathi\), and Cravings \(Āsavas\).”](#)

I know this by experience both as a scientist and now as a follower of the Path. After working for over four years, up until 2013, I had made only slow, steady progress on the Path. But I progressed enough that I kept looking for better explanations, discarding many things on the way. Since the middle of 2013, the growth exploded. That is when, just by the law of attraction (see, [“The Law of Attraction, Habits \(Gathi\), and Cravings \(Āsavas\)”](#)) I came across the pure Dhamma.

- By the way, this is process the Buddha called *bhāvanā* (meditation). One keeps contemplating, clarifying, investigating, etc. it all the time, i.e., “*Asevitaya, bhavithaya, bahuleekathaya,*”
- One can be meditating in all four postures: sitting, standing, walking, and lying down (on a bed). Of course one can concentrate better sitting down in one of the more formal sitting postures.

Deeper Meanings when Cultivating the Noble Eightfold Path

See, [“Javana of a Citta – The Root of Mental Power”](#) for an analysis based on Abhidhamma.

1. *Chanda* (cha + anda, where “*cha*” is mind and “*anda*” is “*anduma*” or clothes) means wrapping one’s mind with appropriate “attire”, which here means *sammā vaca*, *sammā kammanta*, and *sammā ajiva*. This is what fuels the “liking” for *Nibbāna* with increased *nirāmisā sukha*.

- By the way, a different meaning of “*anda*” (blind) is implied when *chanda* is used in “*kāmachanda*” (= “*kāma*” + “*cha*” + “*anda*”), i.e., mind blinded by *kāma* or sense pleasures.

2. *Citta* here means the mindset to attain *Nibbāna*.

3. However, even if one has liking and mindset on attaining *Nibbāna*, one needs to make an effort or *virīya*.
4. Even if one is exerting effort, it needs to be directed in the right direction. Thus one needs *vīmaṃsā* (investigation/reasoning) to comprehend *anicca*, *dukkha*, *anatta*, and to get to *sammā diṭṭhi*.
5. “*Iddhi*” means “grow”, and “*pada*” means “headed direction.” Thus with *iddhipada* one is accelerating in the direction that one sets one’s mind. Thus all four factors of *chanda*, *citta*, *virīya*, *vīmaṃsā* need to be there.

Next, [“Why is it Necessary to Learn Key Pāli Words?”](#), ...

6.1.4.9 Why is it Necessary to Learn Key Pāli Words?

Original written before October 23, 2015; Revised March 4, 2017; October 8, 2018

I had not given this issue much thought until someone at an online forum pointed out in 2014 that I was using too many Pāli words and it was difficult to understand the meaning of those terms. This is an important point that has two aspects:

- In the *Arana Vibhanga sutta* (MN 130), the Buddha advised *bhikkhus* to explain the Dhamma by providing the MEANINGS and not to emphasize a given language. As long as one comprehends the concept, it does not matter what language is used.
- On the other hand, we need to have a way to transmit the key foundational words for future generations without distorting the meaning of such words. And it is difficult to find suitable words in other languages for keywords like *anicca*, *anatta*, and *paṭicca samuppāda*.
- I have explained the meaning of any Pāli term I use. But for a first-time reader, this could be a legitimate issue. Please use the “Search” button on the top right to locate relevant posts for any keyword. There is a [“Pāli Glossary \(A-K\)”](#) and [“Pāli Glossary \(L-Z\)”](#) too.

1. Buddha Dhamma is the most complex theory in the world; it encompasses all of nature’s laws. Even though its basic premises are not hard to grasp, if one needs to dig deeper, one needs to spend some time “learning the basics”, or the “fundamental ideas involved.”

- Think about it this way: Can one learn algebra without knowing arithmetic?
- The key is to learn the basic ideas well, words like *anicca*, *anatta*, *bhava*, etc. It is said that one could understand the Buddha’s message about existence just by comprehending *anicca* (which will lead to an understanding of *dukkha* and *anatta*), and that is true.
- But that is not possible if *anicca* is translated into English as just one word: impermanence. The Pāli word *anicca* means much more than just impermanence. So, it is better for the word *anicca* and to learn what is meant by that word.
- *Vīññāṇa* is another word like that. It should not be translated just as “consciousness”; it is much more complex; see, [“Vīññāṇa – What It Really Means.”](#)

2. There is another aspect too. If one learns the basic concepts in addition/subtraction or even quantum mechanics, it does not matter what language one uses to learn it. The key is to get the IDEA, not just learn the words. One can learn addition/subtraction or quantum mechanics in ANY language, not by memorizing words but by understanding the key concepts.

- When a child learns how to add/subtract, he/she has to learn the basic multiplication table and the procedures on how to use that knowledge in handling big numbers. After that he/she can solve any arbitrary problem involving big numbers.
- In the same way, one needs to get the IDEAS embodied in some key Pāli words because many of those Pāli words CANNOT be directly translated into other languages: They are highly condensed, each word packed with deep meanings.

- In quantum mechanics, the word “quantum” embodies the subject; regardless of the language one uses, one knows what a quantum is. In the same way, one needs to know what “*anicca*” is. There is no other word for it in English.
 - **Once one UNDERSTANDS the meaning of a certain key Pāli word, then one may even be able to find a suitable word in any language to keep it in mind. There is no need to memorize Pāli words for the sake of memorizing. It is similar to learning any concept.**
 - We just should not change the original Pāli words in the *Tipiṭaka*. That is the “blueprint” that needs to be transmitted intact so that Buddha’s original message will be kept intact.
3. Let us first examine the reasons why Pāli is a special language.
- The Buddha delivered his discourses in *Māghadhi* language; a version of that language suitable for memorization (Pāli) was used to SUMMARIZE those *suttā*. For example, *Dhamma Cakka Pavattana Sutta* was delivered to the five ascetics overnight. How many pages would it take to write all that down? Yet, it was condensed into a few pages.
 - In the old days, *suttā* were orally transmitted generation-to-generation, and that was the other reason to condense it into a special form like a poem that is easy to remember and recite. The origin of the word “Pali” comes from that particular way of organization of the words.
4. Therefore, it may take several words in a different language to express the meaning of some Pāli words like *anicca*, *anatta*, *bhava*, etc. *Paṭicca samuppāda* is another whole phrase that is best kept intact and just learn what is meant by that phrase; see, “[Paṭicca Samuppāda – “Pati+iccha” + “Sama+uppāda”.](#)”
- Thus most Pāli words are impossible to be translated word-by-word to other languages. **There is a system to glean the true meanings of the *suttā* as well as the deep subject of *paṭicca samuppāda***; see, “[Sutta – Introduction.](#)”
 - This is the reason that many commentaries were written in the old days to explain the meaning of keywords and phrases; see, “[Preservation of Dhamma](#)“ for details.
 - Unfortunately, most of those original commentaries (*Sinhala Attakathā*) cannot be found today, except for three; see the above post.
5. Most of the problems we have today are due to such “word by word” translation of *suttā* into other languages.
- **The most visible and disastrous translations are the translation of the words *anicca* and *anatta* into Sanskrit as *anitya* and *anātma***; these words were then ADOPTED in the Sinhala language to express the meaning of *anicca* and *anatta*. Then within the last two hundred or so years, those Sanskrit words were directly translated to English and now have become established to mean “impermanence” and “no-self”; see, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”
 - **Incorrect translation of just those words have kept the message of the Buddha hidden for over fifteen hundred years. It is not an accident that there have not been that many *Arahants* during that time.**
 - For the correct meanings of these words, see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#)“ and the follow-up post.
6. In fact, it is said that one can reach the *Sotāpanna* stage by just comprehending the true meanings of *anicca*, *dukkha*, *anatta*, the three characteristics of the world. These three words have embodied in them a very broad message. Whole *suttā* were delivered to describe what was meant by those words! **It is WRONG and DISASTROUS to just translate them as impermanence, suffering, and “no-self.”**
- **But if one wishes**, and knows the correct interpretations, one can dig much deeper to unimaginable depths. For example, there is a process involving 9 steps where a given *citta* starts off as a pure (*pabhasvara*) *citta* and gets “contaminated” before getting to the *viññāṇakkhandha* stage within within a billionth of a second!

- Those are discussed in detail, for example, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” and “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)”
- However, there is no need to go to that depth for most people (and many will not have enough time to do that anyway, but there could be a few who would really enjoy it).
- I just want everyone to appreciate Buddha Dhamma for what it is, and to help remove many misconceptions that are out there today.

7. To summarize, I cannot emphasize enough the importance of UNDERSTANDING the meanings of key Pāli words. It may take some time to truly grasp those meanings. I keep revising those key posts, whenever a better way to express an idea comes to mind or when someone else points out a better way to express it.

- **Experience is a key factor in understanding.** The word “elephant” may not mean anything to someone who does not understand English. But if it is shown to him what an elephant looks like, then he can associate the word “elephant” with the big animal.
- In the same way, it is important to UNDERSTAND what *anicca* means, by using one’s experience: for example, we cannot maintain even our body the way we would like for the LONG TERM, etc. Then you look at others, especially those who are even older than us, or those who died of old age, and realize that it is true. Then you think about anything in this world, and realize that it is true, i.e., we cannot maintain ANYTHING in this world to our satisfaction, and that is *anicca*.
- Also see, “[Saṅgā – What It Really Means.](#)”

8. The following is a table with some key Pāli words and links to a few posts that describe what those words mean. More posts probably can be found by using the “Search” button on the top right.

6.1.5 Buddha Dhamma and Morality

[“Origin of Morality \(and Immorality\) in Buddhism”](#)

[“Is Eating Meat an Akusala Kamma \(Immoral Deed\)?”](#)

[“Do Things Just Happen? – The Hidden Causes”](#)

6.1.5.1 Origin of Morality (and Immorality) in Buddhism

1. Morality and immorality are both built-in to nature. A human can choose to become moral or immoral. This is because a human has a mind that can grasp right from wrong; on the other hand, an animal does not have a developed mind that can sort out good deeds from the bad most of the time.

2. In Buddha Dhamma, which describes nature’s laws, the foundation of the moral code is the set of ten moral actions (*dasa kusala*), which are to avoid the ten immoral actions (*dasa akusala*); see, [“Ten Immoral Actions \(Dasa Akusala\)”](#) and the follow-up post.

3. **If one does not follow this fundamental moral code, one becomes indebted to other humans and also to the nature (which means all living beings, from which we “see” only a small fraction) in general.** In this life as well as in previous lives, we have become indebted to other beings.

- Thus getting out of that debt, as well not to get into new debts, is also a part of the moral code in Buddha Dhamma; see, [“Kamma, Debt, and Meditation”](#) for more details.
- This is in the “*vinaya piṭaka*” of the *Tipiṭaka*; it is also described in the *suttā* in the *sutta piṭaka*. The third section of the *Tipiṭaka*, *Abhidhamma*, describes the ten moral/immoral actions in depth.

4. Now let us see how most of our conventional moral code(s), comes from these two foundational aspects of Buddha Dhamma.

- Of the ten immoral actions three are done with body: killing, stealing, and sexual misconduct. The basic difference with “conventional code” is that killing of animals is not considered immoral in many societies.
- There are four immoral actions done with speech: lying, slandering, harsh speech, and frivolous talk, of which the latter is not taken seriously as immoral in most cases; but one can experience the benefits of avoiding it for oneself.
- Those seven immoral actions and speech **ARISE** due to **the three kinds of immoral thoughts: greed for other’s belongings, ill will or hatred, and established wrong views (*lobha, dosa, moha*)**. In a way the last one is the root cause for all other nine, because one would not violate any of them if one knew the true nature of the “wider world” (of 31 realms of existence and the rebirth process therein): that it is unfruitful to engage in any of those nine immoral actions (called “*avijjā*” or ignorance).

5. Then there is the other aspects of morality that comes from abstaining from getting into new debt and paying off old debts (from the *vinaya*).

- As one can easily see, giving (*dana*) in general is an excellent way of “paying off debt.” Since we do not know who we have becomes indebted to in this long cycle of rebirths, giving can be to anyone, including animals. For animals, the best giving is of course abstain from killing; not to take their lives. Even though they cannot think like us, they do have feelings.
- This point of “being debt free” incorporate many of our “conventional moral actions”: helping out others, being considerate to others, etc.
- A big part of this is also making sure to fulfil one’s responsibilities. All our associations have, at the root, “long term debts” in play even though we do not realize it. The biggest debts are those to our families and especially to children (and parents in return).
- We constantly benefit from the actions of innumerable others living in this complex society; we depend on each other for survival. Our food, energy needs, infrastructure needs, are hard to sort out. The best way

to pay off such debts is to do “one’s own part”, honestly doing one’s own job and being a “good citizen.”

6. But the most important thing is to understand the true nature of this “wider world.” When one has that understanding it will become automatic to follow the moral code. One does not have to make an effort, because one’s mind clearly sees what is right and what is wrong. There are then such meritorious actions (*puñña kriya*), which cultivate the “moral code behavior” and also purifies the mind; see, “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

- The goal of this website is to clarify how people engage in immoral actions because their inability to REALLY understand the true nature of this “wider world” (*anicca, dukkha, anatta*) and thus to help get rid of such wrong views.
- If one understood the “long term consequences” (and unfruitfulness) of acting with extreme greed and hate, then one becomes automatically moral.

7. Finally, morality is not a one street. Unfortunately, the nature has both morality and immorality built-in. Even though we think, “how one can do a highly immoral act like killing another human and have a peace of mind?”, there are some who do ENJOY such acts. People like Hitler and Pol pot, as well as serial killers, are good examples. They PLAN and carry out such vicious deeds with pleasure.

- Thus the nature, at least on the surface (**because the consequences are hidden and time-delayed**), is neutral on the matter of morality and immorality. One can go the moral route or the immoral route. Humans have the ability to sort out which route is the correct one. However, it is not easy for children to figure that out. This is why the guidance of the parents and teachers is CRITICAL to point a child in the right direction.

6.1.5.2 Is Eating Meat an Akusala Kamma (Immoral Deed)?

Published before October 23, 2015; revised October 19, 2016; February 16, 2018

Note added **June 2, 2016**: I decided to revise this post because I received comments from a few people who thought it could encourage people to eat meat. My intention was not that, but merely to point out that there are much worse things people ordinarily do even without thinking twice. It is best to avoid eating meat out of compassion for animals.

1. The Buddha spent a lot of his time dispelling “*bamunu matha*” or “superficial concepts about morality” adhered to by the *vedic brahmins* of that day.
 - It is unfortunate to see that many current “Buddhists” are practicing the same “*bamunu matha*.” We have gone a full circle and are back to status that the Buddha tried very hard to change.
 - The reason is that we humans have the tendency to judge everything by how we perceive them with our five physical senses, on outward appearances. There is more to nature than what we see (*ditta*), hear (*suta*), taste (*rasa*) and smell (*muta*), and perceive (*vinnata*). The whole point of the appearance of a Buddha in this world is to show us that the truth is much deeper, and we need to “see” with *paññā* (wisdom). This will become clear as one learns Dhamma.
 - Thus the Buddha advised us to go beyond that and to “see the reality” by always paying attention to his “*pubbe ananussutesu dhammesu*...”, or “dhamma that has never been heard before...” Therefore, let us analyze this matter using his “cause and effect” doctrine, and not the absolute, fatalistic doctrine of *kamma*; see, “[What is Kamma? Is Everything Determined by Kamma?](#).”

- Thus, sometimes, the outward appearance of morality could be nothing but *micchā diṭṭhi*. Some people try to attain *Nibbāna* by following rituals, and this is actually one *micchā diṭṭhi* one needs to get rid of (*silabbata paramasa*) before attaining the *Sotāpanna* stage.
- Misconception of categorizing “eating meat” as an *akusala kamma* is a *micchā diṭṭhi* too. Since there is ample evidence in the *Tipiṭaka* that the Buddha himself accepted meat prepared under certain conditions (see #9 below), are these people saying that the Buddha himself committed an *akusala kamma*?

2. In the “[WebLink: suttacentral: Āmagandha Sutta \(Sutta Nipata 2.2\)](#)”, the Buddha explained to a *brahmin* why engaging in *dasa akusala*, and NOT eating “properly prepared” meat is a *duccarita* (immoral deed). If one kills an animal to get the meat, then it is not “properly prepared.”

Pāli verse:

“*Pāṇātipāto vadhachedabandhanam,
Theyyam musāvādo nikativañcanāni ca;
Ajjhenakuttam paradārasevanā,
Esāmagandho na hi maṃsabhojanam.*”

Here is one verse from the [WebLink: suttacentral: English translation](#):

“Taking life, torture, mutilation too,
binding, stealing, telling lies, and fraud;
deceit, adultery, and studying crooked views:
this is carrion-stench, not the eating of meat.”

3. Devadatta, who tried to kill the Buddha and thereby to “become a Buddha”, first tried to split the *Buddha Sāsana* by proposing “five strict conditions for the *bhikkhus* to obey.” His intent was to show that he was “more moral” than the Buddha.

- Devadatta demanded that the Buddha accede to the following five rules for the monks: they should dwell all their lives in the forest, live entirely on alms obtained by begging, wear only robes made of discarded rags, dwell at the foot of a tree, and **abstain from eating meat**.
- The Buddha replied that Buddha Dhamma does not advocate a “path of rituals” (*vatha*). Instead one attains *Nibbāna* by cleansing one’s mind and moral behavior follows automatically. This is what is meant by, “*sanvarattena silan*,” or “when one sees the futility of ‘*san*’ via comprehension of *anicca*, *dukkha*, *anatta*, moral behavior or ‘*sīla*’ is realized automatically”; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\).](#)”
- On the other hand, there are people who are genuinely repulsed by the thoughts of animals living under harsh conditions and being killed in animal farms and have voluntarily given up meat eating, and that is good. In fact, as one gains *paññā* (wisdom), one’s craving for many sensually pleasurable things, not just meat, automatically diminishes.
- The craving for excess sense pleasures diminish automatically when one starts feeling the *nirāmisā sukha* and realizes that that is much more calming and long lasting to the mind than any sense pleasure that is brief; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).”
- But the point is that *paññā* (wisdom) comes through understanding the true nature, and not being persuaded via untruths.

4. In the *Jivaka sutta*, the Buddha states that *bhikkhus* can accept meat, ” when it is not seen or heard or suspected that an animal has been **purposely slaughtered for that offering**.” I also found out recently that the custom those days was to use “*pavatta mānsa*” for *bhikkhus* which means the meat was from animals killed by other animals in the forest (lions and tigers normally eat only parts of an animal and leave the rest which people then recover for food).

- However, the Buddha prohibited *bhikkhus* from eating the flesh of human, elephant, horse, dog, cat, lion, tiger, leopard, bear, hyenas. This was done for various reasons and the chief among them is that they are not suitable for human consumption.
- Just like some vegetations are toxic, some meats can have harmful effects. Other than that, meat of a dead animal is no different from corn or wheat; they are all made out of *satara mahā bhūta: pathavi, āpo, tejo, vāyo*.
- Once the mind leaves the physical body, the body becomes inert like a log. **What is immoral is to end the life of a living being willfully or to aid in such acts**; once that deed is done, what is left is no different than a log of wood.
- However, this is not to say that the Buddha advocated eating meat. It is actually better for the body to eat less meat and more vegetables and fruits. In general, we eat much more food than necessary, and that leads to many health problems starting with obesity.

5. The key point is that EATING MEAT or ANYTHING ELSE **if done with greed**, then that is an *akusala kamma* done with the mind: *abhijjā* [*abhijjhā*] or strong greed.

6. Then there are people who say, “if we all eat meat, that encourages other people to operate animal farms and kill animals; therefore, we should not eat meat.” For those who are bothered by such thoughts, it is better not to eat meat for the peace of mind. I actually have cut down a lot just out of compassion. But we also need to examine the REASONS for some acts to be categorized as *akusala kamma*.

- Don't farmers use pesticides to kill uncountable number of living beings when they cultivate rice, wheat, vegetables, for our consumption? With the above logic, aren't we encouraging farmers to kill all those insects by eating basically any food that we buy at the supermarket?
- These are the true “*musavāda*” (“*musa*” means “incorrect” and “*vāda*” means “debate”), i.e., trying to win an argument by using false premises. They appear to make sense on the surface, but when you examine carefully, they have no substance.
- We have to be really careful about having such “*micchā diṭṭhi*,” because *niyata micchā diṭṭhi* can lead to rebirth in the *apāyā*. There are many such false beliefs that appear “harmless” but count as *micchā diṭṭhi* (not knowing the true nature of things), and that is another reason why it has been hard for people to attain the *Sotāpanna* stage.
- The bottom line is that it is better not to eat meat especially if that bothers one's conscience. But for those who don't have that problem, there are probably other bad acts one needs to worry about first; see, [“How to Evaluate Weights of Different Kamma.”](#)

7. There will always be people who engage in immoral acts and make a livelihood from that. We cannot force others to be moral; we can only point out what is moral and what is immoral. It is up to each person to decide, and understand that, “what one sows, one will reap.”

- As I mentioned before, there was a “pig butcher” Chunda Sukara, who ran his butcher shop right next to *Veluwanaramaya*, where the Buddha resided for many years. Even at the time of the Buddha some questioned why the Buddha did not try to “save him.” If he did that, Chunda Sukara would have generated hateful thoughts about the Buddha and would have ended up in an even worse *apāya*, as explained by the Buddha. Thus one needs to think deeper than just go by “outward appearances.”
- On the other hand, **we should point out the bad consequences of raising animals under unfathomably harsh conditions in animal farms, and killing animals with unimaginably cruel ways (see #10 below).** Even though animals have much lower levels of “consciousness”, **they feel pain same as us.** Still, we need to get rid of the “wrong *saññā*” that eating meat (which is like any other food made of the *satara mahā bhūta*), is equivalent to eating “an animal.” Once the animal is dead, the dead body is inert; the *gandhabba* has left that “inert shell”; see, [“Ghost in the Machine – Synonym for the Manomaya Kāya?”](#)

- In Sri Lanka, and probably in many Buddhist countries, there are many movements to “rescue cows and other animals from the butcher.” They consider this act as an “*abhaya dana*,” which they interpret as “giving back the life or saving the life of that animal.”

8. First, let us examine WHY a cow is born a cow in the first place. A cow is called a “*harakā*” in Sinhala, which comes from “*hara*” meaning “the essence or what is good”, and “*kā*” meaning “eat or destroy.” Thus one is born a cow due to a “cow *sankhara*,” i.e., one had done acts that led to hardships for people. We know many people who do immoral acts that destroy other human lives or at least lead to hardships for other people; those people are bound to be born cows, pigs, and other animals and “pay back those debts.”

- Even though we may save the life of a cow by paying off the butcher, that cow will go through many such “cow lives” until the *kammic* energy of that “cow *bhava*” is spent and during that time will be subjected to numerous killings. This may sound harsh, but that is the reality.
- Instead of “trying to save existing cows”, which is a futile task as we saw above, what we SHOULD do is to try to prevent even a single HUMAN from **becoming a cow** in future lives. Once one gets a “cow *bhava*” one will be born in that *bhava* multiple times; see, “[Bhava and Jāti – States of Existence and Births Therein](#).” What we can do is to try get as many people as possible to be EXPOSED to true Dhamma.
- Thus even though we should not try to prevent people from rescuing such animals (saving a life is always good), we need to educate people about the misconceptions on relative merits of different deeds.

9. In that context, let us see what is really meant by “*abhaya dana*.” “*Bhaya*” means “fear” and “*abhaya*” means preventing one from a dreadful outcome; of course “*dāna*” means “giving.” Thus “*abhaya dana*” means giving the gift of removing one’s fright.

- One should be dreadful about the suffering one could undergo in the four *apāyā* (four lowest realms of existence), animal realm being one. If one can motivate a single human to contemplate on that, that itself will be much more meritorious than “saving” millions cows; of course, as we saw above a “saved cow” is not truly saved; it will pay its debts somehow or other.
- Yet, imagine the number of cow, pig, ... lives that one could save if one can point another human being toward becoming a *Sotāpanna*: that person will NEVER be born in any of the four *apāyā*. That could be an uncountable number of lives saved by “saving a SINGLE human.” That is the true “*abhaya dana*,” and that may not even cost any money.

10. The key point here is that a cow (or any other animal) cannot be “saved” by making it comprehend Dhamma. And, there is no way to “shorten the time of existence” or in this case the duration of the “cow *bhava*.” It just has to wait until the *kammic* energy for that existence to run out through however many “cow lives.”

- But a human can comprehend Dhamma and could change the type of existence, and say for example become a *brahma*. Furthermore, one could attain the *Sotāpanna* stage and be freed from the *apāyā*, and may even attain the *Arahanthood* stage.
- So, there is a HUGE difference in saving an animal life versus a human life.
- Still I am not discouraging anyone from saving an animal. I am just saying that there are better ways to utilize resources and try to help out humans. We never kill a bug or a fly that occasionally gets in our house. We have a “bug catcher cup” that we use to catch it and throw outside; trap the thing in the cup, slide a cardboard piece underneath slowly and carry to the door.

11. I need to also point out that the Buddha himself ate meat when offered under the conditions given in #3 above. In fact, the last meal of the Buddha was a “pork dish” which was especially made to alleviate the pain that the Buddha had with ulcer-like ailment.

- In this context, let us discuss another misconception about that “last meal.” After the meal, the Buddha asked the remainder of the meal not be consumed by any human, and to be buried. Some say this was

because of a “contamination problem with that meal” which led to a discomfort of the Buddha. If there was a problem with the dish, the Buddha would have seen it beforehand.

- The reason that the Buddha asked the remainder of the meal to be thrown away was simply because that meal was a special meal just like the first meal of milk rice offered to him at the time of the attainment of the Buddhahood. Such meals can be digested only by a Buddha. *Devas* and *brahmā* infuse highly potent nutrients into such meals; the Buddha was sustained for 7 weeks with that single meal of milk rice.

12. Finally, the suffering of the animals is real, and this is one form of *sansāric* suffering that the Buddha referred to. If you have nerves made out of steel, you can watch the gruesome acts that occur in some animal farms, see the full movie “Earthlings” at the following site (**Warning:** These scenes are highly disturbing to the mind, especially after about 10-15 minutes): [“Nationearth.com”](http://Nationearth.com)

- We should not hesitate to point out the bad consequences of raising animals under unfathomably harsh conditions in animal farms, and killing animals in unimaginably cruel ways.
- As I pointed out above, animals are bound to “reap what they already sowed in their past lives.” Nature always finds a way to impart *kamma vipāka*. But the problem is that humans volunteer to carry out those punishments, and in turn, generate much future suffering for themselves.
- Thus the only tragic that CAN BE AVOIDED is the creation of similar outcomes (in future births) for current humans who engage in such activities.
- In any case, we cannot force morality on others. We can only point out the dangers and help enact and enforce laws to forbid such unconscionable activities; such efforts have led to making cockfighting illegal in the United States.

6.1.5.3 Do Things Just Happen? – The Hidden Causes

October 30, 2015

Just like in science, Buddha Dhamma is based on cause and effect. Nothing happens without a cause (or more accurately multiple causes). But some of the causes are hidden and can be revealed only a Buddha with the perfect mind. By learning his Dhamma, we can figure out many such important and relevant causes that affect us.

1. There are many instances when we face a traumatic situation, and the first thing comes to our mind is “Why is this happening to me? What have I done to deserve this?.”

- And when we encounter good fortune (say landing a good job or winning a lottery), we are overjoyed: “my luck has finally turned around.”
- Both those conclusions are wrong. Nothing happens in this world without a cause (usually there are multiple causes). Things DO NOT just happen. Nature does not work that way. In science, we always look at the underlying causes to explain material phenomena.
- A scientific theory is not even taken seriously unless it can provide evidence to support the theory, i.e., to illustrate “cause and effect.” Buddha Dhamma is based on “cause and effect.”

2. The “cause and effect” of inert objects is easy to see and verify. Scientists can accurately land a spaceship on the Moon because they can take into account all the causes and effects that would be relevant to the flight of the spaceship. All scientific progress is made due to the “apparent” causes and effects.

- We can even predict/control the behavior of plants. By making suitable conditions for their growth, farmers can reap good harvests. Even when things do not work out with farming, we know the reasons (drought, too much rain, etc).

- Thus we can verify the applicability of “cause and effect” when dealing with inert matter and vegetation. The causes are not hidden.
 - This principle is also known as “action and reaction” in physics. Every action has an equal and opposite reaction. Laws of *kamma* are more complex, but it is the same basic principle. You cannot expect to do something and assume that it has no consequences.
3. Unlike material phenomena that involve dead and inert matter, each sentient living being has a “history that goes back into the deep past” (a tree is living, but not sentient, i.e., it cannot think).
- Therefore, for each sentient being, there could be causes that lie in the deep past. We just cannot see them (if we develop *abhiññā* powers, we could see some).
 - This is why it is hard for many people to grasp the concept of *kamma*. When we look around us, we may not see the “law of *kamma*” working. While a pious peasant may be living in a hut, a drug lord seems to be enjoying life. Yet, in the long run, the laws of *kamma* work: that pious peasant may be reborn to enjoy a good life, while the drug lord may suffer for a long time to come in future births.
 - **The present birth started due to past causes. It will proceed until that *kammic* power is exhausted. What we should be mainly worried about is the next life.**
 - All deeds have their consequences. As Nietzsche (1882) said, “..Lightening and thunder require time, the light of the stars require time, deeds require time even after they are done, before they can be seen and heard...”
4. Then people ask: “But where is the evidence for that?.” The (indirect) evidence is all around us. We just do not take time to analyze what we see. Our tendency is to take things at the face value, without bothering to analyze a bit deeper; see, “[Wrong Views \(Micchā Ditthi\) – A Simpler Analysis.](#)”
- When we look around we see that some people are rich, some are poor; some die within a few months, but there are others live to old age; some are healthy and vibrant, others are sick most of the time, etc. All these happen now due to causes from past lives.
 - What are the causes for all those and much more varieties of life that we see all around us? Many more are discussed in, “[Vagaries of Life and the Way to Seek Good Rebirths.](#)”
5. Laws of *kamma* are nothing but “causes and effects.” Moral behavior leads to good results either in this life OR in future lives. Immoral behavior leads to bad results, including bad rebirths.
- However, *kamma* is nondeterministic, i.e., a cause does not inevitably lead to a result; see, “[What is Kamma? – Is Everything Determined by Kamma?.](#)” By acting with mindfulness, one can avoid many possible bad *kamma vipāka*, and also make conditions for good *kamma vipāka* to come to fruition.
 - Actually, without a Buddha in the world, a normal human cannot figure out these things on his/her own. But luckily, some evidence is coming from modern science due to the efforts of thousands of scientists over the past few hundred years.
 - Many “wrong views” that people used to have in the old days have been corrected by science. Actually, those helped confirm what the Buddha taught 2500 years ago; see, “[Dhamma and Science.](#)”
6. Our ancestors could not explain many natural phenomena like earthquakes, volcano eruptions, floods, etc and attributed those to “the fury of the Gods.” Even to date, whenever we don’t understand something, our tendency is to attribute that to a supernatural being and “fill that gap”; this tendency is called, “God of the gaps.”
- But advances in science are slowly but surely closing those gaps, that exist with regard to the workings of the MATERIAL WORLD. Those are due to natural causes.
7. However, there ARE gaps in our knowledge base that CANNOT be closed by the current approach of science. These are to explain the workings of the human mind or consciousness.

- Most theologians of today are correct in saying that mind cannot arise from matter; it does not make sense to say that a human with feelings and perceptions can just “arise” out of inert matter.
- However, there is no need to “fill that gap” with God either. The Buddha described in detail the workings of the human mind, which is separate from the working of the material world; see, “[Is Buddha Dhamma \(Buddhism\) a Religion?](#).”
- The “cause and effect” for the mind to arise is described by *paṭicca samuppāda*, but before that can start making sense, one needs to understand the basics of Buddha Dhamma discussed in the “[Key Dhamma Concepts](#)” section on the top menu.

8. Another effect that cannot be explained by current science is the “sense of fulfilment” one gets by giving to the poor. If one takes a totally materialistic view, it is not possible to see ANY benefits in giving.

- There was a wealthy brahmin at the time of the Buddha, who was very much against giving. He explained to others why giving can only lead to a loss by actually doing a demonstration: He took a sack of rice and started giving portions to those who gathered. At the end the sack was empty and he said, “look, this is what happens when you give. You lose what you have.”
- The Buddha explained that the brahmin was unable to see the benefits in giving even in this life (sense of joy), because of his wrong views, and thus there was no way he could see the benefits in future lives. The brahmin died and was born a dog at the same house. It is a long story and I may get to it in a future post.
- The key point here is that there are many things that cannot be explained by just what we see with our eyes. Cause and effect is not readily apparent when it involves the mind. Furthermore, benefits of giving are not proportional to the value of the things given, but the state of the mind of the giver.

9. But more than anything else, the truth of what the Buddha taught can be experienced. When one follows the path recommended by the Buddha one can feel and experience the results in this life itself.

- Just by reading and understanding Dhamma concepts one's mind can become calm and peaceful; see, “[Key to Calming the Mind – The Five Hindrances](#).” I encourage everyone to peruse through different sections at the site and read first whatever seem to make sense or relevant to what one is looking for.
- For example, one of the key issues that led people to believe in a supernatural being was how morality can be there without such a being. But the Buddha taught that morality and immorality are both built into nature; see, “[Origin of Morality \(and Immorality\) in Buddhism](#).”
- It could be surprising to many. But Buddha Dhamma can explain ANY phenomenon, whether material or mind-based. Everything happens due to causes, even though some may be hidden from a normal human's sense faculties. By purifying one's mind, one can have a better understanding of how the nature operates; see, “[The Importance of Purifying the Mind](#).”
- October 18, 2016: A new post explains this in more detail: “[Micca Diṭṭhi – Connection to Hethu Phala \(Cause and Effect\)](#).”

6.2 Working Towards Good Rebirths

[“Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)”](#)

6.2.1 Sansāric Habits, Character (Gati), and Cravings (Āsava)

Revised December 7, 2016

Our character (*gati*), behavior, and cravings (*āsava*) sometimes have causes from past lives. It is easier to break bad habits when one understands causes and consequences.

- In the “Moral Living” section, we discussed how to get rid of bad habits, incorporate good habits, and thus achieve goals; see, [“Habits, Goals, and Character \(Gathi\)”](#). We saw that one’s behavioral patterns or habits can form one’s character (*gati*). Here we will see that some of these habits are not formed in this life, but may have origins in previous lives. In a way, these are only “discernible things” we carry from life-to-life; see, [“What Reincarnates? – Concept of a Lifestream.”](#)

1. **Habits (“gati” in Pāli and Sinhala)** are acquired by the repeated use. Habits can be neutral (one can make a habit of start brushing teeth on the top left), good (exercising at a scheduled time), bad (smoking).

- The more one can stick to a set habit, that habit becomes more ingrained in the mind. Riding a bike or learning to drive is a habit to learn. Initially it is hard, but once the habit is formed it is done almost automatically; it becomes an ingrained “gati.”

2. Bad habits can be stopped by making a conscious effort to disrupt the habit. Initially this takes a lot of effort, and that is why assessing the consequences and convincing the mind of the dangers of a bad habit is important at the very beginning.

- Replacing a bad habit with a good (at least less harmful) habit is also important. Instead of smoking, one could chew on a chewing gum when one gets the urge.

3. Habits also help mold the character (*gati*) of a person. We see very different qualities of character among people: kind and malicious, calm and agitated, thoughtful and easily-excitable, etc. It is easy to see that people with “bad character qualities” are those with one or more prominent bad habits.

- But the good news is that no one is “inherently bad.” There are causes (reasons) for a person to have bad habits/character, and once those causes are removed one becomes a person with good habits/character.

- The best example is Aṅgulimāla, who lived during the time of the Buddha and killed close to thousand people. The Buddha was able to show him the consequences of his behavior and he was able to attain the *Arahantship* within a few weeks!
5. It is not only humans that display such personal characteristics; animals have them too. Some dogs are vicious while others are adorable; some are more loyal than others, etc.
- These are habits/character (*gati*) that have been molded over multiple lives; but most character (*gati*) CHANGES happen only during a human life, because human mind is the most capable of CHANGING habits. Animals, for example, are more like robots (not completely).
6. Bad habits are formed via bad judgements arising from a defiled mind that is covered by the five hindrances. And bad habits lead to actions that further strengthen those same habits.
- Once a certain bad “*gati*” becomes established it can even lead to a birth with that “*gati*,” i.e., will be destined for “*dugati*” (du + *gati*) which is another name for the *apāyā* (the four lowest realms). for example, someone who behaves and acts like an animal could well be reborn an animal.
 - The cycle needs to be broken to stop this self-feeding process. But as long as the hindrances are there, it is likely that sooner or later new bad habits will be formed.
7. Those beings that are in the *apāyā* can be put in to four major categories according to the proportions of greed and hate that are in their sansāric “*gati*” (of course ignorance is in all of them) :
- *Pretas* [Sanskrit], *petas* [Pāli], i.e., hungry ghosts, have “greedy” *gati*.
 - Those in the lowest realm, *niraya* (hell), have *gati* dominated by hate.
 - Animals have “*gati*” with both greed and hate. Therefore, the Pāli (or Sinhala) word for animals is “*thirisan*” (=“thiri”+“san” or three defilements). Remember that ignorance is there always.
 - Those in the *asura* (“a”+“sūra”, where “a” means “not” and “sūra” means proficient or capable; thus *asura* means those who depend on others, and are lazy) realm have the habit of doing as least as possible and exploit others’ hard work.
8. Similarly, one who cultivates good habits is destined for a “good” rebirth (*sugati* = su + *gati*), i.e., human realm or above. For example, one who does not indulge in sense pleasures and cultivates compassion and loving kindness could be reborn in the Brahma realms where there is relatively less suffering, and mostly *jhānic* pleasures.
- *Devas* (realms 6-11) are full of compassion and do not have hateful thoughts. But they like to enjoy sense pleasures.
 - *Brahmā* (realms 12-31) do not have either greed or hate.
 - Humans (realms 5) COULD have all three. However, the unique aspect of the human realm is the ability to purify one’s own mind and REMOVE all three, and become an *Arahant* (attain *Nibbāna*). This is done by following the Noble Eightfold Path and removing all “bad habits” one has.
- Of course, *Devas* and *Brahmā* both have ignorance, and thus could be reborn in any realm when they die (unless they had attained the *Sotāpanna* stage).
9. Once ingrained in the mind, habits can be carried over repeated rebirths, from life to life. One who is easily tempted by alcohol is likely to have had that habit in the previous lives.
- One who forms that habit in this life (even if he did not have it before), is likely to carry it over to the next life. Similarly, one who cultivates generosity in this life is likely to have that habit in the next life as well.
10. If those bad habits keep building up life after life, they get fermented and solidified and thus will become deeply embedded in one’s psyche. We all carry deeply ingrained *sansāric* habits associated with one or

more of defilements. **These are called mental fermentations or deeply embedded cravings (“*āsava*” in Pāli or Sinhala).**

- Some *gati* and *āsava* lay hidden (sleeping), and are called “*anusaya*.” With a strong enough “trigger” an ingrained *anusaya* can be brought to the surface. *Anusaya* are the hardest to get rid of.
- **When one continually acts in ways to strengthen one’s *gati* (character), that makes the corresponding *āsava* and *anusaya* even stronger.**

11. Thus it is clear why breaking bad habits is critically important, not only for the benefit of this life, but also for future lives.

Next, “[Complexity of Life and the Way to Seek “Good Rebirths”](#)”,

If you would like to read about how these *āsavas* can be removed, see, “[The Way to Nibbāna – Removal of Āsavas.](#)”

6.2.2 Complexity of Life and the Way to Seek “Good Rebirths”

Revised May 18, 2017; March 14, 2020

Introduction

1. Everything that we see around us can be roughly put into three categories: lifeless matter, plant life, and sentient beings (i.e., life with consciousness). Scientists have been most successful in explaining the behavior of inter matter, at least in the macroscopic scale.

- For example, a rocket can be launched with high precision to land on a given spot on the Moon.
- However, complexity increases when going to biological matter without consciousness (plants).

2. On the other hand, the behavior of a sentient being is almost impossible to predict with any kind of precision. This is because the working of a mind with 89 types of *cittā* (thoughts) and 52 types of *cetasikas* (mental properties) is very complex; see, “[The Grand Unified Theory of Dhamma](#)” and the posts in the “Abhidhamma” section.

- However, the Buddha has taught us how to understand why different types of living beings are born that way, and why people are born with wide-ranging levels of health, wealth, beauty, etc.
- Laws of *kamma* can be explain with such phenomena that involve conscious minds.

3. When we look around, we see that animals, in general, encounter more suffering than humans. Even among people, the range of suffering is enormous. Then there are some people even seem to be enjoying life without any apparent signs of suffering.

- Also, some are born rich, healthy, beautiful, etc. others are born to poverty, handicapped, ugly, etc.
- The character of people also lies in a very broad spectrum, as we discussed above.
- Furthermore, the “fortunes” of a given person could change drastically in a relatively short time. One could go from being penniless to a riches or the other way around quickly.
- When we look at animals too, some pets get treated even better than some humans, while others live under horrible conditions. They also have a wide range of personal characteristics.

Complexity of Life – Buddhist Explanation

4. Such apparent vagaries of life have perfectly good explanations in Buddha Dhamma. However, there are no simple one-to-one correspondences compared to the comparatively simpler rules that are available for tracking the behavior of macroscopic inert objects.

5. The behavior of (macroscopic) inert matter can be explained in terms of simpler cause and effect. If one knows the current conditions, one can predict the future outcome using scientifically-found natural laws (law of gravitation or laws of relativity).

- However, even this is beginning to change with the advent of quantum mechanics; we are now beginning to probe the realm where matter merges with the mind. We will discuss such an instance in the future.

6. Similarly, the behavior of life can be explained in terms of *kamma vipāka* (results of one's actions) together with habits (“*gathī*”) and *āsavas*; see, “[Samsāric Habits and Āsavas](#).” However, unlike cause and effect regarding inter matter, the behavior of life is much more complex, because the MIND IS COMPLEX, see “[The Grand Unified Theory of Dhamma](#).”

- There are many causes (innumerable *kamma vipāka* and numerous types of habits and *āsavas*) leading to many effects, versus just one or few causes leading one effect or a few effects.
- This is discussed in many *suttā*, but a good start is the “[WebLink: suttacentral: Cula Kamma Vibhanga Sutta \(MN 135\)](#).” That site gives translations in several languages, but as with almost all internet sites, translations of some key Pāli words may not be accurate.

Good and Bad *Kamma* Bring Corresponding *Vipāka*

7. In general, good habits and good *kamma vipāka* lead rebirth in realms at or above the human realm. We need to make sure not to commit any *akusala* (unwholesome) *kamma* that could lead to rebirth in the four lower realms, and to engage in meritorious actions.

- Another is to realize that *āsavas* (mental fermentations or deeply embedded cravings) could lead to spontaneous actions (in a rage or a sudden mental weakness). Maintaining good habits, removing bad habits, and acting with generosity, kindness, and wisdom help cleanup the deeply embedded *āsavas*, thus preventing such actions on sudden impulses as well as being able to be mindful.

Meditation Is Contemplation

8. Any type of meditation (*samatha*, *metta*, and *vipassana*) will also be quite helpful. Just contemplating on good thoughts and suppressing bad thoughts as they arise throughout the day is also meditation (this was the original definition of *bhāvanā*).

Next, “[How to Avoid Births in the Apāyā](#)”,

6.2.3 How to Avoid Birth in the Apāyā

1. There are five heinous *kamma* (acts) that GUARANTEE a rebirth in the lowest four realms in the *very next birth*. These are called the *panca anantariya kamma* or five acts that will bring a bad birth without “a gap” (unlike many *kamma vipāka* can come to fruition in later lives, i.e., their results are seen only later in *samsāra*). These five are:

- Killing one's mother
- Killing one's father
- Killing an Arahant
- Causing an injury to a Buddha
- Causing schism in the Saṅgha (the monastic order)

2. The next level is “*niyatha micchā diṭṭhī*” or “an established wrong world view” (which means one is not even willing to consider the possibility that one could be wrong in holding onto such views) that will cause one to be born in the *apāyā* at some point in *samsāra*. This means that one with these false views could be reborn in the *apāyā* in the next life or any future life. There are eight such views:

- No such thing as, (1) mother, (2) father, (3) Buddha, (4) rebirth, (5) *kamma vipāka*, (6) *opapātika* birth (instant full-formed birth), (7) *apāyā*, and (8) *rūpa loka/arūpa loka*. For explanations on (6)-(8), see, “[The Grand Unified Theory of Dhamma](#).”

It must be noted that Even a Sotāpanna may not be fully convinced of the truth of some of the above. But a Sotāpanna has not ruled out any of the above and is not adamant on holding onto a wrong view.

3. Thus the possibility of a birth in the *apāyā* in any future birth is there until all **established (unshakable) wrong views (*niyata micchā diṭṭhi*) are rejected by one’s mind.** We all have committed both good and bad *kamma* in the past lives that we are not aware of; thus any of those could cause a birth anywhere in the 31 realms.

4. It is important to remember that those false views cannot be just memorized and pretended to be discarded. The mind needs to be convinced that those are indeed false views. This is why it is important to examine the world view of the Buddha. These are the key concepts discussed in the top menus, especially, “[What is Buddha Dhamma?](#)” and “[Key Dhamma Concepts](#).”

5. The only guaranteed way to stay out of the *apāyā* (the four lowest realms) in ANY future life is to become a Sotāpanna.

What Happens at the Sotāpanna Stage?

1. As I keep repeating, the Buddha is just the messenger; he discovered the true nature of this world. First of all, this world is much more complex than we perceive. In order to understand how to remove suffering, one has to understand the causes, and that requires the complete picture of “this world” (see, “[What is Buddha Dhamma?](#)” and in particular, “[The Grand Unified Theory of Dhamma](#)”) and also why it is not possible to remove suffering without understanding the Three Characteristics of “this world” (see, “[Key Dhamma Concepts](#)” and in particular, “[Anicca, Dukkha, Anatta - Wrong Interpretations](#)”).

2. When one “sees” the true nature of “this world”, the mind will automatically give up those false views mentioned in the above section (#2). **This is why it is first important to learn Dhamma first.** No one, regardless of one’s high intellect, can discover the complete set of nature’s laws other than a Buddha.

3. From the discussion so far, it is clear what needs to be done to reach the Sotāpanna stage. All that is needed is to carefully examine the world view of the Buddha as mentioned in #1 in this section. One needs to understand the “vision”, and to become “*dassanena sampanno*” or “one with clear vision.” This is why “*dassanena pahatabba*” or “removal by vision” is listed as #1 item in the seven items required to attain Nibbāna in the Sabbasava Sutta; see, “Key Points in the Sabbasava Sutta” in “[The Sotāpanna Stage](#).”

4. Thus essentially all that happens at reaching the Sotāpanna stage is to get a clear world view. Now one has understood the true nature of this world, and thus “knows” that it is not possible to achieve lasting happiness anywhere in the 31 realms. One may not have removed any *āsavas* other than the *diṭṭhi āsava*. Thus one still may have *kamasava*, *bhavasava*, and *avijjasava*, i.e., one still may have greed, hatred, and ignorance even though parts of all three have been permanently been removed by the clear vision. How the *āsavas* are formed starting with habits is discussed in the “[Habits and Goals](#),” “[Sansāric Habits and Āsavas](#),” and “[The Way to Nibbāna – Removal of Āsavas](#)” sections in that order.

5. Therefore, even though one may have greed, hate, and ignorance left, one knows what they are. And one knows how to remove them. After attaining the Sotāpanna stage one does not need a teacher. One knows what needs to be done. As one gets rid of the remaining *āsavas*, the vision becomes even more clear and full and complete *Sammā Diṭṭhi* is attained at the Arahant hood.

Next, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”,

6.2.4 How the Buddha Described the Chance of Rebirth in the Human Realm

Revised May 5, 2017, August 24, 2017; October 30, 2018; February 29, 2020

Many people believe that if we live a “good, moral life,” a human rebirth or rebirth in the higher *deva* worlds is guaranteed. That is a misconception. Even if we do not accumulate a single new bad *kamma* in this life, we may have accumulated many bad *kamma* in past lives. **That is why it is difficult get a human existence (*bhava*).**

- Evidence for rebirth is at, “[Evidence for Rebirth](#).” Rebirth can occur not only in as a human but in any of the 31 realms. Most suffering in the cycle of rebirth occurs in the lowest four realms: *niraya* (hell), *asura*, animal, and *peta* realms. Of those four, only the animal realm is visible to us. They are collectively called the *apāyā*.
- Getting a “human existence (*bhava*)” is rare. But once one grasps a human *bhava*, one could be born (*jāti*) many times as a human until the *kammic* energy for that human *bhava* is exhausted. That is why children can recall past lives. In between consecutive human births, that life-stream exists in the nether world or “*para loka*” as a *gandhabba* with a subtle body; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#)”
- The 31 realms of existence described in “[The Grand Unified Theory of Dhamma](#).”

1. From the *Nakhasikha Sutta* (SN 20.2):

Pāli version: [WebLink: suttacentral: Nakhasikha Sutta \(SN 20.2\)](#):

Translation:

At Sāvattihī. Then the Buddha, picking up a little bit of sand on his fingernail, addressed the *bhikkhus*: “What do you think, *bhikkhus*? Which is more: the little bit of sand on my fingernail, or this great Earth?”

“*Bhante*, the great earth is far more. The little bit of sand on your fingernail is tiny. Compared to the great Earth, those cannot be compared or even imagined; it is not even a significant fraction.”

“In the same way, *bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process.”

Let us make two points clear regarding the above simile of the Buddha:

1. When a being gets a human life, that “human *bhava*” has a specific *kammic* energy associated with it, say 1000 years worth. In that case, the person may be born a few times with a human body (this is the difference between “*bhava*” and “*jāti*”). The *cuti-patisandhi* transition to a new “*bhava*” happens at the end of 1000 years; see, “[Bhava and Jāti – States of Existence and Births Therein](#),” and “[Cuti-Patisandhi – An Abhidhamma Description](#).”

- What the Buddha refers to above is concerned with that new *patisandhi* at the end of the “human *bhava*.”
- It is extremely rare to attain a human *bhava*, but once in a human *bhava*, one can be born tens or even hundreds of times as a human. In the animal realm, a given animal may be reborn thousands or even millions of times to exhaust that *kammic* energy.

2. Even though the above simile may seem to be out-of-proportion with the realities, it is not. That is why I say that modern science has given a boost to Buddha Dhamma by making many things clear. Ordinary humans were not aware of the existence of innumerable microscopic living beings until the invention of the microscope in the 1500s. In 1676, Van Leeuwenhoek reported the discovery of micro-organisms. He observed numerous tiny living beings in a glass of water; see, [WebLink: WIKI: Microscope](#)

Here is a short video showing countless such microscopic creatures:

[WebLink: Live in a water drop @TSRlab](#)

- If you go out and dig a bit of dirt, there could be millions of living organisms there. In a household there may be a few humans, but possibly billions or even trillions of living beings. The oceans cover two-thirds of the Earth's surface, and the living creatures there are much more densely-packed. And there are beings in other 29 realms that we cannot see. Seven billion or so humans in this world are indeed a thumb-full compared to countless living creatures that live associated with the Earth. Thus, as in many cases, modern science has helped verify Buddha's words.
- Some of these realms could be in other dimensions; see, "[Consciousness Dependence on Number of Dimensions](#)." In the string theory, scientists say there could be ten dimensions instead of the three that we experience.
- However, one can actually "see" beings in other dimensions as well as microscopic beings in a glass of water if one develops *abhiññā* powers; see, "[Power of the Human Mind – Introduction](#)" and the follow-up posts. One time, a *bhikkhu* who had developed *abhiññā* skills but had not become an *Arahant*, saw the presence of a large number of microscopic beings in a glass of water. He tried to filter them out but was unsuccessful, and became distraught. The Buddha told him that "it is not possible to live in this world without harming other beings. It is necessary to live this life to attain *Nibbāna*," and to drink the water. The INTENTION there is to quench the thirst; see, "[How to Evaluate Weights of Different Kamma](#)."
- Modern science has found out that there are millions of living beings on a single human body (as well as on any other large animal). They have used sophisticated instruments to see microscopic creatures. See, "[There are as Many Creatures on your Body as there are People on Earth!](#)"

Thus modern science has indeed shown that the human population is negligible compared to just the animal populations (including microscopic beings). And we can experience only two realms (animal and human) compared to the 31 realms that the Buddha described.

2. *Dutiya-chiggaḷayuga Sutta* (SN 56.48)

Pāli version: [WebLink: suttacentral: Dutiya-chiggaḷayuga Sutta \(SN 56.48\)](#)

Translation:

"*Bhikkhus*, suppose that this great Earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly stream would move it eastward. A westerly stream would move it westward; a northerly stream would move it northward. A southerly stream would move it southward.

There was a blind turtle that would come to the surface once every hundred years. What do you think, *bhikkhus*, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?"

"It would be an extremely rare occurrence, *Bhante*, that the blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole."

"So too, *bhikkhus*, how extremely rare that one is born a human.

You have this rare chance now, *bhikkhus*, to be not only born a human but be born while a *Tathāgata* has arisen in the world. While the Dhamma and Discipline proclaimed by the *Tathāgata* shines in the world.

Therefore, *bhikkhus*, you should strive without delay to understand the following. "This is suffering (*dukkha*). This is the cause of suffering (*dukkha samudaya*). This is how that cause is removed (*dukkha nirodhaya*). And this is the way leading to the cessation of suffering (*dukkha nirodha gāmini paṭipadā*)."

- Many scientists are now discussing these "hard to fathom" ideas about infinity. Of course, they are unaware of Buddha's teachings. See, for example, "The Beginning of Infinity" by David Deutsch (2011).

- Most human beings head to the *apāyā* because they are not even aware of the ten immoral actions; see, "[Ten Immoral Actions – Dasa Akusala](#)," and "[How to Evaluate Weights of Different Kamma](#)." It is also essential to know the baseline procedure to avoid such immoral actions and to cultivate moral behavior; see, "[Puñña Kamma – Dāna, Sīla, Bhāvanā](#)."

However, when a living being acquires a human *bhava* or human existence, that can last a long time (many hundreds to many thousands of years). Within that human *bhava*, there will be multiple human births; see, "[Bhava and Jāti – States of Existence and Births Therein](#)."

3. *Assu Sutta* (SN 15.3)

Pāli version: [WebLink: suttacentral: Assu Sutta \(SN 15.3\)](#)

Translation:

First, the Buddha made the famous statement: "*Anamataggoyam bhikkhave, samsaro pubbā koti na pannāyati avijjā nivārananam sattānam taṇhā-samyojananam sandhāvataṃ samsāratam.*"

- **Translated:** "*Bhikkhus*, this rebirth process has no discernible (*na pannāyati*) beginning. Beings whose minds are covered by ignorance and **are bound to this rebirth process with bonds of craving.**"

The rest of the *sutta* is as follows:

"What do you think, *bhikkhus*: Which is greater, the tears you have shed while trapped in this rebirth process or the water in the four great oceans? (Crying because of being born into a bad birth **or** being separated from loved ones in good births)"

"As we understand the Dhamma taught to us by the *Bhante*, the tears we have shed while trapped in this beginning-less rebirth process is greater than the waters in the four great oceans."

"Excellent, *bhikkhus*. It is good that you thus understand the Dhamma taught by me. That is the larger: the tears you have shed while trapped in this beginning-less rebirth process — not the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a mother. The tears you have shed over the death of a mother while trapped in this beginning-less rebirth process are greater than the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a father, death of a brother, death of a sister, death of a son, death of a daughter, loss of relatives, or loss of wealth. The tears you have shed over diseases while trapped in this beginning-less rebirth process would fill the four vast oceans.

Why is that? The beginning of this rebirth process is not discernible."

The Buddha many other analogies to describe how long the rebirth process is: **it is infinite**. In another analogy, the blood from uncountable times where one is killed while born a specific animal (deer or cow, for example) is more than the water in the four oceans.

- Infinity is a hard to comprehend. Scientists have only recently realized this; see, "[Infinity – How Big Is It?](#)"
- In fact, there are many *suttā* in the "[WebLink: suttacentral: Anamatagga Samyutta \(SN 15\)](#)," "[WebLink: suttacentral: Opamma Samyutta \(SN20\)](#)," and the "[WebLink: suttacentral: Sacca Samyutta \(SN 56\)](#)" SN 56.31 through SN 56.70 of the *Samyutta Nikāya* that provides many more similes/descriptions to illustrate the beginning-less rebirth process, during which an infinite amount of time has passed.
- **In the above, I presented only three out of about 70 such *suttā* in SN 15, SN 20, and SN 56. They all provide analogies to show how rare human birth is.**

Next, "[Kamma, Debt, and Meditation](#)"

6.2.4.1 Nakhasikha Sutta

"At one time the Buddha, showing them some dust which he had taken upon the tip of his finger-nail, addressed the disciples thus: 'If, O Bhikkhus, these few grains of dust upon my finger-nail and all the dust in the universe were compared in quantity, which would you say was less, and which more?' The disciples replied: 'Lord, the dust on your finger-nail is less, and that of the universe is more. Surely, Lord, the dust on your finger-nail is not worthy of mention in comparison with the dust of the universe.' Then the Buddha continued; 'Even so, Bhikkhus, those who are reborn in the abodes of men and Devas whence they have expired, are very few even as the few grains of dust on my finger-nail; and those who are reborn in the four realms of misery are exceedingly many, even as the dust of the great universe. Again, those who have expired from the four miserable worlds and are reborn in the abodes of men and Devas are few even as the grains of dust on my finger-nail; and those who are repeatedly reborn in the four miserable worlds are innumerable, even as the grains of dust of the great universe.'"

What has just been said is the substance of the Nakhasikha Sutta. But, to say nothing of the beings of all the four realms of misery, the creatures that inhabit the four great oceans alone will suffice to make evident how great is the evil of Vinipātana-gati, that is, the dispersion, the variety of possible kinds of existence after death.

Appamattakoyaṃ bhagavatā paritto nakhasikhāyaṃ paṃsu āropito. Saṅkhampi na upeti upanidhampi na upeti kalabhāgampi na upeti mahāpathaviṃ upanidhāya bhagavatā paritto nakhasikhāyaṃ paṃsu āropito”ti. “Evameva kho, bhikkhave, appakā te sattā ye manussesu paccājāyanti; atha kho ete yeva bahutarā sattā ye aññatra manussehi paccājāyanti. Tasmātiha, bhikkhave, evaṃ sikkhitabbaṃ: ‘appamattā viharissāma’ti. Evañhi vo, bhikkhave, sikkhitabban”ti.

Dutiyam.

6.2.4.2 Kanakacchapa-sutta

"At one time, the Buddha addressed the disciples thus: 'there is, O Bhikkhus, in the ocean a turtle, both of whose eyes are blind. He plunges into the water of the unfathomable ocean and swims about incessantly in any direction wherever his head may lead. There is also in the ocean the yoke of a cart, which is ceaselessly floating about on the surface of the water, and is carried away in all directions by tide, current and wind. Thus these two go on throughout an incalculable space of time: perchance it happens that in the course of time the yoke arrives at the precise place and time where and when the turtle puts up his head, and yokes on to it. Now, O Bhikkhus, is it possible that such a time might come as is said?' 'In ordinary truth, O Lord,' replied the Bhikkhus 'it is impossible; but time being so spacious, and an eon lasting so long, it may be admitted that perhaps at some time or other it might be possible for the two to yoke together, as said; if the blind tortoise lives long enough, and the yoke does not tend to rot and break up before such a coincidence comes to pass.'

Then the Buddha said, 'O Bhikkhus, the occurrence of such a strange thing is not to be counted a difficult one; for there is still a greater, a harder, a hundred times, a thousand times more difficult than this lying hidden from your knowledge. And what is this? It is, O Bhikkhus, the obtaining of the opportunity of becoming a man again by a man who has expired and is reborn once in any of the four realms of misery. The occurrence of the yoking of the blind tortoise is not worth thinking of as a difficult occurrence in comparison therewith. Because those who perform good deeds and abstain from doing bad alone can obtain the existence of men and Devas. The beings in the four miserable worlds cannot discern what is virtuous and what vicious, what good and what bad, what moral and what immoral, what meritorious and what de-meritorious, and consequently they live a life of immorality and demerit, tormenting one another with all their power. Those creatures of the Niraya and Peta abode in particular, live a very miserable life on account of punishments and torments, which they experience with sorrow, pain and distress. Therefore, O Bhikkhus, the opportunity of being reborn in the abode of men is a hundred times, a thousand times harder to obtain than the encountering of the blind turtle with the yoke."

According to this Sutta, why those creatures who are born in the miserable planes are far from human existence is because they never look up but always look down. And what is meant by looking down? The ignorance in them by degrees becomes greater and stronger from one existence to another; and as the water of a river always flows down to the lower plains, so also they are always tending towards the lower existences; for the ways towards the higher existences are closed to them, while those towards the lower existences are freely open. This is the meaning of "looking down". Hence, from this story of the blind turtle, the wise apprehend how great, how fearful, how terribly perilous are the evils of the -- Puthujjana-gati, i.e. "the dispersion of existence."

What has been said is concerning the Puthujjana-gati. Now what is Ariya-gati? It is deliverance from the dispersion of existence after death. Or it is the disappearance of that "dispersion of existence" which is conjoined with the destiny of inevitable death in every existence". It is also the potentiality of being reborn in higher existences or in existences according to one's choice. It is also not like the fall of coconuts from trees; but it is to be compared to birds, which fly through the air to whatsoever place or tree on which they may wish to perch. Those men, Devas and Brahmā who have attained the Aryan state, can get to whatever better existence, i.e., as men, Devas, Brahmā, they may wish to be reborn into, when they expire from the particular existence in which they have attained such Aryan state. Though they expire unexpectedly without aiming to be reborn in any particular existence, they are destined to be reborn in a better or higher existence, and at the same time are entirely free from rebirth into lower and miserable existences. Moreover, if they are reborn again in the abode of men, they never become of the lower or poorer classes, nor are they fools or heretics, but become quite otherwise. It is the same in the abodes of Devas and Brahmā. They are entirely set free from the Puthujjana-gati.

What has been said is concerning the course of Ariyā. Now we will explain the two Gatis side by side. When a man falls from a tree he falls like a coconut because he has no wings with which to fly in the air. In precisely the same way when men, Devas and Brahmā who are Putthujjana, riveted to the hallucination of wrong views and having no wings of the Noble Eightfold Path to make the sky their resting-place, transmigrate after the dissolution of their present bodies into new ones, they fall tumbling into the bonds of the evils of dispersion. In this world ordinary men who climb up very high trees fall tumbling to the ground when the branches which they clutch or try to make their resting place break down. They suffer much pain from the fall, and sometimes death ensues because they have no other resting-places but the branches, neither have they wings to fly in the air. It is the same with men, Devas and Brahmā who have their hallucination of Wrong Views, when their resting-place of Wrong Views as regards self is broken down, they fall tumbling into the dispersion existence. For their resting-places are only their bodies; and they have neither such a resting place as Nibbāna, nor such strong wings as the Noble Eightfold Path to support them. As for the birds, though the branches they rest on may break, they never fall, but easily fly through the air to any other tree. For the branches are not their permanent resting places but only temporary ones. They entirely rely on their wings and the air. In the same way, men, Devas and Brahmā who have become Ariya and are freed from the hallucination of Wrong Views, neither regard their bodies as their Attā or Self, nor rely upon them. They have in their possession

permanent resting places, such as Nibbána, which is the entire cessation of all tumbling existence. They also possess the very mighty wings of the Noble Eightfold Path, which are able to bear them to better existences.

What has been said is concerning the distinction between the two Gatis, i.e., the Putthujjana-gati and the Ariya-gati.

Samyutta Nikāya 56

Connected Discourses on the Truths

47. Yoke with a Hole (1)

“Bhikkhus, suppose a man would throw a yoke with a single hole into the great ocean, and there was a blind turtle which would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?”

“If it would ever do so, venerable sir, it would be only after a very long time.”

“Sooner, I say, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole than the fool who has gone once to the nether world would regain the human state. For what reason? Because here, bhikkhus, there is no conduct guided by the Dhamma, no righteous conduct, no wholesome activity, no meritorious activity. Here there prevails mutual devouring, the devouring of the weak. For what reason? Because, bhikkhus, they have not seen the Four Noble Truths. What four? The noble truth of suffering ... the noble truth of the way leading to the cessation of suffering.

“Therefore, bhikkhus, an exertion should be made to understand: ‘This is suffering.’ ... An exertion should be made to understand: ‘This is the way leading to the cessation of suffering.’”

Samyutta Nikāya 56

Connected Discourses on the Truths

48. Yoke with a Hole (2)

“Bhikkhus, suppose that this great earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly wind would drive it westward; a westerly wind would drive it eastward; a northerly wind would drive it southward; a southerly wind would drive it northward. There was a blind turtle which would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?”

“It would be by chance, venerable sir, that that blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole.”

“So too, bhikkhus, it is by chance that one obtains the human state; by chance that a Tathāgata, an Arahant, a Perfectly Enlightened One arises in the world; by chance that the Dhamma and Discipline proclaimed by the Tathāgata shines in the world.

“You have obtained that human state, bhikkhus; a Tathāgata, an Arahant, a Perfectly Enlightened One has arisen in the world; the Dhamma and Discipline proclaimed by the Tathāgata shines in the world.

“Therefore, bhikkhus, an exertion should be made to understand: ‘This is suffering.’ ... An exertion should be made to understand: ‘This is the way leading to the cessation of suffering.’”

6.2.4.3 **Tiṅsamatta Sutta - About Thirty Monks**

1. I heard thus. At one time the Blessed One was living in the squirrels' sanctuary in the bamboo grove in Rajagaha.
2. Then about thirty monks from Pava, all of them forest dwellers, dependants on morsel food, wearers of rag robes limited to three and all with bonds approached the Blessed One, worshipped and sat on a side.
3. Then it occurred to the Blessed One: “These thirty monks from Pava, are all forest dwellers, dependants on morsel food, wearers of rag robes limited to three and all with bonds. What if I teach them, so that their minds would be released from desires without holdings while sitting in these same seats?”
4. Then the Blessed One addressed them: “Monks.” And those monks said-:”Yes, venerable sir.”
5. The Blessed One said: “Monks, without an end is the train of existence, a beginning cannot be pointed out of beings enveloped in ignorance and bound by craving, running from one existence to another.
6. “Monks, what is more, the blood you have shed on account of the neck being severed from the body in this long journey in existences running from one existence to another, or the water in the four great oceans?”
7. “Venerable sir, as the Blessed One has taught us the blood we have shed on account of the neck being severed from the body in this long journey in existences running from one existence to another, is more than the water in the four great oceans.”
8. “Excellent! Monks, you know the Teaching as taught by me.
9. “Indeed monks, the blood you have shed on account of the neck being severed from the body in this long journey in existences running from one existence to another, is more than the water in the four great oceans.
10. “Monks, you have long experienced the severing of the neck from the body and the shedding of blood when you were born as cattle, that blood is more than the water in the four great oceans.
11. “Monks, you have long experienced the severing of the neck from the body and the shedding of blood when you were born as buffaloes, that blood is more than the water in the four great oceans.
12. “Monks, you have long experienced the severing of the neck from the body and the shedding of blood when you were born as sheep, that blood is more than the water in the four great oceans.
13. “Monks, ... re ... born as goats ... re ...
14. “Monks, ... re ... born as deer... re ...
15. “Monks, ... re ... born as fowl ... re ...
16. “Monks, ... re ... born as pigs..... re ...
17. “Monks, you have long experienced the severing of the neck from the body and the shedding of blood when you were taken as robbers who destroy villages, that blood is more than the water in the four great oceans ...

18. “Monks, you have long experienced the severing of the neck from the body and the shedding of blood when you were taken as robbers who wait in ambush, that blood is more than the water in the four great oceans ...

19. “Monks, you have long experienced the severing of the neck from the body and the shedding of blood when you were taken as robbers who went to other wives that blood is more than the water in the four great oceans ...

20. “What is the reason? Monks, without an end is the train of existence, a beginning cannot be pointed out, of beings enveloped in ignorance and bound by craving, running from one existence to another.

“Monks, it is suitable that you should turn away from all determinations, fade and be released from them.”

21. The Blessed One said thus and those monks delighted in the words of the Blessed One.

22. When this discourse was given the thirty monks of Pava experienced the release of their minds from desires without holdings.

6.2.5 Kamma, Debt, and Meditation

Revised April 7, 2016; September 4, 2019

1. “This world” of 31 realms is very complex; see, “[The Grand Unified Theory of Dhamma](#).” Nothing happens due to a single cause, and nothing happens just by itself. Multiple causes lead to multiple effects.

2. In a perfect world, everyone will share everything equally, and everyone will be happy. But people are born with different levels of not only wealth but also different levels of health, physical appearance, capabilities, etc. These are the results of *kamma* (good and bad) accrued over very long periods in the past.

3. No one has everything “just right.” So, we try to get what we don’t have or like to have. **Every time we crave for something and try to acquire those things by immoral means, knowingly or unknowingly we get into debt.**

- When those *akusala kamma* (immoral deeds) involves another living being, we get into some kind “*sansāric* relationship” with that being; this is how we have friends, family, AND enemies. These things do not happen by chance.

4. NOTHING in this world happens by chance. Everything happens due to a cause, a reason. **But since results (*vipāka*) can materialize later, even in future lives, we cannot see this “cause and effect” in most cases.** **When we do something harmful to another being we become indebted to that being; that debt will have to be paid with interest that is many many times over.** Think about the following:

- When we get a loan, we have to pay back the loan with interest. If we promise to pay back and do not fulfill that commitment, we will have to pay it with interest sometime in the future. Imagine how much interest we would have to pay on a \$1000 loan at 6% interest over, say just 200 years, which is insignificant in the *sansāric* time scale. You can use the “72 rule.” That means if you do not make any monthly payments, the amount you have to pay will double every (72/interest rate) years. In this case, it will double every 12 years. It will double again in another 12 years, i.e., after 24 years you will have to pay \$4000. After only 40 years, the amount will be \$10,000. Only after 200 years it will a billion dollars!
- Can you imagine how much money we may have to pay to settle even small that we took a long, long time ago?
- We have to pay back not only monetary transactions. Imagine how much would it cost to bring up a child, as a mother does? It is unimaginable over long times.
- When we have such debts, nature has set up many ways to pay off such debts. Many times the same group of people is born to the same families, paying back “old debts.” Or one may become a servant for another.

- Many relationships that we have in this life arise from “long-term debt” from many lives in the past. For example, people are born in the same family, same community, or same geographical locations, for many, many lives. That is for just paying back debts and for claiming old debts. In Sinhala, relationships are called “*sanbandha*” (=“*san*” + “*bandha*” where “*san*” is defilement (*saṅkhāra*), and “*bandha*” is a connection; thus connection due to *saṅkhāra*). Sometimes old creditors come back even in the form of annoying mosquitoes, ants, bugs, etc.
 - Now if one takes another’s life, one may have to sacrifice one’s own life many times over. That is scary stuff, but we need to know that our actions will have consequences.
5. Instead of paying off such “old debts” that way, there is another way to pay back old debts. When one does a good deed, one could transfer the merits of that good deed to old creditors called “*pattidāna*” (this is commonly called “*puñña anumodana*”; see, “[Transfer of Merits \(Pattidāna\)- How Does It Happen?](#)”).
6. In this beginning-less *samsāra*, we have been indebted to unbelievably many beings. Thus we transfer the merits to all beings. We think in our mind, “**May the merits of this good deed be shared by all beings.**”
- If one does this genuinely, it will be quite beneficial in the long term. The Buddha said that this is the most efficient way to pay back old debts. However, one needs to do this with sincerity, truly understanding the suffering caused by one’s actions to others.living
7. One could accrue good merits not only by good deeds but also with insight meditation. **The Buddha stated that if one cultivates *vipassanā* meditation on *anicca, dukkha, anatta*, that leads many more merits compared to even donations or giving.** After the meditation session, one transfers the merits to all beings.
- The nice thing is that one does not “lose any merits” either. Giving merits itself is meritorious. Also, one should forgive old debts from other beings. The mind is very powerful. If done with right intention, also these thoughts will have beneficial consequences for oneself and other living beings.
8. Therefore, we must try to alleviate the *kamma vipāka* from past *kamma* by using the mentioned methods above. **But the main purpose of such methods is actually to purify one’s mind.**
- We can pay off past debts gradually this way. However, bigger chunks are paid off by attaining *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, and *Arahant* stages of *Nibbāna*. (Actually, the Buddha has said that if one does the *Ariya mettā* meditation frequently, one could pay off the debts associated with the *kāma loka* (first 11 realms). See, “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).”
 - When one attains the *Sotāpanna* stage, all those *kamma vipāka* that could have given rebirth in the lowest four realms (*apāyā*) become nullified. When one reaches the *Arahanthood*, only those *kamma vipāka* that get a chance to come to fruition during the remaining time in that life will be paid off. Since there is no more rebirth, all remaining *kamma vipāka* do not get a chance to come to fruition.
9. The first step in purifying one’s mind is to avoid *dasa akusala*; see, “[Ten Immoral Action \(Dasa Akusala\)](#).” One does not need to try to do all at once (especially for those who are new to Buddha Dhamma).
- It is a life journey, and one can start slowly. First, trying to avoid bad actions, and then do things that can be done without much stress. See the posts in the “[Bhāvanā \(Meditation\)](#)” section and in particular, “[2. The Basics in Meditation](#).”
 - There is no one watching, and only you know what your intentions are: whether they are moral or immoral.
 - You will feel the benefits in terms of a less-stressed mind over time. It takes time, especially in the beginning. Then it will accelerate when one starts seeing the benefits. When one starts understanding that *micchā diṭṭhi* (wrong views) play a big role in one’s tendency to do some immoral acts will automatically reduce. see, “[Wrong Views \(Micchā Ditthi\) – A Simpler Analysis](#).”
10. **The Buddha said one could become indebted in four ways:**

- Engaging in *dasa akusala* (10 unwholesome actions).
- Getting someone else to do such acts.
- Helping another in carrying out such acts.
- Praising someone who is doing such acts.

Thus one can become indebted in 40 ways. By avoiding all that will make one joyful (*adhimokko* or sense of well being). That will give impetus to accelerate one's efforts. Also, see, "[Habits and Goals](#)," and "[The Four Bases of Mental Power \(Satara Iddhipada\)](#)."

Another more in-depth analysis at, "[Difference Between Giving up Valuables and Losing Interest in Worthless](#)",

6.2.6 How do we Decide which View is Wrong View (Ditṭhi)?

More than 99% of one's immoral acts have their causes in *micchā ditṭhi* (wrong views); see, "[What is the only Akusala Removed by a Sotāpanna?](#)." Thus it is critical to understand what wrong views are.

- A simpler, yet a fundamental, analysis on wrong views can be found at, "[Wrong Views \(Micchā Ditṭhi\) – A Simpler Analysis](#)."

1. We all have our views about different things: politics, religions, sports, lifestyles, etc. And most times it is fun to talk about and debate whose views are the correct ones. But each one of us have views based on a limited knowledge about only a fraction of "this world."

- A good way to figure out whether one view is better than another is to see whether that view provides more insight AND has more explanatory power about the world.
- In fact, that is the only way. Because anybody can just say, "my view is better than yours."

2. When I refer to "*ditṭhi*" or wrong views, these are the wrong views per Buddha. **It must be noted that "*ditṭhi*" means views, but in Pāli literature it has been common to call "*micchā ditṭhi*" (pronounced "*michcha*") or wrong views as just "*ditṭhi*."** **It is critical to have the "right views" because otherwise we may be taking wrong decisions, and that could have very bad outcomes for billions of years to come.** In order to make right decisions we need to "see the whole picture" or the world view of the Buddha.

- Of course, one is entitled to have his own views. It is just that according to Buddha Dhamma certain views are not only wrong, **but could lead to disastrous outcomes**, and those are called *ditṭhi*. One either accepts this fact, or rejects it. It is a good idea to look at the "big picture" of the Buddha and THEN decide whether it makes sense or not. First let us see why one should even go through this exercise of looking at the big picture.

3. When one does not have a clear overall picture, one makes bad decisions. For example, a fish does not see the string or the hook, only sees the worm, and gets into trouble. If it saw the whole picture, with the string and the hook, it may realize that there is something wrong and would not try to grab the worm. If it saw the man standing on land holding the pole, that would have been another clue; but the fish can only see its "domain." Just like that we can only see "our domain" within the wider 31 realms, and we do not see the level of suffering in other lower realms.

- We are inherently incapable of seeing the "whole picture" because our sense faculties are formed by our *kamma* to be aware of only a part of whole existence; you may get an idea of what I am referring to in the post, "[Consciousness Dependence on Number of Dimensions](#)." Therefore, no matter how smart each of us is, we cannot even imagine this whole picture by ourselves. It takes a very special, very pure mind to see the whole picture, the mind of a Buddha; see, "[Power of the Human Mind – Introduction](#)," and follow-up posts.

4. The Buddha described this in the parable of the “elephant and the six blind men.” Each blind man is feeling or exploring a different part of the elephant, and comes up with his view of what an elephant is: The one examines the tail says the elephant is like a rope, one examining a leg says the elephant is like a pillar, etc.

- The person holding the tail is certain that the elephant is like a rope “because I know what I experience; you cannot tell me it is not like a rope.” He just does not realize that he is experiencing only part of the whole elephant.

5. Until a Buddha comes to this world, any human can only see a very small part of the whole picture. Like the little girl in the video being able to see the whole elephant, only a Buddha can see the whole picture about our true existence.

- Mathematician Kurt Gödel proved this mathematically in his Incompleteness Theorem, which says that it is not possible to discover complete truth of a closed system within that system; see, “[Gödel’s Incompleteness Theorem](#).” Thus science will NEVER be able to discover a COMPLETE set of laws about the nature. It can only uncover parts and the parts that have been discovered are totally consistent with Buddha Dhamma.

6. According to the Buddha, *diṭṭhis* are like that: some people say there is a rebirth process, and some say not. Some say when we die we will either go to hell or heaven. Some say, things really exist in a permanent way, and others say it is all a mirage. **All these are *diṭṭhis*, because none of these fit the WHOLE PICTURE.** None of these can explain the vagaries of life; see, “[Complexity of Life and the Way to Seek “Good Rebirths”](#).”

- For example, we can only see two of the 31 realms of existence: animal and human realms. We are not aware that most beings are trapped in the lowest four realms where there is much more suffering than we can see in the human and animal realms. We do not realize that our immoral actions from this life, AND from our past lives (that we are not aware of) could give us rebirth in those lower four realms; **this is “law of *kamma*” another part of the “big picture.”** There is evidence for rebirth; see, “[Evidence for Rebirth](#).”

7. Buddha Dhamma cannot be fully understood without having learned of that “big picture” from a Buddha or from a person who has learnt the correct version of it. Now, since the Buddha is not here and there are many versions of Buddha Dhamma, the question is how do we figure out which version to believe. The Buddha gave a solution to this problem: Find the version that satisfy the following conditions:

- All aspects should be consistent with the *Suttā* and *Vinaya* (and thus *Abhidhamma*); these were transmitted orally for about 500 years and then written down in the Pāli *Tipiṭaka* about 2000 years ago (Pāli *Tipiṭaka*).
- And all three descriptions in the *Tipiṭaka* (*sutta*, *vinaya*, *abhidhamma*) must be consistent with each other.

8. This second requirement is there to catch any mistakes made in the (especially oral) transmission from the time of the Buddha. It must be kept in mind that all three sets were formulated for easy oral transmission. I know several *suttā* by heart which I learned when I was little; they have been formulated to be easily remembered. And there were different groups of *Bhikkhus* assigned the responsibility for different sections during the time of oral transmission. Also see, “[Preservation of the Dhamma](#).”

9. In a series of posts I have provided evidence that many versions of “Buddhism” being practiced today do not pass the above tests. All Mahayana versions are in blatant contradiction to the teachings in the *Tipiṭaka*, and some key concepts taught in Theravāda are also inconsistent with *Tipiṭaka*; see, “[Why is it Critical to Find the Pure Buddha Dhamma?](#),” and the follow-up posts.

- Once one finds the key Dhamma concepts that are self-consistent, then one can easily figure out what is *diṭṭhi* and what is not. If anyone can point out anything on this website that is not internally consistent, I would appreciate it. Because my goal is genuine: to find and document the original teachings of the Buddha.

10. Thus it is important to realize that *diṭṭhi* is an **established view (a view one is not even willing to rethink)** about the world, that is inconsistent with Buddha Dhamma. Let us take a few examples:

- Two good examples are the two views of “there is a self” and “there is no self”; see, “[Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)](#).” Both are wrong views according to the Buddha: there is only an ever-changing lifestream that progresses according to cause and effect (*paṭicca samuppāda*); see, “[What Reincarnates? – Concept of a Lifestream](#).”
- Another *diṭṭhi* many people have is that there is no rebirth process, or that there is a rebirth process but we will never be born as an animal because we have not done anything bad in this life. It is just a belief, there are no supporting evidence to back that up. On the other hand, the rebirth process involving all 31 realms and the natural law of *kamma*, together with *paṭicca samuppāda*, and other key concepts like *Tilakkhaṇa* can explain EVERYTHING that we experience. **What needs to be understood is that ALL THOSE PIECES MUST BE THERE to complete the whole picture.**

11. Just like a blind man holding onto a leg of the elephant and saying “This is what I experience and the elephant is like a pillar. I know what I experience, and I am right”, we hold onto *diṭṭhis* that are inconsistent with the nature’s laws. Once one hears the message of a Buddha, one should at least examine the credibility of that message by looking at the evidence he presented. Ultimately, one has to make the decision to accept Buddha’s message or not. **This is why no one can lead anyone else to salvation. It is all in one’s own mind.**

- Let me give an example how limited our world view had been even two hundred years ago. People believed that Earth was the only planet with the Sun going around the Earth. So, when the Buddha said there are innumerable world systems with other Suns and Moons, people thought that was a loony idea. There are many such *diṭṭhis* that have been proven to be wrong by science over the past hundred years or so; see, “[Dhamma and Science – Introduction](#).”

12. Some of the views we have are deeply ingrained, and not easy to get rid of. The main thing is NOT to take a firm stand on things that the Buddha called *diṭṭhi* and say, “I know this to be true, and only this to be true” and to cling to them. **Even a *Sotāpanna* may not be fully convinced that, for example, there is a *arupaloka*, but he/she has not ruled that out, i.e., does not have a *diṭṭhi*.** Only an *Arahant* has “complete” *Sammā Ditthi*.

- As one learns pure Dhamma, one will have more and more confidence on the world view of the Buddha and will get rid of the wrong views. Since the mind cannot be forced to accept anything, this “change of vision” comes only through learning the pure Dhamma and through the enhanced life experience, which means purifying the mind; see, “[The Importance of Purifying the Mind](#).”
- **We cannot pick and choose parts of Buddha Dhamma that we like if we want to reap the full benefits.** Of course one could decide to “live with” parts of Dhamma that one is comfortable with. The Buddha said to accept his teachings only if they make sense. To make sense though, one needs to look at the whole picture too. Otherwise, it will be like a blind man examining only the leg of an elephant and saying it really feels like a pillar.

13. *Diṭṭhi* is one of 14 *akusala cetasika* and one of the ten *kilesa*; see, “[Ten Immoral Actions \(Dasa Akusala\)](#),” and “[Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)](#).” *Diṭṭhi* have been described in many ways by the Buddha. At the *Sotāpanna* stage, those *diṭṭhis* that could lead to rebirth in the *apāyā* (*sathkaya diṭṭhi*, *vicikicchā*, *silabbata paramasa*) are permanently removed; see, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Cittas](#).”

- **Thus it is important to realize that the *Sotāpanna* stage CANNOT be reached until *niyata micchā diṭṭhi* or ESTABLISHED wrong views are removed.** For example, one should not hold on to a firm belief that there is no rebirth process; one should at least keep an open mind.
- **Stated most succinctly, *micchā dithi* is the wrong perception of *nicca, sukha, atta*, i.e., things can be maintained to one’s satisfaction, thus lasting happiness is possible, and thus it is**

fruitful to stay in this world of 31 realms. One attains the first stage of *Sammā ditṭhi* when one comprehends *anicca, dukkha, anatta* to a certain extent at the *Sotāpanna* stage.

14. The Buddha said his Dhamma is hard to understand, and it is not like anything that anyone taught before, except for another Buddha: It is “*Pubbe anunussetu Dhammesu*,” “A Dhamma that has not been heard before.” This is why the Buddha worried just after the Enlightenment whether he will be able to teach this difficult Dhamma to normal human beings. It takes a real effort to glean the message of the Buddha.

- Most of us have different types of *ditṭhis*; see, “[Why Do People Enjoy Immoral Deeds? – Ditṭhi Is Key](#)”
- For a description of the ten *micchā ditṭhi*, see, “[Three Kinds of Ditṭhi, Eightfold Paths, and Samādhi](#).”

6.2.7 Three Kinds of Ditṭhi, Eightfold Paths, and Samādhi

Buddha Dhamma explains how three kinds of worldviews lead to three types of *samādhi* (basically mindset) via three different paths. All these are discussed in detail in other posts, but here we summarize them. You can use the Search box on top right to find relevant posts.

1. Have you ever wondered how some people have any “peace of mind” while engaging in abominable actions day in and day out? It is easier to excuse someone who commits a bad act in a “moment of fury”, i.e, when such action was not pre-planned (and the common law accommodates for that).

- But some people (think Hitler, Pol Pot in Cambodia) plan evil acts for years, and they seem to thrive doing it; they do not feel any remorse; rather they enjoy what they do. This is because just like facilitating a journey towards *Nibbāna* for someone who embarks on the Noble Eightfold Path, the nature also lets someone go in the opposite direction too. “*Dhammo ha ve rakkhati dhammacari*” applies to both kinds of “Dhamma.”
- Dhamma is what one “bears.” If one “carries good Dhamma”, one will be guided in the “good direction” by nature. In the same way, one who “carries bad Dhamma” will be guided in the opposite direction. Both can get into “*samādhi*” doing it.

2. *Samādhi* (“*sama*”+“*adhi*” where “*sama*” means “same” and “*adhi*” means “dominance”) means the object becomes the priority and the mind gets focused on it; as we discussed in many posts, when the mind becomes focused on one object (*arammana*), no matter what the object is, the *ekaggata cetasika* takes over and make the mind latched “on to it.”

- When the minds gets to *samādhi*, the mind feels calm because it is stopped from jumping back and forth among many thought objects (*arammana*).
- This is how one gets to not only *samādhi* but also *anāriya jhāna* (a *jhāna* is a deeper state of absorption or *samādhi*) using breath meditation, just by focusing the mind on the breath.
- Thus, a master thief gets to *micchā samādhi* when intently focusing on the plan of a grand robbery in minute details. Not only does he get a joy out of it, his mind helps him work out the fine details; but someone with *micchā samādhi* can never get into a *jhāna*.
- It does not matter what the focus is, nature helps get it done if one really sets his/her mind to it. This is why “*Dhammo ha ve rakkati dhammacari*” can work in any situation. The human mind is very powerful, but it can be used in all three directions.

3. However, that does not change the fact that outcomes of “bad actions” will ALWAYS be bad in the long run. This is a universal law called “*bīja niyama*” which is one of five natures’ primary laws called “*niyama*” (“*niyama*” in Pāli or Sinhala means “fixed”, “unchangeable”); even though most times it is pronounced “*niyāma*”, the correct pronunciation is “*niyama*.”

- Bad kamma result in “bad *kamma bīja*” which will ONLY bear “bad fruits”; also, the consequences will be proportional to the “size” of the *kamma bīja* (*kamma* seed). And the same holds true for good *kamma* seeds.

4. Now, when someone gets on the “wrong track” mostly through bad associates or bad environment, one has the “ten types of *micchā diṭṭhi*”, and one could get into the “*micchā* eightfold path.” **The ten types of *micchā diṭṭhi* are:**

1. giving (*dana*) has no merits,
2. being grateful and responding in kind (for what others have done for oneself) has no merits,
3. respecting and making offerings to those with higher virtues has no merits,
4. what we enjoy/suffer in this life is not due to *kamma vipāka* but they “just happen”,
5. this world does not exist, there are no other worlds than the one we can experience,
6. when one dies it is not possible to be born in *para loka* (netherworld),
7. mother is not a special person,
8. father is not a special person,
9. there are no instantaneous (*opapathika*) births,
10. there are no *samanabrahmana* (basically *Ariyā* or *yogis*) who have cultivated their minds to be free of defilements and thus can see other realms and previous births.

▪ See, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#)” for a discussion on *para loka*.

5. When one has **unshakeable** or *niyata micchā diṭṭhi* one gets on the ***micchā* eightfold path**; now one’s mind is

▪ Since these factors feed on each other, once one gets into *micchā* eightfold path, it is difficult to break out of it. The key is *micchā diṭṭhi*: “Wrong vision” is hard to break, when it is continually being reinforced by wrong speech, actions, etc. Thus it is inevitable that one keeps strengthening one’s “bad *gathi*” or behavior. Then it is increasingly easier to get to “*micchā samādhi*.”

6. The Buddha said that ***Sammā Diṭṭhi* is two-fold**: there is a **mundane (*lokiya*) *Sammā Diṭṭhi*** and an ***Ariya Sammā Diṭṭhi***. When one has mundane *Sammā Diṭṭhi*, one rejects the ten types of *micchā diṭṭhi* mentioned above, and one strives to be born in human or higher realms. One knows that bad actions will lead to birth in the *apāyā* (lowest four realms).

▪ Thus one with mundane *sammā diṭṭhi* will develop **mundane versions of *sammā sankalpa*** (good thoughts), *sammā vaca* (abstain from lying, gossiping, etc), *sammā kammanta* (engages only in moral acts), and so on and then it is easier for one to get to mundane *sammā samādhi*. This is the **mundane *sammā* eightfold path**.

▪ However, while someone following the ***micchā* eightfold path cannot attain any *jhāna***, one on the mundane *sammā* eightfold path can attain *anāriya jhāna*; see, “[Power of the Human Mind – Anariya Jhāna](#).”

7. The critical difference between mundane *sammā diṭṭhi* and *Ariya Sammā Diṭṭhi* is that while one with mundane *sammā diṭṭhi* rejects immoral behavior based on one’s fear of rebirth in the *apāyā* and one’s hope for rebirth in comfort-filled *deva* or *brahma* worlds (or even because it makes one feels good about the act), one **ATTAINS *Ariya Sammā Diṭṭhi*** when one comprehends *anicca*, *dukkha*, *anatta* at least to a significant extent, i.e., one becomes a *Sotāpanna*.

▪ Thus one starts on the Path by following the mundane *sammā* eightfold path, and at some point enters the *Ariya Sammā* Eightfold Path when attaining the *Sotāpanna* stage.

▪ At that stage, one’s mind **automatically rejects** immoral acts because **one’s mind sees the futility** as well as the danger of such acts. What is the point of having some sense pleasure if it lasts only a short time AND could lead to much misery in the future for long times?

8. The critical point is that when one becomes a *Sotāpanna*, **one’s mind (and the brain) will be changed** so that one will not act even impulsively, let alone capable of pre-planning an act that could yield rebirth in the *apāyā*.

- Scientists do confirm that there are significant changes in the brain just due to breath meditation alone; see, “[Truine Brain: How the Mind Rewires the Brain via Meditation/Habits.](#)”
- Such future brain studies on people engaged in the correct *ānāpāna* meditation can be expected to yield profound changes in a brain when a person attains the *Sotāpanna* stage.

9. Thus one becomes a *Sotāpanna* (enter the stream) from the mundane *sammā diṭṭhi* stage by comprehending the true nature of the world (i.e., it is fruitless to be born ANYWHERE in the 31 realms) by learning the meanings of *anicca*, *dukkha*, *anatta* from a Buddha (who discovers them), or from a true disciple of the Buddha.

- Once one becomes a *Sotāpanna*, the Path to *Nibbāna* becomes clear, and one does not need any more help. One will cultivate the next six steps and get to *Ariya Sammā Samādhi* and to the *Arahant* stage of *Nibbāna*.

10. I need to re-emphasize the difference between “living a moral life” which is promoted by most of world’s major religions, and the emphasize on “purifying the mind” and “comprehending the true nature of the wider world of 31 realms” in Buddha Dhamma.

- One needs to approach this extra step first by being “moral”, i.e., by following the mundane *sammā* eightfold path and getting rid of some of the five hindrances. Then one’s mind is purified to an extent to be able to “see through the fog of ignorance” and comprehend *anicca*, *dukkha*, *anatta*.
- Buddha’s message about the “suffering hidden in the midst of apparent sense pleasures” is indeed a “Dhamma that has never been known.” It could be contrary to one’s instincts, because all we have known from the beginningless time is about enjoying the sense pleasures.

Note: The three kinds of eightfold paths, *micchā diṭṭhi*, and *micchā samādhi* are described in the *Mahā Chattareesaka Sutta*; see, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\).](#)”

6.2.8 Implications of the Rebirth Process in Daily Life and in Society

1. Unless one develops *abhiññā* powers via meditation, the rebirth process cannot be “proven” with certainty. Yet, there is mounting evidence for it that cannot be ignored either; see, “[Evidence for Rebirth.](#)”

- Putting that question aside, let us look at some mundane implications IF indeed the rebirth process, as described by the Buddha, is correct.

2. The first thing to realize is how short this life of 100 years or so is. It is unimaginably small. Our universe has been there for about 14 BILLION years and that is just a blip in the cosmic time scale.

3. Looking at the world history, most calamities of war could have been prevented if people understood how short this life is. Where are those emperors and kings today, who sacrificed so many human lives to capture another country or to maintain their powers?

- Because of the atrocities they committed, they are most likely to be in the lowest of the *apāyā*.
- For the briefest time of enjoyment and power, they accumulated so much bad kamma to spend billions of years in total misery.

4. What significance would race, color, ethnicity, religion, beauty, money, etc would have in one’s actions if one really understood that all those are not only temporary, but one could be on the other side in the very next life? This is a topic that is worth contemplating a lot.

5. Let us take the struggle between the Palestinians and the Israelis, because it is making headlines these days; one could take any other conflict. According to Buddha Dhamma, there are two effects that come to play here.

- One in either camp will develop a mindset to hate the other side, take revenge for some action, etc. If they have any kammic energy for the human “*bhava*” they will come back to the same place with matching “*gathi*”, looking for revenge; see, “[Paticca Samuppāda – “Pati + ichcha” + “Sama + uppada.”](#)”
- The other aspect is for any bad action one does in such a conflict is going to have consequences RELATED to that act. When person A kills or harms another person B, A becomes indebted to B. One way to “pay back this debt” is for B to be born as a child to A; see, “[Kamma, Debt, and Meditation.](#)” Isn’t that the biggest irony of all? A Palestinian (Israeli) becoming the child of an Israeli (Palestinian)?
- Either way, the conflict will continue for a long time, unless both sides realize the folly of it all.
- This is true for many other conflicts that have been going-on for generations. It is likely that most of the characters involved have been the same. They are too much “involved” in the conflict and are unable to free their minds from it.

6. Let us take another example of a slave owner in the old days. That person made a lot of wealth by exploiting those slaves, but for how long? At most 100 years. Where are those slave owners now? They would either be in one of the lowest four realms OR could be a slave himself somewhere, possibly to a former slave.

- It is easy to extend this analysis to many other cases; it is good idea to contemplate on such things. It makes one understand the true meanings of *anicca*, *dukkha*, *anatta*. That is unfruitful to do immoral things to achieve a brief moment of sense pleasure, where the consequences can play out for much longer time in a future birth.

7. Yet we strive for a quarter of our lives to go through the basic educational process (which is the only part that makes any sense in the long term), and basically most of the rest of the life to “accumulate things and prestige.”

- We do not stop and think about how the last years of the life are going to be, let alone about future lives. By the time we have made much of those accomplishments, our senses start degrading, and no matter how much money we have, we will never be able to maintain our physical appearance or the level of sense pleasure to our liking.

[WebLink: YOUTUBE: Done Got Old](#)

- The problem is that we are too busy to contemplate on such issues because we are in a frantic struggle to “make money for survival”, and whatever vacation time we get we would not want to spend that time for contemplation, but to go on trip or do some such activity to “enjoy ourselves.” But when one gets back from a vacation, it feels like one needs another to recover from those hectic activities.

8. There is another reason that people do not want to even think about such things; it could be depressing. But I can say with conviction that once one understands the “true nature of this world”, it WILL lead to a peaceful state of mind. It will also be easier to get into *samādhi* and *jhānā*.

- The reason is that as one understands *anicca*, *dukkha*, *anatta* (the futility of doing immoral things to gain sense satisfaction in world that is INHERENTLY not setup for that), one GRADUALLY loses attachment to worldly things and this makes the mind peaceful; this is the root cause of *nirāmisa sukha*; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”
- *Nibbāna* or “Nivana” or “cooling down” is not like any sense pleasure. Rather, it is a relief. A good analogy is the following: suppose someone has a migraine headache; then the day that headache disappears, that person will get a HUGE sense of relief. It is not a sense pleasure, but rather a feeling of well-being that is hard to express.

9. I can give one example to make this point. Many people who start understanding *anicca*, *dukkha*, *anatta*, realize that they do not watch TV or go to entertainment events as much as they used to. This is not something they do deliberately, it just happens. They would rather enjoy a meditation session at home or read/listen to Dhamma. It may be already happening to some of you.

- The mind cannot be forced. It just takes the better path; **but the mind has to be exposed to the better, correct path.** This is why giving true Dhamma is the best giving.

6.2.9 What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons?

Revised February 20, 2019; August 21, 2019

1. While the concept of a Creator God is absent in Buddha Dhamma (Buddhism), some beings fit into some conventional ideas on satan, angels, and demons, such as “Seth” and “Ramtha.” Since some readers may not be familiar with “Seth” and “Ramtha,” let me first provide some background.

- Jane Roberts wrote a series of popular books based on “Seth,” a being who could “possess” her body with her permission, and spoke to her husband about various things about the world; see, for example, “Seth Speaks” by Jane Roberts (1994). Seth commented on diverse issues and made many predictions too. I am not sure how those “predictions” worked out, but I am sure the success rate must be no better than any human making such predictions.
- Then there is “Ramtha,” who speaks through J. Z. Knight; see, for example, “Ramtha -The White Book” by J. Z. Knight (2005). He is a very benevolent being, proving honest advice on how to live a better life. As I understand, there is a significant following for Ramtha.

2. Therefore, there are two issues (or concepts) to be discussed:

- First, there is the more predominant belief of a “Creator God” in many religions. That concept is of course in direct contradiction with not only Buddha Dhamma, but also with modern science. The principle of Causality is the basis of both Buddha Dhamma. There must be a cause(s) for every effect.
- On the other hand, modern science does not believe in any “unseen beings.” Science does not attempt to tackle phenomena not measurable with physical instruments.
- We will discuss both the concept of a creator and also possible influence by unseen living beings.

3. Some background on the idea of a Creator God: In my early stages of learning about other religions, I read a variety of books ranging from those by C. S. Lewis (“Mere Christianity” is an excellent introduction) to “The Language of God” by Francis Collins (2007) to understand the “case for a Creator”; see, [“The Language of God” by Francis Collins.](#)”

- From all those books, the books by these two authors better focus on the issue to provide a rational basis for believing in a creator God.

4. As I understand, one reason for those two authors for believing in a Creator is the existence of Moral law. How can we know and feel the truth of the Moral laws unless God instilled those in us?

- On the other side, both authors struggled with the issue of Satan (or Devil), and why there is suffering.
- Why would God allow the existence of Satan, and the associated immoral behavior by people? The main conclusion was that God chose to give the man free will, and the man abused it.
- Lewis in particular worried about the existence of suffering. Why would God allow that?

5. Let us see what Buddha Dhamma says about those two issues.

- Of course, in Buddha Dhamma, there is no Creator. Everything happens due to (multiple) causes and by definition, there is no first cause (i.e., a Creator). The “world” has existed as far as one (with supernormal powers or *abhiññā*) can see; for details, see, [“The Grand Unified Theory of Dhamma.”](#)
- Even people without *abhiññā* powers can remember one or a few past lives; see, [“Evidence for Rebirth.”](#) In some exceptional cases, some can recall multiple past lives under hypnosis; see the book “Many Lives, Many Masters” by Brian Weiss, who is a psychotherapist.

6. In Buddha Dhamma, “the good” and “the bad” in this world are all built into nature’s laws. Any sentient being experiences “the world” with its sense faculties, and that experience comes in the form of thoughts (*citta*).

- Based on those sense inputs AND one’s *gati* AT THAT TIME, one generates various “good” and “bad” responses. These responses first manifested as mere thoughts, but we may act on them further by speech and bodily actions.
- There are 52 mental factors (*cetasika*) that include both “good” characteristics (such as kindness, generosity, fear and shame of wrong, etc.), and “bad” traits (such as greed, hate, shamelessness and fearlessness of wrong doing, etc.). In the “[Abhidhamma](#)” and “[Tables and Summaries](#)” sections.
- Until one becomes one of the “*attha purisa puggala*” (eight Noble Persons), one WILL have both good and bad *gati* that COULD lead to births in the *apāyā*.

7. Thus there is no “Creator God” or a “Satan.” Each person acts on his/her own free will and commit moral or immoral acts. What a person today is the “cumulative result” of all one’s actions in the deep past. These manifest as our character (or “*gathi*” or “*gathi*”) or *sansāric* habits (or “*āsavas*”). There are many posts on this issue at the site, starting with “[Habits, Goals, and Character \(Gathi\)](#).”

- And these *gathi* and *āsavas* are in constant flux; thus, one could be a murderer one day, but then through sheer willpower can decide to be a “better person.” There is no “soul” or a fixed “self.” One cannot say there is “no-self” either, because one’s “*gathi*” or “*āsava*” are unique characteristics and are “one’s own”; see, “[What Reincarnates? – The Concept of a Lifestream](#).”

8. And no one else can make that change but oneself. Even the Buddha can only show the way to change, i.e., how to change these “*gathi*” and the “*āsavas*” for the better. When one follows that one can feel the “cooling down” or “*niveema*” or the *nirāmisā sukha*. That is the real goal in Buddhist meditation; see, “[1. Introduction to Buddhist Meditation](#).”

- The “moral code” comes naturally out of this big picture. One can lead a peaceful life by practicing “*dasa kusala*” (ten moral acts), and avoiding “*dasa akusala*” (ten immoral acts); see, “[Ten Immoral Actions \(Dasa Akusala\)](#)” and the follow up post.

9. Let us also discuss briefly “demons” and “angels” (or other gods). Most Creator-based religions have such entities. And they are supposed to be able to influence humans. Are there beings like that according to Buddha Dhamma?

- Yes. In Buddha Dhamma, the world is much more complicated than with just demons and angels. We can see and experience only two realms (human and animal) out of 31 possible realms in this world; see, “[The Grand Unified Theory of Dhamma](#).”
- If someone develops *abhiññā* powers (see, “[Power of the Human Mind](#)” and follow-up posts), depending on the level attained one could “see” some or many of these other beings. Some people can do this at present.

10. However, even the majority of people with *abhiññā* power can only “see” some inhabitants in the lowest 11 realms or “*kāma loka*.” That includes the six *deva loka* with less dense bodies than ours.

- The beings in the *rūpa loka* and the *arūpa loka* have “bodies” even less dense than those in the *deva* realms, and it is even more difficult to “see” them.
- The six realms in the *deva loka* are the closest thing to a “heaven” according to the Buddha Dhamma. Those beings have bodies that are free from physical illnesses, and there is much more happiness there than in the human world. And they have long lifetimes. However, any being in any higher realm can end up in the lowest four planes (*apāyā*) in the future unless they reach at least the *Sotāpanna* stage of *Nibbāna*.

11. Some of these beings can communicate with humans with or without *abhiññā* powers. Some of these beings are benevolent, and others who are evil. As pointed out in the posts on “*gathi*”, a being normally communicates with a human with similar “*gathi*” or character.

- Thus an evil being (we could say “a demon”) tries typically to communicate with a human with similar lousy character. They may try to impress the human and try to get their agenda fulfilled.
- A benevolent being (we could say “an angel” or “a god”) is usually a *deva* from the six *deva* realms. They like to help out people with good character, but usually, do not try to communicate directly. Typically, the person may not even know about it.

12. Therefore, many such beings like to “show off” and also genuinely try to help people live a better life. But those beings themselves are “travelers of *samsāra*” who happen to have a good birth for a more extended period.

- Then some beings are evil or with bad intentions. I am not aware of any prominent cases like those mentioned in #1 above. However, there are many reports on “hearing voices” and even committing crimes based on the instructions through such voices.

13. Those beings with bad intentions cannot influence us if our mindsets are NOT COMPATIBLE with theirs. That is a crucial point to understand!

- **One is ALWAYS responsible for one’s action. If one is influenced by an “unseen evil being,” that is also due to one’s own lack of morality (one has cultivated bad “*gati*”).**
- **Just as in common law, ignorance of Nature’s laws is not an excuse.**
- This is why we all have been trapped in this suffering-filled rebirth process for this long. We had not been able to understand Nature’s laws. Only a Buddha can understand those, and we should be thankful that we live in a time when that message is still available.
- We need to learn Dhamma, get rid of bad *gati*, and cultivate good *gati*. That will pave the way to becoming a Noble Person and thus be free of all future suffering!

14. This world is very complex, and we perceive only a tiny part of it. But the point is that there is no place anywhere in the 31 realms that can provide permanent happiness.

- **There is no point in pursuing such demons or even angels. They are in the same predicament, or worse, compared to us. Those benevolent beings will help us, even without seeking help, if they see the good in us.**
- **As humans, we have the unique advantage of learning the truth about the dangers of this rebirth process (*samsāra*) and work towards getting out of it by seeking *Nibbāna* or “cooling down.” That was THE message of the Buddha.**

6.2.10 Paṭisandhi Citta – How the Next Life is Determined According to Gathi

Revised September 7, 2016; revised #2 on March 15, 2018; September 7, 2019

1. The transition of a life-stream from one existence (*bhava*) to another takes place during the last *citta vīthi* of the present *bhava*. For example, when a human is reborn an animal or a *deva*. For a fundamental description of this process, see, “[Cutī-Paṭisandhi – An Abhidhamma Description](#).”

- But here let us look at how different types of kamma, as well as one’s “*gati*” (pronounced “*gathi*”) lead to corresponding rebirths in different realms.

2. As discussed in “[Akusala Citta and Akusala Vipāka Citta](#),” all ten types of *akusala kamma* are done with 12 types of *akusala citta*.

- Only those five *akusala cittā* with wrong views (*micchā diṭṭhi*) or *vicikicchā* can lead to rebirth in the *apāyā* (four lower realms). Those *akusala cittā* lead to just one *paṭisandhi vipāka citta*, and it is called

the “*akusala vipāka upekkhā santīraṇa citta*.” That is the type of *cittā* that comes to the mind of the dying person destined for the *apāyā*.

- The two dislike-rooted (*paṭigha*) *cittā* do not arise at the *Anāgāmi* stage. The remaining five *akusala citta* do not occur only in Arahants; see, “[Akusala Citta and Akusala Vipāka Citta](#).”

3. That one *paṭisandhi citta* can lead to rebirth in an uncountable number of “*bhava*” in the four lowest realms. In the animal realm itself, there is an uncountable number of varieties.

- Thus what determines the actual “place of birth” in the four lowest realms is one’s “*gati*.” Once the fate is determined by to be born in one of the four lowest realms due to an *akusala kamma*, the next step for nature is to match “*gati to gati*.” A greedy person is likely to be matched with a birth in the *peta* realm (hungry ghosts). A vicious person is expected to be destined to the hell (*niraya*); see, “[How Character \(Gathi\) Leads to Bhava and Jāti](#).”

4. Now let us look at how rebirth takes place according to one’s *kusala kamma*. The merits of a *kusala kamma* are ENHANCED when done without *moha*, i.e., without *micchā diṭṭhi* (or with at least mundane *sammā diṭṭhi*). That is discussed in the post, “[A Simple way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\)](#).”

- Thus out of the eight *mahā kusala kamma* (great meritorious actions), four are done with knowledge. They, of course also *alobha* and *adosa*, i.e., generosity and loving-kindness. Since they have all three *kusala* roots, they are “*tihetuka*” birth (“*thi*” means three and “*hethu*” means roots). **They lead to the best kind of rebirths.** Those are “*tihetuka paṭisandhi*” or “rebirth with three roots.”
- The other four *mahā kusala kamma* have generosity and loving kindness, but without mundane or *lokuttara sammā diṭṭhi*. Thus the resulting *kamma vipāka* lead to “*dvihetuka paṭisandhi*” or “rebirth with two roots.” They also point to birth in the realms 5 through 11 (i.e., in the human and *deva* realms), but they will have less *kammic* power for that birth.

5. It is only those with *tihetuka paṭisandhi* who can attain *magga phala* and attain *Ariya jhānā* in this life. Those with “*dvihetuka paṭisandhi*” lack in necessary wisdom (but this is NOT book-knowledge); they can make progress and acquire the essential merits to have a future *tihetuka paṭisandhi*. But it is impossible to say who has a *tihetuka* or *dvihetuka paṭisandhi*; only a Buddha is capable of that.

- There is one more *paṭisandhi citta* that is possible from a lower grade *mahā kusala kamma*. That is also a *kamma* done without knowledge and with less enthusiasm. It involves a *kusala vipāka upekkhā santīraṇa citta*, and is a “rebirth with no good roots.” That is an “*ahetuka paṭisandhi*.” Note that here even though there are two roots present technically, they are very weak due to absence of enthusiasm. For example, some people participate in exemplary work just because others do it, or they did not have a choice.
- Such an “*ahetuka paṭisandhi*” can leads to births only in the human or the lowest *deva* realm. Such a birth is comparatively easy to recognize (but not always). People with *ahetuka paṭisandhi* have low IQ, could be blind or deaf at birth,. Or they are severely handicapped in other ways.
- However, such deficiencies COULD occur due to problems encountered in the womb (if the mother is a drug addict or had an ailment during the pregnancy). That is why, in some cases, we see people with above characteristics, but are smart. They are not born with an *ahetuka paṭisandhi* and could learn Dhamma and attain *jhānā*.

6. Thus we see that there is only **one *paṭisandhi citta* due to the ten *akusala kamma* (from 12 *akusala citta*). There are nine possible *paṭisandhi citta* due to the eight *mahā kusala kamma*.**

- The remaining *paṭisandhi citta* lead to rebirth in the *Brahma loka* (16 *rūpa loka* and four *arūpa loka*). These rise due to *jhānic* states: rebirth in the *rūpa loka* are due to the 5 *rūpa jhānā* and rebirth in the four *arūpa loka* are due to the four *arūpa jhānā*.

7. Therefore, **only 19 *paṭisandhi citta* that lead to rebirth anywhere in the 31 realms.** As we have discussed, there is an uncountable number of species (we ourselves can see numerous animal species). **What differentiates different species are the “*gathi*.”** You can see that each species has its own “character”: Even within a given species, there are differences in “*gati*.” If you look at dogs, there are some who are vicious and then there are cuddly (poodles).

- In the days of the Buddha, when someone dies, relatives of the deceased usually ask the Buddha “what the *jāti* is, and what the *gati*” is for the new birth. These days we don’t have the Buddha to clarify that for us. But we can sort of guess what “*gati*” we have and make sure to change them for the better.
- When one attains the *Sotāpanna* stage, any “*gati*” matching those in the *apāyā* is permanently removed. That means hate, greed, ignorance at the highest levels.
- At the *Sakadāgāmī* stage, one’s liking to a “dense body” to enjoy sense pleasures is no longer there. Such a “dense body” is one that can get diseases. Thus a *Sakadāgāmī* is never born in human or lower realms where sickness and body aches are a fact of life.
- Then at the *Anāgāmī* stage, one loses craving for enjoying pleasures with the nose, tongue, and the body. Then one can find matching “*gati*” only in the *rūpa* and *arūpa loka*.
- At the *Arahant* stage, one loses craving for any sensory pleasure associated with even a trace of matter. At that stage, the mind attains the true freedom; no more “*gati*” left.

6.3 Seeking Nibbāna

1. This section is for those who are interested not merely in pursuing a good life or seeking better lives in future births. Other religions can also provide guidance for those goals to a certain extent. The uniqueness in the Buddha's message is that there is perpetual suffering in the unending cycle of rebirths in "this world", the root causes for that suffering, that there is possible release from that suffering (Nibbāna), and there is a way to attain *Nibbāna*.

2. The first stage of attaining Nibbāna is the *Sotāpanna* (Stream Entry) stage. In order to reach this stage, one needs to have a complete understanding of Buddha Dhamma (or the laws of nature). Since only a Buddha can discover these laws, it is not possible for anyone (no matter how intelligent) to discover these laws by oneself.

3. Once the *Sotāpanna* stage is attained, one knows what to do next. Thus there is no need to get further information from anywhere else. My goal with this site is to provide necessary information to attain the *Sotāpanna* stage.

[Sotāpanna Stage of Nibbāna](#) subsection has a number of posts describing the *Sotāpanna* stage.

6.3.1 Aṭṭha Purisa Puggalā – Eight Noble Persons

March 4, 2019; revised #9 on March 6, 2019; October 5, 2019 (#11)

Introduction

1. There are many *suttā* that describe various characteristics of *Aṭṭha Purisa Puggalā* or *Ariyā* (Noble Persons). We will discuss some key features in this post, especially regarding the maximum time taken to attain the *Arahanthood*.

- There are likely to be several different ways that Noble Persons are defined in the *Tipiṭaka*. Here we will start by considering a categorization based on the state of development of *pañca indriya* in a set of *suttā* in *Samyutta Nikāya* 48.
- The "[WebLink: suttacentral: Suddhika Sutta \(SN 48.1\)](#)" states what the *pañca indriya* are: *Saddhā indriya, vīriyā indriya, sati indriya, samādhi indriya, paññā indriya*.

2. The "[WebLink: suttacentral: Pathama Vibhaṅga Sutta \(SN 48.9\)](#)" explains what those five *indriya* are. I will just provide a short translation to get the idea.

- *Saddhā indriya* is optimized when one truly realizes the truth of the virtues of the Buddha (*itipi so bhagava...*): “That Blessed One is an *Arahant*, perfectly enlightened, accomplished in true knowledge and conduct, perfectly purified, knower of the wider world (of 31 realms), unsurpassed in virtue, teacher of *devas*, *brahmā*, and humans, the Enlightened One, the Blessed One.” This is about the Buddha as a person AND even more importantly, the comprehension of the concept of Buddha as “*bhava uddha*“ [**Buddha = bhava + uddha**: one who figured out how to stop existences (*bhava*) from arising. *uddha* is rooting out]; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)”
- *Viriya indriya* represents one’s effort in cultivating *kusala* and discarding *akusala*.
- *Sati indriya* represents one’s ability to be mindful of one’s thoughts, speech, and actions.
- *Samādhi indriya* indicates one’s ability to focus on *Nibbāna* and to get to *samādhi*.
- *Paññā indriya* represents one’s comprehension of the Four Noble Truths about *sansāric* suffering.

Categorization Based on *Pañca Indriya*

3. [WebLink: suttacentral: Dutiyasāṅkhitta Sutta \(SN 48.13\)](#) states, “*Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā arahaṃ hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi dhammānusārī hoti, tato mudutarehi saddhānusārī hoti. Iti kho, bhikkhave, indriyavemattatā phalavemattatā hoti, phalavemattatā puggalavemattatā*”ti.

- **Translated:** “*Bhikkhus, one who has fulfilled pañca indriya is an Arahant*; one who has developed them to lesser levels are *Anāgāmī, Sakadāgāmī, Sotāpanna, Dhammānusārī, and Saddhānusārī. Bhikkhus*, that is how different levels of *indriya* development determine the level of progress.”
- As we know, *Dhammānusārī* and *Saddhānusārī* are *Sotāpanna Anugāmis*.

Two Kinds of *Sotāpanna Anugāmi*

4. There are 10 *suttā* in the “[WebLink: suttacentral: Okkantika Saṃyutta \(SN 25\)](#)” that focus only on the two kinds of *Sotāpanna Anugāmis*: *Dhammānusārī* and *Saddhānusārī*. These are important because they emphasize the need to comprehend the *anicca* nature of the five aggregates (*pañcakkhandha*).

“[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)” states: “*Cakkhuṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvī; sotaṃ aniccaṃ vipariṇāmi aññathābhāvī; sota..ghānaṃ.. jivhā .. kāyo .. mano anicco vipariṇāmi aññathābhāvī. Yo, bhikkhave, ime dhamme evaṃ saddahati adhimuccati—ayaṃ vuccati saddhānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayoṇiṃ vā pettivisayaṃ vā upapajjeyya; abhabbo ca tāva kālaṃ kātuṃ yāva na sotāpattiphalam sacchikaroti.*”

- **Translated:** “*Bhikkhus, the eye is of anicca nature, bound to be destroyed, and is subject to unexpected change during its existence.*” The ear... nose... tongue... body... mind... *Bhikkhus, one who has conviction and belief that these phenomena are this way is called a faith-follower (Saddhānusārī)*: one who has entered the Noble Path (*sammattaniyāma*), has entered the plane of integrity (*sappurisabhūmi*), has transcended the plane of the run-of-the-mill (*puthujjanabhūmi*). He is incapable of doing any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry shades. He is incapable of passing away (**from this Ariya birth**) until he has realized *Sotāpatti phala*.
- Then the same verse is repeated for the *Dhammānusārī* with the following replacement for the part marked in red above for the *Saddhānusārī*: “**one who, after pondering with insight, has accepted that these phenomena are this way is called a Dhamma-follower (Dhammānusārī).**”

Maximum of Seven More *Bhava* For a *Sotāpanna* and Seven More *Ariya bhava* For a *Sotāpanna Anugāmi*

5. It is important to realize from #4 above that a *Sotāpanna Anugāmi* will never “die” from the *Ariya* birth, and that no time limit is given. Only upon getting to the *Sotāpanna* stage, that one will have a limited number of births; see below.

- However, a *Sotāpanna Anugāmi* will have only 7 more *Ariya bhava* left (*Sotāpanna, Sakadāgāmi Anugāmi, Sakadāgāmi, Anāgāmi Anugāmi, Anāgāmi, Arahant Anugāmi, and Arahant*).
- Thus, it appears that is what is stated in the *Ratana Sutta* as, “*Na te bhavaṃ aṭṭhamamādiyanti*” (7 types of *Ariya Bhava* left) for eight types of Noble Persons (*Ariyā*).

6. The other 9 *suttā* in the “[WebLink: suttacentral: Okkantika Samyutta \(SN 25\)](#)” go through the same descriptions for *Dhammānusāri* and *Saddhānusāri* in terms of the six types each of *rūpa, viññāna, samphassa, samphassajā vedanā, rūpasāññā, rūpasāñcetanā, rūpatanḥā, dhātu*, and the five types of *khandha* (i.e., *pañcakkhandha*).

Time Limits for other Noble Persons to Attain *Arahanthood*

7. The time limits for the other Noble Persons are given in the “[WebLink: suttacentral: Saupādisesa Sutta \(AN 9.12\)](#).”

- There are five kinds of *Anāgāmis* (see #10 below), and they all have overcome the first five *saṃyojana* of *sakkāya diṭṭhi, vicikiccā, and silabbata parāmāsa, kāma rāga, paṭigha*.
- Some of them will be born in a *brahma* realm reserved for the *Anāgāmis*, will remove the remaining *saṃyojana* of *rūpa rāga, arūpa rāga, māna, uddhacca, avijjā*, and attain *Parinibbāna* there.
- Others would have already removed two more *saṃyojana* of *rūpa rāga* and *arūpa rāga*, and thus will not be born in any realm, and thus will remain in the *gandhabba* state until the *kammic* energy runs out. This is called *antarāparinibbāna* (“*Parinibbāna* in between realms”). This was discussed at the forum: “[WebLink: Pure Dhamma Forum: Antara Parinibbāna](#).”

8. Then there is the Noble Person with the *Sakadāgāmi phala* (including those *Anāgāmi Anugāmis*). “[WebLink: suttacentral: Saupādisesa Sutta \(AN 9.12\)](#)” states that, “*So tiṇṇaṃ saṃyojanānaṃ parikkhayā rāgadosamohānaṃ tanuttā sakadāgāmi hoti, sakideva imaṃ lokaṃ āgantvā dukkhassantaṃ karoti*.”

- **Translated:** “With the ending of three fetters (*saṃyojanā*), and the weakening of greed, hate, and delusion, a *Sakadāgāmi* will come back to this world only once to *deva* realms.”

Three Types of *Sotāpanna*

9. Then there are three types of *Sotāpanna*:

“*So tiṇṇaṃ saṃyojanānaṃ parikkhayā ekabījī hoti, ekaṇyeva mānusakaṃ bhavaṃ nibbattetvā dukkhassantaṃ karoti*.”

“*So tiṇṇaṃ saṃyojanānaṃ parikkhayā kolaṅkolo hoti, dve vā tīṇi vā kulāni sandhāvitvā saṃsaritvā dukkhassantaṃ karoti*.”

AND “*So tiṇṇaṃ saṃyojanānaṃ parikkhayā sattakkhattuparamo hoti, sattakkhattuparamaṃ deve ca manusse ca sandhāvitvā saṃsaritvā dukkhassantaṃ karoti*.”

Translated:

“With the ending of three *saṃyojanā*, an *ekabījī* will be reborn just one time in human existence (*bhava*), then make an end of suffering.”

“With the ending of three *saṃyojanā*, a *kolaṅkolo* will be two or three *bhava* then make an end of suffering.”

“With the ending of three *saṃyojanā*, a *sattakkhattuparamo* has most seven *bhava* among *devas* and humans and then make an end of suffering.”

- The fact that they are all *Sotāpannas* becomes clear in #10 below.
- It is also important to note that there is no mention in this *sutta* about the *Sotāpanna Anugāmis*. **This *sutta* is about those who have “seen” *Nibbāna*.** A *Sotāpanna Anugāmi* — in the language of *Abhidhamma* — has only transcended the “*anāriya*” level and made it to the “*gotrabu*” stage. In the future, they will attain the *Sotāpanna* stage when they get to the *magga* and *phala citta*. See the end of the post, “[Citta Vīthi – Processing of Sense Inputs](#),” where *magga phala citta vīthi* is discussed.

Summary in *Puggalapaññatti*

10. The above descriptions are confirmed by “[WebLink: suttacentral: Ekakapuggalapaññatti](#)” in *Abhidhamma*, where 54 types of persons are listed. We will mention just those categories that are of interest here.

- *Katamo ca puggalo sammāsambuddho? Idhekacco puggalo pubbe ananussutesu dhammesu sāmaṃ saccāni abhisambujjhati; tattha ca sabbaññutaṃ pāpuṇāti, balesu ca vasībhāvaṃ—ayaṃ vuccati puggalo “sammāsambuddho.”*
- *Katamo ca puggalo paccekasambuddho? Idhekacco puggalo pubbe ananussutesu dhammesu sāmaṃ saccāni abhisambujjhati; na ca tattha sabbaññutaṃ pāpuṇāti, na ca balesu vasībhāvaṃ—ayaṃ vuccati puggalo “paccekasambuddho.”*

The rest belong to two categories: “*Aṭṭha ariyapuggalā ariyā. Avasesā puggalā anariyā.*”

Here are the 8 Noble Persons or *ariyā* (*aṭṭha ariyapuggalā*):

Tiṇṇaṃ saṃyojanānaṃ pahānāya paṭipanno puggalo sotāpattiphalasacchikiriyāya paṭipanno (Sotāpanna Anugāmi). Yassa puggalassa tiṇi saṃyojanāni pahīnāni—ayaṃ vuccati puggalo “sotāpanno.”

Kāmarāgabyāpādānaṃ tanubhāvāya paṭipanno puggalo sakadāgāmiphalasacchikiriyāya paṭipanno. Yassa puggalassa kāmarāgabyāpādā tanubhūtā—ayaṃ vuccati puggalo “sakadāgāmī.”

Kāmarāgabyāpādānaṃ anavasesappahānāya paṭipanno puggalo anāgāmiphalasacchikiriyāya paṭipanno. Yassa puggalassa kāmarāgabyāpādā anavasesā pahīnā—ayaṃ vuccati puggalo “anāgāmī.”

Rūparāgaarūparāgamānauddhaccaavijjāya anavasesappahānāya paṭipanno puggalo arahattaphalasacchikiriyāya paṭipanno. Yassa puggalassa rūparāgo arūparāgo māno uddhaccaṃ avijjā anavasesā pahīnā—ayaṃ vuccati puggalo “arahā.”

Sotāpanna Anugāmis fall into 2 categories:

Yassa puggalassa sotāpattiphalasacchikiriyāya paṭipannassa paññindriyaṃ adhimattaṃ hoti, paññāvāhiṃ paññāpubbaṅgamaṃ ariyamaggaṃ bhāveti—ayaṃ vuccati puggalo “dhammānusārī.”

Yassa puggalassa sotāpattiphalasacchikiriyāya paṭipannassa saddhindriyaṃ adhimattaṃ hoti, saddhāvāhiṃ saddhāpubbaṅgamaṃ ariyamaggaṃ bhāveti—ayaṃ vuccati puggalo “saddhānusārī.”

- Note that there is no time limit given for a *dhammānusārī* and a *saddhānusārī*.

Sotāpannas fall into 3 categories:

Idhekacco puggalo tiṇṇaṃ saṃyojanānaṃ parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So sattakkhattuṃ deve ca mānuse ca sandhāvitvā saṃsaritvā dukkhassantaṃ karoti—ayaṃ vuccati puggalo “sattakkhattuparamo.”

Idhekacco puggalo tiṇṇaṃ saṃyojanānaṃ parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So dve vā tīṇi vā kulāni sandhāvitvā saṃsaritvā dukkhassantaṃ karoti—ayaṃ vuccati puggalo “kolaṃkolo.”

Idhekacco puggalo tiṇṇaṃ saṃyojanānaṃ parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So ekaṇyeva mānusaṃ bhavaṃ nibbattetvā dukkhassantaṃ karoti—ayaṃ vuccati puggalo “ekabīṭṭi.”

- Here, a *sattakkhattuparamo* seems to have seven “births” (*jāti*) or “bhava” among the humans and devas. It is not clear whether it is 7 *jāti* or *bhava*.
- A *kolaṃkolo* seems to have two or three births (*kula* means born into a certain caste or clan); but it possible that it could mean two or three *bhava*.
- An *ekabīṭṭi* has one *bhava* as a human.

Anāgāmis fall into 5 categories and they have essentially one existence after death as a human, either born in a *brahma* realm or in the *gandhabba* state; see #7 above (I will just state the categories):

antarāparinibbāyī, upahaccaparinibbāyī, asaṅkhāraparinibbāyī, sasāṅkhāraparinibbāyī, uddhaṃsoto akaniṭṭhagāmī.

Arahants fall into 2 categories they, of course, are not reborn (I will just state the categories):

ubhatobhāgavimutto, paññāvimutto.

Sotāpanna Anugāmi – At Least a Trace of Understanding of Tilakkhaṇa

11. “[WebLink: suttacentral: Alagaddūpama Sutta \(MN 22\)](#)” also provides similar information and provides another description of *Sotāpanna Anugāmis*. At the end of the *sutta*, it describes the types of Noble Persons as above, and at the very end states, “*Evaṃ svākkhāte, bhikkhave, mayā dhamme uttāne vivaṭe pakāsīte chinnapilotike yesaṃ mayi saddhāmattaṃ pemamattaṃ sabbe te saggaparāyanā*”*ti.*”

- **Translated:** “those who have even a trace of faith and liking for me (*saddhāmattaṃ pemamattaṃ; mattaṃ* means a “trace”), are all headed for *deva* realms (*saggaparāyanā*).”
- When one has removed the ten types of *micchā diṭṭhi*, and start comprehending *Tilakkhaṇa*, one becomes a *Sotāpanna Anugāmi*. They are also released from the *apāyā*. See, “[Sotāpanna Anugāmi – No More Births in the Apāyā](#).”

Arahanthood – Not Annihilation But End of Suffering

12. There is also this important verse towards the end of the “[WebLink: suttacentral: Alagaddūpama Sutta \(MN 22\)](#)”: “*Yathā cāhaṃ na, bhikkhave, yathā cāhaṃ na vadāmi, tathā maṃ te bhonto samaṇabrāhmaṇā asatā tucchā musā abhūtena abbhācikkhanti: ‘venayiko samaṇo gotamo, sato sattassa ucchedaṃ vināsaṃ vibhavaṃ paññāpeti’*ti.* Pubbe cāhaṃ, bhikkhave, etarahi ca dukkhañceva paññāpemi, dukkhassa ca nirodhaṃ.*”

- **Translated:** “..*Bhikkhus*, I have been baselessly, vainly, falsely, and wrongly misrepresented by some recluses and *brahmins* thus: ‘The recluse Gotama is one who leads people astray; he teaches the annihilation, the destruction, the extermination of an existing being.’ ..*Bhikkhus*, both formerly and now what I teach is suffering and the cessation of suffering.”
- Many people today have this wrong perception. It could arise until one gets at least to the *Sotāpanna Anugāmi* stage and starts removing *Sakkāya Diṭṭhi*. It is basically the belief that there is an “existing person” that can enjoy things the world has to offer. They do not realize that there is much more suffering in this world. Even though there are short-lived pleasures, there is unimaginable suffering especially in the rebirth process.

- It is only at the *Arahant* stage that the perception of a “me” (*asmi māna*) goes away; see, “[Sakkāya Ditthi is Personality \(Me\) View?](#).”

Different types of persons are listed in the “[WebLink:suttacentral: Ekakapuggalapaññatti](#)” of the “[WebLink:suttacentral: Puggalapaññatti](#)” in Abhidhamma.

6.3.2 *Āsava, Anusaya, and Gati (Gathi)*

Revised March 31, 2017; Re-revised August 26, 2017; October 27, 2017; October 7, 2019; July 1, 2020

Introduction

1. *Nibbāna* is “*āsavakkhaya*” or removing *āsava*. With a strong sense input, hidden *āsava* can bubble up as *anusaya*, and one’s ingrained *gathi* (*gati*) are displayed.

- We are going to tie up a series of posts that I have posted on *gati* and *āsava* with this post. See, “[Habits and Goals, and Character \(Gati\)](#),” “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#),” “[Sansāric Habits, Character \(Gati\), Cravings \(Āsava\)](#).”
- It is difficult to find English translations for some of the Pāli words that the Buddha used. But the key is to grasp what is meant by those terms. Once the idea sink in, that is all that matters. One could even just use the Pāli term and KNOW what is meant by it. It is like learning the meaning of the word “dollar” or “car.” Different languages use the same words, but everybody understands what is meant by those words.

Anusaya Come Up Due to Āsava

2. *Anusaya* is normally translated as “latent tendencies” and *āsava* as “mental fermentation.” The word “*gati*” is hardly mentioned in current texts, but is a critical concept in Buddha Dhamma.

- *Āsava* are indeed “mental fermentation” that lie deep down in us. That comparable to mud sitting at the bottom of a glass of water.
 - If that glass of water is disturbed with a straw, then some of that mud comes to the surface. That is like *āsava* bubbling up when we are disturbed by a strong sense event. When that happens, we display our real character/habits or *gati* (*gathi*).
 - In other words, some *gati* and *āsava* lay hidden (sleeping), and are called “*anusaya*.” With a strong enough “trigger” an ingrained *anusaya* can be brought to the surface. *Anusaya* are the hardest to get rid of.
3. As a given sentient being traverses the “*saṃsāra*” or the “rebirth process”, one makes transitions from “*bhava* to *bhava*,” but within a given human (or animal) *bhava*, one may be born numerous times as a human (or the same animal); see, “[Bhava and Jāti – States of Existence and Births Therein](#).”
- Through all these, the physical appearance will change drastically, especially when *bhava* is changed. Thus when it makes a transition from being a *deva* to human, or from a human to a dog. There is no resemblance of a continued “soul.”
 - However, our *āsava* remain with us through the *saṃsāric* journey. Of course, *āsava* can change during a given *bhava*. Most changes in *āsava* occur during human *bhava*, which is a topic we will discuss later.

Four Types of *Āsava*

4. *Āsava* are four main types: *diṭṭhāsava* (*diṭṭhi āsava*), *kāmāsava* (*kama āsava*), *bhavasava* (*bhava āsava*), and *avijjasava* (*avijjā āsava*).

- *Diṭṭhāsava* goes away at the *Sotāpanna* stage, and *kāmāsava* removed at the *Anāgāmī* stage. All *āsava* disappear at the *Arahant* stage.
- What type of *āsava* “can be triggered to come up,” depends on the *bhava* one is in. In *kāma loka*, all *āsava* are “in play,” i.e., can be triggered by a sense event. In *rūpa* or *arūpa Brahma loka*, *kāmāsava* remain dormant, since there are no enticing *ārammaṇa* in Brahma realms. But unless one is an *Anāgāmī*, one still has *kāmāsava*, and that will “come into play” when one reborn in *kāma loka*.
- **Thus, one will not have *kāma anusaya* bubbling up when one is in *rūpa* or *arūpa* realms. Therefore, one will also not display any “*kāma gati*” that one has, while in *rūpa/arūpa* realms.**

5. That is another reason why the Buddha rejected both “self” and “no-self.” What character or any other quality displayed in a given *bhava* could be very different from another *bhava*. On the other hand, the set of *āsavas* remains with one (even though changing all the time).

- That is what I call a “dynamic self”: [“What Reincarnates? – Concept of a Lifestream.”](#)
- Now let us examine the roots of the words *anusaya* and *āsava* (*āsaya*); “*āsava*” is a synonym for “*āsaya*.”

6. In both Pāli and Sinhala, “*saya*” means a storage place: “*jalāsaya*” means a water reservoir; “*āmāsaya*” means the stomach where the food we eat goes to; “*gabbāsaya*” is the womb where the unborn baby is kept and nurtured until it is ready to come out, etc.

- “*Saya*” also means “sleeping” (as in “*sayanaya*” or සයනය in Sinhala). “*Anu*” indicates “food” or “defilements” in most cases. Therefore, “*anusaya*” means “sleeping” or “in storage” with some dominant characteristics.
- **When they are disturbed an *ārammaṇa* (a sensory input), they come to the surface as “*āsava*” or “likings.”** The word *ārammaṇa* is explained in detail in, [“Chachakka Sutta – No “Self” in Initial Sensory Experience.”](#)

Āsava Awakened By Triggers (*Ārammaṇa*)

7. When such a trigger awakens a “*ānusaya*,” then it is out as an “*āsava*,” and one will display it through one’s actions. Then we also say, one has that type of cravings or “*gati*.” These triggers are *ārammaṇa*. See, [“Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.”](#)

- For example, seeing a beautiful woman matching “his *gati*” could trigger *kāmāsava* in a calm person. He may get agitated upon seeing that woman. But he may not be “triggered” by seeing another woman, even if beautiful. That is a bit complex, but I am sure we all know this to be true.
- **And if he keeps thinking about that woman, that *āsava* will ferment and grow (condense). Thus the name “mental fermentation.”**
- How much one gets “agitated” depends on one’s *āsava* and the strength of the sensory input. Rapes, for example, occur when both are strong.

8. *Anusaya* is like active gun powder in a matchstick. The matchstick is harmless by itself and will cause no fire. But the POTENTIAL to create a fire is there.

- When the matchstick strikes a rough surface, the heat generated causes the gun powder to ignite and generate fire.
- In the same way, a robust sensory input can “awaken” and “fire-up” the sleeping *anusaya*.
- One’s *gati* become strong with repeated use, and one’s *āsava* is dependent on both *anusaya* and *gati*.
- An *Arahant* has removed all types of *anusaya*, *gati*, and hence *āsava*. No matter how strong a sense input comes in, he/she will not be “triggered” by it. A matchstick with no active gun powder cannot catch fire, no matter how hard a match strikes.

- An *Arahant* may still have *gati* that are **devoid of defilement**. They are just habits without *kammic* consequences. For example, there is an account in the *Tiṭṭaka* of a young *Arahant* who tended to jump over mud puddles.

Connection to *Gati* (Character/Habits)

9. “*Anusaya*” (and hence “*āsava*”) are the things we have liked for long, long times through uncountable lives in the *samsāra* or the rebirth process. They are the deep-seated cravings we have for certain things.

- “**Immoral *gati*” due to *anusaya* is what makes the *akusala-mūla Paṭicca Samuppāda* to take place and create “*bhava*” for the *sansāric* process. These “immoral *gati*” are the “*san gati*” in “*thiṇṇan san gati phasso*”; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”**

10. There are 7 types of *anusaya*: *ditthanusaya* (wrong views), *vicikiccanusaya* (tendency to do the unwise), *kamaraganusaya* (temptation for sense pleasures), *patigha anusaya* (temptation for hatred), *bhvaraganusaya* (craving for existence), *mananusaya* (sense of “me”) , and *avijjanusaya* (ignorance); see, for example, “[WebLink: suttacentral: Dutiya Anusaya Sutta \(AN 7.12\)](#).”

- There are four broad categories of *āsava*: *Diṭṭhāsava*, *Kāmāsava*, *Bhavāsava*, and *Avijjāsava*; see, “[WebLink: suttacentral: Āsava Sutta \(AN 6.58\)](#).”

Types of *Āsava/Anusaya*

11. The seven types *anusaya* can give rise to *āsava*.

- *Diṭṭhānusaya* and *vicikicchānusaya* give rise to *diṭṭhāsava*.
- *Kāmarāganusaya* and *paṭighānusaya* lead to *kāmāsava*.
- *Bhvarāganusaya* give rise to *bhavāsava*.
- *Avijjānusaya* and *mānanusaya* lead to *avijjāsava*.
- **One cannot REMOVE the other three *āsava* until one removes *diṭṭhāsava* at the *Sotāpanna* stage.**

12. *Diṭṭhāsava* is the craving or attachment to wrong views. That is why sometimes it is hard to accept or even consider other views. Again, there are views on numerous topics: religion, philosophy, politics, and combinations thereof.

- Comprehension of *anicca*, *dukkha*, *anatta* automatically leads to getting rid of *diṭṭhāsava*.
- *Kāmāsava* is craving for indulging in sense pleasures via the five physical senses. Within this broad category. Each person will have their own set of cravings. Some like music more than food, and food more than reading, etc. The combinations are endless.
- *Bhavāsava* is craving for existence. No matter where in the 31 realms one is born, one always wants to live. Again there are many possibilities. Most prefer *kāma loka* with all five senses. Some who enjoy *jhānic* pleasures may prefer birth in an *arūpa loka* with just the mind, etc.
- *Avijjāsava* is, of course, the root cause for all *āsavā*: not knowing the real nature of this world, i.e., not comprehending *anicca*, *dukkha*, *anatta*, and thus not understanding the Four Noble Truths.

Removal of *Āsava* and *Anusaya*

13. These seven types of *anusaya* and four *āsavā* go away step-by-step as one goes through the four stages of *Nibbāna*. A *Sotāpanna* has removed *Diṭṭhāsava*. *Kāmāsava* is lessened at the *Sakadāgāmī* stage and removed at the *Anāgāmī* stage. The other two are reduced at each stage also and go away only at the *Arahant* stage.

- When *anusaya* and *gati* go away, then, of course, *āsava* disappears without a trace. One will not crave anything. That is the ultimate state of “cooling” or *Nibbāna*.

14. It should be evident by now that our our character (*gati*) defines *anusaya* and *āsava*.
- All three, *āsava*, *anusaya*, and *gati* reinforced each other. One has a particular type of character because of the set of *āsava* and *anusaya* he/she has. On the other hand, none of the three will change unless one's character and habits change. That change is WILLFUL.
 - And there is the fourth parameter of habits (called “*gati purudu*” in Sinhala), which lies at the very bottom of the hierarchy. Some people talk rough, even when they are not mad. It is just a habit.
 - Getting rid of bad habits and cultivating good habits is the first step in controlling one's *āsava* (temptations) first and eventually getting rid of *anusaya*.

Removal of Bad *Gati* and Cultivating Good *Gati*

15. There are two critical aspects in dealing with changing one's habits:
- One needs to be mindful the negative consequences of the bad habits and positive consequences of good habits. **That is *satipaṭṭhāna*.**
 - And, one needs to avoid bad habits WILLFULLY, and WILLFULLY engage in ethical and moral practices. **That is *ānāpāna*.**
 - One would engaged in all those activities in *Satipaṭṭhāna/Ānāpāna*.
 - One can use the “search” box on the top right to find relevant posts on *Satipaṭṭhāna* and *Ānāpāna*. A practical, systematic way to do both is discussed in the “[Living Dhamma](#)” section.
16. That is the Path advocated by the Buddha. One could proceed a little on the Path and achieve a “sense of peace.” One could go further to make the future lives better, or one could go all the way and remove all four *āsava*, thus attaining the *Arahantship*.
- That is why “*āsavakkhaya ñāṇa*” or the “way to remove *āsava*” is the critical knowledge that the Buddha developed on attaining the Buddhahood. And that knowledge is in the Four Noble Truths, and the way to achieve “*āsavakkhaya*” is the Noble Eightfold Path.

Bigger Picture

17. We are fortunate to live in a time when science is providing further evidence and ways to understand this process. There is a series of posts in the “[Dhamma and Science](#)” section starting with, “[Truine Brain – How the Mind Rewires the Brain via Meditation/Habits](#)” and in the “Meditation” section starting with, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

18. Finally, where are these *āsava* in “storage” (as *anusaya*)? They are in the *kamma bhava* or our “immaterial world.”

- We have two “worlds”: one is the *rūpa loka* that we can see with our eyes.
- The other is the “immaterial world” that has energies below the *suddhaṭṭhaka* stage and also *nāma gotta* that do not have any power but are just memory records. This “immaterial world” is accessed with the *mana indriya*; see, “[What are rūpa? – Dhamma are rūpa too!](#)”
- For those who need to dig deeper, more information at “[Our Two Worlds: Material and Immaterial](#)” and “[What are Dhamma? – A Deeper Analysis](#).”
- Saying that one has *anusaya* is also the same as saying that a *viññāṇa* has been established in the *kamma bhava*, i.e., in the *nāma loka*.

Next, “[The Way to Nibbāna – Removal of Āsava](#)”,

- As mentioned above, *āsava* are four main types. Within each class, there can be an infinite variety. For example, “*kāmāsava*” will include *āsava* for sense inputs coming through five physical senses with an endless variety.
- “*Saya*” also means “sleeping” as in “*sayanaya*.”
- Therefore, “*āsaya*” means “sleeping” or “in storage” with some dominant characteristics. The term “*āsava*” is more common.
- As mentioned above, *āsava* are four main types. Within each class, there can be an infinite variety. For example, “*kāmāsava*” will include *āsava* for sense inputs coming through five physical senses with an endless variety.
- “*Anu*” is food or defilement depending on the context. When a strong sensory input comes, a defilement that are “sleeping” or “lying dormant” can be released and can come to the surface; hence, the name “*anusaya*.”

6.3.3 The Way to Nibbāna – Removal of Āsavā

Revised November 19, 2018; February 11, 2020

Introduction

1. The night the Buddha attained the Buddhahood, three unique pieces of knowledge (*tivijjā*) arose in him, namely:
 - The unique vision with which he was able to recollect innumerable former human existences (*pubbenivāsānussati ñāṇa*).
 - The ability to see beings passing away and being reborn according to their *kamma* (*cutupapāda ñāṇa*); and
 - The unique vision to see how to eliminate all kilesa (*āsava*) or defilements (*āsavakkhaya ñāṇa*).

Āsavakkhaya Ñāṇa

2. With the attainment of the *āsavakkhaya ñāṇa*, Sidharata Gotama became Buddha Gotama. That was the final step in purifying the mind. That was the fruit of all his efforts, the Path to attaining *Nibbāna* for any being. *Āsavakkhaya* (*āsava+khaya* = cutting off all the *āsavā* or mental fermentations). Thus *Āsavakkhaya ñāṇa* means the knowledge of cutting off *āsavā* and thus freeing the mind from the ability to generate any defilement.

- The term *āsava* comes from “*āsrayayata āva*” (අරයෙට අව) in Sinhala or Pāli, which means “came to association with.” Thus those habits (“*gati*”) that one keeps associating with come even closer. As one continues and feeds those habits through successive rebirths, they become *āsavā*. See, “[Āsava, Anusaya, and Gati \(Gathi\)](#).”
- *Āsava* (in Pāli, Sinhala, and Sanskrit) also means a distillation to get an extract or essence. Some medicinal concoctions are fermented by keeping a mixture of ingredients underground for many months.
- Some habits (“*gati*”) we have cultivated (or fermented) over innumerable lives, and that is why they are hard to remove. Only through learning pure Dhamma and persistence in one’s efforts, one can break such bad habits and thus eventually *āsava*. There are four types of *āsava*, and each is associated with corresponding bad habits.

Connection to *Paṭicca Samuppāda*

3. The doctrine of *Paṭicca Samuppāda*, which has twelve factors, namely, *avijjā*, *saṅkhāra*, *viññāṇa*, *nāmarūpa*, *saḷāyatana*, *phassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, *jāti*, *jarā*, *maraṇa* became clear to

him. Going over this Doctrine of *Paṭicca Samuppāda* in forward and reverse order repeatedly, he attained the Eightfold Noble Path, *Ariya Magga*, which is also known as *Yathābhūta Nāṇadassana*.

4. *Paṭicca Samuppāda* clarifies how ignorant beings accumulate defilements (and *āsavā*), and get trapped in the round of rebirths (*saṅsāra*.) Those *āsavā* ferment via repeated use of bad habits (“*gati*”). And the Noble Eightfold Path is the way to remove those “*gati*” (and thus *āsavā*) from the mind.

Four Stages of *Nibbāna* Related to the Four *Āsavā*

5. We all have four major types of *āsavā*, even though there are uncountable minor varieties:

- *Diṭṭhāsava* is the category that is due to all kinds of false beliefs (*micchā diṭṭhi*): for example, if someone does not believe in rebirth, there may be cravings such as “I need to enjoy life to the fullest before I die.”
- *Kāmāsava* are associated with sense pleasures.
- *Bhavāsava* is the craving for a particular kind of existence, say as a human, *deva*, or a *Brahma*. Any living being, in any realm, craves for life, to live.
- *Avijjāsava* is all cravings that arise due to ignorance. That is the ignorance of the Noble Truth of Suffering (which is NOT merely suffering itself), and the other Noble Truths.

6. The four types of *āsavā* go away in a step-by-step process as one proceeds on the Path. Even before the *Sotāpanna* stage, one will be reducing them, but those reductions do not hold to future lives.

- When one attains the *Sotāpanna* stage, all four types of *āsavā* that could trigger “*apāyagāmi*” actions go away from one’s mind, i.e., one will never be reborn in the four lowest realms. *Diṭṭhāsava* (those due to wrong views) disappear entirely.
- At the *Sakadāgāmi* stage, *kāmāsava* and *bhavāsava* reduce, and a *Sakadāgāmi* will be born only as a *deva* or above in future lives; *avijjāsava* also reduces.
- *Kāmāsava* completely goes away at the *Anāgāmi* stage. Thus one will never be reborn in the *kāma loka* (including the *deva* realm) again. *Bhavāsava* and *avijjāsava* are also reduce.
- *Bhavāsava* and *avijjāsava* disappear without a trace at the *Arahant* stage. Thus *āsavakkhaya* becomes complete.

Removal of *āsavā* starts with the removal of bad habits and cultivating good habits; see, “[Habits and Goals](#),” “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#),” and, “[Samsāric Habits and Āsavas](#).”

Is there a Connection Between *Nibbāna* and *Kamma*?

7. Many people have the misconception that “one needs to deplete all *kamma vipāka*” to attain *Nibbāna*. First of all, *kamma vipāka* are results of actions and that have been done previously (either in this life or in previous lives.)

while some of the *kammic* power associated with them can be removed by *metta bhāvanā*, for example, some *kamma bīja* (both good and bad) due to those *kamma* may still be there at the time of the attainment of *Nibbāna*.

- *Mettā Bhāvanā* can remove some of the *kammic* power associated with the previous *kamma*. However, some *kamma Bīja* or *kamma* seeds (both good and bad) due to the past *kamma* may still be there at the time of the attainment of *Nibbāna*. See, “[5. Ariya Metta Bhāvana \(Loving Kindness Meditation\)](#).”
- Even the Buddha had eleven *kamma vipāka* left that resulted in backaches and an ulcer-like ailment close to *Parinibbāna*, among others. To get rid of a *kamma* seeds associated with a given *kamma*, the

other party related to that *kamma* seed needs to be able to receive the merits of *Mettā Bhāvanā*. That person needs to have a state of mind with *alobha*, *adosa*, and *amoha*. But some of those beings may be trapped in the *niraya* for long times and may not even have a moment of “relief” to receive such merits. I will discuss this in a separate post, but the critical idea is discussed in, “[Transfer of Merits \(Pattidana\) – How Does it Happen?](#).”

Another Way to Understand

8. What really happens is the following. With the removal of *āsavā*, the *akusala-mūla paṭicca samuppāda* with “*vedanā paccayā tanhā*” step stop working. Instead, now *kusala-mūla paṭicca samuppāda* cycle with “*vedanā paccayā adhimokko*” will operate. There is no “*upādāna paccayā bhavo*” step in the *kusala-mūla paṭicca samuppāda* cycle.

- Thus when the *Arahant* dies, there is no “*bhava*” grasped by the mind. Therefore, there is no “*jāti*” or birth.
- Thus an *Arahant* could have many unspent *kamma bīja* (both good and bad) left, but his/her mind has lost the craving (*āsava*) to grasp any of them.

10. “Everything happens due to *kamma*” is a misconception. That is a *Vedic* concept, and is not in Buddha Dhamma; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka.](#)” The *āsavakkhaya ñāṇa* is the key to *Nibbāna*.

Next, “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#)”,

6.3.4 Kaṇha (Dark) and Sukka (Bright) Kamma and Kammakkhaya

June 11, 2018; revised January 21, 2019; July 26, 2020

Kaṇha/Sukka Kamma Same as Pāpa/Puñña Kamma

1. *Kaṇha* (dark), *sukka* (bright), and *kammakkhayāya kamma* are important terms discussed briefly in the *Kukkuravatika sutta* (in the *niddesa* version). In this post, we will clarify these terms before discussing that *sutta* in the second post published today, “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya.](#)” **June 19, 2018:** Siebe has sent me more *suttā* from *Aṅguttara Nikāya* that discusses these terms: AN 4.232- AN 4.238. Thanks, Siebe!

- *Kaṇha* and *sukka kamma* are nothing but *pāpa* and *puñña kamma* that were discussed in the post, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma.](#)”
- *Kaṇha* means “dark” and refers to *pāpa* (or bad) *kamma*; *sukka* means “bright” or “white” and refer to *puñña* (or good) *kamma*. The King of Gods is named “Sakka” because he is engaged in *sukka* (*puñña*) *kamma*.
- Both are different from *kusala kamma*. Intention plays a significant role here; see, “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#)”
- This post is critical for understanding the concept of *Nibbāna*, so I am posting it at the “[Seeking Nibbāna](#)” subsection.

Kammakkhayāya Kamma Same as Kusala Kamma

2. The term *kammakkhayāya kamma* means the same as *kusala kamma*.

- *Kammakkhayāya kamma* means “*kamma* that will lead to nullify or overcome the effects of existing *kamma vipāka.*” It is important to note that we cannot take the literal meaning of “*kammakkhaya*” as “removing *kamma/kamma vipāka.*”

- Note the difference between the words *kammakkhayāya* and *kammakkhaya*.
- ***Kammakkhaya* stage is reached by purifying one's mind by doing “*Kammakkhayāya kamma*” or *kamma* that leads to *kammakkhaya*. These are the same as *kusala kamma*.**

Kammakkhaya* Means Cultivating *Paññā

3. With a *kamma* done, its energy is going to be there for a long time, until naturally worn out. But one can REMOVE the CONDITIONS under which that *kamma* can bring its *vipāka*. That is what is meant by “*kammakkhaya*.”

- For example, Aṅgulimāla killed 999 people. Those actions created *kamma bīja* (energies that could bring appropriate *vipāka*), and some of those energies may still be out there.
- However, within a couple of weeks of meeting the Buddha, Aṅgulimāla attained the Arahant hood. At that point, Ven. Angulimala's mind became pure and would not EVER make suitable conditions for those *kamma vipāka* to be “germinated.”
- Just like seeds kept in a cool, dry place for millions of years will eventually become “duds” (will no longer germinate) , Angulimala's *kamma bīja* will one day become real duds.
- Even though Ven. Angulimala's *kamma bīja* were potent (active) when he died, they could not be “germinated in his mind” at his death (i.e., at the *cuti-patisandhi* moment). **Therefore, they had become “effectively duds.”** That is what is meant by “*kammakkhaya*.”

Without *Upādāna Kamma Bīja* Cannot Bring a New *Bhava*

4. One's mind is where various *kamma bīja* germinate. It is fair to say that ANY average human will have many *kamma bīja* suitable to bring rebirth in the *apāyā* from previous lives, if not from this life. **But just having those *kamma vipāka* does not necessarily mean they will bring *vipāka*.**

- The key here is that a purified mind (like Ven. Angulimala's) will not grasp (*upādāna*) bad *kamma vipāka*. Of course, his **physical body** endured *kamma vipāka* until death; we have discussed this in the discussion forum.

Let me take a different analogy to see why a purified mind will not grasp *kamma bīja*. Visualize the mind being a ball with a hook attached to it. The size of the hook is proportional to how corrupt or defiled the mind is.

And we can think about *kamma bīja* as rings of various sizes: rings of a wide variety of sizes ranging from very tiny to large (representing small to large *kamma bīja* that can bring *kamma vipāka*).

- We will keep coming back to this analogy in the future, so please make sure it is understood. That will make it easier to comprehend many other concepts like *āsava*, *anusaya*, and *gati*.

***Upādāna* is Like a Hook**

5. Imagine a highly defiled mind (i.e., with a large hook attached to it.) Also, imagine an area where there are a large number of *kamma bīja* of various magnitudes (many rings of different sizes).

- The hook is likely to pick up a ring of similar size: it cannot pick-up small rings, and it cannot pick-up too large rings.
- In the same way, a highly-defiled mind will pick-up a large *kamma bīja*, and a less-defiled mind will pick-up only a smaller *kamma bīja*.

- That is the same as saying that one’s mind will grasp a bhava (*kamma bīja*) that matches one’s *gati*. One who has killed other humans will grasp a *bhava* in the hell (*niraya*) corresponding to a “large ring.” It will not grasp a *bhava* in the human or *deva* realms, which would be too small to be entangled in the large hook (highly defiled mind).
- This is also what is meant by “changing CONDITIONS in one’s mind, in #3 above. A fully-purified mind will have no “mental hooks”; that mind’s conditions have changed.

6. **What happens when one follows the Noble Path of the Buddha, is that one’s “mental hook” will get smaller in size, in this analogy. That means growing *paññā*.**

- One does this by doing *kusala kamma*. *Kusala* means removing defilements from one’s mind (“*ku*” + “*sala*,” where “*ku*” is defilements and “*sala*” means “removal”).
- A *kusala kamma* does not directly affect the existing bad or good *kamma bīja*. A *kusala kamma* only purifies the mind, and in the present analogy, “wear out (or shrink) the mental hook” that can grasp various good and bad *kamma bīja* rings.
- Therefore, *kammakkhaya* means shrinking of the mental hook, in this analogy.
- By the way, the biggest *akusala kamma* is *micchā diṭṭhi*.

Reduction of *Upādāna*

7. Even before reaching the *Sotāpanna Anugāmi* stage, one’s mental hook may keep decreasing size, but not that significantly. Of course, the *kamma bīja* or rings will remain almost the same.

- When one attains the *Sotāpanna* stage, the mental hook will become drastically smaller in one thought-moment (at the *Sotāpanna phala* moment), just by comprehending the unfruitful and dangerous nature of this world, in particular the dangers in the *apāyā*.
- One’s *avijjā* will drop by orders of magnitude. That is a difficult point to understand for many. But that can be experienced. One may not realize it at that time, but one will be able to see the change within days or weeks by comparing one’s change in behavior.
- The mind of a *Sotāpanna* will no longer be able to catch large rings corresponding potent *kamma bīja* that can give rebirth in the *apāyā*.
- One becomes a *Sotāpanna* by removing the second layer of *micchā diṭṭhi* via comprehension of *Tilakkhaṇa*.

8. **As one goes through the *Sakadāgāmi*, *Anāgāmi* stages, the mental hook will shrink in size. At the *Arahant phala* stage, the hook will disappear with *avijjā* wholly removed, and *paññā* (wisdom) peaked.**

- So, you can see that “*kammakkhaya*” does not mean getting rid of *kamma bīja*. One is just reducing one’s *āsava* (or *gati*), and thus one’s mind will not grasp “bad *bhava*” corresponding to large *kamma bīja*.
- In the case of Ven. Aṅgulimāla, all his rings (including those large ones for killing people) were there at the time of his death. It is just that his mind got purified, and the “mental hook” disappeared. His mind could not grasp any *bhava* in the 31 realms at his death.
- Therefore, wearing out the “mental hook” is the same as reducing *āsava* and *anusaya* and also getting rid of *gati*. As one keeps doing that, at one point, the “mental hook” will disappear (and lead to *āsavakkhaya* or *Arahanthood*).

Kusala Kammā Do Not Remove Existing Kamma Bīja

9. ***Khammakkhayāya kamma* (or *kamma* that lead to *kammakkhaya*) or *kusala kamma*** do not directly remove existing *kamma bīja*. They lead to a state of mind where existing *kamma bīja* are **UNABLE** to bring *vipāka*. That is a **VERY IMPORTANT** point to understand. Please come back and read this post as many times as needed to comprehend this point (and ask questions at the discussion forum).

- This is based on “[Anantara and Samanantara Paccaya](#).”
- **As one keeps doing *kusala kamma***, one’s wisdom (*paññā*) will grow and will become increasingly capable of comprehending the true nature of this world (the unsatisfactory nature) or *Tilakkhaṇa*. **That will lead to *kammakkhaya* in four stages of *Nibbāna*.**
- ***Kammakkhaya* via *kusala kamma* will lead to the shrinking of the “mental hook” (*āsava/anusaya/gati*) and therefore more and more *kamma bīja* (rings in our analogy) will become “effectively duds”; see #4 and #5 above.**
- In terms of our analogy, the following happens. Even though all the “rings” are still there, more and more of them will not get “entangled” in the shrinking “hook.”

10. Therefore, *kammakkhaya* happens at various levels.

- Those that can bring rebirths in the *apāyā* become “effectively duds” at the *Sotāpanna* stage. At this stage, one’s mind has clearly understood the dangers of *akusala kamma* that can lead to rebirth in the *apāyā*. It is a “drastic change in one’s mindset”, a totally different “world view.”
- Those that can bring rebirths in the human realm become “effectively duds” at the *Sakadāgāmī* stage. One would have no doubt that “owning stuff that gives sense pleasures” is totally unnecessary and dangerous.
- Those that can bring rebirths anywhere in *kāma loka* become “effectively duds” at the *Anāgāmī* stage. Now, one knows “deep inside” that sense pleasures ARE dangerous.
- Those that can bring rebirths anywhere in 31 realms become “effectively duds” at the *Arahant* stage.

Puñña and Pāpa Kamma

11. **Now let us look at meaning of *puñña* and *pāpa kamma*.** In order to clarify what *puñña* (*sukka*) *kamma* and *pāpa* (*kaṇha*) *kamma*, we need to understand how births in various realms arise.

- There are six roots causes that give rise to *bhava* (and therefore *jāti*) in the 31 realms: *lobha* (greed), *dosa* (hate), *moha* (ignorance) and *alobha* (non-greed), *adosa* (non-hate), *amoha* (without ignorance). It is important to note that *amoha* does not mean *paññā* (wisdom); it just means one is acting without being foolish or morally-blind.
- **When one acts with any combination of the three “bad roots” (*lobha, dosa, moha*), one is doing *pāpa kamma*. They are also called *kaṇha* (“dark”) *kamma*.** In these thoughts, only *asobhana cetasika* (bad or dark mental factors) can arise. They are also *akusala kamma*. These lead to births in the *apāyā* (*dugati*).
- **When one acts with any combination of the three “good roots” (*alobha, adosa, amoha*), one is doing *puñña kamma*. They are also called *sukka* (“bright”) *kamma*.** In these thoughts only *sobhana cetasika* (good or bright mental factors) can arise. These lead to births in the “good realms” (*sugati*), until one attains the *Arahanthood*.
- A purified mind of an *Arahant* would have maximized *sobhana cetasika*, including *paññā* (wisdom). Then one would not grasp any *bhava* at the *cuti-paṭisandhi* moment, since one has fully comprehended the futility of any existence in the 31 realms.

12. Now, *puñña* (*sukka*) *kamma* generate “good *kamma bīja*” that can give rise to rebirths in the good realms (at and above the human realm). They also can bring “good *vipāka*” during a during a lifetime.

- *Pāpa (kaṇha) kamma* generate “bad *kamma bīja*” that can give rise to rebirths in the bad realms (those below the human realm, i.e., *apāyā*). They also can bring “bad *vipāka*” during a lifetime.
- As we discussed in the post, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma](#),” there are also *kamma* (or actions) that lead to both *pāpa (kaṇha)* and *puñña (sukka) kamma bīja*. The Buddha called them “*kanhasukka*” *kamma* and their *vipāka* “*kanhasukka vipāka*” in the *Kukkuravatika sutta*. Such “*kanhasukka vipāka*” give rise to both good and bad *vipāka* in some realms (human, *deva*, and *vinipata* realms), see, “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya](#).”
- An example is when one prevents a snake from catching a frog. One is doing a *puñña kamma* by saving a frog’s life, but one also doing a *pāpa kamma* by preventing snake of its meal.

Kusala/Puñña Kamma Not Possible in Apāyā

13. Another critical point to understand is that one will not be able to do any *kusala kamma* and to wear out the “mental hook” when is born in the *apāyā* (beings in the 4 realms of the *apāyā* are incapable of doing *kusala kamma* and are hardly capable of doing *puñña kamma* too).

- **This is why it is important to do *puñña kamma* and stay away from *pāpa kamma*. This is critically important in order to be born in a good realm and to work towards *Nibbāna*.**
- It is important to contemplate and understand this. Even though *puñña (sukka) kamma* leads to rebirth, that will be in a “good realm” where one can work towards *Nibbāna*, i.e., do *kusala kamma* and wear out the “mental hook.”
- Furthermore, *puñña kamma* set the necessary background (*āyu, vaṇṇa, sukha, bala, paññā*; see, “[Two Versions of 37 Factors of Enlightenment](#)”). Not all in the human realm have those: if one is born extremely poor, unhealthy, etc., one will not have the right mindset to comprehend Dhamma.

14. The above explanation is a condensed (*niddesa*) version of the *Kukkuravatika Sutta* (MN 57). A *patiniddesa* or a detailed analysis is realized by the this post AND the accompanying post, “[Kukkuravatika Sutta \(Majjhima Nikāya 57\) – Kammakkhaya](#).”

- For an explanation of *niddesa* and *patiniddesa*, see, “[Sutta – Introduction](#).”

6.3.5 **Dasa Saṃyojana – Bonds in Rebirth Process**

August 6, 2017; revised February 14, 2018; February 10, 2020

Saṃyojana Are Bonds in The Rebirth Process

1. *Saṃyojana* (or *saṃyojana*) is translated to English as “fettters”, which is not a bad translation. Even though “fetter” is not a commonly used word, it means “a chain used to restrain or bind someone.”

- *Dasa saṃyojana* are the ten “chains” or “bonds” that bind one to the rebirth process (with saṃsāric bonds.) Thus, one is forced to go through unimaginable suffering in the long run.

2. *Saṃyojana* comes from the three roots (“*san*,” “*yo*,” and “*ja*” respectively meaning “defilements”, “bind”, and “birth”). It can be pronounced either as “*sanyojanā*” or, as is the common practice with many words involving “*san*,” as “*saṃyojana*.”

- Therefore, *saṃyojana* means “bonds that bind one to “*san*” and thus keep one in the rebirth process; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\)](#).”
- When one systematic breaks these bonds — in four stages — one makes irreversible progress to *Nibbāna* (release from all suffering).
- For an explanation of many words with the root “*san*,” see, “[List of “San” Words and Other Pāli Roots](#).”

Root Cause Is Craving

3. The “[WebLink: suttacentral: Samyojana Sutta \(SN 41.1\)](#)” clearly states that there is “*san*” or “craving (*chanda rāga*)” MUST be involved in *saṃyojana*: “*Evameva kho, bhante, na cakkhu rūpānaṃ saṃyojanaṃ, na rūpā cakkhussa saṃyojanaṃ; yañca tattha tadubhayaṃ paṭicca uppajjati chandarāgo taṃ tattha saṃyojanaṃ...*”

Translated: “*saṃyojana* arise not due to eyes just seeing objects (*rūpa*), but due to **craving that arises due to that seeing...**”

Cravings Are Uncontrollable Due to Wrong Views

4. Many people do not realize that there is an essential step BEFORE one can start tackling *dasa saṃyojana*. This step necessary to enter the Noble Path and start breaking those bonds to the rebirth process. **That is to get rid of the ten types of *micchā diṭṭhi* (wrong views) about the world that we live in.** See, “[Micchā Diṭṭhi, gandhabba, and Sotāpanna Stage.](#)”

- This essential pre-requisite or the pre-condition to “enter the Noble Path” was explicitly discussed by the Buddha in the “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\).](#)”
- The reason is that unless one believes in the laws of *kamma* and the rebirth process, there is no way one can start working towards *Nibbāna* (to be released from the suffering-filled rebirth process).
- Striving to attain *Nibbāna* without belief in the rebirth process is a useless thing. **By definition, *Nibbāna* is the release from the rebirth process.** Most people confuse *Nibbāna* with a temporary relief from “day-to-day stresses of life.”
- *Nibbāna* can be described in simple or more profound levels; see, “[Nibbāna.](#)”

Need to Have a “Wider World View”

5. Buddha Dhamma is different from any other religion or philosophy. One first needs to understand the message of the Buddha before one can start on the Path prescribed by him. **Many people waste time blindly pursuing things that have nothing to do with the Noble Path to *Nibbāna*.**

- To understand the key message of the Buddha, one needs to realize that our world is much more complicated than seen by our eyes. One needs to ‘see’ with wisdom. This wisdom or “*paññā*” can be cultivated only in steps, with an increasingly pure mind. That means, with less greed, hate, and ignorance of the true nature of this world.
- In the early stage, when one is trying to get rid of the ten types of *micchā diṭṭhi*, one may need to stay away from *dasa akusala* with determination. That may involved even going to the extent of sticking to a set of rituals (saying I will not break the five precepts).
- However, when one becomes free of those strong immoral acts and speech (*pāpa kamma*), which are named the “big eight” in “[3. The Second Level – Key to Purify the Mind,](#)” in the Meditation section, one should be able to get rid of the ten types of *micchā diṭṭhi* mentioned above.
- At this stage, one’s mind is purified enough (i.e., *paññā* has grown enough) to start grasping the *Tilakkhaṇa* (*anicca, dukkha, anatta*) to some extent. Of course, it is necessary to understand the correct interpretations: “[Anicca, Dukkha, Anatta.](#)”

Sammā Diṭṭhi comes First

6. The first step in the Noble Eightfold Path is “*Sammā Diṭṭhi*,” which is not “something to be done.” It is a **vision** or a “new way of **looking** at how our world works.”

- This new way of looking at the world is through the world view that emerges from what is embedded in *anicca, dukkha, anatta*. That is how one breaks the **first three saṃyojana of sakkāya diṭṭhi, vicikicchā, and sīlabata parāmāsa**.

7. **One has to break those bonds in one's own mind.** One gains *sammā diṭṭhi* — right view to becoming free of ‘*san*’ — by comprehending the true nature of this world of 31 realms.

Anicca – that nothing in this world can bring a permanent happiness in the long run.

Dukkha – despite our struggles, we will be subjected to much more suffering than pleasures if we remain in the rebirth process.

Anatta – therefore, one is truly helpless in this struggle to attain “something of essence in this world.” That is just an illusion.

Our Tendency to Value Worthless Worldly Things

8. When one values a particular object, one can spend extraordinary amount of effort to get it. A average human has many things in this world (a beautiful/handsome partner, lovely house, nice car, etc.) that are very valuable.

- Many people are willing to commit murder, robbery, lying, cheating, etc. to get those. Then they get into trouble in two ways: If the society catches them, they will pay consequences like going to jail. Even if they manage to avoid “getting caught”, there is no way to avoid *kamma vipāka*, i.e., those actions will bring much harsher punishments in this life or in future lives.
- By comprehending the ten types *micchā diṭṭhi*, one will be able to see that one will have to pay for immoral actions without exception, and one that depending on the severity of the actions, one may suffer for millions of years in the four lower realms (*apāyā*). This very first step of getting rid of the ten types of *micchā diṭṭhi* will be quite beneficial in preventing one from getting into trouble in the future.

9. However, grasping the *Tilakkhaṇa* will lead to getting rid of an even stronger type of wrong vision or *micchā diṭṭhi* about this world, i.e., that there is NOTHING in this world that will bring a level of permanent happiness.

- When one first starts comprehending *anicca* and realizes a glimpse of this truth, one may still not be quite certain of the truth of that. But one will be compelled to believe that “it is not WORTH to commit those strong bad *kamma* that COULD lead to rebirth in the *apāyā* (intense greed and strong hate).
- At this beginning stage on the Noble Path, one could see the dangers in being born in the *apāyā*, and one's mind will AUTOMATICALLY start rejecting such actions. This does not happen by sheer will power, but it will be programmed into the mind. In the *Abhidhamma* language, the “*votthapana citta*” in a *citta vīthi* will make that decision in a billionth of a second.

Sotāpanna stage Realized With That “Correct Vision”

10. So, it is quite important to understand that getting rid of the first three saṃyojana involves NOTHING ELSE but just comprehending **a bit about the true nature** of this world, the *anicca* nature.

- In other words, at this stage, one will lose a significant fraction of HOW MUCH VALUE one will place on ANY MATERIAL THING in this world. There is NOTHING in this world that is worth killing another human being via pre-planning with hate in the mind, for example.
- At this stage, one is a *Sotāpanna Anugāmi*, and one will get to the *Sotāpanna* stage without a doubt. One has become one of the eight types of Nobles (*Ariyā*); see, “[Sotāpanna Magga Anugāmi and a Sotāpanna](#).”

11. Therefore, getting a release from rebirth in the *apāyā* depends on grasping the dangers of specific highly-immoral actions that are not worth doing because NOTHING in this world can be that valuable. Put in another way, nothing in this world is worth taking the risk of paying back with a rebirth in the *apāyā*.

- The Buddha characterized *dukkha* as “*dukkham bhayaṭṭhena*,” i.e., “*dukkha* is another name for danger.” The *dukkha* that needs to be understood is not the suffering that one is feeling at the moment (which has arisen due to a past *kamma*.)
- The Noble Truth of *dukkha* explains how such sufferings **can be stopped from arising** by comprehending the dangers of such actions that lead to suffering.

Removal of *Kāma Rāga* Comes At Higher Stages of *Nibbāna*

12. The next step towards *Nibbāna* involves getting rid of **two more bonds or *saṃyojana*, i.e., *kāma rāga* and *paṭigha***. That is done in two stages: the *Sakadāgāmī* stage and the *Anāgāmī* stage.

- In a way, these two bonds are harder to break because all through this beginning-less rebirth process, we have spent probably 99% of the time in the *kāma loka*. We are so attached to sense pleasures (*kāma rāga*) that it is almost impossible for an average human to grasp the ***anicca nature in kāma loka***.
- As we discussed above, it is easier to see the adverse consequences of highly-immoral actions that could lead to rebirth in the *apāyā*. And it is also easier to see the dangers of birth in the *apāyā* (the Buddha has described such unimaginable suffering in many *suttā*; see, for example, “[WebLink: suttacentral: devaduta Sutta \(Majjhima Nikāya 130\)](#).”)

Apāyagāmī Deeds Are Done With Wrong Views

13. It is harder for an average human to see that those things that we value so highly are not only worthless but are dangerous. That is because they can lead to future suffering via *kamma vipāka*.

- Most “moral people” believe that if one lives a moral life without harming others, then one will not be subjected to suffering in the future. **Even if one had comprehended *Tilakkhaṇa* to a level of a *Sotāpanna*, that could still be the impression.**
- That is why Buddha’s foremost female lay disciple Visākā attained the *Sotāpanna* stage at age seven and went on to marry and have 22 children. If Visākā thought that the *kāma loka* was also filled with suffering, she would not have done that.

My Experience

14. Therefore, getting rid of the *saṃyojana* of *kāma rāga* (attachment to sensual pleasures) — and thus to be also freed also from *paṭigha saṃyojana* — is a much harder thing. That is why it took me over three years to truly START comprehending the worthlessness of sense pleasures AND the dangers of being attracted to sense desires.

- Even though I knew the criteria for one to become an *Anāgāmī*, I did not realize that I would have to “see the dangers” in staying in the *kāma loka*, to strive for it.
- **I had been doing meditation on getting rid of *kāma rāga* all these years, but the mind has grasped the urgency to do that only in the last month (early 2018.)**
- I had written about the importance of removing *kāma rāga* in the following section: “*Āsvada* (Mind-Made Pleasures), *Ādeenava* (Bad Outcomes), *Nissarana* (Relinquish).” These posts were written before October, 2015, and have been since revised.

15. So, I had known the “theory” part of it. But my *paññā* or wisdom had not been cultivated enough to see the possible dangers of sense pleasures!

- It needed a trigger for my mind to finally realize the “worthlessness” and “dangers” of REMAINING in the *kāma loka*. I will write more about how it actually got triggered, but I am still working on trying to see the dangers of sense pleasures and thereby making a convincing case that all we perceive as “pleasures” in the human and *deva* realms are in fact CAUSES for future suffering.
- The point here is that one needs to keep on striving as long as it takes for the mind to come to a stage to be “triggered” by some event (mine was not a significant event). As long as one keeps striving, it is bound to happen. It came as a shock to me. But I will discuss those details in another post (I am not there yet anyway).

Difference Between *Magga Phala* and *Jhāna*

16. By the way, it is becoming more clear to me about the difference between *magga phala* and *jhāna*. While *jhāna* can help, *jhāna* are not NEEDED to attain *magga phala*. It is *sīla*, *samādhi*, *paññā*, and NOT *sīla*, *jhāna*, *paññā*. I will write about this in detail, but I see that many people seem to get discouraged that they cannot get to *jhāna*.

- There may be people with *magga phala* and without any *jhāna*; with *anāriya jhāna* and without *magga phala*; and also with *anāriya jhāna* and with *magga phala*. Those with *Ariya jhāna* MUST be at least an *Anāgāmī*, i.e., one who has REMOVED *kāma rāga* completely.
- The problem is that it is virtually impossible to distinguish between *Ariya* and *anāriya jhāna*. One thing is quite clear: One cannot attain *Ariya* first *jhāna* without REMOVING (*ucceda pahāna*, not just *vikkambana pahāna*) of *kāma rāga*, i.e., *kāma anusaya* must be removed, not only suppressed.
- But the “*jhānic* effect” is the same in both cases. The body and the mind have very similar sensations.
- If a *Sotāpanna* can get into the first *Ariya jhāna*, then he/she will never be born in the human world again. But we know that a *Sotāpanna* can be reborn in the human realm. Thus a *Sotāpanna* would not have the first *Ariya jhāna*. **Whatever *jhāna* that I had were not *Ariya jhāna*.** I have started revising my old posts on *jhāna*. Please let me know any post that you see need revision.
- I was slowly coming to this conclusion over time; see, “[Difference Between *jhāna* and Stages of *Nibbāna*](#).” Information in that relatively recent post is correct. I had forgotten to update the old posts. Another point is that it is *Sammā Samādhi* (not necessarily *jhāna*) that takes one to *Sammā Nāṇa* and *Sammā Vimutti* to become an *Arahant* in the Noble Path.

Stopping Rebirths in *Kāma Loka*

17. Let us get back to the main discussion. Once one overcomes those two *saṃyojana* of *kāma rāga* and *paṭigha*, one will be free of rebirths anywhere in the *kāma loka* (lowest 11 realms including the human and *deva* realms).

- It is only then one can be said to be become healthy (not subject to illnesses) and also will be free of the three sets of senses of smell, taste, and body touches. It is only the human bodies that are subject to illnesses. A *Sakadāgāmī* would not be reborn in the human realm, and thus will be free of diseases.
- When one attains the *Sakadāgāmī* stage by REDUCING *kāma rāga* and *paṭigha*, one could be born only in *deva* realms of the *kāma loka*. At this stage, one would have lost the desire to OWN objects that bring sense pleasures (*vatthu kāma*), but has not yet lost the URGE TO ENJOY sense pleasures.
- As one makes more progress, the two bonds of *kāma rāga* and *paṭigha* will be completely broken. One will attain the *Anāgāmī* stage, never to be born in any realm of *kāma loka*.

Breaking Bonds to *Rūpa loka* and *Arūpa Loka*

18. An *Anāgāmī* would be still bound to the rebirth process via **five more bonds or *saṃyojana*: *rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, *avijjā*.**

- The first five types of *saṃyojana* are called *orambhāgiya-saṃyojana* or “lower bonds.” The higher five are called *uddhambhāgiya-saṃyojana* or “higher bonds.”
- If a person has removed the first seven *saṃyojana* but still has the last three of *māna*, *uddhacca*, *avijjā*, one's mental body (*gandhabba*) would come out of the dead body at death. One will be in that state until the *kammic energy* for the human *bhava* is exhausted. *Parinibbāna* will happen at the *cuti-paṭisandhi* moment since one has lost *upādāna* for all 31 realms and thus cannot be born anywhere. So, the *gandhabba* would be in the **antarā Parinibbāna state** during that time. That is what is presumed to have happened to Waharaka Thero; see, “[Parinibbāna of Waharaka Thero.](#)”
- As one progresses to higher stages, it becomes harder to remove the higher bonds (from the perspective of lower levels). **As we saw, it is easier for an average human to understand the dangers of the *apāyā*, but harder to see the dangers of *kāma loka*.** I cannot even begin to imagine the dangers of *rūpa* and *arūpa loka*. One has to proceed step-by-step.
- When an *Anāgāmī* removes *rūpa rāga*, he/she would be never again born in any realm in the *rūpa loka*. Similarly, removing the *saṃyojana* of *arūpa rāga* would make one free of birth in the *arūpa loka*.

There is No Safe Realm anywhere In The Thirty-One Realms

19. Once, the Buddha saw that a *Bhikkhu* had started “taking it easy” after attaining the *Anāgāmī* stage, and asked him why he was not striving hard as he used to. The *Bhikkhu* replied that he had attained the *Anāgāmī* stage and thus thought that he was out of real danger.

- The Buddha asked him to consider the following. If one had touched feces and had just wiped it off, one might not see it anymore. But wouldn't that remaining traces still smell bad? The *Bhikkhu* realized that one would not be really free of ALL suffering until one is released fully from all 31 realms. It is harder to see the dangers at higher levels until something happens to make one aware of such “hard-to-see” dangers.
- What I learned from my experience is that even though I was not entirely focused on attaining the next stage, I had been conditioning my mind through meditation. So, when the trigger came, my mind “got triggered”; I saw the dangers in the *kāma loka* virtually “in a flash.” Just several months before, last December, I had an even stronger life event (severe back pains), but that did not act “as a trigger” presumably because my mind was not purified enough at that time (i.e., my *paññā* had not been cultivated enough).
- **Whichever stage we are “stuck at,” we should continue the effort without getting complacent.** Results will follow (possibly triggered by some unexpected event).
- Sometimes such triggers lead to moments of “insights” (“ahā” moments) directly leading to *magga phala*. There are many such examples in the *Tipiṭaka*.

Summary

20. Finally, the ten *saṃyojana* are removed via different methods:

- *Sakkāya diṭṭhi*, *vicikicchā*, and *sīlabbata parāmāsa* are removed via “correct vision” or “correct understanding.” And that happens when one is listening to a *desanā* by an *Ariya* or a Noble Person.
- *Kāma rāga* and *paṭigha* are removed via meditation.
- The five higher *saṃyojana* are removed with wisdom (*paññā*).

6.3.6 The Cooling Down Process (Nibbāna) – How the Root Causes are Removed

Revised June 25, 2020 (#1 and #2 revised)

1. One's material world exists because of the six root causes: *lobha, dosa, moha, alobha, adosa, amoha*. Even though we may have bouts of happiness, we suffer much more than imaginable in the rebirth process because of these six causes.

- If there are six root causes, why did the Buddha say, “*rāgakkhaya Nibbanan, dosakkhaya Nibbanan, Mohakkhaya Nibbanan*”? i.e., why are there only three causes to be removed to attain *Nibbāna*? (By the way, *lobha* is a stronger form of *rāga*, thus *rāgakkhaya* means removing *lobha*).
- In fact, one needs to cultivate *alobha, adosa, amoha* in order to remove *lobha, dosa, moha*.
- As *lobha, dosa, moha* are removed gradually, that leads to wisdom (*paññā*).
- gained in that process automatically reduces *alobha, adosa, amoha* as needed. An Arahant has removed all six; *alobha, adosa, amoha* must be cultivated all the way up to the Arahant stage.

2. One outcome of the cultivation of wisdom is to realize that there are two types of *alobha, adosa, amoha*. In other words, one would realize that after following the “mundane path” one needs to comprehend the *Tilakkhaṇa (anicca, dukkha, anatta)* to start on the “Noble Path.”

- When one acts with “mundane” *alobha, adosa, amoha*, that leads to “good rebirth” meaning rebirths in the “good realms.” But it does not lead to *Nibbāna*. As we know, *Nibbāna* means stopping rebirth in ANY realm, not just in “bad realms.”
- Once one comprehends *Tilakkhaṇa*, one would have a deeper level of *alobha, adosa, amoha*.
- A *Sotāpanna* starts on the Noble Eightfold Path with that deeper level of *alobha, adosa, amoha*. Wisdom (*paññā*) peaks at the Arahant stage. At that point, one would not be seeking rebirth anywhere in the 31 realms with *lobha, dosa, moha* OR *alobha, adosa, amoha*.
- See, “[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi](#)” and “[Buddha Dhamma – In a Chart](#)” and references therein.
- Here is another way to see it. When one completes the mundane path, his/her level of *amoha* is not complete. One would still have *sakkāya diṭṭhi* and *asmi māna*. At the *Sotāpanna* stage, *sakkāya diṭṭhi* goes away. Then *asmi māna* goes away at the Arahant stage.

3. *Lobha* is the extreme of greed. (“*lo*” + “*bha*” where “*lo*” is for the *lokaya* or world and “*bha*” is for “*bihiveema*” (arise or establish) is the main reason how the material world is created and sustained with greed.

- Because of *lobha, kāmachanda* (one of the five hindrances) arises. It is said that “one loses one’s mind” when one acts with *kāmachanda (kāma chanda = “kāma” + “icca” + “anda” where “icca” is liking and “anda” is becomes blind; thus kāmachanda means blinded by attachment to sense pleasures)*.
- When one blinded by *kāmachanda* and when obstacles arise in the way, one develops *dosa* or *dvesa* (“*dvi*”+“*vesa*” or second manifestation of greed; see, “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#)” for the pronunciation key), i.e., hate for whatever gets in one’s way.
- And one has *lobha* because one cannot see the truth about this world, i.e., because one has *moha*: *Moha* comes from “*mūva*” + “*hā*” or literally “closed mouth.” Here what is meant is that if there is a vessel and if its mouth or opening is closed, then one cannot see what is inside. Thus when one has *moha*, one is ignorant about the true nature of this world, and thus acts blindly and foolishly, just based on the outward appearances.

4. One who has not heard about the Buddha’s world view is likely to act with *moha* and thus in turn has both *lobha* and *dosa*.

- However, many people do not have strong versions of *lobha, dosa, moha* because they may have been exposed to Buddha Dhamma in recent previous lives. They are likely to carry over such habits (*gathī*) compatible with *alobha, adosa, amoha*. In fact, ANYONE is likely to have been exposed to Buddha

Dhamma somewhere, sometime in the deep past; but the more time lag there is, one is likely to lose those qualities.

- In any case, it is clear that if and when one has *kāmachanda*, one gets blinded by the urge to get possession of whatever the sense object in question at the time. We all have had instances of *kāmachanda* taking over; anyone can possibly remember instances where “the ability to reason out” got lost, at least for a brief time. It is good to contemplate on such a past situation and verify this fact.

5. Long-lasting hateful situations (*dosa*) arise because of *kāmachanda*. Again one can go back and remember such situations. This is why *dosa* (or *dvesa*) is called the second manifestation of greed. At the extreme, *dosa* brings out the second of the five hindrances, *vyāpāda*. This word comes from “*vaya*”+“*pada*”, where “*vaya*” means decline and “*pada*” means to “walk towards.” Thus *vyāpāda* means one is on a (morally) declining path.

- When one gets extremely angry, one again loses control and this could be even worse than *kamachanda*; it is possible for one to kill another human being in a moment of rage. And when one habitually gets angry, one could be in a state of *vyāpāda* for longer times, and that could become a “normal” state of affairs if one is not stopped, i.e., become a “*gathi*.” We can see people get into the “*vyāpāda* mode” during (political) debates on television, or during arguments.
- All five hindrances arise because of not seeing the futility of craving or hate. This “getting attached to this world” via greed and hate is called *taṇhā*; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#)”

6. *Avijjā* (ignorance) and *taṇhā* feed off each other, but it is *avijjā* that one needs to tackle first. This is because unless one’s mind sees the dangers hidden behind *taṇhā*, it is not possible to reduce *taṇhā*.

- When one starts learning Dhamma one begins to understand the nature of the wider world of 31 realms where beings move around birth to birth, how beings suffer mostly in the lowest four realms, that all actions have consequences, and why it does not make sense, in the long run, to act immorally to satisfy one’s immediate urges (the concept of *anicca*); see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#),” and follow-up posts.
- When one truly understands *anicca*, one’s *avijjā* starts to reduce first from the strong *moha* stage which contributes to *vicikicchā* (acting without mindfulness); this in turn reduces greed and hate.
- Most people make the mistake of trying to get rid of greed and hate (via breath meditation), and that is NOT POSSIBLE; one needs to engage in the correct version of “*ānāpāna*” meditation; see, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#).”
- As long as one has a wrong world view and does not see the danger in having thoughts of excess greed and hate, it is not possible to FORCIBLY get rid of greed and hate; see, “[Difference Between Giving Up Valuables and Losing Interest in Worthless](#).”
- This is why *Sammā Diṭṭhi* or the correct world view comes first in the Noble Eightfold Path.
- When one does the breath meditation, what one is doing is to forcibly SUPPRESS *kamachanda* and *vyāpāda*, and other hindrances.

7. When one attains the *Sotāpanna* stage, one’s *lobha* is reduced to the *kāma rāga* level and one’s *dosa* reduced to the *paṭigha* level PERMANENTLY; The fifth hindrance of *vicikicchā* is removed, and the other two hindrances reduced. *Paṭigha* is a lower strength of *vyāpāda*: “*paṭi*” + “*gha*” means bonding via friction or dislike; thus *paṭigha* is included in *taṇhā*.

- One can see now why a *Sotāpanna* is incapable of doing extremely immoral acts that can result in a birth in the four lowest realms (*apāyā*); one has removed *vicikicchā* hindrance permanently, and one always acts with mindfulness. This higher level of *Sammā Diṭṭhi* or the correct world view is deeply ingrained in his/her mind, and even in a future birth that will not change. But one is still capable of acting with greed and hate to a certain extent.

8. When one attains the next level of *Nibbāna*, the *Sakadāgāmī* level, one permanently REDUCES *kāma rāga* and *paṭigha*. Because of this advancement, one will never be reborn in a realm where the physical body can be subjected to ailments, diseases, and old age. Thus, one will be reborn above the human realm, which is the fifth realm.

9. At the *Anāgāmī* stage, *kāma rāga* and *paṭigha* are permanently REMOVED. Thus by the *Anāgāmī* stage, one has completely removed any form of *dosa*, the second root cause. One does not get angry or hateful under any circumstance, and the *dosa cetasika* is permanently removed. Since *kāma rāga* is also gone away, now one has no desire to be born in any realm in the *kāma loka*, including the *deva* worlds.

- Thus an *Anāgāmī* has only *rūpa rāga* and *arūpa rāga*. This is mainly due to the desire of an *Anāgāmī* to listen (and read) and contemplate on Dhamma concepts; there is no desire left for sense pleasures. Thus the *lobha cetasika* is reduced to a very low level.
- As for the *moha cetasika*, only a low strength remains as *avijjā*.

10. Thus out of the ten *sanyojana* or *sanyoga* (“*san*” + “*yoga*” or bound via “*san*”), *sakkāya diṭṭhi*, *vicikicchā*, *sīlabbata parāmāsa* (all due to strong *avijjā*) are removed at the *Sotāpanna* stage.

- This is an important point: One just needs to comprehend the true nature of this world via understanding *anicca*, *dukkha*, *anatta* in order to become a *Sotāpanna*.
- Just with this understanding, one removes *kāmachanda*, *vyāpāda*, and *vicikicchā*. This is why a *Sotāpanna* is said to be “one with the vision” or “*dassanena sampanno*.”
- Once the Buddha took a bit of soil on his fingernail and told the *bhikkhus*, “if all the soil in this Earth can be compared to the defilements one needs to get rid of, a *Sotāpanna* has left in him/her only an amount compared to this bit of soil on my fingernail.”
- This may sound astounding to some. But it is critical to understand that most heinous immoral acts are done because of one not having *Sammā Diṭṭhi* at least to a significant level.
- Of the remaining *sanyojana* (*sanyoga*), *kāma rāga* and *paṭigha* are reduced at the *Sakadāgāmī* stage, and removed at the *Anāgāmī* stage. The rest of the *sanyoga* (*rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, and *avijjā*) goes away at the *Arahant* stage.

11. In the *kāma loka*, we experience a form of *olarika sukha* (or primitive form of coarse sensations), where sense faculties and corresponding sense objects are dense. As the attachment to pleasures from “dense matter” decreases, rebirth in the “denser worlds” is progressively eliminated. One exception is the *peta* realm where the bodies are not dense, but that is done to impart an enhanced mental suffering.

- At the *Sotāpanna* stage one is permanently released from the coarse forms of suffering in the lowest four realms. After the *Sakadāgāmī* stage, rebirths do not occur even in the human realm where the relatively dense bodies still are subjected to physical pains and diseases. An *Anāgāmī* is born only in the *suddhavasa rūpa loka*, where there are only fine bodies with vision, hearing, and mind only. An *Arahant* will never be reborn anywhere in the 31 realms which have “some connection to matter”; see, “[What Are Rūpa? \(Relation to Nibbāna\)](#).”
- Thus at the passing away of an *Arahant*, the mind is released from any attachment to the material world consisting of the 31 realms; no more suffering from physical pains, mental pains, or death. One has attained the state of *amaraneeya* (no death).

12. Another way to analyze the steps to *Nibbāna* is to look at how the 12 *akusala citta* cease to arise stage by stage. See, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).”

13. Therefore, the four stages of *Nibbāna* can be characterized in different ways. These include hindrances, *sanyoga* (or *saṃyojana*), “density of matter”, *akusala citta*, and many other ways. They are all inter-related and self-consistent.

14. Even before the *Sotāpanna* stage, one can start feeling the *nirāmisā sukha*; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#),” and “[Nirāmisā Sukha](#).”

- *Nirāmisā sukha* can increase considerably if one can get to the *Ariya jhānā*.
- It is not necessary to attain *Ariya jhānā* to become a *Sotāpanna*, but *Ariya jhānā* can be attained only if one is already a *Sotāpanna*; see, “[How does one know whether the Sotāpanna Stage is Reached?](#)” (this became clear to me only recently and I have verified it in a *desanā* from the Thero).
- Thus, if one can get to *Ariya jhānā* one can confirm the attainment of the *Sotāpanna* stage. And it is possible to distinguish *Ariya jhānā* from *Anariya jhānā* easily since *Ariya jhānā* are immune to external influences or even forced defiled thoughts; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga](#).”

6.3.7 Why is Correct Interpretation of Anicca, Dukkha, Anattā so Important?

The correct meanings of *anicca*, *dukkha*, *anatta* are explained under the top menu “[Key Dhamma Concepts](#).”

1. *Anicca*, *dukkha*, *anatta* describe the true nature of “this world” of 31 realms; see, “[The Grand Unified Theory of Dhamma](#).” Nowhere in the 31 realms can one maintain anything to one’s satisfaction over the long term (*anicca*); thus one gets depressed, unfulfilled, and distraught (suffering or *dukkha* is the net result). Thus one becomes helpless (*anatta*).

2. A good analogy is someone attempting to fill a leaky vessel at home by carrying water to it from a nearby river. He makes a trip back from the river, fills the vessel and is glad to see that it got filled halfway. But soon enough he sees that water is running out and thus needs to make another trip to the river to bring more water.

- If he spent a bit of time examining the vessel, he would have discovered the leak, and could have fixed it. We are too much involved in the struggle to maintain an illusory happiness, and we do not take enough time to contemplate whether it makes sense to struggle against a system that is INHERENTLY unsuitable to provide lasting happiness.

3. Before the retirement, I was basically working seven days a week. I had deadlines to meet and responsibilities to fulfil and there was no time to even think whether I should take some time off and contemplate the sensibility of such a hectic life.

- Whatever vacation time that I had, I wanted to plan a “relaxing vacation.” But I did not realize that I was spending more time planning the vacation and then spent whatever the energy that I had on sightseeing etc. When I got back from the vacation, I was exhausted from the trip itself. The early retirement decision was the best decision that I ever made in my life.

4. If this existence is inherently flawed in the sense that it is not capable of sustaining stability at all, then all the struggles that we make are in vain. The Buddha discovered that everything in “this world” undergoes change (see “[The Grand Unified Theory of Dhamma](#)”). It is INHERENTLY impossible to achieve a lasting happiness.

- Now the question is how do we know whether this axiom in Dhamma is correct? This is where it takes a bit of time to look at the evidence. I have done a lot of work within the past several years and hopefully this website will help you cut down on that research.
- Actually scientists also now acknowledge that the universe is “running down”, and we need to constantly spend energy to keep chaos and instability out of the way to maintain some sort of stability (in Buddha Dhamma this is called “*sankhāra dukkha*”); see, “[Second Law of Thermodynamics is Part of Anicca!](#).”

5. After looking at the evidence, if one decides to spend a bit more time to carefully examine the three characteristics (*anicca*, *dukkha*, *anatta*), one may see that there is some truth to it. This will set one off on the Dhamma Path.

- If there is nothing substantial or long lasting to be had by harming other living beings, stealing from them, lying to them, indulging in excess sense pleasures, or not being intoxicated with power, money or position, one's life will automatically change for the better.
- The five precepts or eight precepts are NOT to be just mechanically followed. The mind needs to SEE the benefit of following them.

6. This is why one MUST spend some time examining the evidence for the validity of Buddha Dhamma. The first stage of *Nibbāna*, *Sotāpanna* stage, is attained just with the clear understanding of the true nature of “this world”, i.e., *anicca*, *dukkha*, *anatta*.

- When one realizes the futility of the struggle for long lasting happiness in a world that is inherently not capable of providing it, one will automatically start moving away from clinging to “things in this world.” For example, one will say to oneself, “what is the point of stealing this from another person? What long lasting happiness can be gained from it? Rather my mind will be in an agitated state if I do that.”
- There is no need to force oneself to obey the precepts. Moral behavior (*sīla*) will automatically follow the true understanding of *anicca*, *dukkha*, *anatta*. Then, when one starts feeling a bit of *nirāmisā sukha*, there is no turning back, because one can see for oneself the benefits of a moral life.

7. Thus *Sammā Diṭṭhi* (*san + ma + diṭṭhi* = vision to get rid of defilements) is none other than the true comprehension of the three characteristics: *anicca*, *dukkha*, *anatta*.

- When one gains a bit of *Sammā Diṭṭhi* (vision), it will try to prevent one from having defiled thoughts (*Sammā Saṅkappa*), uttering false speech (*Sammā Vaca*), doing wrong things (*Sammā Kammanta*), pursuing wrong lifestyles (*Sammā Ajiva*). One will also make efforts (*Sammā Vayama*) to be on the Path, which will lead to be constantly be mindful (*Sammā Sati*), thus leading to *Sammā Samādhi* (peaceful and focused state of mind).
- But the important distinction between, say “good speech” and *sammā vaca* must be understood in the context of *anicca*, *dukkha*, *anatta*. **One abstains from “wrong speech” not merely because one does not want to face bad consequences; one abstains from it because one can ALSO see the futility in it. Same holds for all eight. This is worth a lot of contemplation.**
- This is why the Buddha said, “*Dhammo ha ve rakkati dhammacari*”, or, “once one sees the Dhamma, Dhamma will guide, protect, and direct.”
- Thus, gaining *Sammā Diṭṭhi* via contemplating on *anicca*, *dukkha*, *anatta* will automatically direct one on the Noble Eightfold Path. This is why removing *micchā diṭṭhi* via true understanding of *anicca*, *dukkha*, *anatta* is so important.

7. When one proceeds in this manner, one will attain the *Sotāpanna* stage of *Nibbāna*, as these three basic concepts take hold in the mind. At that point, the mind will automatically reject doing things that will result in rebirth in lower four realms.

- Those are the four greed-based *cittā* that arise due to *micchā diṭṭhi* (wrong vision), and the delusion-based *citta* that arises due to defiled *viññāṇa* (*vicikicchā*). This is why a *Sotāpanna* is prevented from a rebirth in the lower four realms forever; see, “[Akusala Citta- How a Sotāpanna Avoids Apayagami Citta.](#)”

8. When one attains the *Sotāpanna* stage, one may still have greed, hate, and delusion left in him/her. But a *Sotāpanna* KNOWS about them, and KNOWS how to get rid of them. Then it is just a matter of time before getting rid of those defilements and attaining the other three stages, culminating in ultimate peace and permanent happiness, *Nibbāna*.

Next, “[The Sotāpanna Stage](#)”,

6.3.8 How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta

Anicca, dukkha, anatta describe the true nature of this world with 31 realms. Thus one needs to comprehend these “three characteristics of nature” in order to “see” the path to *Nibbāna* before starting to follow it.

1. Before one starts on a journey one needs to decide why one should take the journey, exactly where one is going to, and the correct path towards that destination. Thus it is worthwhile to examine why the Buddha said our goal should be to move away from this world towards *Nibbāna*, why he said that, why one should believe that to be true, and what the correct path towards that goal is. The Buddha himself recommended that approach:

- One starts on the Noble Eightfold Path with *Sammā Diṭṭhi*, which means the needed “vision” on why, what to expect at the end, and an idea about the path to achieve it.
- Out of the twelve *akusala citta*, five are permanently removed when one attains the *Sotāpanna* stage: the four greedy *citta* that arise with wrong view (“*diṭṭhi saḥagatha*”), and the delusion *citta* based on *vicikicchā*. All five of these *citta* arise because one does not know the true nature of the world; all *kamma* that lead one to rebirth in the *apāyā* are done with these five *citta*. Thus when they are removed by partially completing *Sammā Diṭṭhi* at the *Sotāpanna* stage, one is permanently prevented from accumulating *kamma* that destines one to a rebirth in the lowest four realms (*apāyā*).
- Furthermore, any such *apāyagāmi kamma* seeds previously accumulated are prevented from proving a potent enough *nimitta* at the moment of death; thus birth in the *apāyā* is automatically prevented.
- Looking at it from another angle, out of the 10 *samyojanas* (those that binds one to *saṃsāra*), three are removed at the *Sotāpanna* stage: *sathkaya diṭṭhi* (the idea that all actions one does with the six sense bases to achieve *amisa sukha* are beneficial), *vicikicchā* (distorted mindset), and *silabbata paramasa* (the idea that *Nibbāna* can be attained just by following precepts, without purifying one’s mind). All three are due to not having *Sammā Diṭṭhi*, or not knowing the true nature of the world: *anicca, dukkha, anatta*.
- In the *Sabbasava Sutta*, there are seven recommended methods for removing defilements for anyone starting on the Path. The first item on the list describes how one can get rid of a bulk of defilements just with correct vision of “this world”, i.e., “*dassanena pahathabba*”; this is what was discussed above.
- Once one understands the true nature of “this world” and understands how to remove the rest of the defilements, then the other six steps are taken, of which “*bhavanaya pahathabba*” (i.e., removal by meditation) comes last. Today, most people start meditating without clearly understanding what to meditate about.

2. Thus, first one needs to understand why we need to escape from “this world.”

- The three characteristics of “this world” (see, “[Anicca, Dukkha, Anatta](#)”) tell us that we can NEVER achieve AND maintain whatever we desire (characteristic of *anicca*), thus we mostly end up with suffering (*dukkha*), and thus one is not in control and becomes helpless (*anatta*). The Buddha merely DISCOVERED this true nature of the world. Many people take Buddha Dhamma to be pessimistic, but Buddha was just a messenger.
- Moreover, the Buddha gave us an optimistic message too. For those who are willing to examine the true nature of the world, there is a better version of happiness that comes from moving away from “this world”, i.e., by voluntarily giving up craving for things in this world. This is the *nirāmisā sukha* of *Nibbāna* (see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)”), which increases as one starts on the Path and becomes complete and PERMANENT at the Arahant stage. Even if one does not get to the first stage of *Nibbāna*, the *Sotāpanna* stage, one could experience this *nirāmisā sukha*, and may help shorten the path to *Nibbāna* in the upcoming lives.

3. Therefore it is CRITICAL to understand *anicca, dukkha, anatta*, before we proceed further here. If you have not done so, please spend some time critically examining and contemplating on these concepts described under many posts on this website, in particular, [“Anicca, Dukkha, Anatta,”](#) [“The Grand Unified Theory of Dhamma”](#) and the links following that on [“Samsāric Time Scale,”](#) and [“Evidence for Rebirth,”](#) and [“Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?”](#) It may be even helpful for many to scan through many other posts before reading those posts.

- That is a lot of reading. But “this world” of 31 realms is very complex. Please keep re-reading all posts until you understand the message. Most of these concepts have been hidden for thousand years, and have been badly distorted, especially *anicca* and *anatta*. **Think about the fact that all biological matter is constituted from just four bases of DNA, and all computer codes are based on two units, 0 and 1.** Thus, one could see how complex the “whole existence” with 31 realms is when there are 28 types of *rūpa*, 89 types of *cittā* and 52 types of *cetasikas* are involved!

4. The main conclusion from *anicca, dukkha, anatta* is “*asarattena anatta*,” i.e., “*anatta* in the sense of it is fruitless to crave for anything in this world.” Thus the Buddha said, “*anissitoca viharathi, na ca kinci loke upadiyathi*,” i.e., “There is nothing in this world that is fruitful, there is nothing to be craved.”

- People “behave badly” in order to “get what they perceive to be valuable.” All immoral acts are done to “get what we want.” We crave for something and greed arise, and then when we don’t get what we wish for, we get angry and hate arises. We first think bad thoughts (*mano saṅkhāra*), then follow through with bad words (*vacī saṅkhāra*), and bodily action (*kaya saṅkhāra*). We do all this because we do not have an understanding of the true nature of the world, i.e., *anicca, dukkha, anatta*, and related facts: knowledge of the rebirth in a wider world of 31 realms with suffering. Thus we do all other bad acts with established wrong views (*niyata micchā diṭṭhi*); see, [“Ten Immoral Actions \(Dasa Akusala\).”](#)

5. Now let us see what happens when one starts learning the true nature of the world including *anicca, dukkha, anatta*, and ALSO the consequences of immoral actions: Then one thinks, “Is it worthwhile to steal from someone to get what I want, which in the end will do me more harm than good (because those will not provide any permanent happiness, AND one has to pay the price of an immoral action if not in this life but in upcoming lives?).”

- Same for any other immoral act: to hurt someone by, uttering false, slandering, harsh, or frivolous speech; stealing, killing, or engaging in sexual misconduct (hurting other parties involved). AND all those start with covetousness, ill-will, and all those are done because of established false views that fruitful things can be had in this world by hurting others without any bad consequences for oneself.

6. Thus when one is about to think of doing such a bad deed or having bad thoughts, this “clear vision” or *sammā diṭṭhi* will help get rid of such thoughts and instead think, “this person is in the same boat, struggling to survive in a world setup for failure.” Thus instead of bad thoughts one will have thoughts of fellowship and compassion for other beings.

- Also one will be working to learn more Dhamma and will be constantly thinking about Dhamma concepts like *anicca, dukkha, anatta*; the joy from deeper understanding will provide incentive to dig deeper on concepts that are not clear. Thus *Sammā Diṭṭhi* leads to the next step in the Noble Eightfold Path: *Sammā Saṅkappa*.

7. With such a mindset one will avoid the four forms of bad speech (lying, slandering, vicious talk, vain talk), because one realizes that such acts will only lead to loss of peace of mind as well as hurting others. Thus one will start living with *Sammā Vaca*; also see, [“Right Speech – How to Avoid Accumulating Kamma.”](#)

8. Similarly, one will clearly see that there is no point in engaging in immoral bodily acts (killing, stealing, and sexual misconduct) in order to get some temporary satisfaction, which in the end will come back to haunt oneself with magnified bad consequences. This will AUTOMATICALLY guide one to act in a moral fashion, i.e., one will have *Sammā Kammanta*.

9. In standard texts, it says one will not undertake the five lifestyles that are to be avoided:

- (a) Dealing and killing animals for meat trade.
- (b) Dealing in poisons.
- (c) Dealing in weapons and arms.
- (d) Dealing in slave trade and prostitution.
- (e) Dealing in intoxicants or liquors and drugs.

- *Sammā ajiva* is more than that. Thus one's lifestyle will automatically change to not only moral living, but also to avoid any kind of act which will be harmful to oneself and/or others. One will take care of one's responsibilities towards one's family and the society, because otherwise one will get in deeper debt, and will not have the mindset to contemplate; see, "[Kamma, Debt, and Meditation](#)."
- **Following the Path is much more than just abandoning everything and becoming a bhikkhu or just following some guidelines or precepts. It needs to be done with wisdom gained through learning Dhamma.** This is *Sammā Ajiva*.

10. As one feels the benefits of such a lifestyle, one will start feeling the *nirāmisā sukha* (see, "[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)")." Then one will be motivated to stay on that Path, and also to learn more about the Buddha Dhamma and to contemplate more on the Three Characteristics (one is said to have a complete understanding of *anicca*, *dukkha*, *anatta* only when one reaches the *Arahanthood* or full *Nibbana*). This renewed effort is *Sammā Vayama*.

11. The above six factors will make one's mind purified and one will start "seeing" better. One will start working with "*yoniso manasikara*" (clear vision). It is more than clear thinking; even a master thief plans his work with clear thinking (on the wrong side).

- Here what it means is one always looks at any issue with *anicca*, *dukkha*, *anatta* in the mind: that it is not possible to maintain things to our satisfaction in the long run; that the more we attach either via greed or hate, the more we will suffer; that it is unwise to do immoral things for temporary happiness to become helpless at the end. This is *Sammā Sati*.

12. When one starts meditating (and this does not have to be last; one can start slowly from the beginning), **one will be easily able to get to *Sammā Samādhi***, focused attention (*ekaggata*). The more one proceeds on the Path (i.e., the more the mind becomes purified), easier *samādhi* starts to grow in oneself; one starts feeling a "lightness" even when not doing formal meditation.

- If one works on developing *jhānā*, one will be able to get to *Ariya jhānā*. Whether one will be using meditation on the Three Characteristics, *Satipaṭṭhāna*, or any other other type of meditation, that will eventually lead to the four levels of *Nibbāna*.

13. It is important to realize that "*Sammā*" in all these eight steps means "*san*" (adding things to perpetuate the suffering/rebirth process) + "*ma*" (remove or get rid of). Thus *Sammā Diṭṭhi* is the vision (*anicca*, *dukkha*, *anatta*) that helps removing "*san*"; *Sammā Saṅkappa* are the thoughts that help remove '*san*'; *Sammā Vācā* is the kind of speech that helps remove '*san*,' etc.

- Thus, one adheres to the eight steps through the UNDERSTANDING of *anicca*, *dukkha*, *anatta*, and not merely for the sake of following some guidelines or precepts. One understands the futility of continuing this rebirth process.

Next, "[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#)",

6.3.9 Difference Between Giving Up Valuables and Losing Interest in Worthless

1. As long as one considers something to be valuable, it is not easy to give it up, It does not matter what ANYONE ELSE says. One will go to much effort and expense to make sure it stays with oneself.

- But if one's own mind sees that something is useless and worthless, then what is the point of keeping it? One will gladly get rid of it.
- One's perception of the "world out there" and "what is valuable and what is not" depends on one's mind. Even though we look at a pile of feces with disgust, a dog or a pig may eat it with relish. And a dog does not have any cravings for gold or money.
- While some people gain pleasure by torturing animals, most are disgusted by such acts. It depends on the level of understanding. A purified mind will see things in a better perspective.

2. The common thinking about Buddhism goes like this: "The Buddha said that this rebirth process is full of suffering, and to stop the rebirth process we need to give up everything in this world to detach from it. But that is not easy to do. I like the stuff that I have and I enjoy life. May be I can attain *Nibbāna* in a future life."

- That is not a correct interpretation of what the Buddha said. The Buddha did say that "this rebirth process is full of suffering." He never asked anyone to give up anything that they had. His only advice was "learn the true nature of this wider world of 31 realms that is characterized by *anicca*, *dukkha*, *anatta* and realize the dangers in staying in it."
- If one truly understood the true nature of the world one's own mind will see the futility of hanging onto worldly things. *Nekkhamma* or "giving up" is not done forcibly, IT JUST HAPPENS when one comprehends the true nature of "this world."

3. If one understands the above few paragraphs, then one knows more about Buddha Dhamma compared to 90% of the "Buddhists." Even many *Theravāda bhikkhus* say, "May you attain *Nibbāna* after enjoying future lives in *Deva* realms", or "May you have much worldly pleasures and attain *Nibbāna* when the next Buddha [*Maitreya* (Sanskrit), *Metteyya* (Pāli), *Maithree* (Sinhala)] appears in the world". They apparently do not comprehend the dangers in staying in the rebirth process.

- This is in sharp contrast with Buddha Gotama's last words, "*appamadena sampadeta*" or "strive diligently and comprehend "*san*" (and attain *Nibbāna*)", because this rebirth process is wrought with unimaginable dangers. Even if we live perfectly moral lives, we do not know what kind of *kamma* that we have done in past lives, and thus there is no way to guarantee a good rebirth unless one attains the *Sotāpanna* stage and makes those worst *kamma bīja* ineffective.
- **This life of about 100 years is just a "blink of an eye"** compared to trillions of years in future lives (unless one attains *Nibbāna*); but it is also **unimaginably precious** because we very rarely get a chance to be born human and most living beings are in the lowest four realms; see, "[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)"

4. Buddha Dhamma is all about PURIFYING one's mind so that the mind can grasp the true nature of this world. The only actions one needs to take are to live a moral life, gradually adhere to a lifestyle that avoids the ten defilements (*dasa akusala*), AND learn Dhamma, in particular truly understand *anicca*, *dukkha*, *anatta*. Everything else will fall into place.

- When one purifies one's mind, it becomes clear that the things that one believes to be valuable are not valuable at all, AND such cravings can bring so much suffering in the future. But one cannot take that advice coming from even a Buddha and act on it forcibly; ONE'S MIND HAS TO SEE IT.
- One may take many precautions to safeguard a "gem" that one thinks has much value. But if the gem is assessed by an expert and is found to be worthless, then one will no longer have the same "attachment" for the "gem" and may throw it away. But until the perception is there in the mind that the "gem" is valuable, one will not part with it.

5. There is another aspect of this forcibly giving up. In addition to the fact that one will be under stress if one tries to do that, one may be accumulating bad *kamma vipāka* if one acts irresponsibly. For example, if one decides that he needs to become a *bhikkhu* and abandons his kids and wife, that is an unwise thing to do.

- We have to act mindfully and with wisdom, making sure that we do not hurt ourselves, our families, or anyone else. Buddha Dhamma is all about the mind, and not about mechanically doing meaningless rituals. As we discussed in several posts, it is the intention and the enthusiasm for doing good, that really matters.
 - One can progress all the way up to the *Anāgāmi* stage of *Nibbāna* as a “householder”, i.e., while fulfilling one’s responsibilities as a husband/wife, parent, etc. While one should certainly give to charity, one needs to make sure that there is enough left to support one’s family. And it is not possible to contemplate or meditate if one has to worry about the next meal or a place to stay.
6. As one makes progress, giving up will happen automatically **at the level of one’s understanding**, and as needed. One does not have to make plans in advance about what to give up or anything like that: “*Dhammo ha ve rakkati dhamma cari*”, or “Dhamma will guide and protect those who follow the Path.” As the mind becomes clear of the hindrances, one will make better decisions, and will not hurt anyone in the process.
7. About 20 years after the Buddha attained Enlightenment, he had to start adding “*vinaya* rules” for the *bhikkhus*. When Buddha Dhamma started flourishing, many unscrupulous people started to enroll as *bhikkhus* to enjoy “a good life.” The Buddha admonished that such *bhikkhus* accumulate much bad *kamma* by getting indebted to those people who make offerings out of *saddhā*.
- *Vinaya* (“*vi*+”*naya*” where “*naya*” means debt) means stay free of debts. The *bhikkhus* can do that by diligently pursuing *Nibbāna* and also by explaining Dhamma to those people, while making sure not to abuse their privileged life where they are honored for these very acts.
8. Getting to debt is bad for lay people too. All our current responsibilities have their origins in the past where we became indebted to others. It may take a while to comprehend this, but we are really paying off debts to even our kids. And if we do not do a good job of it, we WILL have to do it in future lives. Any other relationship is the same way; see, “[Kamma, Debt, and Meditation.](#)”
- One time a *bhikkhu* started sharing his food from the alms round with his parents, and other *bhikkhus* complained to the Buddha. The Buddha asked why he did that he said his parents had become beggars and that is why he did that. The Buddha praised that *Bhikkhu* and officially endorsed it as a *vinaya* rule, that *bhikkhus* can take care of their parents if the need arose. Even as a *Bhikkhu*, one is obliged to take care of one’s parents.
9. When someone gets help from another, it is the obligation of the receiver to show his/her gratitude for that kindly act, by doing a *pattidana* or “giving merits” to that person; see, “[Transfer of Merits \(Pattidana\) – How does it Happen?](#).” If the receiver becomes able to pay back in kind, that should be done too.
- When we deal with people in everyday life, we are engaged in paying back debts even unknowingly. Thus it is a good idea to fulfil one’s responsibilities to the best of one’s ability. This applies to most everyday things we do. Our employment responsibilities needs to be done to the best of our ability. When we do not fulfil our responsibilities anywhere, we stay indebted and accumulate more debt with interest.
 - When doing transactions, we need to make sure that everyone is compensated adequately; otherwise, such debts will have to be paid in the future. Again, intention and the “state of mind” are key factors: We may be able to fool other people, but we cannot fool our own minds.
 - We have enemies because we have had conflicts with them before. And someone has to break that vicious cycle. This is why the *Dhammapada* verse, “*na hi verena verani....*” says: “Hatred never ceases through hatred, but through love alone they cease.” This is an eternal law.
10. Beings in the lower four realms DO NOT HAVE an advanced mental state to affect their future even short term, i.e., in this life; they are simply paying off debts and paying for their immoral acts in the past . They just “go with the flow” spending *kammic* energy that has been accumulated; unless they are fortunate to receive the benefits of a “good *kamma* beeja” from the past (when they were in higher worlds) at the time of death, they are stuck in the lower realms.

- On the other hand, HUMANS CAN totally change their future, within this lifetime (mundane progress), but also affect the future lives: If one wants to avoid the *niraya* (hell) one needs to remove the causes that could cause rebirth in *niraya*, i.e., deep hate. If one wants to avoid rebirth as a hungry ghost (*peta loka*), then one need to remove causes for that, i.e., excessive greed. If one does not want to be reborn an animal one needs to remove both greed and hate. To avoid birth as an *asura*, one needs to take care of oneself, and not depend on others.

11. Buddha Dhamma is a complete theory on existence. EVERYTHING can be explained in a systematic way. If everyone can grasp the basic message of the Buddha, our world will be much safer place.

- When a tree is growing all we need to do is to water it, provide nutrients, and generally take care of it; the fruits from the tree will come out naturally. No amount of praying or wishing is going to get the tree to give more fruits. In the same way, when we follow the Path correctly, everything else will “fall into place.” There is no need to pray or to make wishes or do anything else.
- This world, for all its drawbacks, plays by the rules. Things just do not happen; they happen due to causes. When one understands the causes for bad outcomes, one can work to stop such causes and make sure bad outcomes NOT TO ARISE in the future; this is the meaning of the “*nirodha*” (=“*nir*” + “*udā*,” where “*nir*” is stop and “*udā*” is arising; thus “stop from arising”).

12. The real message of the Buddha is that spending one’s whole life in making mundane progress is really insignificant in the *sansāric* time scale; **why spend all that time to achieve a high status, earn a billion dollars, or anything else mundane if one has to leave all that behind within 100 years?** We have done this over and over countless times. This rebirth process can run into many more trillions of years into the future and this larger world of 31 realms is wrought with unimaginable dangers.

- **The ultimate solution is to stop the rebirth process (eliminate causes for future rebirths), and to release the mind from the material body that leads to much suffering.**
- Thus the key message of the Buddha was to “attain the suffering-free *Nibbāna* by eliminating the causes for rebirth: greed, hate, and ignorance.”
- **But that message itself can only be grasped via purifying one’s mind to a certain extent** by learning about the true nature of the wider world of existence: *anicca*, *dukkha*, *anatta*.

Also see, “[The Way to Nibbāna – Removal of Āsavas](#),” “[Nibbāna – Is It Difficult to Understand?](#),” and “[What are Rūpa? \(Relation to Nibbāna\)](#).”

6.3.10 Root Cause of Anicca – Five Stages of a Sankata

Revised February 3, 2019

1. *Anicca* is the key to the *Sotāpanna* stage. Once one comprehends *anicca*, one can see how *dukkha* arises, and thus why one is totally helpless (*anatta*) in this rebirth process; then one “sees” that the only permanent happiness is attained via seeking *Nibbāna*.

- “*Uppada vayattena anicca*”, or “*anicca* because everything that arises in this world cannot be maintained the way we like”
- Thus in order to understand *anicca* better, we need to realize that everything that we EXPERIENCE in this world has causes for its arising and when those causes (*kammic* energy) are depleted they are destroyed too. Not only that, during the time they are in existence, many of them change unpredictably (this is called *viparināma* versus *parināma* if things change orderly). Anything that arises in this world is called a “*saṅkhata* (*sankata* in Sinhala)”; see, “[Difference between Dhamma and Saṅkhāra \(Sankata\)](#).”
- Thus a *saṅkhata* (*sankata* in Sinhala) can be defined as something that arises due to causes, since nothing arise without causes. **Thus the only entity that is not a *saṅkhata* (*sankata* in Sinhala) is *Nibbāna*, which is attained via removing all causes.**

2. A *saṅkhata* (*sankata* in Sinhala) (pronounced “sankatha”) is an entity arising due to a *saṅkhāra*; a *saṅkhāra* is also a *saṅkhata* (*sankata* in Sinhala), because just like any other *saṅkhata* (*sankata* in Sinhala), any *saṅkhāra* arises and falls; thus *saṅkhāra* is sometimes used to include both; see below. [See [WebLink: suttacentral: Saṅkhatalakkhana Sutta](#)] [*saṅkhata* :[pp. of *saṅkharoti*] conditioned; prepared; produced by a cause.]

- A *saṅkhāra* arises directly in one's mind. What we normally call *saṅkhata* (*sankata* in Sinhala) arise DUE TO those *saṅkhāra*.

3. Therefore, a *saṅkhata* (*sankata* in Sinhala) is normally reserved for something that arises due to *saṅkhāra* (a living being, house, nest, a thought, hopes and dreams, etc) and eventually is destroyed. Nothing in this world lasts forever.

- At the deepest level, anything in this world arises due to the mind. It will take us some more time to get to that, but that is what was meant by the Buddha when he said, “*manopubbangamā dhamma.....*” or “mind precedes everything else....”
- This was described in detail in the *Aggañña sutta*, but please do not bother to look it up on the internet, because ALL existing translations are embarrassingly erroneous. I have discussed it briefly in, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

4. In “*sabbe saṅkhāra anicca.....*”, by *saṅkhāra* what is meant is *saṅkhāra* AND *saṅkhata* (*sankata* in Sinhala), everything in this world except “*nāma gotta*”, which are just records of events.

- Thus all we experience are *saṅkhata* (*sankata* in Sinhala). Anything that experience lasts only momentarily; then it goes to “the past” and gets incorporated into *pañcakkhandha*. Thus anything included in *pañcakkhandha* is born as a *saṅkhata* (*sankata* in Sinhala).
- It is easy to see that all *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* are *saṅkhata* (*sankata* in Sinhala).

5. **However, here we pay special attention to material things, because those are ones that give us a perception of “valuable things worth taking possession of”, sometimes via “any means possible.” Until we get this perception out of our minds, intentionally or unintentionally we will be doing immoral things that will force us to be reborn in the lowest four realms.**

- Any *saṅkhata* (*sankata* in Sinhala) has a lifetime: a fly with a lifetime of a few days, a human with a lifetime of about 100 years, the Chinese Great Wall lasting tens of thousands of years, or a whole universe lasting billions of years, are all *saṅkhata* (*sankata* in Sinhala) (of course none of them made directly by *saṅkhāra*; they are the end result. This cannot be explained even with many essays, and will take a while to get to). But we will take a few simple examples to explain the fundamental idea in this post.

6. What is the difference between a “material *saṅkhata* (*sankata* in Sinhala)” that is inert and another that is “alive”?

- For example, a tree is a *saṅkhata* (*sankata* in Sinhala); it grows starting from a seed and eventually dies; that IS the end of the tree. The causes to form the tree that were embedded in the seed led to the growth of the tree, but as the causes got depleted the tree died.
- But when a human dies, of course the physical body decomposes, but death is not the end of that being. Because a living being grasps a new existence with a new *abhisāṅkhāra* (strong strong forms of *saṅkhāra* that can give rise to rebirth) at the moment of death. Even though an *Arahant*, may have *kamma bīja* due to old *abhisāṅkhāra*, any of those **will not be grasped** at death.
- All inert things in this world came into existence a long time ago, and how they come about ORIGINALLY from *saṅkhāra* involves Dhamma that is very deep. But they all, and the whole physical universe will come to an end when the universe dies in billions of years.
- Yet the sentient beings have been in existence from beginning-less time. Each time we die, we come back with a new existence (new *bhava*).

7. During the lifetime of a *saṅkhata* (*sankata* in Sinhala), it goes through five loosely-defined stages; there are no clear-cut delineations in between adjacent stages. This is because a *saṅkhata* (*sankata* in Sinhala) is changing every moment.

- A good simile is the rising of the Sun and its disappearance at the end of a day. Since the cycle remains virtually unchanged through the year, let us consider this cycle in a country close to the equator. There from about 4 am to about 7 am it is called a sunrise; from that time to Noon the sunshine grows and is peaked around Noon. The “full Sun” is there from about 11 am to about 4 pm, where the power of the Sun is optimum. Then it starts going down and around 7 pm it starts to get dark; then the last part of the night takes over. Yet at each moment, the Sun is moving and the status keep changing.

8. In the same way, a *saṅkhata* (*sankata* in Sinhala) goes through five stages: *udayangama* (rising), *atthangama* (growing), *assāda* (Sinhala is *asvada*) (optimum), *ādīnava* (Sinhala is *adeenava*) (decay starts), and *nissaraṇa* (last stages leading to death); see, “[Assāda, Ādīnava, Nissarana – Introduction.](#)” [*samudayaṅca atthangamaṅca assādaṅca ādīnavaṅca nissaraṇaṅca* (see “[Khuddakapāṭha Cūlaniddesa 5 Pārāyanavagganiddesa 1. Ajitamānavapucchāniddesa](#)”)]

- **Understanding these five stages of a *saṅkhata* (*sankata* in Sinhala) is the key to the *anuloma ñāṇa*, without which one cannot get to the *sammatta ñāṇa*, and eventually to *Nibbāna*.**

9. For example, a seed germinates and starts a bud; this is the arising (*udayangama*) stage. Then it grows to a healthy young tree; this is the growing (*atthangama*) stage where there are no flowers or fruits yet. Then comes the *assāda* (optimum) stage where the tree is flourishing and is full of flowers and fruits. But then with time, the tree will give less fruits and is on the way down; this is the *ādīnava* (decaying) stage where it can come down with various diseases too. This process continues as the *nissarana* stage until it dies.

- A human or animal (the only realms we can see) will go through the same process. A human life starts not as a baby but a single cell in the womb; from there to a baby of couple of years is the arising (*udayangama*) stage. Then comes the growth (*atthangama*) stage until about 15 years or so. Life peaks from there to about 30-35 years, and that is the time one really enjoys life, the *assāda* (optimum) stage. But then inevitably, the decay process starts and one starts feeling aches and pains, diseases, etc in the *ādīnava* stage. This stage is continued in the final stage (somewhere starting from 50-100 years depending on individual) of *nissarana* leading to death.
- Here is a video produced for the Diamond Jubilee of Queen Elizabeth II. Someone has taken a lot of time to put together this video, and it shows four stages of her life. Each of us can do the same (but we of course don’t have enough pictures taken to put together a video like this):

“[WebLink: YOUTUBE: Diamond Jubilee of Queen Elizabeth II](#)”

- Even an inert object like a house, a star, or even a whole universe goes through the same process.

10. This is the underlying nature of this anything in this world, and that is why it is *anicca*: no matter how much we try, we will not be able to maintain anything to our satisfaction over long times.

- **And the reason that this process does not stop for a living being is that during a life, a living being makes more than enough causes for this process to start all over.**
- Some of these causes are good and will lead to “good existences”, where there is relatively more happiness, but more often the causes are bad (due to ignorance of this basic fact), and will lead to existences where the suffering is very great.
- Thus we can see how *dukkha* (suffering) arises due to the transient nature of *saṅkhata* (*sankata* in Sinhala), which in turn leads to the conclusion that one is truly helpless (*anatta*) in this *sansāric* process. If one truly understands this fact, that itself leads to the *Sotāpanna magga* stage of *Nibbāna* (one of the “*atta purisa puggalā*”).

11. These five stages in between the arising and perishing can be seen in anything or any event, and in order to understand the ever-changing nature of everything, we need to see this in everything/every action around us.

- Let us take an example of eating a meal. Sitting down to eat is the *uadayangama* stage; then with a few bites one is into the *attangama* stage, and then one really starts enjoying the meal in the *assāda* stage. But then the hunger goes away, and one starts feeling full and getting tired of eating; this is the *ādīnava* stage. Finally, one stops eating and that is *nissarana*.
- One develops an urge to listen to music, and start the playing device (*uadayangama*); one starts listening (*atthangama*), and starts to enjoy the music (*assāda*). But after a while, the satisfaction wares away, and the enjoyment kind of fades away (*ādīnava*), and finally one had enough of it and stops (*nissarana*).
- The more we start seeing this we can get rid of the two extremes of “something is there with a sense of long-lasting” and “there is nothing there at all.” Things have a transient existence; they exist for finite durations as long as the underlying causes are there, changing every moment.

12. This above analysis was given by the Buddha to help us realize that there are no “permanent” or “existing” entities “in this world.” But we cannot say “nothing exists” either. The Buddha rejected both “exists” and ‘does not exist’ extremes, just as he rejected “self” and ‘no-self’ extremes. **Things and living beings exist, not as enduring entities but as ever-changing entities; AND the suffering is real.**

- People who do not comprehend the message of the Buddha try to come up with “sophisticated looking” statements about the existence, suffering, and *Nibbāna*.
- The message of the Buddha was profound (because it had never been known), but simple once explained: There is no reason to be arrogant because we are born human (may be with lot of wealth) or to be depressed if one is born to poverty; this life lasts only a fleeting moment in the *sansāric* scale. We should try to end this suffering-filled rebirth process without delay, because no one knows when the death comes, and in the next life we could be in a REALLY helpless existence.

13. There are CAUSES for *saṅkhata* (*sankata* in Sinhala) to arise: that knowledge embedded in the “*udayavaya ñāṇa*”; see, “[Udayavaya Ñāṇa – Introduction.](#)”

- The relevant basics for that are discussed in the series of posts starting with “[Namagotta, Bhava, Kamma Bīja, and Mano Thalaya \(Mind Plane\)](#)”,
- Also, related, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#)”,

6.4 Sotāpanna Stage of Nibbāna

The first stage of Nibbāna — the Sotāpanna stage — is also called the Stream Enterer in English and Sovān in Sinhala.

6.4.1 The Sotāpanna Stage

Revised February 24, 2020; August 15, 2020

It is imperative to learn the correct Dhamma from an *Ariya* in order to attain the *Sotāpanna* stage (one of the four requirements). See, "[Four Conditions for Attaining Sotāpanna Magga/Phala](#)." We will discuss a simile for attaining the *Sotāpanna* stage in that regard. We will briefly discuss *Sabbāsava Sutta* to show the importance of first removing wrong views first.

A Simile for *Sammā Ditthi* (attaining the *Sotāpanna* Stage)

1. Suppose a man lives in an area that is normally full of sense pleasures. But there are occasional flooding, droughts, and also Earthquakes. When such calamities occur, he gets distraught, and thus, his mind is not at ease most of the time.

- Yet, he has accumulated some wealth, and in the back of his mind, he believes that “everything will be OK” in the long run.

2. Then one day, an old friend (who has been on travel for many years) comes back and tells him that the reason he left was to find a better place to live. The friend says that he did some research and found out that this land is inherently unstable. Then within several years is going to be destroyed in an Earthquake.

- Furthermore, he says that he found a place that is very prosperous place and that there are no worries about flooding, drought, or Earthquakes there. But it is a long journey to that place.

3. The man tells the friend that he had heard about such wonderful places from other people before. He had followed them at times, but every time came back after trekking for some time because he could not see any benefit. Plus, he says, “how do I know what you say is right? I know that everything is not perfect here, but can you show evidence for your theory that there is going to be a big Earthquake? Also, how can I believe you that this place you found is so wonderful?”

4. The friend shows him all the evidence that he had gathered why this area is unsuitable for living in the long run. He also shows evidence about the prosperity of the new place and also describes to him the travel path.

- The evidence is compelling, and the man decides to follow the friend's advice of the friend and see where that leads to. This is analogous to becoming a *Sotāpanna Magga Anugāmi*.

5. The man spends a lot of time reading about and contemplating on all the evidence that he received. Then he begins to realize that what the friend is saying is true. He decides to take an exploratory trip on that path and makes suitable preparations, as suggested by the friend.

- Once in a while, he wonders whether all these preparations will be a waste of time. But as he keeps on assessing the evidence, he becomes more and more convinced that he needs to take that trip.

6. He starts on the trip and is encouraged by seeing some “landmarks” that the friend told him about. Even though once in a while he thinks about all the “pleasures” he could have had if he stayed home, these “landmarks” give him encouragement to go further and then reaches one of the four “major stopovers” that the friend told about.

- Once he gets to that destination, he becomes totally convinced about the truth of his friend's conclusions. Now there is no going back for him. This is the *Sotāpanna* stage.

7. Thus it is very important to first find out all about what the goal is (*Nibbāna*), correct instructions to get there (the Path), and, most of all, why it is not profitable or wise to stay home (i.e., to stay in “this world”).

The last one is the critical one to comprehend first because unless one sees the dangers of the status quo, one will not be motivated to take action (to start on the Path).

8. Realizing the inherent instability of “this world” is the true understanding of the Three Characteristics: *anicca, dukkha, anatta*. He realizes that there is no point in the current struggle in trying to make permanent peace in a place (“this world”), which is inherently not set up to provide that relief (see, “[The Grand Unified Theory of Dhamma](#)”). And that *Nibbāna* means ultimate, permanent peace of mind. Just this realization leads to the “point-of-no-return,” the *Sotāpanna* stage.

9. One day the Buddha asked Ven. Sariputta to clarify what is meant by “*sota*” and “*Sotāpanna*.” Ven. Sariputta said, “*sota*” is the Noble Eightfold Path, and a “*Sotāpanna*” is one who follows the path correctly. To follow the Path, the first one needs to have a map or the layout of “our existence.”

- What we observe with our limited sensory faculties is only a very small part of a much more complex world; we are beginning to see a bit more of that wider world with the technological advances made by science. But it is still an insignificant fraction of the whole picture.
- The whole picture is very complex, but we do not need to learn all about it (but if one has time, one could learn *Abhidhamma* and learn minute details). The Buddha has condensed the very essence of the existence in this wider world by its Three Characteristics (*Tilakkhaṇa*): *anicca, dukkha, anatta*. When one comprehends those characteristics, one can “see” what lies ahead, and what to do about it.
- **Thus one attains the *Sotāpanna* stage with just *Sammā Diṭṭhi*, which is the correct view of the wider world.**

10. After attaining the *Sotāpanna* stage, he KNOWS what needs to be done and HOW it is to be done. Then he diligently follows the Path and attains the next three stages, culminating in *Nibbāna*.

The Way to the *Sotāpanna* Stage

The key here is that without knowing about the Buddha’s world view (31 realms of existence and the suffering in the four lower realms, see “[The Grand Unified Theory of Dhamma](#)”), one does not comprehend the “*sansāric* suffering.” **Most suffering is incurred when one is born in any of the four lowest realms.** This is important because it is possible that (especially young and wealthy people) may not experience that much physical and mental suffering in this life. And in order to have faith in the Buddha’s world view, one needs to spend some time examining the evidence for it.

1. When one clearly sees why it is not fruitful to stay in “this world” of 31 realms, he/she has understood the true nature, the three characteristics *anicca, dukkha, anatta*, of “this world.”

- *Sammā Diṭṭhi* is the realization that there is nothing “substantial” to be had by staying in “this world.” This clear vision leads to the conclusion that there is no point in doing immoral things (those that cause rebirth in the four lower realms).

2. We strive to gain or own “things” in this world because we perceive that we can achieve happiness eventually; this is *sakkāya diṭṭhi* or *sathkāya diṭṭhi* (both “*sakka*” and “*sath*” mean “good” or fruitful, and “*kāya*” means “*kriya*” or actions. *Diṭṭhi* means wrong view. Thus, *sakkāya diṭṭhi* means our wrong view that our actions to acquire “things” or to “seek happiness” are good and fruitful.

- When one truly understands *anicca, dukkha, anatta*, this wrong view is removed. One realizes that nothing we do can lead to permanent happiness “in this world.”

3. Furthermore, for one who has clearly seen *anicca, dukkha, anatta*, the mind does not allow serious wrongdoings (*vici + ki + ichcha* = liking for wrong actions or things) that could lead to birth in the lower four realms.

- There is no doubt regarding the “world vision” that he/she realized. Thus *vicikicchā*, or the liking for unfruitful and harmful actions, is removed at the *Sotāpanna* stage.

4. Therefore, one just needs to contemplate on the true nature of the world. It is done by purifying the mind, and cannot be done just by following certain rituals, such as just obeying precepts on certain days.

- Thus the idea of “*sīlabbata parāmāsa*” or “*Nibbāna* can be attained by following rituals” goes away at the *Sotāpanna* stage. One realizes what the Buddha said by “*saṃvaraṭṭena sīlam.*” It is that “*sīla*” or moral behavior is achieved by the constraint of eye, ear, nose, tongue, body, and mind. That must be monitored at ALL TIMES, not by “observing precepts” for a day or even several days.

5. For one who has become “*dassanā sampanno*” (one with true and clear vision), the mindset changes not by following formal procedures. The change of mindst comes by understanding the futility of breaking any precepts or wrongdoings. Even if one does a wrong act, the mistake is realized, and one takes care to avoid it.

6. Please keep in mind that this is not to discourage people from observing precepts as a formality. This is a good thing to do for those who are starting on the Path. It is also a good habit to instil in children. It is customary in Buddhist countries for whole families to go to the temple and observe “*pañca sīla*” (five precepts) or “*aṭṭhaṅgika sīla*” (eight precepts) on *Poya* (Full Moon) days.

Key Points from the *Sabbāsava Sutta* (MN 2)

The key to attaining *Nibbāna* is to remove the *āsavā* (residue from the fermentation of bad thoughts/habits over many *saṃsāric* births). In the *Sabbāsava Sutta*, the Buddha listed seven steps to remove the *āsavā* and to purify the mind, thus paving the way to *Nibbāna*. These seven steps are listed below:

1. **Removal by clear vision** (“*dassanā pahātabbā*,” where *dassana* is vision and *pahātabba* is removal). This is a clear understanding of *anicca*, *dukkha*, *anatta*.
2. **Removal by the restrained use of the sense faculties** (“*saṃvarā pahātabbā*,” where *saṃvara* is the disciplined use of the sense faculties: not to over-indulge in the senses).
3. **Removal by good and frequent associations** (“*paṭisevanā pahātabbā*,” where *sevana* is an association: for example, with good friends and good deeds).
4. **Removal by tolerance and patience** (“*adhivāsanā pahātabbā*”). For example, even if one is tempted to steal because one is hungry, one should contemplate the consequences of stealing. There are ways to earn a living.
5. **Removal by staying clear of “bad influences and environments”** (“*parivajjanā pahātabbā*”). One needs to avoid bad friends, bad locations for living (due to floods, bad neighbors, etc.), avoiding unsuitable times to go out, etc.
6. **Removal by getting rid of certain things** (“*vinodanā pahātabbā*”). One needs to get rid of bad thoughts that come to mind, such as excessive sensory pleasure, hate, etc.
7. **Removal by meditation** (“*bhāvanā pahātabbā*”). When one has a clear vision in #1, it becomes apparent what to contemplate.

The clear vision is the first on the list. Just like one should not undertake a journey without learning about the destination, the path, and the reason for the journey, one needs to start getting rid of *āsavā* by first having a clear vision of the Buddha’s world view (see, “[The Grand Unified Theory of Dhamma](#)”) and understanding what these *āsavā* are and how they arise. More on this topic will be discussed in the “[Key Dhamma Concepts](#)” section.

- There are four *āsavā*: *kāmāsava* (craving for sense pleasures), *diṭṭhāsava* (cravings due to wrong views), *bhavāsava* (craving for existence), and *avijjāsava* (cravings due to ignorance).

The *Sotāpanna* removed the *diṭṭhāsava* through clear vision. Once one understood the true nature of “this world” by contemplating on *anicca*, *dukkha*, *anatta*, one would not commit any immoral acts to gain

anything in “this world.” See, “[Anicca, Dukkha, Anatta - Wrong Interpretations](#).” This alone saves one from future rebirths in the lower four realms.

- A *Sotāpanna* still has the other three *āsavā* left. Those are removed mainly by the meditation on the *Satta Bojjhaṅga* (seven *Bojjhaṅga*.)

The other five steps listed in the *Sabbāsava Sutta*, as one can clearly see, are common sense things to do. They need to be followed at any stage. Actually, anyone can use those steps to enhance the quality of life and to remove any bad habits. For example, alcohol or drug use, to eating too much. A clear vision of why those are bad, and why they need to be stopped is an important step.

- *The Mahā Satipaṭṭhāna Sutta* covers all seven steps in a somewhat different fashion. The *Ānāpānasati bhāvanā* (not the breath meditation version) plays a major role here.

Next, “[How to Cultivate the Noble Eightfold Path Starting with Anicca, Dukkha, Anatta](#)”,

6.4.2 Why a *Sotāpanna* is Better off than any King, Emperor, or a Billionaire

Attaining the first stage of *Nibbāna* (*Sotāpanna* stage) will remove suffering in the *apāyā* forever, which could be more than billions or even trillions of years. This is not an exaggeration since we have been in this rebirth process from an untraceable beginning; see, “[Evidence for Rebirth](#).” Thus any achievement in this life of 100 years is no match.

- Most people think that Buddha Dhamma is a pessimistic “religion.” It is neither a religion nor is pessimistic. Let us discuss these two issues a bit first.

1. Buddha Dhamma describes the true nature of “this world”, which is far more complex than most people think.

- A religion makes a promise that if one abides by its tenets/doctrine and lives this life accordingly, then one will be rewarded accordingly. In most religions, one is promised birth in heaven for eternity if this is kept.
- But a basic tenet in Buddha Dhamma is that this life of about 100 years is just a blip compared to the countless lives one has had in the past. **Even if we live a perfect life during these 100 years, that does not guarantee one anything about the future lives**, because we may have done *kamma* in PREVIOUS LIVES that could give rebirth in even the lowest four realms, the *apāyā*, including the *niraya* (hell).
- **The only way to GUARANTEE that one will NOT be reborn in the *apāyā* is to negate the causes (*lobha, dosa, moha*) that could give opportunities for all such bad *kamma vipāka* to come to fruition.** And that is possible only via attaining the *Sotāpanna* stage. Even though attaining the *Arahant* stage of *Nibbāna* via complete removal of *lobha, dosa, moha* (and thus the ten *sanyojana* or fetters) will do that too, attaining the *Sotāpanna* stage does not require all that. It just requires one to comprehend *anicca, dukkha, anatta* to the extent that only three *sanyojana* (fetters) are removed.
- Removal of three (or ten) *sanyojana* cannot be achieved via following set rules/precepts. **One needs to purify one’s mind so that the true nature (*anicca, dukkha, anatta*) of this complex world of 31 realms is understood.** That is why Buddha Dhamma is not a religion per standard definition.
- On the other hand, if one just wants to take what is helpful to lead to moral life and use Buddha Dhamma as a religion, there is nothing wrong with that. That would be much better than living an immoral life. As one proceeds, it is possible that Dhamma will become more clear, and that may provide the incentive to “dig deeper.”

2. Now to the second issue: Because the Buddha emphasized the “suffering in this world”, many think that Buddha Dhamma is pessimistic. The Buddha did not say that this current life is necessarily filled with suffering (even though it has more suffering than people realize); rather, most suffering is encountered in the lowest four realms of the 31 realms. **Thus, this reality of suffering is to be understood in the context of this wider world view.** The Buddha just discovered this true nature of the (more complex) world.

- Furthermore, he showed how to be free from this inevitable suffering in future births, and to attain permanent happiness, *Nibbāna*.

3. Please re-read the above material on those two key points. It is important to look at this “wider world view” when trying to make an assessment of what we should strive for in this life. This analysis leads to a whole new perspective if there is evidence to believe the “wider world view” of the Buddha with repeated rebirths in 31 realms that include the four *apāyā* with unimaginable suffering.

- Does it make sense to spend 60 years of a 80-100 year life to accumulate wealth and fame, if one is to lose most of one's sensory enjoyments over the last few decades (and possibly have a major disease or memory loss)?
- Does it make sense to accrue unimaginable suffering in the *apāyā* in future births by committing any of the *dasa akusala* (ten defilements) to make money, get a promotion, to live in a big house, get a prestigious position, etc (for less than 100 years)?
- The realities of old age, disease, and death hold true for a king, emperor, a billionaire, or a famous film star just the same as for an average person. At the old age, all these achievements actually become a mental burden because one constantly thinks about the “good old days” and become depressed of not being able to enjoy the sensory pleasures just because the whole sensory system is breaking down.
- Here is a video that summarizes what I tried to explain the above paragraph :

[WebLink: YOUTUBE: Aging Stars of the Golden Age](#)

4. And this predicament is true for ANY being in ANY realm, unless at least the *Sotāpanna* stage is attained. A *deva* or a *brahma* could enjoy millions of years of pleasurable lives, but WILL end up in the *apāyā* at some point in the future unless at least the *Sotāpanna* stage of *Nibbāna* is attained. There are several incidents mentioned in the *Tiṭṭaka* where the Buddha emphasized how important is the *Sotāpanna* stage compared to any existence in the 31 realms:

- One time the Buddha was crossing a paddy field with 500 *bhikkhus* where many cattle were grazing, and smiled. A Buddha (or an *Arahant*) does not smile frequently, so Ven. Ānanda asked the Buddha why he smiled. The Buddha said, “each one of these has been the king of the *devas* at some in the past.” Ven. Ānanda asked why that is a reason to smile. Then the Buddha said, “All these 500 *bhikkhus*, who are *Sotāpannas* or above, will never be born an animal. That is why I smiled.”
- Another time the Buddha and Ven. Ānanda were walking and saw a piglet by the roadside, and the Buddha again smiled. Asked why, he said, “This piglet had been a princess in a life way back; she cultivated *anāriya jhānā*, attained the highest (eighth) *jhāna* and had *abhīññā* powers. She was born in the highest *brahma* world, but now she is just an animal. On the other hand, those who have attained the *Sotāpanna* stage in my *sāsana* will never be born in the *apāyā*.”

5. Many people do not believe in rebirth. But having a belief is not going to help if it is a wrong view. Considering the possible dire consequences IF one gets this world view wrong, it makes a lot of sense to spend some time and to critically examine the evidence for rebirth in particular (see, “[Evidence for Rebirth](#)”), and the wider world view of the 31 realms in general (see, “[The Grand Unified Theory of Dhamma](#)”).

6. The *niyata micchā diṭṭhi* (established wrong views) is one of the stronger ones of the *dasa akusala* that could lead to birth in the *apāyā*; the key word there is “*niyata*,” or “established”, i.e., one firmly believes, for example, that there is no rebirth process. One could avoid this by at least having an open mind, and NOT rule out those possibilities. Even a *Sotāpanna* may not be truly convinced of some aspects of the wider world view (but not rebirth): for example, he/she may not have any strong conviction on the existence of *deva* worlds, or may not even think about such matters.

- Another point to consider is how the standard world views have changed over time since the Buddha revealed his Dhamma about a very complex world with no discernible beginning. Philosophers since that time (Socrates was a contemporary of the Buddha) put forth many world views that have been discarded one by one: [WebLink: WIKI: Astronomy and cosmology](#)

- Within the past 100 years, the Buddha’s world view has gained much support from science and that pace is accelerating with the new string theories as well as quantum mechanics. With all this impressive advances science has made, it cannot account for 96% of the mass of the universe; see, [WebLink: NASA: Dark Energy, Dark Matter](#) and [WebLink: WIKI: Dark matter](#). This is because there is so much that we cannot “see” with our eyes or even with the current scientific instruments; see, “[Consciousness Dependence on Number of Dimensions.](#)”
- There are good reasons to believe that more of these currently hidden aspects of the universe will be revealed in the future by science. Just imagine that even a hundred years ago, scientists believed that the universe had only a few galaxies and that it was stable. Now we know that there are billions of galaxies in our universe, that there could be numerous universes, and all those universes are not stable, i.e., they are born and will perish in the future.
- Until recently, the humans also had the wrong impression that the Earth is at a special place in the universe. But now we know that it is an insignificant “speck of dust” in a vast universe; see the video in “[The Grand Unified Theory of Dhamma.](#)”

7. Please spend some quiet time contemplating on these issues. These posts are not for reading pleasure; these are issues that have far more serious consequences than making a billion dollars. Some of my friends tell me that I should “tone down” the content because many people are turned off by the “realities of the world.”

But my goal is not to have a huge readership. Rather, if I can convey the true message of the Buddha for even a few people I would have accomplished my goal. There is ONLY ONE set of natural laws and we cannot alter them, just like we cannot alter the laws of motion: If a car is headed to a brick wall, the car needs to be stopped or the consequences will not be good. Let me give a few examples of how the Buddha assessed this situation:

- Some *brahmins* complained to the Buddha that he was not spending enough time on debating them, but would spend a lot of time with even a few of his disciples. The Buddha asked this question: “Suppose a farmer has three paddy fields: one is extremely productive, another is OK but requires considerably more time to yield a good harvest, and the third field is of such a poor condition it is impossible to get any harvest. Which field would the farmer put his efforts on? He will first take care of the most productive field, totally disregard the third field, and spend whatever extra time he has on the second field. It is the same way with me. I want to help those who are interested and capable of learning my Dhamma. Debating with those who have closed minds is a waste of time.”
- One day the Buddha and Ven. Ānanda walked for many miles to a village to deliver a discourse. Everybody gathered and the Buddha was sitting there for a couple of hours without starting the discourse. Finally, a farmer who had lost a cow and was out in the forest looking for it found the cow, went home, took a bath, ate, and came hurrying to the event. The Buddha started the discourse right after he came in. When they were walking back after the discourse, Ven. Ānanda asked the Buddha why he kept everyone waiting until that one farmer came in. The Buddha said, “Ānanda, I walked all this way to give the discourse because of that farmer. I saw that he was capable of grasping the Dhamma, and he did attain the *Sotāpanna* stage.”

8. **The Buddha said, “This Dhamma is different from anything the world has ever seen.”** And that is true. It takes time to grasp the complexity of this world, much of which is hidden from us (and only a Buddha is capable of finding them; see, “[Dhamma and Science – Introduction](#)”). There is no need to rush and embrace everything; one needs to spend time contemplating on the validity of Buddha Dhamma.

- There are many introductory but critical posts in the section, “[Moral Living and Fundamentals.](#)” **That section is actually more about the basic concepts of Buddha Dhamma.** I would encourage even those who are familiar with “Buddhism” to peruse that section, because without the correct basics one cannot grasp more advanced concepts. **And I am certain that 90% of “Buddhists” are not even aware of some of these basic concepts.** Please comment on anything at this site and don’t hesitate to point out any incorrect concepts.

9. We can, in a way, compare this situation with the situation a parent faces with a teenager. The teenager wants to go out and have a good time with the friends. But the parent says, “do not just think about the immediate pleasures. If you do not study well and get good grades at school, you will not have a good job when you grow up.”

- It is the same here. We are trapped in a “rat race” to just keep up with day-to-day pleasures and activities. The Buddha’s message is that there is a much longer time frame to think about.
- This life is just a drop of water compared to the huge ocean that is the *sansāric* journey of rebirths. It is imperative to take some time and contemplate on the “bigger picture.” We may not get another chance of a human birth for millions or billions of years; this is NOT an exaggeration.

10. **But the best part of the Buddha’s message, which has been lost for over thousand years, is that the *nirāmisa sukha* is better than any sense pleasures. We are under the illusion that sense pleasures are to be pursued. If one can taste the happiness from staying away from sense pleasures, one will NEVER value the sense pleasures. Those who have experienced even *anāriya jhānic* experiences, will have some idea of such *nirāmisa sukha*.**

- It is a feeling of huge release more than a pleasure in the sense of consuming a tasty food, for example. And it is not temporary, especially if one can get to the *Sotāpanna* stage. Then that “base level” of relief is never lost, even in future births.
- When one starts on the Path by comprehending *anicca, dukkha, anatta*, the sense of peacefulness, the release from stresses, is clearly felt; and that gives an incentive to stay on the Path even before attaining the *Sotāpanna* stage.
- The best part is the realization that one will never be born in the *apāyā*. Any king, emperor, billionaire, is not assured of that; on the contrary, the efforts to attain such temporary status may CAUSE one be born in the *apāyā*, if one engaged in *dasa akusala* to attain them.
- As Carl Sagan pointed out in the video in “[The Pale Blue Dot.....](#),” it is worth while to contemplate “where are all those kings and emperors who gained fame through the suffering of so many people?.” They are likely to be in the *apāyā* suffering for millions of years to come.

Next, “[Myths about the Sotāpanna Stage](#)”,

6.4.3 Myths about the Sotāpanna Stage

Revised September 7, 2016; #6 revised on December 2, 2016; September 28, 2018

There are many myths and misconceptions on who a *Sotāpanna* is, and what needs to be done to become a *Sotāpanna*. Here we discuss some of these misconceptions.

1. When I was growing up in Sri Lanka, I was under the impression that a *Sotāpanna* could fly through the air, and an *Arahant* could vanish and reappear as he/she wished. These were the “mythical” status assigned to *Sotāpannas* and *Arahants*. I guess that is due to the fact that such attainments are perceived these days to be impossible to be attained on the one hand and also a clear idea of what those attainments mean has been lost.

- One is unlikely to identify a *Sotāpanna* or even an *Arahant* if one has even been associating with that person.
- It is true that the attainment of even the *Sotāpanna* stage is not a trivial matter. And one cannot expect it to be trivial; see, “[Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire.](#)”
- A *Sotāpanna* is incapable of doing only six things: Killing mother, killing mother, killing an *Arahant*, injure a Buddha, *Saṅgha bheda* (teaching *adhamma* as Buddha Dhamma), having *niyata micchā ditṭhi*; see, “[WebLink: suttacentral: Bahudhātuka sutta \(MN 115\).](#)”

2. The attainment of supernormal powers such as flying through the air or to vanish and reappear is possible even by developing *anāriya jhānā*. Most of such attainments are lost at death (even though the ability to get them back will be easier if one is reborn human again).

- Attainment of various stages of *Nibbāna* are accomplished by cleansing one's mind and it has nothing to do with developing supernormal powers. Even though it will be much easier for an *Arahant* or a *Sotāpanna* to develop such powers, by the time one attains such levels of purity of the mind they are not enamored anymore with such supernormal powers. Most of the *Arahants* who had supernormal powers at the time of the Buddha had developed those before encountering Buddha Dhamma. For example, Ven. Sāriputta and Ven. Moggallāna were *vedic brahmins* who had developed all *anāriya jhānā* and already possessed such powers before they met the Buddha.

3. Various stages of *Nibbāna* are attained by systematically removing the 12 types of *akusala citta* (immoral thoughts) or, put it in a different way, by removing the ten *saṃyojana*. There are other ways to describe those conditions too; see, "[Conditions for the Four Stages of Nibbāna.](#)"

- The *Sotāpanna* stage is reached via removing the four *lobha citta* that are based on *micchā diṭṭhi* (wrong vision), and the *moha citta* of *vicikicchā*. It is important to note that the remaining 7 *akusala citta* including the two *dosa-mūla citta* are still with a *Sotāpanna*.
- **The four *lobha citta* that a *Sotāpanna* removes are the ones that are responsible for *vyāpāda*,** which is the strong version of anger that makes one eligible for rebirth in the *apāyā*; see, "[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta.](#)" The two *dosa-mūla citta*, which gives rise to milder versions of anger, are removed only that the *Anāgāmī* stage.
- Furthermore, *kāma rāga* (craving for sensual pleasures) is included in the other four *lobha-mūla citta* that are "*diṭṭhi vippayutta*" or "not associated with wrong views." Thus craving for sensual pleasures is also removed only at the *Anāgāmī* stage.
- **Therefore, attaining the *Sotāpanna* stage — while not trivial — is not as hard as many people think if one has a *tihetuke uppatti*.** However, it is not possible to determine who has *tihetuka* or *dvihetuka paṭisandhi*; most people belong to those two categories. One with *dvihetuka paṭisandhi* cannot attain *magga phala* or *Ariya jhāna* in this life, but still can make progress towards *Nibbāna*; see, "[Patisandhi Citta – How the Next Life is Determined According to Gathi.](#)"
- On the other hand, many people are focused on trying to get rid of the perception of "self." That is not something that can be forced; it just HAPPENS at the *Arahant* stage. It is not possible to make that perception go away before that.

4. Turning to another myth, NO ONE ELSE can discern what *magga phala* one has attained: *Sotāpanna* or a higher stage of *Nibbāna*. Only a Buddha has that capability. Let me give an example to illustrate this point:

- One time, Ven. Sāriputta was giving instructions to a *bhikkhu*. The Buddha came along and told Ven. Sāriputta that the *bhikkhu* had already attained the *Arahantship* and thus there is no need to give instructions to him. It turned out that the *bhikkhu* in question did not say anything to Ven. Sāriputta out of respect for him.
- Now, Ven. Sāriputta is only second to the Buddha in this *Buddha Sāsana*. He and Ven. Moggallāna were the two chief disciples: Ven. Sāriputta was second in knowledge to the Buddha and Ven. Moggallāna was second in psychic powers to the Buddha.
- Thus, if Ven. Sāriputta was not able to discern whether that *bhikkhu* was an *Arahant*, it is NOT possible for anyone living today to determine the stage of *Nibbāna* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*) of any other person.
- One could be of any race or even religion and still be a *jāti Sotāpanna* (and, even that person may not be aware of it). If one had attained the *Sotāpanna* stage in previous life, he could in principle, be born

anywhere in human or *deva* realms. Buddha Dhamma describes nature's laws; it applies to everyone the same way.

- Those people who attained various stages of *Nibbāna* during the early years had different religious beliefs. They sat down to listen to the Buddha and by the time the discourse was over, they had attained various stages of *Nibbāna*. Some people came to debate the Buddha and left as *Sotāpannas*. One does not need to formally become a “Buddhist” to realize the true nature of “this world.”

5. This is why one has to be very careful when dealing with other humans, and not to offend anyone intentionally. It is very important to have at least some knowledge of the different weights of *kamma*; see, “[How to Evaluate Different Weights of Kamma.](#)”

- Some people worry about inadvertently killing insects while cleaning the house, but do not think twice about saying a lie or a hurtful thing to a human. That is getting things backwards.
- The severity of the *kamma* depends on the “level of the being” that it is directed at. It is EXTREMELY difficult to get a human life; thus a human life could be millions times worth compared to any animal life. A *Sotāpanna* is at a more than thousand-fold higher level compared to a normal human, and the subsequent levels are even higher.
- There is no being in the 31 realms that is at a higher level compared to an Arahant. That is why killing an *Arahant* is a *Anantariya pāpa kamma*, i.e., it will bring extremely bad *vipāka* in the very next life. And it is not possible to say whether a given person is an *Arahant* by looking at that person, or even associating with him/her for a short time.

6. How does one discern whether one has attained, say, the *Sotāpanna* stage?

- A *Sotāpanna* does not attain *Ariya jhānā* coincident with the *phala* moment. There one's “lineage” (*gotra*) is changed from a normal human to a *Sotāpanna* at the *gotrabu citta*. A similar *citta vūthi* runs in attaining a *jhāna*, but in a *jhāna* one's lineage is changed only to a *jhānic* state at the *gotrabu* moment; see, “[Citta Vūthi – Processing of Sense Inputs.](#)”
- However, if one who just became a *Sotāpanna* had developed any *anāriya jhāna* previously, then that *jhāna* could be easily converted to an *Ariya jhāna* with some practice. Unlike an *anāriya jhāna*, an *Ariya jhāna* cannot be broken even if one forcefully tries to generate a sensual/hateful thought. Thus, for someone who has had *jhānic* experiences this may be a clue.
- Also, if one can get into the fourth *Ariya jhāna*, that means one is at least a *Sotāpanna*; probably an *Anāgāmī*.
- Another way is to contemplate whether one is capable of doing any acts that could lead to rebirth in the *apāyā* (the four lowest realms). If one has ingrained characteristics or habits (*gathi*) of an animal, then it is likely that person will be born animal of that character. If one has extreme hate, and is capable of plotting to bring harm to other people, then that person may be destined to the *niraya*. If one does not have any of such extreme greed, hate, and ignorance, then one may be free of the *apāyā*, i.e., one is likely to be a *Sotāpanna*.
- However, unless one is subjected to extreme pressures, it may not be possible to discern whether one has removed such “*apāyagāmī gathi*.” It is easier to live a moral life when one has enough resources and when nothing unexpected happens. But there are instances when perfectly “moral people” commit murders in a moment of rage.
- The *Sotāpanna* stage is attained purely via attaining *Sammā Diṭṭhi*, and removing 5 of the 12 possible *akusala cittā*: 4 *lobha cittā* associated with *micchā diṭṭhi* and the *vicikicchā citta* that arises out of ignorance of the true nature of “this world.” All these 5 *citta* are removed via just comprehending *anicca*, *dukkha*, *anatta* to a certain extent; see, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Cittas.](#)”
- Thus if one has any ESTABLISHED (*niyata*) wrong views (see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”), then it is unlikely that one is a *Sotāpanna*. Attaining the *Sotāpanna* stage is not possible until

one sees the “unfruitful nature” of existence anywhere in the 31 realms; and that is not possible if one has **ruled out** rebirth or the existence of other realms; see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

- Also see, “[How Does One Know whether the Sotāpanna Stage is Reached?](#)” for more details.

7. Many people believe it is necessary to meditate a lot to attain the *Sotāpanna* stage. While it is beneficial to meditate, one can in principle be a *Sotāpanna* without doing any FORMAL meditation. I have given some examples from the time of the Buddha in #4 above; however, such cases are rare these days.

- There are basically two steps to get rid of *lobha*, *dosa*, *moha* or to attain *Nibbāna*: “*Dassanena pahathabba*” (removal by vision or the “ability to see”) comes first; that is what is necessary to attain the *Sotāpanna* stage.
- However, in order to accomplish “*Dassanena pahathabba*” or “to see clearly”, one needs to realize what the Buddha meant by “suffering”, which comes in two types. This is described in detail — starting with the first type of suffering that can be eliminated in THIS LIFE — in the “[Living Dhamma](#)” section.
- Various stages of *Nibbāna* are attained as *lobha*, *dosa*, *moha* are removed in stages. One attains the *Sotāpanna* stage via “*dassanena pahathabba*” i.e., one removes those 5 *akusala citta* associated with “wrong views” via discerning the true nature of “this world of 31 realms”, i.e., *anicca*, *dukkha*, *anatta*.
- Then, a *Sotāpanna* can remove the remaining 7 *akusala citta* in three stages via meditation, i.e., “*bhavanaya pahathabba*” and attain the higher stages *Nibbāna*.
- Of course, it is good to meditate before the *Sotāpanna* stage; it will be beneficial to calm the mind and to contemplate on *anicca*, *dukkha*, *anatta*. But the “*bhāvanā*” or meditation that is needed for the *Sotāpanna* stage cannot be restricted to formal meditation because moral conduct or “*sīla*” sets the necessary environment for the mind to “clearly see” by reducing *pancanivarana*; see, “[Living Dhamma](#).”

6.4.4 Anuloma Paṭiloma Paṭicca Samuppāda – Key to Sotāpanna Stage

March 15, 2019

1. Just before his Enlightenment, the Buddha figured how beings are born endlessly due to their own way of thinking. That knowledge is embedded in *Paṭicca Samuppāda*, translated as, “Dependent Origination.”

- It describes the origins of different types of living beings, according to their own thought processes (*saṅkhāra*) based on the level of *avijjā* (ignorance of the real nature).
- *Anuloma Paṭicca Samuppāda* describes the forward progression of events leading to eventual suffering. *Paṭiloma Paṭicca Samuppāda* describes the backward progression to see that indeed *avijjā* must be removed (by cultivating wisdom or *paññā*) in order to stop future suffering from arising.

2. “[WebLink: suttacentral: Paṭhama Bodhi Sutta \(Udāna 1.1\)](#)” and “[WebLink: suttacentral: Dutiya Bodhi Sutta \(Udāna 1.2\)](#)” state how the Buddha comprehended *anuloma* and *paṭiloma Paṭicca Samuppāda* during the night of the Enlightenment.

- Most people are quite familiar with how suffering originates with *saṅkhāra* generation due to the ignorance of the Four Noble Truths (*avijjā*), and then goes through the familiar steps: “*avijjāpaccayā saṅkhārā, saṅkhārapaccayā viññāṇaṃ, ..and ends with “.. Evametassa kevalassa dukkhakkhandhassa samudayo hoti”ti* OR “the whole mass of suffering.”

3. It is also important to trace the steps backwards and see how future suffering can be stopped by cultivating *paññā*: “*avijjānirodhā saṅkhāranirodho, saṅkhāranirodhā viññāṇanirodho, viññāṇanirodhā nāmarūpanirodho, nāmarūpanirodhā saḷāyatanirodho, saḷāyatanirodhā phassanirodho, phassanirodhā vedanānirodho, vedanānirodhā taṇhānirodho, taṇhānirodhā upādānanirodho, upādānanirodhā bhavanirodho, bhavanirodhā jātinirodho, jātinirodhā*

jarāmaṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti. Evametassa kevalassa dukkhakkhandhassa nirodho hotī'ti."

- By stopping *jāti*, it is possible to **stop suffering from arising** (at the end). Now we just go backwards: *Jati* (births) stopped by stopping *bhava*, which is stopped by stopping *upādāna*, *taṇhā*, *vedanā*, *phassa*, *saḷāyatana*, *nāmarūpa*, *viññāṇa*, and *saṅkhāra*. When one gets to the first step: *saṅkhāra* cannot be stopped from arising without eliminating *avijjā* (and thus getting rid of ALL *gati*).
- In fact, if one really contemplates on this process, one can get some deep insights.

4. It is quite clear that in order to stop “the whole mass of suffering”, one MUST stop each of those 10 factors (*jāti*, *bhava*, *upādāna*, *taṇhā*, *vedanā*, *phassa*, *saḷāyatana*, *nāmarūpa*, *viññāṇa*, and *saṅkhāra*) from arising.

- Thus one can clearly see that *nirodha* means “stop from arising.”
- One can also see that can be done ONLY by removing *avijjā*, which is the same as cultivating *paññā*.
- The removal of *avijjā* (and cultivation of *paññā*) is done by following the Eightfold path, which has two components; see, for example, [“What is Unique in Buddha Dhamma?”](#) There are no shortcuts!

5. We concluded in #4 above that in order to stop future suffering from arising we must stop those 10 terms from arising. This appears not to make sense with some of those terms when we try to reconcile that with the fact that an *Arahant* has stopped those from arising.

- In particular, one could object in particular that *vedanā*, *phassa*, *viññāṇa*, and *saṅkhāra* still arise in a LIVING *Arahant*.
- As I have explained in many posts scattered throughout the website (especially in the [“Paṭicca Samuppāda”](#) section), those terms are in the “*uddesa*” version. This is explained in detail in the post, [“Sutta – Introduction.”](#)
- Let us discuss briefly a few of those terms.

6. Basically all current English translations just provide word-by-word translations of that “*uddesa* version” without any explanation. For example, the English translation of the first sutta in #1 above states, “.because of **consciousness**: mind and body, because of mind and body: the six sense spheres, because of the **six sense spheres**: contact, because of **contact**: feeling, because of **feeling**... because of **continuation**: birth, because of **birth**: old age, death, grief, lamentation, pain, sorrow, and despair all arise, and so there is an origination of this whole mass of suffering.”; see, [“WebLink: suttacentral: The First Discourse about the Awakening Tree \(UD 1.1\).”](#)

- According to the second *sutta*, all those terms (consciousness, six senses, contact, feeling) should not arise in an *Arahant*!
- Furthermore, it is not clear what is meant by “continuation” (for *bhava*), which leads to *jāti* (births), and thus “this whole mass of suffering.”

7. For example, the step, “*avijjā paccayā saṅkhāra*” really should be “*avijjā paccayā abhisāṅkhāra*.”

- As is explained in the post, [“Saṅkhāra – What It Really Means,”](#) an *Arahant* generates *saṅkhāra*, but NOT *abhisāṅkhāra*.
- It is those *abhisāṅkhāra* that lead to future births and thus future suffering!

8. The next step is written in *suttā* as “*saṅkhāra paccayā viññāṇa*” and that is the *uddesa* version.

- It needs to be explained as “*abhisāṅkhāra paccayā viññāṇa*,” where *viññāṇa* means “defiled consciousness.”
- An *Arahant* would have “purified *viññāṇa*” and NOT “defiled *viññāṇa*.” This is explained at, [“Viññāṇa Aggregate.”](#)

9. Another confusing step could be “*nāmarūpa paccayā saḷāyatana*,” where “*saḷāyatana*” or “*six āyatana*” are normally translated as “six sense faculties.” **Of course, a living *Arahant* has perfectly good sense faculties (*indriya*).**

- Those six *indriya* (or sense faculties) become *saḷāyatana* when one acts with *avijjā* and use them to accumulate “*san*”; see, “[Nāmarūpa paccayā Saḷāyatana](#).”

10. In next step of “*saḷāyatana paccayā phassa*,” it is really “*saḷāyatana paccayā samphassa*.” When those *indriya* are used as *āyatana*, one “makes contact with a defiled mind” and that defiled contact is “*samphassa*” (“*san*” + “*phassa*”).

- This is discussed at, “[Difference between Phassa and Samphassa](#).”
- Therefore, an *Arahant* would have only “*phassa*” and NOT “*samphassa*.”

11. Now when those sense inputs are evaluated with a defiled mind, one generates “mind-made *vedanā*” or “*samphassa ja vedanā*.” These are greedy, angry, jealous, types of *vedanā* generated due to the defilements in the mind.

- Such “defiled and mind-made *vedanā*” are absent in an *Arahant*. An *Arahant* will, however, generate *vedanā* due to the contacts with the six *indriya*.
- For example, if someone hits an *Arahant*, he/she will feel the pain. Spoiled milk would taste bitter and a piece of cake would taste sweet, etc. But an *Arahant* would not generate angry thoughts about someone offering spoiled milk and would not generate cravings for the cake.
- This explained in detail in the post, “[Vedanā \(Feelings\) Arise in Two Ways](#).”

12. The next confusion is at the step, “*bhava paccayā jāti*,” which is translated in #5 as, “because of continuation: birth.” I am not sure what is meant by “continuation” there.

- The correct interpretation is given at, “[Bhava and Jāti – States of Existence and Births Therein](#).”

13. If one can spend some time reading those posts and the links given in them, one should be able to get a good idea of how different types *jāti* originate via *abhisankhāra* (one’s own thoughts).

- The *Sotāpanna* stage of *Nibbāna* is attained by getting rid of the wrong way of looking at one’s body (and actions) are due to an unchanging “soul.”
- However, one’s *bhava* and *jāti* arise due to one’s own *abhisankhāra*. We are humans in this life because of good *abhisankhāra* cultivated in a previous life.
- If we do bad (or *apuñña*) *abhisankhāra* in this life, we may be born as animal or worse. If we do good (or *puñña*) *abhisankhāra* in this life, we may be born as *devas*, *brahmā*, or humans again.

14. However, there is no birth in the 31 realms that can bring a permanent state of happiness. Any *deva* or *brahma* existence will come to an end, and then one could be born in the *apāyā*.

- Permanent state of happiness (which means absence of ANY suffering) is attained by stopping this never-ending rebirth process. **That is key message of the Buddha.**
- When one truly understands that, one has the “vision” of a *Sotāpanna*, i.e., one would have gotten rid of *sakkāya diṭṭhi* (and *vicikiccā* and *silabbata parāmāsa* all at the same time).

15. More details can be found in the “[Paticca Samuppāda](#)” section. The “[Living Dhamma](#)” section there is an attempt to provide a systematic approach to learn and practice Buddha Dhamma (of course, with more details in other sections).

- I have encountered an unexpected medical emergency (that is *anicca* nature, which is much more than just impermanence). If I recover, I will be back in several weeks.
- May you all attain *Nibbāna*!

6.4.5 Sotāpanna Anugāmi and a Sotāpanna

Revised July 27, 2017; January 15, 2018; September 22, 2018; September 26, 2018; February 3, 2019; February 13, 2019; January 28, 2020; April 13, 2020

Here we discuss the difference between a *Sotāpanna* and one who is striving for the *Sotāpanna* stage. The latter is on the right path (a *Sotāpanna Anugāmi*).

Who Belongs to the Saṅgha

1. The word *saṅgha* nowadays refers to the *bhikkhus*. Yet *saṅgha* is “*saṅ*” + “*gha*”, or those who have either gotten rid or are on the way to getting rid of “*saṅ*.” By that definition, one does not have to be a *bhikkhu* to belong to the *saṅgha*; see, “[What is “Saṅ”?](#)”

In the salutation to the *saṅgha*, they are referred to as “*attha purisa puggalā*.” See, “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).” Here, “*attha*” is eight, “*purisa*” does not mean male, but one with higher virtues and “*puggalā*” is a person. Thus there are eight types of people belonging to the *saṅgha*. Who are the eight?

- There are four who have started on the Noble Path/fulfilled the conditions for the four stages of *Nibbāna*: *Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, *Anāgāmi Anugāmi*, *Anāgāmi*, *Arahant Anugāmi*, and *Arahant*. Four of those are in the *Anugāmi* stages (working toward a given stage,) and the other four have reached the respective stage.
- **A special case of *kamma* and *kamma vipāka* happens for these Noble *kammā* (efforts toward a given stage.) Once “what needs to be done” is fulfilled, the *vipāka* follow in the very next *citta* within a billionth of a second.** Thus when one gets into the *Sotāpanna magga* stage, for example, one receives the *Sotāpanna phala* in the very next *citta*. Thus one becomes a *Sotāpanna* in two consecutive thought-moments.
- However, when one starts grasping the *Tilakkhaṇa* (*anicca, dukkha, anatta*), one becomes a *Sotāpanna Anugāmi* (one on the way to attain the *Sotāpanna* stage), and thus one becomes free of the *apāyā*. In later commentaries, they are also called “*Chula Sotāpanna*” or a “junior *Sotāpanna*.”

Abhidhamma Explanation

2. The *citta vīthi* for a *magga phala* is discussed at the end of the post, “[Citta Vīthi – Processing of Sense Inputs](#)”:

B B B “BC BU MD P U A G Pa Fr Fr” B B B

(B) *Upaccheda* (Arrest *Bhavaṅga*), (MD) *Manodvara Avajjana* (Mind Averting), (P) *Parikamma* (Preparation), (U) *Upacāra* (Close Proximity), (A) *Anuloma* (Conformity), (G) *Gotrabu* (Change of Lineage), (Pa) Path (*magga*), and (Fr) Fruit (*phala*).

- A *Sotāpanna Anugāmi* is getting closer to the “change of lineage” or G. The earlier stages of P, U, A, may be reached gradually. Once that level of comprehension is complete, one makes that transition (G), completes the *lokuttara kamma*, and immediately receives the *phala*.
- In a strict sense, it may be better to call one a *Sotāpanna Magga Anugāmi* (one trying to get to the *magga citta*) rather than *Sotāpanna Anugāmi*.
- The eight Noble Persons (*Ariyā*) listed in the “[WebLink: suttacentral: Pathama Puggala Sutta \(AN 8.59\)](#)” and in “[WebLink: suttacentral: Puggala Sutta \(AN 9.9\)](#).” In both *suttā*, *Sotāpanna Anugāmi* is listed as “*sotāpatti phala sacchikiriyāya paṭipanno*.” One on the way to become an *Anāgāmi* is “*anāgāmi phala sacchikiriyāya paṭipanno*,” etc. In the second *sutta*, a average human is a “*puthujjano*.”

The Eight Noble Persons

3. Thus it is clear that “*attha purisa puggalā*” consists of the eight *Ariyā* (Noble Persons) listed in #1. They are *Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmī Anugāmi*, *Sakadāgāmī*, *Anāgāmī Anugāmi*, *Anāgāmī*, *Arahant Anugāmi*, and *Arahant*.

- A critical point to note is that the change from being an “average human” (*puthujjana*) to the Noble Person (*Ariya*) status. **That transition happens at the “gotrabu” (“gotra” is the clan or lineage,) before the *Sotāpanna magga/phala* transition.** See, “*Citta Vīthi* for Attainment of *Magga Phala*” section at the end of the post, “[Citta Vīthi – Processing of Sense Inputs.](#)” Also, see, “[Sotāpanna Anugāmi – No More Births in the Apāyā.](#)”
- The types of *āsavā* eliminated at each stage discussed at, “[The Way to Nibbāna – Removal of Āsavā.](#)”
- How *lobha*, *dosa*, *moha*, and also the ten fetters (*saṃyojana*) removed at each stage discussed at, “[Relinquishing Defilements via Three Rounds and Four Stages.](#)”
- Both a *Sotāpanna Anugāmi* and a *Sotāpanna* would have “[Sotapatti Anga – The Four Qualities of a Sotāpanna.](#)”

The Stages of *Magga Phala*

4. A *Sotāpanna* is someone who has seen *Nibbāna*, not the full *Nibbāna*, but a glimpse of it. One becomes a *Sotāpanna* when one removes *avijjā* (ignorance) about the actual status of affairs in “this world of 31 realms.” With that understanding, his/her mind is purified to the extent that it will not allow him/her to do an immoral act that could lead to a birth in the four lower worlds (*apāyā*). Not only that, but one will also not “latch onto” a *kamma vipāka* resulting from such a robust immoral act in the past. Thus a *Sotāpanna* will never be born in an *apāyā* again.

The other three stages have similar “demarcation thresholds.”

- A *Sakadāgāmī* will be never again be born in the human or lower four realms. He/she can still be born in the *deva* worlds (i.e., in *kāma loka*.) But those *devas* do not have “flesh and blood” bodies that lead to physical discomforts and diseases. In the *deva loka*, beings only have subtle bodies that are not subject to old age and diseases.
- An *Anāgāmī* has overcome any desire to be born anywhere in the *kāma loka*, i.e., the 11 lowest realms. He/she has no *kāma rāga* (desire for sense pleasures) or *paṭigha* (hate).
- An *Arahant* has no desire to be born anywhere in the 31 realms, and thus will never be reborn “in this world.” He/she has attained full *Nibbāna*, full release.

It Is a Step-by-Step Process

5. One has first to hear the true message of the Buddha before one can fulfill the conditions to attain the *Sotāpanna magga* stage. Thus, he/she needs to go beyond the mundane eightfold path; see, “[Buddha Dhamma – In a Chart.](#)”

- **In particular, a *Sotāpanna Anugāmi* (or *Sotāpanna Magga Anugāmika* or *Sotāpanna Magga Anugāmi*) has heard about *anicca*, *dukkha*, *anatta* (*Tilakkhaṇa*), or the “true nature of this world with 31 realms.” Of course, those concepts must come from a Noble person, and has grasped the basic idea.**
- That is why the association with a “*kalyāṇa mitta*” or “*kalyāṇa Mitra*” (basically a “Noble friend,” i.e., an *Ariya*) is a pre-condition for attaining the *Sotāpanna* stage; see, “[Four Conditions for Attaining Sotāpanna Magga/Phala.](#)”
- Once becoming a *Sotāpanna anugāmi*, one is a Noble Person (one of the *attha purisa puggala*), and thus is free from the *apāyā*, see, “[Sotāpanna Anugāmi – No More Births in the Apāyā.](#)”

Difference Between *Sotāpanna Magga Anugāmi* and a *Sotāpanna*

6. Let us take a simile to see what this “demarcation” between *Sotāpanna Magga Anugāmi* and a *Sotāpanna*.

- Suppose that a precious treasure is known to be at the peak of a mountain. But it is not generally known where that mountain is. That is pretty much the status of Buddha Dhamma today. Most people know that it is valuable, but they do not know what the correct version is, and there are a lot of different versions.
- As the Buddha said in his first sermon, “my Dhamma has not been known to the world before.” Thus one needs a Buddha or a true disciple of Buddha to show him/her what *Nibbāna* is and how to get to the *Sotāpanna* stage. That is an essential and a critical point.
- Suppose someone gets directions to the correct mountain with the treasure. Then he/she knows which country to go to and which geographic location in that country the mountain is. **This person is like one who is on the path to becoming a *Sotāpanna*, i.e., a *Sotāpanna Magga Anugāmi*.** He/she knows exactly where to go and has a detailed map. And he/she has to get it from a Buddha or a true disciple of a Buddha. A true disciple is one who has at least seen the mountain (a *Sotāpanna*), if not been to the top (an *Arahant*).
- Now he/she makes the journey to country and to the region where the mountain is. On the way to there, he/she can verify the landmarks given by the “friend” (an *Ariya*). Similarly, a *Sotāpanna Magga Anugāmi* spends time contemplating the newly learned concepts of *anicca*, *dukkha*, *anatta*, *paṭicca samuppāda*, etc.
- Thus with confidence, the person gets closer and closer to the mountain, and some point starts seeing the mountain. **At that point, the person has “crossed the boundary” to become a *Sotāpanna*.** He/she has seen a glimpse of *Nibbāna* for the first time. Now he/she can complete the journey without any help, even if the physical map is lost (i.e., even in a future life).

An Analogy

7. Going back to the simile of the mountain with treasure, different versions of “Buddhism” correspond to identifying the mountain to be in different geographic locations, all over the world. So different groups of people are making trips over long distances and with much effort to get to various mountains. All these are in remote places, and the journey is hard.

- A lot of people are wasting their time and effort by targeting a “wrong mountain.” So, how does one know which “mountain” or version to pick? That is why it takes some effort to weed out the wrong/inconsistent versions Buddha Dhamma; see, [“Why is it Critical to Find the Pure Buddha Dhamma?”](#)

Grasping the *Anicca* (Unfruitful) Nature of This World

8. In technical terms, one gets to the *Sotāpanna magga/phala* when one understands *anicca*, *dukkha*, *anatta* (the three characteristics of this world or *Tilakkhaṇa*) to a minimum level, where one begins to realize that there is nothing in “this world” that can provide meaningful and unconditioned happiness.

- When one comprehends *anicca*, *dukkha*, *anatta* to the extent that one can “see” this concept, **one is said to have the “*anuloma ñāṇa*.”** Here, “*anu*” means “through the understanding of *Tilakkhaṇa*,” “*lo*” means “craving for worldly things,” and “*ma*” means “removal,” and thus “*anuloma*” means “removal of craving for worldly things to some extent via the comprehension of *Tilakkhaṇa*.”
- We came across “*anu*” also in “*anupassanā*”; see, [“4. What do all these Different Meditation Techniques Mean?”](#) In a previous post, I also discussed how “*lobha*” comes from “*lo*” + “*bha*” or “immersed in craving for worldly things.”
- Thus it makes a huge difference if one incorrectly interprets *anicca* as “impermanence” and *anatta* as “no-self”; see, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)

9. Suffering is prevalent in the lower four realms (*apāyā*). We can see at least one of those, the animal realm. Let us discuss one way to contemplate on *anicca*, *dukkha*, *anatta*, using an example from this life itself.

- When one is young it seems like one can get anything one wants by working hard. But we all have seen how our parents or grandparents or even famous people spent the old age suffering with various ailments, and finally dying helplessly.
- They may have “accomplished” many things. But they spent their whole lives working hard to achieve those and then they have to leave it all behind.
- One may have a beautiful body when young, but for how long? We can see how those old movie stars age now. Some of them commit suicide because it is depressing to remember the “good old days” when one had all the attention in the world, but now it all seem to be slipping away.
- That is *anicca* and *anatta*. No matter how much we try, whatever we gain in this world lasts only a short time (in the *sansāric* time scale), and one becomes helpless in the long run. At some point, one realizes this and becomes distraught.

One Creates One’s Own Future Suffering

10. When one comprehends the true nature of this world, such sad thoughts do not arise. People who follow the Path, and even those who have wisdom from previous lives (*gati*) can realize that “all things in this world” are subjected to this arising/destruction process. Beings come to existence and die. But those existence are “created” by oneself. See, “[Origin of Life – One Creates One’s Own Future Lives.](#)”

- That understanding itself leads to an ease of mind. A stronger version of this “ease of mind” is the “*anuloma shānthī*” that one experiences when attaining the “*anuloma ñāṇa*” (pronounced “*anuloma gnana*”).
- The key to attaining the “*anuloma ñāṇa*” is to realize the fleeting nature of anything in this world. The next post discusses this.

Anuloma Ñāṇa and *Sammatta Niyāma*

11. With the “*anuloma ñāṇa*”, one realizes that permanently getting rid of suffering is not possible anywhere in the 31 realms. It can be achieved only by attaining *Nibbāna*. By this time one has felt the *nirāmisā sukha*, and thus one needs to cultivate, “*etaṃ santam etaṃ paṇītam...*”, the release one has felt, and the value of *Nibbāna*. Then one truly embarks on the Noble Eightfold Path and is said to get to “*sammatta niyāma*,” and to *Sotāpanna phala*. [“*etaṃ santam etaṃ paṇītam yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhaya virāgo nirodho Nibbānan’ti.*” [AN 9.36 : Jhānasutta](#), [AN 10.6 : Samādhisutta](#), [AN 3.32 : Ānandasutta](#), [AN 11.8 : Manasikārasutta](#), [AN 11.7 : Saññāsutta](#), [AN 10.60 : Girimānandasutta](#)] [It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*]

- Therefore, it is critical to realize BOTH the unfruitful nature of this world with “*anuloma ñāṇa*,” AND to realize the value and cooling down due to *Nibbāna*, i.e., “*sammatta niyāma*.”

12. Thus it is critical to understand that *Nibbāna* is “*nicca, sukha, attha*,” after realizing that this world is “*anicca, dukkha, anatta*.” A *Sotāpanna* has understood both.

- Anything in this world (except *nama gotta*) is a *saṅkhata* (*sankata* in Sinhala), i.e., it comes into being due to causes, stays in existence for a time, and then inevitably is destroyed. This arising of a *saṅkhata* (*sankata* in Sinhala) is called “*udaya*” in Pāli, and the destruction is called “*vaya*.” Thus, “*udayavaya ñāṇa*” is the knowledge about that process.
- *Nibbāna* is the only *asaṅkhata*. Removing all causes leads to *Nibbāna*.

- Many people have even attained the *Arahanthood* without actually having heard about these terms like “*udayavaya*” or “*anuloma*.” Thus it is imperative to realize that just having read about these concepts does not get one anywhere. One needs to “see” the *Tilakkhaṇa* or the unfruitfulness of craving for *saṅkhata* (*sankata* in Sinhala) (through *saṅkhāra*) by true meditation or contemplation.
- Thus a *Sotāpanna* has the *udayavaya* (sometimes called *udayabbaya*) *ñāṇa*; see, “[Udayavaya Ñāṇa](#).”

Next, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#)”,

6.4.6 Sotāpanna Anugāmi – No More Births in the Apāyā

February 11, 2019; revised February 12, 2019; September 4, 2019; April 12, 2020

A human who attains a *magga phala* will never be reborn in an *apāya* (one of the four lowest realms). An *Arahant* will not be reborn in any realm. An *Anāgāmī* will be reborn only in a *Brahma* realm. A *Sakadāgāmī* only in deva realm. A *Sotāpanna* only in *deva* or human realm. It is not that clear whether a *Sotāpanna Anugāmi* is also free of the *apāyā*. Here, we discuss the evidence from the *Tipiṭaka* that is indeed the case.

Eight Types of Noble Persons

1. The “[WebLink: suttacentral: Patipanna Sutta \(SN 48.18\)](#)” describes the eight types of Noble Persons:

“*Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyaṃ ... pe ... paññindriyaṃ—imāni kho, bhikkhave, pañcindriyāni. Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā arahaṃ hoti, tato mudutarehi arahattaphalasacchikiriyāya paṭipanno hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi anāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sakadāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi sotāpattiphalasacchikiriyāya paṭipanno hoti. Yassa kho, bhikkhave, imāni pañcindriyāni sabbena sabbam sabbathā sabbam natthi, tamahaṃ ‘bāhiro puthujjanapakke ṭhito’ ti vadāmi” ti.*

Translated:

“*Bhikkhus, there are five indriya (faculties): Saddhindriya, vīriyindriya, satindriya, samādhindriya, paññindriya. Someone who has fully cultivated them is an Arahanth. One who developed them less is an Arahanth Anugāmi. One who has even less is an Anāgāmī.. Anāgāmī Anugāmi, ..Sakadāgāmī, ... Sakadāgāmī Anugāmi, ...Sotāpanna, ...Sotāpanna Anugāmi. Those who have not yet begun to cultivate the five faculties are ignorant humans (puthujjanabhūmiṃ) who are unaware of the true nature (Tilakkhaṇa).*

- One on the way to become an *Anāgāmī* is “*anāgāmī phala sacchikiriyāya paṭipanno,*” etc. One on the way to become a *Sotāpanna* (or *Sotāpanna Anugāmi*) is “*sotāpattiphalasacchikiriyāya paṭipanno.*”
- The eight Noble Persons (*Ariyā*) are also listed in other *suttā* too including “[WebLink: suttacentral: Pathama Puggala Sutta \(AN 8.59\)](#)” and in “[WebLink: suttacentral: Puggala Sutta \(AN 9.9\)](#).”

Sotāpanna Anugāmi is Dhammānusārī or Saddhānusārī

2. An important way of classification of the Noble Persons (*Ariyā*) relevant to our topic is given in the “[WebLink: suttacentral: Tatiyasankhita Sutta \(SN 48.14\)](#)”:

“*Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyaṃ ... pe ... paññindriyaṃ—imāni kho, bhikkhave, pañcindriyāni. Imesaṃ kho, bhikkhave, pañcannaṃ indriyānaṃ samattā paripūrattā arahaṃ hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi dhammānusārī hoti, tato mudutarehi saddhānusārī hoti. Iti kho,*

bhikkhave, paripūraṃ paripūrakārī ārādheti, padesaṃ padesakārī ārādheti. ‘Avañjhāni tvevāhaṃ, bhikkhave, pañcindriyānī’ti vadāmī’ti.

Translated:

“*Bhikkhus, there are five indriya: Saddhindriya, vīriyindriya, satindriya, samādhindriya, paññindriya. One who has fully cultivated them is an Arahant. One who developed them less is an Anāgāmī,.. Sakadāgāmī, ...Sotāpanna, ...dhammānusārī, ...saddhānusārī, .*”

3. From #1 and #2 above, we can see that a *Sotāpanna Anugāmi* is either a *dhammānusārī* or a *saddhānusārī*.

- This is confirmed in the following *sutta*, which also confirms that one MUST start comprehending the *anicca* nature to become a *Sotāpanna Anugāmi*.

More on *Dhammānusārī* or *Saddhānusārī*

4. From the “[WebLink: suttacentral: Cakkhu Sutta \(SN 25.1\)](#)”:

“*Cakkhuṃ, bhikkhave, aniccaṃ vipariṇāmi aññathābhāvi; sotaṃ aniccaṃ vipariṇāmi aññathābhāvi; ghānaṃ aniccaṃ vipariṇāmi aññathābhāvi; jivhā aniccaṃ vipariṇāmi aññathābhāvi; kāyo aniccaṃ vipariṇāmi aññathābhāvi; mano aniccaṃ vipariṇāmi aññathābhāvi. Yo, bhikkhave, ime dhamme evaṃ saddahati adhimuccati—ayaṃ vuccati saddhānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayoṇiṃ vā pettivisayaṃ vā upapajjeyya; abhabbo catāva kālaṃ kātuṃ yāva na sotāpattiphalāṃ sacchikaroti.*

Yassa kho, bhikkhave, ime dhammā evaṃ paññāya mattaso nijjhānaṃ khamanti, ayaṃ vuccati: ‘dhammānusārī, okkanto sammattaniyāmaṃ, sappurisabhūmiṃ okkanto, vītivatto puthujjanabhūmiṃ; abhabbo taṃ kammaṃ kātuṃ, yaṃ kammaṃ katvā nirayaṃ vā tiracchānayoṇiṃ vā pettivisayaṃ vā upapajjeyya; abhabbo ca tāva kālaṃ kātuṃ yāva na sotāpattiphalāṃ sacchikaroti’.

Yo, bhikkhave, ime dhamme evaṃ pajānāti evaṃ passati, ayaṃ vuccati: ‘sotāpanno avinipātadhammo niyato sambodhiparāyano’”ti.

Translated:

“*Bhikkhus, cakkhu is of anicca nature, will cease to exist and is subject to unexpected change during its existence* (same for *sota, ghāna, jivhā, kāyo, mano*).

– One who has conviction and belief that these phenomena are this way is called a faith-follower (*saddhānusārī*). He/she is one who has entered the Noble plane (*sammattaniyāmaṃ*), has entered the realm of Noble Persons (*sappurisabhūmiṃ*), transcended the realm of the humans who are unaware of the true nature (*puthujjanabhūmiṃ*). He is incapable of doing any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry ghosts. **A *saddhānusārī* is incapable of dying (separating) from that Noble birth until he realizes the *Sotāpanna* stage (and thus eventually getting to the *Arahant* stage).**

One who, after pondering with wisdom, has accepted that these phenomena are this way is called a Dhamma-follower (*dhammānusārī*)... (The rest is the same as for a *saddhānusārī*).

One who knows and sees that these phenomena are this way is called a *Sotāpanna*. He is never again to be born in the *apāyā*, headed for the *Arahanthood*.”

- It is to be noted that 11 *suttā* (AN 25.1 through AN 25. 10) state the same in various ways.

Sotāpanna Anugāmi Would Not “Die” From *Ariya* Birth

5. Therefore, from the above *suttā*, we can make the following deductions:

- A *Sotāpanna* is never again to be born in the *apāyā* and is headed for the *Arahanthood*.
- A *Sotāpanna Anugāmi* is either a *dhammānusārī* or a *saddhānusārī*.
- In #4 above: “A *saddhānusārī* (or a *dhammānusārī*) is incapable of “dying” (separating) from that Noble birth until he realizes the *Sotāpanna* stage”. This does not mean a *Sotāpanna Anugāmi* will attain the *Sotāpanna* stage within that lifetime. Once “born as a Noble Person” one will not die from that Noble birth, i.e., one WILL get to the *Arahant* stage without ever getting a birth in the *apāyā*.
- So, a *Sotāpanna Anugāmi* may be born many times a human until getting to the *Sotāpanna* stage (may even have many human *bhava*, each with many human *jāti*).
- Once getting to the *Sotāpanna* stage, there would be only seven maximum number of “*bhava*” left, within which one WILL attain the *Arahant* stage.

Who Have *Avecca Pasāda*?

6. Another *sutta* that provides more information is “[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55.24\)](#).” It is a long *sutta*, and a reasonably good translation at, “[WebLink: accesstoinsight.org: Sarakāni Sutta: Sarakāni \(Who Took to Drink\)](#).”

Here are the relevant verses, which again describe the types of Noble Persons:

- (1). “Mahānāma, take the case of a person **endowed with unwavering devotion (*avecca pasāda*)** to the Buddha (*heva kho buddhe aveccappasādena samannāgato hoti*,) the Dhamma, the Saṅgha, and has attained the *Arahanthood*. By the destruction of the defilement he has by his own realization gained the release, the release through wisdom, in this very life, and abides in it. The man is entirely released from the hell-state, from rebirth as an animal. He is free from the realm of hungry ghosts, fully freed from the downfall, the evil way, from the *apāyā*.
- (2). “Take the case of another man. He has **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, the Saṅgha. He has wisdom but has not yet gained release, but has destroyed the five lower *samyojanā* (**an *Anāgāmi***). Upon death, he will be reborn spontaneously in a brahma realm where he will attain *Nibbāna* without returning from that world. That man is also entirely released from the *apāyā*.
- (3). “Take the case of another man. He has **unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, the Saṅgha. He has wisdom but he has not yet gained release. By destroying the first three *samyojanā* and weakening *kāma rāga*, *paṭigha*, and *avijjā*, he is a Once-returner (***Sakadāgāmī***), who will return once more to this *kāma loka*. That man is entirely freed from the *apāyā*.
- (4). “Take the case of another man. He is **endowed with unwavering devotion (*avecca pasāda*)** to the Buddha, the Dhamma, the Saṅgha. He has wisdom but not gained release. By destroying three fetters, he is a Stream-Winner (***Sotāpanna***), not subject to rebirth in *apāyā*, assured of *Nibbāna*. That man is entirely freed the *apāyā*.
- (5). “Take the case of another man. He **does not have unwavering devotion (*avecca pasāda*)** to the Buddha (*na heva kho buddhe aveccappasādena samannāgato hoti*,) the Dhamma, the Saṅgha. He has not yet gained wisdom and has not gained release. **But he has the following things to some extent**: the faculty of faith, of energy, of mindfulness, of concentration, of wisdom (*saddhā indriya*, *virīya indriya*, *sati indriya*, *samādhi indriya*, *paññā indriya*). He understands with insight, **at least moderately**, dhamma of the *Tathāgata*. **That man does not go to the realm of hungry ghosts, to the downfall, to the evil way, to states of woe.**

- (6). “Take the case of another man. He does not have **unwavering devotion** (*avecca pasāda*) to the Buddha, the Dhamma, the Saṅgha. He is not joyous and swift in wisdom and has not gained release. **But he has the following things to some extent:** the faculty of faith, of energy, of mindfulness, of concentration, of wisdom (*saddhā indriya*, *virīya indriya*, *sati indriya*, *samādhi indriya*, *paññā indriya*). He understands with insight, **at least slightly**, dhamma of the *Tathāgata*.. **He too will not go to the *apāyā*.**

Sotāpanna Anugāmi* is Also Free of *Apāyā

7. Note that in #6 above, for **each of the four *magga phala*:**

“*Ayampi kho, mahānāma, puggalo parimutto nirayā parimutto tiracchānayanīyā parimutto pettivisayā parimutto apāyaduggativinipātā.*”

“..That man is **entirely free**... from the *apāyā*.”

- **For the last two types (*Sotāpanna Anugāmi*):**

“*Ayampi kho, mahānāma, puggalo agantā nirayaṃ agantā tiracchānayaṇiṃ agantā pettivisayaṃ agantā apāyaṃ duggatiṃ vinipātaṃ.*”

“..That man **does not go** to the *apāyā*”.

- Taken together with the statements in the *suttā* discussed above, that definitely means the following. **A *Sotāpanna Anugāmi* is also effectively released permanently from the *apāyā*.**

What is *Avecca Pasāda*?

8. A key phrase in many of the *suttā* is *avecca pasāda*. It is frequently translated as “unwavering devotion” as in the above translation. But it has a deeper meaning.

- *Pasāda* means a combination of “trust, faith, reverence.”
- That comes when one understands the deeper meanings in Buddha Dhamma. In particular, when one starts comprehending *Tilakkhaṇa*, one can begin to see the unfruitfulness AND danger in trying to seek happiness in this world of 31 realms.
- **Then one starts losing cravings (“*ava*” + “*icca*”) for worldly things.** We remember that *anicca* is “*na icca*”; see, “[Anicca – True Meaning](#).” [*avecca* :[adv.] certainly; definitely; absolutely; perfectly; having known.]
- Therefore, *avecca pasāda* or “unwavering faith” is connected to realizing the *anicca* nature or the “unsatisfactory nature” of worldly things. That craving for worldly things leads to suffering (*dukkha*). And that in the end that leads to one becoming helpless (*anatta*), especially when born in the *apāyā*.
- One establishes *avecca pasāda* or “unwavering faith” in the Buddha, Dhamma, and Saṅgha, when one starts to comprehend *Tilakkhaṇa*.

Four qualities of a *Sotāpanna*

9. Four qualities of a *Sotāpanna* are in all of the *suttā* in the [WebLink: suttacentral: Sotāpatti Saṃyutta \(SN 55.1 ~ 55.74\)](#) of the Saṃyutta Nikāya (SN). The “[WebLink: suttacentral: Brahmācariyogadha Sutta \(SN 55.2\)](#)” has a concise statement about the qualities or qualifications of a *Sotāpanna*.

“*Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo.*”

Katamehi catūhi? Idha, bhikkhave, ariyasāvako buddhe aveccappasādena samannāgato hoti: ‘itipi so bhagavā arahaṃ sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro

purisadammasārathi satthā devamanussānaṃ buddho bhagavā'ti. Dhamme ... pe ... saṅghe ... pe ... ariyakantehi sīlehi samannāgato hoti akhaṇḍehi ... pe ... samādhisaṃvattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo'ti.

Translated:

A Sotāpanna, never again to be born in the *apāyā*, **has acquired four qualities:**

- (1). He has **avecca pasāda in the Buddha**, i.e., he fully understands the following verse. “*Itipi so bhagavā arahaṃ sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā'ti.*”
- (2). He has **avecca pasāda in the Dhamma**, i.e., he fully understands the verse. “*Svākkhāto bhagavatā dhammo sandiṭṭhiko akāliko ehipassiko opaneyyiko paccattaṃ veditabbo viññūhi'ti.*”
- (3). He has **avecca pasāda in the Saṅgha**, i.e., he fully understands the following verse. “*Suppaṭipanno bhagavato sāvakaṣaṅgho, ujuppaṭipanno bhagavato sāvakaṣaṅgho, ñāyappaṭipanno bhagavato sāvakaṣaṅgho, sāmīcippaṭipanno bhagavato sāvakaṣaṅgho, yadidaṃ—cattāri purisayugāni attha purisapuggalā, esa bhagavato sāvakaṣaṅgho āhuneyyo pāhuneyyo dakkhiṇeyyo añjalikaraṇīyo anuttaraṃ puññakkhettaṃ lokassā'ti.*”
- (4). He has the **Ariyakantha sīla** of the noble ones. It comes with penetrating wisdom and is unbreakable. It leads to *samādhi*.’

“*Ariyakantehi sīlehi samannāgato hoti akhaṇḍehi acchiddehi asabalehi akammāsehi bhujissehi viññuppasatthehi aparāmaṭṭhehi samādhisaṃvattanikehi.*”

“*Ariyakantehi* [with agreeable to the *Ariyā*] *sīlehi* [with ethical conduct] *samannāgato* [endowed with] [endowed with noble's ethical conduct] *hoti akhaṇḍehi* [unbroken] *acchiddehi* [impeccable or faultless] *asabalehi* [spotless] *akammāsehi* [unmarred] *bhujissehi* [liberating] *viññuppasatthehi* [praised by sensible people] *aparāmaṭṭhehi* [not mistaken] *samādhisaṃvattanikehi.*”

10. We note that those first three verses are the same as those in the supreme qualities of the Buddha, Dhamma, and Saṅgha; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)”

- Therefore, those verses are not just recitation. They must be recited with UNDERSTANDING before any serious meditation session.
- From #4 and #5 above, we see that one gets a “Noble birth” when attaining the *Sotāpanna Anugāmi* stage. A *Sotāpanna Anugāmi* is one of the “*attha purisa puggalā.*”

The four qualities of a *Sotāpanna* discussed in, “[Sotāpatti Aṅga – The Four Qualities of a Sotāpanna.](#)” [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

6.4.7 Four Conditions for Attaining Sotāpanna Magga/Phala

Revised March 22, 2016; Revised on September 22, 2017, June 28, 2019

1. In many *suttā*, including [WebLink: suttacentral: Sotāpatti-phala Sutta \(SN 55.55\)](#) and [WebLink: suttacentral: Dwitiya Sariputta Sutta \(Samyutta Nikāya 55.5\)](#), the four requirements for someone to attain the *Sotāpanna* stage of *Nibbāna* are stated: “*Cattārome, bhikkhave, dhammā bhāvitā bahulikatā sotāpatti-phalasacchikiriyāya saṃvattanti. Katame cattāro? Sappurisasamsevo, saddhammassavanaṃ, yonisomanasikāro, dhammānudhammapaṭipatti.*”

- Association with “*sappurisa (sath + purisa* or “Noble friend”, i.e., an *Ariya*)”, sometimes called a “*kalyāna mitta*” in Pāli or “*Kalyāṇa Mitra*” in Sanskrit.

- Listening to Dhamma discourses (while reading is enough to get to *Sotāpanna Anugāmi* stage, listening is necessary to attain the *Sotāpanna* stage, see #3 below).
- Act with *Yoniso manasikāra* (basic idea of *anicca*, *dukkha*, *anatta* and *paṭicca samuppāda*).
- *Dhammanudhamma patipadā* (following the Noble Path, which is beyond the mundane path; see, [“What is Unique in Buddha Dhamma?”](#).)

When someone starts fulfilling the above conditions one becomes a *Sotāpanna magga anugāmi* (or *Sotāpanna magga anugāmika*); see, [“Sotāpanna Magga Anugāmi and a Sotāpanna.”](#)

- During this process, one removes three of the ten *sanyojana* (or *saṃyojana* or fetters). The ten fetters are those that bind one to the cycle of rebirth; see, [“Relinquishing Defilements via Three Rounds and Four Stages.”](#)

2. First it is imperative to understand what was meant by the Buddha when he said, “my Dhamma has not been known to the world” (other than during the time of another Buddha). Most people follow what they deem to be “Buddhism.” In most cases, this is the version passed down from the previous generation or the version that one read about in a book. I strongly advise reading the following posts and spending some time thinking about this issue:

[“What is Buddha Dhamma?”](#)

[“Buddha Dhamma – In a Chart”](#) and the discussion at, [“What is Unique in Buddha Dhamma?”](#)

- As discussed in those posts, one becomes a *Sotāpanna magga anugāmi* after making progress on the mundane (*lokiya*) eightfold path. That is when one really embarks on the Noble Eightfold Path.
- As I tried to point out in many posts, when one is on the mundane path, one abstains from immoral deeds out of fear of bad outcomes. **But when one starts comprehending *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*), one starts avoiding immoral deeds because one sees the futility of such deeds: What is the point in hurting others in order to acquire sense pleasures that in the end do not provide any lasting happiness?**

3. **September 22, 2017:** Previously, I had stated that one could learn about *Tilakkhaṇa* by reading these days. That is still true and one could become a *Sotāpanna anugāmi* by reading.

- However, recently I came upon a *desanā* by the Waharaka *Thero* which stated that a *Sotāpanna anugāmi* attains the *Sotāpanna* stage only while listening to a *desanā* by an *Ariya* (Noble person, i.e., one with at least the *Sotāpanna* stage).
- Apparently, a *Sotadvāra citta vūthi* of an *Ariya* (during a *desanā*) has the necessary *javana* power to act as a trigger. I am trying to find a *Tipiṭaka* reference, and I would appreciate receiving it from anyone who has that information. I will edit this post to include that reference when I find it.
- **July 15, 2019:** I still have not seen a definitive *Tipiṭaka* reference regarding this issue. However, all *suttā* on the conditions for attaining *Sotāpanna* stage list *saddhammassavanam* (*saddhamma* + *savanam* or “listening to Dhamma”) as one condition, as in #1 above. Since written texts were not available at the time of the Buddha, this is not definitive as a condition.
- However, Waharaka *Thero* has mentioned that listening to a recorded *desanā* should count, per his opinion.

4. When one contemplates about the above, one realizes that one first needs to find out WHY the Buddha said “this wider world of 31 realms” or “our existence (not only in this life but in the 31 realms)” is filled with suffering; what we perceive as sense pleasures keep us bound mostly to the *kāma loka* and very often to the four *apāyā*. That is the First Noble Truth.

- The Buddha also said that **if one really comprehends the First Noble Truth, then one will automatically comprehend the other three.** Thus it is the basic vision or the first inkling of “*Sammā Diṭṭhi*” that is most critical.

- One gets on the Noble Eightfold Path with a very rough idea about this vision, i.e., *anicca*, *dukkha*, *anatta*. Now one is a *Sotāpanna Magga Anugāmi*. As one comprehends these basic characteristics of our world **while listening to a *desanā* by an *Ariya***, one will get to the *Sotāpanna* stage by attaining the *Sotāpanna magga* and *Sotāpanna phala* virtually simultaneously (in the same *citta vīthi*); see, "[Sotāpanna Anugāmi and a Sotāpanna](#)."
- When one gets to *Sotāpanna* stage, one comprehends the First Noble Truth, and thus all four Noble Truths to some extent; one has "seen" *Nibbāna*. Now, one does not need any help to get to *Nibbāna* (to "fully experience it"), because one sees the whole Path, and knows how to get there.

5. With that in mind, it is easier to grasp why the Buddha emphasized the importance of those four conditions. **First, since Buddha's message is unique, the true message has to come from a Buddha or someone "who can be traced back to the Buddha."** The following is an analogy given in the *suttā*.

6. The Buddha can be compared to a great tree, standing tall and firm. All other humans can be compared to "climbers" that need a tree to "climb up." Such climbers do not have strong enough stems so they cannot stand erect on their own. They need the support of another plant or a stick to stand. Those plants are called climbers. Climbers have tendrils to hold the supporting plant or stick. Following are some examples.

- Let us think of a forest where there are numerous climbers but only one tree and no other supports such as sticks. The only way for a climber to "climb up", and thus not destined to its demise on the ground, is to get hold of that tree.
- Only those climbers that are close to the tree can get hold of it and climb. But now others can get hold of them and climb too. Thus, as more and more climbers start climbing, the "access area" grows.
- Therefore, if we can find a climber that is climbing up, we can ALWAYS trace it back to the original tree. **In the same way, an *Ariya* or a Noble person (a *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, or *Arahant*) can ALWAYS be traced back in lineage to the Buddha.**
- Because the message is unique, it has to come from the Buddha himself or someone who can be traced back to the Buddha. One cannot attain even the *Sotāpanna* stage without hearing the true message; if one has attained it, then he/she knows the message. Someone aspiring to become an *Ariya* MUST hear the message from another *Ariya*; see, "[Buddha Dhamma – In a Chart](#)."

7. **Now we can see the logic of the first two conditions.** One has to learn Dhamma (the correct version), AND thus it has to come from an *Ariya* (Noble) person.

- The phrase "*Kalyāna Mitra*" is actually Sanskrit; in Pāli it is "*kalana mittā*" (pronounced "miththā"), for "a friend who helps to remove defilements" ("*kāla*" is for "dirty" or "blackish" as in "dirty water" and "*na*" is for "removing").

- Many people take “*Kalyāna Mitra*” to be a “good friend” in the conventional sense. But it is being more than just “good”; *one needs to know the message of the Buddha in order to convey it to others.*
- And of course one has listen to this correct message or read about it, and then GRASP it.

8. One time Ven. Ānanda, who was the personal assistant to the Buddha for many years at the end, approached the Buddha and said, “*Bhante* (Venerable Sir), I have been thinking that the future of the Buddha *Sāsana* (doctrine) must be dependent at least 50% on the *kalyāṇa mittā*.” [*kalyāṇamittā*]

- **The Buddha replied, “Ānanda, do not say that. The Buddha *Sāsana* will be dependent 100% on the *kalyāṇa mittā*.”** Now we can see why. [[WebLink: suttacentral: Samyutta Nikāya 3.18 Good Friends - Kalyāṇamittasutta](#)]
- If that lineage is broken, then that is the end of the Buddha *Sāsana*. The words may still be there, but there will be no one to explain the true meanings of the key words, including *anicca, dukkha, anatta*.
- However, the Buddha has stated that his Buddha *Sāsana* will be there for 5000 years, so we are only half-way through. Within that time there would be periods of “famine” where *Ariyā* will be few in numbers. But there will also be times when Buddha *Sāsana* will shine with numerous *Ariyā* in the world.
- The key here is once-in-a-while, a “*jāti Sotāpanna*” is born who has fulfilled his *pāramitas* to bring back the message of the Buddha, like Venerable Mahinda did about 600 years after the Buddha. They are not only *jāti Sotāpannas*, but have the “*patisambhidā ñāṇa*” to figure out the true meanings of key Pāli words, such as *anicca, dukkha, anatta*, and *paṭicca samuppāda*.
- I believe this is such a time. It is still too early to discuss the details, but there many *Ariyā* in Sri Lanka and even in other countries, thanks in large part to Waharaka Thero: “[Parinibbāna of Waharaka Thero.](#)”
- And there are many “climbers” all over the world who have already started “climbing up” with the help of that established “climber.” I am encouraged by emails from many who are reading this site, on the joy they feel in comprehending the “pure Dhamma.”

9. **The third condition is to “act with *yoniso manasikāra*.”** Here “*yonī*” means “origin”, “*so*” means “oneself”, and “*manasikāra*” here means “with this in mind.”

- In the *Vibhangapakarana* (Book 2, p. 234), *ayoniso manasikāra* has been described as “perceiving *anicca* as *nicca*, *dukkha* as *sukha*, and *anatta* as *atta*.” Thus acting with *yoniso manasikāra* requires comprehending *anicca, dukkha, anatta*.
- To state that very briefly, if one believes that there are things in this world that can provide happiness in the long run, then one is acting with *ayoniso manasikāra*. To act with *yoniso manasikāra* is to see the unfruitfulness of these struggles to attain something that is not attainable, and thus to work diligently towards at least the *Sotāpanna* stage because this life is so short.
- **But a more direct can be seen when one can see the “origins of various births or *jathī*” (i.e., rebirths).** “*Yonī*” in Pāli and Sinhala means the birth canal; thus *yoniso manasikāra* means the “understanding of origins”: One with *yoniso manasikāra* knows the causes that lead to births in various realms, i.e., “*bhava*” and “*jathī*” are according to one’s *gathī*; see, “[Gati to Bhava to Jāti – Ours to Control.](#)”
- With that understanding, one will be motivated to cultivate “*gathī*” to be able to make good decisions, either automatically, or at least by contemplating on it. In other words, one will be able to make better judgements about morality, and to act with *paññā* (wisdom).
- Even more importantly, one will be able to automatically avoid those deeds that can lead to rebirth in the *apāyā*.
- Thus “*yoniso manasikāra*” has a more deeper meaning than just “appropriate attention.” In particular, a *Sotāpanna* comprehends “*pāti + icca*” leads to “*sama+uppāda*”; see, “[Paticca Samuppāda – “Pāti+iccha”+“Sama+uppāda.](#)”

10. When one is meeting the first three conditions, one is set to fulfill the fourth, “*dhammanudhamma patipadā*.” Here “*dhammanudhamma*” is “*dhamma + anu + Dhamma*” where “*anu*” means “according to.” The second “*Dhamma*” is the Buddha Dhamma; the first is the “*dhamma*” that one follows. “*Patipadā*” is “procedure.” Thus it means following the procedures laid out in the true and pure Buddha Dhamma.

- When one learns the true Dhamma from an *Ariya* (Noble) person, one begins to comprehend:
 - (i). what is really meant by suffering (*dukkha*),
 - (ii). that suffering arises due to the *anicca* nature, and thus
 - (iii). one does not have any refuge anywhere in the 31 realms (*anatta*).
- Then one realizes that in order to seek the only refuge (*atta*) of *Nibbāna*, one needs to act with *yoniso manasikāra* and follow the “*dhammanudhamma patipadā*.”
- In the series of four [WebLink: suttacentral: Anudhamma Sutta \(Samyutta Nikāya\)](#) (use the arrows at the bottom to navigate to next 3 *suttā*), *dhammanudhamma patipadā* is described as living with a clear vision of *anicca*, *dukkha*, *anatta* nature of the *pañcakkhandha* (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*).

11. As pointed out in “[What is Unique in Buddha Dhamma](#),” *dhammanudhamma patipadā* or the “Dhamma Path” starts with mundane *sammā diṭṭhi*, or how to sort out immoral from moral. Then one gets rid of the *moha* (deep delusion) that covers the mind, and the mind will be ready to grasp *anicca*, *dukkha*, *anatta*.

- When a “moral mind” is exposed to the true Dhamma, the second stage or the *Sotāpanna magga/phala* results at some point.

12. Let us take an example to illustrate this concept.

One does not intentionally cut oneself, because one can see the dangers in that. In the same way, moral people stay away from immoral acts because they can see the consequences of such immoral acts.

- But there are people who enjoy cutting themselves up (even though rare); they can be compared to those who commit highly immoral acts because of their *moha*.
- We can thus see why it is comparatively easy to get on the mundane eightfold path.

13. **The *lokuttara* eightfold Path is harder to see.** This is why a Buddha or someone who has learned the message of the Buddha is needed to convey that.

- If there is a party and people are enjoying good food and drinks that laced with poison. The poison is deadly but it takes time to digest and bring out its bad effects. So everyone is enjoying the food and having a good time.
- And then someone comes and says, “this food is laced with poison, the more delicious the food is more poisonous it is.”
- Most people just ignore that message. They cannot comprehend why this person is “trying to ruin the party.” But a few people ask for more information and try to find out whether what this person is saying is true or not.
- Like that it is hard for most people to take the “long term perspective” and investigate whether it is really true that “it is not only fruitless, but also dangerous” to be attached to the sense pleasures of this world.

14. It is hard in the beginning to grasp this message. Even when one starts seeing the message (as one gets to the *Sotāpanna magga anugāmi* stage), initially it is hard to instill discipline. A good analogy here is it is harder to resist scratching an itch, even though one may realize that it is not a good idea because one will then

make that a wound. The tendency is to “enjoy the scratching.” In the same way, even when one starts seeing the dangers of the rebirth process, initially it is still hard to resist the sense pleasures.

- The solution is to “put some ointment in the itch to calm it down”; in the same way, one can calm down the strong urges by reading/listening and contemplating Dhamma (thinking about consequences).
- And one should initially focus on the “big itches”, and not try to take care of all “minor itches.” As one gets relief from the “major itches” one can see the benefits and is motivated to follow the same procedure for other “itches” as well. Similarly, following the Path (especially the *Sotāpanna magga anugāmi* stage) is a gradual process. One needs to tackle the “bigger offenses” or get rid of the “worst habits (*gathi*)” first.

Of course, one needs to have removed *micchā ditṭhi* in order to even become a *Sotāpanna Anugāmi*: [“Micchā Ditṭhi, Gandhabba, and Sotāpanna Stage.”](#)

Next, [“How Does One Know whether the Sotāpanna Stage is Reached?”](#),

6.4.8 Sotāpatti Aṅga – The Four Qualities of a Sotāpanna

July 8, 2018

1. *Sotāpatti aṅga* or the four qualities of a *Sotāpanna* are discussed in many *suttā* in the “*Sotāpatti Saṃyutta*” of the *Saṃyutta Nikāya* and also in the *Aṅguttara Nikāya*. A few examples are: [WebLink: suttacentral: Brahmācariyogadha Sutta \(SN 55.2\)](#), [WebLink: suttacentral: Pathamasāriputta Sutta \(SN 55.4\)](#), [WebLink: suttacentral: Veludvāreyya Sutta \(SN 55.7\)](#), [WebLink: suttacentral: Pathamagiṅjakāvasatha Sutta \(SN 55.8\)](#), [WebLink: suttacentral: Nandiyasakka Sutta \(SN 55.40\)](#), [WebLink: suttacentral: Gihi Sutta \(AN 5.179\)](#). [*aṅga* : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

- I was surprised to see that these four qualities of a *Sotāpanna* have not been discussed much in the current literature.

2. The four qualities (or characteristics) of a *Sotāpanna* — who has attained the *Sotāpanna phala* — must not be confused with the **four conditions that must be fulfilled to attain the *Sotāpanna* stage.**

- Those four conditions are discussed in, [“Four Conditions for Attaining Sotāpanna Magga/Phala.”](#)
- Those four conditions to attain the *Sotāpanna* stage are also called *Sotāpatti aṅga* sometimes; see, for example, [“WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\).”](#) On the other hand, the four qualities of a *Sotāpanna* are also listed as *Sotāpatti aṅga* in the [WebLink: suttacentral: Nandiyasakka Sutta \(SN 55.40\)](#).
- Therefore, one must pay attention to which context the term *Sotāpatti aṅga* is used: whether to refer to the four conditions or the four qualities.

3. The four qualities of a *Sotāpanna* are stated succinctly in the [WebLink: suttacentral: Brahmācariyogadha Sutta \(SN 55.2\)](#). The Buddha asks: “*Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo. Katamehi catūhi?*”

Translated: “*Bhikkhus, the ariyasāvaka Sotāpanna, who is free of the apāyā, has four qualities. Which four?*”

Then the Buddha gives the answer: “*Idha, bhikkhave, ariyasāvako buddhe aveccappasādena samannāgato hoti: ‘itipi so bhagavā araham sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi sathā devamanussānaṃ buddho bhagavā’ti. dhamme aveccappasādena samannāgato hoti... pe ... saṅghe aveccappasādena samannāgato hoti... pe ... ariyakantehi sīlehi samannāgato hoti akhaṇḍehi ... pe ... samādhisamvattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo’*”ti.

Translated: “A *Sotāpanna* has reverence/faith (*pasāda*) in the Buddha, Dhamma, Saṅgha, that comes via losing deep-rooted cravings for things in this world (*avecca*). He is thus established in the *ariyakānta sīla* (**moral conduct of the Noble Persons**) that cannot be broken to make him/her do *apāyagāmi* actions (*kamma*). These are the four qualities or defining characteristics of a *Sotāpanna* who is a free of the *apāyā*.”

- First, we note that the “**Supreme Qualities of Buddha, Dhamma, Saṅgha**” are listed in this *sutta*. Only the nine qualities of the Buddha are listed above in red. In the full *sutta*, the qualities of the *Dhamma* and *Saṅgha* are also fully listed.

4. In order to fully understand this description of a *Sotāpanna*, we need to understand the meanings of two key words: *aveccappasāda* and *ariyakānta sīla*.

- I have not seen *aveccappasāda* discussed in English texts; where it is mentioned, it is described as “unwavering confidence.” But the reason for that unwavering confidence is itself hidden in that word. **This is called “*pada nirukti*,” i.e., the meaning of the word is in the word itself.** Let us discuss that hidden meaning now.

5. Humans — who are not yet *Ariyā* — highly value the sense pleasures. Most are even willing to do immoral actions in order to get more sense pleasures. Even those “moral people” are addicted to enjoying sense pleasures that are attainable by moral means without hurting others.

- However, that “moral conduct” is not guaranteed to hold. Even the most moral person WILL BE tempted to do an *apāyagāmi* action under sufficiently “enticing” or “tempting” conditions. When such a strong sense input (temptation) comes, one who has not comprehended *Tilakkhaṇa* (in particular the *anicca* nature) WILL commit an *apāyagāmi* action at some point (in a future life, if not in this life).
- **This is why all of us have not been able to escape the *samsaric* journey or the suffering-filled rebirth process up to now.**
- This is hard for many to even believe. They think their morality cannot be “broken.” However, every now and then we hear such “moral people” committing heinous acts that we never thought they were capable of. The “unbreakable morality” can be attained only by seeing the unfruitfulness/dangers in sense pleasures.
- **This is the uniqueness of Buddha Dhamma:** It is possible to make one’s mind to NEVER commit an *apāyagāmi* action (at the *Sotāpanna* stage), and to NEVER commit a single *dasa akusala* at the *Arahant* stage.

6. Furthermore, without a Buddha explaining to us, it will be impossible to comprehend the wide-spread suffering in the wider world of 31 realms by ourselves.

- How many of us have watched (and enjoyed) television programs where a deer is eaten alive by a tiger? How painful is that experience for the deer? How much pain a fish will feel tangling by a hook that pierced its mouth and also not being able to breathe?
- The problem is that our minds are programmed to think that animals are not living beings who can feel pain. But ALL living beings experience pain as well as perception (recognition) and many other mental qualities that we do.
- In the *Abhidhamma* language, feelings (*vedanā*), perception (*saññā*) are UNIVERSAL mental factors (*cetsika*) that arise with ALL thoughts of ANY living being.
- **Suffering is everywhere.** If we pay attention, we can see so much suffering even among humans. It is just that we are not aware of much of the suffering in the wider world of the 31 realms. There is unimaginable suffering in the other three lowest realms in addition to the animal realm.

7. However, the reasons (or causes) for such suffering cannot be really understood without investigating (and then be convinced of) the laws of *kamma* that REQUIRES the rebirth process.

- This is why one cannot really comprehend the deeper aspects of Buddha Dhamma without first getting rid of the 10 types of *micchā diṭṭhi* or the wrong views about this world of 31 realms.
 - One who has not removed the 10 types of *micchā diṭṭhi* will have *avijjā* at the highest level, which is called *moha*. Therefore, even a prestigious scientist can have *moha*; it has nothing to do with “book knowledge.” When one gets rid of those, one gets down to the *avijjā* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā.](#)”
8. Once getting rid of the 10 types of *micchā diṭṭhi*, one can start to “see” (not with eyes, but with wisdom) that **the real cause for suffering is *taṇhā* (getting attached) that arise due to *iccā* (our liking for sense pleasures).** Furthermore, *taṇhā* has origins in “*iccā*” or cravings.
- Again, this is the uniqueness of Buddha Dhamma. Whereas a normal human cannot imagine a “happy existence” without sense pleasures, an *Ariyā* sees the opposite: unfruitfulness and dangers in sense pleasures.
 - **The key to comprehending the *dukkha sacca* (First Noble Truth) and *Tilakkhaṇa* is to see the suffering that is hidden sense pleasures. The worst kind of suffering arises when one does immoral things to access sense pleasures; that is what a *Sotāpanna* first realizes.**
9. When one starts to realize the truth at the *Sotāpanna Anugāmi* stage, one starts experiencing a different kind of “happiness”, which is the *nirāmisa sukha*.
- **The real cause of this *nirāmisa sukha* is the abstinence from sense pleasures.** Again, this is hard to explain, and needs to be experienced.
 - With that comes the realization of the value of a Buddha, and an unbreakable faith in him and a reverence for him. This is called *aveccappasāda* in the Buddha.
10. **Now we can see the true meaning of *aveccappasāda*:** “*ava*” means to overcome, *iccā* is liking or craving. These two words, when combined, rhyme as “*avecca*.” Now, “*pasāda*” is reverence/faith. When the two words “*avecca*” and “*pasāda*” are combined, it rhymes as “*aveccappasāda*.”
- It must be a truly exceptional person to discover such an unimaginable cause for the suffering in this world, and to find the way out of that suffering (by removing *taṇhā* or “*iccā*” for worldly pleasures).
 - **This unbreakable faith/reverence for the Buddha — that comes from comprehending the dangers of “*iccā*” for worldly pleasures — is called “*Buddhe aveccappasāda*.”**
11. Of course, one will simultaneously have “*Dhamme aveccappasāda*”, an unshakeable faith in the Dhamma, the teachings of the Buddha, that allowed one to be free of the *apāyā*.
- Furthermore, one will not be able to learn this unique Dhamma of the Buddha without the *Saṅgha*, those *Ariyā* who have transmitted the true and pure Dhamma up to now. One could spend a lifetime learning “fake Dhamma”, and will not be able to grasp the message of the Buddha. We are fortunate to be learn the correct Buddha Dhamma, only because of the *Saṅgha*, who have faithfully and correctly transmitted the *Tipiṭaka* over all these years.
 - That realization leads to “*Sanghe aveccappasāda*”, reverence/faith in the *Saṅgha*.
 - It is important to note that *bhikkhus* are not necessarily included in the *Saṅgha*. Only those eight Noble Persons (*attha purisa puggala*) are included in *Saṅgha*; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha.](#)”
 - However, *bhikkhus* should always be treated with respect. They represent the *Buddha Sāsana*. As I understand, even a lay *Ānāgāmi* should bow to any *bhikkhu*.
12. Finally, now one’s moral conduct is unbreakable FOREVER, even though future births. No matter how tempting the external sense input is, one will NEVER do an *apāyagāmi* action (*kamma*).

- This unbreakable moral conduct of a *Sotāpanna* is called “*ariyakānta sīla*.” *Kānta* (“ka” + “anta”) is the “cooled mindset” achieved via removing the two extremes (“*anta*”) the Buddha rejected: excess sense pleasures and excess hardship or extreme austerity.
- *Ariyakānta sīla* is established only in *Ariyā* who have comprehended this unique message of the Buddha, about how suffering arises in this wider world of 31 realms and how that future suffering can be stopped and a permanent state without suffering (*Nibbāna*) can be attained.

13. This is the “unique vision” or *Sammā Diṭṭhi* in the Noble Eightfold Path. A *Sotāpanna* is able to see the truth of this “previously unheard” Dhamma.

- Thus, when a *Sotāpanna* comprehends this “hidden truth” about the real nature of this world, he/she will **begin to see the danger in getting attached to** sense pleasures (however, a *Sotāpanna* will not be able to stay away from normal sense pleasures; only the correct vision about the dangers in sense pleasures is registered).
- That “drastic change in vision” will automatically generate faith and reverence in the Buddha, *Dhamma*, and the *Saṅgha*, thereby generating *aveccappasāda* for them.
- This is why the Buddha, *Dhamma*, and the *Saṅgha* are called the Triple Gems, and are worthy of homage; see, “[Supreme Qualities of Buddha, Dhamma, Saṅgha](#).” We will discuss this in the next post.

6.4.9 **Sammā Diṭṭhi – Realization, Not Memorization**

May 13, 2018; revised June 20, 2020

1. *Sammā Diṭṭhi* (or comprehension of *Tilakkhaṇa*) is the necessary first step to start on the Noble Eightfold Path. If one has gained *Sammā Diṭṭhi* (i.e., if one is a *Sotāpanna/Sotāpanna Anugāmi*), one would have understood the Four Noble Truths and can “see” (not with eyes, but with *paññā*) the path to *Nibbāna*:

- One has “seen” that there would be much suffering in future lives (especially in the *apāyā*), if one gets too much attached to worldly things by assuming that they can provide lasting happiness (this is the comprehension of the *anicca* nature).
- The reason for such future suffering is immoral actions, speech, and conscious thinking (*kāya* and *vacī saṅkhāra* done with ignorance or *avijjā*). This is why the first step in *Paṭicca Samuppāda* is “*avijjā paccayā saṅkhāra*.”
- That one can stop future suffering from arising by controlling one’s *kāya* and *vacī saṅkhāra* or to stay away from *dasa akusala*.
- And the way or path to accomplish that is the Noble Eightfold Path.

Those are the Four Noble Truths.

2. We can analyze it in a different way by first discussing what is meant by *Nibbāna* and also *Sotāpanna*.

- The *Nibbāna Sutta* in the *Saṃyutta Nikāya* clearly describes *Nibbāna* as, “*..ragakkhayo, dosakkhayo, mohakkhayo — idaṃ vuccati nibbānanti*.” [[SN 38.1 Nibbānapañhāsutta](#)] That means *Nibbāna* is attained via removing greed, hate/anger, and ignorance from one’s mind.
- However, the step-by-step procedure to attain *Nibbāna* involves four steps, which remove four types of *āsavas* or **mental fermentations** that contaminate a mind; see, “[The Way to Nibbāna – Removal of Āsavā](#)”: *Diṭṭhāsava, kāmāsava, bhavāsava, and avijjāsava*.

3. It is important to understand what *āsavas* or **mental fermentations** are, how they accumulate, and how they lead to grasping of a new *bhava* at the moment of death.

- Let us take an example. When one keeps doing immoral things based on greed (hurt others, steal, sexually misbehave, etc in order to satisfy that greed), then one’s mind accumulates “*āsavas* of greedy

type.” “Mental fermentations” is a good translation for *āsava*; **it implies that the longer that one keeps them, they get more rotten.**

- Another way to say that is to say one is cultivating “greedy *gati*.”
- This can be compared to adding rotten things to a pool of water. Contamination gets worse with time. Still, the dirt may settle down at the bottom of the pool, and the water may look relatively clean.
- However, when the water is disturbed, say by stirring with a long stick, some contaminants will come to the surface; that is *anusaya*. How much comes to the surface (*anusaya*) depends on how hard the water is stirred, i.e., how strong the sense input is. Furthermore, if there is a lot of dirt there, even the slight stirring can bring dirt up to the surface.

4. **Āsavas or mental fermentations are like mud at the bottom of the pool.** When a mind has built up a lot of *āsavas* accumulating deep inside, it is easier for them to come to the surface (i.e., for cravings to come to the mind) when one gets a corresponding sense input (seeing an attractive person, for example). This is called the *anusaya*. So, how one responds in a given situation depends on those three parameters (*gati*, *āsava*, *anusaya*), which are interconnected: “[Gathi \(Gati\), Anusaya, and Āsava.](#)”

- Removal of these four types of *āsavas* (which is the same as removing corresponding *gati*) leads to the removal of 7 types of *anusaya*: *diṭṭhi*, *vicikicchā*, *kāma rāga*, *paṭigha*, *bhava rāga*, *māna*, *avijjā*; see, “[Conditions for the Four Stages of Nibbāna.](#)”

5. **The most important of the four āsavas is the diṭṭhāsava.** All other *āsavas* are influenced by the wrong views one has. With the removal of *diṭṭhāsava* at the *Sotāpanna* stage, 99+% of all “mental junk” or “mental fermentation” disappear from the mind.

- **This is why the Buddha said that a *Sotāpanna* has removed an amount of defilements comparable to the soil in the whole Earth. Remaining defilement due to all three other types of *āsavas* is comparable to the amount of soil picked up by one’s thumb.**
- Therefore, one needs to get a clear idea of what is meant by *Nibbāna* and to see why that necessarily means getting out of the rebirth process. The rebirth process is filled with so much suffering in the *apāyā*. The Buddha said that any given living being spends most of the rebirth process in the *apāyā*.

6. Therefore, the first, and most important step towards attaining *Nibbāna* is to remove *diṭṭhāsava*, at which time the 2 types of *anusaya* and the 3 types of *saṃyojana* are also removed; see, “[Conditions for the Four Stages of Nibbāna](#)”:

- With the removal of *diṭṭhāsava* leads to the removal of *diṭṭhi anusaya* and *vicikicchā anusaya*.
- Simultaneously, the three *saṃyojana* (*sakkāya diṭṭhi*, *vicikicchā*, *silabbata parāmāsa*) disappear.
- We will discuss these in the next post.
- They are all removed by the “right vision.” It is called “*dassanena pahātabbā*” or “removal via right vision.”

7. The hardest part to understand is what is meant by the “right vision.” We have discussed at length at this website that it involves the comprehension of *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*): That one cannot achieve long-lasting happiness by pursuing enticing things in this world, that one will be subjected to suffering in the long run if one does that, and therefore, such an approach will lead to one becoming helpless (especially when one is reborn in the *apāyā*).

- That is the basic “right vision” that must REGISTER in one’s mind. The truth of that needs to be accepted by the mind.
- Just reading about this, and memorizing it is not enough.

8. Let us take an example to illustrate this point. There are people who do not believe in rebirth. That is a “wrong *diṭṭhi*” or “wrong vision” according to the Buddha. But if one’s mind does not see that rebirth must be valid, just by reading about it is not going to change that impression in that mind.

- One should look at the evidence for rebirth with an open mind; see, “[Evidence for Rebirth](#).” One should contemplate on the fact that nothing happens without causes, i.e., *kammā* will have *vipāka*. That in turn leads to the conclusion that rebirth must be valid.
- This is why getting rid of the 10 types of *micchā diṭṭhi* MUST happen before one can comprehend *Tilakkhaṇa* and become *Sotāpanna*. This was discussed by the Buddha in the “[Mahā Chattārisaka Sutta \(Discourse on the Great Forty\)](#).”

9. One issue that I do not quite understand is there are some of those people who do not believe in rebirth but want to attain the *Sotāpanna* stage and even the *Arahant* stage! They don’t realize the contradiction?

- By definition, one wants to attain the *Sotāpanna* stage in order to avoid births in the *apāyā*. So, if one does not believe in rebirth, why does one believe that it is possible to be born in the *apāyā*?
- We must also remember that even those of us who believe in rebirth, has been in this rebirth for a time which has no traceable beginning. Therefore, we must have also held such wrong views in the past. It is not easy to get rid of these 10 types of *micchā diṭṭhi*.

10. In any case, we still need to have more clarification on what happens when one truly comprehends *Tilakkhaṇa*.

- I think one good analogy is if one is wearing — say a blue-tinted glasses — all the time, then no matter how hard one tries, one WILL see the world see white objects as blue and other objects also distorted to appear with different colors.
- Removing a *diṭṭhi* (or wrong vision) is like taking off those tinted glasses. It happens when one’s mind comes to a certain stage of understanding. This is cultivating *paññā* (wisdom).
- The only way to remove those “tinted glasses” is to contemplate on the teachings of the Buddha, and also to engage in *puñña/kusala kammā* that provide the conditions for the mind to comprehend those teachings.

11. A key factor that most people disregard is how much of a difference it can make in one’s mindset when one stays away from *dasa akusala* and engages actively in *kusala/puñña kammā*. One’s mind becomes clear and sharp, one will be able to comprehend deeper concepts easily; see, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma](#).”

- Then one will be able to get rid of the 10 types of *micchā diṭṭhi* and then make the transition to the Noble Path by starting to comprehend *Tilakkhaṇa*; see, “[Sīla, Samādhi, Paññā to Paññā, sīla, Samādhi](#).”
- Comprehending *Tilakkhaṇa* is different than learning mundane subjects like geometry or even mathematics. It can be difficult or relatively easier depending on how much “preparations” (*dāna, sīla, bhāvanā*) one has made in this life and also in previous lives; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#)” and “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma](#).”

12. As we discussed above, the key step in getting to the “right view” is for one’s mind to see the truth in the world view of the Buddha: **That our world is much more complex than what we experience with our senses.** That there are more realms of existence, that suffering is worst in those *apāyā*, and that unless we get rid of “*apāyagāmi gati*” one can end up in the *apāyā*.

- Those “*apāyagāmi gati*” are closely related to *diṭṭhāsava*, which arise and accumulate due to ignorance of the Buddha’s world view or the real nature of the world (*Tilakkhaṇa*).
- Furthermore, at the dying moment, the mind can grasp such an *apāyagāmi* sense input (*ārammaṇa*).

- As we have discussed before, those things happen AUTOMATICALLY, based on one's *gati* (*āsava*). That is an important point to understand. Unless one is a *Sotāpanna*, those possibilities cannot be ruled out.

13. Another related key issue is the following. It does not matter not how many bad *kammā bīja* one has accumulated (some of which accumulated in previous lives and we are not even aware of them) Rather what is important is whether one's mind will grasp a *bhava* (*upādāna*) in a given realm. That depends only on the level of *paññā* (wisdom) that one has cultivated and THEREFORE what kind of *gati* one has.

- **It DOES NOT matter how many *kammā bīja* suitable to give rebirth in the *apāyā* are there. If one has removed “*apāyagāmi gati*” by cultivating *paññā* to the *Sotāpanna* stage, then one's mind would not grasp such *bhava*.**
- If one's mind has removed all *gati* that can lead to rebirth in any realm, then one's mind would not be able to grasp any *bhava*, and thus one would attain *Parinibbāna* at the dying moment.
- For example, Aṅgulimāla killed 999 people but was able to attain the *Arahanthood* within a week or so. Those bad *kammā bīja* were still there, but his mind would not grasp (*upādāna*) them. See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma.](#)”

14. When one gets to *Sammā Diṭṭhi* (i.e., when one becomes at least a *Sotāpanna Anugāmi*), one's *gati* have changed permanently. Since the next birth is according to one's *gati*, one will not be born into a family with *micchā diṭṭhi*. This is how it is guaranteed that one will have only 7 more *bhava* left.

- One may grasp *Tilakkhaṇa* by focusing on one of them. But that will lead to comprehension of all three, and even more characteristics like the *asubha* (unfruitful) nature. They are all inter-related.
- Of course, there are different levels of *Sammā Diṭṭhi* and it will be completed only at the *Arahant* stage.

15. Finally, there is no need to worry about whether one has attained a certain stage of *Nibbāna*. One should concentrate on following the Path. The Buddha said that if one follows *Satipaṭṭhāna*, one would attain at the least *Anāgāmī* stage within seven years (some earlier.) Of course, one must have a *tihetuka birth*.

- If one does not have a *tihetuka paṭisandhi*, the effort will not go waste but will help attain *Nibbāna* in a future life. See. “[Patisandhi Citta – How the Next Life is Determined According to Gati.](#)”
- He said that if a farmer plants seeds and takes good care of those plants, they will provide a good harvest. It is pointless to check each and every day to see whether the harvest is ready. It will happen in due time.

6.4.10 How Does One Know whether the Sotāpanna Stage is Reached?

Revised March 23, 2017; May 15, 2018; September 22, 2018; August 12, 2019; February 11, 2020

One can determine for oneself whether one has attained the *Sotāpanna* stage. It becomes clear to oneself that one has removed the characteristics (*gati*) suitable to be born in the four lowest realms (*apāyā*).

***Sotāpanna* Is the First Goal**

1. The most precious thing sought by a *Bhauddhayā* (or a practicing Buddhist) is the *Sotāpanna* stage of *Nibbāna*; see, “[Why a Sotāpanna is better off than any King, Emperor, or a Billionaire.](#)”

- It is the *Arahanthood* that is the ultimate goal. A *Sotāpanna* will become an *Arahanthood* within seven *bhava*.
- Seven *bhava* is many more than seven births, because, within a given *bhava*, there can be many births. See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- Thus it is essential to know how to figure out whether one has attained that stage. Other than that person himself/herself, only a Buddha can say whether a given person has achieved *magga phala*; see, "[Myths about the Sotāpanna Stage.](#)"
- As we discussed in that post, even Ven. Sariputta (who is only second to the Buddha in Dhamma knowledge) could not do that. Some people today claim they know whether another person has attained the *Sotāpanna* stage (and make money doing that).

2. A *Sotāpanna* is one who has seen the way to *Nibbāna*. He/she still has more work to do, but can see a glimpse of *Nibbāna* from far. The way to *Nibbāna* has become apparent.

- In another post, I described a simile. A traveler, who, looking for particular mountain to get to the top of it, can finally see an outline of it at a distance. He/she still has to travel to the base of the mountain and climb up. Most of the hard work was to find the location of that mountain and to get close to it. See, "[Sotāpanna Anugami and a Sotāpanna](#)" and "[The Sotāpanna Stage.](#)"

***Nibbāna* Is the Stopping of the Rebirth Process**

3. In Buddha Dhamma, the ultimate goal is to stop the rebirth process anywhere in the 31 realms of this world. **That corresponds to realizing that there is only suffering to be had by staying in this rebirth process.** In particular, one has to comprehend the dangers of rebirths in the lowest four realms (*apāyā*.)

- The ONLY WAY to come to this realization is to comprehend the true nature of this world of 31 realms: *anicca, dukkha, anatta*. And that is NOT impermanence, suffering, and "no-self"; see, "[Anicca, Dukkha, Anatta – Wrong Interpretations.](#)"
- Instead, it is to realize the unfruitfulness of striving to reach the mirage of happiness in this world of 31 realms, and thus convince oneself that one is truly helpless in this cycle of rebirths.
- Therefore, one must work diligently to stop future suffering by "giving up the cravings for anything in this world" and strive to reach the only oasis in this desert of the cycle of rebirths or *Nibbāna*. That is to release the mind from the burdens of the material world.

Comprehension of *Tilakkhaṇa* will change one's outlook of life

4. Once that idea sinks in, one's attitude, behavior, and outlook on life will change forever.

- Let us take an example. Once a child learns the way to add two numbers, there is no way that the child will ever forget that. There will be no second guessing. If an adult, even a teacher, tells that child that "two plus three is six", there is no way that that child will ever agree to that.
- Attaining the *Sotāpanna* stage is like that. Deep down, one will KNOW the dangers of the rebirth process. That any happiness whether due to health, wealth, or fame, is of NO VALUE in the long term. He/she has truly understood the value of the Buddha Dhamma, and that **faith (based on understanding)** will prevail through future rebirths.
- That is not a "magical effect." A living being is a continuous flow of *kammic energy*; see, "[What Reincarnates? – Concept of a Lifestream.](#)" Thus what happens at the *Sotāpanna phala* moment is to change the "*gathi*" of that lifestream irrevocably. **One would have permanently shed any "gathi" suitable for a hell-being (with *gathi* of strong hate), a *peta* (intense greed), an *asura* (freeloading mentality), or an animal (a mixture all those; "*thirisan*" or all three "*san*").**
- One way to assess is to see how much of one such "*gati*" have changed for the better. (Over the time period that one has started working towards the *Sotāpanna* stage). One should be able to see **significant** changes. For discussions on "*gati*", (or "*gathi*"), please use the "Search" box on top right.

"Seeing" the True Nature of This World

5. Let us take another example. When we look in a mirror and see our image, we KNOW that it is not another person or oneself, but merely a image. We don't need to think twice to realize that.

- But have you seen a dog barking at its reflection in a mirror or in water? A dog thinks it is another dog, and barks at it. A dog would not know the reality of a reflection.
- In the same way, an average human thinks very highly of his/her material wealth. One is willing to “do whatever it takes” to achieve such material things, titles, recognitions, etc.
- But a *Sotāpanna* would instinctively know the unfruitfulness of such struggles. He/she may still be enjoy sense pleasures (and thus may still likes to eat tasty food or engage in sexual activity, for example). However he/she will not willingly go to extremes, such as engaging in sexual misconduct having affairs outside the marriage or being excessively greedy.
- A *Sotāpanna* has reduced *lobha* to *kāma rāga* and *dosa* (or *dvesha*) to *paṭigha*. In other words, greed or hate that was due to total covering of mind by the five hindrances would be reduce to “attachments” and “dislikes”; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā.](#)”
- The most important thing is that he/she will NEVER do any act that is immoral enough to lead to rebirth in the lowest four realms. We all KNOW that our reflection in a mirror is not real and thus will not try to talk to that reflection. Similarly, a *Sotāpanna* INSTINCTIVELY avoids doing anything that is profoundly immoral. He/she does not need to think about consequences of such acts, etc.

Jhāna Can Be a Distraction

6. One could be a *Sotāpanna* (or even an *Arahant*) without being able to get to any *jhāna* beforehand. Many people in the time of the Buddha attained the *Arahanthood* upon listening to a *desanā*. *Upacara* and *anuloma samādhi* are sufficient for one to get to the *Sotāpanna* stage. Also, *jhāna* and *magga phala* are two different things; see, “[Samādhi, Jhāna \(Dhyāna\), Magga Phala.](#)”

- That becomes clear when we look at the possible rebirths of a *Sotāpanna*. A *Sotāpanna* could be reborn at or above the human realm.
- But if one has attained the first *anāriya jhāna* then one WILL be born in the *Brahma* realm. Thus a *Sotāpanna* with even any *anāriya jhānā* WILL NOT be reborn human.
- A *Sotāpanna* can attain *Ariya jhānā* with practice.
- By the way, if one is not a *Sotāpanna* but has attained *anāriya jhānā*, he/she will also be born in a *Brahma* realm. But the difference is that he/she is not free from rebirths in even the lowest four realms.
- What I described above is consistent with the extension of 89 *cittā* to 121. The “additional 40 *cittā*” come about when attaining the four stages of *Nibbāna* for people at various (*anāriya*) *jhāna* levels; see, “[The 89 \(121\) Types of Citta.](#)” However, these are technical details that may not concern most people. I just wanted to show consistency.

Ariya and Anāriya Jhāna Experiences Are the Same

7. We also need to keep in mind that the *jhānā* experience is the same for *anāriya jhānā* as for *Ariya jhānā*. They are mental states of the *rūpāvacara* and *arūpāvacara* realms; they still belong to this world of 31 planes.

- There were *yogis* even before the Buddha who could attain *anāriya jhānā* to the eighth and also cultivated powerful *abhiññā* powers. *Ceto vimutti* (or *ceto vimukthi*) with *anāriya jhānā* is not the same as *magga phala* with *paññā vimutti*. In the former defilement are suppressed. In the latter, they have been removed.
- Of course, having even *anāriya jhānā* makes it easier to do *vipassanā* (comprehend *anicca*, *dukkha*, *anatta*) and attain *magga phala*.

Ariya and Anāriya Jhāna Are Very Different in Essence

8. Just SUPPRESSION of *akusala* thoughts and craving for sensual pleasures (*kāma rāga*) can lead to *anariya jhāna*.

- On the other hand, the attainment of *Ariya jhāna* requires the removal of craving (*anusaya*) for sensual pleasures (*kāma rāga*). Thus one needs to be an *Anāgāmi* to attain even the first *Ariya jhāna*. See, "[Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala.](#)"
- Here is a *desanā* from the Waharaka Thero describing the difference between *jhāna* and *magga phala* (it is in Sinhala, but I have extracted the essence in this post for others):

[WebLink: Waharaka Thero - Difference between Magga Phala and Jhāna in Sinhala](#)

Changes One Can See For Oneself

9. Even before reaching the *Sotāpanna* stage, one will notice changes in one's behavior and attitude towards not only other humans but all living beings. All those will gradually change as one starts following the Path.

- But there will be significant changes after attaining the *Sotāpanna* stage. That change may not be noticeable in a day. It could take weeks or a few months to see some critical differences in one's lifestyle when one looks back.
- The tendency to get together with a lot of people will be reduce. One will be spending more and more time learning Dhamma and contemplating on concepts that are still not entirely clear. Finding more about the real nature of this world is immensely enjoyable.
- One will also start noticing things that one had not noticed before. One will see clear instances of people's "self-induced" suffering as they try to enjoy life by "partying harder," but only getting exhausted in the process.

Should One Declare One's Attainments?

10. Then there is this question. Is it appropriate or even allowed by the Buddha for someone to declare the *magga phala* one has attained?

- What is stated in the *Tipiṭaka* is following. If one declares that one has certain *magga phala* falsely intending to gain respect, money, publicity, etc., that is a bad *kamma*. A conventional *bhikkhu* becomes "*pārājika*," loses the priesthood automatically, and thus could be born in the *niraya* for doing that.
- Declaration of a *magga phala* is not banned. "A person attaining the *Sotāpanna* stage may declare it if he/she wishes to do so." in particular for the benefit of others. In the [WebLink: suttacentral: Mahā Parinibbāna Sutta \(DN 16\)](#), "*Katamo ca so, ānanda, dhammādāso dhammapariyāyo, yena samannāgato ariyasāvako ākaṅkhamāno attanāva attānaṃ byākareyya: 'khīṇanirayomhi khīṇatiracchānayani khīṇapettivisayo khīṇāpāyaduggativinipāto, sotāpannohamasmi avinipātadhammo niyato sambodhiparāyaṇo 'ti.*"
- Most people who attain *magga phala* do not declare it; it is not a bragging point. It is the same with *jhānā*. Many people start off developing *jhānā* to attain supermundane (*abhiññā*) powers, but once they get there, they have already seen the fruitlessness of even those powers.
- In particular, when one develops *abhiññā* powers to be able to see previous lives, one become so disgusted with what one (and others) had gone through in past lives. One does not seek to look back much further.

Tipiṭaka Examples/Accounts

11. Now let us discuss some episodes from the *Tipiṭaka* to clarify some of the points made above.

- Visāka (one of the chief female lay disciples of the Buddha) had attained the *Sotāpanna* stage at a young age. But she remained at that stage even without developing any *jhānā* or higher *magga phala* until death at age 120. The Buddha stated that she would be reborn many times (as I remember 11 times) as human.
- Similarly, the wealthy businessman Anathapindika, who built the very beautiful and expensive monastery *Jetavanaramaya*, attained the *Sotāpanna* stage upon hearing his first *desanā* from the Buddha. He died and was reborn in the Tusita realm (one of the six *deva* worlds). Since those *deva* worlds also belong to the *kāma loka*, it is clear that he never attained an *Ariya jhāna*.
- Mahānāma was a wealthy person who was related to Prince Siddhartha's family. The Buddha told him that he had attained the *Sotāpanna* stage. However, when he was engaging in his business activities, he often got frustrated and angry with his servants and yelled at them. After such an episode of outburst, he would think, "if I am still able to become angry like this, I must not have attained the *Sotāpanna* stage yet." So, he would go to see the Buddha, explained what happened, and ask whether the Buddha was sure about the declaration. He still had doubts about his attainment of the *Sotāpanna* stage until the Buddha confirmed it for the third time; see, "[WebLink: suttacentral: Pathama Mahānāma Sutta \(SN 55.21\).](#)"
- **The key is that there is a difference between hate (*dosa*) and getting angry (*paṭigha*); *paṭigha* is removed only at the *Anāgāmī* stage.**

More Accounts From *Tipiṭaka*

12. Then there was the Sarakani *brahmin*, who also belonged to a "high caste." He used to consume alcohol and get drunk on a regularly. His relatives, who were *vedic brahmins*, disowned him from their lot, saying that he was unworthy to be one of them. He also attained the *Sotāpanna* stage, but could not give up the habit of drinking even after achieving that. When he died, Mahānāma (mentioned above) asked the Buddha where Sarakani was reborn. The Buddha said Sarakani had attained the *Sotāpanna* stage and has been reborn a *deva*. Sarakani's relatives laughed out loud contemptuously upon hearing this and declared, "if Sarakani was a *Sotāpanna*, then we all should be *Arahants*." When Mahānāma reported this back to the Buddha, the Buddha said those ignorant *brahmins* would just go by outward appearances. **That description is in the *Sarakāni sutta* (Do a Google search to find several translations of the *sutta*).**

- Of course, that episode does not imply that one could keep doing immoral activities and still attain the *Sotāpanna* stage. What we need to understand is that drinking alcohol by itself is not one of the *dasa akusala* (ten immoral actions), but heavy consumption could lead to it. Sarakāni probably continued with his long-time habit to some extent, but was unlikely to have "got drunk." **A *Sotāpanna* removes only strong greed (*lobha*). *Kāma rāga* or attachment to sense pleasures is removed only at the *Anāgāmī* stage.**
- In the *Mahanama sutta* (delivered to Mahanama mentioned above), the Buddha described the *sīla* (moral conduct) of a *Sotāpanna*: "*panatipata pativirato hoti, adinnādāna pativirato hoti, kamesu miccacara pativirato hoti, musāvāda pativirato hoti, surameraya majjapama dattana pativirato hoti.*" It is essential to realize the deep meanings of "five precepts"; see, "[The Five Precepts – What the Buddha Meant by Them.](#)"
- In the above "*pativirato hoti*" does not mean "will not" but rather "will not do with liking." After all, a *Sotāpanna* (unless had attained *Ariya jhānā*) is not yet released from the higher realms of the *kāma loka*, only from the lowest four realms.

Asmi Māna Removed Only at the *Arahant* Stage

13. **Some people try to remove the sense of "me" or sense of "self" to get to the *Sotāpanna* stage, but that is removed only at the *Arahant* stage.**

- As long as one is bound to the 31 realms, a sense of “self” will be there. These “*gati*” are removed in stages, starting with “*gathi*” suitable for rebirth in the *apāyā* as discussed in #4 above. Even an *Anāgāmi* has a sense of “self” left, though most of his/her attachments for sense pleasure would not be there. One cannot pass a college exam without having graduated from high school.
- One has to advance systematically through stages; see, “[The Way to Nibbāna – Removal of Āsavas](#)” and “[Conditions for the Four Stages of Nibbāna.](#)”
- As long as one is bound to the 31 realms or “this material world,” it is not correct to say there is a “self” or there is “no-self”; they are both wrong and extreme views; see, “[Anicca, Dukkha, Anatta.](#)”
- Any meditation with the wrong concepts of *anicca*, *dukkha*, *anatta* “will not grow.” One should be able to “feel” one’s meditation “grow” if one is doing correct types of meditation; see, “[13. Kammattana \(Recitations\) for the Sotāpanna Stage.](#)”

Only a Buddha Can Know Another Person’s Attainments

14. Finally, only a Buddha could discern whether another person has attained *magga phala*. However, there are many instances of people declaring their attainments by themselves when that declaration helped a noble purpose.

- All those who participated in the first four Buddhist Councils (Dhamma *Saṅgāyanā*) were *Arahants*, according to the *Tiṭṭhaka*. Thus all those many thousands of *Arahants* who attended those four *Saṅgāyanā* must have declared the *Arahantship* by themselves.
- Ven. Ānanda attained the *Arahantship* just the night before the First *Saṅgāyanā*. He came to the Council by air (with *abhiññā* powers) and entered the hall through the keyhole. He did that to dispel any doubts from the minds of the other *Arahants* of his attainment.
- There are only a relatively few instances of *Arahants* or even the Buddha performing such supernormal acts. It was essential to remove any doubts of others about the *Arahantship* of Ven. Ānanda because of the critical role he played at the First *Saṅgāyanā*.

- [Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa Ja Vedanā](#)

6.4.11. Assāda, Ādīnava, Nissaraṇa – Introduction

1

November 1, 2017

1. This subsection replaces the old subsection, “Āsvāda (Mind-Made Pleasures), Ādeenava [ādīnava] (Bad Outcomes), Nissaraṇa (Relinquish).” I had used Sinhala terms in that series, without realizing it. Also, I have basically re-written some of the posts — including the Introduction — to have a logical flow.

- Furthermore, this subsection was under “*Paṭicca Samuppāda*.” I have now moved it to the “*Sotāpanna Stage*” where it is more appropriate.
- Here is the pronunciation of the three words: “[WebLink: Assāda, Ādīnava, Nissaraṇa.](#)”

2. There are two main categories of “pleasures” that one experiences: (i) Those arising **due to *kamma vipāka***, and (ii) mind-made “pleasures” where we keep generating more *vacī saṅkhāra* (**thinking/talking to ourselves in our minds**) **recalling such an experience of the first kind.**

- For example, eating a piece of cake that was given by a friend generates a “good feeling” via the taste itself. That belongs to the first category. This is a *kamma vipāka* and there are “no new *kamma* generated”; see, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna.](#)”
- But if we get “attached to that taste” and start thinking how good it is and crave for more, now we are generating *vacī saṅkhāra* (thinking/talking to ourselves about how good it is), then we are generating “new *kamma*.” This second type is called ***assāda*** (*āsvāda* in Sinhala). [*assāda* : [m.] taste; enjoyment; satisfaction.]

3. Therefore, ***assāda*** are basically “mind-made pleasures”, i.e., **only those in the second category.**

- Those of the first type arise AUTOMATICALLY due to sense inputs. They arise due to our *kamma vipāka/gathi* via *mano saṅkhāra*. *Mano saṅkhāra* are defined as *vedanā, saññā* which arise in each and every *citta*.
- Based on those initial feelings, we are also likely to start generating *vacī saṅkhāra* (talking to ourselves, which is defined as *vitakka/vicāra*, then actual speech) and then even generate *kāya saṅkhāra* (bodily actions). **We HAVE CONTROL over *vacī* and *kāya saṅkhāra*, and that is the key to changing our defiled *gathi*.**
- It is important to realize that *vacī saṅkhāra* are associated with speech and also “talking to ourselves”: “[Correct Meaning of Vacī Sankhara.](#)”

4. There is nothing we can do to stop the first kind. For example, even an *Arahant* WILL feel the “tastiness” of sugar or a nice meal (or saltiness of salt or unpleasantness of some medications/foods, etc). But he/she WILL NOT become attached to that taste and crave for more.

- **It is this craving and the subsequent conscious thinking about it (*vacī saṅkhāra*) that is called *assāda*, and that is what is bad because that will extend the *samsāric* journey filled with suffering** as we will discuss in detail in this subsection.
- So, it is important to distinguish between AUTOMATIC generation of *mano saṅkhāra* (due to *vipāka*) and CONSCIOUS generation of *vacī* and *kāya saṅkhāra*: “[How Are Gati and Kilesa Incorporated into Thoughts?](#)”

5. It is those CONSCIOUS generation of *vacī* and *kāya saṅkhāra* that contribute to future suffering (and also lead to *tāpa* or “heat” in the mind right now): “[Suffering in This Life – Role of Mental Impurities.](#)”

- We “get addicted” to things like drugs, alcohol, and even over-eating by constantly thinking about them. We tend to recall past experiences and create in our minds such future experiences. This is generating *vacī saṅkhāra* (talking to ourselves). Then we start talking and doing things accordingly.
- This is how we strengthen “old bad habits” and even develop “new bad habits” or *gathi*. These habits or *gathi* could be *samsāric gathi* or new ones.
- There are many posts at the site on “*gathi*” (or habits/character). A simple explanation is at “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#),” and there is a scientific explanation too: “[How Habits are Formed and Broken – A Scientific View.](#)”

- This important concept of *gathi* is not discussed in current Theravāda literature, but it can explain many other concepts.

6. The more we enjoy such “mind-made pleasures” or *assāda*, the more established those associated *gathi* become. For example, a drug user/alcoholic is constantly thinking about either past experiences or the next, and is “building up” that *gathi*. Then it will become increasingly difficult to be drug/alcohol free.

- There is an even worse consequence too: that *gathi* becomes what one craves/thinks about and will become operational in *paṭicca samuppāda* via “*upādāna paccayā bhava*.” One can start a PS cycle just in the mind by thinking about getting drunk via initiating *vacī saṅkhāra* and generating “*bhava* or existence of a drunkard.” Then of course one will follow-up with actual drinking, which is done via *kāya saṅkhāra*. Soon enough one will end up an alcoholic.
- Therefore, *ādīnava* means “bad consequences or dangers.” In this case, what we perceive as “mental pleasures” (*assāda*) WILL have bad consequences both in this life **and in future lives**: In the above example, one is likely to be matched with an “alcoholic mother” in the next birth, and be born an alcoholic. [*ādīnava*: [m.] disadvantage. 過患 (danger), 患難 (trials and tribulations), 過失 (negligence), 危難 (distress).]

7. This is another way to express the First Noble Truth. What a normal person thinks as “*somanassa*” (“*suva*” + “*manasa*” or “good feelings in the mind”) CAN actually be the cause for FUTURE suffering, **but ONLY IF one gets attached, as discussed above.**

- Note the difference between consuming a tasty food and getting attached to it; seeing a nice picture and getting attached to it; hearing a nice music and getting attached to it, etc.
- **Getting to that point of being able to experience “taste things” without getting attached to them is not easy**; that is not attained fully until the *Anāgāmi* stage. It requires more learning and contemplation (*Satipaṭṭhāna bhāvanā*).
- However, to first get to the *Sotāpanna* stage, one needs at least to “see with wisdom” that *assāda* do lead to *ādīnava*; when that understanding sinks in, that will prevent one from committing *apāyagāmi kamma*, i.e., one’s mind will get rid of the coarse level of *assāda*. This subsection can help gain that “vision.”

8. When one fully understands the bad consequences (*ādīnava*) of these mind-made pleasures (*assāda*), that means one has understood the First Noble Truth as well as the causes for it, how to eliminate those causes, and the way to do it, i.e., all four Noble Truths.

- That leads to the cessation of *samsāric* journey and that is called *nissaraṇa* (end of “*carana*” or journey (“*nis*” + “*charana*”, which rhymes as “*nissaraṇa*”). [*nissaraṇa* : (nt.) 1. going out; departure; 2. escape.]
- But it is a step-by-step process that starts with the *Sotāpanna Anugāmi* stage and culminates at the *Arahant* stage.

9. It will take several posts to explain the above in detail. However, understanding them will help with *paṭicca samuppāda* cycles and also with *Satipaṭṭhāna/Ānāpāna bhāvanā*.

- The first few subsections of the “[Living Dhamma](#)” section has all the fundamentals that are needed to help understand this subsection. The posts mentioned in #3 and #4 are especially important ones.
- *Assāda* are related to *āsava* and *anusaya* too, as well as *gati* (or *gathi*) as we mentioned above. There are many posts at the site on those key concepts, and a couple were listed in #4 above. One could use the “Search” button on top right to locate relevant posts.
- In the following we will discuss a couple of more examples of *assāda*, *ādīnava* and *nissaraṇa* in simple terms.

10. There are many things that we know which provide instant gratification, but are harmful in the long term. A good example is smoking. A smoker gets an enjoyment with smoking. Furthermore, he/she wants it to be repeated again and again, and that is *assāda*. But it has been proven without a doubt that long-term smoking causes many health problems including cancer.

- Even though smoking has decreased over the years, there are still many people who smoke. I had a older friend who smoked heavily; I asked him why he would keep doing it since he knew about the bad consequences. He said the habit had been ingrained and it was hard to break it. This was many years ago, and he died because of his bad habit. The last several years of life were spent in hospitals, with parts of his lungs removed piece-by-piece and eventually he was on oxygen most of the time.
- Of course he finally gave up smoking when he was about to be hospitalized. By the time he clearly saw the “*ādīnava*” (when he actually experienced the bad consequences), it was too late. The damage had been done.

11. However, his children clearly saw what he went through, and understood that smoking may provide temporary enjoyment (*assāda*), but is bound to bring about bad consequences (*ādīnava*). Thus they stayed away from smoking (*nissaraṇa*).

- This is the key point that we will prove to be valid for ANY sense pleasure at the end. But do not worry; **we do not have to (and cannot effectively) give up anything without understanding**. In fact such forced “giving up” will only lead to more stress. Our minds will automatically avoid more and more “bad things” as we keep learning Dhamma.
- There are few more “relatively easy to see” examples of “*assāda, ādīnava, nissaraṇa*,” even before we get to the deeper analysis in the next post.
- Craving for tasty foods is another very clear example. Most of us cannot “see” the bad consequences of overindulging in eating and as a consequence we have a obesity problem in most countries. This has resulted in many health problems for each person who is engaging in it, and also has led to increased health-care costs for all. Still many people are beginning to see the truth of “*assāda, ādīnava, nissaraṇa*” of overeating.
- Heavy drinking, use of drugs, association with bad friends, are more such relatively “easy to see” examples.

12. However, we can systematically understand the “root causes” for ALL such problems by using the guidelines provided by the Buddha. Once we understand the actual root causes, at least some of us can think through and avoid not only such “mundane problems”, but start seeing even more long-term benefits: It is the same line of reasoning that eventually leads to the four stages of *Nibbāna*.

- Thus even though Buddha Dhamma is focused on “eliminating the long-term suffering”, it can also help reduce some of the “short-term suffering” too.
- As a clear example of this, one can always examine the health of Buddhist monks. On average they are much more healthier than the “householders” in any of the Buddhist countries. They do not smoke and do not overeat.
- And one can clearly see their “joy in heart” and the calmness of their minds even though they have very few possessions and do not seek gratification in many sense pleasures that others value so highly.

13. This last point is worth thinking about some more. If one thinks deep enough, one can see that even some common “sense pleasures” are not that different from the pleasure one gets by inhaling a drug. They give a highly enjoyable “burst of pleasure”, but inevitably lead to bad outcomes even short term. One can get a hangover with a bad headache due to excess drinking, and in the case of overeating one can feel the “discomfort” right away.

- We seek such sense pleasures because we don’t realize the value of just having a calm, peaceful state of mind. One does not understand the value of a “neutral mind” (which is called *upekkhā*), unless one can

experience it. It is like getting rid of a headache that one had for a long time. We do not realize the “incessant stress” that is with us, until we reduce it.

- Our minds are constantly under stress seeking sense pleasures. That is what we all had been doing in countless previous births too. That is why it is hard to recognize any negative consequences.

14. In the *Sambhodhi Vagga* of the *Āṅguttara Nikāya*, there are several *suttā* on *assāda*, *ādīnava*, *nissaraṇa*. The “[WebLink: suttacentral: Pubbeva Sambodha Sutta \(AN 3.103\)](#)” provides a succinct statement on what they are:

“..ko nu kho loke *assādo*, ko *ādīnavo*, kiṃ *nissaraṇan*’ti? Tassa mayhaṃ, bhikkhave, etadahosi: ‘yaṃ kho lokam paṭicca uppajjati sukhaṃ somanassaṃ, ayaṃ loke *assādo*. Yaṃ loko anicco dukkha vipariṇāmadhammo, ayaṃ loke *ādīnavo*. Yo loke chandarāgavinayo chandarāgappahānaṃ, idaṃ loke *nissaraṇan*’ti...”

Translated: “..What are *assāda*, *ādīnava*, and *nissaraṇa* in this world? If one gets attached (*paṭicca*) to *sukha/somanassa* that is *assāda*. That gives rise to *dhamma* (which are the seeds for future suffering, because these are really “*kamma* seeds”) with *anicca*, *dukkha*, and *viparināma* nature, and that is called *ādīnava*. Arising of such *dhamma* can be stopped by constraining the tendency to indulge in sense pleasures (*chandarāgavinayo*), and thus getting rid of craving for sense pleasures (*chandarāgappahānaṃ*)...”

- It is to be noted that *sukha* is “bodily pleasure” and *somanassa* is “mind pleasure.” We will discuss this highly condensed verse in the upcoming posts.
- In that *sutta* the Buddha says that he was unable to attain the *Buddhahood* until he realized the need to see the dangers in sense attachments, and to work diligently to get rid of such cravings for sense pleasures.
- It is important to note that *dhammā* are really *kamma* seeds that lead to future *vipāka*; see, “[What are rūpa? – Dhamma are rūpa too!](#)” and “[What are Dhamma? – A Deeper Analysis.](#)”

12. There are many other *suttā* that discuss these three key concepts. In particular, “[WebLink: suttacentral: Assada Sutta \(AN 6.112\)](#)” is notable since it ties *assāda diṭṭhi* to *anicca saññā*:

“‘Tayo me, bhikkhave, dhammā. Katame tayo? *Assādadiṭṭhi*, *attānudiṭṭhi*, *micchādiṭṭhi*. Ime kho, bhikkhave, tayo dhammā. Imesaṃ kho, bhikkhave, tiṇṇaṃ dhammānaṃ pahānāya tayo dhammā bhāvetabbā. Katame tayo? *Assādadiṭṭhiyā pahānāya anicca saññā bhāvetabbā*, *attānudiṭṭhiyā pahānāya anattasaññā bhāvetabbā*, *micchādiṭṭhiyā pahānāya sammādiṭṭhi bhāvetabbā*. Imesaṃ kho, bhikkhave, tiṇṇaṃ dhammānaṃ pahānāya ime tayo dhammā bhāvetabbā”ti.”

- Or, contemplation of *anicca saññā* leads to the removal of *assāda diṭṭhi*.
- This is because the mind-made pleasures (*assāda*) are based on the wrong perception of *nicca saññā*, i.e., that those sense experiences are real and fruitful.

6.4.11. How Perceived Pleasures (Assāda) lead to Dukkha

2

March 11, 2016; revised October 31, 2017; February 10, 2020

1. The essence of the Buddha Dhamma is that what we PERCEIVE to be enjoyment (*assāda*) is actually the CAUSE of FUTURE SUFFERING; that is called *ādīnava* (or dangers) of *assāda*. **But that understanding comes in stages.** This is a subtle point to understand, and requires some cleansing of the mind to “see.” Grasping the essence of Buddha Dhamma requires a concentrated mind.

- At a minimum, one should read these posts when the mind is calm. That will make a huge difference in comprehending Dhamma. Most people (especially those who come to this site) are not “immoral”, but the state of mind can change. Even an excited mind cannot grasp deep Dhamma. I discussed this in a few of my very first posts two years ago; see, for example, “[The Importance of Purifying the Mind.](#)”

- This is why I highly recommend everyone to read the first several posts in the meditation section starting with “[1. Introduction to Buddhist Meditation.](#)”
 - Most people new to Buddha Dhamma (Buddhism), start at the wrong place: “Do I really need to give up all these sense pleasures?.” The answer is no. One will **voluntarily** give up things **that one will be convinced to be dangerous or at least unfruitful.** *Nirāmisā sukha* comes from this understanding.
2. The key here is to understand that “*bhava*” and “*jāti*” are according to one’s *gati*. That is because “*bhava*” arises via “*upādāna*” and *upādāna* means what one likes or enjoys; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda”.](#)”
- *Bhava* means “potential to bring about existence” and that existence is according what one craves for (*upādāna*), **not what one wishes for.** *Upādāna* means things that one is **AUTOMATICALLY attracted to.** At least the initial reaction is automatic, and that is what counts at the *cuti-paṭisandhi* moment; see below.
 - If one craves for sensual pleasures in the *kāma loka*, then it is hard to avoid a *bhava* and *jāti* in the *kāma loka*.
 - More importantly, if one is seeking sense pleasures and is willing to do things that can be done only with “animal *gati*,” “*pretha gati*,” “*asura gati*,” or “*niraya gati*,” then no matter how much one wishes, one cannot avoid birth in those realms.
 - **One cannot fool one’s mind.** One has to see the dangers in the lowest four realms to cultivate the desire and drive to be free of them.
3. The four lowest realms are collectively called the “*apāyā*.” Those who are destined to go to *apāya* have “*dugati*.” The word “*dugati*” comes from “*du*” + “*gati*” or immoral habits (character).
- On the other hand, those who have moral character have “*sugati*,” which means good (“*su*”) *gati*.
 - Sometimes the *apāyā* themselves are also called *dugati*, and the higher realms are called *sugati*.
 - **A given person could have both *sugati* as well as *dugati*. One becomes the *Sotāpanna* when the possibility for *dugati* to surface (i.e., *anusaya*) is permanently removed.**
4. It is hard to see the true *anicca* nature of the higher realms, i.e., in *sugati* (for example in the *deva* realm), until one is free of the lowest four realms. Most of us perceive *deva* realms to be full of happiness. Until one’s mind is purified to at least the level of a *Sotāpanna* it is hard to comprehend the futility of a birth in the *deva* realms.
- But the animal and human realms have enough visible suffering for us to be motivated.
 - One cannot even imagine to comprehend the *anicca* nature of *rūpa loka* or *arūpa loka* until one is free of *kāma loka*, including the *deva loka*.
 - This is why COMPREHENDING Dhamma **at each level** is the essential. It is a step-by-step process.
5. In the *Dhamma Cakka Pavattana Sutta*, the Buddha described three rounds of bondage (*tiprivattaya*); see, “[Dhammacakkappavattana Sutta.](#)” Getting through those three walls is done via four stages of *Nibbāna* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*).
- At each stage, one gains wisdom (*ñāṇa*) to “see further”, i.e., the *anicca* nature of higher realms. Thus one has to make progress systematically. This process is analogous to the following example. Let us visualize a person wearing glasses that have been covered with four layers of a dark, but see-through, film. One could see through a single layer of the film, but when all four layers are on, one is virtually blind.
 - A normal human without exposure to pure Dhamma is like a person wearing those glasses covered with all four layers. He/she could just barely see the immediate surroundings, but not much else. Such a person would only be concerned with the immediate surrounding, and will not be able to see any dangers existing not too far away.

6. When exposed to Buddha Dhamma for the first time, it is like bringing in more light. Even with the dark glasses, one can see a bit more clearly, and that is enough for most people to get interested and learn more.

- When one learns about the various aspects of Dhamma, one can see evidence that there is a much bigger hidden world out there, and at some point one could comprehend the dangers of rebirth in the *apāyā*. That stage can be compared to one layer of those dark films coming off. It is the attainment of the *Sotāpanna* stage. **This is a big step since *pañcanīvaraṇa* (those five factors that cover the mind) are permanently removed.**
- Now, one can see much better, and thus has the ability to start comprehending the dangers of the higher realms in the *kāma loka*, i.e., the human realm and the *deva* realms. First one comprehends the dangers of sense pleasures associated with the human realm and when that happens one attains the *Sakadāgāmī* stage (one will never again be born in the human realm), and the second film comes off.
- In two more stages (*Anāgāmī* and *Arahant*), the remaining two films come off and one will be able to clearly see the true nature of this world only at the *Arahant* stage.
- Thus, it is useless to try to grasp everything at once or to try to give up “normal” sense pleasures forcefully. However, it is imperative to give up those extreme (immoral) behaviors (*gati*) to be free from *dugati* (*apāyā*).

7. The main problem is that some people go to extremes in seeking sense pleasures. They are willing to steal, lie, and even commit murder to acquire wealth, status, or titles. All those are perceived to lead to higher sense pleasures.

- But in doing so, one will be cultivating *gati* suitable for rebirth in the *apāyā*, i.e., *dugati*.
- One may enjoy such sense pleasures for maximum of 100 years or so. But when one is born in the *apāyā* it is very difficult to get out. One could be trapped there for billions of years to come. This is the danger that many do not see.
- This is the difference a Buddha makes. In the absence of a Buddha in the world, humans are unaware of the existence of these other 29 realms, and in particular, the four lowest realms.

8. **Those *akusala kamma* that makes one to be eligible to be born in the *apāyā* have a special name: *pāpa kamma*.** I guess the closest English translation would be “*akusala kamma* of the worst kinds.”

- As I have discussed in a previous post, there is a huge difference between *lobha* and *rāga*, *dosa* and *paṭigha*, and *moha* and *avijjā*: “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- *Pāpa kamma* are done with *lobha*, *dosa*, and *moha*, the stronger versions of greed, hate, and ignorance.
- When one attains the *Sotāpanna* stage one is left with the milder versions of *rāga*, *paṭigha*, and *avijjā*. It basically means a *Sotāpanna* still likes to enjoy sense pleasures, but not at the expense of others.
- A *Sotāpanna* is inherently incapable of doing anything that normally would qualify one to be born in the *apāyā*. Even under extreme pressure, a *Sotāpanna* would not be compelled to such *pāpa kamma*.

9. I have done analyses to show that such *pāpa kamma* are done because one has *micchā diṭṭhi*. When one has *micchā diṭṭhi*, one has the hidden ability (*anusaya*) to generate “*diṭṭhi sampayutta citta*” and those are strongest of the 8 *lobha citta*; see, for example, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).”

- Thus it is very important to understand what *micchā diṭṭhi* is. One can use the Search box to find many relevant posts, but here is a simple explanation: “[Wrong Views \(Micchā Ditthi\) – A Simpler Analysis](#).”

10. Another issue to think about is which factor dominates the determination of the next *bhava* and thus *jathi* (birth): ***kamma vipāka* (seeds) from the past OR one's *gati* right now.**

- We all have done both highly meritorious deeds and highly immoral deeds in the past. Those cannot be eliminated easily. But the critical point is that unless one “willingly grasp” any one of those *kamma* seeds at the *cuti-paṭisandhi* moment at the end of the current *bhava*, those *kamma* seeds cannot bring about a new *bhava*.
- When one attains the *Sotāpanna* stage, one permanently loses “*gati* suitable for the *apāyā*,” i.e., one loses “*upādāna*” for *bhava* in the lowest four realms. Thus even though we may have potent *kamma* seeds for such *bhava*, they CANNOT be grasped at the *cuti-paṭisandhi* moment.
- At the *Arahant* stage, one loses “*upādāna*” for *bhava* in all 31 realms, even though he/she may have even an uncountable number of *kamma* seeds from the past.
- This is why Aṅgulimāla, who killed 999 people, was able to attain the *Arahanthood* within 7 days. He lost craving for rebirth anywhere in the 31 realms. See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma.](#)”
- We just need to get rid of *gathi* suitable to be reborn in the lowest four realms to become a *Sotāpanna*. That is the critical and first step.

11. To repeat: Avoiding immoral behavior and actively engaging in moral behavior is not only for the prevention of creating bad *kamma* seeds or for creating good *kamma* seeds, but for changing our bad *gati*.

- The more critical end result we are looking for is to change our mindset, our *gati*. That starts with first getting rid of *dugati*. For most people, it is easy to see the dangers of the *apāyā*.
- When we lose *dugati* suitable for rebirth in the *apāyā*, we will not grasp such a *bhava* at the *cuti-paṭisandhi* moment.
- Until we lose both kinds of *gati* at the *Arahant* stage, we NEED TO cultivate *sugati* so that we will grasp only such a “good *bhava*” at the *cuti-paṭisandhi* moment.

12. Once one gets rid of *dugati*, one advances to the next stage automatically. It is hard to see the bad consequences of “*kāma gati*” (sense pleasures that keep one bound to *kāma loka*), until one is free of the “*apāya gati*” or *dugati*.

- In the same way, it is hard to see the *anicca* nature of “*rūpa* and *arūpa loka gati*” (*jhānic* pleasures that keep one bound to *rūpa* and *arūpa loka*), until one is free of the “*kāma gati*.”
- This is why it is totally useless to meditate on things like “there is no self” or “there is no ‘me’.” The feeling of a self (or more correctly the *saṃyojana* of “*māna*”) is removed only at the *Arahant* stage, which is infinitely far away compared to losing *dugati*.
- The perception of a “self” is going to be there as long as one craves for at least a trace of anything in the 31 realms. This is another point that needs a lot of contemplation. The critical point to understand is that it is unfruitful/dangerous to commit immoral actions to enjoy *assāda* or “mind-made pleasures.”

6.4.11. **Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha**

3

November 9, 2017; revised September 3, 2019; October 5, 2019

Introduction

1. It is essential to understand the meaning of each term. The “defilement level” increases in the given order from *kāma* to *kāmacchanda*.

- Pronunciation of the terms: [WebLink: Pronunciation of kāma guna to kāmacchanda](#)

2. In *kāma loka*, we experience **five types of physical sense inputs**: pictures (*rūpa rūpa*), sounds, smells, tastes, and body touches. There are inherent “qualities” for each of these called “*kāma guṇa*.” Those are

common to all of us in *kāma loka*. They also depend on “*bhava*” and thus differ from humans to each type of animal; see below.

[*kāma* : may denote: 1. subjective sensuality, ‘sense-desire’; 2. objective sensuality, the five sense-objects.]

kāma-guṇa : ‘characteristics {cords (or strands)} of sensuality’.]

- For example, all of us experience the sourness of lemon or sweetness of sugar (there may be defects in some people due to *kamma vipāka*).
- We all experience the unpleasantness of thunder or the pleasantness of music.
- While there could be minor differences, all humans experience the same basic “qualities” or “*kāma guṇa*” through the five physical senses. **Even when one becomes an *Arahant*, that will not change.**

Realms in *Kāma Loka* and Two *Brahma Lokā*

3. The 31 realms naturally exist to provide different levels of *kamma vipāka* according to the (*abhi*) *saṅkhāra* done in previous lives (mainly in the human realm).

- The lowest four realms in *kāma loka* (*apāyā*) have conditions that induce excessive suffering. Higher two realms in *kāma loka* have *rūpa rūpa*, *sadda*, *gandha*, *rasa*, and *pottabba* that provide increasingly higher levels of “pleasures.”
- The *rūpavācāra brahma* realms have *rūpavācāra jhānic* pleasures; those *brahmā* had given up *kāma rāga* and had cultivated *rūpavācāra jhāna* in previous human lives.
- Those in *arūpavācāra brahma* realms had given up both *kāma rāga* and *rūpa rāga*, and had cultivated *arūpavācāra jhāna* in previous human lives.
- That is why *kāma guṇa* is absent in both *rūpavācāra* and *arūpavācāra brahma* realms. Those who are born in those realms had given up sense pleasures for *jhānic* pleasures.

What Are *Kāma Guṇa*?

4. Therefore, there are pleasing things in our *kāma loka* (human realm) that naturally arise to provide sense pleasures. That is because “human *bhava*” is a “good *bhava*.” Even more sensory pleasures are naturally available in deva realms.

- **Thus, as humans, we are naturally exposed to those “*kāma guṇa*.”** We are naturally “exposed to” sense objects that are “pleasing” to the five physical senses. Of course, *deva* are exposed to even stronger *kāma guṇa*.
- Thus, if one has not comprehended the *Tilakkhaṇa* **then it is natural to attach to such “pleasurable things.”** One perceives that things in this world — especially those things with *kāma guṇa* — can provide long-term happiness. But in reality, such cravings lead to suffering because those “pleasures” are not sustainable. Furthermore, those things with *kāma guṇa* motivate people to immoral deeds to get access to them.

Kāma Rāga – Attachment to *Kāma Guṇa* via *Saṅkappa Rāga*

5. Now, if a person gets attached to those sensory inputs with *kāma guṇa*, and **starts generating sensual thoughts** (i.e. *vacī saṅkhāra*) that leads to “*kāma*” or *kāma rāga*. Generating sensual thoughts is also called *saṅkappa rāga* (creating *saṅkappa* that lead to *saṃsāric* journey). A *sutta* reference is in #15 below.

- Engaging in *saṅkappa rāga* (i.e., thinking greedy thoughts about such sense pleasures) means generating *vacī saṅkhāra*. That is then likely to lead to *kāya saṅkhāra*, too (start engaging in related physical activities.)

- That can happen to any average human. It can happen to a lesser extent to a *Sotāpanna*. That next step of **intentionally** generating sensual thoughts happens with ***kāma rāga***. That will again reduce at the *Sakadāgāmi* stage and stopped only at the *Anāgāmi* stage. [*kāma-rāga* : ‘sensuous lust’, one of the ten fetters (*saṃyojana*, q.v.)]
- The removal of ***kāma rāga*** cannot be forced. ***Kāma rāga*** will naturally reduce when cultivating ***Ānāpāna*** and ***Satipaṭṭhāna***.

6. An *Anāgāmi* has removed *kāma rāga*, but still has *kāma*, i.e., likes them somewhat.

- However, *kāma* of an *Anāgāmi* is not strong enough to lead to rebirth in the *kāma loka*. In other words, an *Anāgāmi* will not generate *abhisankhāra* (strong *sankhāra*) for things with *kāma guṇa* (for example would have no desire to engage in sex).
- In the *Abhidhammic* language, an *Anāgāmi* has removed four greed-based *cittā* associated with wrong views. There are still “four greed-based *cittā* dissociated with wrong views” left. But they have lost much of the potency to move from *kāma* to *kāma rāga* level; see #3 of, “[Akusala Citta and Akusala Vipāka Citta.](#)”
- It is only at the *Arahant* stage that *kāma* is absent completely.

Kāmacchanda* – Being Blinded by *Kāma Rāga

7. If not willfully controlled, *kāma rāga* can intensify to a point where one is capable of committing immoral deeds (hurting others or oneself.) One starts losing control when *kāma rāga* **elevates** to the ***kāmacchanda*** level, the highest. [*kāmacchanda* : ‘sensuous desire’, one of the 5 hindrances (*nīvaraṇa*, q.v.); attachment to sensual pleasure.]

- That can happen to anyone below the *Sotāpanna* stage, i.e., one can be “blinded” by *kāma*, resulting in *kāmacchanda* (“*kāma*” + “*icca*” + “*andha*,” where *icca* is liking, and *andha* is blind, and thus “blinded by the craving for *kāma*”).
- **Whether an average human will generate *kāma*, *kāma rāga*, or *kāmacchanda* depends on the strength of the sensory input and also on prevalent conditions.** For example, if one’s mindset becomes degraded due to alcohol consumption, and one sees an attractive woman in an isolated setting, things could get out-of-control with *kāmacchanda*.

Kāmacchanda* Leads to Rebirth in the *Apāyā

8. Immoral actions done with *kāmacchanda* could lead to rebirth in the *apāyā*.

- Only *kāma rāga* — not *kāmacchanda* — can be arise in a *Sotāpanna*. Thus he/she is released from the *apāyā*, but not from *kāma loka*. A *Sotāpanna* is incapable of committing an “*apāyagāmi* deed” in order to satisfy any kind of sensory pleasure.
- I hope you get the basic idea. The above reasoning applies to any of the five physical sense inputs.

Some Examples for Clarification

9. We can clarify with some examples. Sugar has a “*kāma guṇa*” of sweetness for humans; that holds for everyone from an average person to an *Arahant*.

- A beautiful woman will be seen as such by anyone from an average person to an *Arahant*.
- An average person may generate *kāma* to *kāmacchanda* for that woman.
- A *Sotāpanna* may generate *kāma* to *kāma rāga*.
- An *Anāgāmi* may generate just *kāma*. But there is no “*kāma rāga anusaya*” left in him to go beyond that.

- But an *Arahant* will not generate *kāma* either.
10. The sight of such a woman is a *kamma vipāka*. For anyone (from an average person to an *Arahant*), still living in the human realm will see that she is beautiful.
- If one gets “interested” one generates *kāma saṅkappa* or *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).” Then it could lead to *kāya saṅkhāra*, i.e., turn one’s head to looks at her again with *kāma rāga* or *kāmacchanda*, that is a new *kamma*.
 - A *Sotāpanna* still has “*kāma rāga anusaya*,” and that is why he/she will return to the *kāma loka*. He/she can be born as a human or *deva* in the future.
 - A *Sakadāgāmī* is in between the *Sotāpanna* and *Anāgāmī* stages. He/she will be reborn only in the *deva* realms.
 - Of course, an *Anāgāmī* will not be reborn anywhere in the *kāma loka*. since there is no *kāma rāga* left.

Different Types of *Kāma Guṇa* for Different Existences

11. Anyone born in the human realm will have similar “*kāma guṇa*” because they had cultivated corresponding “human *saṅkhāra*.” We all like same things, and any variations we do have are due the variations in those main *saṅkhāra* types.

- **However**, “*kāma guṇa*” of animals can be much more different compared to humans. There are also many variations among animals.
- Pigs eat very unpleasing things, including feces. Tigers or lions like to eat raw meat. Cows don’t like meat but like grass. The variations are quite apparent. Again those correspond to ***saṅkhāra that they had cultivated as humans***. Furthermore, each *bhava* (and *jāti*) corresponds to such *saṅkhāra* via *paṭicca samuppāda*. Some of you may be able to see that, but we will discuss this later.
- In *brahma* realms, things with *kāma guṇa* are absent. They were born in those realms because they had preferred and cultivated *jhānic* pleasures, instead of craving for sensual pleasures.

12. In that regard, we just keep in mind for now that (*abhi*)*saṅkhāra* generated by humans have high *javana* power, and thus lead to various “*bhava*” and *jāti*. **Animals cannot generate such *citta* with high *javana* power because of their unfortunate birth. That is an important point.** Animals just pay for past *kamma* until that *kammic* power is exhausted; see, “[Javana of a Citta – The Root of Mental Power](#).”

- Even most *devas* enjoy their *kāma* and “go with the flow,” and enjoy them (while they can.) *Brahmā* too enjoy *jhānic* pleasures that come with their birth.
- It is only those *devas/brahmā* that had become at least *Sotāpanna* that would be motivated to strive for *magga phala*.

Only *abhisāṅkhāra* Lead to Future Rebirths

13. Therefore, it is mostly humans who can cultivate *abhisāṅkhāra* (of both types) and thus make conditions for future “good births or bad births.” That is a critical point in the *Agganna Sutta*.

- All the animals that we see were humans in the beginning. Those with “bad *gathi*” that had been generated via “bad *abhisāṅkhāra*” in their deep past, were reborn as various types of animals as the Earth evolved, and conditions for animal life appeared.
- An introduction to *Aggañña Sutta* is at “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

Five Kinds of *Kāma Guṇa*

14. Now let us briefly discuss a key *sutta* that is relevant. The “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)” lists the five *kāma guṇa*:

“..Pañcime, bhikkhave, kāmaguṇā—cakkhaviññeyyā rūpā iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā, sotaviññeyyā saddā ... ghānaviññeyyā gandhā ... jivhāviññeyyā rasā ... kāyaviññeyyā phoṭṭhabbā iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā. Api ca kho, bhikkhave, **nete kāmā kāmaguṇā**..”

Translated: “..*Bhikkhus*, there are five types with characteristics of sensuality (*kāma guṇa*). Which five? **Forms** are cognizable via the eye—agreeable, pleasing, charming, likable, desire-inducing, enticing. **Sounds** are cognizable via the ear. **Aromas** are cognizable via the nose. **Flavors** are cognizable via the tongue. **Body sensations** are cognizable via the body—agreeable, pleasing, charming, likable, desire-inducing, enticing. But, *Bhikkhus*, **these are not sensuality (kāma)**..”

- I have translated “*guṇa*” as “characteristics,” but “qualities” would work too.

Kāma Different From Kāma Guṇa

15. Then the next verse of the *sutta* says **what kāma is**: “*Sañkappa rāgo purisassa kāmo, Nete kāmā yāni citrāni loke*..”

Translated: “a person’s *kāma* is getting attached and thinking about (*sañkappa rāga*) those pleasing things in this world (*citrāni loke*).” Those beautiful things are not *kāma*.” Here, “*citrāni loke*” means “a world full of delightful things.”

To emphasize: There are many pleasing, desire-inducing, enticing things in the *kāma loka*. Just experiencing them is not *kāma*. One who has understood the real nature does not get attached to them. But those who do not yet understand the real *anicca* nature of things in the *kāma loka*, value them highly. They crave them, and get a satisfaction (*kāma assāda*) by thinking about them (generating *kāma sañkappa* or *vacī sañkhāra*); that is *kāma*.

- It is essential to realize that conscious thinking or “talking to oneself” is *vacī sañkhāra*; see, “[Correct Meaning of Vacī Sañkhāra](#).” Thus, one who does that has *sañkappa rāga*.
- Such *vacī sañkhāra* can then lead to *kāya sañkhāra*, whereby one takes actions to fulfill such desires (if one has *kāma rāga anusaya*).
- Some people go one step further and commit *akusala kamma* to fulfill such desires (then it becomes *kāmacchanda*).

Sañkappa Rāga Is kāma

16. Therefore, anyone in the *kāma loka* will experience *kāma guṇa*. It is a natural outcome of being in the *kāma loka*. It is the tendency to think about them on a regular basis and enjoy that with *sañkappa rāga* that elevates to *kāma*. A higher level of *kāma* is *kāma rāga*.

- And giving up that craving comes only with an understanding of the true nature (the *anicca, dukkha, anatta* nature), i.e., realize that they have adverse consequences; see, “[How Perceived Pleasures \(Assāda\) lead to Dukkha](#).” and “[Assāda, Ādīnava, Nissarana – Introduction](#).”
- Getting to the *Sotāpanna* stage means one has understood the dangers of *kāma assāda*. As long as one has cravings for them, one would still have them. However, a *Sotāpanna* will never do an immoral act to gain those sense pleasures.
- For a *Sotāpanna* to be free from such *kāma assāda*, he/she needs to contemplate the dangers (*ādīnava*) of *kāma assāda* as we discussed in the above two posts. That is the “*asubha bhāvanā*.” [*asubha* means unfruitful, detrimental]

What Is Asubha Bhāvanā?

17. Many people misinterpret the *asubha bhāvanā* as to contemplate on disgusting things like rotting dead bodies. **That is entirely wrong; such meditations only lead to *paṭigha* or “friction of the mind.”**

- Instead, one needs to contemplate on the fact that **the cause of future suffering is getting attached to those pleasing sensual things.** One needs to see the unfruitful (*asubha*) nature of those things with *kāma gūṇa*. Real *asubha* (detrimental) things are those eye-pleasing, ear-pleasing, ...body-pleasing things in this *kāma loka*. See, “[How Perceived Pleasures \(Assāda\) lead to Dukkha.](#)”
- Therefore, it is not even possible to do the *asubha bhāvanā* correctly until one gets to the *Sotāpanna* stage. It is only then one begins to see the dangers **in craving for sense pleasures.**
- However, it is always good to cut down on sense pleasures, even while striving for the *Sotāpanna* stage. It makes one's mind calm and susceptible to grasp more profound concepts.
- Extreme sense pleasures are a burden to the mind. It is possible to avoid those right now; see, “[Satipatthāna Sutta – Relevance to Suffering in This Life.](#)” Doing everything in moderation naturally leads to a simpler, healthier, and peaceful life.

6.4.11. Vedanā (Feelings) Arise in Two Ways

4

Revised September 4, 2016; Revised February 9, 2017; October 17, 2017; November 5, 2018; May 5, 2020 (Same at [Vedanā \(Feelings\) Arise in Two Ways @ The Five Aggregates \(Pañcakkhandha\)](#))

Introduction

1. The word *vedanā* comes from (“*vē*” + “*danā*”) which means “වෙදනා” in Sinhala. That means to “become aware.” When an *ārammaṇa* comes to the mind (via any of the six senses,) we become aware of it.

***Vedanā* can arise in two ways:**

1. One type of *vedanā* is a consequence of a previous *kamma* or previous defiled action, i.e., a ***kamma vipāka***. That *kamma* could have been done many lives ago.
2. For example, when one gets a “pleasant feeling” while eating a piece of cake offered by the friend, that is a *vipāka vedanā*. Then, if we start thinking about how to eat that cake in the future, with such thinking, we generate “pleasant feelings” about such future experiences. Those are “mind-made” or *samphassa-jā-vedanā* associated with greedy thoughts.

Further details on the two types of *vedanā* can be found at, “[Vipāka Vedanā and “Samphassa-jā-Vedanā” in a Sensory Event.](#)” But let us discuss them briefly below.

Vedanā* Arising from *Kamma Vipāka

2. *Vedanā* (feelings) due to *kamma vipāka* are **three kinds** : *Sukha vedanā* (pleasant or joyful feeling), *dukha vedanā* (unpleasant or painful feeling), and *adhukkhamasukha* (without being painful or joyful, just neutral. The word *adhukkhamasukha* is a combination of *adukkhamā* and *asukhā*.)

- **Those three types of *vedanā* are felt only by the body (*kāya*). All *vedanā* initially coming through other five sense faculties are neutral.**
- *Kamma vipāka* leading to *sukha vedanā* and *dukha vedanā* happen to everyone, including *Arahants*. While everyone can live mindfully (taking necessary precautions) to avoid some of such *dukha vedanā*, others are too strong to be able to avoid.
- For example, the Buddha himself had physical ailments later in his life as *kamma vipāka*. *Moggallāna Thero* was beaten to death because of a bad *kamma* that he did many lives before.

3. However, *kamma vipāka* are not certain to happen. Some can be reduced in power (see, “[Kamma, Debt, and Meditation](#).”) Many *vipāka* can be reduced in strength with time if one starts acting with mindfulness.

- Many can be avoided by preventing conditions for them to arise. That means acting with *yoniso manasikāra* or just common sense. For example, going out at night in a bad neighborhood is providing fertile ground for past bad *kamma vipāka* to appear. Many *kamma vipāka* CANNOT take place unless the conditions are right. See, “[Anantara and Samanantara Paccayā](#).”
- We all have done innumerable *kamma* (both good and bad) in past lives. If we act with common sense, we can suppress bad *kamma vipāka* and make conditions for good *vipāka* to arise.
- Also see the discussion on *kamma bīja* in, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”
- Now let us look at the second type of *vedanā*.

***Vedanā* Arising from *saṅkhāra* (“*Samphassa-jā-vedanā*”)**

4. These are the *vedanā* (feelings) that we generate on our own. These are the *vedanā* that do not arise in an *Arahant*.

- Based on *vipāka vedanā*, we may generate more types of “mind-made” *vedanā* called *somanassa* and *domanassa vedanā* as we discuss below.
- In #2 above, we saw that *vipāka vedanā* are felt only by the body (*kāya*.)
- Some of the *vedanā* coming through the other senses feel as “pleasant” or “unpleasant” NOT because of *kamma vipāka*, but due to another reason. Those are associated with each realm and are “*kāma guṇa*.” See, “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).” For example, all humans taste sugar to be sweet. But some people get addicted to eating sweets full of sugar. That second category is “mind-made.”
- We may generate “*samphassa-jā-vedanā*” starting with initial *vedanā* due to both mentioned above. But most *samphassa-jā-vedanā* have *kāma guṇa* as the cause.

Some Examples of *Samphassa-jā-Vedanā*

5. These *samphassa-jā-vedanā* arise due to attachment via greed or hate, at that moment (i.e., due to one’s *gati*); see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

These are the *vedanā* (feelings) that *Arahants* do not feel. Since they do not have any “bad *gati*,” they do not commit any (*abhi*)*saṅkhāra*, an *Arahant* avoids any kind of feeling arising from *saṅkhāra*. The easiest way to explain this kind of *vedanā* is to give some examples:

- Three people are walking down the street. One has an ultra-right political bias (A), the second has an ultra-left preference (B), and the third is an *Arahant* who does not have special feelings for anyone (C). They all see a famous politician hated by the political right coming their way. **It is a given that the sight of the politician causes A to have displeasure and B to have a pleasurable feeling.** On the other hand, sight does not cause the *Arahant* to generate any pleasure or displeasure. **Even though all three see and identify the person**, they produce different types of feelings. *It is essential to realize that the feelings were created in A and B by themselves.*
- Two friends go looking for treasure and find a gem. Both are overjoyed. It seems quite valuable and one person kills the other so that he can get all the money. Yet when he tries to sell the “gem,” he finds out that it was not that valuable. His joy turns to sorrow in an instant. *Nothing had changed in the object. It was the same piece of colored rock. What has changed was the perception of it.*
- What could happen if an *Arahant* found the same gem lying on the road? (He would not have gone looking for one.) He might think of donating it to a worthy cause.

Another Example of Samphassa-jā-Vedanā

6. A loving couple had lived for many years without any problems and were happy to be together. However, the husband slaps his wife during an argument (this is a *kamma vipāka*). The physical pain from the slap itself did not last more than a few minutes. But for how long the wife would suffer mentally? Those feelings arise due to *saṅkhāra*, i.e., sadness and hate. Even the husband, who did not feel any physical pain, would suffer for days if he really loved his wife. *In both cases, the real mental pain was associated with the attachment to each other.* The wife could have dropped something on her foot and would have suffered about the same amount of physical pain. But she would not have had any lingering mental pain associated with that.

- In all the above cases, the initial sense contact was due to a *kamma vipāka*. **No *kamma* energy was generated at that instant.** However, based on that initial contact, we tend to pursue it with our mind and thus may start generating *kamma* automatically. See, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna.](#)”

Samphassa-jā-Vedanā Arise Due to Taṇhā

7. Thus it is clear that in all the above examples, the “extra” happiness or suffering (other than due to *kamma vipāka*) arose from **within one’s own mind.** And *taṇhā* (attachment via greed or hate) was the cause of it. See, “[Taṇhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

- When we generate such “mind-made *vedanā*,” we also do *kamma* (via *abhisāṅkhāra*) that will bring more suffering in the future.
- The Buddha pointed out that when he described *dukkha* in the *Dhammacakka Pavattana Sutta*. See, “[Essence of Buddhism – In the First Sutta.](#)”

8. Thus all these feelings arise due to *taṇhā*, some form of attachment: greed (craving, liking) or hate (dislike); all these are due to *mano/vacī/kāya saṅkhāra*. *The feelings (or rather, the perceptions that give rise to feelings) reside INSIDE oneself. It does not come from outside.* We use external things to CAUSE happiness or suffering by our own volition.

- There is no inherent suffering or happiness in ANYTHING external; the sense contact with an external thing CAUSES pain or happiness depending on our *gati* and *āsavā*. An *Arahant*, who has removed all *āsavā*, will be free of such emotional responses.

Connection to Paṭicca Samuppāda

9. It is also clear how the accumulation of *saṅkhāra* via *Paṭicca Samuppāda* leads to such varied feelings: If we attach to something with a “like” or a “dislike,” we generate a mindset accordingly. That is *Paṭicca Samuppāda* (*pati + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – Introduction](#)”).

- If we attached to something with “greed”, we act with that “greedy mindset.” We will be happy if we get what we wanted. If we got “attached” to something with anger, we would have an “angry mindset” and would be happy if we remove whatever caused that anger.
- In either case, the strength of the feeling is also proportional to the strength of the “like” or “dislike”: *Sama uppāda or Samuppāda means both in quality and quantity*; the higher the strength of “*pati + iccha*”, the higher the strength in “*sama + uppāda*”.
- This is how we form habits (“*gati*”) too. A teenager drinking alcohol with a bunch of friends gets attached to that setting and looks forward to having the same experience again. The more he repeats that activity, the more he gets “bonded”, and thus forms a drinking habit. See, “[Habits and Goals](#)” and “[Samsāric Habits and Āsavā.](#)”

The sequel to this post is at, “[Feelings: Sukha, Dukha, Somanassa, and Domanassa.](#)”

A deeper discussion on *vedanā* at: [“Does Bodily Pain Arise Only Due to Kamma Vipāka?”](#), [“How Are Paticca Samuppāda Cycles Initiated?”](#), and [“Avyākata Paticca Samuppāda for Vipāka Viññāna.”](#)

6.4.11. Feelings: Sukha, Dukha, Somanassa, and Domanassa

5

December 11, 2015; Revised November 19, 2018

In this post, we will discuss an important classification of *vedanā* based on whether they arise due to *kamma vipāka* or our defiled thoughts (*saṅkhāra*).

1. This is a sequel to the previous post, [“Vedanā \(Feelings\) Arise in Two Ways,”](#) where we discussed how feelings arise due to *kamma vipāka* and also due to *mano saṅkhāra*.

- As discussed in several posts, we can avoid certain *kamma vipāka* from actually taking place by not making suitable conditions for them to appear, but some strong ones are hard to avoid; see, [“What is Kamma? – Is Everything Determined by Kamma?”](#)
- However, feelings (both good and bad) that arise due to *saṅkhāra* are totally avoidable, and *Arahants* are completely free of them. We discussed this in the previous post.
- Now let us discuss in detail **what types of feelings** arise due to those two causes.

2. First, let us discuss the feelings that we feel in **our physical bodies**.

- They include *sukha vedanā* such as bodily comforts one feels sleeping in a luxurious bed, eating tasty food, smelling nice odors, seeing something attractive, etc. They arise via the five physical senses.
- Then there are *dukha vedanā* that are again brought in via the five physical senses: injuries to the body, headaches, eating something untasteful, smelling a bad odor, hearing to an ear-piercing sound, etc.
- **Both those types of *vedanā* are due to *kamma vipāka*, and *Arahants* feel them too.** *Sukha vedanā* arise due to *kusala kamma vipāka* (past good deeds) and *dukha vedanā* arise due to *akusala kamma vipāka* (past bad deeds).
- **These *sukha* and *dukha vedanā* mainly exist in the *kāma loka*, where the dense bodies of the beings are sufficiently dense to impart them.** In fact, it is mainly in the lower five realms (including the human realm, that *dukha vedanā* exists as *kamma vipāka*. However, the worst types of *dukha vedanā* are in the lowest four realms (*apāyā*), and that is why a *Sotāpanna* is said to have overcome the worst of the suffering forever.
- In the *deva lokas*, it is mainly the *sukha vedanā* that results due to good *kamma vipāka*. That is why a *Sakadāgāmi* is never born at or below the human realm, and is said to become “healthy forever.”
- In the *rūpa loka* and *arūpa loka*, beings mainly have *jhānic* pleasures. Thus an *Anāgāmi*, who will never be reborn in the *kāma loka*, is said to become “peaceful forever.”

3. Some *vipāka vedanā* felt by the body are neutral. **Furthermore, all *vipāka vedanā* coming through the other four physical senses are also neutral:** *adhukkhamā asukha* (without being painful or joyful, just neutral) *vedanā*, which are commonly called *upekkha vedanā*.

- It is important to note that these *adhukkhamā asukha* or *upekkha vedanā* are the true reality of experience. *Vedanā* comes from (“ve” + “danā”) which means “*veema danaveema*” (වීම දැකීම) in Sinhala. Basically, when we sense something via our six senses, we **become aware** that something happened, i.e., seeing a picture, hearing a sound, etc.; that is *vedanā*.
- For example, seeing a person X only leads to an *upekkha vedanā* for ANYONE initially.

4. However, within a fraction of a second of that seeing event, it COULD LEAD TO pleasant (*somanassa*) or unpleasant (*domanassa*) feelings DEPENDING ON WHO IS SEEING X. Person X’s wife or child will

generate *somanassa vedanā* upon seeing X. However, an enemy of X will generate *domanassa vedanā* upon seeing X.

- On the other hand, a total stranger (or an *Arahant*) will not generate either *somanassa* or *domanassa vedanā* upon seeing X, and that is the true reality, as mentioned in #3 above.
- Thus both *somanassa* and *domanassa vedanā* are MIND MADE, and arise due to *mano saṅkhāra*. And those *saṅkhāra* are generated based on one's own *gathi* and *āsavas*.
- In another example, if two people who are strong supporters of two opposing political parties see the leader of one political party, one will generate *somanassa vedanā* and the other will generate *domanassa vedanā* upon seeing that politician. **Thus, those feelings could not have resided with the politician, but arose entirely due to the *gathi* of those two people.**
- An *Arahant* will not generate either kind, because there is no attachment (or repulsion) to anything or anyone for an *Arahant*.
- This is a very important point that one could do insight meditation on.

5. We also know that both *sukha* and *dukha vedanā* can LEAD TO *somanassa* and *domanassa vedanā* too. For example, When one gets a headache due to a *kamma vipāka*, one could be agonizing over how long that will last, whether that will prevent one from going to a party next day, etc. Those are *domanassa vedanā* due to that initial *dukha vedanā* from the headache.

- On the other side, when one eats a tasty piece of cake (good *vipāka vedanā*), one could be start thinking about buying more of that cake and enjoying it later; that gives rise to *somanassa vedanā*.
- Both the *domanassa vedanā* and the *somanassa vedanā* in the above two examples are totally mind-made, i.e., due to *saṅkhāra*.

6. Therefore, based on the three types of *vedanā* (*sukha vedanā*, *dukha vedanā*, and *upekkha vedanā*) that arise due to *kamma vipāka*, ADDITIONAL two types of *vedanā* (*somanassa* and *domanassa vedanā*) COULD arise depending on the *āsava* and *gathi* of the person experiencing them.

- Those feelings that we feel IN THIS LIFE due to *saṅkhāra* are MOSTLY two kinds: *somanassa vedanā* and *domanassa vedanā*. Those *saṅkhāra* also make *bhava* (via thoughts, speech and actions) and those give rise to *kamma vipāka* mostly in future lives but also in this life itself as we discuss below in #11.
- Thus rebirths are also generated via (*abhi*)*saṅkhāra* and that is how the cycle of rebirths is maintained. That is why it is called *saṃsāra* (“*san*” + “*sāra*,” where “*sāra*” means “good”), i.e., one perceives that it is good to keep doing *saṅkhāra* (“*san*” + “*kāra*”, where “*kāra*” or “*kriya*” is action).

7. This is why *Dukkha Sacca* (First Noble Truth) does not mean that we can ELIMINATE the *dukha vedanā* arising in our present physical body; those are due to *kamma vipāka* (the causes were already done).

- However, by gradually reducing *saṅkhāra* (with increased understanding of Buddha Dhamma), we can stop making new *saṅkhāra* and thus eliminate FUTURE suffering. This is the key to *dukkha sacca*. These *saṅkhāra* are also called *assāda* (*āsvāda* in Sinhala); see, “[Assāda, Ādinava, Nissarana](#).”

8. Still, we can reduce bad consequences from past *kamma vipāka* using what are called “strategies” (“*upakrama*”) in Buddha Dhamma.

- One is to be mindful and not to let conditions for past *kamma vipāka* to take place. This is discussed in, “[What Is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccaya](#).”
- If the *kamma vipāka* has already started imparting its effects (say, someone finds out that one has cancer), then one can work to alleviate that condition by using another related “strategy”: One can get medical help and adopt a lifestyle that is opposes the spreading of the cancer. Even here what we are doing is to overcome this bad condition by making suitable environment for “opposing good *kamma*”

vipāka” to bear fruit. Thus, if one does not make an effort, the bad *kamma vipāka* will run its course and one may die in short time.

9. Each living being’s body is designed to impart appropriate good and bad *kamma vipāka* suitable for the *kamma* seed that gave rise to that particular life.

- For example, an animal cannot implement “strategies” (“*upakrama*”) to overcome most of its *kamma vipāka*. For example, it is unable to do anything about a wound (other than licking it) or to think about dragging its cot to a sunny spot (our dog likes to be in the sun but we have to move her cot!).
- Some animals have built-in defenses for their survival, but they cannot make them any better. For example, some birds instinctively know how to build a nest, but that “nest design” has not been improved by them over millions of years. And baby turtles “know” the way to the ocean and start trotting in the right direction minutes after their hatching; see, “[How Character \(Gathi\) Leads to Bhava and Jathi.](#)”
- Animals also are unable to do strong good or bad *kamma*. Even though most animals kill other animals, that is not done with greed or hate, but just for survival. It is just like the instinct for the birds to build nests or the baby turtles to head in the right direction to the sea. In *Abhidhamma* language, they generate mostly, “*upekkha saḥagata citta*” and those have much less *javana* power.
- Thus, animals cannot accumulate much good or bad *kamma*. Otherwise, they will never be able to escape that “*bhava*,” since most survive by killing other animals. In the same way, whenever they get a “good life” (say as a human)— which is very rare — that is due to a good *kamma vipāka* done in a previous “good life.”
- But not all animals are the same. Those “higher up” animals like monkeys can accumulate *kamma* than “lower ones” such as worms, and cats and dogs are somewhere in between.

10. The potency of human *saṅkhāra* comes from the ability of humans to generate both “*somanassa saḥagata citta*” (thoughts with joy) for *kusala kamma* and *akusala kamma*. The *javana* power of those *citta* are very high.

- Thus when one is doing a good deed with joy, that brings much more merits compared to someone who is doing it just because others are doing it, i.e., with an “*upekkha saḥagata citta*”; see, “[A Simple Way to Enhance Merits \(Kusala\) and Decrease Demerits \(Akusala\).](#)”
- Even more strong *javana* arise when a good deed is done with knowledge that it will lead to good results and why, i.e., one knows right from wrong.
- **But the most potent *javana* arise when a good deed is done with understanding of the *anicca* nature, i.e., when one does it with “*somanassa saḥagata ñāṇa sampayutta citta*.” Thus, *paññā* (or *ñāṇa*) comes from an understanding that is deeper than just knowing right from wrong.**
- It works the other way around for bad deeds: the most potent *javana* (with high *kammic* power that can lead to rebirth in the *apāyā*) are generated with “*somanassa saḥagata diṭṭhi sampayutta citta*,” i.e., thoughts with joy and **wrong vision**. A good example is someone who commits murder and enjoys and it is done with the *diṭṭhi* that such an action cannot bring bad consequences.
- But when one commits murder due to anger that is done with aversion and displeasure: “*domanassa saḥagata paṭigha sampayutta citta*”; see, “[Akusala Citta and Akusala Vipāka Citta.](#)”

11. Now let us consider the consequences of *saṅkhāra* in this life, that we mentioned in #6 above. Suppose a teenager starts associating with bad friends and start drinking alcohol. Initially, he does not even like the taste of it, i.e., he may be generating a *domanassa vedanā* due to the taste of alcohol. But with the insistence of those friends he continues drinking.

- Then he makes a habit (*gathi*) of it, begins to perceive the taste as a *somanassa vedanā*, and starts making *saṅkhāra* about drinking. Even while in the middle of some other task, he starts thinking about the next party where he can drink, and what types of drinks there will be and so on.

- Now “*saṅkhāra paccayā viññāṇa*” step in the *paṭicca samuppāda* leads to making a “new *viññāṇa* for drinking.” The more he thinks about such parties and generate those *somanassa vedanā*, the more *viññāṇa*, *nama rūpa*, etc that he makes for such “drinking events.”
- And the stronger that “*viññāṇa* for drinking” gets, the more he will be thinking about it (making more *saṅkhāra*). Then the habit is strengthened; see, “[How Habits are Formed and Broken – A Scientific View.](#)”

12. Mind phenomena are complex. But with the background that we have accumulated, we can figure out some of the causes and possible effects. There is no need to memorize all these different terms; they will be carved into the memory as one contemplates and sorts out one's own experiences.

To summarize: *Sukha* and *dukkha vedanā* arise due to *kamma vipāka*. *Somanassa* and *domanassa vedanā* arise due to *saṅkhāra*, which in turn arise due to our *gathi* and *āsavas*. The more *saṅkhāra* we do, the stronger a given *gathi* (habit) becomes, which in turn become *āsavas* (cravings) and fuel the *sansāric* journey (rebirth process). This vicious cycle can be broken only through comprehending the *anicca* nature of this world.

6.4.11. What is “Kāma”? It is not Just Sex

6

Revised October 31, 2017; revised December 18, 2018 (#13, #14)

1. “*Kāma*” comes from “*kā*” meaning “eat or destroy” and “*ama*” means *Nibbāna*. In our human world, which is a part of “*kāma loka*,” temptations for staying away from *Nibbāna* come from five physical senses.

- Some people believe “*kāma*” is just about engaging in sex. Some others believe attractive sense objects are “*kāma*” objects, and those lead to defilements. Both are not quite correct.
- While “attractive sense objects” can lead to “*kāma assāda*,” the objects themselves don't have *kāma*. An *Arahant* is not tempted by any such object. [*assāda* : [m.] mind-made pleasures {taste; enjoyment; satisfaction.}]
- While “attractive sense objects” can lead to “*kāma assāda*” or “mind-made pleasures”, the objects themselves don't have *kāma*. An *Arahant* is not tempted by any such object.
- “*Kāma assāda*” or “sensual pleasures” are ASSOCIATED WITH our experiences through any of the five physical senses. But as we will see below, the Buddha specifically taught that “*kāma*” is a “made up pleasure.”
- The lowest 11 realms are collectively called “*kāma loka*” because all such made up pleasures are available through all five physical senses in those realms.

2. We experience those external sense inputs in two ways:

- **We experience them directly:** For example, we see a person; hear a song; taste a piece of cake; smell a fragrance; someone we love gives a kiss. Those are actual sense contacts and are due to *kamma vipāka*.
- You may be surprised, but most of our “sense pleasures” or “*kāma assāda*” are created by our minds. A sense contact comes and goes away relatively quickly; but we keep thinking about it, sometimes for hours. **This “*kāma assāda*” is the one that we CREATE IN OUR MINDS, via *saṅkhāra*.**
- For example, we may just see an attractive item in a store display that provides a sensory pleasure while we are looking at it may be for a few seconds.
- But then we start thinking about how nice it would be to be able to buy it, enjoy it, and analyze how to go about paying for it, etc. We may be thinking about it for several days. Please take the time and contemplate on this. The initial sense contact of several minutes led to hours of thinking about it and making up “additional pleasure.” That is *kāma assāda*.

3. In the “[WebLink: suttacentral: Na Santi Sutta \(SN 1.34\)](#),” the Buddha defined “*kāma*” as that second kind mentioned above: “*Na te kāmā yāni citrāni loke, Saṅkapparāgo purisassa kāmo...*”

Translated: “World’s pretty things are not *kāma*, a person creates his/her own *kāma* by generating mind-made pleasures (*rāga sankalpanā*)...”

- Buddha said that this world has many attractive pictures, sounds, tastes, smells, and touches. But those are not “*kāma*.” The initial sense experience could be pleasant, but it is a *kamma vipāka* (no *saṅkhāra* generated in the initial sense input).
- When one attaches to such a sensory experience and **keep thinking about them**, one makes “*saṅkappa rāga*” (සංකප්ප රාග in Sinhala) about it (by generating *vacī* and *kāya saṅkhāra*), that is “*kāma*.” Each person generates his/her own *kāma* based on his/her *gathi* or *samsāric* habits/cravings.

4. Let us discuss what is meant by “*saṅkappa rāga*”: *Sankappa* or *saṅkappa* means thoughts. *Rāga* means the craving for pleasures in *samsāra*; see, “[Lobha, Rāga and Kāmacchanda, Kāmarāga](#).”

- Thus “*saṅkappa rāga*” means thinking about such sense pleasures and giving priority to them. We tend to think for hours about an actual sense experience that we enjoyed in the past or one that we are about to experience in the future.
- Sometimes we also think for hours about how to enjoy a certain sense experience that seems out of reach for various reasons. In all these cases, we can spend hours and hours thinking about them and getting *kāma assāda* (or “*āsvāda*” in Sinhala) from it.
- In fact, most times sexual enjoyment comes from just thinking about a past experience or an anticipated one. The actual contact pleasure is relatively short-lived.

5. As we pointed out in #2 above, **some actual sense contacts** arise due to *kamma vipāka* (good *kamma vipāka* lead to good sense experiences, and bad lead to bad). Actual sense contacts are relatively short-lived. Even the tastiest food, we can eat so much. Even if it is the most luxurious chair, you cannot sit there for too long. You can think about all types of sense experiences and they are relatively short-lived.

- Even an *Arahant* experiences such sense experiences due to *kamma vipāka*, both good and bad. He/she may eat tasty food when offered, ride in a luxurious car, or see eye-catching pictures while on the road.
- But he/she will not spend anytime afterwards thinking about such sense experiences, i.e., there is no “*saṅkappa rāga*.”

6. It is relatively easy to distinguish between sense pleasures due to *kamma vipāka* and those due to *kāma assāda*.

- When one is offered a tasty meal, for example, that is due to a previous good *kamma*, i.e., it is a *kamma vipāka*. But when one starts thinking how good that meal was and start thinking about how to enjoy another such meal, that is *kāma assāda*.
- In the same way, one may be born to a wealthy family and get all types of luxurious sense contacts, those are *kamma vipāka*.
- Whether rich or poor, when one is thinking about acquiring and enjoying new sense pleasures or reminiscing on past sense pleasures, that is *kāma assāda*.

7. Now we have two questions.

A. Why is it OK to experience direct sense pleasures that **naturally comes** one’s way, but not good to enjoy “made-up mental pleasures” by thinking about them? (It is important to realize that even those direct sense pleasures INITIATED by oneself do not count as harmless; when we think about it a bit, we realize that such instances have their beginnings at “*saṅkappa rāga*,” i.e., one must have thought about to initiate it).

B. How can one experience an enjoyable sense pleasure and not be “tempted by it”, i.e., not make “*saṅkappa rāga*”?

8. The answers to those two questions can be found in one explanation. But that requires analyzing the situation from a different vantage point than we are used to. This is the “Dhamma that has never been known to the world..” or “*pubbe ananussutesu Dhammesu...*”

- The *akusala-mūla paṭicca samuppāda* cycle starts with, “*avijjā paccayā saṅkhāra.*” Those “**made-up mental pleasures**” or “*kāma assāda*” are precisely what *saṅkhāra* are. These have bad consequences, or *adeenava*, through the rest of the *paṭicca samuppāda* (PS) cycle: “*saṅkhāra paccayā viññāṇa,*” “*viññāṇa paccayā nāmarūpa,*.....up to “*jāti paccayā jara, marana, soka, parideva,*.....” Thus the end point is suffering.
- When we experience a “direct sense contact” that naturally comes our way, that is not *saṅkhāra* or *kāma assāda*. That is a *kamma vipāka*. They do not lead to future suffering.
- This is a critical point to understand and is explained in detail in “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa.](#)” Please read those again and make sure you understand the difference. If it is not clear, please let me know.

9. Now let us consider some examples to understand how even a sense-contact due to *kamma vipāka* can lead to “*kāma assāda.*” In a given day, we are bombarded with millions of sensory inputs. But not all of them “grab our attention”, and make us start thinking about them; more specifically, to start thinking about “getting more of it” of “how to acquire it so that it can be enjoyed at will.”

- Why do certain sense inputs attract our attention more than others? A given sense input may tempt one person, but may not affect another at all. For example, one person may like heavy metal music, but another may be annoyed by it. We can think about many cases like that.
- But each person can be tempted by a set of sensory inputs that he/she has a liking for. For two people, these sets may overlap to some extent but there will be differences. That is because the *āsava/anusaya* (or cravings) for each person is unique. They can change for a given person, but they define one’s character at any given time. One can change one’s *āsava/anusaya* by changing one’s habits or “*gathi.*” You can do a search on “*āsava, anusaya, gathi, habits*” and read the relevant posts.

10. The more *āsava/anusaya* one has, it is more likely that one’s mind will be pulled in many different ways. This is the key reason for the scatteredness of our minds. Such a mind can be burdensome. This is called *tāpa* or “heat in the mind”; see, “[Satipattana Sutta – Relevance to Suffering in This Life.](#)”

- The *āsava/anusaya* can be compared to dirt at the bottom of a glass of water. If there is a lot of dirt, only a slight disturbance can make the dirt come up and make the water dirty. But if it is only a little bit, most minor disturbances may not make the water dirty.
- Just like that, the more *āsava/anusaya* one has, it will be easier to make the mind restless.
- On the other hand, if there is no dirt at the bottom of the glass, no matter what kind of disturbance it is, the water will remain pure. The mind of an *Arahant* is like that. He/she can live totally unaffected surrounded by the world’s most tempting sense objects. There will be no “*saṅkappa rāga*” or *kāma assāda*. Of course he/she will experience the good/bad *kamma vipāka* same as others.

11. Now, one could say, “well, the more such *saṅkappa rāga* that I make, it is better. I don’t mind if mind gets many such *assāda* in a given time.”

- In order to analyze that, we need to look at the *ādīnava* (bad consequences) of such *asvāda*, other than mind being pushed and pulled in many directions as we discussed in the previous bullet.
- The problem is that each time we enjoy *kāma assāda*, we do (*abhi*)*saṅkhāra*, as we saw in #8 above. They lead to future suffering via the *akusala-mūla paṭicca samuppāda* cycle. This is what we have been doing in count-less number of births up to now.

12. That future suffering can arise both in this life as well as in future lives. It can materialize at different levels depending on the “strength of the *kāma assāda*.”

- Let us start at the most extreme level. One decides that “I have to have this. I am going to do whatever it takes to get it.” With such a mindset one can kill, steal, engage in sexual misconduct, lie, or make any number of other immoral acts with a “drunken mind.”
- Of course, the bad consequences are many, even during this life. One could get caught and go to jail. Even otherwise, one will be under constant stress of worrying about being caught.
- But stronger consequences will follow in future lives as well, with interest. Thus a normal moral person can see the “*ādīnava*” in such strong *kāma assāda*.
- By contemplating on such “*ādīnava*,” it becomes easier for one’s mind to automatically reject doing such acts; this is “*nissarana*.” Through an understanding of the consequences, one avoids such acts.

13. At the next level, we may not do any of the immoral acts by body or speech, but may still accumulate *vacī saṅkhāra* via constantly thinking about them. It is important to realize that such conscious thoughts (*vitakka/vicāra*) are included in *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).”

- The problem with *vacī saṅkhāra* or *kāma assāda* is that they are addictive. One can spend hours and hours enjoying past sense events or perceived future events (especially involving sex, food, and also about one’s enemies).
- And *vacī saṅkhāra* or *kāma assāda* appear to be harmless. No one else can know about them. One could spend hours on end generating *kāma assāda* about an object of interest and derive an enjoyment. But they have consequences.
- It must also be remembered that all those *kāya saṅkhāra* and *vacī saṅkhāra* that one suppressed by one’s will power started off as *mano saṅkhāra*. Thus even though *dasa akusala* corresponding to speech and bodily actions were avoided, those due to *mano saṅkhāra* (thoughts that just come to one’s mind) and then one normally “keeps going” by generating CONSCIOUS deliberate thoughts or *vacī saṅkhāra*, which can lead to actual speech and even bodily actions.
- Thus even though *dasa akusala* corresponding to speech and bodily actions were avoided, those due to *vacī saṅkhāra* (*kāma assāda*) would still count as bad *kamma*.
- This is why keeping the conventional five precepts is not sufficient; the hard part is to purify one’s thoughts or the mind; see, “[The Five Precepts – What the Buddha Meant by Them](#).”

14. A key problem with *vacī saṅkhāra* or the *kāma assāda* is that they lead to the formation of bad habits (*gathi*), which in turn lead to the formation of new *āsava/anusaya* or in strengthening old *āsava/anusaya*; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#),” and other related posts.

- It can become a vicious circle. In a way, this is the “wheeling process” of “*riya*” that sustains the cycle of rebirths; see, “[Nibbāna – Is it Difficult to Understand?](#).”
- Even though those *vacī saṅkhāra* (*abhijjā [abhijjhā]*, *vyāpāda*, *micchā diṭṭhi*) seem to be harmless, those can lead to birth in the *apāyā*.
- When one starts controlling such conscious thoughts (*vacī saṅkhāra*), one *gati* will gradually change, and then those “automatic bad thoughts” or *mano saṅkhāra* will become less and less frequent, because one’s *āsava/anusaya* will gradually reduce.
- The best and permanent way to change *āsava/anusaya* is to comprehend *anicca*, *dukkha*, *anatta*. When one realizes that “nothing in this world can be maintained to one’s satisfaction in the long run” (*anicca*), one’s mind automatically stops thinking about such “made up pleasures.” We will discuss this more in upcoming posts.

6.4.11. Kāma Assāda Start with Phassa Paccaya Vedana or Samphassa Ja Vedana

In posts with advanced concepts I have to use to many Pāli words. There are no short phrases in English to give the same meanings for phrases like “*samphassa jā vedanā*.” Thus it will be beneficial to learn the meanings of these Pāli words and phrases, and also to be able to pronounce them if that seems to be helpful. I have included some audio files in the post, “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#).” Here is how to pronounce the Pāli words in the title of this post:

[WebLink: Listen to pronunciation of : kāma-āsvāda-phassa-paccaya-vedanā-samphassa-ja-vedanā](#)

1. In the previous post, “[What is Kāma? It is not Sex](#),” we saw that *kāma* is not sex or even attractive sense objects, ear-pleasing sound, tasty food, nice smell, or a sensual body touch as many believe. ***Kāma* is basically *vacī saṅkhāra* about sense-pleasing objects (constantly thinking about those pleasures)**, whether it is an eye-catching object, ear-pleasing sound, tasty food, nice smell, or a body touch.

- We saw that *kāma* (or *kāma assāda*) is *sankalpita rāga* which means **thinking about** such sense objects and giving priority to them. We also saw that such *kāma assāda* (or *assāda* in Sinhala) are *vacī saṅkhāra* that arise when our deep-seated *āsava/anusaya* (which are related to our habits or “*gatī*”) are triggered by certain sense inputs.
- Thus we can see that *kāma assāda*, *sankalpita rāga*, *vacī saṅkhāra* mean basically the same thing.
- **To re-emphasize: *kāma assāda* are beyond actually experiencing those sense inputs that come our way due to good *kamma vipāka*** (even though one would need to stay away from high-pleasure activities, because one could get used to them and make corresponding habits). ***Kāma assāda* are craving and thinking and planning about such sense inputs.**
- Some extreme *kāma assāda* (or at least actions and speech initiated by them) can be suppressed by understanding the bad consequences (*ādīnava*) of them.
- Without a Buddha appearing in the world, we would not even realize that even milder *kāma assāda* have bad consequences (*ādīnava*) too. Yet, they do have bad consequences as we saw in the previous post.

2. The critical point that we need to discuss now is how to prevent milder, but still harmful, *kāma assāda* from arising in our minds. We basically have to use the same tactic that was discussed both in the previous post and also in the introduction to this series, “[Assāda, Ādīnava, Nissaraṇa – Introduction](#).”

- When a mind comprehends that certain actions are harmful, it avoids such actions. As we discussed in that introductory post, the best way to quit smoking is to fully understand the bad consequences of that habit. Another is to cultivate a good habit (say, listening/reading Dhamma) instead.
- In the previous post we discussed how we avoid immoral actions via speech and bodily actions by comprehending the bad consequences of such actions.
- In other words, the primary way to effectively remove bad habits (*nissaraṇa*) is to comprehend the bad consequences (*ādīnava*) of such *kāma assāda* from arising in our minds.

3. This is where another important aspect of Buddha “previously unheard Dhamma” comes into play. This unique message is that in addition to being harmful, *kāma assāda* are unfruitful in the long run. Even though we normally value them, when analyzed with the way the Buddha taught, we can see that they are just mind-made due to our ignorance of the true nature of this world.

4. It is important to understand the big difference between *vipāka vedanā* and *kāma assāda*. We cannot stop *vipāka vedanā* from arising; but we can stop *kāma assāda* by cleansing our minds.

Kāma assāda are normally triggered by a *vipāka vedanā*. Also, *kāma assāda* are **totally made up in our minds**. Let us take a simple example to gain more insight.

- Husband and wife are walking down the street and the wife stops and looks at a beautiful painting on display in a store window. Husband looks at it, shrugs his shoulders and wants to move on. It is somewhat expensive, so she is thinking about whether they can afford it right now, but she would really like to buy it. Husband has no interest in it, and thinks that it is a waste of money to buy it.
- They both saw the same painting as a *vipāka vedanā*. That was just the “seeing event”, and as we will discuss in *Abhidhamma*, **most *vipāka vedanā* are neutral**, like seeing or hearing. **The exceptions are bodily contacts**, which can be either bodily *dukha vedanā* (like a cut or a headache) or *sukha vedanā* (like getting a massage or being in an air-conditioned room on a hot day) depending on whether it is bad or a good *vipāka*.
- Now, any “happy feeling” that was generated in the mind of the wife would have been due to *kāma assāda*. Such a “happy feeling” was not generated in the mind of the husband. This is an important point. **The “happy feeling” that was generated in the wife could not have been a property of the painting**; if so, it should have given the same “happy feeling” to the husband!

5. Thus in the above particular case, only the wife started enjoying *kāma assāda* due to seeing the portrait. In other words, a *pavutti kusala-mūla paṭicca samuppāda* cycle operated only for the wife; it was triggered by her deep-seated craving (*assāda/anusaya*) for such an object, which made her act with *avijjā*.

- We could also state the same process by saying that “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” was followed by “*thinnan sangati phasso*” and “*phassa paccayā vedanā*”; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”
- Now she is attached and deliberately looks at the picture, “*avijjā paccayā saṅkhāra*” step started and then went through the step, “*(san)phassa paccayā vedanā*” in a fraction of second; see, “[Idappaccayatā Paṭicca Samuppāda.](#)”
- However, for the husband, who saw the same portrait, there was no *assāda/anusaya* for such an object to “attach to it” and to act with *avijjā* and to initiate those processes; also see, “[“Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?](#).”
- For some, this may be crystal clear but those who are not very familiar with the concepts may want to review those relevant posts.

6. Now that she is “attached” to the portrait, the wife keep looking at it for a while, which will lead to numerous such *pavutti akusala-mūla paṭicca samuppāda* cycles. Not only that, she will be enjoying “*kāma assāda*” about that picture even after they left that place by thinking back about it. Now she has made a “*vīññāṇa*” and a “*bhava*” for it.

- That “*kāma assāda*” can resurface with *paṭicca samuppāda* cycles that involve only the mind when she is at home: It starts with “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*,” i.e., she just remembers the portrait while washing dishes. How does she start thinking about the portrait when she was busy with some other task?
- One way to explain that is to say that “she had ‘cultivated’ a *vīññāṇa*” for that portrait and now it can resurface sometimes even without a prompt. This is sometimes known as the “subconscious”; see, “[3. Vīññāṇa, Thoughts, and the Subconscious.](#)”
- Another way to explain it by saying that she had made a “*bhava*” for liking that portrait and it is a *dhamma* that can enter the mind when the conditions are right: “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*.” However, that particular *dhamma* or concept or thought would never make contact with the mind successfully if she was listening to a discourse or thinking about a key concept like *anicca*. Since she was doing a task that did not motivate her much (washing dishes) that is an opportunity for such “subconscious *vīññāṇa*” to come to the surface.

7. Of course, now that “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*” step will be followed by, “*thinnan san gati phasso*” and “*(san)phassa paccayā vedanā*”; see, “[Difference between Phassa and](#)

Samphassa. Her “*gati*” for liking such pictures will make her mind “*samphassa*,” which in turn will lead to “*samphassa paccayā vedanā*” or “*samphassa jā vedanā*.”

- This is a *vedanā* that her husband will not get. He did not make a “*viññāṇa*” or a “*bhava*” for that portrait and thus it will not come to his mind.

8. Now, suppose that a week later they are walking by the same store. The wife remembers the portrait, but finds that it is no longer there; someone had bought it. Now, think about what happens to the two of them.

- The wife will be distraught: “I should have bought it; now I may not be able to find such a nice portrait.” But the husband will not have any bad feelings, except may be some bad feelings about his wife not been able to get what she wanted.
- **This is the suffering that we can stop from arising even in this life.** It is not a *vipāka vedanā*, but a “*samphassa jā vedanā*.” The wife got distraught only because she got attached to that portrait, but the husband did not.

9. I just gave a very simple example from real life. Of course it is a relatively insignificant “*taṇhā*” without drastic consequences. I just wanted to use it, because most people can understand it. Of course the consequences can be much harsher if one gets attached to something of more significant, keep thinking about it and make that “*viññāṇa* grow”, and eventually does something bad to acquire it.

- a) For example, X who “falls in love” with Y, may be thinking about it all day and make a “very strong greedy *viññāṇa*” about X. So, X makes all kinds of plans in his/her mind about Y, and the more he/she does it, the more strong that *viññāṇa* gets.
- b) The more strong that *viññāṇa* is it is more likely to “come to his/her mind” because it is a *dhamma* that is constantly hovering around his/her mind (or in the subconscious). It is easy to start more PS process with “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*.”

10. Note the difference between a) and b) above. In a), the process starts with “*avijjā paccayā saṅkhāra*” when X first thinks about Y and starts thinking about Y with *avijjā* and gets “bonded to Y” in his/her mind. At this point, a “baby *viññāṇa*” is formed about Y.

- Now, since it is at an early stage, this “baby *viññāṇa* for Y” may not trigger “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” (process b) often. And that *viññāṇa* may start dying out if X does not get to think about Y for a while.
- But if X sees Y again in a few days, then that “baby *viññāṇa* for Y” gets fed again. The sight of Y makes X to go through many PS cycles and strengthen that “*viññāṇa* for Y.”
- If X gets to see Y often and may be even to “hang out with Y”, that “*viññāṇa* for Y” will grow because now X is giving it a lot of food (*āhāra*).
- Now with a “strong *viññāṇa* for Y”, X’s mind will be constantly being with “*dhamma* about Y” and it is more likely that “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*” will be triggered even while X is doing something else.

11. Then one day, X hears that Y has got engaged to another person. What will happen to X? He/she will be highly distraught, and depending on the level of attraction (and X’s *gati*), X may do something bad.

- For example, if the attraction (level of *taṇhā*) was very strong, AND if X has “violent character” (i.e., “violent *gati*”), then X may hurt Y or the person that Y got engaged to. **Then not only will X be suffering due to “loss of Y”, but would also have made causes for FUTURE SUFFERING by committing a bad *kamma*.**

12. Now we can see how both *taṇhā* and *gati* are two critical issues. Both those can be lessened by contemplating on the bad consequences (*ādīnava*) of acting foolishly.

- And that can be done on a permanent basis by comprehending *anicca*, *dukkha*, *anatta*. Then one’s *gati* will change permanently to the “moral *gati*” of a *Sotāpanna*, and one will never do anything that will lead to the birth in the *apāyā*. Even though a *Sotāpanna* may still generate “*samphassa jā vedanā*,” due to some sense inputs, those will be milder and thus any suffering incurred would be mild.
- I hope that it is clear from this discussion that it is impossible to forcibly suppress *kāma assāda* or thoughts about sense objects. The only way it can be done is via purifying the mind by learning Dhamma (especially *anicca* nature of this world) and thinking about the bad consequences of such thoughts (*ādīnava*). This is what the Buddha realized as the *āsavakkhaya ñāṇa*, the way to get rid of *āsava* (and *anusaya*) via getting rid of bad habits (*gati*) and cultivating good habits (*gati*).
- And this is discussed in the meditation (*bhāvanā*) section under, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

6.4.12 Sakkāya Diṭṭhi is Personality (Me) View?

March 10, 2017; revised January 20, 2018; June 1, 2019; October 3, 2019; July 24, 2020

In this post, we will discuss why interpretations of two key concepts — *sakkāya diṭṭhi* and *saṃyojana* — in many current English publications (including supposedly *Theravāda* texts) are incorrect.

Difference Between Wrong Views and Wrong Perceptions

1. Most texts describe *sakkāya diṭṭhi* as “self-illusion” or “personality belief,” i.e., “belief that a self or I exist” (you can Google “*sakkāya diṭṭhi*” and see). **Here it is essential to understand that there is a difference between “wrong view” and “wrong perception.”** A *Sotāpanna* would have removed the wrong view (*diṭṭhi*), but not the false perception (*saññā*.)

- But this **perception** (*saññā*) of a “self” (or a “soul” which is also called “*ātma*”) is NOT *sakkāya diṭṭhi* per *Tipiṭaka* as we discuss below. That is a *saññā* (perception) that we have carried from life-to-life. For a discussion on *saññā*, see, “[What is Saññā \(Perception\)?](#).”
- The deeply-embedded idea of a “self” or an innate sense of “me” is rooted in the *māna cetasika*.
- If one gets offended if treated with disrespect, that means one still has *māna* left. Even an *Anāgāmī* could be somewhat perturbed if he/she perceives to be treated badly. A component of *māna* — called *asmi māna* — is still left at the *Anāgāmī* stage. *Māna* is removed not at the *Sotāpanna* stage, but the *Arahant* stage.

A Sotāpanna Removes Only Wrong Views About an “Unchanging Self”

2. What is removed at the *Sotāpanna* stage is the **wrong view** (*diṭṭhi*) that there is something unchanging and permanent like a “soul” is associated with oneself. That goes with the belief that lasting happiness can be achieved by just living a moral life (even though that is essential.)

- When one can see that there is no “real essence” (like a “soul” or a “*ātma*”) associated with a living being, this **wrong view** of *sakkāya diṭṭhi* goes away. A life-stream evolves, according to *Paṭicca Samuppāda*; see, “[Anattā in Anattalakkhaṇa Sutta – No Soul or a Ātma](#).”
- Therefore, it is incorrect to believe that the **perception** of a “self” will go away at the *Sotāpanna* stage. It is also dangerous, because one is trying to do something that is **not possible** to do at that stage. It is like a child in the primary school trying to get a Ph.D.

Sotāpanna Stage – Four Conditions

3. In the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#),” we discussed the four conditions that need to be satisfied to attain the *Sotāpanna* stage of *Nibbāna*.

- With fulfilling those conditions, one will break through *three saṃyojana* (mental bonds) and be permanently released from rebirths in the *apāyā* (four lowest realms). The Pāli word *saṃyojana* (or *sanyojana* or *sanyoga*) is usually translated as “fetters.” See, for example, the Wikipedia article: [“WebLink: WIKIPEDIA: Fetter \(Buddhism\).”](#)
 - But as in many English publications (books, internet posts), the above Wikipedia article misdescribes *saṃyojana*.
4. **We are bound to the 31 realms in this world by ten “mental tethers” or *saṃyojana*.** It can be visualized as someone attached to a post by a rope, except that there is no one else that forcibly bind us to the 31 realms.
- *Sanyojana* or *sanyoga* (“*san*” + “*yoga*” where “*yoga*” means to bind) means bound via “*san*”; see, [“What is “San”? Meaning of Sansāra \(or Samsāra\).”](#)
 - We voluntarily bind ourselves to this world with our minds, because we believe that somewhere in these 31 realms we can find permanent happiness.
 - **Most people think they can find happiness in this life itself!** They don’t even pause to contemplate what happens when one gets old and helpless. If one takes time to observe, there are many examples around: famous, wealthy, and powerful, became disabled at old age, and died a miserable death.

Three *Saṃyojana* Removed

5. A *Sotāpanna* breaks through 3 of those ten *saṃyojana* — or “bonds” or “tethers” — and gets permanently released from the four lowest realms (*apāyā*). He/she does this by comprehending the true nature of this world, i.e., attaining *sammā diṭṭhi*.

The keyword “*sammā*” comes from “*san*” + “*mā*,” which means “to become free of *san*.” For example:

- “*Mā hoti jāti, jāti,*” means “may I be free of repeated birth.”
- “*Mā me bāla samāgamo*” means “may I be free of association with those who are ignorant of Dhamma.”
- Thus *sammā diṭṭhi* is to be free of wrong views. One gets some level of *sammā diṭṭhi* at the *Sotāpanna* stage and completes it at the *Arahant* stage.

Importance of Comprehending the Unfruitful/Dangerous Nature of This World (*Tilakkhaṇa*)

6. **One has to break those bonds in one’s mind.** One gains *sammā diṭṭhi* — right view to become free of ‘*san*’ — by comprehending the true nature of this world of 31 realms.

Anicca – that nothing in this world can bring permanent happiness in the long run.

Dukkha – despite our struggles, we will be subjected to much more suffering than pleasures if we remain in the rebirth process.

Anatta – therefore, one is truly helpless in this struggle to attain “something of the essence in this world.” That is just an illusion.

- See, [“*Anicca, Dukkha, Anatta – Wrong Interpretations.*”](#)

Two Eightfold Paths

7. It is essential to realize that there are two Eightfold Paths with two types of *sammā diṭṭhi*. See, [“*Buddha Dhamma – In a Chart*”](#) and [“*Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\).*”](#)

- One first needs to reach a “moral mindset” by staying away from immoral acts embedded in the five precepts. That is attaining “**mundane sammā diṭṭhi**.”
- Then one’s mind is cleansed enough to comprehend the Three Characteristics of this world: *anicca*, *dukkha*, *anatta*.
- When one gains this “**lokuttara sammā diṭṭhi**” to some extent, one will indeed start on the Noble Eightfold Path; see, “[How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta.](#)”
- This distinction is hard to perceive for many people. I encourage them to read the first few subsections of the “[Living Dhamma](#)” section.

8. Now let us discuss how gaining *lokuttara sammā diṭṭhi* leads to the removal of three of the ten mental tethers (or fetters) that bind us to the rebirth process. In particular, to be released from the worst types of suffering in the *apāyā*.

- Those three *saṃyojana* are *sakkāya diṭṭhi* (also called *sathkāya diṭṭhi*), *vicikicchā*, and *silabbata parāmāsa*.

Two Prevailing Major Wrong Views

9. The Buddha discussed 62 types of *diṭṭhi* that were present during that time in the *Brahmajāla Sutta*. We don’t need to address all of them today, because there are only two of those wrong views that are prevalent today.

- Religious people (Creator-based religions), believe that there is a “permanent soul,” and one will be born in heaven or hell forever after this life. This idea of a “*āthma*” or a “self” was the *sassata diṭṭhi*.
- Science today believes that our thoughts arise in our brains, i.e., our mental body is the same as the physical body (“I am my body”). So, when we die, that is the end of the story because the physical body becomes dust; so they say, “enjoy life while it lasts.” That was the “*uccheda diṭṭhi*” (pronounced “*uchcheda*”) that the Buddha also rejected: “Life terminating with the death of the physical body.”
- Thus the Buddha rejected both wrong views that “a self exists” and “a self does not exist.” Things can exist due to causes, and if those causes do not exist, they cease to exist. That is the principle of cause and effect explained in *Paṭicca Samuppāda*. Beings exist due to *avijjā* and *taṇhā*, and they cease to exist when those cease to exist and reach permanent happiness (i.e., attain *Nibbāna*).

10. Even those religious people may subconsciously have that part of the *uccheda diṭṭhi* of “I am my physical body.”

- Our increasingly materialistic societies always feed this narrative — that it is so important to look beautiful and robust because my body is what I am — via television and movies.
- In other words, *sakkāya diṭṭhi* in the present day is rooted in the view of “I am my physical body.” That leads to the perception, “I can achieve happiness by providing a lot of pleasurable sense inputs to my body.”

Meaning of *Sakkāya* or *Sathkāya*

11. “*Sath*” means “good” or “fruitful.”

- And *kāya* can mean either **one’s actions** or **one’s body**, as we discussed in *Kāyānupassanā*; see, “[Kāyānupassanā – Section on Postures \(Iriyapathapabba\)](#).”
- ***Sakkāya diṭṭhi* encompasses mainly two views:** (i) “I am my body,” and I need to keep it beautiful above all. (ii) I can achieve happiness by diligently pursuing (good) things in this world.
- **This view is of course related to the perception of *nicca*. That it is possible to maintain things to our liking or *icca* (or *icchā*).** See, “[Sakkāya Diṭṭhi – “Me and Mine” View](#)”

Getting Rid of *Sakkāya Diṭṭhi*

12. Therefore, getting rid of *sakkāya diṭṭhi* in the present day requires one to realize that this physical body is “just a shell” that we have possession of only for about 100 years.

- That is why it is essential to realize the role played by our mental body, *gandhabba*, which could live for thousands of years. But that also will cease to exist when we grasp a new existence (*bhava*) at the *cuti-paṭisandhi* moment when the *gandhabba* itself dies.
- Our next existence depends not on how well we keep our physical bodies (they need to be healthy), but how well we “improve” our mental body. Learning *Dhamma* and living according to that *Dhamma* helps with the latter.
- I have given a more straightforward explanation of *gandhabba* at the “Living Dhamma” section: “[Mental Body – Gandhabba](#),” and there is a separate section in the *Abhidhamma* section that goes into more detail.

13. The second view associated with *sakkāya diṭṭhi* in #10 above. That one can achieve happiness by diligently pursuing things in this world. *Sakkāya diṭṭhi* can only be removed by comprehending the “*anicca* nature.”

- See, “[Anicca, Dukkha, Anatta](#).”
- When one comprehends *anicca*, one realizes that no matter what we do, staying in the rebirth process leads to net suffering. **Even though there are bouts of happiness to be had, those will be insignificant to suffering in the long run, especially when one is (inevitably) born in the *apāyā*.**

Cūlavedalla Sutta (MN 44)

14. It should be noted that a full explanation of *sakkāya diṭṭhi* is given in the [Cūlavedalla Sutta \(Majjhima Nikāya 44\)](#) where Ven. Dhammadinna explains it to her former husband Visakha:

“..*Kathaṃ paṇāyye, sakkāyadiṭṭhi hotī*”ti? “*Idhāvuso visākha, assutavā puthujjano, ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisa-dhammassa akovido sappurisa-dhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmim vā attānaṃ. Vedanaṃ ... pe ... saññaṃ ... saṅkhāre ... viññānaṃ attato samanupassati, viññānavantaṃ vā attānaṃ, attani vā viññānaṃ, viññānasmim vā attānaṃ. Evaṃ kho, āvuso visākha, sakkāyadiṭṭhi hotī*”ti.

- First, it is essential to realize that “*atta*” in the above verse used in the conventional sense, to denote “I.”
- What we have discussed regarding “I am my body” is stated in the bold text above that can be translated as: “**I am my body, my body is me, my body is in me, I am in my body**”; see, “[Anattā in Anattalakkahana Sutta – No Soul or an Ātma](#).” Thus one may see one’s *rūpakkhandha* as one’s “*attā*” in four ways.
- In the same way, some people could take one’s *vedanā*, *saññā*, *saṅkhāra*, and *viññāna* to be oneself in four ways as above. All these mental components give rise to the idea that “I remember this and that happened to me a long time ago; so there must be a continuation of me until the body dies.” Therefore, this wrong view encompasses 20 types of (“*visativatthuka*”) *sakkāya diṭṭhi*.”
- The French Philosopher Rene Descartes famously said, “I think; therefore I am”; he proposed that those thoughts arise in the pineal gland in the brain. That is a part of *uccheda diṭṭhi*.

Two Meanings of *Atta*

15. When one attains the *Sotāpanna* stage, one “sees with wisdom” (becomes “*dassanena sampanno*”) that it does not make sense to take the stand “I am my body,” etc. as above.

- However, “just seeing” that it makes sense, and verifying and experiencing that to be accurate, are two different things. One finally confirms that to be accurate and thereby gets rid of the perception of “me” (called “*asmi māna*”) only at the *Arahant* stage.
- There was a lengthy discussion on this issue at the discussion forum. I recommend reading it since it is not possible to put it in a short post like this; see, “[WebLink: Wrong English translations of Anicca, Anatta, Sakkāya ditthi.](#)”

16. The confusion in conventional translations of *sakkāya ditthi* seems to arise when they try to connect “*atta*” in the above verse (“*rūpaṃ attāto*”) as the opposite of “*anatta*” in *Tilakkhaṇa*. **Atta has two meanings**: one meaning is “I” or “myself” as in “*Atta Hi Attano Nātho*” (“only I can be of salvation to myself”), and that is the meaning implied in the above verse.

- The other meaning of “*atta*” is “in control” or “has an essence”, and the opposite of that is the *anatta* in *Tilakkhaṇa*: “one is helpless in this rebirth process.”
- Those two meanings are explained in “[Attā Hi Attano Nātho](#)” and in detail in, “[Pāli Dictionaries – Are They Reliable?](#).”
- That is why one needs to be cautious when using Pāli dictionaries. **One cannot define and fix the meaning of a Pāli word.** One HAS TO KNOW the context; see, “[Pāli Dictionaries – Are They Reliable?](#).”

What is *Vicikicchā*?

17. The second *saṃyojana* removed at the *Sotāpanna* stage is *vicikicchā*. Does it mean doubts about the Buddha, Dhamma, and Saṅgha as explained in many translations? It is informative to see how such doubts are related to the *Tilakkhaṇa*.

- *Vicikicchā* comes from *vi+chi+ki+icchā*. Our distorted views (*ditthi*) that worldly things can lead to happiness lead to our liking (“*iccā*”) for them. We then take actions (“*ki*” or “*kriyā*”) are based on our craving. And, “*Cha*” means *citta* or the way we think, here based on such *ditthi*. In this case, “*vi*” means “distorted” (වැකුණ in Sinhala.) **Therefore, to engage in actions (and thoughts) based on the wrong view that it is possible to maintain things to our liking is *vicikicchā*.** See, #11 above.
- Therefore, *vicikicchā* goes away simultaneously with the loss of *sakkāya ditthi*.
- **One dissociates from such wrong views by comprehending “*anicca nature*.”** When one becomes a *Sotāpanna*, one automatically sees the “fruitlessness” in many immoral or inappropriate actions. One truly knows deep down that most of our efforts in pursuing sense pleasures are in vain. However, until one becomes an *Anāgāmī*, one is still attached to sense desires.
- For example, a *Sotāpanna* may still engage in sex, but will not engage in immoral sexual activities outside marriage. While the first can still lead to one’s rebirth in the human and *deva* realms, the latter can lead to births in the *apāyā*. A *Sotāpanna* is released only from the *apāyā*.
- In other words, if one has *vicikicchā*, one MAY do immoral *apāyagāmī* actions under tempting conditions. But a *Sotāpanna* is INCAPABLE of doing such actions under ANY circumstance. A *Sotāpanna* will not have any doubts about which activities are really immoral.

What is *Silabbata Parāmāsa*?

18. The third *saṃyojana*, *silabbata parāmāsa*, is the wrong view that *Nibbāna* can be attained by following specific precepts/rituals. They include five or eight precepts (or just by doing good things).

- Attaining *Nibbāna* REQUIRES *lokuttara sammā ditthi*. To achieve *lokuttara sammā ditthi*, one needs to grasp the *Tilakkhaṇa* (*anicca, dukkha, anatta*). See, “[Anicca, Dukkha, Anatta.](#)”

- When one comprehends *anicca*, one stays away from immoral actions. That happens not because one is firmly adhering to a set of precepts or rituals. Now one knows deep inside that such activities are fruitless and dangerous in the long run.
- However, following precepts (i.e., staying away from immoral deeds) is necessary to get to mundane *sammā diṭṭhi*. That enables one's mind cleansed enough to be able to comprehend *Tilakkhaṇa*.

***Kāma Rāga* NOT Removed at *Sotāpanna* Stage**

19. Finally, a *Sotāpanna* needs to break two more *saṃyojana* or bonds — *kāma rāga* and *paṭigha* — to become free of the *kāma loka*. Only an *Anāgāmī* is free of rebirth anywhere in the *kāma loka*, which includes human and six *deva* realms.

- The last five *saṃyojana* (including the perception of a “self” or *māna*) will be removed only at the *Arahant* stage; see, “[The Cooling Down Process \(Nibbāna\) – How Root Causes are Removed.](#)”

July 24, 2020: A detailed discussion at “[The Five Aggregates \(Pañcakkhandha\)](#)” and “[Origin of Life.](#)”

6.4.13 **Akusala Citta – How a *Sotāpanna* Avoids *Apāyagāmi Citta***

1. First I need to clarify the title. Of course, *citta* (pronounced “chittha”) are thoughts. All *kamma* start as *mano saṅkhāra*, i.e., one starts thinking about something and it escalates into speech and bodily action by the “wheeling” or “*riya*” process; see, “[Nibbāna – Stopping of the Sansāric Vehicle.](#)”

- The complete cessation of doing *saṅkhāra* happens only when one becomes an *Arahant*. But after attaining the *Sotāpanna* stage, this “wheeling process” stops for certain types of initial thoughts or *citta*.

2. We have seen that *apāya* is a common word for the lowest four realms of existence, see, “[The Grand Unified Theory of Dhamma.](#)” *Apāyagāmi* (“*apāya*” + “*gāmi*” means directed towards) *citta* are those that lead to potent *kamma* responsible for rebirth in the lowest four realms.

3. So, what *cittā* or thoughts gets one started on the “wheeling process” or a “thought process” that leads to speech or bodily action of very bad consequences, i.e., birth in the *apāyā*? These are thoughts that arise because one does not have a full understanding of the “nature of this world”, i.e., the *Tilakkhaṇa*, or *anicca*, *dukkha*, *anatta*.

Out of the 89 possible *citta* (see, “[The 89 Types of Citta](#)”) 12 are immoral *citta*:

- 8 with the *lobha* (greed) root; *moha* root is there too.
- 2 with the *dosa* (hate, ill will) root; *moha* root is there too.
- 2 with just the *moha* (ignorance) root.

ALL TEN immoral acts (*dasa akusala*; see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”) are done with these 12 types of *citta*.

4. We generate greedy thoughts because we “want to get possession of things that seem to provide happiness.” When we do not get what we want, we generate hate or ill will towards whoever is in the way.

- And we do both types of actions because we do not realize that it is not possible to achieve lasting happiness with anything in “this world.” Not only that, but we also do not realize that by doing those bad actions we accumulate bad *kamma* (i.e., accumulate *kammic* energy) that are going to have bad consequences in the future, either in this very life or in future lives.
- Thus ignorance of the true nature of “this world” is the cause of all bad actions done with greed and hate; this is why the *moha* root is in all of them. We also do certain bad actions just based on ignorance too, like comparing how one is “better” than another, etc.

A. The two ignorance-rooted *citta* are:

- One associated with *vicikicchā* (*vichi+ki+ichcha* = liking based on the distorted view, i.e., *diṭṭhi*). Commonly *vicikicchā* is described as “doubt”, which could be taken as “doubt about the true world view.” Just like a fish biting on a bait due to not “seeing” the hook, we just grab things without “seeing” the consequences, i.e., possible harm to others and the consequences of such harmful actions for ourselves.
- One associated with *uddhacca* (restlessness or agitation of the mind). This is the opposite of *samādhi* or the ability to concentrate and be able to think through the consequences of actions. One could have *uddhacca* even if one knows the “true nature” of this world; it is sort of a cumulative result of all defilements accumulated through beginning-less *samsāra*. This is completely removed only at the *Arahant* stage.

All 12 types of *citta* have ignorance as a root (primary as in the above two types) or as secondary in the other ten *citta*. These ten *citta* can be divided into two categories in another way, i.e., based on whether such *cittā* arise mainly due to *vicikicchā* (i.e., due to not knowing the true nature of this world) or *uddhacca* (i.e., the agitation of the mind due to all accumulated defilements).

B. Out of the **eight greed-rooted *citta***, four arise with wrong view (*diṭṭhi*), i.e., due to lack of understanding of the “true nature of this world”, and that “this world” is much more complex than we perceive with our senses, and that our life does not end here, but what we do will have consequences for very long times into the future. The other four are done anyway, even with the right view, because of the agitation of the mind due to all “gunk” accumulated over the long *sansāric* journey. Thus the eight greed-based *citta* can be divided into two broad categories:

- Four done with wrong views (*diṭṭhi*) are removed at the *Sotāpanna* stage.
- Four dissociated from wrong view (i.e., it does not matter whether one has right view if defilements still cloud the mind; for example even one who has attained the *Sotāpanna* stage may do these four)

C. The **two hate-rooted *citta*** are also done regardless of whether one has the right view (at the *Sotāpanna* stage) or not:

- These two hate-rooted *citta* are dissociated with wrong views, but are due to the agitated mind (*uddhacca*). Thus they persist after the *Sotāpanna* stage, up to the *Anāgāmī* stage.

Now we can see the broad view:

5. Five *cittā* (*vicikicchā* and the four greed-rooted *citta* associated with wrong view) arise because one does not know the true nature of the world, *Tilakkhaṇa*, i.e., *anicca*, *dukkha*, *anatta*. They contribute to one of the four types of *āsava* called the *diṭṭhi āsava* or *diṭṭhāsava*.

These are the same *citta* that could lead to *apāyagāmī kamma*. **Thus when one attains the *Sotāpanna* stage, these five *citta* cease to arise forever, and one WILL NOT BE ABLE to do any such grave *kamma*.** Thus, the *Sotāpanna* stage is a very important stage of *Nibbāna* where *āsavakkhaya* happens to a significant level due to the removal of *diṭṭhāsava*:

- A *Sotāpanna* attains that stage just by getting rid of *diṭṭhi* or wrong views: *sathkāya* (or *sakkāya*) *diṭṭhi* is the view that lasting happiness can be attained via pursuing things in this world. *Vicikicchā* leads to tendencies and actions associated with wrong worldviews, and *sīlabbata parāmāsa* is the view that *Nibbāna* can be attained by following specific precepts/rituals without cleansing the mind.
- The other seven *citta* are the ones that are harder to remove. They arise due to an agitated mind which is a result of other defilements (*āsavas*) that we have accumulated over the long *samsāra*; see. [“The Way to Nibbāna – Removal of āsavas.”](#)
- Out of these, the two hate-rooted *citta* are lessened in strength at the *Sakadāgāmī* stage and are removed at the *Anāgāmī* stage.

- The remaining four greed-rooted *citta* (those dissociated from wrong views) contribute to *kamaraga* (greed for things in the *kamaloka*). *Kamaraga* is lessened at the *Sakadāgāmī* stage and completely removed at the *Anāgāmī* stage. Thus an *Anāgāmī* is unable to generate hateful thoughts or lustful thoughts and is free from rebirth anywhere in the *kamaloka*. An *Anāgāmī* has removed *kamasava*, another part of the *āsava*.
- Finally, it is only at the *Arahant* stage that those remaining four greed-rooted *citta* (which still contribute to *bhavasava*) and the *uddhacca citta* (which still contribute to *avijjasava*) are completely removed. This is when all the defilements or *āsavas* are completely removed from one's mind.

6. It is clear that all five *akusala citta* that are removed at the *Sotāpanna* stage arise due to *micchā diṭṭhi*, i.e., not comprehending the Three Characteristics of existence: *anicca*, *dukkha*, *anatta*. Also see, “*Diṭṭhi* (Wrong Views), *Sammā Diṭṭhi* (Good/Correct Views).”

7. This realization of correct views CANNOT be attained by following rituals, such as just obeying precepts. It comes naturally when one COMPREHENDS the true nature of this world of 31 realms: *anicca*, *dukkha*, *anatta*; see, “[Anicca, Dukkha, Anatta.](#)” That it is unfruitful to involve in any kind of activities to gain mundane pleasures by hurting other beings. Such an understanding makes irrevocable changes in one's *manomaya kāya*, and thus prevents one from doing such activities even in the future lives.

8. Now it is important to realize that a *Sotāpanna* can be a parent taking care of a family. He/she will be doing a job, driving kids to school, and doing all other daily tasks. But one does all this with the clear understanding that one should NOT do certain things. One could live a moral life suitable for a *Sotāpanna* without giving up ANY responsibilities as a regular “householder.” Actually one could even attain the *Anāgāmī* stage without becoming a *bhikkhu*. And there were many “householders” that had attained *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī* stages at the Buddha's time; there are some even today.

6.4.14 What is the only Akusala Removed by a Sotāpanna?

Revised May 10, 2017; December 1, 2017; July 7, 2018; August 16, 2019

1. Upon attaining the *Sotāpanna* stage, *micchā diṭṭhi* (the ten types of *micchā diṭṭhi* together with wrong views of *nicca*, *sukha*, *atta*) is COMPLETELY removed. That is one *akusala* out of *dasa akusala*. But that itself accounts for more than 99% of *akusala* (defilement) from one's mind since the “*apāyagāmi* strength” of other nine *akusala kamma* are also removed.

- This illustrates the importance of removing *micchā diṭṭhi*, and why I have so many posts on that. Also, see the first discourse in, “[Three Marks of Existence – English Discourses.](#)”
- Some people think a *Sotāpanna* is incapable of breaking the five precepts based on an incorrect translation of the [WebLink: suttacentral: Gihi Sutta \(AN 5.179\)](#). The relevant verse is: “*..ariyasāvako paṇātipātā paṭivirato hoti, adinnādānā paṭivirato hoti, kāmesumicchācārā paṭivirato hoti, musāvādā paṭivirato hoti, surāmerayamajjapamādaṭṭhānā paṭivirato hoti.*”
- However, “*paṭivirato hoti*” does not mean “abstains from” as translated at many online sites; it means “does not do with liking.” Thus, a *Sotāpanna* may — under some conditions — break the five precepts. It is only an *Arahant* that will not break five precepts or engage in any of *dasa akusala*.
- The five precepts have deeper meanings too: “[The Five Precepts – What the Buddha Meant by Them.](#)”

2. The six things that a *Sotāpanna* will not do per “[WebLink: suttacentral: Bahudhātuka Sutta \(MN 115\)](#)”:

- Killing one's mother.
- Killing one's father.
- Killing an *Arahant*.
- Injuring a Buddha.

- Causing *saṅgha bheda* (spreading wrong Dhamma is included here).
- Taking refuge in anyone other than a Buddha (i.e., believing in other ways of “salvation”).

3. *Nakhasikha Sutta* (*Saṃyutta Nikāya*), **describes the vast amount of defilement** removed by a *Sotāpanna*.

- One time the Buddha picked up a little bit of dust with the tip of his fingernail, and asked the *bhikkhus*, “What do you think *bhikkhus*? Which is greater: the little bit of dust I have picked up with the tip of my fingernail, or the soil in this great Earth?”
- Of course the *bhikkhus* answered that the amount of soil in this Earth is vastly more massive than the bit of dust picked up on a fingernail.
- Then the Buddha told the *bhikkhus* that the number of defilement that a *Sotāpanna* has removed could be compared to the soil in the whole Earth. The amount that he/she has left to remove can be compared to the bit of dust on his fingernail.
- Therefore, the amount of suffering a *Sotāpanna* has left in future rebirths is insignificantly small.
- There is a decent online explanation of the *sutta* that one can look up: [WebLink: ACCESSTOINSIGHT: Nakhasikha Sutta: The Tip of the Fingernail](#)

4. Another simile is in the *Sineru sutta* of the *Saṃyutta Nikāya*. “The amount of suffering a *Sotāpanna* has to endure can be compared to **seven grains of sand** on top of mount Sineru. In comparison, the amount of suffering a normal human has left to endure is sand in the whole mountain.”

- That is logical, of course, since the suffering encountered in the *niraya* is never ceasing. One birth in the *niraya* (hell) would lead to much more suffering than thousands, millions of births in the human or higher realms.
- A *Sotāpanna* will NEVER be reborn in the four lowest realms. Furthermore, he/she will have only **seven future bhava** left, and those in the human realm or the realms above it.

5. That may be why most people tend to think that attaining the *Sotāpanna* stage requires attaining *jhānā*, all sorts of *abhiññā* powers, etc. **None of that is a requirement for achieving the *Sotāpanna* stage.**

- But at least half of the ten evils (*dasa akusala*) must be removed to become a *Sotāpanna*? No. **It turns out that a *Sotāpanna* removes only one of the *dasa akusala*, that of *niyata micchā diṭṭhi*. Of course, in achieving that, a *Sotāpanna* would have reduced the “*apāyagāmī* strength” of most of the other *dasa akusala*. That is the key to understand. In particular, *abhijjā* [*abhijjhā*] or *lobha* is reduced to *rāga* level and *vyāpāda* or *dosa* is reduced to *paṭigha* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā.](#)”**
- For a discussion on *dasa akusala*, see, “[Ten Immoral Actions \(Dasa Akusala\).](#)” As discussed in that post, *Niyata Micchā Diṭṭhi* (**established** wrong views) is an *akusala* done with the mind.
- A *Sotāpanna* is said to have achieved “*dassanena pahatabba*” or removal of defilement via correct vision. **He/she has removed an unimaginably vast amount of evils (“*keles*” or “*kilesa*” or “*klesha*”) with the removal of *micchā diṭṭhi*, or attaining the first stage of *Sammā Diṭṭhi*: the true nature of this world of 31 realms.**
- How a *Sotāpanna* reduces *dasa akusala* via getting rid of *micchā diṭṭhi* “to overcome *apāyagāmī citta*” is discussed in “[Akusala Citta – How a *Sotāpanna* Avoids *Apayagami Citta*.](#)” Here is it described how five out of the 12 *akusala citta* do not arise after the *Sotāpanna* stage; **those are the five that lead to birth in the *apāyā*.**

6. **This is a critical point to understand. Removal of *micchā diṭṭhi* leads to the stopping of highly immoral actions.** Most people worry excessively on the defilement done with the body and speech. They are afraid of even accidentally killing an insect, or telling even a “white lie.” Of course those need to be avoided too, because moral behavior (speech and actions) are a prerequisite for cleansing the mind.

- But having *niyata micchā diṭṭhi* is million-fold more weighty. These and other types of *Niyata Micchā Diṭṭhi* (**established** wrong views) are discussed in, “[Ten Immoral Actions \(Dasa Akusala\)](#)” and “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”
- It would be beneficial to understand the weights of different types of *kamma*; see, “[How to Evaluate Weights of Different Kammās](#).”
- If one has a vessel that is leaking water, there is no point in trying to plug the smaller holes first. One should seal the largest hole first, which in this case is getting rid of *micchā diṭṭhi* or false views (about this world).
- That may still not convince some. If so, see whether this conclusion is contradictory to anything in the *Tipiṭaka*. One should carefully examine all the “requirements” that need to be fulfilled to attain the *Sotāpanna* stage. It should become clear that indeed, this is all one needs to do.

7. So, we have come to the “**crux of the matter**”: How can one remove *niyata micchā diṭṭhi*? That is ALL one has to do to become a *Sotāpanna*.

- However, complete removal of *niyata micchā diṭṭhi* requires an understanding of the *Tilakkhaṇa* (*anicca, dukkha, anatta*) to some extent.
- One cannot PRETEND to believe in things that one honestly does not believe in. Just by saying, “I do believe in rebirth, or, I do believe that there are other realms in this world other than the human and animals realms,” for example, WILL NOT WORK.
- That is not like going to courts of law and trying to convince a jury of one’s innocence. One’s mind need to “see the realities of this world.”
- **And that comes only via learning Dhamma, the correct version**, the version that was discovered by the Buddha and has been passed down through generations of Noble Persons or *Ariyā*. That is what we discussed in detail in the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- That is also why we need to clearly comprehend the term, *saññā*, commonly translated to English as “perception.”

8. Of course, *Saññā* is one of 52 *cetasika* and one component of *pañcakkhandha*. It is actually one of the seven universal *cetasika* that arise with every *citta*.

- *Saññā* works very closely with another universal *cetasika* called *manasikara*. *Manasikara* is the *cetasika* that brings old memories and future hopes into a *citta*. When *cetana* “puts together the *citta*,” the *citta* recognizes the subject (*saññā*) and automatically produces *vedanā* (feelings) about it. Thus we can see the significant roles played by those four *cetasika* right away.
- But *saññā* is not limited to “recognizing objects.” *Saññā* is the “inner understanding” of any concept.
- For example, when we hear the word, “fire,” we immediately recognize what that means. Even a picture of a fire may flash in our minds. But a little baby (or a person who does not understand English) does not have a “*saññā*” for that word; it means nothing to them. But the baby (or that person) can understand what “fire” means if we teach it to them.
- Growing up, we acquire innumerable “*saññā*” mostly by becoming familiar with them. We first recognize who “mother” and “father” are, know different colors, different objects, etc.

9. Even though we acquire “*saññā*” for most objects and people, some strong *saññā* may be “passed down” from previous lives. That can take many forms.

- Some people, when visiting a place that one had never previously visited in this life, may already “know” about that place in great detail. Children who remember past lives have been reported to lead investigators to various locations in faraway cities where they had lived in previous lives. Even many adults have said that they can walk a city with complete confidence that they are visiting for the first time.

- Then there is the “ability” to play the piano, recite *suttā*, or just being able to comprehend complex mathematics as a child, etc. Some of these cases discussed in “[Evidence for Rebirth.](#)”
10. We “acquire” most *saññā* through our families first, then through friends, schools, workplaces, etc.
- Thus most of our “world views” or *diṭṭhis* are acquired through our families. Our first impressions on moral issues, politics, and religions come from our families.
 - Those *sannas* are hard to change, depending on how forcefully and frequently they have been used.
 - However, the human mind is unique. When given enough substantial evidence, one’s *saññā* about something or some concept can PERMANENTLY change. For example, when one learns how to do algebra (addition and subtraction, etc.) correctly, one will never forget that. And even if an authority figure (a teacher) insists that one plus two is four, even a child will not accept that. He/she can count with fingers and show the teacher that the correct answer IS three.
11. As we grow up, we acquire *saññā* for more specialized tasks. One could “learn” to become a carpenter, a doctor, an engineer, etc.
- **This “learning” is acquiring “*saññā*” for a particular task. It is not just memorizing how to do things.** When a physician finishes his/her learning, he/she can “troubleshoot” a brand new patient and figure out what is wrong. When an engineer builds a new structure, it could be something that had not been made before. One acquires “skills.”
 - Once one learns a “skill,” one will never forget that; at least it is easy to “get back to it.” One who had learned to ride a bicycle as a child may never touch a bicycle for 30-40 years. But then, even at old age, he will be able to ride a bike though he may fall once or twice initially.
12. *A Sotāpanna* acquires a basic level of understanding about “this world” and that “knowledge” or “comprehension” does not go away even in future lives. Thus, it is a strong version of “memories from past lives” that some children report.
- Once someone sees a “glimpse” of the Buddha’s core message that there is no permanent happiness to be had by wishing for anything in this world in the long run. The term “in the long run” implies that one believes that at the end of this life one WILL BE reborn. And that rebirth WILL BE determined by not only how one lives this life, but also how one had lived previous lives.
 - That kind of a “vision change” does not happen quickly, unless one has “*saññā*” about that from previous lives; that is why it is easier for some people to grasp these concepts.
 - And this “*saññā*” cannot be acquired via memorizing *suttā*, how to recite *paṭicca samuppāda* cycle, etc. Instead, one needs to COMPREHEND the concepts.
 - The KEY concept to grasp is the “*anicca saññā*.”
13. The only way to “build up” the correct *saññā* is to make an effort to understand the key message of the Buddha. Humans usually have wrong perceptions or “*vipareetha saññā*” that one can find happiness in this life by working hard. Most people do not even think beyond this life, even if they believe in rebirth. That is also called the “*nicca saññā*” (pronounced “*nichcha sannā*”), i.e., by working hard, or by sheer luck, one can achieve and maintain things in this world to one’s satisfaction.
- **The fundamental teaching of the Buddha is about the “*anicca saññā*,” i.e., it is NOT POSSIBLE to maintain ANYTHING to one’s satisfaction in the long run.** The *Sotāpanna* stage of *Nibbāna* is attained or when the *anicca saññā* is cultivated to some significant extent.
 - When one has developed the *anicca saññā* to this level, one’s mind automatically blocks “*apāyagāmi citta*.”
 - As we discussed in the *Abhidhamma* section, *citta* flow very fast, and we do not have control over those initial *cittā*. We are helpless to stop them in extreme cases like sudden rages or sheer greed. The key is to getting rid of immoral *gati* (by getting rid of *micchā diṭṭhi* among other things).

- It is this *anicca saññā* that grows as one attains higher stages of *Nibbāna* (*Sakadāgāmī* and *Anāgāmī*) and peaked at the *Arahant* stage. At the *Arahant* stage one can see the “*anicca* nature” of ALL *saṅkhāra*, not only *abhisaṅkhāra*. That is what is expressed by, “*Sabbe saṅkhāra anicca*,” and in the *Girimananda sutta*, the Buddha told Ven. Ananda, “*Ayaṃ vuccati Ānanda, sabba saṅkhāresu anicca sannā*”; see, “[Anicca, Dukkha, Anatta – According to Some Key Suttā.](#)”

14. When one develops the *anicca saññā* via learning Dhamma (listening and reading), the tendency to act immorally, even under extreme pressure, will slowly diminish.

- One would be able to see the corresponding “cooling down” (reduced stress level) when one thinks back after several months (could be sooner for some people). One will gradually feel the *nirāmisa sukha*, and will be drawn to Dhamma. One would automatically start spending more time on learning Dhamma.
- One does not need to force anything, except to make an initial determination to verify the truth of what I have discussed above by reading (and listening) and developing the “*Dhamma vicaya*” *sambojjanga*. Make a habit to critically evaluate relevant posts at this site and from other sources. That is the best and direct meditation technique for attaining the *Sotāpanna* stage. Buddha Dhamma is all about learning the true nature of this world, which WILL automatically lead to the purification of the mind; see, “[The Importance of Purifying the Mind.](#)”
- The more one purifies one’s mind, the easier it will become to grasp the key Dhamma concepts and cultivate the “*anicca saññā*.” **And developing *anicca saññā* itself leads to the purification of the mind.** That is why learning becomes exponentially fast, once getting some traction.

15. It should be quite clear that the enormous amount of defilement or “*kilesa*” (or “*anusaya*”) are removed by just getting rid of *niyata micchā diṭṭhi*.

- That is because cultivating *anicca saññā* purifies one’s mind, and one can start seeing the critical message of the Buddha. Without the *anicca saññā*, one can struggle for years and years without any benefit.
- Ask anyone who has done “breath meditation” (and believes *anicca* means “impermanence”) for even 20-30 years whether they have made any significant progress. I am not talking about just calmness of the mind (or even mundane *jhānā*) that is only temporary (and can be broken). One will know when one has reduced *lobha*, *dosa*, *moha* to the extent that one will never be born in the *apāyā*.

Of course, one needs to have removed *micchā diṭṭhi* to even become a *Sotāpanna Anugāmi*: “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”

6.4.15. Udayavaya (Udayabbaya) Ñāṇa – Introduction

1

February 12, 2016; revised October 23, 2018

The *udayavaya ñāṇa* (*ñāṇa* pronounced “*ngana*”; see the pronunciation guide in “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#)”) is sometimes referred to as the *udayabbaya ñāṇa*.

- In fact, the actual Pāli word is *udayabbaya* (I had inadvertently used the Sinhala word *udayavaya*). A description of the *udayabbaya ñāṇa* is in the *Paṭisambhidāmagga Pakarana*: “[WebLink: suttacentral: 1.1.6. Udayabbayañānaniddesa.](#)”
- However, it is about the arising (*udaya*) and destruction (*vaya*) of a *saṅkhata* (*sankata* in Sinhala). This is another example of two Pāli words combining to sound differently: *udayabbaya*.

Pronunciation (*udayavaya ñāṇa*):

[WebLink: Listen to Pronunciation: Udayavaya ñāṇa](#)

1. Things in this world do not arise without causes. Anything that arises is destroyed sooner or later, **and in the meantime, they change in unexpected ways (*vipariṇāma* nature)**. That is another way to look at the *anicca* concept. The suffering arises because we are trying to maintain things the way we want, but that is an impossible task.

- Suffering does not arise merely because things are not permanent; the reason is more deeper. Things also change in unexpected ways. Furthermore, this *vipariṇāma* nature is present anywhere in the 31 realms; there is no refuge anywhere.
- This is the very foundation of Buddha Dhamma. Suffering arises due to causes, and those root causes of *lobha*, *dosa*, *moha* lead to the worst kinds of suffering. The other three root causes of *alobha*, *adosa*, *amoha* lead to temporary relief (in *deva* and *brahma* realms, but also in the human realm to some extent), but those also do not last long in the *sansāric* time scale.

2. *Udayavaya* describes how anything in one’s world (*pañcakkhandha*) arises due to causes. And whatever arises (*udaya*), it matures with time while changing in unexpected ways, and then inevitably gets destroyed (*vaya*). **Suffering is associated with anything that has the *anicca* nature, and everything in this world of 31 realms has that *anicca* nature.**

- Seeing *anicca* via understanding the *udayavaya* of the *pañcakkhandha* (anything in this world) is stated as, “***uppāda vayattena anicca,***” i.e., **anything in this world is *anicca* because anything that arises is subjected to unexpected change while in existence, and is eventually destroyed.**
- When one truly comprehends “***uppāda vayattena anicca,***” one has attained the “*anuloma ñāṇa*” that is a prerequisite for the *Sotāpanna* stage.

3. For example, we think very highly about our bodies (especially when young). But we do not realize how much effort we put in (*vipariṇāma dukha*) to keep our bodies just in a “presentable form” to others. If we do not brush our teeth, wash or take a shower for a few days, do not comb the hair, do not wash our clothes, etc, we will be able to see the true nature of our bodies.

- If we do not eat well or exercise regularly, not only will our bodies be out-of-shape, but we will also be subjected to diseases. But this life filled with *vipariṇāma dukha* is a result of a past cause, and we just have to cope with it and keep the body in good shape; otherwise, things could get even worse.
- Thus even though we do not realize it (because that is what we have been used to), just maintaining everything in the status quo requires a lot of effort; this *vipariṇāma dukha* is normally hidden because we are blinded by the perceived “future pleasures.” Just like a bull is pulling a cart with a heavy load when some straw is dangled in front of it, we trudge through the daily chores with visions of pleasure blinding us.
- Even when we do all this, sometimes “bad things happen out of the blue”: one could get into an accident, come down with cancer or some fatal disease like that, or hear about an unexpected such catastrophe of a loved one.

- And then when we get old, no matter how much we struggle, we cannot stop the body from falling apart and eventually dying. Just think about your parents/grandparents; they were as young and vibrant when they were young too.
- And this is what we have been doing through an unimaginable number of births in the past. Always struggling just to keep up. But it gets much worse if and when born in one of four lowest realms (*apāyā*).

4. But the key here is not be depressed about it. Some people believe contemplating on such things and cultivating a depressed mindset is the “*patikula manasikāra bhāvanā*”; it is commonly mistranslated as “the contemplation on the foulness.” **But it is imperative not to get distressed about these things. The idea is to realize that all body parts are subject to *anicca* nature.**

- When one realizes this true nature, and **then also realizes that there is a way out**, that leads to a higher level of *nirāmisā sukha*. That is when one “sees *Nibbāna*” and attains the *Sotāpanna* stage.
- When one gains the *udayavaya ñāṇa*, one can see the causes that need to be eliminated to overcome otherwise inevitable future suffering.

5. **In *udayavaya ñāṇa*, the term “*vaya*” has two meanings:**

- **Whatever is arisen due to past causes will be subjected to unexpected change and eventually is destroyed.** This understanding about how anything that arises and causes a **net suffering** (even though there are pleasures to be had, they are minor compared to the suffering) is a part of the *udayavaya ñāṇa*.
- More importantly, one can stop these things from arising and thus permanently remove suffering. Thus understanding *udayavaya* leads to knowledge about **the *dukkha nirodha sacca*, i.e., that by eliminating the causes, one can stop future suffering from arising.** This is the second and more important meaning of “*vaya*” in *udayavaya*.
- But let us first discuss the factors associated with “*udaya*” or “arising.”

6. The “*udaya*” part of the *udayavaya ñāṇa* describes five factors that lead to the arising of anything in this world. Anything in this world belongs to one of the five aggregates (*pañcakkhandha*): *rūpa khandha*, *vedanā khandha*, *saññā khandha*, *saṅkhāra khandha*, *viññāṇa khandha*.

- **Thus our world is not only the *rūpa khandha*.** In fact, most people think about material things in the world as **THE WORLD**. But Buddha Dhamma reveals a more “personal world” which includes how one feels about things in the world (*vedanā*), how one perceives those things (*saññā*), and how one thinks and makes plans (*saṅkhāra*) according to how one feels and perceives. The end result of those three (*vedanā*, *saññā*, *saṅkhāra*) are the *viññāṇa* that one builds (future hopes and desires) according to one’s *gathi* (character).
- In fact, *pañcakkhandha* is even more complex than that because it includes past, present, future,... (11 categories) for each of the aggregates; see, “**[The Five Aggregates \(Pañcakkhandha\)](#)**.”
- Note that *pañcakkhandha* is shortened for *pañca khandha* or “five heaps” or “five aggregates.” In the same way, *rūpa khandha* is normally pronounced as *rūpakkhandha*, and similarly *vedanakkhandha*, etc.

7. There are four factors that inevitably contribute to the arising of any of the five aggregates: We can easily guess the first two: *avijjā* and *taṇhā*. Because of *avijjā* (ignorance) of the true nature, beings tend to attach to things via greed or hate (*taṇhā*). And those two are always in front. Now, because of *avijjā* and *taṇhā*, beings initiate actions (*kamma*) via body, speech, and mind.

- Thus, *avijjā*, *taṇhā*, and *kamma* are common to the arising of any of the five aggregates.
- Then when any one of the five aggregates start arising, it will need another factor that helps in the arising of that aggregate. Let us discuss that next.

8. A *rūpa* (material thing, whether alive or not) needs food (*āhāra*). A human or an animal needs to eat (these are called *kabalīṅkāra āhāra*), and a tree needs nutrition from the ground. Even a thing like a rock needs *āhāra* (not in the general sense of food) to be formed, and that is a very deep topic that we will discuss much later.

- Since *rūpa khandha* also includes “future *rūpa*” one may ask how would *āhāra* be associated with a future *rūpa*. In this case, the *āhāra* is a mental *āhāra*; we will discuss four types of food (*āhāra*) in the near future.

9. On the other hand, three of the mental aggregates (*vedanā, saññā, saṅkhāra*) arise due to *phassa* (contact), and thus *phassa* is considered a form a mental *āhāra*.

- For any of those to arise, there has to be a contact (*phassa*) with the outside world either via the eye, ear, nose, tongue, body, or the mind.
- *Viññāṇa* is the end result of a *citta* that includes *vedanā, saññā, saṅkhāra*, and *rūpa*. Thus the corresponding factor for *viññāṇa* is *nāmarūpa*. Even though in *paṭicca samuppāda* it is, “*viññāṇa paccayā nāmarūpa*,” it goes the other way too, “*nāmarūpa paccayā viññāṇa*.” This is called “*aññamañña paccayā*,” and is valid for many such pairs in the *paṭicca samuppāda*.

10. Finally, the last factor is common to all five aggregates. In the deepest sense, any of the five aggregates is a *saṅkhata* (*sankata* in Sinhala). And each thus has three common features: *uppāda* (early stage of arising), *ṭhiti* (change while growing), *bhaṅga* (destruction). Thus the fifth factor that describes a given aggregate is the *uppāda lakkhaṇa* or *nibbatti lakkhaṇa*.

- Note that some *saṅkhata* (*sankata* in Sinhala) (especially those belong to the *rūpa khandha*) can have long life-cycles: a human lasts about 100 years, a universe lasts billions of years. But the mental components have relatively short life-cycles, especially *vedanā, saññā, saṅkhāra* are very short-lived. Some *viññāṇa* are brief, but others can last long times.
- Whether it is a human or a building (*rūpa*), a feeling, perception, *saṅkhāra*, or *viññāṇa*, they all have those three characteristics of *uppāda, ṭhiti*, and *bhaṅga* (i.e., *nibbatti lakkhaṇa*).

11. It is easiest to discuss an example with the *rūpa khandha*, and take just a small part of it to say a human being (X) and an animal (Y). First let us start with the root causes for the birth of X or Y. Those two beings, in one of their previous lives, had acted (done a *kamma*) with *taṇhā* (which itself was caused by *avijjā*).

- That moral act (for X) and an immoral act (for Y) led to the corresponding *bhava* (human *bhava* and animal *bhava*), which at some point led to the birth of a living being with corresponding characteristics (*gathi*).
- That resulted in the conception of a human baby (X) and a baby animal (Y) in a suitable womb. They both grew by consuming food (*āhāra*) inside the womb initially and then outside the womb after the birth.
- *Āhāra* also can be an actual cause and we will discuss that in a future post.

12. The baby X or Y thus born, will now grow according to the blueprint (*manomaya kāya*) that took hold of a single cell in the mother’s womb at conception. That *manomaya kāya* has the basic blueprint of that being.

- Growing and maturing of X or Y, now proceeds with the *uppāda* (or *nibbatti*) *lakkhaṇa* that was associated with the particular *manomaya kāya*.

13. This same line of reasoning can be applied to other four *khandha*: *Vedanā, saññā, saṅkhāra*, and *viññāṇa* also arise mainly due to *avijjā, taṇhā, kamma*, and also *āhāra* (food) for them.

- I will discuss later what it means to say *āhāra* (food) for those mental elements. Actually, those are much more important than the food for the physical body and any other *rūpa*.
- The other four aggregates also arise, stay in existence for a time, and then is destroyed.

14. To summarize, the each of the five aggregates arises with the aid of five factors:

- *Rūpa*: *avijjā, taṇhā, kamma, āhāra, nibbatti lakkhaṇa.*
- *Vedanā*: *avijjā, taṇhā, kamma, phassa, nibbatti lakkhaṇa.*
- *Saññā*: *avijjā, taṇhā, kamma, phassa, nibbatti lakkhaṇa.*
- *Saṅkhāra*: *avijjā, taṇhā, kamma, phassa, nibbatti lakkhaṇa.*
- *Viññāṇa*: *avijjā, taṇhā, kamma, nāma rūpa, nibbatti lakkhaṇa.*

15. Thus those are the 25 factors that describe how anything in this world arise. The *udayavaya ñāṇa* encompasses the comprehension of those 25 factors.

- There are 25 more factors that lead either to the destruction of something that arose **OR** lead to the prevention of something from arising. We will discuss them in a future post.
- Thus the *udayavaya ñāṇa* is said to encompass 50 factors altogether that contain all knowledge about the arising and destruction of anything in this world, AND also the knowledge on how to **stop anything from arising (nirodha)** in this world.
- Thus with *udayavaya ñāṇa* one comprehends how suffering arises and how one can eliminate future suffering. A key point here is that anything that arises (*uppāda*) is not just guaranteed to be destroyed (*bhaṅga*), but also that it changes unexpectedly (*vipariṇāma*) during its existence (*thiti*). It is the *anicca* nature.

Next in the series, "[Nibbatti Lakkhana in Udayavaya Ñāṇa.](#)"

6.4.15. Nibbatti Lakkhana in Udayavaya Ñāṇa

2

February 26, 2016

1. In the previous post, we discussed the first 25 factors that encompass what is involved in the “*udaya*” stage of *udayavaya*: “[Udayavaya Ñāṇa – Introduction.](#)” Each of the five aggregates has five factors associated with it basically leading to its formation; thus there are 25 factors that give rise to **each person’s world.**

- The five aggregates or the *pañcakkhandha* is much more complex than most realize. Please read the posts on *pañcakkhandha* to familiarize with it if you really want to grasp the *udayavaya ñāṇa*: “[The Five Aggregates \(Pañcakkhandha\).](#)”
- Also note that a given *saṅkhata* (*sankata* in Sinhala) is a tiny fraction of *pañcakkhandha*. We have discussed the five stages of a *saṅkhata* (*sankata* in Sinhala), and it is related to *udayavaya ñāṇa*: “[Root Cause of Anicca – Five Stages of a Sankata.](#)” Buddha Dhamma is so deep, all these different descriptions are well-connected at some level.
- Do not worry if all this seems to be overwhelming (of course some people will be able to see the connections). It will make sense with time. Just keep reading posts that you have already read. They will make more sense each time you go back and read, especially after reading other relevant posts.

2. It is important to grasp the fact that anything that we experience, we experience only for a fraction of a second. Then it is gone to the “past pile” (*atita*; pronounced “atheetha”) of the five aggregates or piles.

- Anything that we are only imagining or hoping to experience has not yet materialized; those are in the “future pile” (*anāgata*; pronounced “anāgatha”) of the five aggregates.
- Only a negligibly small fraction is being experienced at a given moment: the “present pile” (*paccuppanna*; pronounced “pachchuppanna”); see, “[Five Aggregates – Introduction.](#)”

3. All these things arise as a *saṅkhata* (*sankata* in Sinhala), whether it is material (*rūpa*) or mental (*vedanā, saññā, saṅkhāra, viññāṇa*). A given *saṅkhata* (*sankata* in Sinhala) itself (not the experience) may exist for brief moment, or some may last a long time (especially those belonging to *rūpa* aggregate). But even then parts of it are continually being “passed on” to the past.

- Think about a human being X. He/she starts with a single cell and grows by the day, becomes a baby, a child, a young person, an old person, and then is perished. So, when another person Y, is watching X grow, the “*rūpa khandha*” of Y continuously grew, all the while making the “past *rūpa khandha*” bigger each moment. When X is observing himself, that experience goes to his “*rūpa khandha*.”
- At a given time, we can see only a momentary “snapshot” of a *rūpa khandha*. When X dies, all those stages –moment by moment — had gone to the past, and thus now belong to the “past *rūpa khandha*” of X and Y. Note that they are different: each one’s experience of X is different.
- Now we can see why each person’s *pañcakkhandha* is unique to that person.

4. Now we will analyze why all five aggregates have their origin in *avijjā, taṇhā, and kamma*: Because we have the wrong perception (*nicca saññā*) that we can eventually reach happiness by craving for things in this world (*avijjā*), we get attached to somethings or hate other things (*taṇhā*), and then act accordingly (*kamma*).

- After one attains *parinibbana* (i.e., when an *Arahant* dies), there is no world to experience. No more *pañcakkhandha*.

5. The other two factors of *āhāra* and *nibbatti lakkhana* describe the “progression” of a *pañcakkhandha* that have the origins in *avijjā, taṇhā, and kamma*.

- If it is a material thing (*rūpa*) it needs *āhāra* (food) to grow; they can be food that living beings eat or nutrients that plants need.
- If it is a mental thing (*vedanā, saññā, saṅkhāra, viññāṇa*), it needs “mental food”: *phassa* (contact), *mano sañcetanā*, and *viññāṇa āhāra*. We will discuss these later.

6. Any one of those five aggregates needs a “blueprint” or a set mechanism to arise, grow, mature, decay, and eventually cease to exist. This is what the fifth factor, *nibbatti lakkhana*, is about.

- This “blueprint” is made according to those three causes: it is a complex plan which takes into account many aspects that are formed by the level of *avijjā* (ignorance), kind of *taṇhā* (greed, hate), and *kamma* (kind of acts that were done with body, speech, and mind).
- Those complex factors give rise to *nibbatti lakkhana*, “blueprint” for any one of the five aggregates to rise. It can be called “production characteristics” of that particular *saṅkhata* (*sankata* in Sinhala) belonging to one of the five aggregates.
- As we learn more, we will see that all five factors actually become causes, and are inter-related.

7. This is easier to see this with a human (or an animal). When a living being gets a human *bhava*, then based on a specific *kamma vipāka* that came to focus at the time of death in the previous *bhava*, a blueprint for the *human bhava* is automatically generated by *kammic* energy.

- That blueprint is the *manomaya kāya* or the *gandhabba* that we have discussed many times; see, the posts under the section “[Manomaya Kāya](#).”
- The arising of that human starting from a single cell in mother’s womb happens according to the “blueprint” in that *manomaya kāya*: eventual height, eye color, skin color, etc were determined when a suitable womb was automatically selected according to the “*gathi*” of that being. That “selection process” — which happens automatically and not decided by any superior being — had chosen the matching parents for the *gandhabba*.
- That was the role played by the *nibbatti lakkhana* in this particular case.

8. Thus the particular *bhava* is determined by the particular action (*kamma*): if that action was suitable for a dog *bhava*, then one would get a “dog *bhava*.”

- But other characteristics of that dog are determined by the overall “*gathi*” of that being that it had acquired through uncountable previous births.
- Thus *nibbatti lakkhana* is a complex entity that takes into account numerous things, but two are prominent: the specific *kamma* and overall *gathi*.

9. For example two different beings could get the same “dog *bhava*.” But no two dogs will look and behave alike. Some are vicious and some are loving. Some are big and some are small. The possible varieties are basically infinite. Even two “twin dogs” that look exactly the same will have at least some behaviour differences when they grow. Same thing applies to two humans.

- Thus *nibbatti lakkhana* is a complex mold of multiple factors. But only a Buddha can see why certain features are in a given being. Even a spot on dog is said to be due to some reason.
- Even though the “*bhava*” is determined by a specific strong *kamma* (called a *janaka kamma*), the actual body will reflect numerous *kamma vipāka* from numerous lives in the past.
- But as we have discussed elsewhere, what kinds of *kamma vipāka* can bring fruits will depend to a large extent on having suitable conditions available. If one acts foolishly that will allow some bad *kamma vipāka* from the past to bear fruit. In the same way, by acting with mindfulness one can avoid such bad outcomes and even bring about good outcomes due to past good *kamma vipāka*.
- There are several posts that discuss the above important fact. For example, “[What is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccayā](#).”

10. Therefore, it is important to realize that it is *manomaya kāya* does not determine one’s future rigidly; some of the “production characteristics” can change. It is not like making a robot in a factory according to a set blueprint.

- It is easy to see that one’s body structure can change according to one’s lifestyle. If one becomes careless and start eating indiscriminately, one will become obese. Even one’s character can change by one’s motivation and due to external influences.
- Thus *nibbatti lakkhana* are not deterministically set. The overall *gathi* can change and the *manomaya kāya* and the physical body in turn can change.

11. The main reason for this flexibility is that the *manomaya kāya* has three “components”: *kammaja kāya*, *cittaja kāya*, and *utuja kāya*; see previous posts on *manomaya kāya*.

- The *kammaja kāya* is the one that is really pre-set. It had taken into account the reasons (*kamma vipāka*) that led to the particular *bhava*.
- **The critical component that is under OUR CONTROL is the *cittaja kāya*.** This is basically how we think (that leads to our speech and bodily actions). And how we think depends on our level of ignorance (*avijjā*).
- The third component is the *utuja kāya*, which is basically the fine body of the *gandhabba*. It is being created and changed CONTINUOUSLY due to both the *kammaja kāya* and *cittaja kāya*. The fine matter based on *suddhātthaka* are being created due to *kammaja kāya* and *cittaja kāya*; see, “[The Origin of Matter – Suddhatthaka](#).”

12. Thus the evolvement of a human being is a complex process. But one could get a good basic understanding by comprehending the above basic structure. We will go into more details in the future, but let us discuss a few more important aspects.

- Now we can see that the physical body is just a “shell.” There is *gandhabba* inside that physical body and controlling it; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

13. Thus, these physical bodies that we value so much are really lifeless shells. The essence — *gandhabba* — is hidden inside that physical body.

- The *utuja kāya* of the *gandhabba* is the one that is spread over the whole physical body gives it a “life.” It is a fine grid that overlaps our nervous system, and that is how we feel body sensations.
- Under some extreme stresses, the *gandhabba* can get out of the physical body. This is what is known as the out-of-body experience (OBE); see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” When that happens the physical body is lifeless, and doctors have declared many heart patients undergoing operations to be dead for several minutes only to find out later that the patient is alive (*gandhabba* had returned to the body).

14. The critical point for our present discussion is the fact that once born with a human body, the human *gandhabba* can determine its own *nibbatti lakkhana* to some extent by wisely using the *cittaja kaya*.

- It is this *cittaja kaya* that ultimately makes it possible for a human to attain *Nibbāna*.
- One can change one’s *gathi* (habits/character) by comprehending first moral versus immoral, and then comprehending the *anicca* nature of this world.
- Most people do not realize the importance of the *cittaja kaya*. This is in essence why a Buddha is needed to reveal the true nature of this world, and to teach how to use the *cittaja kaya* (i.e., the way one thinks, and therefore speaks and acts): First to stay away from immoral behavior to cleanse the mind to some extent, and then to comprehend the *anicca* nature.

15. The *nibbatti lakkhana* for any *saṅkhata* (*sankata* in Sinhala) associated with any of the five aggregates work similarly. Let us consider a certain *viññāṇa* that we experience when seeing a person X.

- That *viññāṇa* depends on who is looking at X. If it a loving parent for Y, then Y will generate a “loving *viññāṇa*” upon seeing X. That *viññāṇa* will arise, stay there for a certain time, and fade away as the mind is directed to something else. But when that *viññāṇa* arises, it arises with some *nibbatti lakkhana* associated with one’s own past experiences with X. An enemy of X (say, Z) could generate a “hateful *viññāṇa*.”

16. It is easy to see that other three aggregates in the above example will also arise accordingly.

- Y will generate happy feelings (*vedanā*), will recognize (*saññā*) X as a parent, and may generate some kind of action or speech via *saṅkhāra*. On the other hand, Z will generate an entirely different set.
- Thus the four mental aggregates are related to each other.

17. In Buddha Dhamma everything that we learn about is connected to each other at some level. It is the whole fabric of nature. Each and every piece of information is part of a complex puzzle. When one begins to see how it all fits together, one’s mind becomes joyful, and provides incentive and desire to learn more about the true nature of this complex world.

Next in the series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#).”

6.4.15. **Āhāra (Food) in Udayavaya Ñāṇa**

3

March 19, 2016

1. First part of the *Udayavaya Ñāṇa* involves the causes for the arising of *saṅkhata* (*sankata* in Sinhala) (and hence arising of *pañcakkhandha*). Out of the five main factors (*avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhana*), we discussed the *nibbatti lakkhana* in the previous post of the series.

- Many posts at the site discuss the first three factors, so will now discuss the remaining factor, *āhāra* (food), that is both a cause and a condition for the arising of *pañcakkhandha*.

2. When we think of *āhāra* (which means food in both Pāli and Sinhala), we automatically think about food that we consume to stay alive. However, it is clear from the previous two posts that a physical body is just a shell that is “controlled” by a *gandhabba*. There are many other posts on *gandhabba* in the “[Manomaya Kāya](#)” section. Here is a summary of some concepts discussed there:

- In effect, we have four kinds of bodies (*kāya*): the physical body (*karaja kāya*) is the one people normally associate with the perception of a “me.” But we have three “mental bodies” that are collectively “*manomaya kāya*” or “*gandhabba*.” Those three are *kammaja kaya*, *cittaja kaya*, and *utuja kaya*.
- In a way, the physical body is just a shell that we use for about 100 years or so and discard at death; the *gandhabba* leaves that dead body and waits for a suitable womb to make another physical body, if there is *kammic* energy left in the *human bhava*.
- The foods for the physical body are called *kabaliṅkāra āhāra*. There are three other “mental foods” that are consumed by the *gandhabba*.
- The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

3. A given *Kammaja kāya* was created at the *cuti-paṭisandhi* moment by a powerful previous *kamma*, and its energy just gets depleted with time. For example, if a particular *human bhava* came into existence with enough *kammic* energy to support a human life for 1000 years, then that energy will be slowly spent over 1000 years. In other words, *kammaja kāya* does not need any additional energy, i.e., *āhāra*.

- In a way, all three types of mental foods are consumed by the *cittaja kāya*. And some of the energy from the *kammaja* and *cittaja kaya* are converted to *suddhaṭṭhaka* (matter), and that is what makes the fine body (*utuja kāya*) of the *gandhabba*, which is too fine for us to see.
- As I mentioned in the previous post in this section, “[Nibbatti Lakkhana in Udayavaya Ñāna](#),” the critical component that is under OUR CONTROL is the *cittaja kāya*. We can overcome our “loosely preset destiny” embedded in the *kammaja kāya* by cultivating our *cittaja kāya*, or basically our thoughts and thereby our behavior (*gathi*). This is what makes it possible to attain *Nibbāna*!

4. Let us first discuss the *kabaliṅkāra āhāra*. There are two relevant meanings for this name. The first meaning is associated with what this type of *āhāra* does: to energize the physical body. Here “*kabaliṅkāra*” comes from “*kayata bala dena*” in Pāli or Sinhala where “*kāya*” is body, “*bala*” is energy or power, and “*dena*” means provide.

- Therefore, *kabaliṅkāra āhāra* here means the food we eat to make our bodies grow and keep energized. Without food, a physical body that starts in the womb of the mother cannot grow to a baby and then once comes out cannot grow to be an adult. Without *kabaliṅkāra āhāra* that particular *saṅkhata* (*sankata* in Sinhala) cannot survive, and thus is an essential factor contributing to part of the *pañcakkhandha*.
- This kind of *kabaliṅkāra āhāra* is essential for the survival for humans and animals (and also *devas*). *Devas* consume just one kind of *kabaliṅkāra āhāra* called “*amurtha*”; it is a drink that they consume, which leaves no residuals. Thus, they don’t need to worry about sweating, urinating, or defecating.
- Thus *kabaliṅkāra āhāra* are needed only in *kāma loka*. As we will see below, when one loses craving for *kabaliṅkāra āhāra*, one will never be born again in the *kāma loka*, i.e., one becomes an *Anāgāmī*.
- There are no solid bodies (*karaja kāya*) in either *rūpa loka* or *arūpa loka*. In *rūpa loka* there is only the “*thrija kāya*” or the three mental bodies of *kammaja kāya*, *cittaja kāya*, and *utuja kāya*. Thus in the *rūpa loka* beings are essentially *gandhabbas* but that term is normally reserved for humans and animals when they are in the *para loka* waiting for a womb; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”
- In the *arūpa loka*, there is no *utuja kāya* either. Except for the *hadaya vatthu*, there is no *rūpa* associated with an *arūpa brahma*.

- It is not essential to know all these details, but these details are needed to complete the “big picture”, especially for those who are interested in finer details.
5. The second meaning of *kabaliṅkāra āhāra* has a deeper meaning; here it is a CAUSE for the arising of FUTURE *saṅkhata* (*sankata* in Sinhala). Craving *kabaliṅkāra āhāra* means one is hoping for rebirth in the *kāma loka* to enjoy them; see, “[How Perceived Pleasures \(Assāda\) lead to Dukkha.](#)”
- Thus, the stronger the craving is, harder it is to “escape from the *kāma lokas.*”
 - This is a good example of how (*abhi*)*saṅkhāra* or strong cravings/hopes/desires lead to corresponding *bhava* and thus corresponding births (*jāti*).
 - In *paṭicca samuppāda*, “*avijjā paccayā saṅkhāra*” is followed by “*saṅkhāra paccayā viññāṇa*,” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti.*” Thus generating (*abhi*)*saṅkhāra* for *kabaliṅkāra āhāra* leads to rebirths in the *kāma loka*, but most times in unexpected way, as we discuss below.
6. One NEEDS to consume *kabaliṅkāra āhāra* to provide one’s body with the nutrients it needs to live a healthy life. However, if one craves for tasty foods in excess, *kabaliṅkāra āhāra* can become a CAUSE for the arising (*udaya*) of future births in the *kāma loka*.
- This is why it is NOT actual consumption of tasty foods that contributes to making “*kāma bhava.*” It is the excess greed for tasty foods (*kāma assāda*); see the section on , “[Assāda, Ādīnava, Nissarana.](#)”
 - This second type of “*pada nirukthi*” or the “origin of the phrase” *kabaliṅkāra āhāra* comes from “*kāya bali karana*” which means “leading to distorted body.” Here the word “*bali*” or “distort” applies because **the body that one acquires in a future life** is due to such greedy *saṅkhāra* could be much different than expected. **This is the deeper meaning of *kabaliṅkāra āhāra* in the *udayavaya ñāṇa.***
7. Such excessive greed for food matches the “*gathi*” of *pretha* beings. Thus when one cultivates such greedy (*abhi*)*saṅkhāra*, it leads to corresponding “*pretha bhava*” and thus “*pretha jathi*” in the future.
- When encountering delicious food, some people lose any sense of decency. The greediness shows, and when eating such a meal some display “animal like” behavior, spilling food and getting the food all over their face. That is a display of “greedy animal like” *saṅkhāra*. When they cultivate such *saṅkhāra*, the corresponding birth could be that of a pig.
 - And then there are some who do not like to share such food and like to keep others away from enjoying such meals. That could cultivate *saṅkhāra* of a “vicious dog.” We see such dogs all the time; they growl when another dog comes even close to their food.
8. Once one gets the basic idea, it is easy to see various kinds of *pretha* and animal *saṅkhāra* can be cultivated even without realizing it, and can lead to future births corresponding to such “*gathi.*”
- And the cultivation of such extreme *gathi* is a consequence of not knowing or not comprehending Buddha Dhamma, specifically *paṭicca samuppāda* (“*paṭi ichcha*” leading to “*sama uppada*”); see, “[Paṭicca Samuppāda – “Paṭi+ichcha”+“Sama+uppāda.](#)”
 - And such *saṅkhāra* CANNOT be suppressed by sheer will power alone. One needs to learn Dhamma and realize that they DO LEAD to bad consequences. Again, see the section on “[Assāda, Ādīnava, Nissarana.](#)”
9. There are “good births” in the *kāma loka* too: the human realms and the *deva* realm. *Bhava* (and birth) in those realms also are according to one’s (*abhi*)*saṅkhāra*, which of course are generated according to one’s dominant *gathi*.
- Those who cultivate human and *deva saṅkhāra* like to enjoy sense pleasures, but they are not excessively greedy. They don’t have mentality of “may all good things come to me, AND not to others.” They are content with what they get and willingly share the excess with others.

- One is not released from the *kāma loka* until one's cravings for sense pleasures completely goes away when one comprehends not only the futility of such sense pleasures but also the possible dangers.

10. At even a deeper level, the tendency to generate such extreme greed goes away AUTOMATICALLY when one starts comprehending the “*anicca* nature.” That it is not possible to achieve and maintain pleasurable worldly things (including food or beautiful bodies that result from eating such foods) as one desires.

- And this change in the mindset and the change in corresponding personal behavior may not reverse in a short time. But as one learns Dhamma, one will be able to see the change over time: Sometimes in a few weeks or even several months.
- The Buddha compared this “gradual transition” to the growth of a tree or a plant. One cannot see the change in the growth of a plant day by day; there is no point in checking it every day to see whether can see the growth. But if one takes care of the plant by providing it with nutrients and keeps the weeds away, one will be able to see the growth over a few weeks or months. And then one day, can reap the benefits of all that work when the plant blossoms and provides the flowers/fruits.

11. Therefore, the key is to LEARN Dhamma and also to comprehend it by contemplating on it, which is MEDITATION. **But it is critical to learn the correct Dhamma.**

- A good example of the wrong way to meditate is what many people are doing with the *paṭikūla manasikāra bhāvanā*. Many translate “*patikūla*” as “*pilikul*” in Sinhala, which means “to be rejected because it is repulsive.” They meditate on contemplating the repulsiveness of the body (sweat, urine, and feces generated by the body) and also the fact that once one chews on even the most delicious food, it becomes “vomit.”
- But the Buddha did not advice that. Just as we should not desire extreme sense pleasures, we also should not be repulsed by the things that we mentioned in the above paragraph. They both generate *taṇhā*, in the first instant by attachment (craving) and in the second by aversion (*paṭigha*). **The neutral mindset (*upekkhā*) comes from understanding the true nature of things.**

12. Now we can see that the connection of *kabaliṅkāra āhāra* in the *udayavaya ñāṇa* has two facets:

- One plays a role in taking care of the physical body that we have inherited due to past causes. If we are not mindful of what we eat, it can lead to bad consequences via the body that we already have. If we are mindful, we can make that body to work optimally for achieving our goals, both mundane and transcendental. And of course, if the physical body does not get enough *kabaliṅkāra āhāra*, it will die.
- The other is to be aware of the role *kabaliṅkāra āhāra* plays in generating physical bodies for us in future births via generating (*abhi*)*saṅkhāra* related to pleasurable foods.
- It is said that one can become an *Anāgāmī* (i.e., stop rebirths in the *kāma loka*) by comprehending the true nature of *kabaliṅkāra āhāra*. Then one loses the craving for any sense pleasures in the *kāma loka*. But such a mindset is unfathomable for a normal human who only sees the immediate sense satisfaction. Furthermore, such a mindset CANNOT be achieved by sheer will power; it has to be through understanding the *anicca* nature of *kāma loka*.

Next in the series, “[Udayavaya Ñāṇa – Importance of the Cittaja Kāya.](#)”

6.4.15. Udayavaya Ñāṇa – Importance of the Cittaja Kāya

4

July 22, 2016; December 1, 2017; December 14, 2019

Three Components of Mental Body (*Manomaya Kāya*)

1. In previous posts in this series, we discussed *kabalīṅkāra āhāra* for the physical body and three types of *āhāra* for the “mental body” (or *manomaya kāya* or *gandhabba*): *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- The *manomaya kāya* or the *gandhabba* consists of three components: *kammaja kāya*, *citta kāya*, and *utuja kāya*. The *kammaja kāya* gets its energy at the beginning of that *bhava*, and does not require any external *āhāra*. The *utuja kāya* is sustained continuously via fine *rūpa* produced by *kammaja kāya* and *cittaja kāya*.
- **Therefore, the three types of *āhāra* for the *manomaya kāya* are all consumed by the *cittaja kāya*. This *cittaja kāya* is nothing else but the stream of thoughts that we generate.**
- An aside: Sometimes the *gandhabba* can inhale “aroma” or *gandha* (*kabalīṅkāra āhāra*) and have a fine (misty) physical body too; **thus the name *gandhabba***, where “*abbha*” means “inhale” or in this case “absorb.” Such “more solidified” are the ones that people can sometimes see, and even be captured by a camera.

The Big Picture

2. Now we can take a step back and look at the big picture, and it gives a very illuminating view. **This “big picture” could be very helpful in comprehending the *anicca* nature.** Of course, this is not the only way to grasp *anicca* nature.

- The physical body that we value so much and think about as “me” is just a temporary shell. Just like anything material in this world, it grows and peaks and then starts the downhill march ending in decay and eventual death. At the death of physical body, the *gandhabba* that comes out and has to wait for a suitable womb to start building a new body, if the human *bhava* still has more *kammic* energy left; see, for example, [“*Bhava and Jāti – States of Existence and Births Therein*”](#) and [“*Gandhabba – Only in Human and Animal Realms.*”](#)
- This is a key factor that contributed to the concept of a “self” (“*āthma*”) in Hinduism. Hindu *yogis* who cultivated *abhiññā* powers could look back at a finite number of previous lives and could see a *gandhabba* giving rise to repeated rebirths in human form (they likely practiced *jhāna* in those recent previous lives, which made it easier for them to attain *abhiññā* powers in this life).
- **However, they could not see far back enough to see that one could be born an animal or even worse too.**

An Analogy

3. For humans and animals, we can compare the physical body controlled by the *gandhabba* to a car (or any other vehicle) being driven by a person. The body of the vehicle is like our physical body, and the driver is analogous to the *gandhabba*. Without the *gandhabba*, the physical body cannot do anything; it would be a lifeless, i.e., a dead body. It is the *gandhabba* that “operates” the human body; see, [“*Ghost in the Machine – Synonym for the Manomaya Kāya?*”](#)

- The birth of a *gandhabba*, in turn, is due to the *kammic* energy that was created in a previous life. The *kammaja kāya* represents that energy (which will be slowly depleting with time.) The term *kammaja kāya* comes from “*kamma*” and “*ja*” and “*kāya*.” Here “*ja*” means “birth” or “origin” and “*kāya*” is the body. Thus *kammaja kāya* means the “body that was created due to *kamma*.”
- Similarly, *cittaja kāya* arises due to *citta* (loosely translated as thoughts).
- “*Utu*” means “change” and the *utuja kāya* is that part of the *gandhabba* body which arises by conversion of *kammic* energy and the energy from *citta* (*javana*).

We Have Control Over *Cittaja Kāya*

4. **Now, we can see the critical importance of *citta*.** *Kammaja kāya* itself arises due to previous *kamma*, i.e., by *citta* in a previous life. More specifically, *javana* in such *citta* provided the energy for a new *bhava* which lead to the *kammaja kāya*; see, "[Javana of a Citta – The Root of Mental Power.](#)"

- *Kammaja kāya* is just a result, and it will slowly lose its energy over the human existence. We cannot do anything about (but if one does an *anatarīya kamma* it will be shortened). **Thus it is only the *cittaja kāya* that we have control over. This is critically important. We have finally converged to the essence of a human being.**
- This is why the Buddha said "*Mano pubbangama Dhamma....*" The origin of anything in this world can be traced back to the mind (thoughts).
- Here we see the truth of the above statement for living beings. In the future, it will become clear that ANYTHING in this world has origins in the mind. That is the story in the *Aggañña sutta*. But we have to proceed step-by-step. An introduction at, "[Buddhism and Evolution – Aggañña Sutta \(DN 27\).](#)"

5. **We have the control over our own destiny via our thoughts or *cittaja kāya*. I cannot emphasize enough the critical importance of the *cittaja kāya*.**

- Therefore, we have to pay attention to what kind of *āhāra* (conventionally translated as food, but you can see that is not a good translation) that we provide for our thought stream. But we have control over only those thoughts that we initiate.

Two Types of *Citta* (*Viññāṇa*) and Associated Feelings (*Vedanā*)

6. **There are two types of thoughts. Some *citta* arise due to *kamma vipāka*.** For example, we may get to taste a delicious meal due to a good *kamma vipāka* and while eating it we feel "*jivhā viññāṇa*," i.e., those come through our sense of taste. These do not have *abhisāṅkhāra*. Also see, "[Mōha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa](#)" and "[Vedanā \(Feelings\) Arise in Two Ways.](#)"

- **There is another set of *citta* that we initiate.** For example, based on that tasty meal, we start thinking about coming back to the same restaurant in the future, how to make it at home, etc. These generate *abhisāṅkhāra*. The worst kind is *apuññābhisāṅkhāra*, where we think about ways to get that meal in an immoral way, say, by stealing.
- But if it is just some food that quenches the hunger, we do not generate that type of *citta* subsequent to the *vipāka citta*.
- In another example, we see millions of things in a day (via *vipāka citta*), but generate *abhisāṅkhāra* only in a few.

The Unending Cycle of *Kamma/Vipāka*

7. The Buddha said, "*kammā vipākā vaddanthi, vipākā kamma sambhavo, thasmā punabbhavo hoti, evan loko pavaththathi.*"

- What that means is: "Because of *kamma vipāka* we experience sense inputs; based on those we initiate new *kamma* (*abhisāṅkhāra*), and those, in turn, will bring *vipāka* in the future; that is how the world evolves (rebirth process continues)."
- **Thus the critical part is where we generate *abhisāṅkhāra*. This is done with *javana citta*.** We will discuss this using *citta vīthi* in the future, but let us try to get some basic understanding of how these *javana citta* can be controlled. There are many posts in the "[Mind and Consciousness](#)" and "[Citta and Cetasika](#)" sections on *citta* and *citta vīthi*.

The Key Is to Change Our *Gati*

8. In fact, *javana citta* run too fast to control at that time. Billions of *citta* run in a second. How can we control them? **We cannot control them *in situ*, as they initially arise.**

- *Javana citta* arise due to our *gati*! This is the key.
- For example, an *Arahant* is not be tempted by any attractive sense input. He has removed all *āsavas* (cravings) and there is no *anusaya* to bubble up. He/she has “Noble *gati* of an *Arahant*.”
- On the other hand, a *Sotāpanna* may be tempted by that attractive sense input. He has not removed all *āsavas* (cravings); but he/she has removed *gati* suitable for the *apāyā*, so *javana citta* corresponding to highly immoral acts will not arise .
- The *āsava* (or *gati*) are analogous to the dirt in the bottom of a well. If the well water is perturbed, some dirt can come to the surface (*anusaya*). (i.e., if a sense input matching our *gati* comes into play, bad thoughts automatically come into the mind). This is discussed in the post, “[3. The Second Level – Key to Purify the Mind](#)” in the Meditation section.
- When one attains the *Sotāpanna* stage, the worst types of “gunk” will be removed. The rest will be removed in three more stages (*Sakadāgāmi*, *Anāgāmi*, *Arahant*).

Ānāpānasati/Satipaṭṭhāna* – Only Way to Change *Gati

9. In a normal human, whether or not immoral *javana citta* will be triggered, will depend on his/her set of *āsavas* (or *gati*). If that particular sensory input is attractive (i.e., matches his/her *āsavas*), then he/she may automatically initiate a highly immoral act to pursue that sense input.

- But the key here is the following. Even if such immoral *javana citta* arise, one can still suppress them **before the actual act is done**, if one has learned *Satipaṭṭhāna* (or *Ānāpāna*.) For extremely immoral acts, like killing another human, most people will be able to control such thoughts even without knowing about *Satipaṭṭhāna*. **But the more one learns Dhamma, and the more one understands the consequences, one will be able to have firm control even over minor offenses.**
- Furthermore, the more one controls one’s actions this way, the more one’s *gati* will change for the better. **This is another key!** This has been discussed in detail in, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).” There are several posts under that topic.

Irreversible Change of *Gati* with Understanding of *Tilakkhaṇa*

10. A large chunk of immoral *gati* goes away just via comprehending *anicca*, *dukkha*, *anatta* at the *Sotāpanna* stage. In fact, those *gati* that are suitable to be born in the *apāyā* will be removed. **This is called “*dassanena pahāthabbā*,” i.e., “removal via correct vision.”**

- Thus highly immoral *javana citta* do not arise in a *Sotāpanna*. A well that has been cleaned of the visible dirt at the bottom can not be muddied by perturbing the water in that well. Just like that, highly immoral thoughts do not arise in a *Sotāpanna* because it is free of “worst gunk.”
- However, to be able to grasp *anicca*, *dukkha*, *anatta*, one’s mind needs to be cleansed to some extent. One needs to gradual changing of one’s *gati* or *āsava*. The way to get there is to practice the correct *Ānāpāna bhāvanā* (or *Satipaṭṭhāna bhāvanā*.) See, “[Is Ānāpānasati Breath Meditation?](#).”

***Udayavaya Nāṇa* – How Suffering Arises and How It Can Be Stopped**

11. Thus the key to *Nibbāna* is in the *udayavaya nāṇa*: future rebirths arise (*udaya*) due to *abhisankhāra* (or *cetanā*) in our *javana citta*. By controlling immoral thoughts via reducing our *āsava* (bad *gati*), **we can eventually stop them from arising.**

- This is done by always **being vigilant** about the moral or immoral thoughts that come to our minds; **this is *Satipaṭṭhāna***; see, “[Mahā Satipaṭṭhāna Sutta](#).” Then if the **thought is moral, we cultivate it (*āna*)**; if it is

immoral, we stop it (*pāna*) before it leads to bad speech or actions; this is *Ānāpāna*; see, "[7. What is Ānāpāna?](#)"

- The other key point is that the more cleans one's mind, the more one will be able to comprehend. In particular, comprehending *anicca*, *dukkha*, *anatta*, REQUIRES a mind cleansed to some extent.
- I hope you can see that this is a feedback loop: each time one goes through the loop (being vigilant or *satipaṭṭhāna* to cleansing the mind or *ānāpāna* to more cleansed mind to grasping deeper Dhamma and back to being vigilant), one makes progress.

Importance of *Tilakkhaṇa*

12. This effect is greatly amplified when one finally grasps *Tilakkhaṇa*: One comprehends the futility of staying in this rebirth process (*anatta*.) Anything that we acquire through much effort cannot be kept to our satisfaction in the long run (*anicca*) and eventually lead to nothing but suffering (*dukkha*.) When one can "see" that, one will realize the urgency to reduce and remove one's *āsava* (bad *gati*). This leads to the *Sotāpanna* stage.

- A huge chunk of *āsava* (bad *gati*) simply disappear just via this understanding of the *anicca* nature at the *Sotāpanna* stage. Highly potent immoral *javana citta* do not arise in the mind of a *Sotāpanna*. Then no more rebirth in the *apāvā* or the four lowest realms.
- Thus with *udayavaya ñāṇa*, one can really clarify the path to the *Sotāpanna* stage.
- Then the remaining *āsava* disappear (*āsavakkhaya*) via three more stages (*Sakadāgāmī*, *Anāgāmī*, *Arahant*) by continuing this process (*Ānāpāna* and *Satipaṭṭhāna*), and one attains *Nibbāna*, permanent happiness or the removal of all future suffering.
- But one also needs to do *Ānāpāna* and *Satipaṭṭhāna* before the *Sotāpanna* stage in order to cleanse the mind to a level that is capable of grasping *anicca*, *dukkha*, *anatta*.

Closing the 'Gaps'

13. Finally, I would like to close the loop by pointing to the connection to the concepts we have discussed in the early posts. The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- As we saw in the previous post in this series, "[Āhāra \(Food\) in Udayavaya Ñāṇa](#)," all three types of mental foods are consumed by the *cittaja kāya*. And this confirmed by the above discussion: Our initial sense inputs that COULD trigger *javana citta* come via *phassa*, sense contacts. They are JUST contacts. But based on those, we COULD accumulate new *kamma vipāka* (*abhisankhāra*) by making *samphassa*; also see, "[Vedanā \(Feelings\) Arise in Two Ways](#)."
- *Mano sañcetanā āhāra* (which are *abhisankhāra*) come into play during those *samphassa*; this simply means we start "making plans", and also keep going back to that sensory input. With repeated triggers for a given sense input (*samphassa*) provides *āhāra* for that *viññāṇa*; for example, see, "[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms](#)," and other relevant posts.

By reading the links given (and also using the "Search box" at top right) one should be able to clarify key issues. Please don't hesitate to comment if you need help in clarifying a given concept.

14. Also, please make sure to enter your email address correctly when making a comment. Recently, one person entered incorrect address, and sent me the same question twice. Unfortunately, I have no way of letting him know that I replied each time.

7.1 Pāli Glossary

1/2/16: It seems that the audio files are not loading, so just removed the audio files.

We now have a [Popup Pāli Glossary with Pronunciation](#).

Possible Confusion in Pronunciation

It seems that the following conventions were adopted in order to make the text shorter.

In many cases:

1. “c” needs to be pronounced “**ch**” as in “**ch**arm” or “**ch**icago.”
2. “t” needs to be pronounced “**th**” as in “**th**ud” or “**th**row.”
 - For example, *citta* pronounced “chiththa”, *cakkhu* is pronounced “chakkhu”, *anicca* as “anichcha”, *anatta* as “anaththa”, *jāti* as “jathi”, *taṇhā* as “thanha”, *tilakkhana* as “thilakkhana.”
3. “d” needs to be pronounced “**th**” as in “**th**is” or “**th**at.” Note the difference in pronouncing “**th**” between 2 and 3.
 - For example, *vedanā* or *dāna* (as in giving) is pronounced this way.

Pronunciation Key

á rhymes like pat â → care ã → pay ā → father ê → pet ë → bee th → thin dh → this

ö → toe ü → moon ch → chin ng → thing

Common Pāli Words

I will keep adding more words to the glossary. If you would like me to add any missing words to the glossary, please send a comment.

10/6/15: I have added audio files. Please note the volume control below each audio.

| Pāli Word | Audio | Pronunciation | Meaning |
|-----------|---|---------------|---|
| akusala |  | akusala | immoral, unwholesome |
| adosa |  | adhosa | non-hatred |
| alobha |  | alobha | non-greed |
| amoha |  | amoha | non-delusion |
| Anāgāmī |  | Anāgāmī | Non-Returner (to the human world) |
| Anariya |  | Anāriyā | One who is not yet a Noble One or Ariya |
| anatta |  | anaththā | not in-control, helpless |
| anicca |  | anichchā | inability to maintain to one's satisfaction |
| anantara |  | | being in storage until retrieval (kamma vipāka) |

| Pāli Word | Audio | Pronunciation | Meaning |
|----------------------|---|-------------------------|--|
| anupassana |  | anupassanā | contemplate with anicca, dukkha, anatta |
| anusaya |  | | defilements arising from latent cravings (āsava) |
| apāya |  | apāya | common term for four lowest realms |
| abhijjā [abhijjhā] |  | abhijjā | strong greed |
| Arahant |  | | Never to be born in any of the 31 realms |
| Ariya |  | āriyā | noble one (Sotāpanna or above) |
| arūpa |  | arūpa | without rūpa (not really correct) |
| avijjā |  | avijjā | ignorance |
| ahirika |  | ahirikā | shamelessness |
| ahetuka |  | ahāthuka | without good roots |
| akasa |  | ākāsa | space (the void in between rūpa) |
| aloka |  | āloka | light, dissociating from “this world” |
| āpo |  | āpo | cohesive element |
| arammana |  | ārammana | object of thought |
| āsava (asaya) |  | asāva | deep-seated craving |
| asevana |  | āsāvanā | repeated practice |
| bahiddha |  | bahidhdhā | external |
| bala |  | | power |
| bhanga |  | bhangā | dissolution |
| bhava |  | | existence level |
| Bhaudhayā (Buddhist) |  | Bhaudhdhayā | One striving to stop the rebirth process |
| bhāvanā |  | bhāvanā | meditation, constant contemplation & use |
| Buddha |  | Budhdha (not “Budhdhā”) | Buddha Gotama |
| bhavaṅga |  | bhavangā | life continuum |
| bhaya | | | fear |
| citta | | chiththa | early stage of a thought (pure thought) |

| Pāli Word | Audio | Pronunciation | Meaning |
|--------------|---|---------------|---|
| dana |  | dāna | giving |
| dasaka |  | | decad |
| deva |  | dāva | a being in 6th-11th realms |
| dhamma |  | dhammā | Buddha's teachings, phenomenon, mental object |
| dhammavicaya |  | dhammavichaya | investigation of concepts like anicca |
| dhātu |  | dhāthu | element |
| diṭṭhi |  | | view, wrong view unless specified |
| domanassa |  | dhomanassa | displeasure |
| dosa |  | dhosa | hatred |
| dukha |  | dhukha | suffering |
| dukkha |  | dhukhka | suffering & it can be overcome |
| dvara |  | dhvāra | door (to the outside world) |
| ekaggata |  | ekaggathā | one-pointedness (of the mind) |
| gandha |  | | smell |
| gathi |  | gathi | character |
| hadayavatthu |  | hadayavaththu | seat of mind |
| hetu |  | hāthu | root cause |
| hiri |  | | shame |
| iddhipada |  | iddhipāda | means to accomplishment |
| kamachanda |  | kāmachanda | greed for things in kamaloka |
| kamaloka |  | kāmalōka | first 11 realms with five physical senses |
| kamavacara |  | kāmavachara | belonging to kamaloka |
| kamma |  | kammā | action, deed |
| kasina |  | kasina | meditation device (usu. a colored disk) |
| kaya |  | kāya | sensing (seeing, hearing, etc) |
| kaya |  | kaya | body |
| khaya |  | | cutting off |

| Pāli Word | Audio | Pronunciation | Meaning |
|----------------|---|----------------|-----------------------------------|
| khana |  | | moment, sub-moment |
| khandha |  | | aggregate, collection, heap |
| kilesa (keles) |  | kilāsa | defilement |
| kukkucca |  | kukkuchcha | tendency to do lowly things |
| kusala |  | | removal of defilements |
| lahuta |  | lahūta | lightness |
| lakkhana |  | lakkhāna | characteristic |
| lobha |  | lobha | greed |
| loka |  | loka | world |
| lokuttara |  | lokoththara | beyond this world, transcendental |
| maccariya |  | machchariya | extreme greed, hiding wealth |
| magga |  | magga | path |
| mana |  | māna | conceit |
| manasikara |  | manasikāra | memory |
| mano |  | mano | mind |
| manodhatu |  | manodhāthu | mind element |
| manodvara |  | manodvāra | mind door |
| manussa |  | | human being |
| marana |  | | death |
| metta |  | meththā | loving kindness |
| micchā diṭṭhi |  | miccha diththi | wrong views |
| mididha |  | mididhha | lethargic mind |
| moha |  | moha | delusion |
| mudita |  | mudhithā | appreciative joy |
| muduta |  | mudhuthā | malleability |
| mūla |  | mūla or mūla | root |
| nama |  | nāma | name, mental |
| nāmarūpa |  | nāmarūpa | name and form |

| Pāli Word | Audio | Pronunciation | Meaning |
|----------------------|---|----------------------|-------------------------------------|
| ñāṇa |  | ngāna | knowledge |
| nimitta |  | nimiththa | sign |
| nivarana |  | neevarana | hindrance |
| niraya |  | | hell |
| niyama |  | niyama (not niyāma) | law of nature |
| oja |  | ojā | nutritive essence |
| paccaya |  | pachchayā | condition |
| pahāna |  | pahāna | abandoning |
| pancadvara |  | panchadvāra | five sense doors |
| pañcakkhandha |  | pancakkhandhā | five aggregates |
| pancaupadanakkhandha |  | pancaupādānakkhandhā | grasping/craving of five aggregates |
| paññā |  | pangngā | wisdom |
| pīti |  | peethi (preethi) | joy |
| pannindriya |  | | wisdom faculty |
| paramatta |  | paramaththā | ultimate reality |
| pasāda rūpa |  | pasāda rūpa | sensitive matter (internal rūpa) |
| passaddhi |  | passadhhi | tranquility |
| pathavi |  | | element of hardness |
| paṭicca |  | patichcha | bind to something willingly |
| paṭigha |  | | aversion, dislike |
| pavutthi |  | pavutthi | during this life, current |
| peta (preta) |  | petā (pretha) | hungry ghost |
| phala |  | | fruit, fruition |
| phassa |  | | contact |
| puggala |  | | individual |
| purisa |  | | masculine |
| rāga |  | rāga | attachment to saṃsāra |
| rasa |  | | taste |

| Pāli Word | Audio | Pronunciation | Meaning |
|-------------------------------|---|---------------|--|
| rūpa |  | rūpa | matter (and energy) |
| rūpa kalapa |  | rūpa kalāpa | material group unit |
| rupavacara |  | rūpavāchara | belonging to rūpa loka |
| sadda |  | sadhdha | sound |
| sadharana |  | sādhāraṇa | universal, common |
| saddhā |  | sadhdhā | faith (through knowledge and understanding) |
| sahetuka |  | sahēthuka | with roots |
| Sakadāgāmī |  | Sakadagāmi | Once-Returner (one more rebirth as a human) |
| saḷāyatana |  | saḷāyathana | six sense bases |
| samādhi |  | samādhi | high concentration with pure mind |
| sammā |  | | quench (defilements) |
| samāpatti |  | samāpaththi | meditative attainment |
| samanantara |  | samananthara | contiguity, matching with anantara |
| samatha |  | samathā | calming the mind |
| samauppada |  | samauppāda | birth of a similar kind |
| saṅkappa |  | | ideas |
| saṅkhāra |  | saṅkhāra | actions leading to defilements |
| saṅkhata (sankata in Sinhala) |  | sankhatha | conditioned, formed by conditions |
| saññā |  | sangngā | perception |
| saṃsāra (also called saṃsāra) |  | saṃsāra | beginningless rebirth process |
| sasava |  | sāsavā | with craving |
| sati |  | sathi | mindful of anicca, dukkha, anatta |
| satipaṭṭhāna |  | sathipattāna | establishment of sati |
| sanyojana |  | sanyojana | bind to defilements, fetter |
| sīla |  | seela | virtue, moral conduct |
| sekha |  | sēkha | trainee (the three stages below the Arahant) |
| somanassa |  | somanassa | with joy |

| Pāli Word | Audio | Pronunciation | Meaning |
|---------------|---|---------------|--|
| sota |  | sotha | ear |
| | | | |
| Sotāpanna |  | Sothapanna | Stream Enterer (first stage of Nibbāna) |
| taṇhā |  | thanhā | attachment (bondage) due to greed, hate, or delusion |
| tejo |  | thājo | heat element |
| thina |  | theena | sloth |
| uddhacca |  | udhdhachchā | tendency to be high-minded (restlessness) |
| upādāna |  | upādāna | clinging, like to hold onto |
| upekkha |  | | equanimity, neutrality |
| uppatthi |  | uppaththi | birth |
| vacī |  | vachi | speech |
| vaṇṇa (varna) |  | | color |
| vayama |  | vayāma | effort |
| vāyo |  | vayo | fluidity |
| vedanā |  | vādana | feeling |
| vicāra |  | vichāra | sustained concentration on an object |
| vicikicchā |  | vichikicchā | acting without sati |
| vīmaṃsā |  | vīmaṃsā | investigation |
| vinnati |  | vingngāthi | intimation |
| viññāṇa |  | vingngana | (defiled) consciousness |
| vipāka |  | vipāka | result |
| vipassana |  | vipassanā | insight (via analysis of parts) |
| virati |  | virathi | abstinence from indulgence |
| virīya |  | | effort |
| visuddhi |  | visudhdhi | purification |
| vitakka |  | vithakka | initial application of the mind on an object |
| vīthi |  | veethi | process (sequential) |

| Pāli Word | Audio | Pronunciation | Meaning |
|-----------|---|---------------|---------------------------------|
| vottapana |  | voththapana | determining |
| vyāpāda |  | vyāpāda | ill will, stronger than paṭigha |

7.2 **Pāli Glossary – (A-K)**

August 12, 2016; Revised May 27, 2017; February 19, 2020

“Tipiṭaka English” Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts, and try to update old posts gradually. See the following two posts for details:

- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)
- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)

Additional Pronunciation Keys:

“a” is pronounced like “u” in cut; “ā” is pronounced like “a” in father

- “ī” is pronounced like “i” in sit; “ī” is pronounced like “ee” in bee
- “u” is pronounced like “u” in “put”; “ū” is pronounced like “oo” in cool
- “o” is pronounced like “oe” in “Moe”; “e” is pronounced like “a” in pay
- “c” needs to be pronounced like “ch” as in “charm” or “chicago”
- “ñ” needs to be pronounced like “gn” in “signor”

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, [“Pāli Glossary – \(L-Z\).”](#)

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a [Popup Pāli Glossary with Pronunciation](#), thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

| Pāli Word | Meaning | Audio |
|--------------|--|---|
| abhaya | "a" + "bhaya"; doing something to stop someone's fear |  |
| abhaya dāna | saving the life of a living being |  |
| abhijjhā | strong greed |  |
| abhiññā | supermundane powers |  |
| abhisaṅkhāra | strong saṅkhāra that lead to rebirths and strong vipāka |  |
| ādīnava | bad outcome: Assāda, Ādīnava, Nissarana – Introduction |  |
| adhimokkha | arising to the top; reaching a high value |  |

| Pāli Word | Meaning | Audio |
|------------------|---|---|
| adhivāsana | things one gets used to based on sansāric habits; part of gathi |  |
| adinnādāna | stealing; taking something without permission |  |
| adosa | without hatred |  |
| ajjhatta | internal |  |
| ākāsa | space (the void in between rūpa) |  |
| ākāsānañcāyatana | first arūpa brahma realm |  |
| ākīñcaññāyatana | third arūpa brahma realm |  |
| akusala | immoral act |  |
| āhāra | nutrients (for body or mind) |  |
| ahetuka | without good roots |  |
| ahirika | shamelessness |  |
| akālika | remove defilements or timeless (no birth or death, i.e., Nibbāna) |  |
| alobha | without greed |  |
| āloka | light, dissociating from “this world” |  |
| āmisa | mundane (belonging to 31 realms) |  |
| amoha | without delusion; moral mindset |  |
| amurta | fine food (drink) of devas |  |
| Anāgāmī | Non-Returner (to the human world) |  |
| anāgata | future |  |
| ānāpāna | 7. What is Ānāpāna? |  |
| ānāpānasati | 6. Ānāpānasati Bhāvanā (Introduction) |  |
| anāriya | not Noble |  |

| Pāli Word | Meaning | Audio |
|-------------------------|--|---|
| anatoppa | fear of doing immoral deeds |  |
| anatta | not in-control, helpless |  |
| ānenjābhi saṅkhāra | Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka |  |
| anicca | inability to maintain to one's satisfaction |  |
| Aniccata | tendency to change unexpectedly; characteristic of a rūpa: Rūpa (Material Form) – Table |  |
| anidassana | Cannot be seen; can also mean pure as in anidassana viññāṇa |  |
| animisa | without pausing for even a moment: Animisa Locana Bodhi Poojā – A Prelude to Acts of Gratitude |  |
| aññamañña | depend on each other |  |
| anantara | being in storage until retrieval (kamma vipāka) |  |
| anumodanā | accept pattidana (transfer of merits or sharing of merits) with joy |  |
| anupassanā | discard kileasa by contemplating with anicca, dukkha, anatta: see #6 of 4. What do all these Different Meditation Techniques Mean? |  |
| anusaya | defilements arising from latent cravings (āsava) and kileasa |  |
| apacāyana | paying respects to those with higher virtues: Puñña Kamma – Dāna, Sīla, Bhāvanā |  |
| aparāpariya vedaniya | kamma vipāka that can materialize at any time in future |  |
| apāya | common term for four lowest realms |  |
| āpo | cohesive element |  |
| Appanā samādhi | almost at jhāna: What is Samādhi? – Three Kinds of Mindfulness |  |
| appaṇāta | not to liking; dislikes |  |
| appaṭigha | cannot be grasped or touched |  |
| apuñña | immoral |  |
| apuññabhi saṅkhāra | highly immoral saṅkhāra |  |
| Arahant | never to be born in any of the 31 realms |  |

| Pāli Word | Meaning | Audio |
|------------------------|--|---|
| ārammaṇa | object of thought |  |
| Ariya | Noble person (Sotāpanna or above) |  |
| arūpa | without rūpa |  |
| asañña | without perception; without sañña |  |
| āsava =āsaya | deep-seated craving |  |
| āsavakkhaya ñāṇa | Knowledge of removing āsava: The Way to Nibbāna – Removal of Āsavas |  |
| āsevana | repeated practice; associate |  |
| asobhana | ugly or defiled (used mainly for cetasika) |  |
| asura | one of the four apāyā; beings there have large bodies and are inactive |  |
| assāda | enjoyment |  |
| atīta | past |  |
| atta | opposite of anatta or eight |  |
| attha | opposite of anatta; perception that one has total control |  |
| avici | one of the niraya (hell) |  |
| avihiṃsā | non-aggressive |  |
| avinibbhoga | constituents not separable, as in a avinibbhoga rūpa kalapa |  |
| avyāpāda = abyāpāda | not angry, kind |  |
| āyatana | an indriya becomes as āyatana: Sorting out Some Key Pāli Terms - Tanhā Lobha Dosa Moha etc |  |
| āyu | lifetime |  |
| avijjā | Ignorance of Tilakkhaṇa |  |
| bahiddhā | external |  |
| bahijja | external |  |

| Pāli Word | Meaning | Audio |
|--------------------------|---|---|
| bala | power |  |
| bali | distort |  |
| bīja | seed |  |
| bhaṅga | dissolution; destruction |  |
| bhava | realm of existence |  |
| Bhauddhayā (Buddhist) | One striving to stop the rebirth process |  |
| bhāvanā | meditation, constant contemplation & use |  |
| bhavaṅga | life continuum |  |
| bhaya | fear |  |
| Bhikkhu | Buddhist monk |  |
| bodhicitta | a Mahayana term denoting "enlightenment-mind" |  |
| bojjhaṅga | bodhi aṅga or facilitating factor for Nibbāna |  |
| brahma | a being in rūpa or arūpa brahma realms |  |
| Buddha | Buddha Gotama |  |
| cakkhu | eye or seeing |  |
| cakkavāḷa | planetary system like our Solar system |  |
| cetanā | intention; but deeper: What is Intention in Karma? |  |
| cetasika | mental factor |  |
| chanda | liking |  |
| citta | thought (pure thought) |  |
| cittānupassanā | doing anupassana via contemplating on thoughts |  |
| citta vīthi | citta come in packets of a discrete number; a single citta does not arise |  |

| Pāli Word | Meaning | Audio |
|-----------------------------|--|---|
| cutūpapāta ñāṇa | ability to see all previous births |  |
| cuti | death |  |
| cuti citta | moment of death |  |
| dāna | giving |  |
| dasa | ten |  |
| dasaka | decad; group of 10 |  |
| dassana | vision; but normally used for "comprehending" |  |
| dassanena pahātabba | removing (kilesa) via comprehension of Dhamma |  |
| desanā | verbal discourse |  |
| deva | a being in 6th-11th realms |  |
| Dhamma | Buddha's teachings, phenomenon, mental object |  |
| dhammavicaya (sambojjhaṅga) | investigation of concepts like anicca |  |
| dhammānudhammā patipadā | condition for attaining Sotāpanna stage: Four Conditions for Attaining Sotāpanna Magga/Phala |  |
| dhammānupassanā | doing anupassana via contemplating on Dhamma |  |
| dhātu | element |  |
| dhyāna (same as jhāna) | meditative state with rūpa loka or arūpa loka consciousness |  |
| ditta | observation |  |
| ditthi | view, wrong view unless specified |  |
| diṭṭhijukamma | "diṭṭhi"+"uju"+"kamma" or getting rid of wrong views on kamma: Puñña Kamma – Dāna, Sīla, Bhāvanā |  |
| domanassa | mental agony, displeasure; not bodily suffering |  |
| dosa | hatred |  |
| dosakkhaya | dosa + khaya or removal of hate |  |

| Pāli Word | Meaning | Audio |
|---------------------------|---|---|
| dugathi | "du" + "gathi" or habits that can lead to bad rebirths |  |
| dukha | suffering |  |
| dukkha | suffering & it can be stopped from arising |  |
| dvāra | door (to the external world) |  |
| ehipassiko | a quality of Dhamma, removing defilements in real time: Supreme Qualities of Buddha, Dhamma, Saṅgha |  |
| ekaggatā | one-pointedness (of the mind) |  |
| gandha | smell, odor |  |
| gandhabba | Gandhabba (Manomaya Kāya) |  |
| gati | character, habits |  |
| ghāṇa | nose or smelling |  |
| gotrabhu | change of lineage ("gotra") when getting close to a jhāna |  |
| hadaya vatthu | seat of mind (in the gandhabbayā) |  |
| hetu | root cause |  |
| hiri | shamefulness for doing akusala kamma |  |
| iddhi | special powers or knowledges |  |
| iddhipāda | means to special (mental) accomplishment |  |
| indriya | one of the six sense faculties when used without lobha, dosa, moha |  |
| issa (irisiyā in Sinhala) | jealousy |  |
| Itthi (sthree in Sinhala) | feminine |  |
| jarā | getting old or weak |  |
| Jaratā | one of 28 rūpa: Rūpa (Material Form) |  |
| jāti | birth of a living being OR birth of anything |  |

| Pāli Word | Meaning | Audio |
|-------------------------------------|--|---|
| javana | those citta with which saṅkhāra committed or kamma vipāka generated: Javana of a Citta – The Root of Mental Power |  |
| jhāna (same as dhyana) | meditative state with rūpa loka or arūpa loka consciousness |  |
| jivhā | tongue (more accurately jivha indriya) OR taste |  |
| jīvita | life: jivita indriya maintains life |  |
| Jīvitindriya | one of the 7 universal cetasika: Cetasika (Mental Factors) OR one of the 28 rūpa: Rūpa (Material Form) |  |
| kabaḷikāra | one of the 4 āhāra: Āhāra (Food) in Udayavaya Ṇāna |  |
| kappa (kalpa in Sinhala) | time duration of an entity: kalpa of a human is about 100 years; mahā kalpa is lifetime of the universe |  |
| kalyāṇa mittā (or mitrā in Sinhala) | Noble friend: Four Conditions for Attaining Sotāpanna Magga/Phala |  |
| kāmacchanda | greed for things in kamaloka |  |
| kāma loka | first 11 realms with five physical senses |  |
| kāma rāga | attachment to sense pleasures in kamaloka |  |
| kāmāvacara | belonging to kamaloka |  |
| kāmesumicchācārā | immoral ways of enjoying sense pleasures: The Five Precepts – What the Buddha Meant by Them |  |
| kamma | action, deed |  |
| kammanta | actions as in sammā kammanta |  |
| kammaṭṭhāna | meditation verses or procedures |  |
| kandha | heap, pile, or aggregate |  |
| karunā | compassion in the suffering of others |  |
| kasina | meditation object in anāriya jhāna (eg. a colored disk) |  |
| kāya | pertaining to the body or action |  |
| kaya | physical or mental body |  |
| kāyānupassanā | doing anupassana via contemplating on the bodily actions |  |

| Pāli Word | Meaning | Audio |
|-----------------|---|---|
| khaṇika samādhi | What is Samādhi? – Three Kinds of Mindfulness |  |
| khaya | cutting off or gradually reduce |  |
| khaṇa | moment, sub-moment |  |
| kriyā | action, deed |  |

7.3 **Pāli Glossary – (L-Z)**

August 12, 2016; Revised May 27, 2017; February 19, 2020

“Tipiṭaka English” Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts, and try to update old posts gradually. See the following two posts for details:

- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)
- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)

Additional Pronunciation Keys:

“a” is pronounced like “u” in cut; “ā” is pronounced like “a” in father

- “ī” is pronounced like “i” in sit; “ī” is pronounced like “ee” in bee
- “u” is pronounced like “u” in “put”; “ū” is pronounced like “oo” in cool
- “o” is pronounced like “oe” in “Moe”; “e” is pronounced like “a” in pay
- “c” needs to be pronounced like “ch” as in “charm” or “chicago”
- “ñ” needs to be pronounced like “gn” in “signor”

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, [“Pāli Glossary – \(A-K\).”](#)

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a [Popup Pāli Glossary with Pronunciation](#), thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

| Pāli Word | Meaning | Audio |
|------------|--|---|
| lobha | excess greed: Lobha, Rāga and Kāmaccaṇḍa, Kāmarāga |  |
| lahutā | lightness (e.g., kāya lahutā is lightness in body) |  |
| lakkhaṇa | characteristic of |  |
| loka | realm or world depending on the context |  |
| lokiya | belonging to this world of 31 realms |  |
| lokuttara | beyond this world of 31 realms, transcendental |  |
| macchariya | hiding wealth due to extreme greed |  |

| Pāli Word | Meaning | Audio |
|------------------|---|---|
| magga | path; procedure |  |
| mahā | large or important |  |
| māna | arrogance, self-admiration |  |
| manasikāra | memory. Details at: Citta and Cetasika – How Viññāna (Consciousness) Arises |  |
| mano | mind |  |
| mano sañcetanā | vedanā, saññā that arise due to one's gati |  |
| manodhatu | mind element |  |
| manodvāra | mind door to nāmaloka; see, Our Two Worlds: Material and Immaterial |  |
| manodvāravajjana | a citta coming to the mind door as in manodvāravajjana citta |  |
| manussa | human being |  |
| marana | death (death of a physical body is not necessarily the end of human bhava; see, "Antarābhava and Gandhabba") |  |
| mettā | kindness. Has two meanings: "Ariya Mettā Bhāvanā" |  |
| micchā ditṭhi | wrong views; see. "Wrong Views (Micchā Ditṭhi) – A Simpler Analysis" |  |
| middha | lethargic mind |  |
| moha | delusion; mind totally covered; see, "Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā" |  |
| mohakkhaya | moha + khaya, removing delusion |  |
| muditā | joy in the success of others |  |
| mudutā | malleability; e.g., kāya midutā |  |
| mūla | root (usually in root cause) |  |
| musāvāda | lies, trying to deceive: The Five Precepts – What the Buddha Meant by Them |  |
| muta | combined word for smelling, tasting, and touching |  |
| nāma | name, mental |  |

| Pāli Word | Meaning | Audio |
|------------------------------|---|---|
| nāmarūpa | name and form OR mental image of a nāma and rūpa |  |
| namaskāraya (Sinhala) | Namaskāraya – Homage to the Buddha |  |
| ñāṇa | knowledge |  |
| nātha | with refuge, opposite of anātha |  |
| nekkhamma | relinquish sense pleasures: Difference Between Giving Up Valuables and Losing Interest in Worthless |  |
| neva saññā nā saññāyatana | fourth arūpa brahma realm |  |
| Nibbāna | stopping the rebirth process: Nibbāna |  |
| nibbatti lakkhaṇa | Nibbatti Lakkhana in Udayavaya Ñāna |  |
| nicca | having total control, that ability |  |
| niddesa | short description: Sutta – Introduction |  |
| nimitta | sign; something resembling |  |
| nirāmisa | neutral thoughts without sense cravings |  |
| nirodha | nir + udā or stop from arising |  |
| nissaraṇa | willingly give up assāda: Assāda, Ādīnava, Nissaraṇa – Introduction |  |
| Nivana (Sinhala) | |  |
| nīvaraṇa | hindrance; covered mind |  |
| niraya | hell |  |
| niyama (or niyāma) | law of nature |  |
| niyata | permanent, fixed |  |
| ojā | nutritive essence |  |
| oḷārika | rough, condensed |  |
| opapātika | instantaneous and fully-formed birth as in deva and brahma realms |  |

| Pāli Word | Meaning | Audio |
|---------------------------------------|---|---|
| pabhassara | devoid of greed, hate, and ignorance; e.g., pabhassara citta |  |
| paccayā | condition |  |
| paccuppanna | conditional arising; present moment arising due to conditions |  |
| pahāna | abandon; remove |  |
| pahātabba | removal |  |
| pakiṇṇaka | particulars or occasionals as in pakiṇṇaka cetasika: Cetasika – Connection to Gati |  |
| pāṇātipātā | killing a living being: The Five Precepts – What the Buddha Meant by Them |  |
| panca | five |  |
| pañcadvāra | five sense doors |  |
| pañcadvāra vajjana cittā | Citta Vīthi – Processing of Sense Inputs |  |
| pañcakkhandha | five aggregates |  |
| pañcanīvaraṇa | five hindrances that cover the mind |  |
| pañcaupādānakkhandha | grasping/craving of the five aggregates: Pañcaupādānakkhandha – It is All Mental |  |
| paṇīta | likable or good |  |
| paññā | wisdom; comprehension of Tilakkhaṇa |  |
| pāpa kammā | immoral actions |  |
| para loka (paralowa in sinhala) | a human or animal gandhabba lives in para loka until a womb becomes available: Hidden World of the Gandhabba: Netherworld (Para Loka) |  |
| pāramitā | strive through many rebirths: Paramita and Niyata Vivarana – Myths or Realities? |  |
| paribramana | rotating around another body |  |
| perideva | lamentation, especially upon remembering a past mishap |  |
| parivajjana | staying clear of bad influences: The Sotāpanna Stage |  |

| Pāli Word | Meaning | Audio |
|-----------------------------------|---|---|
| pīti | joy |  |
| paññindriya | wisdom faculty |  |
| parāmatta | ultimate reality |  |
| pharusāvācā | harsh speech: Ten Immoral Actions (Dasa Akusala) |  |
| pasāda rūpā | sensitive matter (five internal senses; not physical senses): Brain – Interface between Mind and Body |  |
| passaddhi | tranquility |  |
| pathavi | element of hardness |  |
| paṭicca | get bonded to something willingly |  |
| paṭigha | aversion, dislike |  |
| patikūla manasikāra bhāvanā | 4. What do all these Different Meditation Techniques Mean? |  |
| paṭipadā | a procedure; way of living, like in majjima paṭipāda |  |
| paṭiniddesa | detailed description: Sutta – Introduction |  |
| paṭisandhi | Grasping a new existence (bhava) |  |
| paṭisevana | good associations as in paṭisevana pahātabba: The Sotāpanna Stage |  |
| pattānumodanā | Transfer of Merits (Pattidāna) – How Does it Happen? |  |
| pattidāna | transfer of merits: Transfer of Merits (Pattidāna) – How Does it Happen? |  |
| pavutthi | during this life, current |  |
| pīlama (peleema in Sinhala) | incessant stress, agitation: Anicca – The Incessant Distress (“Pīlana”) |  |
| peta (pretha) | hungry ghost; one of the four apāyā |  |
| phala (pala in Sinhala) | fruit, fruition |  |
| phassa | sense contact; most times it is defiled or samphassa: Difference between Phassa and Samphassa |  |

| Pāli Word | Meaning | Audio |
|-----------------------------|---|---|
| pisuṇāvācā | slandering: Ten Immoral Actions (Dasa Akusala) |  |
| phoṭṭhabba | "poththa" + "abba", where "poththa" is skin: sense of touch |  |
| pubbe | previous |  |
| pubbenivāsānussa ti ñāṇa | see #12 of Antarābhava and Gandhabba |  |
| puggala | individual |  |
| puñña kriyā | deed that makes one's heart joyful |  |
| purisa | masculine |  |
| rāga | attachment to the 31 realms: Lobha, Rāga and Kāmaccanda, Kāmarāga |  |
| rāgakkhaya | rāga + khaya: removal of attachment to the 31 realms |  |
| rasa | taste |  |
| rūpa | matter AND energy |  |
| rūpa kalāpa | elementary material group unit: Rūpa Kalāpa (Grouping of Matter) |  |
| rupavacara | belonging to rūpa loka |  |
| sabba | all |  |
| sacca | truth, as in a Noble Truth |  |
| sadda | sound |  |
| saddhā | faith (through knowledge and understanding) |  |
| sahajāta | born together |  |
| sahetuka | with good roots as in dvihetuka and tihetuka; if no good roots it is an ahetuka birth |  |
| Sakadāgāmī | Once-Returner (one more rebirth in kāma loka) |  |
| saḷāyatana | six sense bases for a normal human |  |
| samādhi | concentration on a good or bad mindset: What is Samādhi? – Three Kinds of Mindfulness |  |

| Pāli Word | Meaning | Audio |
|----------------------------------|--|---|
| samanantara | matching with anantara: Anantara and Samanantara Paccayā |  |
| samāpatti | different from jhāna, see: Citta Vīthi – Processing of Sense Inputs |  |
| sammā | quench (defilements): What is “San”? Meaning of Sansāra (or Samsāra) |  |
| sammappadhāna | four main efforts to stop "san" from arising: Two Versions of 37 Factors of Enlightenment |  |
| samatha | calming the mind |  |
| sāmisa | citta with kilesa or akusala cetasika |  |
| sampajāna | sorting defiled thoughts: Satipatthāna Sutta – Structure |  |
| sampappalāpa | frivolous talk: Ten Immoral Actions (Dasa Akusala) |  |
| samphassa | "san" + "phassa": Difference between Phassa and Samphassa |  |
| sampaṭṭhana | where "gati" are incorporated into a citta vīthi: Citta Vīthi – Processing of Sense Inputs |  |
| sampayutta | together and inseparable, like a dye dissolved in water |  |
| samudaya | arising due to "san": "san" + "udaya" |  |
| samuppāda | birth of a similar kind: sama + uppada |  |
| saṃvega or saṅvega | "san" + "vega": javana power in a citta due to "san": see #9 of Javana of a Citta – The Root of Mental Power |  |
| san | San |  |
| sandiṭṭhiko | "san" + "diṭṭhi" or enable seeing "san": Supreme Qualities of Buddha, Dhamma, Saṅgha |  |
| saṅkappa | thoughts, ideas |  |
| saṅkhāra | actions leading to defilements, habits |  |
| saṅkhata (sankata Sinhala) | in arisen by conditions |  |
| saññā | perception, identification |  |
| saṃsāra or saṅsāra | beginningless rebirth process: What is “San”? Meaning of Sansāra (or Samsāra) |  |

| Pāli Word | Meaning | Audio |
|-------------------------------------|--|---|
| samsāric | related to the rebirth process |  |
| santati | one of the 28 types of rūpa: Rūpa (Material Form) |  |
| saṃvara | "san" + "vara" or stop "san" by moral behavior: What is "San"? Meaning of Sansāra (or Samsāra) |  |
| saṃvarena | via sanvara as in sanvarena pahatabba: The Sotāpanna Stage |  |
| saṃvega | "san" + "vega": enhanced javana of a citta due to "san", i.e., highly emotional |  |
| sapta or saptha | seven |  |
| sāsana | Buddha sāsana is Ministry of the Buddha |  |
| sasankhārika | immoral citta arising due to shrunken mind (thīna middha) |  |
| sāsava | with craving |  |
| satara (in Sinhala) | four |  |
| sakkāya diṭṭhi (or sathkāya diṭṭhi) | perception that things in this world are worth striving for: How do we Decide which View is Wrong View (Ditthi)? |  |
| sati | in the mindset of anicca, dukkha, anatta: Satipatthāna – Introduction |  |
| satipatṭhāna | maintain sati: Mahā Satipatṭhāna Sutta |  |
| santīraṇa | where a decision is made in a citta vīthi: Citta Vīthi – Processing of Sense Inputs |  |
| sanyojana or saṃyojana | bind to defilements or "san" |  |
| sīla | virtue, moral conduct |  |
| silabbata paramasa | perception that Nibbāna can be attained via just obeying set precepts or procedures |  |
| sekha | trainee (the three stages below the Arahant stage) |  |
| sobhana | good, likable, moral |  |
| soka | sorrow due to personal loss |  |
| somanassa | with joy |  |
| sota | Two possible meanings: ear and Noble Eightfold Path |  |

| Pāli Word | Meaning | Audio |
|------------------|---|---|
| Sotāpanna | Stream Enterer (first stage of Nibbāna) |  |
| Suddhaṭṭhaka | smallest material element: The Origin of Matter – Suddhatthaka |  |
| suddhāvāsa | Brahma realms reserved for the Anāgāmi |  |
| sugati | "su" + "gathi" or moral habits/behavior; also good realms: Sansāric Habits, Character (Gathi), and Cravings (Āsava) |  |
| sukha | bodily pleasure, like with a massage; somannasa is mental |  |
| sukuma | fine; not coarse |  |
| suññatā | emptiness: What is Sunyata or Sunnata (Emptiness)? |  |
| suta | sound |  |
| sutta | discourse in the Tipiṭaka |  |
| suva | as in Nivan suva: |  |
| taṇhā | attachment (bondage) due to greed, hate, or delusion |  |
| tatramajjhataṭṭā | neutrality of mind; not upekkhā: Cetasika – Connection to Gati |  |
| tejo | heat element |  |
| Thero | One who has attained Nibbāna; nowadays it is used for non-Arahants bhikkhus too |  |
| thīna | shrinking of the mind, not alert |  |
| tuccha | lowly (behavior) |  |
| tiparivaṭṭa | Three rounds of bondage to this world. |  |
| tīhetuka | paṭisandhi with three good roots |  |
| tilakkhana | Three characteristics of the 31 realms: Anicca, Dukkha, Anatta |  |
| Tipiṭaka | three piṭaka: sutta, vinaya, abhidhamma: Preservation of the Dhamma |  |
| tisarana | refuge in Buddha, Dhamma, Saṅgha: Tisarana Vandana and Its Effects on One's Gati |  |
| tivijjā | Three special knowledges of the Buddha: The Way to Nibbāna – Removal of Āsavā |  |

| Pāli Word | Meaning | Audio |
|------------------------------|---|---|
| uccheda ditṭhi | wrong view that death of the physical body is the end of a living being, i.e., disbelief in rebirth process |  |
| udayavaya | arising and destruction of a saṅkhata (sankata in Sinhala): Udayavaya Ñāna |  |
| udayavaya or udayabbaya ñāṇa | Udayavaya Ñāna |  |
| uddhacca | tendency to be high-minded (restlessness) |  |
| uddesa | very short description: Sutta – Introduction |  |
| upacāra | close to |  |
| upacāra samādhi | samādhi close to jhānic state |  |
| upādāna | clinging, like to hold onto |  |
| upekkha | equanimity, neutrality |  |
| uppatti | birth |  |
| utu | natural change kammaja and cittaja energies to rūpa |  |
| utuja rūpa | rūpa produced via the transformation of kammaja and cittaja rūpa |  |
| vacī | speech |  |
| vaṇṇa (varna in sinhala) | color |  |
| vaya | destruction or deviating to immorality |  |
| vāyāma | effort |  |
| vāyo | element of movement, motion |  |
| vedanā | feeling or more precisely "sensing of an event": Vedanā (Feelings) |  |
| vedanānupassanā | anupassanā on feelings: Satipatṭhāna – Introduction |  |
| veyyāvacca | paying homage to and taking care of Holy places: Puñña Kamma – Dāna, Sīla, Bhāvanā |  |
| vibhava | disbelief in rebirth: Kāma Taṇhā, Bhava Taṇhā, Vibhava Taṇhā |  |
| vicāra | sustained concentration on a thought object |  |

| Pāli Word | Meaning | Audio |
|------------------|--|---|
| vicikicchā | acting without sati; uncertainty of what to do; doing inappropriate things |  |
| vipassanā | insight meditation with and for clear vision: 4. What do all these Different Meditation Techniques Mean? |  |
| vimāna | residence, normally of a deva |  |
| vimansā | contemplation, investigation |  |
| vimutti | release (from the rebirth process) |  |
| vinaya | rules of discipline for bhikkhus: Kamma, Debt, and Meditation |  |
| viññāṇaṅcāyatana | second arūpi brahma realm: 31 Realms of Existence |  |
| viññata | comprehension via viññāṇa |  |
| viññati | intimation. For example, kāya viññati is express intention via body movement. |  |
| viññāṇa | defiled consciousness |  |
| viññāṇaṅcāyatana | second arūpa brahma realm: 31 Realms of Existence |  |
| vinodanā | in vinodanaā pahatabba: The Sotāpanna Stage |  |
| vipāka | result (of a kamma) |  |
| viparināma | unexpected change |  |
| vipassanā | removing defilements via insight of Tilakkhaṇa |  |
| vippayutta | appear together, but separable; like a current in a wire |  |
| virati | lose craving for indulgence |  |
| viriya | effort |  |
| visuddhi | purification |  |
| vitakka | initial application of the mind on an object |  |
| vīthi | street; but in a citta vīthi means a "packet of thoughts" with a certain number of citta |  |
| votthapana | determining (citta) |  |

| Pāli Word | Meaning | Audio |
|-----------------------|---|---|

7.4 List of “San” Words and Other Pāli Roots

June 29, 2017; revised November 9, 2018

1. Pāli is a phonetic language. It does not have its own alphabet. *Tipiṭaka* was originally written down in Pāli with the Sinhala alphabet.

- Pāli verses are composed for ease of oral transmission. *Tipiṭaka* was orally transmitted faithfully for several hundred years.
- So, in many cases, root words are hidden in combined words in verses that were composed to rhyme better for easy oral transmission.

2. Rather than trying to find roots in Sanskrit, that is the way to find the roots. As I explained with evidence from the *Tipiṭaka*, **the Buddha prohibited the use of Sanskrit words, or even to translate the *Tipiṭaka* to Sanskrit**; see, “[Preservation of the Dhamma.](#)”

- That is because despite some similarities, Sanskrit many words were composed to sound more “impressive”, without paying attention to embedded meanings.
- For example, *Pratītyasamutpāda* is the Sanskrit term for *Paṭicca Samuppāda*. *Pratītyasamutpāda* sounds impressive but the meaning is not clear at all.
- On the other hand, it is clear in *paticca + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda.”](#)”

3. Pali words are combined in ways to rhyme better. By finding key root-words embedded in such “combined words”, one can easily figure out the meaning.

- “*yadaniccam tam dukkham, yam dukkham tadanattā*” verse appears in many *suttā*.
- In order to understand it, we need to “expand it” or “unfold it”: “*yad aniccam tam dukkham, yam dukkham tad anattā.*”
- Now the meaning becomes clear: “*anicca* nature leads to *dukkha*, *dukkha* nature leads to *anatta* nature”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations.](#)”

4. The following are some examples of combination of words to make a verse rhyme better for oral transmission.

Naidham = na idham or “not the case.”

Ayamantimā jāti = ayam + antima + jāti or “my last birth.”

Nūppajjati = na + uppajjati: “will not arise.”

Cittappasāda = citta + pasāda; note the two p’s in the combined word that allow it to rhyme better.

Similarly in: *Rūpakkhandha = rūpa khandha*: “*rūpa* aggregate.”

Aveccappasāda = ava icca pasāda or “faith that leads to overcoming *taṇhā* (attachment).”

Buddha = bhava + uddha: one who figured out how to stop existences (*bhava*) from arising.

Bhavaṅga = bhava + aṅga; intrinsic aspect of *bhava*.

Sakkāya = sath + kāya: good collections usually referring to the five aggregates. *Sakkāya diṭṭhi* is the view that the five aggregates should be embraced.

Anāpāna = āna + āpāna: “taking in” and “putting out.”

Note the pronunciation of the following words sort of backwards to rhyme better:

- *Anāgāmi* = *na āgāmi*: not coming back (in reference to not to come back to *kāma loka* for a person who has attained the *Anāgāmi* stage of *Nibbāna*).
- *Anatimāna* = *na + atimāna*: *atimāna* is “high-mindedness” and *anatimāna* is opposite or “humble.”

5. Just by knowing what is meant by the root “*san*,” many Pāli words can be understood easily; see, “[What is “San”? Meaning of Sansara \(or Samsara\).](#)”

- Note that some words are written and pronounced with emphasis on “m” rather than “n”, because it rhymes better that way; a good example is *saṃsāra* (*saṃsāra*) which can be written and pronounced either way.
- On the other hand, *sammā* comes from “*san*” + “*mā*,” but always pronounced as “*sammā*,” because it rhymes easier that way; eg., *sammā diṭṭhi*, *sammā saṅkappa*, etc.
- It must be kept in mind that “*san*” has various levels. First one needs to remove ‘*san*’ that lead to immoral activities that can lead to births in the *apāyā*; after one becomes a *Sotāpanna*, one should strive to eliminate “*san*” involving sense pleasures; after becoming an *Anāgāmi*, the goal is to remove “*san*” associated with *rūpa* and *arūpa jhāna*. I only stated “sense pleasures” in the Table.

6. I plan to add another table for Pāli words with a few more key “roots.”

Pāli Words with “San” Root

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
|----|-------------------|---|---|--|
| 1 | Sammā | san + mā | mā means to "remove" | associated with removing "san" |
| 2 | sammāpaṭipatti | san + mā +patipatti | patipatti is a process | method or effort to remove "san" |
| 3 | sammāvimutti | san + mā + vimutti | vimutti is complete release | Arahant phala; Nibbāna |
| 4 | Sammanti | san + mā | like gaccā to gaccanti | attaining peacefulness by removing "san" |
| 5 | samantano | san + anta; rhymes like samananta | anta is end | a process that gets rid of "san" |
| 6 | Sammā diṭṭhi | Sammā + diṭṭhi | diṭṭhi is vision (here to see Tilakkhaṇa) | clear vision to see danger of (and how to remove) "san" |
| 7 | Sammā saṅkappa | Sammā + saṅkappa | saṅkappa are conscious/unconscious thoughts | thoughts to removing "san" |
| 8 | Sammā vācā | Sammā + vācā | vācā is conscious thoughts/speech | speech to remove "san" |
| 9 | Sammā kammanta | Sammā + kammanta | kammanta is actions | bodily actions to remove "san" |
| 10 | Sammā ajīva | Sammā + ajīva | ajīva is way one lives | living style to remove "san" |
| 11 | Sammā vāyāma | Sammā + vāyāma | vāyāma is effort | effort to remove "san" |
| 12 | Sammā sati | Sammā + sati | sati is mindfulness (about Tilakkhaṇa) | mindfulness to remove "san" |
| 13 | Sammā samādhi | Sammā + samādhi | samādhi is the state of equanimity (sama + adhi) | state of samādhi resulting from removing "san" |

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
|----|----------------------------------|--|--|---|
| 14 | Sambhava | san + bhava | bhava is existence | existence due to "san" |
| 15 | Sambuddha | san + bhava + uddha | uddha is rooting out | one who rooted out existence in 31 realms |
| 16 | Sambodhi | | | state attained by a sambuddha; Nibbāna |
| 17 | Sambhūta | san + bhūta | bhūta refers to satara mahā bhūta | creation of bhūta via "san" in the mind; The Origin of Matter – <u>Suddhatthaka</u> |
| 18 | Sammapañña | sammā + pañña | pañña is wisdom | wisdom to see the way to remove "san" |
| 19 | Sammā-Sambodhi (Sammā-Sambuddha) | | Emphasizing the achievement of sambodhi on one's own | reserved for the Buddhas |
| 20 | Sammatta | san+mā+atta | atta means the "truths leading to sammā" | Sammatta niyama is a knowledge of a Sotāpanna. |
| 21 | Sambojjanga | san +bodhi+aṅga; rhymes as sambojjanga | "aṅga" means factors | Factors that lead to Sambodhi |
| 22 | Sampajāna (Sampajanna) | san + pajāna | pajāna is to comprehend | to figure out defilements (san) |
| 23 | sammappadhāna | san + mā+ padhāna | mā is to remove; padhāna means "first" | first to do to remove "san" |
| 24 | Sambandha | san + bandha | bandha is to bind, associate with | bind with someone/something with "san" |
| 25 | sambhāvītā | san + bhāvītā | bhāvītā is to use | engage in "san" or sense pleasures |
| 26 | Sambheda | san + bheda | bheda means to quarrel | fighting over pleasurable things or "san" |
| 27 | Sambhīta | san + bhīta | bhīta means to terrify | "san" leading to terror (in mind or in future births) |
| 28 | Sambhoga | san + bhoga | bhoga means pleasurable things, especially food | sense pleasures |
| 29 | Sambhunjati | san + bhunja | bhunja means to eat or consume | engage in sense pleasures |
| 30 | sammoha | san + moha | moha is delusion | extreme delusion |
| 31 | sampādesi / sampādetā | san + pādesi | pādesi is to sort out and see | to clarify what is "san", as in "vaya dhammā saṅkhāra, appamādena sampādetā". |
| 32 | sampahanseti | san +pahāna | pahāna is to remove | to remove "san" |
| 33 | sampañño | san + pañño | pañño means with wisdom, possessive of paññā | attained wisdom to see 'san" |
| 34 | Sampajāna | san + pajāna | pajāna is to clarify | sort out or to clarify "san" |

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
|----|------------------------------------|---------------|---|--|
| 35 | sampayoga | san + payoga | payoga is a clever plan to get something done | plan to access a pleasurable thing |
| 36 | Samphassa | san + phassa | contact with san (in the mind) | Vedanā (Feelings) Arise in Two Ways |
| 37 | Sampassati | san + passati | passati means to comprehend | comprehend "san' |
| 38 | sankilittā or saṅkilittā | san + kilittā | kilittā is to defile | making mind defiled by adding "san" |
| 39 | sankileśa or saṅkileśa | san + kileśa | kileśa are defilements | things that defile the mind |
| 40 | Samsāra (Saṃsāra) | san + sāra | sāra means "good" | perception that san (things in this world) are good. |
| 41 | Sanseva (Samseva) | san + seva | seva means to "associate" | to indulge in worldly pleasures |
| 42 | Samucceda (as in samucceda pahāna) | san + ucceda | ucceda means to "remove from the roots"; pahāna is remove | samucceda pahāna means to "get rid of permanently" |
| 43 | saṃyoga or sanyoga | san + yoga | yoga is to bind | bound with "san" (to this world) |
| 44 | saṃyojanā or sanyojanā | san + yo + ja | "yo' is to bind; "ja" is to produce | factors that leads to bonds to rebirth process |
| 45 | samudaya | san + udaya | udaya is to arise | arising due to "san" |
| 46 | Samutthāna | san + utthāna | utthāna means "where it arises" | Samutthāna citta is same as cittaja; where "san" originates (mind) |
| 47 | samvāsa or sanvāsa | san + vāsa | vāsa live with | live together; sexual intercourse |
| 48 | Samvara (Sanvara) | san + vara | vara means to stop, avoid | moral behavior |
| 49 | Samvaddha | san + vaddha | vaddha is to "grow" | to add "san", i.e., defilements |
| 50 | Samvannanā | san + vannanā | vannanā is to praise | to praise immoral acts |
| 51 | Samvattana (Samvattati) | san + vattana | vattana is to "drop" | aiding in removing "san" |
| 52 | samvedanā or sanvedanā | san + vedanā | vedanā is to feel | feelings due to "san": samphassa jā vedanā |
| 53 | saṃvidhāna or sanvidhāna | san + vidhāna | vidhāna means ordering | giving orders, organize (normally used mundanely) |
| 54 | saṃsaraṇa or sansaraṇa | san + sarana | sarana means move around, travel | wandering in saṃsāra |
| 55 | Samyutta (as in Saṃyutta Nikāya) | san + yutta | yutta means "contains" | Suttā in the Saṃyutta Nikāya explain "san" terms |
| 56 | Sancetanā | san + cetanā | cetanā is intention (in a thought) | defiled thoughts |

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
|----|-------------------------------------|-------------------------------|--|---|
| 57 | sanditthika | san + diṭṭhi | diṭṭhi is seeing, vision | seeing "san" with Buddha Dhamma |
| 58 | Sangāyanā | san + gāyanā | gāyanā is to recite | Buddhist Council where suttā describing "san" are recited. |
| 59 | Sanga | san + ga | ga is to attach, | attach to "san" |
| 60 | Sangati | san + gati | gati is character, habit | bad character/habits |
| 61 | Saṅgha | san + gha | gha is to remove | Those who have removed "san" belong to Saṅgha; Nobles or Ariyā, but usu. include bhikkhus |
| 62 | Sāṅghika | possessive of Saṅgha | | offered to Saṅgha |
| 63 | Sangīta (Sangeetha) | san + gīta | gīta is a poem, song | music that bend mind towards sense pleasures |
| 64 | sankalpana or saṅkappa | san + kalpana | kalpnana means conscious thoughts | defiled thoughts |
| 65 | sankhitta | san + kitta | kitta is action (kriya) | anything done with 'san' (defilements) in mind |
| 66 | Sansun | san + sūn (ū rhymes like put) | sūn means to destroy | calming the mind via removing "san" |
| 67 | Sanvara | san + vara | vara is to stay away from | discipline via staying away from "san", i.e., moral behavior |
| 68 | sanvega or samvega | san + vega | vega is speed or rapidity | enhanced javana of a citta due to "san", i.e., highly emotional |
| 69 | saṅkhāra (should really be sankāra) | san + kāra | kāra is action (all actions are initiated via thoughts) | Saṅkhāra – What It Really Means |
| 70 | Sankata | san + kata | kata is a result | produced via saṅkhāra; anything in this world |
| 71 | Sansāra (Saṃsāra) | San + Sāra | Sāra is good, beneficial | What is “San”? Meaning of Sansāra (or Samsāra) |
| 72 | Santāpa | san + tāpa | tāpa is heat | heating of the mind due to "san" |
| 73 | Santutti (or Santhutti) | san + thutti | thutti is to remove: Arogya Parama Labha.. | ease of mind when "san" removed; but commonly used to indicate happiness |

7.5 The 89 (121) Types of Citta

Revised: October 29, 2015; August 31, 2017; June 3, 2018; July 31, 2018

Citta for Kamaloka (in the 11 sense realms) - 54 in all

There are three main types of citta here: The differentiation is based on whether they have immoral roots (*lobha, dosa, moha*), *kammically* moral roots (*alobha, adosa, amoha*), or are *kammically* neutral, i.e., no roots.

- **12 immoral citta:** 8 with *lobha* roots; 2 with *dosa* roots; 2 with *moha* roots. All ten immoral acts (*dasa akusala*) are done with these 12 types of *cittā*. Because of these 12 types of immoral *cittā*, **7 rootless (*ahetuka*) vipāka citta** can arise in the future. Thus altogether there are **19 citta in this category**.
- **8 moral citta:** 4 with all three moral roots and 4 with two moral roots (lacking in wisdom). They can give rise to two types of *vipāka citta*: **8 vipāka citta with no roots**, and **8 vipāka citta with moral roots** (4 of them have all three moral roots and other 4 are lacking in wisdom). Thus **24 types of citta are mentioned here**, from which 16 have moral roots and 8 are rootless (*ahetuka*).
- When these same **8 moral citta arise in Arahants, they are called kriya citta** or functional *citta*. They just have the same moral roots as the 8 moral citta mentioned above, but do not have any *kammic* potential or *kammic* consequences.
- All those citta with moral roots (8 *kriya citta* for *Arahants* and 16 for others) are called *sobhana* (beautiful) *citta*.
- Finally, there are **3 types of kiriya citta that arise in citta vīthi which are neither kamma nor kamma vipāka**. These are the 3 *kriya citta* without any roots, and thus are rootless (*ahetuka*) *citta*. Two of these perform functions of (i) five-sense-door adverting consciousness (*pancadvaravajjana citta*) and the *vottapana citta*, and (ii) mind-door-adverting consciousness (*manodvaravajjana citta*). (iii)The third one arises in only *Arahants* (when they smile about sense-sphere phenomena).
- Note that none of the 7 *akusala vipāka citta* has roots. Also, 8 *kusala vipāka citta* associated with *pavutti vipāka* (i.e, not giving rise to rebirth) also do not have any roots. Those 15 *citta* together with the three *ahetuka kiriya citta* are involved in the *vipāka* phase of a given *citta vīthi*. They do not have any *sobhana* or *asobhana cetasika* other than the 7 universal *cetasika* and the 6 *pakinnaka* (particulars) *cetasika*; see, "[Cetasika – Connection to Gathi](#)" for various types of *cetasika*. These 18 *citta* are listed on p. 112 of Ref.1 under the second group below the group of *akusala citta*.

Those **54 kamaloka citta** can be categorized in different ways.

| Asobhana (Unbeautiful) | | Sobhana (Beautiful) |
|------------------------|---------------------------|-------------------------|
| Immoral- 12 | Rootless – 18 | Moral -24 |
| <i>Lobha</i> (8) | Immoral <i>Vipāka</i> (7) | <i>Moral</i> (8) |
| <i>Dosa</i> (2) | Moral <i>Vipāka</i> (8) | Moral <i>Vipāka</i> (8) |
| <i>Moha</i> (2) | <i>Kriya</i> (3) | <i>Kriya</i> (8) |

Citta for Rupaloka (in the 16 Rūpa realms) - 15 in all

1. There are only 15 *citta* that are predominantly present in the *Rupaloka*. Five are *jhānic* moral *citta* and five are *vipāka citta* due to those.
2. The five *jhānic* moral *citta* can be experienced by humans when they develop *samādhi* and attain these (first through fifth) *jhānā*. However, they can experience the corresponding five *vipāka citta* only when they are born in *Rupalokas*.

3. The five *jhānic* states are characterized by five *jhāna* factors or mental concomitants: *vitakka* (initial application), *vicāra* (sustained application), *pīti* (zest), *sukha* (happiness), and *ekaggata* (one-pointedness). All five factors are present in the first *jhāna*, and as one moves to higher *jhānā*, these factors are lost one by one, and in the fifth *jhāna* only *ekaggata* is left.

Pīti (zest) is the happiness in the mind and *sukha* (happiness) is the tranquility of the body.

4. There are five more *jhānic kriya citta* experienced by *Arahants* when they attain these *jhānā*.

Thus there are 15 *citta* in all that predominantly belong to the *Rupaloka*.

Citta for Arupaloka (in the 4 Arūpa realms)- 12 in all

1. There are only 12 *citta* that are predominantly present in the *Arupaloka*. Four are *jhānic moral citta* and four are *vipāka citta* due to those.

2. The four *jhānic moral citta* can be experienced by humans when they develop *samādhi* and attain these (fifth through eighth) *jhānā*. However, they can experience the corresponding four *vipāka citta* only when they are born in *Arupaloka*.

3. The first of the four *Arupaloka jhānā* is the attainment of the base of infinite space (*Akasanancayatana*). A human needs to master the fourth *jhāna* (*Rupaloka*) in order to be able to attain this *jhāna*.

The second is the base of infinite consciousness (*vinnanacayatana*). The third is the base of nothingness (*akincannayatana*), and the fourth is the base of neither-perception-nor-non-perception (*n' evasanna n'asannayatana*). In this last type of consciousness, the factor of perception (*saññā*) is so subtle that it can no longer perform the function of perception, i.e., one is unaware of the "world." Yet perception is not altogether absent. This is another reason why the ancient *yogis* erroneously assumed this eighth *jhāna* to be *Nibbāna*.

4. There are four more *Arupaloka jhānic kriya citta* experienced by *Arahants* when they attain these *jhānā*.

Thus there are 12 *citta* in all that predominantly belong to the *Arupaloka*.

Lokuttara (Supermundane) Citta – 8 in all

1. These pertain to the four stages of *Nibbānic* attainment: *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, and *Arahant*.

2. Each stage involves two types of *citta*: one is path consciousness (*magga citta*), and the other is fruition consciousness (*phala citta*). The *magga citta* has the function of eradicating or permanently attenuating defilements. The *phala citta* has the function of experiencing the degree of liberation made possible by the *magga citta*.

3. Each *magga citta* arises only once, and endures for one thought-moment. It is never repeated. The corresponding *phala citta* (which corresponds to a *vipāka citta*, but is not called a *vipāka citta*) arises immediately after the *magga citta*. This is in contrast to mundane *vipāka citta* where they can occur even many lifetimes after the corresponding *kusala* or *akusala citta*.

4. The *phala citta* can be repeated any time after one attains it. With practice, it can be sustained for long times, up to 7 days for an *Arahant*.

Thus, there are $54 + 15 + 12 + 8 = 89$ *citta* in all.

How 121 Types of Citta are Possible

1. It is possible to further analyze the types of citta by refining the above method by taking into the fact that each magga phala can be reached from the vicinity of each jhānic state.

- One can attain *Nibbanic* states via the vicinity of each of the five *rupaloka jhānic* states (**here the *Abhidhamma* method of 5 *jhānā* is used, instead of four mentioned in the *suttā*, where the first two *jhāna* in *Abhidhamma* categorization are taken to be one *jhāna*; in the *Abhidhamma* analysis *vitakka* and *vicara* are removed in two steps, whereas in the *sutta* analysis it is assumed that they are removed in one step).**
- Therefore, each of the five *jhānic* states can lead to the four *magga cittā* and four *phala cittā*.
- Thus here there are 40 ways to attain *lokuttara cittā*. Therefore, the total number of citta in this case would be 121 (= 54 + 15 + 12 + 40) instead of 89.

2. Therefore, *magga phala* (including the *Arahant* stage) can be reached via going through any of the *jhānic* states or without going through any *jhānic* state.

- Of course, the 8 *lokuttara citta* (i.e., the four stages of *Nibbāna*) arrived are the same, regardless of whether arrived via *jhāna* or not.

Important Conclusion Regarding Jhāna and Magga Phala

From the above it is clear that *magga phala* can be attained without *jhāna* (89 *citta* analysis applicable). *Magga phala* can also be attained via each of the five *jhānic* states (in the *Abhidhamma* method), which correspond to the 4 *jhānā* discussed in the *suttā*; here the 89 *citta* analysis is applicable.

- Furthermore, these *jhānic* states can be reached via either *anāriya jhāna* or *Ariya jhāna*. The experience seems to be the same.
- The only difference is that while *kāma rāga* is suppressed (*vikkhambhana pahāna*) in *anāriya jhāna*, it is REMOVED (*samucceda pahāna*) in *Ariya jhāna*.
- For details, see, “[Samādhi, Jhāna \(Dhyāna\), Magga Phala.](#)”

7.6 Cetasika (Mental Factors)

Revised January 24, 2020; May 15, 2020; June 8, 2020

Cetasika (mental factors; pronounced “chethasikā”) appear concomitantly with *citta* (thoughts; pronounced “chiththā”), and they cease together with *citta*. They define the character (good or bad or neutral) of the *citta*.

- The way to “[Lead a Moral Life](#),” or to “[Seek Good Rebirths](#),” or to “[Seek Nibbāna](#),” is to get rid of the bad (un-beautiful) *cetasika* and to cultivate good (beautiful) *cetasika*. This is done by changing one’s habits via learning Dhamma and practicing it: see, “[Habits and Goals](#),” “[Sansāric Habits and āsavas](#),” and “[The Way to Nibbāna – Removal of Āsavā](#),” in that order.
1. There are 7 *cetasika* that are in each and every *citta*. These are called **universals** or (*sabba citta sādharmaṇa*):
 - *Phassa* (contact); *vedanā* (feeling); *saññā* (perception); *cetanā* (volition); *Ekaggata* (One-pointedness) can become *Sammā Samādhi*; *jīvitindriya* (life faculty) *manasikāra* (memory).
 2. Since they are universals, the above *cetasika* appear in both *kusala* and *akusala citta*. All are important mental factors:
 - *Saññā* and *vedanā* are in *pañcakkhandha*.
 - *Cetanā* determines *kamma*; it is the *cetasika* that “puts together a *citta*” by automatically incorporating other relevant *cetasika* according to one’s “*gati*.”
 - *Ekaggata* is the salient factor in *samādhi*.
 - Consciousness cannot arise without *phassa*. Note that *samphassa* is different from *phassa*; see, “[Difference between Phassa and Samphassa](#).”
 - *Jīvitindriya* maintains life, and
 - *Manasikāra* can be either *yoniso manasikāra* (important in attaining the *Sotāpanna* stage), and *ayoniso manasikāra* can lead to accumulation of *akusala kamma*.
 3. There are six *cetasika* that also CAN appear in both types of *cittā*: *kusala* and *akusala*. However, they are found in only particular types of *cittā*. They are called **particulars** or *pakiṇṇaka*: [*pakiṇṇaka* : (adj.) [*pa+kiṇṇa* (pp. of *kirati*)+*ka*] scattered about; fig. miscellaneous, particular, opp. to *sādhāraṇa*.]
 - *vitakka* (focused application) can become *Sammā Saṅkappa*; *vicāra* (sustained application); *adhimokkha* (dominate). *Adhimokkha* is the *cetasika* that makes another *cetasika* in the *citta* to dominate; for example, to get *uddhacca*, *vicikicchā*, or *paṭigha* to strengthen.
 - *virīya* (effort) can become *Sammā Vayāma* ; *pīti* (joy); *chanda* (desire, not greed).
 - **These are important *cetasika* and play key roles in morality/immorality since they can appear in both *kusala* and *akusala citta*.** For example, when one’s mind is covered with deep ignorance (*moha*), one may enjoy immoral deeds (*pīti*), makes a liking for them (*chanda*), and strive more (*virīya*) to do such acts.
 4. Just like universals, these particulars can appear in either type of *cittā*, *kusala* or *akusala*. *Vitakka*, *vicāra*, and *pīti* are *jhāna* factors as well.
 - *Virīya* and *chanda* are two factors in the four bases of mental power; see, “[The Four Bases of Mental Power \(Satara Iddhipada\)](#).”
 - *Adhimokka* is important in decision making by making another *cetasika* dominant. All these factors can go in an *immoral* direction too.

5. There are 14 *asobhana cetasika* (**non-beautiful mental factors**) that appear only in *akusala citta*. Out of these, there are four universals that appear in ALL *akusala citta*:

- *Moha* (delusion); *Ahirika* (shamelessness); *Anottapa* (fearlessness in wrong); *uddhacca* (restlessness or agitation).
- Both shamelessness and fearlessness of wrong encourage doing immoral acts. Restlessness causes unwise decision making.

The other 10 are occasional that appear in only particular types of *akusala citta*:

- *Lobha* (greed); *diṭṭhi* (wrong view); *māna* (conceit); *dosa* (hatred); *issā* (envy); *macchhariya* (avarice, also pretending one does not have wealth); *kukkucca* (worry, also feeling low); *thīna* (sloth, sluggishness); *middha* (torpor); *vicikicchā* (doubt arising from temptations).
- *Lobha* and *dosa* are two of the three immoral roots. Sloth and torpor normally rise together and are opposite of *virīya*; they are listed as one factor in Five Hindrances; see, "[Key to Calming the Mind](#)."

6. There are 25 *sobhana cetasika* (**beautiful mental factors**) that appear only in *kusala citta*. Out of those, 19 of them appear in each and every *kusala citta*, and thus are called beautiful universals:

- *Saddhā* (faith); *sati* (moral mindfulness) can become *Sammā Sati*; *hiri* (shame of wrong); *ottappa* (fear of wrong); *alobha* (absence of greed); *adosa* (absence of hate/anger, of which *mettā* or "loving-kindness" is a part); *tatramajjhataṭṭā* (neutrality of mind, of which *upekkhā* is a part); *kāyapassaddhi* (tranquility of mental body); *cittapassaddhi* (tranquility of consciousness); *kāyalahutā* (lightness of mental body); *cittalahutā* (lightness of consciousness); *kāyamudutā* (malleability of mental body); *cittamudutā* (malleability of consciousness); *kāyakammaññatā* (wieldiness of mental body); *cittakammaññatā* (wieldiness of consciousness); *kāyapaguññatā* (proficiency of mental body); *cittapaguññatā* (proficiency of consciousness); *kāyujjukatā* (rectitude of mental body); *cittujjukatā* (rectitude of consciousness).

The other six are occasionals that appear in only particular types of *kusala citta*:

- There are three abstinences: *Sammā Vācā* (right speech); *Sammā Kammanta* (right action); *Sammā Ājīva* (right livelihood).
- Two Illimitables (limit-less): *karuṇā* (compassion); *muditā* (appreciative joy; joy at other's moral success).
- *Paññā* or *paññindriya* (wisdom or wisdom faculty). *Sammā Diṭṭhi* leads to *paññā*.

7. Mental factors in the **Noble Eightfold Path** are highlighted in green.

8. **Immoral roots** are highlighted in red. **Moral roots** are highlighted in purple.

9. As a rule, *sobhana* and *asobhana cetasika* CANNOT appear together in a given *citta*.

7.7 Rūpa (Material Form) – Table

Revised April 22, 2020; August 16, 2020

We discuss the 28 types of *rūpa* (material form) in Buddha Dhamma. For discussions on *rūpa*, see, “[What are Rūpa? \(Relation to Nibbāna\)](#)” and “[Rupa \(Material Form\)](#).”

| Concretely Produced (<i>Nipphanna</i>) | Abstract (<i>Anipphanna</i>) Rūpa |
|--|--|
| I. Great Elements (<i>Mahā Bhūta</i>) | VII. Limiting Phenomenon |
| 1. <i>Pathavi</i> (Extension/Hardness) | 19. <i>Ākasa dhātu</i> (space element) |
| 2. <i>Apo</i> (Cohesion/Fluidity) | IX. Communicating (<i>Viññati</i>) Rūpa |
| 3. <i>Tejo</i> (Heat/Hotness) | 20. <i>Kāya Viññati</i> |
| 4. <i>Vāyo</i> (Motion/Pushing & Supporting) | 21. <i>Vacī Viññati</i> |
| II. Internal (<i>Pasāda</i>) Rūpa | X. Mutable (<i>Vikāra</i>) Rūpa |
| 5. <i>Cakkhu</i> (eye element) | 22. <i>Lahutā</i> (lightness) |
| 6. <i>Sota</i> (ear element) | 23. <i>Mudutā</i> (Elasticity) |
| 7. <i>Ghana</i> (nose element) | 24. <i>Kammaññatā</i> (weirdness) |
| 8. <i>Jivhā</i> (tongue element) | XI. Material Qualities (<i>Lakkhaṇa Rūpa</i>) |
| 9. <i>Kāya</i> (body element) | 25. <i>Upacaya</i> (production) |
| III. <i>Gocara</i> (Objective) Rūpa | 26. <i>Santati</i> (continuity) |
| 10. <i>Vañṇa</i> (visible) | 27. <i>Jaratā</i> (Decay) |
| 11. <i>Sadda</i> (Sound) | 28. <i>Aniccatā</i> (Dissolving) |
| 12. <i>Gandha</i> (Smell) | |
| 13. <i>Rasa</i> (Taste) | |
| * <i>Phoṭṭhabba</i> (Tangibility, warmth, and movement) comes from 3 <i>mahā bhūta</i> of <i>pathavi, tejo, vāyo</i> | |
| IV. <i>Bhāva</i> (Faculties of sex) Rūpa | |
| 14. <i>Itthi</i> (Feminine) | |
| 15. <i>Purisa</i> (Masculine) | |
| V. <i>Hadaya</i> (Mind Base) | |
| 16. <i>Hadaya Vatthu</i> (seat of the mind) | |
| VI. Life | |
| 17. <i>Jīvitindriya</i> (Life faculty) | |
| VII. Nutritional | |

18. *Oja* (Nutriment)**Types of *Rupā***

- The four great elements (#1 through #4) and the four *gocara rūpa* (#10 through #13) ALWAYS appear together. They can NEVER be detected by themselves. They come in together as *suddhāṭṭhaka* (meaning the smallest collection of those eight types of *rūpa*.) See, “[The Origin of Matter – Suddhatthaka](#).”
- **There are nine *rūpa* created ONLY by kammic energy at the *paṭisandhi* moment.** Those are the five *pasāda rūpa* (#5 through #9), and four other *rūpa* (#14 through #17) including the seat of the mind (*hadaya vatthu*).
- The 16 *rūpa* that are highlighted in blue are fine (*sukuma*) *rūpa*. The other 12 are coarse (*oḷārika*) *rūpa*.
- *Nipphanna rūpa* are caused by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*). The other 10 (*anipphanna rūpa*) are not caused or conditioned by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*).
- The 10 types of *anipphanna rūpa* (on the right side of the Table) are abstract *rūpa*.

Types of *Rūpā* Present in Different Realms

- All the 28 *rūpā* arise in the *kāma*-realms. Eight *rūpā* comprising *sadda*, five *vikāra-rūpā*, *jaratā-rūpa* and *aniccatā-rūpa*, do not arise at the moment of birth (*paṭisandhi*) whereas, during life time, there is no *rūpa* which is not formed.
- In the 15 *rūpa* realms, with the exception of *Asañña*-realm, 23 *rūpā* arise (*ghāṇa-pasāda*, *jivhā-pasāda*, *kāya-pasāda*, *itthi-bhava* and *purisa-bhava* being excluded).
- Only 17 *rūpā* arise in the *Asañña* realm. They are the eight *avinibbhogas* (four *mahā bhūta* and *vaṇṇa*, *gandha*, *rasa*, *oja*), *jivita rūpa*, *ākāsa dhātu*, three *lahutadi*, and four *lakkhana-rūpā*;
- No *rūpa* above the *suddhāṭṭhaka* level arise (except for *hadaya vatthu*) arise in the *arūpa*-realms. Thus, a trace of matter is present anywhere in the 31 realms. Ancient *yogis*, who attained all eight *anāriya jhānā*, could not see any *rūpa* in the *arūpa loka* and deduced that was *Nibbāna*. But *rūpa* still has a “foothold” in the *arūpa loka* since any being in the *arūpa loka* will be reborn in other realms in the future (unless at least the *Sotāpanna* stage is attained.) Thus linkage to matter has not been severed in *arūpa loka*.

Definitions from *Dhammasaṅgaṇī*

The following are quoted from the “[Rūpavibhatti DS 2.2.3](#)” section of *Dhammasaṅgaṇī of the Tipiṭaka*.

- *Katamaṃ taṃ rūpaṃ itthindriyaṃ?* Yaṃ itthiyā itthiliṅgaṃ itthinimittaṃ itthikuttaṃ itthākappo itthattaṃ itthibhāvo—idaṃ taṃ rūpaṃ itthindriyaṃ.
- *Katamaṃ taṃ rūpaṃ purisindriyaṃ?* Yaṃ purisassa purisaliṅgaṃ purisanimittaṃ purisakuttaṃ purisākappo purisattaṃ purisabhāvo—idaṃ taṃ rūpaṃ purisindriyaṃ.
- *Katamaṃ taṃ rūpaṃ jīvitindriyaṃ?* Yo tesaṃ rūpīnaṃ dhammānaṃ āyu ṭhiti yapanā yāpanā iriyānā vattanā pālanā jīvitaṃ jīvitindriyaṃ—idaṃ taṃ rūpaṃ jīvitindriyaṃ.
- *Katamaṃ taṃ rūpaṃ kāyaviññatti?* Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā abhikkamantassa vā paṭikkamantassa vā āloketassa vā vilokentassa vā samiñjentassa vā pasārentassa vā kāyassa thambhanā santhambhanā santhambhitattaṃ viññatti viññāpanā viññāpitattaṃ—idaṃ taṃ rūpaṃ kāyaviññatti.

- *Katamaṃ taṃ rūpaṃ vacīviññatti?* Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā vācā girā byappatho udīraṇaṃ ghoso ghosakammaṃ vācā vacībhedo—ayaṃ vuccati vācā. Yā tāya vācāya viññatti viññāpanā viññāpitattaṃ—idaṃ taṃ rūpaṃ vacīviññatti.
- *Katamaṃ taṃ rūpaṃ ākāsadhātu?* Yo ākāso ākāsaḡataṃ aḡhaṃ aḡhagataṃ vivaro vivaragataṃ asaṃphuṭṭhaṃ catūhi mahābhūtehi—idaṃ taṃ rūpaṃ ākāsadhātu.
- *Katamaṃ taṃ rūpaṃ rūpassa lahutā?* Yā rūpassa lahutā lahupaṛiṇāmatā adandhanatā avitṭhanatā—idaṃ taṃ rūpaṃ rūpassa lahutā.
- *Katamaṃ taṃ rūpaṃ rūpassa mudutā?* Yā rūpassa mudutā maddavatā akakkhaḡatā akathinatā—idaṃ taṃ rūpaṃ rūpassa mudutā.
- *Katamaṃ taṃ rūpaṃ rūpassa kammaññatā?* Yā rūpassa kammaññatā kammaññattaṃ kammaññabhāvo—idaṃ taṃ rūpaṃ rūpassa kammaññatā.
- *Katamaṃ taṃ rūpaṃ rūpassa upacayo?* Yo āyatanānaṃ ācayo, so rūpassa upacayo—idaṃ taṃ rūpaṃ rūpassa upacayo.
- *Katamaṃ taṃ rūpaṃ rūpassa santati?* Yo rūpassa upacayo, sā rūpassa santati—idaṃ taṃ rūpaṃ rūpassa santati.
- *Katamaṃ taṃ rūpaṃ rūpassa jaratā?* Yā rūpassa jarā jīraṇatā khaṇḡiccaṃ pāliccaṃ valittacatā āyuno saṃhāni indriyānaṃ paṛipāko—idaṃ taṃ rūpaṃ rūpassa jaratā.
- *Katamaṃ taṃ rūpaṃ rūpassa aniccatā?* Yo rūpassa khayō vayo bhedo paṛibhedo aniccatā antaradhānaṃ—idaṃ taṃ rūpaṃ rūpassa aniccatā.
- *Katamaṃ taṃ rūpaṃ kabalīkāro āhāro?* Odano kummāso sattu maccho maṃsaṃ khīraṃ dadhi sappi navanītaṃ telaṃ madhu phāṇitaṃ, yaṃ vā panaññampi atthi rūpaṃ yaṃhi yaṃhi janapade tesāṃ tesāṃ sattānaṃ mukhāsīyaṃ dantavikhādanaṃ galajjhoharaṇīyaṃ kucchivitṭhambhanaṃ, yāya ojāya sattā yāpenti—idaṃ taṃ rūpaṃ kabalīkāro āhāro.

7.8 Rūpa – Generation Mechanisms

1. *Rūpa* (or matter) can be generated by four causes: *kamma*, *citta*, *utu*, and *Āhāra* (food). I will discuss these in detail later.

- *Kamma* here refers to volition (*cetanā*). The 25 kinds of *kamma* that produce *rūpā* are the volitions of the 12 *akusala citta*, 8 great *kusala citta*, and the five *rūpa loka kusala citta*. These *rūpa* are created with a time lag, when *kamma vipāka* bear fruits, like at the *paṭisandhi* to a new life. The three *rūpa dasaka* of *vatthu*, *kāya*, and *bhava* are created at *paṭisandhi* by *kamma vipāka*.
- The *rūpa* produced by the *cittā* arise **at the same time as the *citta*** themselves, and only at the rising part of the *cittā*. Out of the 89 possible *cittā*, 75 *cittā* can produce *rūpa* (4 *arūpa loka vipāka citta* and the two sets of fivefold sense consciousness cannot produce *rūpa*).
- Thus both *kammaja* and *cittaja* *rūpa* have mind as the direct cause. Both of these decay rapidly and are converted to *utuja rūpa*. What we normally see are the *utuja rūpa* and *āhārajā rūpa*, which have their origins also in the great elements of *tejo* and *oja*.
- The great element *tejo* is responsible for producing *utu samutthana rūpa*: Beginning from the moment of rebirth-linking, the internal *tejo* element found in the *rūpa kalapas* born of *kamma* combines with the external *tejo* and starts producing organic material phenomena originating from *tejo*. Thereafter the *tejo* element in the *rūpa kalapas* born of all four causes produces organic material phenomena born of *tejo* element throughout the life. Externally, *tejo* element also produces inorganic material phenomena, such as climatic and geological transformations.
- The nutritive essence, *oja*, is present in all *rūpa-kalapas* both inside the body (internal) and outside the body (external). The external food, which is eaten, is digested in the stomach and dispersed through blood to all parts of the body. So the internal *oja* and the external *oja* meet in every part of the body. The combination of internal and external *oja* produce *āhārajā rūpas*.

2. The 8 *rūpā* of *pathavi*, *āpo*, *tejo*, *vāyo*, *vaṇṇa*, *gandha*, *rasa*, and *oja* are ALWAYS found together. That unit or *kalapa* is the smallest *rūpa* unit and is called the pure octad (*suddhaṭṭhaka*). **Those 8 *rūpā* and the *ākāsa dhātu* are produced by all four causes.**

3. The four *lakkhaṇa rūpā* of *upacaya*, *santati*, *jaratā*, and *aniccatā* are not produced by any cause. They represent the nature of *rūpā*.

4. The remaining 15 *rūpa* are produced by different combination of the four possible causes as shown in the table below:

| | Kamma Born | Citta Born | Utu Born | Āhāra Born |
|-------------------------|------------|------------|----------|------------|
| Cakkhu (eye) | Yes | | | |
| Sota (ear) | Yes | | | |
| Ghana (nose) | Yes | | | |
| Jivhā (tongue) | Yes | | | |
| Kāya (body) | Yes | | | |
| Sadda (sound) | | Yes | Yes | |
| Itthi Bhva (femininity) | Yes | | | |

| | | | | |
|--------------------------------------|-----|-----|-----|-----|
| Purisa (masculine) | Yes | | | |
| Hadaya vatthu (heart base) | Yes | | | |
| Jivitindriya (life faculty) | Yes | | | |
| Kāya viññatti (bodily intimation) | | Yes | | |
| Vacī Viññatti (vocal intimation) | | Yes | | |
| Lahuta (lightness) | | Yes | Yes | Yes |
| Muduta (malleability) | | Yes | Yes | Yes |
| Kammaññāta (wieldiness) | | Yes | Yes | Yes |

7.9 Rūpa Kalāpa (Grouping of Matter)

Revised September 15, 2020

1. There are 28 types of *rūpa* discussed in *Abhidhamma*: “[Rūpa \(Material Form\) – Table](#).” They are not found separately in nature. They are produced by the four causes in the form of tiny material groups called *rūpa kalāpā* or “elementary groups of matter.”

- All *rūpā* have origins in the four great elements of *pathavī, āpo, tejo, vāyo*. However, they all arise together in the smallest unit of matter, a *suddhātṭhaka*. See, “[The Origin of Matter – Suddhatṭhaka](#).” Four more *rūpā* (*vaṇṇa, gandha, rasa, oja*) derived from the great elements are in a *suddhātṭhaka* making it an **octad** (composed of **eight** or an **aṭṭaka**.)
- There are 15 other elementary units (*rūpa kalāpā*) that derive from *suddhātṭhaka*. All 16 types of *rūpa kalāpā* are not further divisible. They are *avinibbhoga rūpa*.
- Let us briefly discuss them.

2. There are three *rūpa kalāpā* that have **nine units**: A *suddhātṭhaka* “energized” by *kammic* energy becomes a *jivita navaka* (vital **nonad**) of nine units. That added unit is an “energy unit” called a *jivita rūpa*. That *jivita rūpa* keeps a physical body alive. Another element of nine units, a *sadda navaka* (sound nonad) is responsible for the sound created by *utu*, i.e., it is an *utuja rūpa*. Another is *kāyaviññatti navaka* created by *citta* responsible for bodily intimation.

- Eight types of *rūpa kalāpā* have **ten units (dasaka or decad)** created by *kammic* energy: Here a *suddhātṭhaka* combines with a *jivita rūpa* and another unit created by *kammic* energy to become a *dasaka*. Those eight types of *dasaka* are vital parts of a living being. For example, a *cakkhu pasada rūpa* (together with the other nine units) creates a *cakkhu dasaka* responsible for seeing. In the same way *sota dasaka, ghana dasaka, jivha dasaka, kāya dasaka* arise. *itthibhāva rūpa* and *purisabhāva rūpa* give rise to *itthibhāva dasaka* and *purisabhāva dasaka*. The seat of the mind, *vatthu dasaka* arises with the *hadaya vatthu*.
- The following are created only by *citta* (thoughts): One is *vaciviññatti-sadda-dasaka* (vocal intimation decad) responsible for speech. *Kāyaviññatti-lahutādi-dvadasaka* (dodecad of bodily intimation) of 12 units with *kāyaviññatti* and three *lahutādi rūpa*. Another is *vaciviññatti-sadda-lahutādi-terasaka* (tricad of sound) of 13 units with *vaciviññatti*, three *lahutādi rūpa*, and *sadda*.
- Then there is *lahutādi-ekadasaka* (*suddhātṭhaka + lahuta + muduta + kammaññata*) with 11 units created by *citta*. There is also *sadda-lahutādi-dvadasaka* (*suddhātṭhaka + lahuta + muduta + kammaññata + sadda*) with 12 units created by *utu*.

3. All *rūpa kalāpā* have the following characteristics.

1. All the *rūpā* in a *rūpa kalāpa* arise together, i.e. they have a common genesis.
2. They also cease or dissolve together, i.e. they have a common cessation.
3. They all depend on the four great essentials present in the *kalāpa* for their arising, i.e. they have a common dependence.
4. They are so thoroughly mixed that they cannot be distinguished, i.e. they co-exist.

4. It should be noted that *kalāpā* are so small that they are indistinguishable from pure energy. The origin of *rūpa* is a *javana citta*, which is formless and mass-less. Science has shown that the smallest “particle” detected, Higgs boson, is indistinguishable from energy. See, “[The Origin of Matter – Suddhatṭhaka](#).”

5. There are 17 types of *kalāpā* produced in 21 ways:

9 *kammaja kalāpā* 6 *cittaja kalāpā* 4 *utuja kalāpā* 2 *āhāraja kalāpā* as shown below:

| | Kamma Born | Citta Born | Utu Born | Āhāra Born |
|--|------------|------------|----------|------------|
| Cakkhu dasaka (eye decad) | Yes | | | |
| Sota dasaka (ear decad) | Yes | | | |
| Ghana dasaka (nose decad) | Yes | | | |
| Jivha dasaka (tongue decad) | Yes | | | |
| Kāya dasaka (body decad) | Yes | | | |
| Itthi dasaka (female decad) | Yes | | | |
| Purisa dasaka (male decad) | Yes | | | |
| Vatthu dasaka (base decad) | Yes | | | |
| Jivita navaka (vital nonad) | Yes | | | |
| Suddhaṭṭaka (pure octad) | | Yes | Yes | Yes |
| Kayavinnati navaka (body intimation nonad) | | Yes | | |
| Vacī viññati sadda dasaka (vocal intimation decad) | | Yes | | |
| Lahutādi eka dasaka (undecad of mutability) | | Yes | Yes | Yes |
| Kayaviññati Lahutādi dva dasaka (undecad of mutability) | | Yes | Yes | |
| Vaciviññati Sadda Lahutādi terasaka (tridecad of mutability) | | Yes | | |
| Sadda navaka (sound decad) | | | Yes | |

6. Internal and External *Kalāpā*

All the 21 *rūpa kalāpā* mentioned above occur internally in living beings. *Itthibhāva-dasaka* does not occur in males. Similarly, *pumbhava-dasaka* (or *purisabhāva-dasaka*) does not occur in females. For those who are born blind or deaf, *cakkhu-dasaka* or *sota-dasaka* are not present.

In the external (*bahiddha*) world, only the two *utuja-kalāpā* are found. All inanimate things such as trees, stones, earth, water, fire, corpses, etc., are made up of *utuja-suddhaṭṭhaka kalāpā*. The sounds produced by beating two sticks together or by rubbing of branches in the wind or by musical instruments such as violin, piano, radio, cassettes, etc., are *utuja-sadda-navaka kalāpā*.

From the internal *rūpas*, *kāya-pasāda*, *bhava-rūpa* (femininity and masculinity), *cittaja-rūpa*, *utuja-rūpa* and *āhāraja-rūpa* spread all over the body, and so they will be present in the eye, the ear, the nose, the tongue and in every part of the body.

7. *Rūpa* in *Kāmaloka*

All the 28 material qualities occur undiminished, if circumstances permit, in an individual during a lifetime in *kāmaloka* (sense-sphere).

In womb-born creatures, only three *kammaja-kalāpā* comprising body-decad, sex-decad and heart decad are manifested at the moment of conception (at *paṭisandhi*).

Here again the sex-decad may not be manifested in some particular individuals. After conception, during life, the eye-decad and the rest are manifested slowly in due order. Of the groups of material qualities which are produced in four ways, *kammaja-rūpa* starts to form at the moment of conception and it goes on forming incessantly at every minor-instant. *Cittaja-rūpa* begins to form from the second moment of consciousness, i.e. from the arising instant of the first *bhavaṅga* which follows the rebirth-consciousness. *Cittaja-rūpa* continues to be formed at every arising instant of the subsequent *cittā* for the whole life-time.

Utuja-rūpa starts to form from the existing instant of rebirth consciousness. The reason is that the *tejo-dhātu* (*utu*) present in the first *kammaja-kalāpā* comes to the static stage (*thithi*) at that instant. From that time onwards, the *tejo-dhātu* then produces *utuja-rūpa* at every minor-instant. Since *tejo-dhātu* is present in every *kalapa*, every *kalapa*, from the time it reaches the static stage, produces new *utuja-kalāpā* at every minor instant. And the new *utuja-kalāpā*, from the time they reach the static stage, again produce new *utuja-kalāpā* at every minor instant. So this process goes on forever.

Every *kalapa* also contains the nutritive essence, *oja*. But *āhāraja-rūpa* starts to form when internal *oja* meets external *oja* at the time of diffusion of nutritive essence and the combination of internal and external *oja* comes to the static stage. From that instant, *āhāraja-rūpa* is also formed at every minor instant. As new groups of material qualities are incessantly produced, old groups dissolve and disappear when their lifetime of 17 conscious-moments is over. Thus, the material phenomena go on uninterruptedly in the sense-sphere till the end of life like the flame of a lamp, or the stream of a river.

Material Phenomena at Death: At the time of death, psychic life and physical life must cease together. This means that all *kammaja-rūpa* which contains physical life must cease at the time of death. So at the arising instant of the seventeenth *citta* reckoned backward from the death-consciousness (*cuti-citta*), the last *kammaja-rūpa* is formed. This last *kammaja-rūpa* will cease at the dissolving instant of the death-consciousness. *Cittaja-rūpa* is formed till the arising instant of the *cuti-citta*. This last *cittaja-rūpa* will have lasted for a conscious-moment at the dissolution of *cuti-citta*, and thus will perish in another sixteen conscious-moments which happens almost instantly. *āhāraja-rūpa* is formed till the dissolving instant of the *cuti-citta*, because the support required for the formation of *āhāraja-rūpa* can be furnished by *citta* up to that time. So at death, that last-formed *āhāraja-rūpa* has lasted for only one minor-instant. However in another fifty minor instants (*rūpa*-lifespan – 51 minor instants or 17 conscious-moments), that *āhāraja-rūpa* also ceases. Thus at the time of death, *kammaja-rūpa*, *cittaja-rūpa* and *āhāraja-rūpa* cease almost instantly.

But *utuja-rūpa* goes on forming and dissolving till the corpse is converted into dust. A corpse consists of only *utuja-rūpa*.

So when a person dies and is reborn in another life, material phenomena similarly arise starting from the instant of conception and go on arising till the time of death.

Arising of Material Phenomena in *Rūpa*-planes In the *rūpa*-plane, nose-decad, tongue-decad, body-decad, sex decad and *āhāraja-kalāpā* do not arise. At the time of *opapātika* rebirth, there arise four *kammaja-kalāpā* namely, eye decad, ear decad, heart decad and vital nonad. During life, however, *cittaja kalāpā* and *utuja kalāpā* also arise. To the Asañña Brahmā, eye-decad, heart-decad and sound-nonad

(*sadda-navaka*) do not arise. Also, *cittaja-kalāpā* do not arise. Therefore, at the time of their *opapātika*-rebirth, only the vital-nonad (*jivita-navaka*) arises. During life, *utuja-kalāpā*, with the exception of the sound-nonad, arise in addition.

Thus in *kāma loka* and *rūpa loka*, the process of the arising of material phenomena should be understood in two ways, that is (1) at rebirth and (2) during life.

7.10 Akusala Citta and Akusala Vipaka Citta

All ten *akusala kamma* are done with these 12 *akusala citta*. There are 8 greed-rooted, 2 hatred-rooted, and 2 delusion-rooted *citta*. Of course *citta* (pronounced “chiththā”) are thoughts; any speech or bodily action starts with a thought.

- See, “[Conditions for the Four Stages of Nibbāna](#)” for a list of 12 *akusala citta*.

Both greed-rooted and hatred-rooted also have delusion as a root.

| | Root | Assoc. with | Dissoc. with | Feeling | Sasankhārika? |
|----|----------|-------------|--------------|-------------|---------------|
| 1 | Greed | Wrong view | – | Pleasure | No |
| 2 | Greed | Wrong view | – | Pleasure | Yes |
| 3 | Greed | – | Wrong view | Pleasure | No |
| 4 | Greed | – | Wrong view | Pleasure | Yes |
| 5 | Greed | Wrong view | – | Equanimity | No |
| 6 | Greed | Wrong view | – | Equanimity | Yes |
| 7 | Greed | – | Wrong view | Equanimity | No |
| 8 | Greed | – | Wrong view | Equanimity | Yes |
| 9 | Dislike | Aversion | – | Displeasure | No |
| 10 | Dislike | Aversion | – | Displeasure | Yes |
| 11 | Delusion | Vicikicchā | – | Equanimity | – |
| 12 | Delusion | Uddacca | – | Equanimity | – |

1. The first *citta* is described as, ” a thought rooted in greed (and delusion), associated with wrong views, accompanied by pleasure, and spontaneous.” The others can be stated the same way.

- Those *citta* that are associated with wrong views are the worst, even though wrong views are listed as #10 on the ten immoral actions, see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- *Citta* generated with pleasure means one is enthusiastic about it because of one’s habits (*gathi*) or one starts liking it. For example, one who likes to go fishing has a bad habit; he gets a pleasure by just thinking about it; thus it is stronger than one done with equanimity.
- The hateful *citta* are always done with displeasure, but that displeasure can arise with ignorance. For example, someone who has wrong views may generate displeasure towards a moral person merely because of one’s wrong views. I have encountered some people who got upset with me when I pointed out that rebirth has evidence for it.
- *Sasankhārika* means with less *javana* power.
- See, the notes at the end of the post “[Conditions for the Four Stages of Nibbāna](#)” for details.

2. Since *vicikicchā* is also due to wrong views, those five *cittā* marked in red are the strongest *akusala citta* done with “wrong views” or ‘*diṭṭhi*.’ Those five *cittā* stop arising in the mind of a *Sotāpanna*.

They can condition one’s mind to a “*gathi*” suitable for birth in the *apāyā*; see, “[What is in a Thought? Why Gathi are so Important?](#).”

- The *vyāpāda* or the strong hate — that makes one eligible for birth in the *apāyā* — actually arises from the first four types of *lobha citta*. It is also called “*dvesa*” or “*dvesha*” which means “second manifestation”

or (“*dvi +vesā*”) of *lobha*. When one is burdened with extreme greed, it can turn to the second manifestation of extreme hate for anyone in the way.

- Upon attaining the *Sotāpanna* stage, such habits or “*gathī*” are removed, and thus no adverse *kamma vipāka* come to the mind at the dying moment, as we point out below. The “*pati+ichcha sama+uppada*” or what is born is similar to what is grasped, is at play at the dying moment. One automatically grasps things one has a habit of liking; they automatically come to the forefront of the mind at the dying moment.

3. The other 7 *akusala citta* are stopped from arising in stages as a *Sotāpanna* cultivates the Path further.

- The two dislike (*paṭigha*)-rooted *cittā* (together with some potency of the remaining 4 greed-based *citta*, i.e., *kāma rāga*) are reduced at the *Sakadāgāmī* stage.
- Those two dislike-rooted *citta* are stopped from arising at the *Anāgāmī* stage. Also, potency of the remaining 4 greed-based *citta*, i.e., *kāma rāga* are reduced to just *kāma* level.
- **Finally, the remaining 4 greed-based *citta* and the *uddhacca citta* are removed at the *Arahant stage*.** Thus an *Arahant* will never experience an *akusala citta*.

4. These 12 types of *citta* lead to 7 types of *vipāka* (resultant) *citta*.

- None of the *vipāka citta* has any unwholesome roots (greed, hate, delusion); of course they also do not have the wholesome roots. **Thus they are called rootless (*ahetuka*) *citta*.**

5. Five of these *akusala vipāka citta* are the ones that lead to (undesirable) sense events through the five physical senses. Thus they are responsible for eye consciousness (*cakkhu viññāṇa*), ear consciousness (*sota viññāṇa*), nose consciousness (*ghāṇa viññāṇa*), taste consciousness (*jivhā viññāṇa*), and body consciousness (*kāya viññāṇa*).

- Except for the body consciousness which is accompanied by pain, the other four are accompanied by equanimity; see, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāṇa](#)” and “[How Are Paṭicca Samuppāda Cycles Initiated?](#)”
- Thus any feelings of displeasure etc due to what is seen, heard, smelled, or tasted, are in the thoughts that follow this “event” experienced through one of the physical senses. We will discuss this in detail in the *Abhidhamma* section.

6. The sixth *akusala vipāka citta* is called receiving consciousness accompanied by equanimity (*upekkha-sahagata sampaticcana citta*). This is a *citta* that accepts the sense impression to the mind (we will discuss in *Abhidhamma* section).

7. The seventh *akusala vipāka citta* is called the investigating consciousness accompanied by equanimity (*upekkha-sahagata santirana citta*). This is the *citta* that is responsible for the birth in the *apāyā* (lowest four realms), i.e, it acts as the *paṭisandhi citta* for the birth in the *apāyā*.

8. One may wonder how a *Sotāpanna* avoids the *apāyā*, because he/she is still capable of generating the 7 *cittā* that are not associated with *diṭṭhi* (see the Table above), and thus it is possible to generate this *apāyagāmī-paṭisandhi citta*.

- The point is that after becoming a *Sotāpanna*, such *vipāka* thoughts do not come to the mind at the last thought processes; **only the good *kamma vipāka* come to the forefront of the mind close to the dying moment because he/she no longer has the “*gathī*” suitable for a birth in the *apāyā*.**

9. It is hard to give up one’s bad habits (“*gathī*”), mainly because one does not fully comprehend the true nature of the world, i.e., *anicca*, *dukkha*, *anatta*, and thus has wrong views about this world with 31 realms. One needs to comprehend that one’s actions have consequences not only in this life, but (mainly) in the future lives; also, whatever one gains by such harmful actions is just temporary, AND do not leave one with a peace mind.

7.11 **37 Factors of Enlightenment**

Revised January 20, 2016; May 13, 2019; March 11, 2020

1. The 37 factors of Enlightenment (*Bodhipakkhiya Dhamma*) are the combined number of individual factors in:

- Four Factors of Mindfulness (*Cattāro Satipaṭṭhāna*),
- Four Supreme Efforts (*Cattāro Sammappadhāna*),
- Four Bases of Mental Power (*Cattāro Iddhipāda*),
- Five Faculties (*Pañca Indriya*),
- Five Powers (*Pañca Bala*),
- Seven Factors of Enlightenment (*Satta Bojjhaṅga*), and
- Factors of the Noble Eightfold Path (*Ariya Attangika Magga*).

2. These factors are really mental factors (*cetasika*) and *citta* that incorporate them. They are labeled with different names under each category in the Table below to highlight its application.

- For example, the *paññā cetasika* is labeled as *vīmaṃsā* in Four Bases of Mental Power, as *dhammavicaya* in *Satta Bojjhaṅga*, and as *Sammā Diṭṭhi* in the Noble Eightfold Path.
- Under each category, I have listed the term used for that *cetasika* in that category. For example, in the Noble Eightfold Path, *Sammā Vāyāma* is the *virīya cetasika*.
- Thus even though there are 37 factors of Enlightenment, there are **only 14 cetasika** that will be cultivated while cultivating all seven above categories.
- It is clear that those 7 categories are all inter-related, and thus all 37 factors may be cultivated by focusing only on *Cattāro Satipaṭṭhāna*, *Satta Bojjhaṅga*, or the Noble Eightfold Path.

3. It is also important to realize that *cetasika* are related to one's character (*gathi*): "[Cetasika – Connection to Gathi](#)"

4. The Four Supreme Efforts (*Cattāro Sammappadhāna*) are the efforts to purify the mind: (i) **remove** defilement (*akusala*) that have arisen, (ii) **prevent** new defilement (*akusala*) from arising, (iii) **enhance** wholesome states (*kusala*) that have arisen, (iv) **initiate** new wholesome states (*kusala*). [WebLink: suttacentral: AN 4.14 Samvarasutta \(Restraint\)](#).

- Not to let an unwholesome thought arise which has not yet arisen. → **restraint**
- Not to let an unwholesome thought continue which has already arisen. → **abandonment**
- To make a wholesome thought arise which has not yet arisen. → **development**
- To make a wholesome thought continue which has already arisen. → **protection (maintaining)**

5. All 37 factors of enlightenment are fulfilled at the Arahant stage.

| Item | Parameter Involved | Four Supreme Efforts | Iddhipāda | Five Faculties | Five Powers | Four Factors of Mindfulness | 7 Factors of Enlightenment | Path Factors | Count |
|------|--------------------|----------------------|-----------|----------------|-------------|-----------------------------|----------------------------|----------------|-------|
| 1 | Paññā (wisdom) | | vīmaṃsā | paññā | paññā | | dhammavicaya | sammā diṭṭhi | 5 |
| 2 | Vitakka | | | | | | | sammā saṅkappa | 1 |

| | | | | | | | | | |
|----|---------------------------|-----------------------------|--------|---------|---------|-----------------------------|-----------|-----------------|---|
| | (initial application) | | | | | | | | |
| 3 | Sammā vācā | | | | | | | sammā vaca | 1 |
| 4 | Sammā kammanata | | | | | | | sammā kammanata | 1 |
| 5 | Sammā ājīva | | | | | | | sammā ajiva | 1 |
| 6 | Viriya | four efforts (see #4 above) | viriya | viriya | viriya | | viriya | sammā vayama | 9 |
| 7 | Sati (mindfulness) | | | sati | sati | kaya, vedanā, citta, dhamma | sati | sammā sati | 8 |
| 8 | Samādhi (one-pointedness) | | | samādhi | samādhi | | samādhi | sammā samādhi | 4 |
| 9 | Saddhā (faith) | | | saddhā | saddhā | | | | 2 |
| 10 | Chanda (desire) | | chanda | | | | | | 1 |
| 11 | citta | | citta | | | | | | 1 |
| 12 | Pīti (joy) | | | | | | pīti | | 1 |
| 13 | Passaddhi (tranquility) | | | | | | passaddhi | | 1 |
| 14 | Upekkhā (equanimity) | | | | | | upekkha | | 1 |

7.12 **Conditions for the Four Stages of Nibbāna**

Revised August 3, 2016

The following Table shows the conditions to be fulfilled (i.e., factors to be eliminated) to attain each stage of *Nibbāna*. For example, in order to attain the *Sotāpanna* stage, three of the ten *samyojana* (or the ten fetters) are removed, *akusala citta* #1, 2, 5, 6, and 11 are removed; also the *apāyagāmi* strength in the other *cittā* also removed, etc

| Ariya Stage | Samyojana | Akusala Citta | Anusaya | Āsava (Asaya) | Kilesa (Akusala Cetasika) |
|-------------|---|--|---|--------------------------|---|
| Sotāpanna | sakkāya diṭṭhi, vicikicchā, silabbata parāmāsa | 1,2,5,6,11 Also removes apāyagāmi strength in the rest | diṭṭhi, vicikicchā | diṭṭhāsava | Removed: diṭṭhi, vicikicchā, thina, middha, issa, maccariya, kukkucca Reduced: lobha, dosa, moha to rāga, paṭigha, avijjā |
| Sakadāgāmi | kāma rāga (reduced) paṭigha (reduced) | weakens 9, 10 also weakens kāma rāga in 3,4,7,8 | kāma rāga (reduced) paṭigha (reduced) | kāmāsava (reduced) | Reduced: kāma rāga and paṭigha |
| Anāgāmi | kāma rāga, paṭigha | 9,10 also removes kāma rāga in 3,4,7,8 | kāma rāga, paṭigha | kāmāsava | Removed: kāma rāga and paṭigha |
| Arahant | rūpa rāga, arūpa rāga, māna, uddhacca, avijjā | 3,4,7,8,12 (see below for a list of <i>akusala</i> <i>citta</i>) | bhava rāga, māna, avijjā | bhavāsava, avijjāsava | Removed: avijjā, ahirika, anatoppa, uddhacca, māna |

The ability to commit *akusala kamma* also is removed in stages as one progresses, and are completely removed only at the *Arahant* stage. It is important to note that a *Sotāpanna* completely removes only one *akusala kamma*, that of having wrong views (*micchā diṭṭhi*): [“What is the only Akusala Removed by a Sotāpanna?”](#) But this leads to the removal of many *kilesa* (mental impurities); see the Table.

Āsava and *anusaya* are discussed in the post, [“Āsava, Anusaya, and Gati \(Gathi\)”](#). *Kilesa* are discussed in [“Ditthi \(Wrong Views\), Sammā Ditthi \(Good/Correct Views\)”](#). For a discussion on *Dasa Samyojana*, see, [“Dasa Samyojana – Bonds in Rebirth Process.”](#)

The 12 types of *akusala citta* are listed in, [“Akusala Citta and Akusala Vipāka Citta.”](#) But I thought it would be more explanatory to list them. The numbers below correspond to the numbers in the Table.

Lobha (Greedy) Citta (Also has the *moha* root)

1. *Citta* connected with wrong view, accompanied by pleasure, and done with habit.
2. *Citta* connected with wrong view, accompanied by pleasure, and done reluctantly.
3. *Citta* NOT connected with wrong view, accompanied by pleasure, and done with habit.
4. *Citta* NOT connected with wrong view, accompanied by pleasure, and done reluctantly.
5. *Citta* connected with wrong view, accompanied by neutral mind, and done with habit.
6. *Citta* connected with wrong view, accompanied by neutral mind, and done reluctantly.
7. *Citta* NOT connected with wrong view, accompanied by neutral mind, and done with habit.
8. *Citta* NOT connected with wrong view, accompanied by neutral mind, and done reluctantly.

Dosa (Hateful) Citta (Also has the *moha* root)

9. *Citta* associated with hate, accompanied by displeasure, done with habit.
10. *Citta* associated with hate, accompanied by displeasure, done reluctantly.

Moha Citta (only with the *moha* root)

11. *Citta* accompanied by neutral mind, associated with *vicikicchā* (not aware of bad consequences)
12. *Citta* accompanied by neutral mind, associated with *uddhacca* (unfocused).

Notes:

1. Even though recent Abhidhamma literature categorize *lobha* and *dosa citta* as *asankhārika* (unprompted) and *sasankhārika* (prompted), in original Abhidhamma, they were not categorized as such.
2. For example, the two *dosa-mūla cittā* are:
 - i. *Domanassa sahadagata paṭigha-sampayutta citta*.
 - ii. *Domanassa sahadagata sasankhārika paṭigha-sampayutta citta*.
 - The first *citta* arises due to *sansāric* habits and thus are more potent. For example, someone who has a tendency to flare-up, normally generates such potent *citta*.
 - On the other hand, another person without such a habit, may not generate such a *citta* unless “forced hard”; it is done with reluctance, “when pushed to the limit”, or if the perceived “sense pleasures” are enticing. Then he/she is actually “incorporating new “*san*” or initiating a new habit; thus the name “*sasankhārika*.”

7.13 Ultimate Realities – Table

1. This Table lists the three kinds of ultimate realities (*paramatta dhamma*) in this world of 31 realms; they are conditioned, i.e., they arise due to causes and perish subsequently on their own; nothing in this world is permanent. They do not arise if there are no causes, and when that happens *Nibbāna* is the result.

- *Nibbāna* is the unconditioned reality. It is attained when the six causes (*lobha, dosa, moha, alobha, adosa, amoha*) are not there. Then the mind cannot get a “foothold” anywhere in the material world.
- Cultivating the three causes of *alobha, adosa, amoha* (together with removing *lobha, dosa, moha*) is needed in following the Noble Eightfold Path, and when wisdom grows, all causes will be rejected by the mind automatically at the end.

2. Ultimate realities can be compared to the fundamental particles in physics. Even though it was believed in the early stages that atoms were the fundamental particles, now there are about 32 of such particles; but now the “particle nature” is dissolving into “energy packets” in elementary particle physics. In Buddha Dhamma, the 28 types of *rūpa* are very fine, and cannot be “seen” even with *abhiññā* powers; they are “energy packets.”

3. The table also shows how “this world of 31 realms” can be described via the five aggregates, the twelve sense bases, or 6 *dhatu*s and how they incorporate the ultimate realities. There are other ways too. They are all compatible and consistent with each other.

- For example, 89 *citta* and 52 *cetasika* are included in the four “mental” aggregates, or in the mind base and mind objects, or just in the *viññāṇa dhātu*.
- Also note that the correct word is *kandha* and NOT *skandha* for the five “aggregates.” The Pāli (and Sinhala) word *kandha* means a “pile” (as in a pile of sand) and is still used to denote a hill in Sinhala. I just look up the meaning of “*skandha*” in Sanskrit and it says “Hindu god of war.” This is how the true meanings of the original words have been lost due to incorporation of “sophisticated sounding” Sanskrit words with no relevance.

Table: Analysis of the “world” and *Nibbāna* in terms of ultimate realities.

| Lokaya (World of 31 Realms) | | | | Nibbāna |
|--|------------|--|--|----------|
| Ultimate Realities (4 types) | Citta (89) | Cetasika (52) | Rūpa (28) | |
| Aggregates (5) | | Vedanā skandha Saññā skandha Saṅkhāra skandha Viññāṇa skandha | Rūpa skandha | Nibbāna |
| Sense Bases (12) | Mind base | Mind Objects (also includes fine matter or sukuma rūpa) | 5 internal (pasāda) rūpa 5 external rūpa (vaṇṇa, sadda, gandha, rasa, pottabba) | |
| Dhatu (6) | | Viññāṇa | pathavi, āpo, tejo, vāyo, akasa | |
| <i>saṅkhata</i> (<i>sankata</i> in Sinhala) include everything in this world (sentient beings have all six dhātu; everything else in the world, like inert objects and plants, do not have viññāṇa) | | | | asankata |
| Notes: 1. Number of citta can be 121 in the alternate scheme; see, The 89 (121) Types of Citta | | | | |

2. Vedanā, saññā are two cetasika; saṅkhāra has the rest of 50 cetasika; for a list of cetasika, see [Cetasika \(Mental Factors\)](#)
3. For fine (sukuma) rūpa, see [Rūpa \(Material Form\) – Table](#).

7.14 **31 Realms of Existence**

May 20, 2016; revised May 30, 2018; December 16, 2019; June 11, 2020; August 24, 2020
(revised #5 and many lifetimes, added #6)

| Realm | Description | Cause of Birth in Realm (Note 1) | Lifetime |
|--|---|--|------------------------------|
| The Apāyā (Undesired Realms) | | | |
| 1. Niraya (Hell) | Unimaginable suffering. | Anantariya papa kamma, Ten akusala kamma with established wrong views. | Variable |
| 2. Tiracchāna (Animal; Tirisan in Sinhala) | Microscopic to large animals. | Ten akusala kamma with established wrong views. | Variable |
| 3. Peta (Hungry Ghosts; Preta in Sinhala) | Some live in our world unseen to us. | Ten akusala kamma with established wrong views. | Variable |
| 4. Vinipāta Asuras (Asuras) | Some live in our world unseen to us. | Ten akusala kamma with established wrong views. | Variable |
| Sugati (Desired Kāma Loka Realms) | | | |
| 5. Manussa (Human) | Most valued birth of all realms. | Puñña abhisankhāra (thihethuka, dvihethuka, and ahethuka) | Variable (Note 2) |
| 6. Cātummahārājika Deva | Fine bodies from this realm; no diseases. | Puñña abhisankhāra. | 500 CY 9M HY (Note 3) |
| 7. Tāvatiṃsā deva | Sakka lives in this realm. | Puñña abhisankhāra. | 1000 CY 36 HY |
| 8. Yama deva | | Puñña abhisankhāra. | 2000 CY 144M HY |
| 9. Tusitā deva | | Puñña abhisankhāra. | 4000 CY 576M HY |
| 10. Nimmānaratī deva | | Puñña abhisankhāra. | 8000 CY 2304M HY |
| 11. Paranimmita Vasavattī deva | | Puñña abhisankhāra. | 16000 CY 9216M HY |
| Rūpa Loka (Fine Material Realms) | | | |
| 12. Brahma Parisajja deva | Jhānic bliss in this and higher realms. | First jhāna (minor) | $\frac{1}{3}$ kappa (Note 5) |

| Realm | Description | Cause of Birth in Realm (Note 1) | Lifetime |
|---|--------------------|---|--------------|
| 13. Brahma Purohita deva | | First jhāna (medium) | 1/2 kappa |
| 14. Brahmakayika (Maha Brahma) | | First jhāna (highest) | 1 kappa |
| 15. Parittaba deva | | Second jhāna (minor) | 2 kappa |
| 16. Appamanabha deva | | Second jhāna (medium) | 4 kappa |
| 17. Abhassara deva | | Second jhāna (highest) | 8 kappa |
| 18. Parittha Subha deva | | Third jhāna (minor) | 16 kappa |
| 19. Appamana Subha deva | | Third jhāna (medium) | 32 kappa |
| 20. Subha Kinhaka deva | | Third jhāna (highest) | 64 kappa |
| 21. Vehappala deva | | Fourth jhāna various levels from here and above | 500 kappa |
| 22. Asañña satta | Body only; no mind | | 500 kappa |
| 23. Aviha deva | Only Anāgāmīs | | 1000 kappa |
| 24. Atappa deva | Only Anāgāmīs | | 2000 kappa |
| 25. Sudassa deva | Only Anāgāmīs | | 4000 kappa |
| 26. Sudassi deva | Only Anāgāmīs | | 8000 kappa |
| 27. Akanittakha deva | Only Anāgāmīs | | 16000 kappa |
| Arūpa Loka (Immaterial Realms); see Note 4 | | | |
| 28. Ākāśānancāyatana deva | | Fifth jhāna | 20,000 kappa |
| 29. Viññāṇañcāyatana deva | | Sixth jhāna | 40,000 kappa |
| 30. Ākiñcaññāyatana deva | | Seventh jhāna | 60,000 kappa |
| 31. Nevasaññānāsaññā deva | | Eighth jhāna | 84,000 kappa |

Notes:

1. See, "[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)." *Akusala kamma* are the same as *apuññābhisaṅkhāra* (*apuñña abhisāṅkhāra*).
2. The realms and the lifetimes are extracted from various *suttā*: see, for example, "[Dhammacakkappavattana Sutta – Introduction](#)", [WebLink: suttacentral: "Saṅkhārupapatti Sutta \(MN 120\)](#), and "[Pathama Mettā Sutta](#)."
 - **In particular, [WebLink: suttacentral: Sāleyyaka Sutta \(MN 41\)](#) discusses how different types of *kamma* lead to rebirth among the 31 realms.**
 - Lifetimes of various *deva* realms are given in the "[WebLink: suttacentral: Visākhā Sutta \(AN 8.43\)](#)."
3. *Thihetuka* means *kusala kamma* done with *alobha*, *adosa*, *amoha*.
 - *Dvihetuka* means *kusala kamma* done with *alobha*, *adosa*.
 - *Ahetuka* means *kusala kamma* done with only *alobha*, *adosa*, but also without enthusiasm.
 - See, "[Patisandhi Citta – How the Next Life is Determined According to Gathi](#)" for details.
4. CE = Celestial Years; M HY = Millions of Human Years.
5. A *Mahā Kappa* is the time for the Solar system to go through a complete cycle. A quarter of this (or an *Asaṅkheyya Kappa* or 20 *kappa*) is the life of the Earth or the Solar system. The solar system is born, destroyed, and reborn just like living beings. See, "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)." The length of one *kappa* is described by the Buddha in the "[WebLink: suttacentral: Pabbata Sutta \(SN 15.5\)](#)." The lifetimes of many realms given in Ref. 9; in the English translation, the lifetimes can be found in section [WebLink: suttacentral: 18.6.2. Age Limit](#).
6. The connection between various *jhānic* states and the corresponding *Brahma* realms in, "[WebLink: accesstoinsight.org: The Thirty-one Planes of Existence](#)."
7. The names of the four *arūpa* realms are descriptive of their characteristics.
 - *Akāśānancāyatana* comes from "ākāsa" + "ananta" or infinite + "āyatana," or the realm where the infinite space is the focus of the mind (*ārammaṇa*).
 - *Vinnānancāyatana* comes from "viññāṇa" + "ananta" or infinite + "āyatana," or the realm where the infinite *viññāṇa* is the focus of the mind (*ārammaṇa*).
 - *Ākincannayatana* comes from "ākin" + "ca" or mind + "āyatana," or the realm where the focus of the mind (*ārammaṇa*) is only the mind.
 - *Neva saññā nā saññā* comes from "na" or not + "asañña" or without perception + "nā," or not + "saññā" or perception, i.e., the realm where one cannot say whether there is either "no perception" or "there is perception." One could go on for a short time without perception (just like in the *asañña* realm), but it comes back since the "*bhava*" is still there.
8. The following video gives a good general description of the 31 realms:

[WebLink: youtube: Bhante Anandajoti: The Planes of Exist](#)
9. All the realms and their characteristics detailed at "[WebLink: suttacentral: Dhammahadaya Vibhaṅga](#)"
 - English translation at "[WebLink: suttacentral: 18. Analysis Of The Heart Of The Teaching](#)."

8.1 **Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”**

Revised November 3, 2018; July 29, 2019

“Yo paticcasamuppādam passati,
so Dhammam passati.
Yo Dhammam passati,
so paticcasamuppādam passati”

One who sees *paticcasamuppāda*
sees the Dhamma.
One who sees the Dhamma
sees *paticcasamuppāda*..

([WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#); at the end)

Therefore, it is critical to understand what *paṭicca samuppāda* is. It explains how causes lead to effects. NOTHING in this world happens without a reason; see the next post for details: “[Paṭicca Samuppāda – Overview](#).”

- Here is the pronunciation of *paṭicca samuppāda*:

[WebLink: Pronunciation of Paṭicca Samuppāda](#)

Paṭicca samuppāda translated into English as “Dependent Origination” does not convey the true, complete meaning of the phrase. It is better to keep the same name and understand what it means.

- **The closest English translation is “Willful attachment leading to the existence of similar kind.”**

1. *Paṭicca* = *pati* + *icca*; here “*pati*” is bonding, and “*icca*” is liking.

- Thus *paṭicca* is “bonding to something willingly” or “get attached to something through a liking for it.”
- This bonding depends on one’s *gati* (habits and likings), which in turn are due to deep-seated *āsavas* (cravings).
- There are many posts on the website on this key Pāli term: “*gati*.” One can get a list of relevant posts by typing “*gati*” in the “Search” box at top right.

2. *Samuppāda* = “*sama*” (same or similar) + “*uppāda*” (generation), i.e., an existence (*bhava*) of similar quality or kind.

- Thus *samuppāda* means leading to existence or experience with similar defilements that used to drive the bondage in the first place.
- Everything in this world arises due to six root causes: *lobha, dosa, moha* and *alobha, adosa, amoha*; see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
- Different types of *paṭicca samuppāda* cycles operate based on which kind of causes are involved; see, “[Paṭicca Samuppāda Cycles](#).”

3. For example, when we generate potent hateful thoughts about a person, we could be in the mindset of an animal. At that moment, we may even act like an animal, hitting and clawing at that person if things get out of hand. Even if we may not act physically, we will have that mindset.

- **At that moment, we generate a *gati* corresponding to “*bhava*” or existence similar to an animal in our mind. That, in turn, leads to grasping a corresponding “*bhava*.” Then “*bhava paccayā jāti*” leads to a similar “*jāti*” or birth.**
- Because we got “bonded” to that situation via hateful thoughtful thoughts, we generated a corresponding “*bhava*” in our mind. Results correspond to causes: cause and affect. As we keep creating the same kind of “*bhava*,” that leads to forming “*gati*” or habits. All these are interconnected.

4. Now if we keep incurring such situations frequently, i.e., get in to fights with that person (or with others) in similar manner, we will be building up that “*bhava*” and this could lead to the formation of very potent *kamma* seeds; see, “[Sankhara, Kamma, Kamma Bija, Kamma Vipāka](#).”

- Furthermore, it becomes a “*gati*” as well (see, “[Sansāric Habits and Asavas](#)”). Then it is easier to get into such situations, and a vicious cycle starts leading to that *gati* to take hold.
- Here, it is critical to understand that “*uppāda*” or “birth” is according to the “bonding with liking” (*paṭi icca*) for CAUSES, not the birth itself. For example, no one wants to be born a dog. But a birth as a dog CANNOT be avoided if one willingly does “lowly things” appropriate for dogs, and thus cultivates “dog *gati*.”

5. Now we combine the two terms: “*paṭicca samuppāda*” means “attachment to something leading to the generation of corresponding “*bhava*” (and thus *gati*).

- The establishment of a *bhava*, in turn, leads to a corresponding *jāti* or birth: “when one gets attached, it sets up the likelihood of a new birth of similar characteristics.”
- For example, when someone acts with greed out of habit, he/she is prone to act that way during the lifetime. Furthermore, it could be manifested in a stronger way in a future birth by being born as a *Peta* (hungry ghost).

6. Therefore, the establishment of an “existence” (*bhava*) could be two ways:

- Even during the current lifetime, a similar situation can arise. For example, the “*gati*” formed via above mentioned “fights” with other people, will tend to draw oneself to a similar outcome even with the slightest provocation. That is a “*pavutthi bhava*” (and *jāti*) that lasts for a short time during current life; see, “[Idappaccayatā Paticca Samuppāda](#).”
- If this hateful “*gati*” becomes profoundly ingrained and becomes a potent *kamma* seed, that could come to the mind at the dying moment. That could lead to a hateful “*uppatti bhava*” in the next existence, as an animal or even in the *niraya* (hell); see, “[Akusala-Mūla Uppatti Paticca Samuppāda](#).”

7. Here one should also be able to make a distinction between “*bhava*” (existence) and “*jāti*” (birth). For example, an *uppatti bhava* may give rise to many births until the *kammic* energy in that *kamma* seed is wears out; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- That is why, even though the human *bhava* is RARE, one may be reborn a human many times at a stretch. Only those who were born in human in previous life (or a few lives) may be able to remember those lives; see, “[Evidence for Rebirth](#).”
- Different types of *paṭicca samuppāda* cycles discussed at: “[Paticca Samuppāda Cycles](#).”

8. By perceiving illusory happiness, we get ourselves willingly attach to pleasurable things. We also attached to stuff via hate, and the root cause for that is an attachment to something related.

- For example, we get “attached” to a person with hate, if that person is blocking our access to something that we like: We keep thinking about how bad he is, etc.
- Thus attachment is possible with greed or hate. That is what “*taṇhā*” (in Sinhala, “නැණට හැසිරීම” or “get fused or attached to” in English) means; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”
- Therefore, it is essential to realize that “*taṇhā*” does not mean just greed. It could also be due to hate or dislike.

9. Ultimately, both greed and hatred arise due to ignorance. Ignorance of not knowing the unfruitful nature of “this world” of 31 realms, i.e, “[Anicca, Dukkha, Anatta](#).”

- There is unimaginable suffering in the lower four realms (see, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”).

- There is better happiness called *nirāmisa sukha* compared to sense pleasures: “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

10. There is no one, or no external force, keeping us bound to “this world” of 31 realms; see, “[The Grand Unified Theory of Dhamma](#).” Just like an octopus grabbing its prey with all eight legs, we willingly cling to things in “this world” of 31 realms filled with suffering.

- **Unless we see the true unfruitful and even dreadful (in the lower four realms) nature of ‘this world’ by comprehending “[Anicca, Dukkha, Anatta](#),” we will not let go of it.**

11. This is an excellent example of the confusion caused by translating Pāli to Sanskrit and then back to English or Sinhala; see the explanation of *Pratītyasamutpada* (the Sanskrit word for *Paṭicca samuppāda*) on Wikipedia:

[WebLink: wiki: Pratītyasamutpāda](#)

- I think you will agree that it is confusing at best, with multiple possible meanings.
- On the other hand, for someone knowledgeable in Pāli or Sinhala the meaning is very clear in the name itself: pati + icca sama + uppāda.

12. Please read, “[Habits and Goals](#),” “[Sansāric Habits and āsavas](#),” and “[The Way to Nibbāna – Removal of āsavas](#),” before reading further postings as they appear below. One should also analyze one’s own life experiences to see whether they are compatible with this explanation. *That is part of vipassanā (insight) meditation.*

- If one is genuinely interested in Buddha Dhamma, it is critical to understand *Paṭicca samuppāda*.
- How our thoughts arise AUTOMATICALLY due to *gati* is discussed in the post, “[How Are Gathi and Kilesa Incorporated into Thoughts?](#).”
- Even though the underlying concept seems to be simple, *paṭicca samuppāda* can run very deep. In the “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#),” the Buddha admonished Ven. Ānanda not to take it lightly.

Next, “[Paticca samuppāda – Overview](#),”

8.2 Paṭicca Samuppāda – Overview

Revised November 4, 2018

1. Nothing can happen without a cause (“*hetu*” in Pāli or Sinhala). Everything happens for reasons or causes. Normally, many things simultaneously arise due to multiple causes.

- However, one cause or one effect could dominate and thus sometimes it appears that one thing happened due to one cause.

2. Due to our ignorance of the true nature of this world, we keep initiating new causes. If we do not add fuel to a fire, the fire will extinguish when the fuel runs out.

- We have been on this *sansāric* journey from the beginning-less time because we have been adding “fuel to the fire” without any pause.

3. The *paṭicca samuppāda* (**let us shorten it as PS**) describes all aspects of life moment-to-moment: how we suffer the consequences of our past deeds, and how we make new causes or add more fuel.

- Acariya Buddhaghosa understood only one aspect (the *akusala-mūla* PS) of the innumerable applications of PS, and since the time Theravāda sect adopted Visuddhimagga as the basis of Dhamma, this wonderful knowledge of PS has been hidden.
- Many variations of PS are discussed in the [WebLink: suttacentral: Paticcasamuppādavibhaṅga](#) of the *Vibhangappakarana* in the *Abhidhamma Piṭaka*.

4. Here are the main subsections in this section:

- Several PS cycles are discussed in this section: “[Paṭicca Samuppāda Cycles](#).” However, please read #7 below, before going there.
- For those who really want to avoid too many Pāli words: “[Paṭicca Samuppāda in Plain English](#).”
- What is meant by “*paccayā*” (conditions), and discussions on different types of conditions: “[Pattana Dhamma](#).” An introduction to “*paccayā*” is given in #5 below.
- “[Imasmim Sati Idam Hoti – What Does It Really Mean?](#)”

5. Even if there is a cause, its result (effect) does not manifest until the right conditions (“*paccayā*” in Pāli) appear.

- This is discussed in detail in, “[What Does “Paccayā” Mean in Paṭicca Samuppāda?](#)” We can get the basic idea from a few examples here.
- A matchstick has the potential to bring about a fire. But unless it is heated by striking on a hard surface, fire does not appear.
- A bomb can explode and create much destruction. But it will not go off until triggered.
- We all have bad habits, but they do not manifest until it is triggered by an object (a picture, sound, smell, touch, or a thought).

6. Therefore, if one acts mindfully, one can PREVENT many *akusala vipāka* and FORCE many *kusala vipāka*. We all have an innumerable numbers of both accumulated in this *sansara*; see, “[The Law of Attraction, Habits \(Gathi\), and Cravings \(Asavas\)](#),” and “[The Law of Attraction, Habits \(Gathi\), and Cravings \(Asavas\)](#).”

- Details at: “[Pattana Dhamma](#).”

7. It is necessary to understand that the terms in the standard PS cycle: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna*”

paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, marana, soka-parideva-dukkha-domanassupāyasā sambhavan'ti” are highly condensed.

- One could write a book on each term.
- At a minimum, one needs to get the basic idea of each keyword: *avijjā, saṅkhāra, ..bhava, jāti*.

8. Most modern texts in English just translate those keywords to single words in English, which leads to misinterpretations in many cases.

- **It is better to understand the meaning of each of those Pāli words and just use those words. Their meanings can have different meanings based on the context.**

9. In the following, I will provide a selected few posts to read in order to get an idea of what is meant by those Pāli words. **The following terms are associated with the *akusala-mūla* PS.**

Avijjā: [“What is Avijjā \(Ignorance\)?”](#)

Saṅkhāra: In most cases, what comes to play is *abhisāṅkhāra* or “strong *saṅkhāra*.” But it is necessary to get the basic idea of “*saṅkhāra*” first: [“Saṅkhāra – What It Really Means.”](#)

Viññāna: One of the complex Pāli words: [“Viññāna – What It Really Means.”](#)

Nāmarūpa: Another complex word: [“Viññāna paccayā Nāmarūpa.”](#)

Salāyatana: *Salāyatana* (six *āyatana*) are not six sense faculties, [“Nāmarūpa paccayā Salāyatana.”](#)

Phassa: What really comes into play in PS is not “*phassa*,” but “defiled contact” or *samphassa*, [“Difference between Phassa and Samphassa.”](#)

Vedanā: *Vedanā* in PS does not really mean “feelings”, but “*samphassa jā vedana*“: [“Vedanā \(Feelings\) Arise in Two Ways.”](#)

Tanhā: [“Tanhā – How We Attach Via Greed, Hate, and Ignorance.”](#)

Upādāna: [“Difference Between Tanhā and Upādāna.”](#)

Bhava and Jāti: [“Bhava and Jāti – States of Existence and Births Therein”](#) and [“Gati to Bhava to Jāti – Ours to Control.”](#)

- Of course, *gati* is another key Pāli word that is not discussed much these days. More posts on each word can be found by using the “Search” box at top right.

10. It is clear from #7 above that all future suffering (*jarā, marana, soka-parideva-dukkha-domanassupāyasā sambhavan'ti*) will be stopped when the *akusala-mūla* PS is stopped from arising.

- **It is also clear that all future suffering ends when there is no rebirth, i.e., when the step “*bhava paccayā jāti*” stops and thus “*jāti paccayā jarā, marana, soka-parideva-dukkha-domanassupāyasā*” step stops.**
- As long as there *jāti* (or births), the suffering will not end.

11. The *akusala-mūla* PS can be terminated by working on two main targets: *avijjā* and *taṇhā*.

- It is quite clear why we need to remove *avijjā*. If there is no *avijjā* (i.e., if one comprehends the Four Noble Truths), then an *akusala-mūla* PS will not even get started.
- The second one of removing *taṇhā* is not that clear. It is actually gradually reduced by changing our *gati*. This is discussed in the post: [“Difference Between Tanhā and Upādāna.”](#)

8.3 How Are Paṭicca Samuppāda Cycles Initiated?

November 6, 2015; Major revision October 13, 2017; #12 added November 3, 2017

Paṭicca samuppāda (PS) cycles have many varieties and can be analyzed in great detail and can reveal subtle aspects as well as clarify our understanding about the world we live in.

1. There are two broad categories of PS cycles.
 - i. The standard *paṭicca samuppāda* describes how our actions (*saṅkhāra*) lead to the generation of new *kammā*. Thus they could be called “*kammā* generating” PS cycles.
 - ii. The other category of PS cycles is responsible for bringing in *kammā vipāka*, and thus could be called “*vipāka* generating” PS; this type of a PS cycle is labelled in the *Tiṭṭaka* as an *avyākata* PS; *avyākata* means “*kammically neutral*”; not generating new *kammā*. The Pāli word is *avyākata* and the Sinhala word is *avyākṛuta*. But in many places it is written as *abyākata*.
2. Everything that we INITIALLY EXPERIENCE is due to a *kammā vipāka* and is brought in by an *avyākata* PS. That PS process just make us see, hear, smell, taste, experience bodily sensations, and bring in new thoughts to the mind.
 - However, the feelings (*vedanā*) that we experience due to such sense inputs are not the same for different persons, except in the case of bodily sensations. Everyone feels the same if getting hit (pain), or getting a good massage (pleasure).
 - In other five sense inputs, the *vedanā* generated depends on the person. For example, a teenager may like a heavy metal song, but his grandfather may not.
 - In all cases, each person RESPONDS to the sense input in one’s own way. It is this response that may lead to new *kammā* and is described by the “*kammā* generating” PS cycles.
3. We do not have control over the *avyākata* PS — which bring *kammā vipāka* by initiating new sense events; once started, they cannot be stopped. Even *Arahants* cannot avoid *kammā vipāka*.
 - But the “*kammā* generating” PS cycles that arise as our response to such sense events can be controlled by us based on our *gati* (*saṃsāric* habits). This is the basis of *Satipaṭṭhāna/Ānāpāna* meditations.
 - *Avyākata* PS bring *kammā vipāka* when suitable conditions are available; see, “[Anantara Samanantara Paccaya](#).”
4. Now, depending on what we see, hear, etc due to a *kammā vipāka*, we MAY start making *saṅkhāra* and a new “*kammā* generating” PS cycle may be initiated; then we make more *kammā vipāka*.
 - For example, **when we see** an appealing object, we may generate *lobha* (greedy) thoughts (*apuññābhi saṅkhāra*); **when we see** a distasteful object we may generate hateful thoughts (*apuññābhi saṅkhāra*). **If we see** a beggar on the street, we may generate *alobha* thoughts (*puññābhi saṅkhāra*) which may lead to a meritorious act (giving some money to that person).
 - All those “seeing events” arose due to *avyākata* PS cycles. But those different responses, generating *saṅkhāra*, were done by “*kammā* generating” PS cycles, that operate based on one’s *gati* (*saṃsāric* habits), as will discuss below.
5. **ALL our actions are initiated by *avyākata* PS cycles; but not all *avyākata* PS cycles lead to “*kammā* generating” PS cycles generating new *kammā*.** You may want to think about this and see that indeed that is true.
 - Thousands of people see an item on display in a shop. Many just glance at it and don’t give it another thought. Some will stop and take another look since they like it. There could also be someone who really wanted it, but may not have money, and even think about stealing it!

- There is no “fixed person with *avijjā*.” *Avijjā* can arise in any normal human (without *magga phala*), if the sense input is strong enough! You may also want to read the post on [“Self and ‘no-self’: A Simple Analysis – Do We Always Act with Avijjā?”](#)
- Whether *avijjā* arises depends on the particular sense input and the person (more correctly person's *gathi*).

6. We normally call a person “moral” when he/she acts morally in most cases.

However, that does not mean that a “moral person” will not generate immoral thoughts at times. If a “tempting sense input comes in” via any of the six senses, he/she may act with *avijjā* and start an *akusala-mūla* PS.

- Similarly, one labelled as a criminal (because of his prior acts) may see someone in danger and act with kindness initiating a meritorious deed.
- This is why the Buddha said that there is no “unchanging self”, but there is no “self” either. What happens at a given moment depends on what kind of PS cycle is “triggered”, and the level of *avijjā* triggered. *avijjā* can range from *moha* (morally blind) to just not knowing the *anicca* nature.
- A person considered to be “moral” may act with *moha* and commit a severely immoral act, if the trigger was tempting enough.

7. ALL our sense inputs come to us via *kammā vipāka*. Through the beginning-less *saṃsāra*, we have accumulated “infinite amounts” of *kammā vipāka*, large and small, and each “seeing event”, “hearing event”, etc is due to a *kammā vipāka*.

- We do not even notice most of these sense events. When we travel in a car, we see a million of things, but only a few “catch our attention.” Only those few events lead to the initiation of “*kammā* generating” PS cycles.
- But even one initiation of a “*kammā* generating” PS cycle can, in turn, initiate many “follow-up” PS cycles. For example, while walking we may see a house by the road that we really like (which is due to a *kammā vipāka*). We may get attached to it (form *tanhā*), and then start thinking about building a house like that. Then we may remember a nice house that belongs a friend, and then start thinking about that friend, which could lead to thinking about a common enemy. All of a sudden now we have started a stronger “*kammā* generating” PS cycle that could lead to a worse *kammā vipāka*.
- This is the “wheeling process” that we discussed in the post, [“Nībbāna – Is it Difficult to Understand?”](#) and many other posts; enter the keywords “wheeling process” in the Search box at top right and you will get many posts. Our *sansāric* journey is fueled by an uncountable “*kammā* generating” PS cycles.

8. This vicious cycle of “*vipāka*” leading to “*kammā*” leading to more “*vipāka*” is the process that binds us to the *sansara* of endless rebirths, or perpetuate our “world” of suffering.

- The Buddha describes this as, “*kammā vipākā vaddanti, vipāko kamma sambhavo, tasmā punabbhavo hoti, evan loko pavattati.*”
- That means, “*kammā* lead to *vipāka*, *vipāka* in turn lead to *kammā* and thus to rebirth (*punabbhavo*), and that is how the world (existence) is maintained.”
- There “*sambhava*” is “*san*” + “*bhava*,” or “adding more existences.” Also, “*loka*” is world, and “*pavatta*” means “maintain.”

9. The key point is that unless one has at least attained the *Sotāpanna* stage, one COULD act with *avijjā* at the level of *moha*, and generate *kammā* (*saṅkhāra*) that COULD generate *kammā bhava* corresponding to possible birth in the four lowest realms (*apāyā*).

- In other words, depending on the trigger it is possible for the *pancanīvarana* to “cover the mind” and initiate strong *akusala-mūla* PS cycles for any human being not yet attained the *Sotāpanna* stage.

- For example, we have heard stories about people with “good moral backgrounds” committing rape, under conditions that led to *kāmacchanda nīvarana* taking over their minds. *Kāmacchanda* comes from “*kāma + icca + andha*,” where *icca* is liking and *andha* is blind; thus *kāmacchanda* means “blinded by liking for *kāma* or sense pleasures.”
 - We have also heard stories about murders that were committed by “moral people” who were enraged by the sight of their spouse in bed with another person. Here the second *nīvarana*, *vyāpada*, covered their minds.
 - Those two are the strongest *nīvarana*, but we can think about cases when the other three also could lead to immoral acts: *thina middha* (frozen or lazy mind), *uddhacca kukkuccha* (tendency to do lowly things with high-mindedness), and *vicikicchā* (tendency to do unwise things due to not knowing the *anicca* nature).
10. When one attains the *Sotāpanna* stage, some of these *pancanīvarana* are permanently removed (some components are reduced below the *nīvarana* state).
- That is why **potent akusala-mūla PS cycles** — which could lead to rebirths in the *apāyā* — are not triggered for a *Sotāpanna*; see, “[Key to Calming the Mind – The Five Hindrances.](#)”
 - **One’s *gati* permanently change with *magga phala*. More changes happen at higher *magga phala*.**
11. Different types of PS cycles are discussed at: “[Paṭicca Samuppāda Cycles.](#)”
- The “*vipāka* generating” *avyākata* PS is discussed in the post, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna.](#)”
 - The “*kammā* generating” PS processes can be divided into two broad categories again: those generating “bad *kammā*” and “good *kammā*”: “[Akusala-mūla Paṭicca Samuppāda](#)” and “[Kusala-mūla Paṭicca Samuppāda.](#)”
 - Those “*kammā* generating” PS processes where one can see the consequences during this life itself are discussed in “[Idappaccayatā Paṭicca Samuppāda.](#)”
 - There can be many other types too. But one can get a good idea of how PS works in different situations can be grasped by understanding those key processes.
12. Finally, There is another important way that we get started with generating new *kamma*. This is when we “get random thoughts coming to our minds that get us started on a pleasurable action.”
- For example, we may be doing something and all of a sudden we get a thought about watching a movie or even start thinking about an enemy and what can be done to him/her. These are initiated by “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*,” where *dhammā* coming to our minds; see, “[What are rūpa? – Dhamma are rūpa too!](#)”
 - These are also *kamma vipāka*. But these are more common than just seeing an enemy by chance or hearing something that one likes, etc.
 - In either case, we need to be mindful always, and catch such “new *kamma* generations.” This is the key to *Ānāpāna/Satipaṭṭhāna bhāvanā*.

8.4 Paṭicca Samuppāda Cycles

[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#)

[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)

8.4.1 Avyākata Paṭicca Samuppāda for Vipāka Viññāna

October 17, 2017

1. First, a word about the nomenclature: The Pāli word is *avyākata* (or *abyākata*) and the Sinhala word is *avyākṛuta*. It means “not designated as *kusala* or *akusala*, i.e., *kammically neutral*“: there are no *javana citta* involved that generate *abhisaṅkhāra*.

- *Kamma vipāka* are kammically neutral. But based on those *kamma vipāka*, we initiate new *kamma*; see, “[How Are Paṭicca Samuppāda Cycles Initiated?](#).” I recommend reading that first, before continuing on this post.
- Both categories — *kamma vipāka* and *kamma* generation — can be described by *paṭicca samuppāda* (PS).
- **Another key point I want to point out is that *avyākata* PS cycles NEVER start with a *pabhassara citta* [Radiant Mind]; see below.**

2. Past *kamma vipāka* bring sense inputs via the six senses and IF we get attached — *taṇhā* — to those sense inputs, THEN that leads to new *kamma* by us. That is why it is a never-ending process, until one attains *Nibbāna*. After the *Arahanthood*, one will still experience such *kamma vipāka*, but WILL NOT get attached to them, i.e., no new *kamma* will be generated.

This cyclic process can be described in three steps:

- i. One sees, hears, smells, tastes, makes body contacts, or a “*dhamma*” comes to one’s mind. These do not “just happen”; they happen due to reasons (causes). They come about due to *kamma vipāka*, and those thoughts that arise due to them are called ***vipāka citta* OR *avyākata citta***, since they are *kammically neutral*.
- ii. Then, based on one’s *gati* (pronounced “gathī”), *āsava*, *anusaya*, one’s mind may automatically get interested in a sense input (called an *ārammana*), and may get attached to that sensory input. This happens within a billionth of a second and **we DO NOT have control over that initial response either; *mano saṅkhāra* are generated AUTOMATICALLY in one’s mind**. These are also part of the ***avyākata citta* since they arise AUTOMATICALLY within the same *citta vīthi***.
- iii. **IF we one gets attached, then one starts generating new *kamma* by thinking CONSCIOUSLY about that sense input (generating *vacī saṅkhāra*)**, i.e., one starts “wheeling around” accumulating “*san*” that contribute to new *kamma*; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).” That new *kamma* can get stronger if we may also start doing *kāya saṅkhāra* via speech and bodily actions.

3. **All those three steps may start even before our minds register that we have started accumulating new *kamma***. This is because *citta vīthi* are very fast, and all those happen within a single *citta vīthi*; see below. But if we are mindful, we can “catch” such “wheeling around” within a few seconds and stop just the *apuññābhi saṅkhāra* (we should not stop *puññābhi saṅkhāra* or moral thoughts).

- But that requires careful monitoring of our “automatic responses” to such sense inputs; this is what is called “being mindful.” With practice, one can “catch” them quickly and stop bad thoughts/speech/actions.

- If we keep doing that, then OVER TIME, our *gati* will change for the better, and our attachments to “bad things” will fade away; see, “[Difference Between Tanhā and Upādāna](#).” What is described in that post is the basis of *Satipaṭṭhāna/Ānāpāna Bhāvanā*. If one can grasp this concept, and implement it diligently over a few months, one will be able to see for oneself the benefits!
- Also see, “[Gati, Bhava, and Jāti](#)” to read about the very important concept of *gati*. **It is not correct to say we have a “self” or “no-self”; we just have *gati* that can be changed.**
- That is the basis of *Satipaṭṭhāna/Ānāpāna bhāvanā*. If one can grasp this concept, and implement it diligently over a few months, one will be able to see for oneself the benefits!
- One can try it with “bad habits” (smoking, drugs, over-eating, etc) first to see the power of it, and then extend to other *dasa akusala*. This is also the way to *Sotāpanna* stage because then one will be able to grasp *Tilakkhaṇa* too.

4. It is very important to understand the above steps, and the post “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#)” is a necessary first read too. What happens is explained in a bit more detail in “[Vedanā \(Feelings\) Arise in Two Ways](#),” “[Kāma Assāda Start with Phassa paccayā vedanā or Samphassa Jā vedanā](#),” and has been discussed in a more fundamental way in the subsection: [Living Dhamma – Fundamentals](#).”

- Grasping this cyclic process of how we have traversed this suffering-filled rebirth process can be quite helpful but one must be willing to spend some time on those posts.

5. All PS processes can be broadly divided into three categories:

- i. What we will discuss in this post is how past *kamma vipāka* bring in sense inputs via *avyākata* (Sinhala: *avyākṛuta*) PS process, and also automatically generate *mano saṅkhāra*.
- ii. Then *akusala-mūla* PS processes may contribute to generating new *kamma* that extends the rebirth process. These also start within seconds, but as mentioned above, we can catch and stop them if we are mindful (*Satipaṭṭhāna/Ānāpāna*).
- iii. The *kusala-mūla* PS process describes how one can accumulate new “good *kamma*” that will eventually help us attain *Nibbāna* by following the Noble Path. If the *kamma vipāka* generated such a “good PS” process, we should cultivate those. That is also part of *Satipaṭṭhāna/Ānāpāna*.

The *akusala-mūla* and *kusala-mūla* PS processes are discussed in: “[Paṭicca Samuppāda Cycles](#).” So, this post on *avyākata* (*avyākata* in Sanskrit) (Sinhala: *avyakṛuta*) PS process will complete that subsection.

6. Now we can make the connection between the categories in #2 to categories in #5.

- The sense inputs initiation #2 (i), and the initial response to it #2(ii), are generated by the *avyākata* PS process of #5(i).
- Our CONSCIOUS response to those sense inputs in creating new *kamma* (*apuññābhisaṅkhāra* or *puññābhisaṅkhāra*) in #2(iii), are carried out by the two kinds of PS processes in #5(ii) and #5(iii).

7. This *avyākata* PS process is not discussed in current *Theravāda* texts including *Visuddhimagga*. It is of course in the *Tipiṭaka*, and only the Pāli version is available at: “[WebLink: suttacentral: Paṭicca Samuppāda Vibhaṅga](#)” (Section 2.11 on *Abyākata Niddesa* is about three-quarters of the way down from the top).

- I have not seen any current texts or internet sites in English that describe the *avyākata* PS process. But is needed to complete the picture of how *kamma vipāka* bring in sensory inputs to us AND initiate new *kamma*.

8. Here is the initiation of the *avyākata* PS process per *Tipiṭaka* reference in #7 above: “..*vipākam cakkhuvīññāṇaṃ uppannaṃ hoti upekkhā sahaḡataṃ rūpārammaṇaṃ, tasmim̐ samaye saṅkhāra paccayā viññāṇaṃ, viññāṇa paccayā nāmaṃ, nāma paccayā chaṭṭhāyatanaṃ, chaṭṭhāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti, jāti paccayā jarāmaṇaṃ. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.*” [[Weblink: suttacentral:](#)

2.11. Abyākataniddeṣa 2.11 Ahetukakusalavipākacitta 2.11.1.1 Ahetukakusalavipākacitta 2.11.1.1.1. Cakkhuvīññānacitta]

- We can translate the initial part of this verse as, “..when a *rupārammana* (seeing an object) gives rise to a *vipāka cakkhu viññāṇa* with **neutral feelings** (i.e., just seeing)..”
- Thus, “seeing” event is a neutral *vedanā*, as are all *vipāka* that come through all senses except the body: Only *kāya viññāṇa* — coming through the physical body — can directly generate *sukha* or *dukkha vedanā* due to *kamma vipāka* (as in getting hit by something or getting a massage).
- The other five types sensory inputs, at the moment of receiving, generate only neutral feelings (*upekkha vedanā*). This is an important point to grasp. All these like seeing, hearing, could generate “good or bad feelings” based on our *gati*, and those secondary feelings arise moments later (even though we cannot perceive that because it is so quick).
- But we can clearly see that, for example, some may generate “good feelings” and others may generate “bad feelings” upon hearing the same song. Seeing the same politician may cause “good feelings” in his supporters and “bad feelings” in those in the opposite party, and neutral feelings in others.

9. Unless it is pre-planned, a seeing event (any sense event) is initiated by a *kamma vipāka*. (However, going to see a movie is a deliberate action, in which case the real starting point is an idea or a *dhamma* coming to the mind as a *kamma vipāka*; think about it!)

- Again, it is important to grasp that a seeing event itself is a neutral event (*upekkhāsahagataṃ rūpārammaṇaṃ*) EVEN IF it is the seeing of a good object or a bad object. “Good or bad” is a relative thing depending not on the object but only on one’s *gati*, as explained in #8 above.
- One way to think about it, **this initial *cakkhu viññāṇa* is just the “seeing”, i.e., it is like taking a picture with a camera.**

10. In the same way, *sota viññāṇa* is just the “hearing”, *ghāṇa viññāṇa* is just the “smelling,” etc. Whether they are “good or bad *vedanā*” depends on the individual.

- When that image is presented to the mind, it instantly matches the image with one’s cravings, likes, dislikes (i.e., *gati*), and *mano saṅkhāra* are generated AUTOMATICALLY, leading to *viññāṇa*.
- Now, this second *viññāṇa* is the *viññāṇa* which has incorporated one’s *gati*, not the *cakkhu viññāṇa* captured by the eyes; of course, *cakkhu viññāṇa* is also **registered** in the mind.

11. This is explained in the next step in #8 above, “*tasmim samaye* (at that time) ***saṅkhāra paccayā viññāṇaṃ, viññāṇa paccayā nāmaṃ, nāma paccayā chaṭṭhāyatanaṃ, chaṭṭhāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti, jāti paccayā jarāmaraṇaṃ. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.*”**

This is the *avyākata* PS due to the *kamma vipāka*.

- Note that this PS process is different than the *akusala-mūla* and *kusala-mūla* PS processes; see the highlighted part of the *avyākata* PS above.
- First, **it does not start with “*avijjā paccayā saṅkhāra.*”** There will be no *kamma* done with *avijjā*. This is just a *kamma vipāka*.

12. Without going into this complex process, only the mindset of the person is changed based on the contact (*phassa*) of the *ārammana* with the *gati* of the individual.

- We note here that there are no “*nāmarūpa*” involved here, but just “*nāma.*” This is a deeper point, but the generation of “*nāmarūpa*” involves *javana citta* which actually performs *kamma*. In this *vipāka* cycle, no *kamma* is done by the mind; the mind just matches the “picture” that it received against one’s *gati*, and automatically recognizes if it is an object that one likes/dislikes.

- For example, if an alcoholic sees a bottle of his favorite alcohol, he will be temporarily be “born” (*jāti*) as an alcoholic at that instant. But if it was a person who has no such *gati*, this process will end right there (just seeing).
- But if it did lead to the person being born in the “alcoholic state”, then a new *akusala-mūla* PS process will run inside that *avyākata* PS process starting at “*bhava paccayā jāti*” step.

13. Therefore, subsequent to that *avyākata* PS, new *akusala-mūla* PS processes may start. That is the “new *kamma* generation.” Even though an *Arahant* will experience a similar *avyākata* PS, that WILL NOT lead to an *akusala-mūla* PS process.

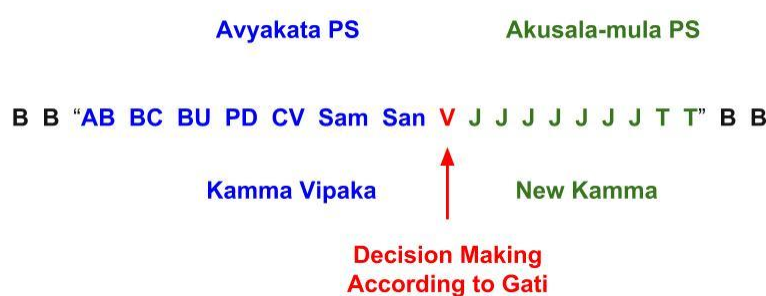

- An *akusala-mūla* PS process MAY NOT be initiated even in a normal human if he/she did not have *gati* to be attached to that sense input (*ārammana*).
- But that does NOT mean that the *avyākata* PS in that case involved “*pabhassara citta*” [Radiant Mind] or “pure uncontaminated *citta*.” It just means that person did not have *gati* to be interested in that particular sensory input.

14. Both the initial *avyākata* PS and the subsequent *akusala-mūla* PS process will take place within the same *citta vīthi* (in the above example a *cakkhudvāra citta vīthi* with 17 *citta*), which lasts only a billionth of a second!

- Such fast processes are not discernible to any human other than a Buddha. But we have the ability to study it and realize that indeed that must be correct. In that sense, we must not focus on just this process, but realize that it fits in nicely with any phenomenon that we experience.
- As one learns deeper concepts, it will be difficult not to be amazed by the capabilities of a Buddha. This is how one builds one’s faith (*saddhā*).
- The following discussion will illustrate how the processes that we discussed above fit in nicely with the concept of a *citta vīthi*.

15. The following may not be fully graspable by someone who is not familiar with the details of *citta vīthi*. But just read on and try to get the basic idea without worrying about the details.

- The following figure shows a typical thought process (*citta vīthi*) that is started when eyes capture a “seeing event” (*rūpa aramanna* or *rūpārammana*).

B = bhavanga, AB = atita bhavanga, BC = bhavanga calana,

BU = bhavanga upacceda, PD = pancadvara vajjana, CV = cakkhu vinnana,

Sam = sampticcana, San = santirana, V = vottapana, J = javana, T = tadanga

Click the following link to magnify and download: [WebLink: PDF File: Avyākata Piticca Samuppāda](#)

- For a discussion on *citta vīthi*, see, “[Citta vīthi – Processing of Sense Inputs.](#)”

16. In between *citta vīthi*, the mind is in the “*bhavaṅga* state”; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)” That post is also a bit advanced, and I will try to make a new section on “simple *Abhidhamma*” in the future.

- If you see someone not active and just staring into space (not really thinking or concentrating on an idea), then that person's mind is likely to be in the *bhavaṅga* state (**B** in the figure). This is also explained in the post, "[Citta vīthi – Processing of Sense Inputs.](#)"
- When the mind switches from this *bhavaṅga* state to a picture that is brought to its attention, it takes three thought moments to "break away" from that *bhavaṅga* state and to focus the attention on the new sensory input.
- With the **PD** *citta*, the mind sees that it is coming through the "eye door" (*cakkhu dvāra*) and in the next *citta* captures that picture. This is the initiation of the *avyākata* PS process: "...*vipākam cakkhuvīññāṇam uppannam hoti*" in #8 above.

17. Then, during the next two *citta* ("Sam" for *sampaticcana*, and "San" for *santirana*), the mind matches that picture (sense input) with its own *gati* and may get attached to it. This is what is described in "*tasmim samaye saṅkhāra paccayā viññāṇam, viññāṇa paccayā nāmaṃ, nāma paccayā chaṭṭhāyatanaṃ, chaṭṭhāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti.*"

- Then the person is "temporarily born" in a different state (a person with "alcoholic *gati*" will be born instantly as an alcoholic upon seeing his/her favorite drink), and may start a new *akusala-mūla* PS process, as discussed below.
- That decision to acting with *avijjā* based on that "matching" happens at the **all-important** *votthapana (V) citta*.

18. Then a new *akusala-mūla* (or *kusala-mūla*) PS process starts and one starts generating *kamma* with *javana citta (J)*, as shown in the above figure. So, this new PS process starts with the standard, "*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa...*"

- When this initial *citta vīthi* ends, more such *akusala-mūla* PS cycles will follow, if one got "attached." Even within a second, there could be thousands of such *akusala-mūla* PS cycles running (and each becoming stronger due to the past ones), even before one is fully consciously aware of it.
- But as humans (with the neocortex that slows down this fast processing; see, "[True Brain: How the Mind Rewires the Brain via Meditation/Habits.](#)") we have the ability to stop those *akusala-mūla* PS cycles from building up to doing bad speech and bad actions.
- This is the key to *Satipaṭṭhāna/Ānāpāna Bhāvanā*: to be mindful and catch any "impulsive wrong actions" before they get out of hand. With practice, one will be able to "catch oneself" very early in this process.

19. This is also why *Satipaṭṭhāna/Ānāpāna bhāvanā* cannot just be limited to a "sitting meditation session." One needs to be engaged during all waking hours and be mindful. **Then with time, our *gati* will change for the better, and we will stop doing "foolish and damaging things."**

- Then our minds will become pure and we will be able to grasp more of Buddha Dhamma. It is a gradual process, especially initially.
- **Now it should also be clear that one will NOT have a "*pabhassara citta*" [Radiant Mind] at any time unless one is an *Arahant*.** It should be clear that one can never stop that initial *avyākata citta vīthi*. It is gone within a billionth of a second.
- However, we do need to stop those *akusala-mūla* PS processes, as soon as we become aware of them. Terminology does not matter if one is doing the correct procedure.

20. Don't be discouraged if you find this post too technical. *Paṭicca samuppāda* can go to very deep levels. Just get the overall idea and things will become clear with time if you read the other posts referenced.

8.4.2 Akusala-Mūla Uppatti Paṭicca Samuppāda

This is an early post; revised May 10, 2018

Akusala-mūla version is the only version of *paṭicca samuppāda* (PS) described in even the current Theravāda texts, even though the other versions are in the *Tiṭṭaka*.

1. One is born in this world due to the **six root causes**.

- One is born in the *apāyā* or *dugati* (and also subjected to suffering even when born in good realms) due to bad *gati* arising mainly due to **lobha, dosa, moha**. The *akusala-mūla* PS operates when actions, speech, and thoughts take place with these three root causes.
- One is born in the remaining “good realms” or *sugati* (and also experience mundane sense pleasures) due to good *gati* due to **alobha, adosa, amoha**. The *kusala-mūla* PS operates when actions, speech, and thoughts take place with these three root causes; see, “[Kusala-Mūla Paṭicca Samuppāda](#).”

2. *Akusala-mūla* PS describes the PS process when one acts with *lobha, dosa, moha*, the three root causes that bring “bad outcomes.” It is also two fold:

- The **uppatti** PS describes how a “life-stream” or a being makes the *sansāric* journey via repeated births in the 31 realms.
- The **pavutti (or pravurti)** PS describes moment-to-moment progression of a “life-stream” or a being. This is discussed at, “[Idappaccayatā Paṭicca Samuppāda](#).”

3. Let us first discuss the *uppatti* PS, which describes how the PS cycle goes through a new birth at the end of current life. The steps in this cycle are:

“*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhava, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan’ti*” [[Weblink: suttacentral: Majjhima Nikāya 115 Bahudhātukasutta](#)]

And that is how this whole mass of suffering arises: “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti* “

Let us briefly translate them:

4. With ignorance as condition, one accumulates *saṅkhāra*. It must be noted that these are really *abhisāṅkhāra*, i.e., they are strong *saṅkhāra*; *abhi* means “strong.”

- When we are born, we are born without ANYTHING material other than our tiny baby body, which actually started as a **single cell** in the mother’s womb. We grow up and start acquiring “stuff” both material and non-material: knowledge, material things, friends, spouse, children, fame, etc.
- While we acquire these “things” we also acquire new habits (*gati*) or strengthen ones that we brought from previous lives; these take place according to the *pavutti* PS at every moment: “*pati + icca sama uppāda*,” i.e., **we do things that we like and get similar kind of results**.
- When we die, we take with us only the *kamma* seeds (both good and bad) from our actions; the habits (*gati*) and cravings (*āsavā*) are embedded in them. **These are in the *manomaya kāya*, and the *manomaya kāya* leaves the dead physical body with those “updated” *kamma* seeds; see the next post.** This is basically the “net result” of our life here.
- One of existing *kamma* seeds (from this life or from previous lives) gives rise to the next life, where we acquire more of them BASED ON the *gati* and *āsavas*. So the cycle perpetuates.

5. With *saṅkhāra* as condition, energy for a new *bhava* or a *paṭisandhi viññāṇa* arises.

- This *viññāṇa* of the new life arises according to the nature of the *kamma* seed that gave rise to it. If that *kamma* seed was acquired by doing some hateful act(s), then the *viññāṇa* will be matching: “*pati + icca sama uppāda*.” If it is a seed due to an act of a generosity done with loving kindness, it could be the *viññāṇa* of a Brahma.
 - Thus the “base level of *viññāṇa*” for an animal life is VERY DIFFERENT from that of a human life, even for the same “lifestream”, i.e., when a human is reborn as an animal the “base level of *viññāṇa*” makes a huge downward transition. This is why it is NOT correct to say that “*viññāṇa* is transferred from life to life.”
6. With *viññāṇa* as condition, *nāmarūpa* arise.
- Again, the nature of the “*nāmarūpa*” of the new life is according to “*pati + icca sama uppāda*.” In the above mentioned cases, the new life form may be that of an animal or a being in the niraya (hell) or that of a Brahma with a fine body.
7. With *nāmarūpa* as condition, *saḷāyatana* arise.
- The *saḷāyatana* (six sense doors) arise accordingly too: In the above mentioned cases, all six sense doors suitable for the kind of animal form or just three sense doors (eye, ear, and mind) suitable for a Brahma.
8. With *saḷāyatana* as condition, *phassa* arise.
- Here *phassa* is really “*samphassa*” or “*san phassa*”; see step #2 in “[Tanhā -How We Attach via Greed, Hate, and Ignorance.](#)”
 - This is why this “*Akusala-Mūla Paṭicca Samuppāda*” is not applicable for an *Arahant* (and also for other *Ariyā* too at most times). An *Arahant* does not generate “*samphassa*” but just “*phassa*” without “*san*.”
9. With (*san*) *phassa* as condition, *vedanā* arise.
- Such interactions with the external world lead to feelings (*vedanā*) of different kinds. **Here, it is important to realize that NOT all *vedanā* play a role here. Those *vedanā* that arise due to *kamma vipāka* arise just due to *phassa*; only those *vedanā* that arise due to *samphassa* (“*samphassa ja vedanā*”) play a role here.**
 - Such “*samphassa ja vedanā*” depend on the *gathi* and *āsavas*: see, “[Vedanā \(Feelings\) Arise in Two Ways.](#)” Also, see step #3 in, “[Tanhā -How We Attach via Greed, Hate, and Ignorance.](#)”
 - We can get rid of this part of *vedanā* (suffering) in this very life by getting rid of “bad habits”, by becoming a “*sampajanno*”; see, “[Kayanupassana – The Section on Habits \(Sampajanapabba\).](#)”
10. With *vedanā* as condition, *taṇhā* arise.
- *Taṇhā* arise, when one gets “attached” or “fused” into a thing or situation: with *sukha vedanā*, one attaches with greed; with displeasure, one attaches with hate; one also attaches with not knowing what to do (with a highly agitated mind); see, “[Tanhā -How We Attach via Greed, Hate, and Ignorance.](#)”
11. With *taṇhā* as condition, *upādāna* arise.
- **At the moment of death**, in the last *citta vīthi*, the dying person gets a *kamma nimitta*. This is normally a vision or a sound that depicts the nature of the strong *kamma* seed that came to the forefront of the mind. For example, if the *kamma* seed that is about to give the next birth was due to a killing, then the person may see a gun or hear the sound of it, or even see himself as getting ready to shoot; thus the person will have the same hateful thoughts arise and just like at the time the crime was committed, the person embraces that situation automatically (*upādāna*), because one has such “*gati*” or habits.
12. With *upādāna* as condition, *bhavo* arise.

- The next *citta vūthi* starts with the new existence or “*bhava*” matching that state of mind: “*pati + icca sama uppāda*.” Depending on the *kamma nimitta* that was grasped, a matching existence, a human, animal, *deva*, etc. arise; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”

13. With *bhava* as condition, *jāti* (new birth) arise.

- Then a birth matching the *bhava* starts. If the *bhava* is human realm, then a human birth will result. Now, here is the difference between *bhava* and *jāti*: The duration of the selected “human *bhava*” will last until the *kammic* energy associated with that *kamma* seed is exhausted. Thus if the *kamma* seed has potential for thousand years of life, when the current life ends the next birth will be still in the human realm. This is UNLESS one commits a *anantariya kamma* or even a very strong other type of *kamma*. For example, if one attains *Anāgāmī* or *Arahant* stages, the person will not be reborn in the human realm; or if one kills a parent, for example; all these are *anantariya kamma*.

14. With *jāti* as condition, “*jara, maranan, soka-parideva-dukkha-domanassupayasa sambhavan’ti*” arise.

- *Jāti* inevitably results in decay and eventual death, and this is how *dukkha* originates.
- No matter where one is born in the 31 realms, one ages and eventually dies; in between one goes through all kinds of suffering, in particular at human realm and below. Aging and death are certainties. And at death the whole cycle re-starts.

15. The above steps describe the *uppatti* PS. The other aspect, i.e., what happens during a given lifetime, is described in, “[Idappaccayatā Paṭicca Samuppāda](#).”

All the steps in the *Akusala-Mūla Paṭicca Samuppāda* are described in detail in the series: “[Paṭicca Samuppāda in Plain English](#).”

Next, “[Kusala-Mūla Paṭicca Samuppāda](#)”,

8.4.3 Kusala-Mūla Paṭicca Samuppāda

This is an early post; revised May 10, 2018

1. *Kusala-mūla* version of *paṭicca samuppāda* (PS) is not described in even the current Theravāda texts, even though it is in the *Tipiṭaka*. This is because since the time Buddhghosa wrote *Visuddhimagga*, all Theravāda texts followed that and his other books instead of *Tipiṭaka*.

- That means the PS process for attaining *Nibbāna* has NOT been described for over 1500 years. No wonder the *Nibbāna* has been hidden for all these years.
- *Kusala-mūla* (pronounced *kusala-mūla*) PS describes the PS process for acting with *alobha, adosa, and amoha* (which is the same as saying staying away from *dasa akusala* or acting without *lobha, dosa, and moha*).

2. One is born in this world due to the **six root causes**.

- One is born in the *apāyā* or *dugati* (and also subjected to suffering even when born in good realms) due to bad *gati* arising mainly due to ***lobha, dosa, moha***. The *akusala-mūla* PS operates when actions, speech, and thoughts take place with these three root causes; see, “[Akusala-Mūla Paṭicca Samuppāda](#).”
- One is born in the “good realms” or *sugati* (and also experience mundane sense pleasures) due to “good *gati*” developed by acting with ***alobha, adosa, amoha***. *Kusala-mūla* PS cycles operate when actions, speech, and thoughts take place with these three root causes that bring “good outcomes.”
- *Kusala-mūla* PS describes the PS process when one acts with *alobha, adosa, amoha*, the three root causes that bring “good outcomes.”

3. The steps in this *kusala-mūla* cycle are:

“*kusala-mūla paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā cittapasado, cittapasada paccayā adhimokkho, adhimokkho paccayā bhava, bhava paccayā jāti, jāti paccayā jara, maranan, eva me tassa dhammanan samudhayo hoti*” [Weblink: [suttacentral: 2.10.1 Kāmāvacarakusalacitta 2.10.1.1. Mahākusalacitta](#)]

Here I have marked in red the terms that are different from the terms in the *akusala-mūla* PS. Let us briefly translate the terms. **Here I am describing both *pavutti* and *uppatti* PS together.**

4. With *kusala-mūla* as condition, one accumulates *puññabhi saṅkhāra*.

- Here *kusala-mūla* are deeds done with *alobha, adosa, amoha*, AND one does not wish for anything because one's mind is automatically rejecting anything within the 31 realms.

5. With *puññabhi saṅkhāra* as condition, a *puññabhi viññāṇa* arises. This *puññabhi viññāṇa* is accumulated as *kamma bhava* and could lead to corresponding “good” *nāmarūpa* in *pavutti paṭicca samuppāda* or a new “good birth” in *uppatti paṭicca samuppāda*.

- Because the *saṅkhāra* was generated with a *kusala-mūla* deed, **only a *kusala-mūla viññāṇa* arises: “*pati + icca sama uppāda*.”** The characteristic of this *kusala-mūla viññāṇa* is the desire (*chanda*, not *kāmachanda*) for *Nibbāna*.

6. With *puññabhi viññāṇa* as condition, *nāmarūpa* arise.

- The *nāmarūpa* are generated accordingly: one thinks accordingly and one's mind and body are attuned for meritorious deeds. At death, the *paṭisandhi viññāṇa* is again according to the *kusala-mūla viññāṇa* and thus a birth in the lower four realms is avoided for a *Sotāpanna*, and a birth in the lower 11 realms (*kāma loka*) is avoided for an *Anāgāmi*, for example.

7. With *nāmarūpa* as condition, *saḷāyatana* arise.

- The *saḷāyatana* (six sense doors) arise accordingly too: they are attuned for only meritorious deeds. At a new birth, the sense faculties arise accordingly.

8. With *saḷāyatana* as condition, *phasso* arise.

- **Note that this is just “*phassa*” and NOT “*san phassa*” or “*samphassa*” as in “[Akusala-Mūla Paṭicca Samuppāda](#).”**
- The contacts with the outside world are attuned for seeking *Nibbāna*: learning dhamma and practicing dhamma.

9. With *phassa* as condition, *vedanā* arise.

- Through such interactions, one enjoys the contact with *dhamma*, true knowledge and understanding.

10. With *vedanā* as condition, *cittapasadi* arises.

- Tranquility of consciousness is the standard translation for *cittapasadi*; it is a type of joyous feeling, lightness of heart.

11. With *cittapasadi* as condition, *adhimokkho* arises.

- *Adhimokko* is normally translated as “decision” or “resolve” where *saddhā* becomes peaked; here it means the mind is decisively attracted towards *Nibbāna*. The mind cools down.

12. With *adhimokkho* as condition, *bhava* arises.

- The resulting existence or “*bhava*” matching that state of mind: “*pati + icca sama uppāda*”; one “lives” that experience. If it is rebirth at *paṭisandhi*, an appropriate “*bhava*” is selected according to the *kamma nimitta*. Here any “*apāyagāmi*” *kamma* seeds that may have been acquired in the distant past do not get a chance to come to forefront, and thus a rebirth in the lower four realms is prevented.

13. With *bhava* as condition, *jāti* arise.

- The appropriate *jāti* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*) will result in an appropriate realm.

14. With *jāti* as condition, *jara*, *maranan*, *eva me tassa dhammanan samudhayo hoti.*”

- Any *Ariya* is also subject to decay and death as long as he/she is in one of the 31 realms. But here the connection to *dukkha* is not shown, because one is destined to attain *Nibbāna*.

8.4.4 Idappaccayatā Paṭicca Samuppāda

Re-written with a new title May 18, 2019; revised May 20, 2019

Idappaccayatā Paṭicca Samuppāda is another important teaching that has been hidden for hundreds of years. The word “*Idappaccayatā*” comes from “*ida*” for “here” and the closest English word for “*paccaya*” is “condition.” Thus *Idappaccayatā* implies “based on this condition at this moment.” Therefore, *Idappaccayatā Paṭicca Samuppāda* describes how “*pati icca*” leads to “*sama uppāda*” moment by moment based on the conditions present at that moment; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda”.](#)”

- The additional “p” in “*idappaccayatā*” comes from the combination of “*ida*” and “*paccaya*.” This is similar to “*dammacakka*” and “*pavattana*” combined to yield “*dhammacakkappavattana*” in the *Dhammacakkappavattana Sutta*.
- Another important point is that “A first point of ignorance, *bhikkhus*, is not seen such that before this there was no ignorance and afterward it came into being. **Ignorance arises at any time when the conditions are right**” or “*Purimā, bhikkhave, koṭi na paññāyati avijjāya: ‘ito pubbe avijjā nāhosi, atha pacchā samabhavī’ti. Evañcetam, bhikkhave, vuccati, atha ca pana paññāyati: ‘idappaccayā avijjā’ti.*”; see, “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\).](#)”

1. As mentioned in earlier posts (see, “[Paṭicca Samuppāda](#)”), *paṭicca samuppāda* (PS) or “cause and effect” can describe various stages of life in multiple ways: from a very fast 16 PS cycles operating **inside a thought moment** to a **long-term PS process** that describes how a “living being” is born in one of an uncountable number of species in the 31 realms in the rebirth process.

- The Buddha said that the PS is deep as a deep ocean and it can be applied to any situation, because everything “in this world” obeys the basic principle of cause and effect. It is no wonder that only one PS has been studied for over thousand years while the true Dhamma remained hidden.
- In the previous post we discussed the **uppatti PS** which describes that latter process, i.e., how the PS cycle operates between lives; see, “[Akusala-Mūla Uppatti Paṭicca Samuppāda.](#)”
- The other extreme of a very fast PS process involved within a thought moment is very complex and we do not need to examine it right now. We can learn it, but it can be “seen” only by a Buddha.
- In this post we will discuss the **idappaccayatā PS** cycle, which describes phenomena in real time without getting into what happens within a *citta* (within a thought moment). This process — just like the PS cycle operates between lives — can be easily understood by anyone.

2. As mentioned in the introduction to PS, whenever we willingly grasp something, whatever results from that action has a corresponding nature. Because one got attached willingly, a similar *bhava* will result: i.e., *pati+icca* leading to *sama+uppāda* or *paṭicca samuppāda* (PS). Here, “*icca*” is pronounced “*ichcha*.”

- In the most fundamental sense, a “greedy state of mind” will result when we get attached with greed, i.e., one develops a **habit or gati or bhava** corresponding to that state of mind; a “hateful state” (*habit/gathi/bhava*) results via hateful attachment; acts of greed and/or hate are always done with ignorance.

- Three examples of *uppatti bhava* for those three cases illustrate the principle: An excessively greedy person is likely to get a “*peta bhava*” and be born as a *peta* (hungry ghost); a person who is often engaged in hateful actions towards other beings is likely to develop a “hateful *bhava*” and is likely to be born in the *niraya* (hell) where there is lot of hate due to extreme suffering; an animal *bhava* is developed with both greed and hate. Since ignorance is always there, an animal *bhava* is cultivated with all three “*sans*”; this is the root of the word “*tirisan* = three sans” for an animal in Sinhala.

3. Now let us look at the *idappaccayatā* PS, which describes how we develop certain habits or *bhava* or *gati* during a given lifetime. It is often easier to use an example to illustrate these PS cycles. Let us examine how a teenager becomes an alcoholic.

- The teenager become friendly with a group of other teenagers who are into drinking. Initially, he may be reluctant to join in, but due to ignorance he joins them and starts drinking.
- If a good friend or a family member came to know about the situation they could have prevented the teenager from associating with such bad company, i.e., ignorance could have been dispelled by explaining to him the adverse effects of not only drinking, but also of associating with such a group.

4. The PS cycle thus starts with “*avijjā paccayā saṅkhāra*”; due to ignorance of the adverse results, the teenager starts drinking with that group (*saṅkhāra* = “*san* + *khāra*” or actions of accumulating, in this case bad *kamma*).

- The more he is involved with such drinking activities, the more he thinks about it and develops a “mindset” or *viññāna* for that activity. This is “*saṅkhāra paccayā viññāna*”; see, “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra.](#)”

5. When he really begins to like drinking, he starts thinking about it even while doing other things. This is “*viññāna paccayā nāmarūpa*.”

- In this case, *nāmarūpa* are the mental images associated with that *viññāna*, i.e., the names and shape of particular alcohol bottles, the places where he normally drinks, the friends who drink with him, etc.
- He thinks about the next “event” and visualizes the scene, **all these are associated *nāmarūpa*. Thus, here *nāmarūpa* are the mental images of “things” and “concepts” that one would like to enjoy.**

6. Now his six senses become “involved” to provide a reality to those *nāmarūpa*; to provide the desired sense pleasures.

- In Pāli terms, the six *indriya* (senses) become “*āyatana*.” For a lack of a single English word, I will call an “*āyatana*” an “import/export facility”, and really get involved in the actions associated with drinking events.
- His mind is often thinking about the next “event” (where, when, with whom, etc), he makes necessary preparations for the “event” using all six senses (now *āyatana*s), that are in accordance with the *nāmarūpa* in the previous step, i.e., “*nāmarūpa paccayā saḷāyatana*,” where ***saḷāyatana* means the six *āyatana***: the eye is now not merely for seeing, it has become an assistant in the lookout for a “good drink” or a “good friend to chat with”, etc.

7. Thus we have “*saḷāyatana paccayā phassa*,” i.e., all six *āyatana* become actively engaged making contact with relevant sense objects. His eyes are on the lookout for a favorite drink or a favorite person to chat with, etc.

- However, “*saḷāyatana paccayā phassa*” is just the “*uddesa*” or short version given in the standard PS steps. As in many cases, it needs to be explained in detail; see, “[Sutta – Introduction.](#)”
- Here instead of *phassa*, it is really called “*samphassa*” (= “*san*” + “*phassa*”), where “*san*” implies it not just contact, but a “*san*” contact; see, “[What is “San”? – Meaning of Sansāra \(or Samsāra\).](#)”

8. Such “*samphassa*” lead to *vedanā*, i.e., “(*san*)*phassa paccayā vedanā*.” He experiences “good (but immoral) feelings” with all those sense contacts.

- Because of such “good feelings”, he gets further attached: “*vedanā paccayā taṇhā*”; see, “[Tanhā – How We Attach via Greed, Hate, and Ignorance.](#)”

9. Now comes, “*taṇhā paccayā upādāna.*” *Upādāna* means “grabbing or pulling it close” like an octopus grabbing its prey with all its eight legs.

- In the present case, the teenager wants very much to re-live this experience, and he gets immersed in it; when he is experiencing the event his mind is totally absorbed in it; he does not think, and does not have the mindset to think about, any adverse consequences.
- This is the critical “habit forming” or “*bhava* forming” step.
- If this habit becomes very strong, it could lead to a new *bhava* as an animal via the *uppatti paṭicca samuppāda* process; see, “[Akusala-Mūla Uppatti Paticca Samuppāda.](#)”

10. So, the next inevitable step is, “*upādāna paccayā bhavo*”; this particular state of getting drunk becomes more and more ingrained in his mind. It becomes “a *bhava*” or “existence” or habit that is of importance to him. He very much wants to re-live that experience.

- And that is exactly what he gets: “*bhava paccayā jāti.*” This “*bhava*” or the *kamma* seed is now well established, and he can be born in that “drunken state” quite easily. All he needs is an invitation from a friend, or even a sight of a bar while travelling, for example.
- It is natural to get into that state, or be “born” in that state. So, he gets drunk at every opportunity. See, “[Bhava and Jāti – States of Existence and Births Therein](#)” for more details.

11. However, like everything else, any birth is subjected to decay and suffering: “*jāti paccayā jarā, maraṇa, ... dukkhakkhanda samudhayō hōti.*” This happens in many stages as we describe below.

- But in the case of a single drinking event, that state of intoxication comes to an end, possibly with a big headache and a huge hangover. That episode ends with nothing to show for it, but a hangover.
- Even worse, now he is “hooked”; he has formed a bad habit, which only strengthens even more if he does it again and again. Because each time, the PS runs, the *viññāṇa* for that habit gets more fuel, and the *bhava* gets stronger.

14. It is important to realize that the above PS cycle does not run to its conclusion when the drinking “event” is over. Rather the cycle can occur repeatedly unless it is stopped willfully, deliberately.

- And the way to do that is to learn Dhamma and develop good habits and become a “*sampajannō*”; see, “[Kayanupassana – The Section on Habits \(Sampajanapabba\).](#)”
- However, if the teenager keeps his bad habit, he gets trapped in that *bhava*, the more *jāti* that occurs, i.e., more frequently he will be drunk. When one gets really drunk, one tends to behave like an animal without any sense of decency, and the long-term consequences could be rebirth as an animal; see below.

15. And it is not even necessary to participate in a “drinking event” to run another PS cycle. He may be sitting at a desk trying to study, and may start going through the PS cycle MENTALLY.

- He would start with *mano saṅkhāra* and *vacī saṅkhāra* (*vitakka/vicāra* or planning), thus generating (and strengthening) the *viññāṇa* for drinking, generating *nāmarūpa* (visuals of places, friends, alcohol bottles, etc), and thus going through the rest of the cycle: *saḷāyatana, samphassa, vedanā, taṇhā, upādāna, bhava, jāti* (“living it”), repeatedly.
- Thus numerous such PS cycles can run at any time, probably increasing its frequency as the *bhava* or the habit builds up.
- The stronger the *bhava* or habit is, it will be harder to break it. This is why meditation together with another good habit to work on should be undertaken to replace a bad habit. While in meditation, one can contemplate the adverse consequences of the bad habit. Developing a good habit will keep the mind away from the bad habit. See, “[Habits and Goals](#)” and also “[Bhāvanā \(Meditation\).](#)”

16. If the teenager keeps his bad habit, that “*viññāṇa* of a drunkard” will only grow with time. If it stays strong at the *cuti-patisandhi* moment (at the end of his human *bhava*), it could lead to a new *uppatti bhava* via the *uppatti Paṭicca Samuppāda* process mentioned in #1 above: “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#).”

- Such a *viññāṇa* is likely to give rise to rebirth in the animal realm, as mentioned in # 14.

Note: This post was re-written to replace an early post, “Akusala-Mūla Pavutti (or Pravurthi) Paṭicca Samuppāda.” I had not realized at that time that what the Waharaka *Thero* had described in Sinhala as “*Pavutti* (or *Pravurthi*) *Paṭicca Samuppāda*” is really the *idappaccayatā Paṭicca Samuppāda* in the *Tipiṭaka*.

8.5.1 Introduction – What is Suffering?

1. There are two opposing factors to deal with when one is trying to convey the message of the Buddha to others:

- Foremost, the other person needs to be able to comprehend what I write. If I use too many Pāli words some people, especially those in the Western world, may not understand fully and also may get discouraged.
- On the other hand, I need to be careful not to distort the meaning of some key Pāli words. Sometimes there is no English word that truly conveys the meaning of a Pāli word. Providing incorrect information is worse than doing nothing.

2. I would like to test this new approach where I will describe concepts with minimal Pāli words. When one gets the basic idea, one could “dig in deeper” by reading regular posts.

3. **Buddha Dhamma is all about ending suffering and finding permanent happiness IN THIS VERY LIFE.** *Paṭicca samuppāda* describes how root causes for suffering lead to suffering step by step. If we understand these root causes for suffering, we can avoid such causes and make sure suffering would not arise in the future.

- The Buddha said, we suffer when we cannot maintain things to our satisfaction. Therefore, the main idea is to see whether there is ANYTHING in this WORLD that CAN BE maintained to our satisfaction.
- However, before analyzing the steps in the *Paṭicca samuppāda*, it is necessary to sort out what suffering is.

Three Categories of Suffering

The three categories of suffering are described in the *Dukkha Sutta* in the *Samyutta Nikāya*. A short conventional “*padaparama*“ description is available at:

[WebLink: Dukkha Sutta: Suffering](#)

Here we will discuss it in detail, so that we can get a good understanding of what the Buddha meant by “suffering.” It is not the feeling (*vedanā*) of suffering.

1. What is our world? Our existence, our lives, are basically what we experience: we sense things through our five physical senses and then think about them using our minds. Thus our world can be summed up by

saying that it is what we experience through our INTERNAL six senses (eyes, ears, nose, tongue, body, mind). If we can have “good experiences” we are happy, otherwise, we get sad and suffer.

- Now what we experience depends on WHAT WE SENSE through our physical senses (visuals, sounds, smells, tastes, touchables) and also WHAT WE THINK ABOUT such experiences (thoughts and concepts).
- Those twelve (six INTERNAL and six EXTERNAL) make up “our world”. Everything is included in those twelve.
- **Mind is complex, so let us first focus on the body and the five physical senses.** Before the end of the essay we will inevitably get to the mind.

2. Let us start our analysis with the simplest ten out of twelve that make up our world:

- Can we keep our internal physical senses (eyes, ears, nose, tongue, and the body) to our satisfaction?
- Can we keep those that we like to experience that are in the outside world (visuals, sounds, smells, tastes, touchables) to our satisfaction?

3. Let us discuss these two issue one by one. First, let us think about whether we can keep our physical bodies and its associated senses to our satisfaction.

- It is true that we can maintain our five physical senses to our satisfaction for many years. And this is why people do not even take time to think about these ideas. There are many temptations out there and we cannot wait to “get back to such senses pleasures.” This is why the Buddha said that the suffering is “hidden behind a veil of apparent pleasures.”
- We start feeling this hidden suffering when we pass the middle age. Our five physical senses start getting weaker. The eyesight start dropping, hearing may start decreasing, our tongues may start losing its ability to taste, our noses becomes less sensitive, and our bodies start sagging, we may start losing hair, teeth, etc.
- So, what do most of us do? We start looking for ways to “prop them up”: We can take temporary measures by wearing glasses, hearing aids, adding more spices/ flavor to food, and doing cosmetic procedures to try to maintain the body appearance. There is absolutely nothing wrong with some of these “fixes”; for example, we need to be able to see, so we need to take precautions to protect our eyes and start wearing glasses. Ditto for hearing aids, and even for adding spices to food. Even doing some cosmetic procedures (coloring the hair, for example) may be needed to maintain a level of self-confidence as may be the case.

4. But the point is that no matter what we do, there comes a time when nothing works. The whole body starts falling apart. We may lose all the hair, the skin sagging may no longer be prevented by surgery; we may lose all hearing; the food may become tasteless. The best way to realize this first hand is to visit a home for the elderly.

- We also tend to get sick and come down with diseases easily as we get old.
- But the worst part is that our brains will start getting weaker which will lead to memory loss and most importantly the ability to think.
- If we wait until we get to that stage, it WILL BE TOO LATE. By the time we realize that our minds are weak, then we become really helpless.

5. Some people just die of unexpected causes before getting to old age. But that is also the same thing: they could not maintain things the way they expected. We could have prevented at least some of this suffering if we understood the root causes for suffering, and focused our attention on doing “fruitful things” while doing some of those temporary measures to keep our sense faculties in good shape. We will discuss such ‘fruitful deeds’ after discussing the suffering associated with external things in this world.

- The suffering that we discussed so far arises due to one aspect of *anicca*: things are subjected to decay and destruction, and nothing in this world is exempt from that; this is part of what is called “*viparināma dukkhā*”, suffering that arises due to change and decay.

6. Now let us look at the EXTERNAL things that make up “our physical world”: visuals, sounds, smells, tastes, touchables are experienced with our five physical senses.

- The suffering associated with external things arise NOT necessarily because they are “impermanent” as is incorrectly believed by many. There are many external things that are permanent, at least compared to our lifetime in this life. For example, a gold necklace will last for even millions of years. If there is any suffering arises in anyone due to a gold necklace that is definitely NOT because that necklace is “impermanent.” We will discuss some examples below.

7. Of course there are many truly “impermanent” things that we use. And we do become distraught when they break down. For example, we buy a nice set of dinner plates and if they get broken we become distraught. But we can always buy another, and that is not a problem especially if one is wealthy. Even if a wealthy person’s whole house is burned down, that person can easily buy a better one. So, one would think that wealthy people will be subjected to less suffering.

- But that is not the case. Even though having wealth helps, as far as suffering is concerned, wealth is not a big factor. We hear wealthy and famous people even committing suicide all the time.
- Most of the suffering associated with external things arise due to “unfruitful thoughts” in our minds: Suffering arises mainly due to things we are attached to, and things that we like to hate. This is a KEY POINT and needs a lot of thought.

8. Let us consider some examples to clarify this important point.

- A hurricane lands and destroys a large cultivated area that results in a significant damage. Most people who live close-by would be just glad that their homes were not damaged but they will not become distraught over the loss to that particular land. The only one who suffers is the one who is the owner of that land. **Suffering arises due to a loss or damage or destruction of something one is attached to.** The suffering was not embedded in that land; the only person who suffered was the one who had an attachment to it.

Let us take another example. A wealthy person A hires person B to live in his house and to take care of the house and the gardens. Person A may not even live in that house. Person B lives in the house and takes good care of the house and the gardens. Anyone who does not know the real owner would think that person B is the owner, the way he takes good care of the house. Person B goes out-of-town to visit his family for a few days and an enemy of person A burns down the house. Who is the one that suffers? Person B may feel bad about his employer’s loss, but it is person A who will mostly suffer due to the loss of the house. Even though person B may have lived in that house for many years on his own, he did not have any sense of “ownership” to the house; he may become somewhat distraught because of him having lived there and formed a lesser attachment to the house.

- In the case of the gold necklace that we mentioned earlier, someone may suffer if she lost it. The suffering was not due to an “impermanence” associated with the necklace; rather it was due to the inability of that person to “maintain it to her satisfaction.”

9. Does this mean a person who does not own anything is the happiest? Not at all. **Even though one may not have ownership to anything valuable, that person still has cravings for pleasurable things. Much of his suffering is due to the INABILITY to GET what he wants. He may want a big house, a nice car, tasty foods, etc. He suffers not due to a loss of physical items, but his inability to get such items.**

- Thus whether wealthy or poor does not matter. The real cause of suffering is in our MINDS. A wealthy person may suffer due to a loss of something he had, and a poor person may suffer due to the inability to get what he wants. **Either person becomes distraught due to his/her mind activities: attachment to what one has or craving for what one desires. This is another aspect of the Pāli term *anicca*. It is mostly mental**

and is called “*saṅkhāra dukkhā*.” It arises through the struggles we engage in trying to maintain things to our satisfaction.

- For example, when we buy a nice house there are endless things that need to be done to “maintain it to our satisfaction”; this is also part of *saṅkhāra dukkha*. Sometimes we don’t even realize this suffering. Think about how much work we do to prepare a nice meal; then we enjoy it in 10-15 minutes, and then we need to spend more time cleaning up. We slaved through hours to get a brief sense pleasure.

10. External things also include people. The amount of suffering due to a loss of a person is directly proportional to how close that person was to oneself. When person X dies, those who suffer the most are the closest family; for friends and distant relatives, suffering is less, and for those who do not even know X, there is no suffering.

- But it is important to understand that one CANNOT get rid of this suffering by abandoning one’s family; that would be an immoral act with bad consequences. The attachment becomes less as wisdom grows, when one starts understanding deeper aspects of Dhamma: **Basically, there is a difference between fulfilling responsibilities, paying back debts, and having attachment due to greed.** But this also will become much more clear as we proceed with *paṭicca samuppāda*.

11. Of course *saṅkhāra dukkha* also arises due to hate. This is a bit deeper, since hate arises as a “second aspect” of greed. Hate arises when something or someone gets in the way of us getting what we crave for. We will examine the root causes for hate in *paṭicca samuppāda*, but for now we need to keep in mind that someone may be doing something bad (getting in our way), because we may have done something bad to that person in the past. Things ALWAYS happen for one or more reasons, and we may not be able to see the reason (or the cause) in many cases, because the rebirth process keeps things hidden from us.

- In any case, when we start thinking about a hateful person or a thing, it is ourselves that suffer. The mere mention of the name of someone that we despise will immediately make us think about those bad things that the person did, and get “worked up.” We cause this suffering to ourselves. If we retaliate, then things get even worse.
- It is good to analyze some of one’s own experiences.

We discuss “*dukkha dukkha*”, the third and final category of suffering, in the next post: [Introduction 2 – The Three Characteristics of Nature](#).

8.5.2 Introduction 2 – The Three Characteristics of Nature

1. In the previous post, we discussed two of the three main ways that suffering arises, the *viparinama dukkha* (suffering due to our inability to maintain things to one’s satisfaction) and the *saṅkhāra dukkha* (suffering due to our excess attachment for things). **Both these are experienced in this very life**, but unless we take time and contemplate on those, we may not even be aware of those.

- There is nothing much we can do about the *viparinama dukkha*, other than to eat well, exercise regularly, and keep up with healthy habits for maintaining a healthy body and a mind.
- We can lessen the *saṅkhāra dukkha* by gradually losing excess attachment to worldly things. This happens automatically when we start grasping the Three Characteristics of nature, which we will discuss below.

2. **The third category of suffering arises directly: getting burned, stabbed/shot, etc.** Beings in the *apāyā* encounter this more, and in the *niraya* (lowest realm) that is all one feels. For example, a person who made money by killing another or by stealing from another may live well in this life (at least outwardly), but will be subjected to much suffering in the upcoming births. This is the worst category of *dukkha dukkha*, **which arises due to immoral actions of the past. Until the death of the physical body, even an Arahant is subjected to *dukkha dukkha*.**

- Therefore, the third category of suffering, *dukkha dukkha*, arises basically due to immoral acts; see below. The severity of suffering of course depends on the severity of the violation. We will discuss this in detail in the *paṭicca samuppāda* (“*pati+ichcha*” leading to “*sama*”+“*uppada*”) steps in future posts; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda”](#),” where it is briefly discussed how one’s actions lead to effects that are similar “in kind.”

3. All our acts (including speech and thoughts) are *saṅkhāra*, thus *dukkha dukkha* arises due to the worst forms of *saṅkhāra*, which we call immoral acts.

Everything happens due to a reason (cause). If one does a good deed, that will lead to good results, and bad deeds will lead to bad results. This is the basis of science and also how nature works. “Every action has a reaction”; it is guaranteed, sooner or later.

- This is why rebirth is a reality of nature. There are people who live lavishly with money earned by immoral deeds; the consequences will be realized in the future rebirths.
- It also explains why different people are born with different levels of health, wealth, beauty, etc., and also why there are innumerable varieties of animals with different levels of suffering.

The Three Characteristics

4. Most people can distinguish between moral and immoral acts. Immoral acts are killing, stealing, inappropriate sexual behavior, lying, slandering, gossiping, harsh speech, and getting “drunk” with not only drugs or alcohol, but also with wealth, fame, power, etc (The BIG EIGHT as discussed in the Meditation section).

- When we also include the wrong views/hate in the mind, there are ten, which are called the ten defilements or “*dasa akusala*” in Pāli. These acts not only are inappropriate but also will have adverse consequences for the well being of everyone. Societies cannot function well if people act immorally.

5. Most religions teach how to live a moral life, may be with some exceptions for example of killing of animals as immoral. Basically all religions encourage “building better societies.” Therefore morality and moral laws are common to all cultures and religions.

- Without having this moral foundation, it is hard to comprehend the deeper aspects that we will discuss next, and analyze in the *paṭicca samuppāda*.
- However, it is important to realize that one will be free of all ten defilements only upon reaching the *Arahant* stage. Keeping the five conventional precepts is a good start.
- When one starts following the Path, one is bound to break the trend once in a while. A child learning to walk will fall many times. Many people get discouraged when they do an immoral act occasionally; but just to realize that one did a mistake, and that it bothers one’s mind, means one HAS MADE PROGRESS.

6. The uniqueness in Buddha Dhamma is to show that in the wider world view, building better societies (i.e., living a moral life) is NOT ENOUGH in the LONG TERM in the rebirth process. In this wider world view, anyone can be born anywhere in the 31 realms, including those dreaded lower four realms. It is a much bigger world than we normally experience.

- Doing immoral acts makes one eligible to be born in the lower four realms, and be subjected to *dukkha dukkha*. However, even if one does not do a single immoral act in this life, that does not guarantee avoidance of rebirth in the lower four realms, BECAUSE we all have done immoral deeds in our previous lives. What we have in the past remain until that *kammic* power is exhausted OR until one attains *Nibbāna*. Again this is part of the “bigger world view” now spanning time.

7. This was the core message of the Buddha: That no matter how well we live this life (and it is essential to do that), that does not guarantee a “suffering-free” future. Until one attains at the least the *Sotāpanna* stage of *Nibbāna*, one is not free from suffering in the four lower worlds.

- We can look at it this way too: Even if we live a good, moral life in this life, we do not know under what conditions we will be born in the next life, even if it is a human life. If we are born to an immoral family, or be exposed to immoral friends, in the next life we may commit acts that deserves birth in the four lower realms.
 - **This is why we need to strive to attain the *Sotāpanna* stage in this very life.**
8. **This is what is embedded in the three characteristics of “this wider world” of 31 realms.** We may be born in the highest Brahma world, but one day that life will end and we will inevitably get to the four lowest realms (*apāyā*) at some point. **The Buddha said, “there is no refuge” anywhere in these 31 realms.**
9. In the previous post we discussed why we “cannot keep any part of our physical body to our satisfaction.” If we think through how *dukkha dukkha* arises, we can see that “we cannot maintain anything to our satisfaction” **anywhere** in these 31 realms in the long term. This is the first characteristic of “this world of 31 realms”: *anicca*. Just one word says it all.
- Because of *anicca*, no matter how much we struggle to achieve sense pleasures, we will eventually encounter suffering, especially in the four lower realms. We always have *viparinama dukkha* and *saṅkhāra dukkha* (both may be hidden in the apparent sense pleasures temporarily), and we cannot avoid *dukkha dukkha* without attaining the *Sotāpanna* stage of *Nibbāna*.
 - Thus *anicca* leads to the second characteristic of *dukkha*.
 - Therefore, as long as we crave for existence and sense pleasures “in this world”, we are truly helpless in the LONG TERM; this is the third characteristic of *anatta*. There is “no refuge” in this world of 31 realms.
10. At first it is difficult to see why these three characteristics are a such a big deal. They are the KEY to stop the causes for suffering.
- **Just the realization that it is harmful and unfruitful to attach to things in this world leads to the first stage of *Nibbāna*, the *Sotāpanna* stage.** Buddha Dhamma is a complete description of nature. **Just being able to comprehend the unfruitfulness of attachment to worldly things (and aversion, which arises from attachment as we will see), is the first and most important step in the Noble Eightfold Path, *Sammā Diṭṭhi* or “clear comprehension.”**
11. It is important to realize that detachment to worldly things CANNOT be done by forcing the mind. If someone tries to give away one’s wealth without truly realizing the benefits of that, one will likely to generate friction or remorse later, which could have adverse effects.
- It may be hard to believe, but the real happiness ARISES (and one will be able to donate things with joy, because one will automatically see the fruitless of craving for worldly things) as one starts comprehending the true meanings of *anicca*, *dukkha*, *anatta*, and realize that it is possible to stop all three form of suffering. It is permanent sense of relief, and not like a sense pleasure that lasts only for a short time.
 - As we go through the steps in the *paṭicca samuppāda* cycles, the meanings of *anicca*, *dukkha*, *anatta* will become clear. One could and should read other related posts too. At some point, things will start “clicking” into place and then it will become easier. Just a glimpse of the “light” will make it easier to “see.”
12. The lack of this knowledge (or even better stated as wisdom or *paññā*), is called ignorance (*avijjā*). Thus the whole *paṭicca samuppāda* cycle starts with ignorance (*avijjā*), and explains how *avijjā* gives rise to *dukkha* under different conditions. There is another *paṭicca samuppāda* cycle that explains how *dukkha* can be stopped from arising. We will discuss both starting with the next post. **Thus *avijjā* leads not only to immoral acts, but also to unfruitful acts; both immoral and unfruitful actions are included in *saṅkhāra*.**
13. I know I am using more and more Pāli words as we proceed. But by now one should be able to grasp the meaning of those key words; one can always go back to earlier posts in this series to refresh memory. It

is cumbersome to keep stating “it is not possible to maintain things to one’s satisfaction”; it is much easier to say, “*anicca*.” No other language can succinctly state the nature of the “whole world” in just three words: *anicca* (pronounced “anichcha”), *dukkha*, *anatta* (pronounced “anaththa”).

- As we saw above, *dukkha* has much deeper meaning than the “feeling of discomfort or pain.”
- Even *avijjā* and *paññā* do not have corresponding words in English to convey the exact meaning. As we discuss further, the meanings will become more clear.
- Thus my goal is to first describe these key Pāli words in plain English and then use them in the subsequent posts, while staying away from other Pāli words that are not critical for understanding the core message of the Buddha.

Next, “[Avijjā paccayā saṅkhārā](#)”,

8.5.3 Avijjā Paccayā Saṅkhārā

Revised April 26, 2019; August 29, 2019

“*Avijjā paccayā saṅkhārā*” (Ignorance as root cause for immoral/unfruitful actions and thoughts). That is the same as saying “*avijjā nirodha*” leads to “*saṅkhārā nirodha*.” All following terms in the *akusala-mūla paṭicca samuppāda* cycle will stop arising and thus all suffering stop arising with the complete removal of *avijjā*.

1. *Avijjā* (loosely translated as ignorance), is defined in many ways: not knowing the Four Noble Truths, not understanding the Noble Eightfold Path, not understanding the Three Characteristics of nature, not understanding *dukkha*, etc.

- All these are correct, but just reading about them is not going to help. The mind needs to see how suffering arises due to immoral and unwise actions (and thoughts).
- The *paṭicca samuppāda* cycle clarifies how the three kinds of suffering arise. One does not comprehend the true nature of the world, and think (and do) immoral/unfruitful things.

2. You may be wondering whether I was untruthful when I said this series will be in “plain English.” Especially if you have not read the first two posts. I did describe these three terms in plain English, and there is no easy way to get the same meaning across without using Pāli words.

- So, once I clarify them, I have to use these Pāli terms in order to keep a post to a reasonable length. One can always go back and read previous introductory posts to refresh memory.

3. The standard interpretation of “*avijjā paccayā saṅkhārā*” reads “ignorance leads to mental formations.” That does not get the underlying ideas across and also misleading. I believe that “ignorance as root cause and condition for immoral/unfruitful actions” is a better translation, and I will explain why.

First let us look at the difference between immoral acts and unfruitful acts.

- We saw that *dukkha dukkha* in the four lower realms is the worst form of suffering. And we saw the cause of that as the immoral acts done with the ten defilement or *dasa akusala*. Thus worst types of *saṅkhārā* are responsible for *dukkha dukkha* in the lower four realms.
- Why do we do any of such potent immoral acts that give rise to *dukkha dukkha* of the worst kinds in the lower four realms? Because to a very high degree of ignorance of the consequences of such acts. For example, if one does not believe in rebirth, then it is hard to see how such immoral acts can have consequences. After all, there are many people engaged in unethical behavior who seem to be enjoying life.
- Such high level of ignorance is called *moha* (which means totally covered, totally blind mind), and the closest English word is “delusion.”

- A murderer who PLANS and kills another human is a good example. He thinks that if he can plan it well, he can avoid “getting caught” by the justice system and then will not have to pay for his actions. There are MUCH WORSE consequences waiting for him, regardless of whether the police catch him or not. He does not know that he is likely to get killed a thousand times in return in future births.

4. Thus **immoral actions** like killing, stealing, etc are responsible for the worst outcomes, the worst kinds of future suffering; these are the worst forms of *saṅkhārā*.

- On the other side of the spectrum for *saṅkhāra* are the **unfruitful actions** that lead to lower levels of *saṅkhāra dukkha* in this very life. For example, when we get attached to things/people via strong attachments or dislikes, that can lead to mental suffering in this life.
- However, such unfruitful actions can also form bad habits that can grow into more significant problems with time. Someone acting with greed or dislikes habitually can tend to make those stronger and eventually grow into stronger forms of excess greed and hate, leading to immoral acts. We will discuss how this happens via the *paṭicca samuppāda* steps.
- Of course the severity of the consequences will be according to the severity and nature of the act: “*pati+ichcha*” leading to “*sama*” + “*uppada*”, as we will discuss in detail later. See, “[Paticca Samuppāda – “Pati + ichcha” + “Sama + uppāda”](#)” for the meaning of *paṭicca samuppāda*. When one is even willing to do immoral acts to get what one wants, the consequences will also be stronger and “in-kind.” Then there are “unfruitful acts” that can lead to comparatively minor forms of suffering in the near term but can also add up to more significant effects in the long run.
- Thus one has to think beyond the five precepts to understand the origin of *saṅkhāra dukkha*. I know I am repeating some statements, but I want to make sure to get these essential ideas across.

I hope it is clear now why “immoral/unfruitful actions, speech and thoughts” is a better translation for *saṅkhāra* than “mental formations.” *Saṅkhārā* are all mental; *kāya* and *vacī saṅkhārā* are those thoughts that LEAD TO actions and speech.

5. Now let us discuss the other erroneous aspect of the translation of “*avijjā paccayā saṅkhāra*” as “ignorance leads to mental formations.” For further details, see, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#).”

- Ignorance (*avijjā*) is not there all the time. Even the worst criminal does not do immoral acts or even unfruitful acts ALL THE TIME. **But when he does**, such actions are done with ignorance as a root cause.
- It applies to all of us: **The more we learn Dhamma, the more we get rid of ignorance. Then will we not think or do either immoral or unfruitful things, i.e., any type of (*abhi*)saṅkhāra.**

6. **A closely related issue to think about is what kind of control we have over *saṅkhāra*.** There are three types of *saṅkhāra*: *kāya saṅkhāra* (those that lead to physical acts), *vacī saṅkhāra* (those that lead to speech), and *mano saṅkhāra* (those that automatically arise due to our *gati*).

- If we know right from wrong, we can control MOST of our **physical actions and speech**. We may even start saying something terrible and stop ourselves in the middle of the sentence.
- Depending on the emotional state of the mind, it may be not possible to control our actions under extreme stressful situations. Even a normally calm person may get into a rage if he catches his wife engaging in sex with another man. He may even kill that man in the heat of the moment.
- We also know “good people” who were tempted to do immoral things. That is especially true if the “payout or the perceived pleasure” was big enough. That is the danger of “not being free of the four lower realms.”
- More information at: “[Saṅkhāra – What It Really Means.](#)”

7. The third category, *mano saṅkhāra*, are also hard to control by will power instantly. I think we all can think about situations where it was hard to control greedy/hateful thoughts. We may start thinking about

something, and the mind takes us all over the place. Such thoughts normally involve “what we could have,” and also fantasize about all kinds of sense pleasures. **One needs to stop such thoughts and think about their consequences willfully.**

- **These can only be lessened and ultimately stopped by changing one’s habits (“*gathi*”) and cravings (“*āsavas*”). That applies to *kāya* and *vacī saṅkhāra* done on “impulse” or “temptations” discussed above.**
- And that comes about by realizing the unfruitfulness of any *saṅkhāra*. That is strongly related to comprehending the Three Characteristics. We will be analyzing this in the upcoming steps of *paṭicca samuppāda*.

8. Thus the key is to change one’s bad habits over time. Then, gradually, even such *mano saṅkhāra* will STOP FROM ARISING.

- It may be hard to believe, but a significant part of this change of habits and cravings comes from comprehending the Three Characteristics of this world. One would realize that it does not MAKE SENSE to hurt others (including animals) to get sense pleasure for oneself. That makes a BIG DIFFERENCE in one’s outlook about what a “good life is.”
- Contrary to what most people believe, a life filled with sense pleasures is not a “good, peaceful, life.” An extravagant life can eventually become a “burdened life” because our body’s ability to accommodate sense pleasures goes down as we age. This realization itself leads to “cooling down” of the mind. Anyway, as we discuss further, and if one contemplates more along with these ideas, these concepts will slowly become apparent.

9. In summary, all three kinds of suffering arise due to *saṅkhāra* that range from highly immoral acts to seemingly innocent unfruitful actions. All *saṅkhāra* arise due to *avijjā*.

- That is why “*avijjā paccayā saṅkhārā*” is the first step in the *paṭicca samuppāda* cycle, which ends with “*jara, maraṇa, soka, parideva, dukkha,*” all kinds of suffering.
- At the *Arahant* stage, one has removed *avijjā* (i.e., optimized *paññā*), and thus *abhisāṅkhāra* that lead to rebirth cannot arise; that is *Saupadisesa Nibbāna*. At the death of the physical body, the *Arahant* is not reborn and thus, at that time, all *saṅkhāra* cease to arise (*Anupadisesa Nibbāna* or *Parinibbāna* or “complete *Nibbāna*”).
- **That is how “*avijjā nirodha*” leads to “*saṅkhāra nirodha*.”**

Thus we can see in a simple way how suffering arises with immoral/unfruitful actions as causes. One engages in such activities due to ignorance of the true nature of the world: *anicca, dukkha, anatta*. Here we discussed how ignorance gives rise to *saṅkhāra*. In the next post, we will discuss how *saṅkhārā* leads to *viññāṇa* (or defiled consciousness). That is the next step leading to *dukkha* (suffering).

Next, “[Saṅkhāra paccayā Viññāṇa – 1](#)”,

8.5.4 Saṅkhāra Paccayā Viññāṇa – 1

1. “*Saṅkhāra paccayā Viññāṇa*” is normally translated something like, “with mental formations as condition, consciousness arises.” But I will show that a more accurate translation is, “Immoral/unfruitful actions and thoughts as root condition for **defiled consciousness**.”

- I will just keep the word *viññāṇa* without translating as “defiled/unfruitful consciousness” (which could become cumbersome to repeat also), because the word “consciousness” cannot fully embody the meaning of *viññāṇa*. Furthermore, *vipāka viññāṇa* (those that arise outside of “*saṅkhāra paccayā viññāṇa*”) are “just consciousness”; see #4 below.

- *Viññāṇa* is a step in the *paṭicca samuppāda* that describes how suffering arises; thus *viññāṇa* is NOT neutral or innocuous as the word “consciousness” or “awareness” implies; it is DEFILED consciousness, contaminated with immoral mental factors such as greed and hate.
- In contrast, an *Arahant* has undefiled, pure consciousness; thus an *Arahant* experiences the world without any defilements. He/she can see, hear, etc without making any type of judgement, attachment, or repulsion to what is seen, heard, etc.

Thus we need to realize that *viññāṇa* is DIFFERENT from “knowing” or “being aware”, which is what “consciousness” implies. This is very important.

2. For example, two people with opposing political views (A and B) may encounter a politician C on the street who has views compatible with those of A. Person A will be happy to meet C and may go up to C, shake his hand and talk to him enthusiastically. On the other hand, Person B will automatically have irritable thoughts about C and is likely to avoid C. In this case, A and B generated two very different kinds of *viññāṇa* upon seeing the same person.

- On the other hand, suppose there is a fourth person, D, who also knows the politician C AND suppose D is an *Arahant*. Now, person D will recognize C as that politician but will not generate any likes or dislikes about C. That is what “consciousness” is, just recognizing who or what it is without generating any biases.

3. The other main point is that *viññāṇa* is multi-faceted. **It has embedded in it one's memories as well as one's future hopes and plans**, and those lie under the surface. This is what Sigmund Freud called the subconscious. But there is no separate “subconscious”; there is only one *citta* at a time.

- The mind does this with the help of several mental factors (*cetasika*) like memory (*manasikara*) and perception (*saññā*). We will discuss that in the future.

4. For example, when I am looking at a picture I have what is called *cakkhu viññāṇa*, i.e., “visual consciousness.” This is a *vipāka viññāṇa* and is “just consciousness.”

However, if I have been planning a trip overseas that is still in the “back of my mind”; if I have been thinking about calling an old friend about whom I just thought of recently, that is also in the “back of my mind.” Thus at a given time there may be several or even many *viññāṇa* waiting to come to the surface.

- And some of those “subconscious” *viññāṇa* may disappear, if the reason for it to be there goes away for some reason. For example, if civil war breaks out in the country that I was planning to visit, I will abandon that trip and my “*viññāṇa*” for that will go away. If I stop thinking about my old friend, that *viññāṇa* for calling him up may also go away with time. Thus if a given *viññāṇa* stops getting “its food” it will die off gradually.
- The difference between *kamma viññāṇa* (those that arise due to “*saṅkhāra paccayā viññāṇa*”) and *vipāka viññāṇa* is discussed in [“Viññāṇa – Consciousness Together With Future Expectations.”](#)

5. **Now we can see how “*saṅkhāra paccayā viññāṇa*” works.** The more I think about my old friend, the more *saṅkhāra* I am generating; thus I keep “feeding that *viññāṇa*” and that *viññāṇa* for calling him gets stronger.

- The breaking out of the civil war in that country basically deprived the “*viññāṇa* for making a trip to that country” of any food (i.e., now it is not possible to visit that country), and thus the news effectively killed that *viññāṇa*.
- As always, it is best to think about your own situations and see how “*saṅkhāra paccayā viññāṇa*” works, and also how one can have many types of *viññāṇa* at the same time, even though only one is at the forefront at any given time.

6. **There is another way that *viññāṇa* can be divided into two main categories.** One is the “base level” of *viññāṇa* for an existence or *bhava*. For example, if a deer is reborn as a human, then that lifestream will now have a “higher base level of *viññāṇa*” suitable for a human. Whereas a deer cannot sort out right from

wrong, a human can. Thus at the end of a given “*bhava*” (say as a deer), that lifestream gets new, higher “base level” of *viññāṇa*.

- The other main category of *viññāṇa* is the numerous types of *viññāṇa* that arise in a given existence that we discussed above. What we perceive through the six senses (eye, ear, nose, tongue, body, and mind) gives rise to six types of consciousness: vision, hearing, smell, taste, touch, and concepts. Based on those, we can have infinite types of *viññāṇa* as we discussed above. These types of *viññāṇa* are now in accordance with the type of existence or “*bhava*.” For example, a deer does not perceive what is seen at the same level of consciousness as a human, even if both are looking at the same thing. Sometimes there may be differences in sense faculties too: a bat cannot see but uses sonar to find its way around. Furthermore, as we discussed above, there are many types of “subconscious” *viññāṇa* as well.
- There are many new concepts introduced in these introductory posts that are critical. One may need to go back to previous posts and re-read in order to grasp these important concepts.

7. Based on those two categories, there are two main *paṭicca samuppāda* cycles that describe life “in this world of 31 realms”:

- One describes how the “base level” of *viññāṇa* changes at the end of a “*bhava*”, say when a deer is reborn as a human. Here a given lifestream can make a transition from a lower base level of *viññāṇa* to a higher (e.g., deer reborn as a human) or vice versa (e.g., human reborn as a deer). This is the “*paṭisandhi paṭicca samuppāda*” cycle.
- The other *paṭicca samuppāda* cycle describes how a given life-stream accumulates conditions for suffering during a given “*bhava*.” This is where we experience *viññāṇa* through our daily activities. This is the “*idappaccayatā paṭicca samuppāda*” cycle; see, “[Idappaccayatā Paṭicca Samuppāda](#).”

Let us discuss the *viññāṇa* associated with this latter one first.

1. *Saṅkhāra paccayā Idappaccayatā Viññāṇa*

Let us first look at how our consciousness changes basically every moment in an active day. We are being bombarded with pictures, sounds, smells, tastes, body touches, and we think about all sorts of things throughout the day. In each single case, we experience a different *viññāṇa*. This is why *viññāṇa* is very complex and multi-faceted.

1. If we take a simple example of looking at a person, there are multiple events that happens in the mind: the physical eye captures an image of the mind which is processed by the brain and sent to the mind (details of this will be discussed in the *Abhidhamma* section later). The mind instantly compares that image with previous experiences and recognizes that it is a close friend. Happy feelings may arise instantly too. If we had not seen him for a while, some old memories associated with him may also instantly pop into our mind. The sum total of all mental factors (feelings, perception, joy, etc) associated with that “seeing event” is the “eye consciousness” or “*cakkhu viññāṇa*” at that moment.

- And this is an example of a “*vipāka viññāṇa*.” We did not plan to see him, but just bumped into him.

2. But now based on this *vipāka viññāṇa*, we may decide to take some actions. We may run to meet him, give him a hug, and follow-up with even more actions. Most of these could be harmless *saṅkhāra* and our experience, consciousness, or *viññāṇa* is mostly harmless.

- However, if we instead ran into a person with whom we recently had a serious argument, that *vipāka viññāṇa* may lead to a series of “bad *saṅkhāra*” in our minds and thus lead to a totally different *viññāṇa* BASED ON those bad *saṅkhāra*. we may decide to say something bad to that person. Now we are doing *vacī saṅkhāra* that may have adverse consequences. Now our *viññāṇa* is different and we feel differently from the above case. We have an agitated state of mind, and with the slightest provocation from him, we may say or do even more harmful things.

3. When a thought arises in the mind, it has associated with it many mental factors (*cetasika*) which characterize how we feel: joy, sadness, greed, generosity, hate, kindness, etc. *Viññāṇa* encompasses all such relevant mental factors.

- In the previous example of persons A and B meeting the politician C, person A's thoughts embody happiness while person B's thoughts embody dislike.
- For a *viññāṇa* to arise, there must be some interest in the sense object. For example, we are bombarded with millions of sense inputs in a day, but we "pay attention to" only a fraction of those. Each mind has a set of "preferred items" in the background or "in the subconscious" based on the person's habits and cravings.

4. Then, the more we "feed a given *viññāṇa*" by thinking, speaking, doing things related to that, the more strong it gets. Thus we can see how "habit building" is tightly associated with *saṅkhāra*. In the same way, we can "remove a habit" by depriving that associated *viññāṇa* of its food, i.e., by stopping thinking or doing things related to it.

- And that can be done only realizing the benefits of a good habit or adverse consequences of a bad habit, which was the first step in the *paṭicca samuppāda*, "*avijjā paccayā saṅkhāra*." A bit of thought should make this clear. **Comprehending Buddha Dhamma takes time to think deeply about how all these things fit together. Just being able to recite the *paṭicca samuppāda* cycle does not bring any benefits.**

5. A simple example is "building a *viññāṇa* for getting drunk": A teenager may not like the taste of his first drink, but if he keeps doing it due to "peer pressure", he is likely to build a new *viññāṇa* for it. As he builds this *viññāṇa*, he will keep accumulating *saṅkhāra* to "feed that *viññāṇa*." He will be thinking about it, talking about it, and of course whenever has the chance he will be drinking. The more he does any of those *saṅkhāra*, that *viññāṇa* will grow. AND even when he is doing something else, that *viññāṇa* will be at close to top of the subconscious waiting for an opportunity to come up and induce him to get drunk.

- And it works the same way for any type of activity. A teenager studying for an exam, will have a *viññāṇa* for it. If he is serious about it, he will be thinking about it more, talking about it, and studying hard; all those are *saṅkhāra* too, in this case for his benefit.

The idea is to first not to do any *abhisāṅkhāra* (strong immoral *saṅkhāra*) that could lead to birth in the four lower realms. These kinds of *saṅkhāra* are the immoral acts, speech, and thoughts. We will discuss this in the next post.

8.5.5 Saṅkhāra Paccayā Viññāṇa – 2

If you are reading this without reading the earlier posts, you may be wondering whether I was being untruthful when I said this series will be in "plain English." I did describe any of the terms used here in plain English in the previous posts. There is no easy way to get the same meaning across without using such key Pāli words.

- So, once I clarify them, I have to use these Pāli terms in order to keep a post to a reasonable length, AND readable. One can always go back and read previous posts to refresh memory.

In the previous post, we discussed how *saṅkhāra* can feed and build different types of *viññāṇa* during our lifetime. The *paṭicca samuppāda* cycle which describes that process is the *idappaccayatā paṭicca samuppāda* and we discussed the step "*saṅkhāra paccayā idappaccayatā viññāṇa*" for that *paṭicca samuppāda*.

- Now we will discuss how such *idappaccayatā viññāṇa* can become strong and be "carried over" to the future lives; not only that, one of such strong *viññāṇa* can even determine the next birth. That is why such strong *viññāṇa* can become "*paṭisandhi viññāṇa*" by providing the "link" to the next next life (that is what "*paṭisandhi*" means: "*sandhi*" is connection and "*pati*" is bond or making the connection).

2. Saṅkhāra paccayā Patibandhi Viññāṇa

1. When we build *idappaccayatā viññāṇa* during our lifetime as described in the previous post, such *viññāṇa* can get very strong and even get carry over to the next lives.

- In fact, some of the *viññāṇa* that we easily get “attached to” very well could be coming from previous lives.

2. For example, different people have “natural tendencies” for certain tasks (music, art, science, business, basically any type of activity). Similarly, some people are attracted to gambling, drinking, sports, etc more than others. All these are *sansāric* habits, that have been cultivated by “feeding that *viññāṇa*” over many lives.

- Unless one reduces and eventually gets rid of one’s bad habits, they can lead to bad births in the lower four realms where one can get trapped for long times. Similarly, developing good habits can lead to good births, in case one is unable to attain at least the *Sotāpanna* stage in this life.
- This is why it is very important to get rid of “bad habits” and to cultivate “good habits.” There are many posts at the site on this important topic. I cannot emphasize enough the importance of this need to change habits.

3. Following the Noble Eightfold Path is all about changing to a “good person” first; doing “*ānāpānasati bhāvanā*” does the same thing. When one does this, one **develops wisdom** to see through the Three Characteristics: *anicca, dukkha, anatta*. And that also leads to the *Sotāpanna* stage, where one is guaranteed to be free of rebirths in the lower four realms.

- By the way, many people are introduced to the wrong concept of “there is no self” (incorrect translation of the term *anatta*). Thus they get stuck, saying the term, “good person”, does not make sense (because there is no “self”); that could become a huge obstacle to any progress. While the Buddha rejected the concept of “self”, he also rejected the concept of “no-self”, because there is definitely some key personal characteristics that “flow” from one life to the next; see, [“What Reincarnates? – Concept of a Lifestream.”](#)

4. Once one is free of the four lower realms (i.e., attains the *Sotāpanna* stage of *Nibbāna*), only then one will truly realize that it is unfruitful even to wish for or work to seek rebirths in higher realms.

- But, until one attains the *Sotāpanna* stage, one MUST avoid immoral *abhisankhāra* (strong immoral actions) to avoid immoral *viññāṇa* and also engage in moral *abhisankhāra* in order to cultivate moral *viññāṇa*; this will keep one firmly on the Path and to avoid rebirth in the lower four realms until the *Sotāpanna* stage is attained.

5. If we think deeply about the suffering that we encounter in this life, *dukkha dukkha* has arisen due to whatever immoral *saṅkhāra* done in a previous life. An animal suffers more than a human, because the cause for an animal birth was a stronger immoral action done previously.

- *Dukkha dukkha* associated with higher realms (*deva, brahma*) is less than the *dukkha dukkha* for a human life, because the *saṅkhāra* that led to the *deva/brahma* births were merely unfruitful, they were not immoral.

6. Any birth anywhere in the 31 realms is due to a *abhisankhāra*. If it is due to a worst form of *abhisankhāra* (immoral actions) then that leads to a birth in the lowest four realms via a strong and bad *paṭisandhi viññāṇa*. Lesser *abhisankhāra* (unfruitful actions) lead to births in higher realms via “moral” *abhisankhāra viññāṇa*.

- Thus cultivating “immoral” *abhisankhāra viññāṇa* must be avoided by not engaging in immoral activities. Otherwise, “*saṅkhāra paccayā paṭisandhi viññāṇa*” could lead to “bad births”, where *dukkha dukkha* is very intense.

7. *Viparinama dukkha* associated with the current life is also mainly determined by previous action (*abhisankhāra*) that led to this life, and can be analyzed the same way as for *dukkha dukkha*.

- But the *saṅkhāra dukkha* associated with this life is due to actions (*saṅkhāra*) that we do in this life. Also, the same *saṅkhāra* that could cause future *dukkha dukkha* or *viparinama dukkha* can also give rise to *saṅkhāra dukkha* in this life as well. This is an important point to be realized; if not clear, you may want to go back and review the previous posts.
- Therefore, we CAN get rid of part of the *dukkha* (the *saṅkhāra dukkha*) in THIS LIFE by understanding Dhamma and acting and thinking accordingly. We can also stop or reduce ALL types of *dukkha* in FUTURE LIVES by this process.

If you have forgotten what these terms mean, it is a good idea to go back and refresh memory, because otherwise it will be difficult to comprehend the upcoming posts in this series as well. And these terms are critically important for grasping the message of the Buddha. *Avijjā*, *saṅkhāra*, and *viññāṇa* are key terms that must be comprehended; they do not have corresponding English words.

More on *viññāṇa* can be found at, "[3. Viññāṇa, Thoughts, and the Subconscious.](#)"

8.5.6 Viññāṇa Paccayā Nāmarūpa

Revised May 19, 2019

Introduction

1. *Nāmarūpa* can have different, but related, meanings in different contexts. *Nāmarūpa* in the standard *Paṭicca Samuppāda* is different from the "*nāmarūpa*" involved in *idappaccayā Paṭicca Samuppāda* which takes place moment-to-moment.

- Basically, *idappaccayā* means "what happens at this moment depending on the conditions at this moment." Thus, it describes "events in real time" that bring *vipāka* in real time, as well as *vipāka* in the future.
- The standard *Paṭicca Samuppāda* process describes how *viññāṇa* energy created within this lifetime leads to future births (i.e., *vipāka* in future lives via future births).

2. Therefore, the standard *Paṭicca Samuppāda* can be called "[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)" and the other can be called "[Idappaccayatā Paṭicca Samuppāda](#)"; here "*uppatti*" means "birth."

- Let us first discuss *nāmarūpa* involved in *idappaccayā Paṭicca Samuppāda*, i.e., how a *jāti* can arise in the current life, based on one's *avijjā* (ignorance) and *saṅkhāra* (thoughts, speech, and actions).
- *Jāti* is not restricted to "births as a human, a deva, an animal." Many different *jāti* (births) arise during the current life itself; see, "[WebLink: suttacentral: Jātidhammādi Sutta Dasaka \(SN 35.33\).](#)"
- We will discuss two examples below which explain how a "thief" and a "drunkard" are "born" during the current life itself.

Viññāṇa Paccayā Nāmarūpa During a Lifetime

1. The "*nāmarūpa*" involved in *Idappaccayā Paṭicca Samuppāda* mainly refer to those "visual images" created by the person when making an "expectation" (*viññāṇa*) to achieve/maintain a certain goal.

- Here, "*nāma*" refers to whatever the "name" given to the subject involved in the *Paṭicca Samuppāda* process, and "*rūpa*" are the associated objects themselves. **Thus, the corresponding "*nāmarūpa*" are the mental images of the subjects in question.**

2. Let us take an example. When a thief plans to steal something (say a watch from a store), the process starts with "*avijjā paccayā saṅkhāra*"; he starts thinking about the plan because of his ignorance of the consequences.

- Here “*nāma*” or the name is “watch” and “*rūpa*” is the watch itself. **But “*nāmarūpa*” is the mental image of that watch: That is formed in HIS MIND.**
 - He starts doing *vacī saṅkhāra* first: thinking to himself about how to go about stealing the watch. This is “*saṅkhāra paccayā viññāṇa*” and that gives rise to *viññāṇa* for stealing the watch.
3. With that *viññāṇa* (expectation), now he starts visualizing the stealing process. How he would find a suitable time, and may be distract store employees someway and to pick it up.
- Now more *nāmarūpa* become involved: he also makes visuals of how he will be actually doing the stealing: “*nāmarūpa*” are the visuals he has in his mind to get the job done.
4. The more he thinks and makes plans (i.e., makes more and more *nāmarūpa* in his mind, that future expectation for stealing that object (i.e., the *viññāṇa* for it) will get stronger.
- Here the *Paṭicca Samuppāda* process runs backwards, “*nāmarūpa paccayā viññāṇa*.” This is called an “*aññamañña paṭicca samuppāda*.” [*aññamañña* : (adj.), mutual.]
 - These forward and backward steps may run back and forth while he is planning the robbery, and the Buddha said that both *viññāṇa* and *nāmarūpa* get stronger due to this feedback. **They depend on each other and feed on each other.**
 - The more he thinks about it, the stronger those *viññāṇa* and *nāmarūpa*.
 - Ven. Sariputta provided a simile for this inter-dependence between *viññāṇa* and *nāmarūpa* saying it is like two bundles of hay leaning against each other and supporting each other without any other support.
5. Let us take another case of a teenager who is influenced by his peers to drink alcohol. Because of his ignorance about the consequences, he engages in such activities and also in planning activities: “*avijjā paccayā saṅkhāra*.”
- Here *saṅkhāra* include not only drinking activities but also planning. Therefore, all three types of *saṅkhāra* are involved: *mano*, *vacī*, and *kāya saṅkhāra*.
 - While he is participating in drinking he is doing *kāya saṅkhāra*; he will be constantly talking about having such parties and those are *vacī saṅkhāra*; it is also in the subconscious and many times a day they come back to his mind as *mano saṅkhāra*. All these are included in “*saṅkhāra paccayā viññāṇa*.”
6. Most people do not realize it, but that process of “thinking and talking to oneself” (*vacī saṅkhāra*) can make a big impact in the formation of *nāmarūpa* and the cultivation of *viññāṇa*. Many people spend hours and hours doing that assuming it does not contribute to “*viññāṇa* (or *kamma*) formation”; see, “[Correct Meaning of Vacī Saṅkhāra](#).”
- In the above example, even when he is not drinking, those *mano saṅkhāra* come to the mind automatically and he starts consciously thinking about drinking activities: he visualizes pictures of “party scenes”, including friends, bottles of his favorite drink, any food that goes with it, etc.
 - That conscious thinking is also *vacī saṅkhāra*, and those also strengthen the *viññāṇa* via, “*saṅkhāra paccayā viññāṇa*.”
 - Now those mental pictures that arise during that process are *nāmarūpa* that arise due to “*viññāṇa paccayā nāmarūpa*.” Therefore, *Paṭicca Samuppāda* steps do not just flow in one way. They can run forward and backward.
7. If the teenager keeps his bad habit of drinking, he gets trapped in that *bhava* (state of mind of a drunkard), the more *jāti* that occurs, i.e., more frequently he will be drunk. When one gets really drunk, one tends to behave like an animal without any sense of decency, and the long-term consequences could be rebirth as an animal.

- If that “*viññāṇa* of a drunkard” stays strong to the time of death (*cuti-paṭisandhi* moment at the end of his human *bhava*), it could lead to a new *uppatti bhava* via the *uppatti Paṭicca Samuppāda* process mentioned in #1 above. We will discuss this second type of *Paṭicca Samuppāda*
- The important point is that such a *paṭisandhi viññāṇa* is likely to give rise to rebirth in the animal realm, as mentioned above.

8. In both these examples, it is clear that those reverse steps also occur: “*nāmarūpa paccayā viññāṇa*,” can happen, and does happen, together with “*viññāṇa paccayā nāmarūpa*.” The more one visualizes related *nāmarūpa*, the stronger that *viññāṇa* gets.

- As we saw above, this happens in other steps too (for example, “*saṅkhāra paccayā viññāṇa*” and “*viññāṇa paccayā saṅkhāra*”) and such is referred to as an “*aññamañña paṭicca samuppāda* step.” Here “*aññamañña*” means “inter-dependent.”
- This is especially true also for the “*saṅkhāra paccayā viññāṇa*.” The more stronger the *viññāṇa* gets, one is more likely to engage in same kind of acts, i.e., *saṅkhāra*, i.e., “*viññāṇa paccayā saṅkhāra*.” They feed on each other. This happens a lot in habit formation; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

Viññāṇa Paccayā Nāmarūpa at Paṭisandhi

1. At the end of an existence (*bhava*), a given lifestream is making a quantum transition (meaning a large instantaneous jump) from one kind of an existence to another; for example, from a deer to a human or vice versa. The basic level of *viññāṇa* changes from that of a deer to a much higher level of a human in the first case.

- That transition happens in the latter part of the last *citta vīthi* of the life of the deer. This is discussed in a bit more detail in the post “[Cutī-Paṭisandhi – An Abhidhamma Description](#).”

2. The key point is that at the end of the last *citta vīthi* of the deer, a very fine human body called *gandhabba* emerges from the dead body of the deer. This fine body cannot be seen with the naked eye. This *gandhabba* is formed by the *kamma vipāka* that gave rise to this new human life, and blueprint of the grown human is in that *gandhabba*. This is the new “*nāmarūpa*” of that lifestream.

- This blueprint of the human physical body thus has all the important details of the new life (*jāti*); for example, sex type, the height, shape, any major physical disability, etc. Some minor features such a skin color or hair color may depend on the parents, but even those may be influenced by the *kamma vipāka* that gave rise to this new existence.

3. Thus as soon as the *viññāṇa* for the next existence was determined at the last *citta vīthi* by the step “*saṅkhāra paccayā viññāṇa*”, the next step of “*viññāṇa paccayā nāmarūpa*” gives rise to the *nāmarūpa* for the next life.

- Thus here “*nāma*” includes the basic level of *viññāṇa* for the new human existence, which is much different from the “*nāma*” of a deer. Obviously, the “*rūpa*” is that of a human form and not of a deer. Thus “*nāmarūpa*” makes a huge transition at the end of the “*bhava*” as a deer.

4. I have discussed previously how a deer could be reborn many times as a deer until the *kammic* energy of the “deer *bhava*” is exhausted; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- In such instances, at the death of the deer, another “deer *gandhabba*” emerges from the dead body and waits for a suitable womb for “deer mother” becomes available. Here the new “*nāmarūpa*” may be somewhat different, but still that of a deer, so any change would be minor.
- Therefore, the “*viññāṇa paccayā nāmarūpa*” gives rise to a new set of “*nāmarūpa*” only at the *paṭisandhi* to a new existence.

Viññāna is a key concept in Buddha Dhamma. It can be analyzed at various levels, and a deeper analysis is at “[Viññāna Aggregate](#).”

Next, “[Nāmarūpa Paccayā Saḷāyatana](#)”,

8.5.7 Nāmarūpa Paccayā Saḷāyatana

Revised May 25, 2019; August 31, 2019

Āyatana and Indriya

1. First, let us discuss the difference between an *āyatana* and an *indriya*.

- We have six sense faculties: eyes (*cakkhu*), ears (*sota*), nose (*ghāṇa*), tongue (*jivhā*), body (*kāya*), and the mind (*mano*). These are the *indriya*.
- Our initial sense inputs (what we see, hear, etc) are due to *kamma vipāka*. When we experience them, we are using our sense faculties as *indriya*. For example, when we see an attractive person while on the road, that is just “seeing the event” with the *cakkhu indriya*.
- However, based on those initial sense experience, we may INTENTIONALLY use those *indriya* to do more of those acts. Then those *indriya* become *āyatana*. In the above example, if we get attached to that attractive person and keep looking at that person, then we are using our eyes as *cakkhāyatana*.
- They are called *saḷāyatana*, since there are six of them.
- **There is no equivalent English word for *āyatana*, so we will keep using *indriya* and *āyatana* from now on.**

2. For example, I am walking on the road and see a nice house. I just happened to see it due to a *kamma vipāka*, and my eyes were working as *indriya*; they just presented a picture of that house to my mind. It is a neutral event.

- But now, if I form an attachment to the house, I start looking at it for a while (with *cakkhāyatana*). I am thinking about how nice that house is and even about building one like that. At the point, I am using my mind as a *āyatana* too (*mana indriya* now becomes *manāyatana*).
- I have formed greedy thoughts about the house and now I am accumulating new *kamma* by generating *vacī saṅkhāra* (talking to my self with *vitakka/vicāra*). I am using my eyes and mind both as *āyatana* (*cakkhāyatana* and *manāyatana*): I keep looking at the house and keep thinking greedy thoughts.

Indriya Become Āyatana With Abhisāṅkhāra

3. In many cases, when we experience a sense event due to one *indriya*, we may start using some or all of the *indriya* as *āyatana*. In another example, someone offers us a piece of a tasty cake (which is a *kamma vipāka*), and like it so much we may use all six *āyatanas* to accumulate more *kamma* (smell and touch it and then ask for the recipe and think about how to make it or where to buy it).

- Those “extra activities” that we do with *āyatana* could be *abhisāṅkhāra*. But just eating a cake is not *abhisāṅkhāra*; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmacandha](#).”
- Most of the time we use our sense faculties as *indriya*: we see, hear, etc many things in a day but ignore most of them. But when we experience something that has a craving (*anusaya*) for, then we start using our sense faculties as *āyatana*. The *akusala-mūla paṭicca samuppāda* cycle operates only when we use our sense faculties as *āyatana*.
- An *Arahant* ALWAYS uses his/her sense faculties as *indriya*. He/she will see, hear, etc just like us, but will not get “attached to” anything.

4. *Salāyatana* has somewhat different meanings in the *idapaccayatā* and *paṭisandhi paṭicca samuppāda* cycles. That is very much like for *nāmarūpa* that we described in the previous post.

- At birth (especially in a new *bhava* or existence), we get a “new set of sense faculties” or *indriya*. For example, if a human is reborn as a *brahma*, that *brahma* will have only eyes, ears, and the mind; there will be only three *indriya* (or *āyatana*), instead of six for the human. But we keep the term “*salāyatana*” in the *paṭicca samuppāda* as a generic term.
- Thus in *paṭisandhi paṭicca samuppāda*, we are concerned with formation of a brand new set of *āyatana* for the new existence (*bhava*).
- However, when we consider the *idapaccayatā paṭicca samuppāda* series, we are concerned with how the six *āyatanas* for a human change from even moment to moment. One may be looking at something, listening, tasting, etc.

Nāmarūpa paccayā Salāyatana at Paṭisandhi

5. At the end of existence (*bhava*), a given lifestream is making a quantum transition (meaning a large instantaneous jump) from one kind of an existence to another. At that time, the base level of *viññāṇa* for the lifestream makes a quantum jump and this is basically the “*nama*” of the *nāmarūpa*. The *nāmarūpa* for the new existence also has the blueprint for the new physical body, which is the “*rūpa*” part.

- As we did in the previous post, let us consider the case of a lifestream making a transition from a deer to a human. The basic level of *viññāṇa* changes from that of a deer to a much higher level of a human; this new level of *viññāṇa* together with the blueprint for the new human shape is in the new *nāmarūpa* of the *gandhabba* that comes out of the body of the dead deer, as we saw before.
- Now when this *gandhabba* descends to the womb of a human mother, the human baby starts to grow. Six sense faculties (*indriya*) suitable for a human grows in the womb, which will become *salāyatana* **at times** in the future after the birth.

6. In another example, a human who exhausted his *kammic* energy for the human *bhava* at death, and becomes a *deva* in one of the *deva* realms. At the *cuti-paṭisandhi* transition in the last *citta vīthi* of that human, the human *gandhabba* dies. In the next moment, a *deva gandhabba* is born.

- All *devas* are born fully-formed. There is no need for a mother’s womb. This is an *opapātika* birth.
- When that human dies, his body becomes inert like a log. At the very instant, a fully-formed *deva* appears in the appropriate *deva* world.
- This *deva* will have sense faculties appropriate for a *deva*. Those are the *indriya* for the new existence. Those *indriya* **can become** *āyatana* at times depending on the activities of that *deva*.

Nāmarūpa paccayā Salāyatana during a Lifetime

7. During a given lifetime of a deer, human, or a *brahma*, that lifestream will have a basic set of *indriya* (that become *āyatana* at times) appropriate for that existence: the sense faculties for a human are different from that of a deer or a *brahma*.

- But during that lifetime, those *āyatana* will have minor changes (compared to the drastic changes at *paṭisandhi*) depending on the activity. *Idapaccayatā paṭicca samuppāda* cycle describes such changes.

8. In the previous posts, we discussed the case of a thief who is planning a theft. His *viññāṇa* about the theft led him to generate appropriate *nāmarūpa* (the visuals in his mind of how the theft is carried out).

- When he is planning the theft, he will use his sense faculties as *āyatana* to do the “preparatory work.” He will read about the place to be robbed or ask around for relevant information, etc. Each time he does a

specific act (whether thinking, seeing, hearing, etc), a separate *paṭicca samuppāda* cycle operates. We will discuss this later, after going through all the steps in a number of more posts.

- Now when he is about to carry out the theft, his *indriya* transform or attune for the task and become *āyatana*. All his sense faculties will be on high alert. He is watching and listening carefully for anything unexpected, and his whole body becomes tense pumped with adrenaline.
- All his *āyatana* will be employed to carry out the task. He will be using his body, eyes, and ears as *āyatana*. For example, if he is about to be caught, he will use the body to run away.
- At the planning and execution stages, there are many, many *paṭicca samuppāda* cycles associated with each stage. We will discuss that at the end of the series as mentioned above.

Next, "[Difference between Phassa and Samphassa](#)",

8.5.8 Difference between Phassa and Samphassa

Revised November 6, 2018; June 2, 2019

1. No differentiation is made between "*phassa*" and "*samphassa*" in most current explanations of *paṭicca samuppāda*. Both word *phassa* and *samphassa* are most times translated as "contact" in many English translations; see, for example, "[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)" and the English translation there: "[WebLink: suttacentral: The Six Sets of Six.](#)"

- **However, as we will see below, "*samphassa*" has a very different meaning than "*phassa*" and makes the connection of how our instinctive reactions to external sense experiences arise based on our "*sansāric* habits" or "*gati*."**
- With the distinction made between "*phassa*" and "*samphassa*," the true meanings become clear in *suttā* like "[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)."

2. When our eyes make contact with an external object, that is not "*phassa*." That is just like a camera taking a picture; that picture is sent to the brain, which processes and sends that "snapshot" to the mind. The mind then makes contact with this "snapshot" or "image" and this is what "*phassa*" really is: **It is the mental contact.**

- When the mind makes that contact with that image of the external object, a *citta* (actually a series of *citta* called *citta vīthi*; see, "[What is a Thought?](#)") arises and that is what we experience; in fact what we experience is the cumulative effect of many such *citta vīthi* that arise in a very short time, and this cumulative effect we call a "thought."
- Some of the seven universal mental factors that arise with the *citta* instantaneously identifies the object. **Furthermore, based on our "*gati*" (character/habits) the mind forms an opinion on what is seen and will generate "additional feelings" of joy or sorrow.**
- For example, a young lady looking at a dress may form a liking for it. Another person seeing his enemy will form a dislike. A teenager, upon hearing a song may form a liking for it, etc.
- This mental contact happens instantaneously. We do not have any control over it, and it is purely based on our "*gati*." But since our actions based on that initial reaction takes some time, we still have time to control our speech or bodily actions. Even if bad thoughts come to our mind, we can stop any speech or bodily actions. This is what is supposed to be done with "*kāyānupassanā*" in "*satipaṭṭhāna* meditation."

3. Now, let consider what happens when an *Arahant* sees or hears similar things. He/she will see or hear the same thing as any other person. But since an *Arahant* has removed all such *sansāric* habits or "*gati*," he/she will not be attracted to it or repelled by it.

- An *Arahant* has removed all such defiled "*gati*" which are closely related to cravings or "*āsava*." An *Arahant* has removed all "*āsava*"; this is what is meant by "*āsavakkhaya*" at the *Arahant*hood. This is a technical detail that may be clear to some; but don't worry about it if it does not.

- To put it in another way, an *Arahant* sees, hears, ... things as they really are without any bias added.
4. We can now see the difference between “*phassa*” and “*samphassa*.”
- In the case of an *Arahant*, there is only “*phassa*” or mere contact with the external sense input. An *Arahant* will thus “see” or “hear” or “smell” or “taste” or “feel” the same things as any other person. But an *Arahant* will not be attached or repulsed by that sense experience.
 - For example, the Buddha identified different people. But he did not form a special liking for Ven. Ānanda (his personal assistant) or had any hateful thoughts about Devadatta who tried to kill him. He treated the poorest person the same way as he treated a king.
 - The Buddha ate most delicious food offered by the kings and also ate the meager meals offered by poor people without any preference.
 - In all those sense contacts, it was just “*phassa*,” and not “*samphassa*.”
5. On the other hand, an ordinary person will form a like or a dislike for some of the sense inputs (but not for all).
- If a like or dislike is formed, then that sense contact is “*san phassa*” (“*san*” + “*phassa*,” where “*san*” is what we accumulate to extend the *sansāric* journey; see, “[What is “San”?](#)”). It is normally pronounced “*samphassa*.”
 - Thus, when one see, hear, smell, taste, touch something, whether there is going be any likes or dislikes towards that sense experience depends on that person, or more specifically the “*gati*” of that person.
6. “*Samphassa*” is intimately connected to one’s “*gati*” or habits most of which come from our past lives, even though some may be strengthened or weakened by what we do in this life. We may even start forming new “*gati*” in this life.
- There are many posts at this site that discuss “*gati*,” and at the very basic level both “*ānāpāna*” and “*satipaṭṭhāna*” meditations are all about removing bad “*gati*” and cultivating good “*gati*”; see “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”
 - “*Samphassa*” is also intimately connected to the relationships we have with other people and material things. Any kind of sense input on such people/things will automatically generate “*samphassa*.” On the other hand, an *Arahant* has removed all bonds with people/things, and thus will generate only “*phassa*.”
7. Let us discuss some examples to illustrate how “*samphassa*” arises. First let us look at the connection with those people/things in the world that we have special relationships with or what we “*upādāna*,” i.e., like to either keep close to like to stay away from.
- Think about the worst “enemy” you have. When you even think about that person X, you generate distasteful feelings. But that person’s family will have loving thoughts about that person. Here, you and X’s child (for example), would have generated very different “*samphassa*” when thinking, seeing, hearing, about X.
 - When you travel by car or bus and looking out of the window, you may see zillion things, but those are just “seeing”; you don’t pay much attention to them. They are “*phassa*.” But now if you happen to see a beautiful house, it piques your interest and you may even turn back and take another good look at it, and may be even think about how nice it would be to live in a house like that. That is “*samphassa*.”
8. Our *sansāric* habits (“*gati*”) play a key role in generating “*samphassa*.”
- Some people enjoy harassing animals; they pay to go see cockfighting. Others are repulsed by that. Those are *sansāric* habits. So, the scene of two animals fighting for life leads to the enjoyment of some and to the disgust of others; both are “*samphassa*,” but one is obviously immoral. The other is moral but still keeps one bound to *samsāra*; this latter statement may take time to digest.

- Ladies, in general, like nice clothes, jewellery, etc. and men are more into sports. When a husband is watching sports on TV the whole day, the wife may not have any interest and may even get angry at him for not paying attention to other things that need to be done around the house.
- These and zillion other things come from our *sansāric* habits.

9. Now let us see how one’s perception of what is “valuable” can lead to “*samphassa*.” Suppose someone inherits a valuable gem from his father. Every time he sees it or even thinks about it, he becomes happy. But his mind is also burdened by it, since he is worried that he may lose it; he is keeping it in a safe and has put burglar alarms in the house just to protect that gem.

- Now, suppose one day he gets to a professional to evaluate the gem and finds out that it is really worthless. He may not even believe that initially, but once it sinks in that it is indeed worthless, he will become “detached” from it. He will no longer keep it in the safe and may even throw it away in disgust.
- Now he may be generating either neutral or hateful thoughts about the SAME OBJECT that he once loved so much. Nothing changed about the “gem”; it is still the same object as before. What has changed is his PERCEPTION of the value of that object. Whereas he generated “*samphassa*” on thinking or seeing that object before, now he may be generating just “*phassa*” (neutral feelings) or “*samphassa*” with quite opposite feelings of disgust.

10. Let us take another example that was given by one of my teacher *Theros*. This one clearly shows how transition from “*phassa*” to “*samphassa*” or the other way around can happen very quickly.

The following happened many years ago in Sri Lanka. A mother had to go overseas when her son was less than a year old. She had been overseas for many years and came back to meet her son. Apparently, she had not even seen any pictures of the boy, who was now a teenager. When she gets home, she is told that the boy is visiting a neighbor and she starts walking there. On the way she bumps into a teenager; the teenager apologizes and she resumes walking. But then another person on the street says, “Don’t you recognize your son? Well. How can you? You have been away all this time.” Hearing that, she says, “Oh, is that my son?” and immediately runs back and hugs him.

- She clearly saw the boy when he bumped into her and apologized. But at that time, he was just a teenager to her. That “seeing” event involved “*phassa*.”
- But when someone pointed out that it was her son, the whole perception of the boy took a big leap in an instant. Now she looks at the same boy with the whole new set of “mental baggage.” Now it is not just a teenager, but her son; there is attachment involved. Now when she looks at him it is “*samphassa*” that is involved.

11. Now we can also see how “*samphassa*” lead to an **intensified** *vedanā* or feelings. This is called “*samphassa jā vedanā*” or “*vedanā* arising due to *samphassa*.”

- She had neutral thoughts (may be even some annoyance) when the boy bumped into her apologized. But when she learned that it was her son, her feelings turned instantly to joy.
- To take a bit more further, if that teenager then got hit by car after several minutes, that joy would turn instantly to sorrow.
- All these different types of “*vedanā*” arise based on the type and level of “attachment” to a given object, in this case the boy.

12. Therefore, now we can see that the step, “*phassa paccayā vedanā*” in *Paṭicca Samuppāda* really is “*samphassa paccayā vedanā*.”

- More details on how “*samphassa*” leads to *vedanā* (feelings) can be found at: “[Vedanā \(Feelings\) Arise in Two Ways.](#)”

Next, “[Phassa paccayā Vedana...to Bhava](#)”,

8.5.9 Phassa Paccayā Vedanā....to Bhava

1. In the previous post, we discussed the difference between “*phassa*” and “*samphassa*.” To summarize:
 - An *Arahant* will always have “*phassa*,” whether it is due to a *kamma vipāka* (i.e., a sense impression comes in due to a *kamma* done in the past) or whether he/she is using the sense faculties for a given purpose. Here “*phassa*” is pure mental contact; it is just seeing, hearing, smelling, tasting, touching, or just an arbitrary thought that comes to the mind without one’s own likes/dislikes.
 - An ordinary person will also have “*phassa*” when sense inputs come in as *kamma vipāka*. For example, one may be walking down the street and happen to see an expensive ring on the road. That initial “seeing” is due to a *kamma vipāka*. But now he gets interested in it and picks it up and examines it; those follow-up acts may be done with “*samphassa*,” which in turn lead to more *kamma* generating future *kamma vipāka*.
 - Thus the *akusala-mūla paṭicca samuppāda* involves “*saḷāyatana paccayā samhassa*,” even though it is normally written as “*saḷāyatana paccayā phassa*.”
2. “*Phassa*” is the pure mental contact. “*Samphassa*” is the mental contact that has incorporated one’s own likes/dislikes about the sense contact.
 - In an earlier post, we also talked about the difference between “*indriya*” and “*āyatana*,” i.e., how our sense faculties can be used in either way. Note: These six *indriya* are different from the *indriya* in *pañca indriya*, which are *sati*, *samādhi*, *saddhā*, *virīya*, and *paññā*.
 - Our basic sense faculties are the “*indriya*”; when they are used with likes/dislikes they become “*āyatana*.” Since there are six of them there are six “*āyatana*” or “*saḷāyatana*.”
3. In the *akusala-mūla paṭicca samuppāda* series that describe how our actions that start with ignorance (*avijjā*) eventually lead to suffering, what comes to play is “*saḷāyatana*,” i.e., “*nāmarūpa paccayā saḷāyatana*.” Thus, we are talking about instances where we use our sense faculties as “*āyatana*.”
 - Therefore, it is clear that the next step should be “*saḷāyatana paccayā samhassa*” instead of the normally used, “*saḷāyatana paccayā phassa*.”
 - But conventionally “*saḷāyatana paccayā phassa*” is used because it rhymes better that way. **One is supposed to know that it is really “*samphassa*” that comes into play here.**
4. Let us take an example to go over the steps of the *paṭicca samuppāda* up to now as a review. Suppose there is a teenager who come to associate friends that belong to a street gang. They tell him that one needs to enjoy life and has to do “whatever it takes” to make money to enjoy life. If the parents do not have close contacts with the teenager, there is no one to explain to him the perils of such a way of life, and he embraces this wrong vision or “*micchā diṭṭhi*.”
 - Thus due to ignorance (*avijjā*), the teenager starts doing, speaking, and thinking like those gang members: “*avijjā paccayā saṅkhāra*.”
 - Then what occupies his mind most of the time is thoughts related to gang activities and seeking pleasures by using drugs and alcohol: “*saṅkhāra paccayā viññāṇa*.” During gang activities his thoughts are focused on them, and what is in his subconscious during other times is also related to such activities.
 - This leads to “*viññāṇa paccayā nāmarūpa*.” He thinks about and visualizes various gang activities: How to sell drugs to make money and how he will enjoy rest of the time hanging out with the gang.
 - Thus all his six sense faculties become “*āyatana*”: they all are used to find ways to optimize the gang activities and to think about ways to “have to fun”: “*nāmarūpa paccayā saḷāyatana*.”
 - Thus inevitably, the sense contacts he makes are attuned for such activities: “*saḷāyatana paccayā phassa*” or more explicitly, “*saḷāyatana paccayā samhassa*.” Most of his sense contacts are defiled with greed, hate, and ignorance.

- Accordingly, most his feelings are associated with such defiled sense contacts: He gets angry dealing with rival gangs, takes pleasure in beating them up, gets pleasure from drinking and using drugs, etc. Thus “(sam)phassa paccayā vedanā” ensues.

5. Now we can see how he gets more and more absorbed in gang activities; he gets pleasure from them. Gang activities become regular habits. He gets “stuck”, or “gets attached to gang activities” via both greed and hate. This is “vedanā paccayā taṇhā”; see, “[Tanhā – How we attach via Greed, Hate, and Ignorance.](#)”

- The more he continues such activities, it will become harder to dissociate from them. He thinks about those activities even when not actively doing them. Those start working in his “subconscious”; he dreams about them, etc.
- We need to remember that consciously thinking (or talking to oneself) is also *vacī saṅkhāra* and are *kamma* that will bring *vipāka*.

6. Such strong attachments to gang activities this lead to “*upādāna*”: *Upādāna* (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull” or “attract”; thus gang activities becomes very close him. Those are what he thinks, speaks, lives, all day long: “*taṇhā paccayā upādāna*.”

- Among those gang activities, he may especially get attached to certain specific acts: *could* be alcohol, drugs, or even beating up other people or killing them. And such a specific thing would be his favorite, and that is what he will follow enthusiastically and others will also encourage.
- Within the gang there may be a sub-unit that mostly he hangs with. They will enjoy doing their favorite things together, and the gang may assign specific tasks to them which they are known to do well.

7. This leads to preparation of future “existence” or “*bhava*.” For example, suppose his sub-unit becomes notorious for hurting rival gang members. They take pleasure in beating up someone or in some cases even killing someone. He will acquire the mindset of a violent animal. He will become easily agitated and angry.

This is “*upādāna paccayā bhava*.”

- His “*bhava*” has drastically changed from that of an innocent teenager to that of a violent animal at times.

8. This progression from “*avijjā paccayā saṅkhāra*” to “*upādāna paccayā bhava*” does not happen in a linear sequence.

Some steps go back and forth. For example, “*avijjā paccayā saṅkhāra*” is inevitably also followed by the reverse “*saṅkhāra paccayā avijjā*,” i.e., the more wrong things he does, that also solidifies his ignorance. When he starts enjoying those immoral acts, he will tend to think that is what will provide him happiness in the future. His mind will be more and more covered with *kamachanda* (strong greed) and *vyāpāda* (strong hate), the two main components of the five hindrances.

- His ability to think clearly will be suppressed by the five hindrances, and *avijjā* (ignorance) will grow; thus “*saṅkhāra paccayā avijjā*” will also take place.
- There can be many such “inter-loops” that tend to strengthen the downward progression of that teenager.

9. Let us discuss the concept of a “*bhava*” in more detail. Since many people get confused with the terms “*bhava*” and “*jāti*,” it is important to be able to distinguish between the two.

- **Every time we do a *saṅkhāra* (which can be a bodily act, speech, or a thought) a corresponding *kamma* (basically an action) is done. In Buddha Dhamma too, every action has a reaction just like in physics, but when dealing with mental phenomena the reaction (*kamma vipāka*) can come later, sometimes many lives later.**
- This is why science has not yet realized the way to handle mental phenomena. Since most “reactions” come later in this life, or even in future lives, it is not easy to see these “action/ reaction” or “*kamma/kamma vipāka*” relationships.

10. Not all *kamma* are the same. Some *kamma* (and corresponding *saṅkhāra*) are harmless, i.e., they are not potent. Anyone who lives in this world (even an *Arahant* until death) has to do *saṅkhāra* to live: An *Arahant* has to walk, speak, think about things and all these can be considered to be *kamma* (*saṅkhāra*). In some cases, they are put in the category of *kriya* to specifically separate them.

- But what we are concerned with *kamma* that involve greed, hate, and ignorance. Anytime that happens those *kamma* (*saṅkhāra*) are potent. They can bring about **significant** results or *kamma vipāka*.
- The clearly strong *kamma* (*saṅkhāra*) are called *kamma patha* (or *abhisāṅkhāra*). Killing one's parents is a *kamma patha* or a *abhisāṅkhāra*; since it is immoral, it is called an *apuññābhisaṅkhāra* (*apuñña* + *abhisāṅkhāra*). It will lead to very bad consequences (*kamma vipāka*).
- Saving the life of a human is also a *abhisāṅkhāra*; since it is a moral one, it is called a *puññābhisaṅkhāra* (*puñña* + *abhisāṅkhāra*). It will lead to very good consequences.
- As we discussed above, those good or bad consequences may not be apparent even in this life; but they are likely to bear fruit in future lives.

11. How the consequences or “reactions” or *kamma vipāka* due to good or bad *kamma* are brought about involves the concept of a “*bhava*” which can also called a “*kamma bīja*” or a “*kamma seed*.”

- Every time one does a good or bad *kamma*, the potential to bring about its results remains with him/her. And the more one does the same, that potential (or energy) grows. It is said that such acts prepare a “*bhava*” or existence appropriate for that *kamma*.
- For example, as the above discussed teenager keeps doing his violent acts, he is making a “*bhava*” or a “*kamma seed*” appropriate for bringing about their consequences.
- During a lifetime, these “*bhava*” mostly bring about environments suitable for conducting similar acts. **It becomes his “state of existence” or “*bhava*.”** He keeps acting violently, and may even act like an animal at times. His “animal-like *gathi*” or “animal-like habits” will grow.
- This “*bhava*” is called a “*kamma bhava*” and he may “born” in that existence many times during the lifetime. That is described by the *idappaccayā paṭicca samuppāda* that we are discussing now.
- Of course, when this *bhava* gets stronger with maintaining that life style, it may grow to be strong enough to bring in a birth in an actual “animal *bhava*.” That is described in the *uppatti paṭicca samuppāda* which we will discuss later.

12. Going back to our example, it becomes easier for that teenager to get that state of existence (*bhava*); he can be provoked easily and he can hurt someone without much remorse. Thus whole “[Idappaccayatā Paṭicca Samuppāda](#)” cycle can run many times during a day as we will discuss in the next post.

- This is why stopping such actions early is important. If one has learned correct “*ānāpāna*” or “*satipaṭṭhāna*,” then one would know not to keep doing such acts.
- This is also why the environment (parents, family, friends, teachers, etc) plays such a huge role in one's life at young age. We all have both good and bad tendencies (“*gathi*”) coming from previous lives. Which ones get to grow further depends on how one's life is directed by the environment especially at young age. When one is old enough one could of course make even drastic changes with effort.

13. As a given “*kamma bhava*” gets stronger with repeated actions, it can become a “*uppatti bhava*,” i.e., the *kamma* seed has now become strong enough to provide a *paṭisandhi* (rebirth) to a new *bhava* or existence at the end of the current existence (*bhava*) as a human; this is the *cuti-paṭisandhi* transition that happens in the last *citta vīthi* of the human existence.

- Details of this have been discussed in other posts and will be discussed in the next post as well, but the important things here is the concept of a strong *kamma* seed that can give rise to a new existence (rebirth) or a “*uppatti bhava*.”
- Such strong *kamma* seeds suitable for *uppatti bhava* can grow over many lifetimes as well.

- It is likely that we all have many such good and bad strong *kamma* seeds that we have acquired in our previous lives. From all those good and bad *kamma* seeds that are potent enough to provide *paṭisandhi*, the most strong one comes to the forefront of the mind at death (if the *kammic* energy for the present *bhava* as a human is exhausted). We will discuss this in detail in the next post, but the difference between “*bhava*” and “*jāti*” has been discussed in, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

We will discuss more details in the next post that will wrap-up this series: “[Bhava paccayā Jati....Jara, Marana,...](#)”

8.5.10 Bhava Paccayā Jāti....Jarā, Marana,...

Revised June 16, 2019

1. In the previous post we discussed how repeated immoral actions of a teenager can bring about a specific type of existence (*bhava*) even during the current life and that this is called a *kamma bhava*.

- We also discussed how such *kamma bhava* can get stronger with time and become strong enough to lead to a whole new existence at death; this is called a *uppatti bhava*.
- Thus there are two types of “*bhava*”: those that can bring about “experiences” during the current life (*kamma bhava*) and those that become strong enough to power a whole new existence (*uppatti bhava*).
- This is explained in the “[WebLink: suttacentral: Paticcasamuppāda vibhaṅga](#)”: “*Tattha katamo upādānapaccayā bhavo? Bhavo duvidhena—atthi kammabhavo, atthi upapattibhavo,*” i.e., “What is *upādānapaccayā bhavo*? Two types of *bhava* – *kamma bhava* and *uppatti bhava*.”

2. Another way to look at the concept of a “*bhava*” is to treat it as a seed. As we discussed in the previous post, when we do any act with ignorance (and greed or hate), that leads to the generation of a *kamma* seed with some energy to bring about results in the future; this is the same as saying that a “*bhava*” was created by that action. The concept of a *kamma* seed is easier to comprehend.

- Just like a normal seed **has the potential** to give rise to a plant, a ***kamma* seed (or a “*bhava*”) has the potential to bring about a “*jāti*” or a “birth”,** either during this life or in preparing a new life.
- In most posts, I write it as *jāti* (which is the conventional English term used), but it really is pronounced “*jāti*.”

3. Let us take the example of the teenager that we discussed in the previous post, “[Phassa paccayā Vedanā....to Bhava.](#)” Because of the influence of his friends, the teenager starts dealing and using drugs and gradually gets drawn into the gang to become a gang member, and eventually starts doing violent acts of beating and killing people.

- When he did the first beating his friends probably had to encourage or even force him to do it. Now let us suppose that he did not have a *sansāric* habit of doing that kind of violent acts. So, when he did the first act, a small *kamma* seed (or a “*bhava*”) was energized.

4. The next time he did something similar, this initial *kamma* seed made it easier for him to do the second act. Once he did that, the seed got bigger, and the next time he may not need much encouraging, and so on. The more he does it, the more easily he can get into that “*bhava*,” i.e., the stronger that *kamma* seed becomes.

This is none other than many *idapaccayātā* PS cycles running that start with “*avijjā paccayā saṅkhāra*” (doing immoral deeds due to *avijjā*), and leading to “*upādāna paccayā bhava*”, making that *bhava* (or *kamma* seed) strong.

- This is another way of expressing “habit (*gati*; pronounced “*gathi*”) formation” that I have discussed in many other posts. The more one does acts suitable for a certain “*bhava*,” the *viññāna* for similar behavior grows, and it is easier for one to be “born” in a corresponding state; this is “*pati+ichcha*”

leading to “*sama+uppada*” as pointed out in the introductory post, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda.”](#)”

- Thus, the more the teenager does violent acts, it become easier for him to be “born in that state”, i.e., the more easier for him to do similar acts.
- In other words, repeated *saṅkhāra* leads to strengthening the corresponding mindset or *viññāṇa*, and it propagates down the *paṭicca samuppāda* series to make “*kamma bhava*.”

5. Now let us consider when that *kamma* seed or “*kamma bhava*” gives rise to a “*jāti*” in *pavutti paṭicca samuppāda*. One day, his drug deal is sabotaged by a rival gang member, and he gets angry. Now he is easily “born” in that “animal-like violent state.” He starts beating up that guy. This is “*jāti*” in this case.

- When the beating is almost done, that “*jāti*” is almost over with; it is at the “*jara*” (decay) stage and when it is done that is the end or death (“*marana*”) of that “*jāti*.”
- Thus when that episode is over, that temporary “*jāti*” of “a violent existence” is over.
- The rest of it, “*soka, parideva, dukkha, domanassa*” or many forms of suffering comes later in that life or even in future births. The *kamma* seed that helped him do that act, itself got even stronger.

6. The *kammic* energy of that *kamma* seed was not spent giving rise to that *jāti* that happened during that particular instance. That is because that was not a case of *kamma vipāka*. Rather, that *kamma* seed got stronger, because the teenager did more *apuñña abhisāṅkhāra* (i.e., immoral deeds).

- Now, if during that confrontation with the other rival gang member he himself gets beaten up, then that is due to a *kamma vipāka*.
- In either case, that “birth” or “*jāti*” (the confrontation with the rival gang member) would give him only misery at the end: “*soka, parideva, dukkha, domanassa*.”
- Many such *idappaccayatā samuppāda cycles* can operate during even a day and he may be “born” repeatedly in that confrontational state. Some may be minor, like getting mad at his friends but some could be violent. He has prepared the “*bhava*” and he can get into “*jāti*” or be “born in that *bhava*” easily. I am mixing up English and Pāli words in order to make the meanings clear and to get used to those terms.
- Just like when a seed is made it is easy to get that seed to germinate, once we prepare a “*bhava*” it is easy to be born in that type of existence.

7. Now we can see that a “*bhava*” or a “*kamma* seed” is the potentiality for a particular kind of existence or a “state of mind” during the current life itself.

- He will be easily transitioned to that “state of mind” (or *bhava*). For example, he may be having a good time with his family and be with a “normal state of mind.” Then he gets a phone call from a fellow gang member asking for his help with a gang-related activity.
- He will instantly be transitioned to the “gang mentality” and be born a gang member. Then he will engage in whatever gang activity.
- But any birth (or *jāti*) will come to an end. When that activity is over, he may come home and be part of the family life.
- However, that “bad *jāti*” will ALWAYS lead to “*jarā, marana, soka, parideva, dukkha domanassa*.” Even if that particular was successful and he leaves there happily, that ACTIVITY will lead to suffering in the future. He had accumulated more *kammic* energy for that “bad *bhava*.”

8. But the important thing to remember is that “*bhava paccayā jāti*” **does not mean he is guaranteed to be born in that state**. It is likely that he will be born in that state under suitable conditions, for example with provocation.

- But if he comes to his senses and realizes the perils of such actions, he can make an effort and slowly degrade the potency of that *kamma* seed. The first thing is to stop doing those more violent acts. If the teenager has enough determination and if he has moral support from his family, he may be able to get into the moral path.
- If he makes a determination to change, it will be hard in the beginning. It is like trying to stop a moving car. If the car has a lot of speed, it takes a bigger effort to stop. It is easier to stop a slowly moving car, before it gains speed. In the same way, it is easier to revert back if one realizes that one is on the wrong path early.

9. If the teenager does not change his ways, but only gets involved more and more with the violent activities, then that *kamma* seed (or *kamma bhava*) will grow bigger and can become strong enough to energize a whole new existence (rebirth) or “*uppatti bhava*.” Or he can even make a single huge *kamma* seed by killing someone.

- We all are likely to have acquired several or even many such large bad *kamma* seeds (i.e., many bad “*uppatti bhava*”) suitable to yield rebirths in the lowest four realms; we have no way of finding out.
- Of course, we are also likely to have many good *kamma* seeds (i.e., many good “*uppatti bhava*”) suitable to yield rebirths in the higher realms.

10. And we do not have any control over which “*uppatti bhava*” is selected at death. The strongest with the most “*upādāna*” associated with it gets to the front automatically. The Buddha gave a simile to explain how this selection of a “*uppatti bhava*” or a strong *kamma* seed happens at the *cuti-paṭisandhi* transition at death.

- Imagine a barn that keeps the cows in for the night. In the morning, all the cows are anxious to get out and roam around. But when the gate opens, it is the strongest cow that has come to front and is out of the gate when it is opened. The weaker ones don’t even make an effort to be at the front.
- Just like that, it is the strongest “*kamma seed*” or a “*paṭisandhi bhava*” that wins at the *cuti-paṭisandhi* transition.
- In the case of the teenager that we discussed above, if the *kamma* seed that he nourished during this life as a violent person with “animal-like” behavior is the strongest one of all his accumulated *kamma* seeds, then it will bring about an animal existence at the *cuti-paṭisandhi* transition.

11. A Buddha could analyze such a *paṭisandhi paṭicca samuppāda* cycle in finer details to pin-point even what type of animal would it be. This is because a Buddha can see not only a person’s whole history in the present life, but going back to many eons; thus he could see which *kamma* seed will bring the next existence and exactly which kind of “*gathā*” are embedded in that *kamma* seed. We can only discuss the general trends, and here we have discussed only the main ideas of how these *paṭicca samuppāda* cycles operate.

- Going back to the teenager, In this case it is the *paṭisandhi paṭicca samuppāda* cycle that operates, and “*bhava paccayā jāti*” here leads to the birth in a new existence as an animal using that *uppatti bhava*.

12. Once born in such an animal existence, that animal will grow and then start the old age (“*jarā*”), and eventually die (“*marana*”).

- At that death, it is likely that the *kammic* energy of that *kamma* seed has not been depleted. Since most violent animals have shorter lifetimes, only a fraction of that *kammic* energy is likely to have been spent and “he” will keep going through many of similar births (“*jāti*”) until the energy of that *kamma* seed is spent. It is said that many animals keep coming back to the same life many hundreds of times.

13. This is the difference between “*bhava*” and “*jāti*.” Once one gets a new existence or “*bhava*,” one could have many births (“*jāti*”) in that existence until the energy of the *kamma* seed is totally spent.

- Thus we can see that the last step of “*jāti paccayā jara, marana, soka, parideva, dukkha, domanassa*” will be with “him” for a long time to come. It is not just one birth but many that will correspond to that existence as that animal.

- For us also, in general, when one is in the human “*bhava*” one could be reborn many times before the energy of that “good *kamma* seed” is depleted. This is why those rebirth memories can be recalled from adjacent lives. However, it is very difficult to get another “human *bhava*”; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)”

14. Before closing this section let us discuss another important point. We mentioned earlier that everyone has accumulated numerous good and bad *kamma* seeds strong enough to give rise to good and bad rebirths. Then the question arises: Does a person attain the *Sotāpanna* stage (i.e., make bad rebirths in the lowest four realms void) by eliminating all those corresponding bad *kamma* seeds?

- While it is possible to reduce the potency of *kamma* seeds and maybe even eliminate some, it may not be possible to remove all. Many *kamma* seeds may be removed by the *Ariya metta bhāvanā* discussed in the “*Bhāvanā* (Meditation)” section, but there could be left overs. It is said that the Buddha had 11 instances of bad *kamma vipāka* including a back problem. We will discuss this point in a separate post.
- Therefore, it is very likely that we all have many good and bad *kamma* seeds strong enough to energize many good and bad rebirths.
- What happens at the *cuti-paṭisandhi* moment involves the “*upādāna paccayā bhava*” step in the *paṭisandhi paṭicca samuppāda* cycle. As we recall, this is the step that is responsible for energizing “*uppatti bhava*” as well as “*kamma bhava*.”
- But this same step is involved in grasping the strongest “*uppatti bhava*” at the end of the current “*bhava*.” If a person dies and if that was the last possible human birth for him/her, then at the dying moment, that comes closest and he/she will willingly grasp it because that will match the dominant “*gathi*” of him/her.

15. Let us consider the case of the violent teenager again. Suppose he continued with his violent acts and built up an “*uppatti bhava*” suitable for a violent animal. Then at the dying moment, he could see in his mind (like in a dream), a rival gang member trying to “steal a drug deal”; he will also see a gun closeby. By his natural instincts he will get angry, grab the gun, and shoot that person. This is an example of a “*gathi nimitta*.”

- That is the “*upādāna paccayā bhava*” step for the new existence. He has willingly grasped the mindset of an animal, and he will be born as an animal. His next thought moment is in that animal which comes out of that dead body of the teenager as a “*gandhabba*” with a fine body that cannot be seen.
- This is described in detail in other posts; it needs more background material in “*manomaya kāya*” for understanding the technical details, but that is not critical here. However, now we can get an idea of how a new existence is grasped at the end of a “*bhava*” in the *paṭisandhi paṭicca samuppāda* cycle.

16. Let us now go back to the question of how a *Sotāpanna* avoids such bad rebirths even if he/she has many bad *kamma* seeds. Suppose that *Sotāpanna* has the same kind of *kamma* seed as that teenager (could be from a previous life), and that it is the strong enough to come to forefront of his/her mind at the dying moment.

- What happens is that a *Sotāpanna* will not grab the gun and shoot that person even if it is his/her worst enemy doing something that could make him/her mad. His/her mindset or “*gathi*” have been permanently changed. Thus “*upādāna paccayā bhava*” step will not be executed for that *kamma* seed.
- In that case now the next potent *uppatti bhava* will come to the forefront. If that is also a bad one suitable for rebirth in the lowest four realms, that will be rejected too. Eventually, he/she will grasp a rebirth that is compatible with his/her “*gathi*” at that dying moment, which for a *Sotāpanna* will never be the “*gathi*” of a being in one of the four lowest realms. This happens automatically and very quickly. We do not have conscious control over it.
- Thus one’s rebirth will determined by the way one lives (and had lived previous lives). If one lived like an animal, one will be born an animal no matter how much one wishes to have a “good birth.” The real danger, as we discussed above, is that we do not know how we had lived our previous lives.

- This is why *paṭicca samuppāda* means “*pāti + icchā*” leading to “*sama*” + “*uppada*” or what one grasps willingly and habitually is what one that will operate automatically at the dying moment; see, [“Paṭicca Samuppāda – ‘Pāti+icchā’+‘Sama+uppāda.’”](#)

8.6 Uppatti Paṭicca Samuppāda (How We Create Our Own Rebirths)

July 6, 2019

Rebirths Arise Due to Our Own Actions

1. *Uppatti Paṭicca Samuppāda* describes how we create our own rebirths. *Idappaccayatā Paṭicca Samuppāda* describes how we create our own *kamma vipāka* that arise during a life. The differences between *kamma bhava* and *uppatti bhava* are discussed in the post, "[Bhava paccayā Jāti...Jarā , Marana,...](#)"

- Both types of *bhava* or existences arise due to the generation of (*abhi*)*saṅkhāra* due to *avijjā*. We remember that we do all types of *kamma* (*kāya kamma*, *vacī kamma*, *mano kamma*) with *saṅkhāra* (*kāya*, *vacī*, and *mano saṅkhāra*) or “how we think and then act on such thinking.”
- **ALL *saṅkhāra* arise in the MIND. As we see, they lead to future rebirths with physical bodies. This is why the Buddha said: “Mano pubbangamā dhammā..” or “ALL *dhammā* arise with the mind as precursor..”**
- When we generate (*abhi*)*saṅkhāra* that creates a “future expectation” or a *viññāṇa*; see, "[Viññāna Aggregate](#).” That ALWAYS leads to a *kamma bhava*, which is a “seed” to bring about a future existence in this life or in future life.
- A *kamma bhava* can become an *uppatti bhava* if it becomes strong enough to give rise to rebirth. For example, killing a parent WILL generate an *uppatti bhava* that WILL bring in birth in an *apāya* in the very next rebirth.

2. That is basically the key difference between *Idappaccayatā Paṭicca Samuppāda* and *Uppatti Paṭicca Samuppāda*; see, "[Paṭicca Samuppāda Cycles](#).”

- *Idappaccayatā Paṭicca Samuppāda* generates *kamma* seeds or *kamma bhava* moment-to-moment.
- Those *bhava* (or *kamma* seeds or *kamma bija*) that bring *kamma vipāka* during a lifetime (whether in this life or WITHIN a future life) is called a “***kamma bhava***.”
- Some of those are strong enough to bring in a new future existence (whether in a bad realm or in a good realm) are called “***uppatti bhava***.”
- Regardless of whether it is a *kamma bhava* or an *uppatti bhava*, **we ourselves generate them** every time we act with *avijjā* and generate *viññāṇa* via the steps, “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- Then subsequent *Paṭicca Samuppāda* steps invariably lead to “*bhava paccayā jāti*” and “*jāti paccayā jāra, maraṇa, soka, perideva, dukkha, domanassa, upasaya*” or “the whole mass of suffering.”

Grasping a *Bhava* Happens Automatically

3. We do not have any control over which “*uppatti bhava*” is selected at death. The strongest with the most “*upādāna*” associated with it gets to the front automatically. The Buddha gave a simile to explain how this selection of a “*uppatti bhava*” or a strong *kamma* seed happens at the *cuti-paṭisandhi* transition at death.

- Imagine a barn that keeps the cows in for the night. In the morning, all the cows are anxious to get out and roam around. But when the gate opens, it is the strongest cow that has come to the front and is out of the gate when it is opened. The weaker ones don’t even make an effort to be at the front.
- Just like that, it is the strongest “*kamma* seed” or a “*paṭisandhi bhava*” that wins at the *cuti-paṭisandhi* transition.
- In the case of the teenager that we discussed in the previous post, "[Bhava paccayā Jāti...Jarā , Marana,...](#)” if the *kamma* seed that he nourished during this life as a violent person with “animal-like”

behavior is the strongest one of all his accumulated *kamma* seeds, then it will bring about an animal existence at the *cuti-paṭisandhi* transition.

4. A Buddha could analyze such a *paṭisandhi paṭicca samuppāda* cycle in finer details to pin-point even what type of animal would it be. This is because a Buddha can see not only a person's whole history in the present life but going back to many eons; thus he could see which *kamma* seed will bring the next existence and exactly which kind of “*gati*” are embedded in that *kamma* seed. We can only discuss the general trends, and here we have discussed only the main ideas of how these *paṭicca samuppāda* cycles operate.

- Going back to the teenager, In this case, it is the *paṭisandhi paṭicca samuppāda* cycle that operates, and “*bhava paccayā jāti*” here leads to the birth in a new existence as an animal using that *uppatti bhava*.

Difference Between *Bhava* and *Jāti*

5. Here it is important to realize that *cuti-paṭisandhi* transition DOES NOT necessarily happen when a human dies. He/she can be reborn many times as a human within a given “human *bhava*”; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- Once born (*jāti*) in such an animal existence (*bhava*), that animal will grow and then start the old age (“*jarā*”), and eventually, die (“*marañā*”).
- At that death, it is likely that the *kammic* energy of that *kamma* seed has not been depleted.
- Since most violent animals have shorter lifetimes, only a fraction of that *kammic* energy is likely to have been spent and “he” will keep going through many of similar births (“*jāti*”) until the energy of that *kamma* seed is spent. Many animals keep coming back to the same life many hundreds of times.

6. That is the difference between “*bhava*” and “*jāti*.” Once one gets a new existence or “*bhava*,” one could have many births (“*jāti*”) in that existence until the energy of the *kamma* seed is totally spent. I keep repeating this because it is very important to understand the difference between “*bhava*” and “*jāti*.”

- Thus, we can see that the last step of “*jāti paccayā jara, marana, soka, parideva, dukkha, domanassa*” will be with that “teenager” for a long time to come. It is not just one birth but many that will correspond to that existence as that animal.
- For us also, in general, when one is in the human “*bhava*” one could be reborn many times before the energy of that “good *kamma* seed” is depleted. This is why those rebirth memories can be recalled from adjacent lives. A human *bhava* can last many thousands of years, but each human birth (*jāti*) lasts only about 100 years.
- **However, it is very difficult to get another “human *bhava*”; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)”**

How Are Certain Rebirths Stopped?

7. We mentioned earlier than everyone has accumulated numerous good and bad *kamma* seeds strong enough to give rise to good and bad rebirths. Then the following question arises. Does a person attain the *Sotāpanna* stage by eliminating all those corresponding bad *kamma* seeds?

- While it is possible to reduce the potency of *kamma* seeds and maybe even eliminate some, it may not be possible to remove all. Many *kamma* seeds may be removed by the *Ariya metta bhavana* discussed in the “[Bhavana \(Meditation\)](#)” section, but there could be leftovers. Even the Buddha had 11 instances of bad *kamma vipāka* including a back problem.
- Therefore, it is very likely that we all have many good and bad *kamma* seeds strong enough to energize many good and bad rebirths.

8. What happens at the *cuti-paṭisandhi* moment involves the “*upādāna paccayā bhava*” step in the *uppatti paṭicca samuppāda* cycle.

- Suppose a person dies and that was the last possible human birth for him/her. Then at the dying moment, that strong *kamma* seed will generate a corresponding *nimitta* (or sign of that *kamma*).
- Whether he/she will willingly grasp that *nimitta* will depend on whether he/she still has such “*gati*.”

9. Let us again consider the case of the violent teenager discussed in #3 in the previous post, “[Bhava paccayā Jāti...Jarā , Marana....](#)” Suppose he continued with his violent acts and built up an “*uppatti bhava*” suitable for a violent animal. Then, at the dying moment, he could see in his mind (like in a dream), a rival gang member trying to “steal a drug deal”; he will also see a gun close-by. **This is the *nimitta*.**

- If that person still has the same *gati*, then by his natural instincts he will get angry, grab the gun, and shoot that person.
- That is the “*upādāna paccayā bhava*” step for the new existence. He has willingly grasped the mindset of an animal, and he will be born as an animal. His next thought-moment is associated with that animal, which comes out of that dead body as a “*gandhabba*” (with a fine body that cannot be seen).
- This process is explained from the beginning to end in detail in the series of posts, “[Paṭicca Samuppāda in Plain English.](#)”

How Does a Sotāpanna Avoid Bad Rebirths?

10. Let us now go back to the question of how a *Sotāpanna* avoids such bad rebirths even if he/she has many bad *kamma* seeds. Suppose that *Sotāpanna* has the same kind of strong (and bad) *kamma* seed as that teenager (could be from a previous life).

- What happens is that a *Sotāpanna* will not grab the gun and shoot that person even if it is his/her worst enemy. **His/her mindset or “*gati*” has been permanently changed.** Thus “*upādāna paccayā bhava*” step will not be executed for that *kamma* seed.
- In that case, now the next potent *uppatti bhava* will come to the forefront. If that is also a bad one suitable for rebirth in the lowest four realms, that will be rejected too. Eventually, he/she will grasp a rebirth that is compatible with his/her “*gati*” at that dying moment. A *Sotāpanna* has removed “*gati*” of a being in one of the four lowest realms.
- **This happens automatically and very quickly. We do not have any conscious control over it.**

11. The way one lives this life AND how one had lived previous lives can contribute to future rebirth. One would generate “*kamma* seeds” or “*uppatti bhava*” for possible future existences according to the way one lives a life.

- **However, if one has changed one’s *gati* PERMANENTLY (via attaining at least the *Sotāpanna* stage), then bad *bhava* will not result.** EVEN IF one had committed bad *kamma* suitable to bring in a “bad *bhava*”, that “bad *bhava*” will not be grasped at the *cuti-paṭisandhi* moment.
- This is why *Paṭicca Samuppāda* means “*pati + ichcha*” leading to “*sama*” + “*uppāda*.” What one grasps willingly and habitually is what one that will operate automatically at the dying moment; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda.](#)”
- This is why it is better to use *Paṭicca Samuppāda* rather than using the English translation of “dependent origination.” Most Pāli word have “built-in” explanations (*pada nirutti*). One just needs to understand what is meant by those words and just use the Pāli words. [*pada* :[nt.] foot; foot-step; a word; position; place; reason; cause; a line of stanza; the final rest. *nirutti* : (f.) [Sk. nirukti, nis+vac] one of the Vedāṅgas (see *chalaṅga*), expln of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]

- I have explained this with *saññā*, *saṅkhāra*, and *viññāṇa* as well; see, “[Mental Aggregates](#).” Those DO NOT have corresponding SINGLE English words. In particular, it is WRONG to translate *viññāṇa* as just “consciousness”; see, “[Viññāna Aggregate](#).”

Relevance to “Origin of Life” Issue

12. I hope that it is clear now how we create our own future births by doing strong *kamma*. Good *kamma* lead to good *vipāka* and good births. Bad *kamma* leads to bad *vipāka* and bad births.

- Not only that, but we can avoid bad births (in the lower four realms) by removing our “bad *gati* that could lead to such births.” Attainment of *Sotāpanna* stage ensures this.
- In the same way, we can stop births in the human and *deva* realms (remaining realms in *kāma loka*). Removal of “*kāma gati*” or cravings for sense pleasures get one there. The need to take this step may not become clear until one attains the *Sotāpanna* stage.
- Even the higher *brahma* realms have some of suffering (especially at the moment of death). **Future suffering is completely removed** by removing “all *gati*” including those based on craving for *jhānic* pleasures in *brahma* realms. This happens of course at the *Arahant* stage.

13. **It should be also clear that “new lives” do not randomly come into existence.** A new *jāti* based on a new *bhava* arises ONLY as a continuation of an existing lifestream; see, “[What Reincarnates? – Concept of a Life-stream](#).”

- When one *bhava* ends, a living being automatically grasps a new *bhava*, if the *Arahant* stage has not been attained.
- That is how the endless rebirth process continues. And that is also why there is no “traceable beginning to life.”
- A detailed discussion in a new series of posts on “[Origin of Life](#).”

8.7 **Imasmim Sati Idam Hoti – What Does It Really Mean?**

August 5, 2018; revised January 26, 2019; May 2, 2019

1. “*Imasmim sati idam hoti, imassa uppādā idam uppajjati; imasmim asati idam na hoti, imassa nirodhā idam nirujjhatī ti.*” This is a famous phrase that appears in most *suttā* that describe *Paṭicca Samuppāda* (Dependent Origination).

- It is usually translated as, “When there is this that is, with arising of this that arises; when there is not this that is not, with cessation of this that ceases.” **That sounds like a Zen riddle!**
- But the Buddha never made his *Dhamma* into riddles. He always presented it in the simplest possible way. Some verses have become riddles, only because people have incorrectly translated them; they simply did not understand the true meanings or the significance of key Pāli words.
- Another example is, “[Anidassana Viññāna – What It Really Means.](#)”

2. **The key word in the verse that we are interested is “sati.”** All English translations that I have seen have left out this key word!

- There are two meanings to the word “sati.” One is the mundane meaning “attention.”
- It is actually that mundane meaning that should be used in this verse.

3. **The deeper meaning of “sati” should be used in the context of *Satipaṭṭhāna bhāvanā*, for example.**

- That “sati” is a *sobhana cetasika*, i.e., a good mental factor. The *sati cetasika* is cultivated by learning *dhamma* and eventually comprehending *Tilakkhaṇa*.
- **However, that *cetasika sati* does not have a counterpart in *asobhana cetasika*, i.e., there is no “asati” *cetasika*.**
- In the verse, both “sati” and “asati” are mentioned. **Therefore, “sati” in the context of the verse does not refer to the *sati cetasika*.**

4. The word “sati” in “*Imasmim sati idam hoti,..*” is, however, still closely related to the mind. It just refers to keeping the mind focused on the task at hand, whether it is a “good” or “bad” task.

- Suppose a suicide bomber is assembling a bomb that he intends to use to kill many people. He must be paying careful **attention** to what he is doing and that is the **mundane meaning *sati*** there.
- In a way, even the term “mindful” can be used to describe the mindset of the suicide bomber while assembling the bomb. He must be mindful of his task. If he makes even a slight mistake, he may trigger the bomb right there.
- Obviously, he is not engaged in *Satipaṭṭhāna*.

5. That mundane meaning of “attention” is the meaning that should be used in analyzing the verse in question here: “*Imasmim sati idam hōti,..*”

- **What it means in this context is, “to focus the mind on something (X).”** Then that “something” leads to the **creation of “another thing (Y).”** Even though X is ALWAYS mental, Y could be mental (*nāma*) or material (*rūpa*) or a combination of the two (*nāmarūpa*).
- **When the mind is set on getting something done, one makes *vacī* and *kaya saṅkhāra* accordingly, i.e., one thinks about how to get it done and acts accordingly; that is the “sati” that is referred to in the verse.**
- **When the mind does not focus on something (and does not make plans in the mind via *vacī saṅkhāra*, and carries out such plans), that is called “asati.”** In that case, there is no reason that Y would arise.

6. As we will see below, making *saṅkhāra* is just the first step in a series of steps.

- The mind can be set on getting done good or bad things. Keeping the attention on “good things” will lead to good outcomes (via good *dhamma*). Keeping the attention on “bad things” will lead to bad outcomes (via bad *dhamma*).
- Therefore, in both cases (good or bad attention) will lead to a corresponding (good or bad) outcome. That is what is meant by “*Imasmim sati idam hōti*” or “keeping the attention on this will lead to that.”
- What the eventual outcome (“that” is a “*jāti*,” the outcome or the end result) is described by *Paṭicca Samuppāda*: “*saṅkhāra paccayā viññāṇa*,”...ending up in “*bhava paccayā jāti*.”

7. Of course, if one does not keep the attention on something, one will not be generating (good or bad) *saṅkhāra* about it. Thus, one will not initiate *Paṭicca Samuppāda* cycles: “*saṅkhāra paccayā viññāṇa*,”...ending up in “*bhava paccayā jāti*.”

- Therefore, if there is “*asati*” or “no attention on some task”, then there will be **no reason** for there to be an **outcome**: “*Imasmim asati idam na hōti*.”
- In other words, the mind will have no reason to generate new *saṅkhāra* to initiate *Paṭicca Samuppāda* processes.
- The mind can be set on getting done good or bad things. One should do “*sati*” on good things and “*asati*” on bad things. That will lead to ending up with good things and not ending up with bad things.

8. Now we can understand half of the verse: “*Imasmim sati idam hoti, Imasmim asati idam na hoti*.” That means “when the mind is focused on X that will give rise to Y, when the mind is **not focused** on X that **will not give rise** to Y.”

- Next, we need to figure out what is meant by “*imassa uppādā idam uppajjati*” and “*imassa nirodhā idam nirujjhatī*.”
- This part states that what has **ultimately come to being** (*uppajjati*) is due to **what first arose in the mind** (*uppādā*), AND for something **not to come to being** (*nirujjhatī*), the corresponding cause **should not arise in the mind** (*nirodhā*).
- So, now we can translate the whole verse: “when the mind is focused on this it will give rise to that, when the mind is **not focused** on this it **will not give rise** to that; **this arising in the mind** (*uppādā*) will give rise to that (*uppajjati*), **this not arising in the mind** (*nirodhā*) will stop that from coming to being (*nirujjhatī*).”
- In very simple terms, this describes the key message of the Buddha: if one does not generate any defilements in the mind, then one will not be reborn into this suffering-filled world.

9. So, now we can translate the whole verse: “when the mind is focused on this it will give rise to that, when the mind is **not focused** on this it **will not give rise** to that; **this arising in the mind** (*uppādā*) will give rise to that (*uppajjati*), **this not arising in the mind** (*nirodhā*) will stop that from coming to being (*nirujjhatī*).”

- In very simple terms, this describes the key message of the Buddha: if one does not generate any defilements in the mind, then one will not be reborn into this suffering-filled world.

10. How anything and everything in this world arises with **the mind as the “creator”** is explained in the doctrine of cause of effect or *paṭicca samuppāda*.

- Even though the process starts off with generating *saṅkhāra* (“*avijjā paccayā saṅkhāra*”), it involves many other steps (“*saṅkhāra paccayā viññāṇa*”, etc) before the final thing manifests.
- That is why this verse comes in many *suttā* just before introducing the *paṭicca samuppāda* cycle starting with “*avijjā paccayā saṅkhāra*.”

11. What we discussed above becomes clear in the “[WebLink: suttacentral: Ariyasāvaka Sutta \(SN 12.49\)](#).” It starts with the statement: “*Na, bhikkhave, sutavato ariyasāvakassa evaṃ hoti: ‘kiṃ nu kho—kismiṃ*

sati kiṃ hoti, kissuppādā kiṃ uppajjati? Kismiṃ sati saṅkhārā honti, kismiṃ sati viññāṇaṃ hoti, kismiṃ sati nāmarūpaṃ hoti, kismiṃ sati saḷāyatanaṃ hoti, kismiṃ sati phasso hoti, kismiṃ sati vedanā hoti, kismiṃ sati taṇhā hoti, kismiṃ sati upādānaṃ hoti, kismiṃ sati bhavo hoti, kismiṃ sati jāti hoti, kismiṃ sati jarāmarāṇaṃ hotī'ti?."

Translated: “*Bhikkhus*, a noble disciple is not confused by the question: ‘[What gives you indeed— (*kiṃ nu kho*—)] What **in the mind** becomes a cause? With the existence of what **in the mind** does what come to being? What **in the mind** becomes a cause for *saṅkhāra*? What **in the mind** becomes a cause for *viññāṇa*? What **in the mind** becomes a cause for *nāmarūpa*?... What **in the mind** becomes a cause for *jarāmarāṇa*?’ ”

12. The next verse: “*Atha kho, bhikkhave, sutavato ariyasāvakassa aparappaccayā ñāṇamevettha hoti: ‘imasmiṃ sati idaṃ hoti, imassuppādā idaṃ uppajjati. Avijjāya sati saṅkhārā honti; saṅkhāresu sati viññāṇaṃ hoti; viññāṇe sati nāmarūpaṃ hoti; nāmarūpe sati saḷāyatanaṃ hoti; saḷāyatane sati phasso hoti; phasse sati vedanā hoti; vedanāya sati taṇhā hoti; taṇhāya sati upādānaṃ hoti; upādāne sati bhavo hoti; bhavo sati jāti hoti; jātiyā sati jarāmarāṇaṃ hotī'ti. So evaṃ pajānāti: ‘evamayaṃ loko samudayatī'ti.’”*

Translated: “*Bhikkhus*, the noble disciple knows that what arises is **dependent on what is cultivated in the mind**: ‘When this exists **in the mind**, that comes to be; with the arising of this **in the mind**, that arises. When there is ignorance **in the mind** (*avijjāya sati*), *saṅkhāra* come to be (*saṅkhārā honti*). When there are *saṅkhāra* **in the mind** (*saṅkhāresu sati*), *viññāṇa* comes to be (*viññāṇaṃ hoti*). When there is *viññāṇa* **in the mind** (*viññāṇe sati*), *nāmarūpa* come to be (*nāmarūpaṃ hoti*), ...When there is *bhava* **in the mind** (*bhavo sati*), *jāti* comes to be (*jāti hoti*). When there is *jāti* **in the mind** (*jātiyā sati*), *jarāmarāṇa* comes to be (*jarāmarāṇaṃ hotī*). **He understands thus: ‘In such a way the world arises (*samudaya*).**’ ”

13. Next verse is: “*Na, bhikkhave, sutavato ariyasāvakassa evaṃ hoti: ‘kiṃ nu kho—kismiṃ asati kiṃ na hoti, kissa nirodhā kiṃ nirujjhati? Kismiṃ asati saṅkhārā na honti, kismiṃ asati viññāṇaṃ na hoti, kismiṃ asati nāmarūpaṃ na hoti, kismiṃ asati saḷāyatanaṃ na hoti, kismiṃ asati phasso na hoti, kismiṃ asati vedanā na hoti, kismiṃ asati taṇhā na hoti, kismiṃ asati upādānaṃ na hoti, kismiṃ asati bhavo na hoti, kismiṃ asati jāti na hoti, kismiṃ asati jarāmarāṇaṃ na hotī'ti?."*

Translated: “*Bhikkhus*, a noble disciple is not confused by the question: ‘[What gives you indeed— (*kiṃ nu kho*—)] Absence of what **in the mind** would not be a cause? With the cessation of what **in the mind** what would be stopped from arising? Absence of what **in the mind** (*kismiṃ asati*) *saṅkhāra* would not result (*na honti*)? Absence of what **in the mind** *viññāṇa* would not result? ..Absence of what **in the mind** *nāmarūpa* would not result?... Absence of what **in the mind** *jarāmarāṇa* would not result?’ ”

14. And then: “*Atha kho, bhikkhave, sutavato ariyasāvakassa aparappaccayā ñāṇamevettha hoti: ‘imasmiṃ asati idaṃ na hoti, imassa nirodhā idaṃ nirujjhati. Avijjāya asati saṅkhārā na honti; saṅkhāresu asati viññāṇaṃ na hoti; viññāṇe asati nāmarūpaṃ na hoti; nāmarūpe asati saḷāyatanaṃ na hoti ... pe ... bhavo na hoti ... jāti na hoti ... jātiyā asati jarāmarāṇaṃ na hotī'ti. So evaṃ pajānāti: ‘evamayaṃ loko nirujjhatī'ti.’”*

Translated: “*Bhikkhus*, the noble disciple knows that what arises is dependent on what is cultivated in the mind: ‘When this does not exist **in the mind**, that would not come to be; with the cessation of this **in the mind**, that is stopped from arising. When there is no ignorance **in the mind** (*avijjāya asati*), *saṅkhāra* do not come to be (*saṅkhārā na honti*). When *saṅkhāra* cease to exist **in the mind** (*saṅkhāresu asati*), *viññāṇa* do not come to be (*viññāṇaṃ na hoti*). With the cessation of *viññāṇa* **in the mind** (*viññāṇe asati*), *nāmarūpa* do not come to be (*nāmarūpaṃ na honti*), ...When there is *bhava* absent **in the mind** (*bhavo asati*), *jāti* would not come to be (*jāti na hoti*). When there is no *jāti* **in the mind** (*jātiyā asati*), *jarāmarāṇa* do not come to be (*jarāmarāṇaṃ na hotī*). **He understands thus: ‘In such a way the world ceases to exist (*nirujjhatī*), and thus the *samsāric* suffering ends.’ ”**

15. Finally, “*Yato kho, bhikkhave, ariyasāvako evaṃ lokassa samudayañca atthaṅgamañca yathābhūtaṃ pajānāti, ayaṃ vuccati, bhikkhave, ariyasāvako diṭṭhisampanno itipi ... pe ... amatadvāraṃ āhacca tiṭṭhati itipī*”ti.

Translated: “*Bhikkhus, a noble disciple thus understands the origin and the ending of the world. He is knowledgeable about the true nature of this world, has the correct vision, and comes to attain Nibbāna.*”

16. That is the complete *sutta*. It provides the basic reasoning behind *pañicca samuppāda*.

- It is important to realize that all the steps in *pañicca samuppāda* involves the mind, up to the *jāti* stage. When the *jāti* stage is arrives, the process is complete. That *jāti* which came into being, has to evolve naturally to its end.

8.8 Paṭṭhāna Dhammā

October 22, 2016

[Paṭṭhāna Dhamma – Connection to Cause and Effect \(Hetu Phala\)](#)

[What Does “Paccaya” Mean in Paticca Samuppāda?](#)

[Anantara and Samanantara Paccaya](#)

[Asevana and Annamanna Paccaya](#)

8.8.1 Paṭṭhāna Dhammā – Connection to Cause and Effect (Hetu Phala)

October 22, 2016; revised October 25, 2016; June 15, 2018

1. *Paṭṭhāna Dhammā* is also cited as *pattāna Dhammā* in English. However, the correct word should be *pattana*, since it is pronounced “pattāna”; there is no “th” sound.

- The word “pattāna” comes from “patta” + “āna.” I have previously mentioned that “āna” means “bringing in” as in “ānāpāna” in *Ānāpāna bhāvanā*. “Patta” in Pāli or Sinhala means the layer of a tree trunk underneath the outermost layer or bark — *consisting of phloem cells* — which carry food between roots and leaves. (The outer layer or bark is called “*potta*” in Sinhala).
- So, the word “*paṭṭhāna*” here conveys the idea that while the roots (*mūlika hethu*) are critical for the tree’s survival, the “*patta*” also plays an important role for the tree’s growth. In the case of *Paṭṭhāna Dhammā*, they play an important role of describing the conditions under which *hetu* or causes can bring in effects, as we will see below.
- By the way, the “*patta*” are essential for the tree’s survival, just as the roots of the tree are. One could kill a tree simply by a process called “girdling” where those phloem cells are removed; see the Wikipedia article: “[WebLink: WIKI: Girdling.](#)”
- The Buddha frequently used analogies with the workings of a tree. We also need to remember that “*mūla*” is a root in Pāli or Sinhala, so that “*mūlika hethu*” means “root causes.” So, the tree’s survival depends on not only its roots, but also its “*patta*” containing those critical phloem cells.
- This is the same as saying *Paṭṭhāna Dhammā* describing CONDITIONS are as important as ROOT CAUSES, which are *lobha*, *dosa*, and, *moha* (for *akusala kamma*), and *alobha*, *adosa*, and *amoha* (for *kusala kamma*).

2. It is also to be noted that “*paṭṭhāna*” in “*satipaṭṭhāna*” can be interpreted to mean “providing food” or “*patta*” + “*āna*” to cultivate *sati* or mindfulness. Furthermore, “*satipaṭṭhāna*” is pronounced like that too, without “th” sound at the end.

- However, “*satipaṭṭhāna*” with a “h” is the common way it is spelled in English. So, I decided to go with that when I wrote the posts on the *Satipaṭṭhāna Sutta* in the “Sutta Interpretations” section. The meaning given there is also compatible, regardless of how it is spelled.
- The word “*paṭṭhāna dhammā*” has not been discussed that much in English. Therefore, it is good to get started the right way. Buddhaghosa did not discuss it because he did not comprehend *paṭṭhāna samuppāda*, and as a result even many people who follow even Theravāda Buddhism are not familiar with *paṭṭhāna dhammā*. Ven. Ledi Sayadaw in Burma and Ven. Rerukane Chandawimala in Sri Lanka are clear exceptions. They have discussed *paṭṭhāna dhammā*; see the references below.
- However, their interpretations of *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) are not correct.

3. In the **workings of living things (including plants) — and in mental processes in particular** — the mechanism of how causes lead to effects is much more complex compared to material phenomena involving inert objects.

- In these cases, many conditions need to be satisfied, in addition to having sufficient causes.
- In many cases, such critical conditions are not satisfied long after the causes were generated, so there is normally a TIME DELAY between causes and effects, i.e., between *kamma* and *kamma vipāka*.
- This is why it is hard for people to see the validity of cause and effect (*hetthu phala*) involving living things and especially the mind.
- This is what is explained in *paṭicca samuppāda*, with the help of *paṭṭhāna dhammā*.
- Let us discuss some examples to understand the role of conditions or *paccayā*.

4. All necessary causes to bring about a tree are embedded in a seed. A seed is the CAUSE for subsequent appearance of a tree. **Yet, a seed cannot germinate unless suitable conditions are present.** If one keeps a seed in a cool dry place, it will just sit there for even thousands of years without giving rise to a tree.

- However, if one plants the seed in the ground where sunlight is available and provides water and nutrients, it will germinate and grow to be a tree.
- The root condition to bring into existence a tree is embedded in a seed; this is called *anantara paccaya*. But suitable conditions for that seed to germinate are in fertile soil with adequate sunlight and water; this is called *samanantara paccaya*. Therefore, both *anantara* AND *samanantara paccaya* MUST be satisfied to bring a tree to existence; see, “[Anantara and Samanantara Paccaya](#)” for details.
- So, AT WHAT TIME the seed will germinate, will depend on at what time the *samanantara* condition (fertile soil) will be satisfied. *Anantara* condition (presence a seed) is not enough.

5. Another important condition of *paccayā* comes into play for the germinated seed to grow into a tree: The *āhāra paccayā* (food condition) must be satisfied. If water, sunlight, and nutrients are not available after the seed is germinated, it cannot grow to be a tree.

- A very important type of *āhāra* is the “food for *viññāṇa*.” When one is having bad thoughts about another person, that *viññāṇa* grows as long as one keeps thinking about that person and how bad he/she is. *Viññāṇa āhāra* are *mano sañcetanā*.

6. Another example of such a condition or *paccayā* is “*āsevana paccaya*.” *Āsevana* means to “associate with.”

- An important example is the association with bad friends. Whether it is a child or an adult, one’s behavior will be influenced by who one associates with; see, “[The Law of Attraction, Habits, Character \(Gathi\), and Cravings \(Āsavas\)](#).”
- I have discussed several such important conditions or *paccayā* in the post, “[Micchā Ditthi – Connection to Hetthu Phala \(Cause and Effect\)](#).” Here is that discourse:

[WebLink: Audio Desana: Episode 6 - Micchā Ditthi Connection to Hetthu Phala Cause and Effect](#)

There are 24 such conditions in *Paṭṭhāna Dhammā*. I will discuss them in detail in this subsection on “[Paṭṭhāna Dhammā](#)” in a series of posts.

- This is why mental phenomena are so complex. In many cases, a number of such conditions need to be satisfied for a cause (*hetthu*) to lead to a corresponding effect (*phala*).

7. In the same way, the *kammic* energies created by our actions do not disappear. A given action creates a *kamma* seed with energy to bring in its fruits. It is just like a seed waiting for right conditions to germinate and to bring in a tree to existence.

- Those *kamma* seeds or *kamma bīja* are out there waiting for suitable conditions to bring in their effect.
- **Whether they will bring *vipāka*, AND at what strength, AND when, will depend on the conditions or *paccaya*.** This is what is described by *paṭicca samuppāda* with the help of *paṭṭhāna dhammā*.

- See, "[What Does "Paccaya" Mean in Paticca Samuppāda?](#)", "[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)" and "[Namagotta, Bhava, Kamma Bīja, and Mano Thalaya \(Mind Plane\)](#)" for more details.

8. But there are some strong *kamma* that WILL bring in *vipāka* without exceptions. Those include *anantariya pāpa kamma*. They are so strong that they do not require conditions to be just right. They bring *vipāka* mostly at the dying moment, i.e., death of the physical body, and will not be delayed until the *cuti-paṭisandhi* moment; so the delay is only until death.

- Some people inherit wealth unexpectedly and some people die of accidents. These are also strong *kamma vipāka*, though as not strong as *anantariya pāpa kamma*.
- But in most cases, conditions or *paccaya* play major roles, sometimes many conditions need to be satisfied for *vipāka* to bear fruit.

9. This knowledge — or rather this understanding of — how *kamma* and *kamma vipāka* work — is called *kammassakatā sammā diṭṭhi* (is also the right view of *kamma* as one's property), and is a REQUIREMENT to attain **mundane sammā samādhi**. When one fully understands this, it will be easier to see that rebirth process has a logical foundation.

- This is because one can now clearly see that most of *kamma* or one's actions are going to have corresponding *vipāka* or results when suitable CONDITIONS appear.
- So, if one does actions suitable to be born in the *apāyā*, one COULD BE born in the *apāyā*, until one REMOVES the ability to for such CONDITIONS to appear.
- When one attains the *Sotāpanna* stage, the conditions suitable for a birth in the *apāyā* will never be realized. This requires another step BEYOND *kammassakatā sammā diṭṭhi*, which is the comprehension of *Tilakkhaṇa*.
- Therefore, getting to the *Sotāpanna* stage is a two-step process: first to get to *kammassakatā sammā diṭṭhi* and then the comprehension of *Tilakkhaṇa*.
- This is discussed in detail in the *desanā* in #6 above.

10. We see people doing immoral things without them being subjected to corresponding punishments, but that does not mean they are getting away with it. Those actions can bring their fruits in future lives if they are not realized in this life.

- There are two ways to overcome *kamma vipāka*. The first is: those *kamma* seeds will lose their energy with time; they can last at most 91 eons. They are like regular seeds, which lose their power over time.
- The other way is to attain all four stages of *Nibbāna* and remove the possibility of making conditions for ANY *kamma* seed to germinate.

11. These conditions or *paccayā*, play a critical role in *paticca samuppāda*. When we say "*avijjā paccayā saṅkhāra*," it means, "we do *saṅkhāra* with ignorance when necessary CONDITIONS are present."

- For example, we do not do immoral acts or *apuññabhi saṅkhāra* all the time. When we are attracted to, or repulsed by something that we see (this is an example of *arammana paccaya*), we may generate craving or dislike, and then it can lead to an immoral actions or *apuññabhi saṅkhāra*; see, "[What Does "Paccaya" Mean in Paticca Samuppāda?](#)"
- This is the reason why *kamma* itself is not deterministic. Just because one has *avijjā* does not mean one will necessarily do an immoral thing, generating (*apuññabhi*) *saṅkhāra*. If we cultivate *Satipaṭṭhāna*, even if we get the urge to do something immoral, we can contemplate on the bad consequences and stop that action, speech, or thoughts.
- When one keeps doing *Satipaṭṭhāna* — and keep avoiding immoral acts — one's *gathi* will change for the better, **and then even the automatic urge to do something immoral will gradually fade**. In other words, one's *avijjā* will reduce. This is why *Satipaṭṭhāna* is so important.

8.8.2 What Does “Paccayā” Mean in Paṭicca Samuppāda?

Revised April 27, 2016; August 25, 2019

Before we start discussing the various forms of *Paṭicca Samuppāda* (PS), it is essential to be clear about what is meant by “*paccayā*” (pronounced “pachchayā”). *Paṭṭhāna Dhamma* provides a complete description. We will introduce the concept here.

Introduction

1. The PS cycle starts as: “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana,.....*”

- And since PS describes the “cause and effect” in Buddha Dhamma, most people think “*avijjā paccayā saṅkhāra*” means “*avijjā* causes *saṅkhāra*” or “ignorance causes one to acts that generate bad *kamma*.”
- Even an ordinary person has *avijjā*, he/she will not ALWAYS act accordingly; most of the time, people act appropriately or morally. However, as long as *avijjā* is there, at times one WILL likely act with *avijjā* and do inappropriate or immoral things.
- Similarly, many people think that “*saṅkhāra paccayā viññāṇa*” means “*saṅkhāra* causes *viññāṇa*” or “bad *kamma* lead to corresponding consciousness”, and so on down the whole PS cycle.
- As we discuss below, the steps should be translated as, “with *avijjā* (ignorance) as **condition**, *saṅkhāra* arise”, “with *saṅkhāra* as **condition** *viññāṇa*, etc.

Key Role Of Conditions

2. It will clarify a lot of things down the line if one understood that PS does not refer to a “direct link” between causes and effects. Just because we have done many good/bad *kamma* (generated via *saṅkhāra*) DOES NOT mean they ALL lead to *kamma vipāka*.

- That was pointed out in item #5 in the previous post “[Paticca Samuppāda – Overview.](#)” But in case the point was missed, I wanted to emphasize the point in this post.
- Any effect **must have** a cause. But there can be possible causes without leading to any results. Otherwise, *Nibbāna* would not be possible. That needs some contemplation, and I will give some examples below.
- However, without suitable CONDITIONS, causes (*kamma*) cannot automatically bring results (*vipāka*).

3. The easiest way is to consider the following example: A seed contains necessary causes (ingredients) for bringing up a new tree. But just because a seed is there, a tree is not going to come to existence. If the seed is in a cool, dry place, one could keep it that way for a long time. Or one could burn or crush it, and it will not bring up a tree.

- SUITABLE CONDITIONS must be present for causes to bring about corresponding effects. That is what *paccayā* means.

- When such suitable conditions are present, causes WILL bring about corresponding effects. Thus when some effect is brought about, it is called “*paccuppanna*”, i.e., born (“*uppanna*”) via suitable conditions (“*paccayā*”); of course, if the root causes must be there, to begin with).
- In the above example, the seed could germinate and grow to a tree if one plants that seed (**cause**) in the ground and provides water, nutrients, and sunlight (**suitable conditions**).

Not All Kamma Lead to Kamma Vipāka

4. When causes are there, corresponding effects (results) are LIKELY if suitable conditions for the effects of taking place. **That is why kamma is not deterministic**; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).”

- However, the critical point in PS is that the effect – IF AND WHEN IT HAPPENS – is in accordance with the cause, and also the CONDITIONS was one’s choosing: “*Pati ichcha*” leads to “*sama uppāda*” or simply: “when one gets attached, that leads to a new birth of similar characteristics.” **If and when the causes bring forth the consequences, they will be of the similar nature.**

5. It is not necessary to get into further details unless one is interested in “digging deeper”, but there are 24 “*paccayā*” or “conditions” that can actually cause the effect to materialize; these are “*Paṭṭhāna Dhamma*”.

- Let us briefly discuss three such *paccayā*, “*hetu paccayā*”, “*anantara samanantara paccayā*”, and “*aññamañña paccayā*” to see what happens.

Three Important Conditions (*Paccayā*)

6. Nothing happens without a root cause or a *hetu* (pronounced “*hāthu*”; see the pronunciation key in “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#)”).

- For example, a bomb causes damage because of the explosives in it; but someone has to trigger it to go off. If the bomb sits somewhere for a long time, its propellants may degrade, and then the “cause” may disappear; most *kamma* seeds are like that too.
- Thus, without the root cause, there will not be an explosion. **That is “*hetu paccayā*.”**

7. My favorite example of the “*anantara samanantara paccayā*” is the germination of a seed that I discussed above in #3. Just because there is an apple seed, it will not cause an apple tree to appear.

- An apple seed will stay without germinating for many years in a cool, dry place. But if planted in the ground with water and sunlight present, it will sprout and give rise to an apple tree; see, “[Anantara and Samanantara Paccaya](#)” for details.
- Of course, just like with the bomb, if the apple seed sits there for too long, it may lose its potency and may not yield an apple tree at all. Thus the *hetu paccayā* must always be satisfied.

8. The third one, “*aññamañña paccayā*,” means dependent on each other: For example, *viññāṇa* and *nāmarūpa* depend on each other:

- It usually is stated that “*viññāṇa paccayā nāmarūpa*” or “depending on the *viññāṇa*, *nāmarūpa* arise.” For example, *viññāṇa* of the *cuti citta* at the moment of death causes a matching *nāmarūpa* to rise in the next birth: a hateful thought could lead to birth in the *niraya* or the animal realm.
- However, *viññāṇa* in turn, depends on the type of *nāmarūpa*: with the *nāmarūpa* of an animal, it is not possible to get into *jhāna*. Only certain types of *nāmarūpa* can “support” certain types of *viññāṇa*.
- Depending on the situations one or more of 24 *paccayā* (or conditions) can simultaneously come into play. We will discuss this in future posts.

Paṭṭhāna Dhamma

9. I just wanted to give a brief introduction to the complex “*Paṭṭhāna Dhamma*” which describes 24 such “*paccayā*” involved in *Paṭicca Samuppāda*. In other words, cause(s) and effect(s) have complicated relationships. We can only discern significant relationships. Only a Buddha can sort out all such complexities.

- But there is no need to analyze everything in great detail to understand the message of the Buddha. One can become a *Sotāpanna* just by comprehending the *Tilakkhaṇa: anicca, dukkha, anatta*.

10. So why am I also providing information on these complex topics? It is for three reasons:

- First, it helps build *saddhā* (faith) in Buddha Dhamma. Anyone who takes time to examine these concepts can see that it provides a COMPLETE explanation for everything that we experience and more.
- Secondly, it is intellectually satisfying to see how all pieces nicely fit into the “big picture”: I hope I have been able to give the sense of joy that I have experienced in “seeing how these pieces fall into place.”
- Finally, this “self-consistency” is critical in the process of sorting out which version of Buddha Dhamma is the correct one. As the Buddha himself pointed out, any version that is not self-consistent should be discarded; see, “[Saddharma Pundarika Sutra \(Lotus Sutra\) – A Focused Analysis](#).”

Next in the series, “[Anantara and Samanantara Paccaya](#)”, ..

8.8.3 Anantara and Samanantara Paccayā

Revised February 12, 2020

Critical Roles of Causes (*Hetu*) and Conditions (*Paccayā*)

1. An action or a deed is a *kamma*. Its result is the *kamma vipāka*. That *kamma* was done with an intention, and that intention is the cause (*hetu*) for the corresponding effect (*vipāka*.)

- Thus, any *vipāka* **must have** a reason or a cause (*hetu*). But there can be possible causes without leading to any results. Conditions (*paccayā*) must be there for such *vipāka* to materialize.

2. The easiest way is to consider the following example: A seed contains necessary causes (ingredients) for bringing up a new tree. But just because a seed is there, a tree is not going to come to existence. If the seed is in a cool, dry place, one could keep it that way for a long time. Or one could burn or crush it, and it will not bring up a tree.

- SUITABLE CONDITIONS must be present for causes to bring about corresponding effects. That is what *paccayā* means.
- When such suitable conditions are present, causes WILL bring about corresponding effects. Thus when some result comes about, it is called “*paccuppanna*”, i.e., born (“*uppanna*”) via suitable conditions (“*paccayā*”). Of course, if the root causes must be there, to begin with).
- In the above example, the seed could germinate and grow to a tree if one plants that seed (cause) in the ground and provides water, nutrients, and sunlight (suitable conditions).

All *Kamma* Do Not Lead to *Vipāka*

3. That is the reason why *kamma* is not deterministic. In the post, “[What is Kamma? – Is Everything Determined by Kamma?](#)” I mentioned this fact, and here we will see the reason for it.

- When we commit a good or a evil deed, the *kammic* potential or energy associated with that deed is deposits in a *kamma bīja* or a *kamma* seed. We will eventually get to the question of “where it is stored”, but we just need to keep in mind that a *kamma* seed is not a physical seed, but is an energy or a potential. This concept is described in the post, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”

- The germination of a *kamma* seed, though, has some similarities to the germination of a physical seed, for example, an apple seed. The apple seed has the potential to bring about an apple tree. Still, the seed will not germinate until suitable conditions for germination are present. The seed needs to be in soil, and water and sunlight need to be provided for germination to take place.
- In the same way, *kamma vipāka* (the result of a past *kamma*) can come to fruition only with the right conditions for the corresponding *kamma* seed to germinate.

***Anantara* and *Samanantara* Relations**

4. Let us look at the *anantara* and *samanantara* relations as discussed in the *Paṭṭhāna* Dhamma (book on “Conditional Relations” in Abhidhamma): [*anantara* : [adj.] next; adjoining; immediately following. *samanantara* : [adj.] immediate; nearest.]

- “*An*” means food or in this case the *kamma* seed; “*antara*” means in storage, waiting to bear fruit.
- Thus, *anantara* means basically a *kamma* seed waiting to be germinated.
- “*Sama*” means equal or similar. Thus *samanantara* (“*sama*” + “*anantara*”) means “matching conditions” with the *antara*.
- Therefore, *anantara* and *samanantara* go together. There must be an *anantara* (basically a cause or stored energy in a seed) for a *samanantara* to be effective. On the other hand, if *samanantara* (right conditions for that cause to take effect or for the seed to germinate) is not there, a *kamma* seed at *anantara* cannot bear fruit.
- By the way, *ānantara* (as in *ānantariya kamma*) means something entirely different; see, “[Ānantariya Kamma – Connection to Gandhabba.](#)”

Some Analogies/Examples

5. Here is one example the Buddha gave: If one prepares a plot by preparing the soil, providing water, and if sunlight is also available, the *samanantara* for a seed to germinate is there. However, unless one starts with an apple seed (*anantara* condition not met), an apple tree will not grow.

- On the other hand, if one keeps the apple seed in a cool, dry place, it will not germinate, i.e., the *samanantara* condition not met.
- Results appear when both *anantara* and *samanantara* conditions are met. Thus, when one plants an apple seed in a suitable plot, it will germinate and become an apple tree.
- However, a mango tree will not result from an apple seed. Thus *samanantara* will give rise to a result matching the “seed” that was in *anantara*.

6. More examples can be given these days that are related to modern technology. If a radio station is broadcasting a radio program, that is the *anantara*. The seed energy is available anywhere within a certain range. But one cannot listen to the program without a radio. Even if someone has a radio, one cannot listen to the program unless the receiver is “tuned” to the correct frequency. When those conditions are met, one could hear the program even many miles away.

- *Kamma vipāka* can bring results via “instant communication” when the conditions become right. All kammic potentials are in “instant contact” with us via a concept similar to that described in quantum entanglement: see, “[Quantum Entanglement – We Are All Connected.](#)” Thus all potential *kamma* seeds are waiting in *anantara* and can bring about instant results when the right conditions (*samanantara*) appear.

Many Bad *Vipāka* Can be Avoided by Being Mindful

7. **By being mindful, we can avoid many past bad *kamma* seeds from coming to fruition.** We make sure that *samanantara* conditions are not present. If one goes out at night in a bad neighborhood that is providing fertile ground for a past bad *kamma* seed to germinate and the *kamma vipāka* to take place.

- In the same way, we can force “good” *kamma* seeds to germinate by providing the right conditions. For example, even if we have enough merits (i.e., a good *kamma* seed) that could make us pass a test or get a job unless we make the right conditions (i.e., prepare in advance), we may not get the results.
- But sometimes one gets an unexpected promotion or gets better results than anticipated in a test if the *kamma* seeds are potent.

8. From our past innumerable lives, we have accumulated countless *kamma* seeds, both good and bad. Some of the stronger ones bear fruit no matter what we do, especially the *ānantariya kamma vipāka*.

- But in general, by being mindful (i.e., by NOT providing appropriate conditions), we can avoid many bad *kamma vipāka*. By making the right preparations (i.e., by optimizing *samanantara* conditions), we can exploit those good *kamma* seeds.
- A particularly important case is the bringing up a child. The parents and teachers have considerable responsibility for providing the right conditions for that young mind to develop. In particular, association with bad friends can direct a young life in the wrong direction; in the same way, association with good friends, a nurturing environment, can bring about a productive, responsible adult.

Importance of Cultivating Good *Gati* (Habits/Character)

9. One important cross-connection is matching “*gati*” with similar “*gati*” that we have discussed before; see, “[Habits and Goals](#)”, and “[Sansāric Habits and Āsavas](#).”

- For example, when a *gandhabba* is waiting for a suitable womb, the *anantara-samanantara paccayā* comes into play. A *gandhabba*, who in the previous lives had developed a particular habit, say heavy drinking, is attracted to a womb of a woman with similar habits, possibly an alcoholic or a drug user. The concept of a *gandhabba* is in, “[Manomaya Kāya and Physical Body](#),” and “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”
- Similarly, a *gandhabba*, who in previous lives led moral lives, is bound to be attracted to a womb of the mother in a “good” family. Just like in the above case, here also the *samanantara* for the *gandhabba* (where it can establish itself) is an environment that matches its own “*gati*.”
- However, no matter how one is born, one can still change one’s own destiny by making conditions for other good *kamma vipāka* to come to fruition and also by making sure not to make conditions for bad *kamma vipāka* to come to fruition.

In other posts, we will discuss further applications of *anantara-samanantara* relations. One important discussed in, “[Transfer of Merits \(Pattidana\)- How does it Happen?](#).”

Next, “[Āsevana and Aññamañña Paccayā](#)”,

8.8.4 Āsevana and Aññamañña Paccayā

November 20, 2016; revised July 1, 2019 (comment added at the end)

1. As mentioned in the “[Paṭṭhāna Dhammā – Connection to Cause and Effect \(Hetu Phala\)](#),” there are 24 *paccayā* or conditions that contribute to various steps in the *Paṭicca Samuppāda* (PS) cycles.

- As we have discussed in the post “[What Does “Paccaya” Mean in Paticca Samuppāda?](#)” and in the above mentioned post, a given step in a PS cycle **cannot proceed** until one or more conditions are satisfied. **And we have control over most of these conditions.** Therein lies the value of *Paṭṭhāna Dhammā*; **we can see how to stop *akusala-mūla* PS cycles from proceeding, and to maintain *kusala-mūla* PS cycles.**

- In this post we will discuss two of those 24 *paccayā* or conditions. They are somewhat related to each other and thus are suitable to be discussed together.

2. *Āsevana paccayā* — which can be loosely translated as the “condition of association” — is an important condition that fuels various steps in PS at different times.

- I see that in most cases, *āsevana paccayā* has been translated as “condition of repetition.” Even though repetition is relevant, repetition comes via close associations, so association is primary.
- The word “*āsevana*” comes from “*ā*” and “*sevana*” or “came to the shade”; when one is staying close to a tree in the hot sun, one is “hanging around” the tree and is benefited from its cool shade.
- Of course, when one is associating bad friends, one can be influenced in the wrong direction too, as we will see below. Therefore, *āsevana paccayā* comes into play in both *kusala-mūla* and *akusala-mūla* PS.
- When one likes the experience, one tends to keep that association. Sometimes that eventually leads to bad consequences, but because of the ignorance of such bad outcomes, one still tends to keep bad associations.

3. An important role of *āsevana paccayā* is played in the “*viññāṇa paccayā nāmarūpa*” step in PS, whether it is *kusala-mūla* PS or *akusala-mūla* PS.

- For example, a teenager who is (unknowingly) cultivating a *viññāṇa* for drinking is heavily influenced by the association with bad friends. He likes to “hang out” with such bad friends and tends to generate a lot of *sankalapanā* or *vacī saṅkhāra* (conscious thinking about how he/she will be having a good time with those friends in parties with lot of alcohol). The *nāmarūpa* generated in his mind are such “party scenes”, visualizing those friends as well as various favorite drinks.
- On the other hand, when one is on the right path, one is constantly thinking about Dhamma Concepts, having Dhamma discussions with good friends, and visualizing such gatherings. Or one could be visualizing some meritorious deeds, like giving or helping out at an orphanage; these are good *nāmarūpa* generated with such a good *viññāṇa*.
- These *nāmarūpa* are different from the *nāmarūpa* that descends to a womb at the *okkanti* moment, i.e., when a *gandhabba* enters a womb. We will discuss that later. **So, *nāmarūpa* come in two main categories.**

4. *Āsevana paccayā* can play a role under different types of situations. Let us consider two such examples.

- One such situation is the teenager mentioned above, who cultivates bad *nāmarūpa* by associating with bad friends. The more he/she associates with such bad friends, the more he/she will be generating bad *nāmarūpa* of party scenes with lot of alcohol and/or drugs. Not only that, there will be other associated *nāmarūpa*: He/she will be constantly visualizing favorite friends, gathering places, appropriate music, etc. too.
- In such an environment, it is also easy to cultivate other types of “bad *nāmarūpa*” such as gambling, illicit sex, stealing (to sustain those activities), violence and even killings.
- Such *nāmarūpa* and more could be cultivated by the teenager over time.

5. On the other hand, when one is on either mundane or *lokuttara* Eightfold Path, one will be cultivating “good *viññāṇa*” and one tends to visualize exactly opposite types *nāmarūpa*.

- One could be planning a Dhamma discussion and could be thinking and visualizing who will be there and what kind of topics will be discussed. One could be organizing a charity event and making arrangements.
- One could be planning to attend a meditation retreat and visualizing what kind of activities one could be engaging in. One could be even thinking about and trying to visualize the suffering endured by poor children in a situation one is familiar with and generating compassion-filled thoughts and *nāmarūpa*.

6. In either case, “*nāmarūpa paccayā saḷāyatana*” step will then point one’s all six *āyatana* or *saḷāyatana* (five physical senses and the mind) towards such thoughts, visuals, and actions.

- Then those associations will become even stronger. When one gets totally absorbed in relevant activities, when one’s mind is occupied with such thoughts, and when one is constantly visualizing related activities, people, and objects, those *nāmarūpa* will “grow” in one’s mind. Those *nāmarūpa* will be closely associated with one’s *gathi*.
- This is also discussed in the post: [“The Law of Attraction, Habits, Character \(Gathi\), and Cravings \(Āsavas\).”](#)

7. Another important application of the *asevana paccayā* occurs in a *citta vīthi* itself. When we are generating *sankalpana* (or *sankappa*), we are generating an enormous number of *citta vīthi* in a short time. Each *citta vīthi* will make the next *citta vīthi* stronger (actually make the *javana citta* in the subsequent *citta vīthi* stronger) by association.

- The best example is one we have talked about several times in the “[Living Dhamma](#)” section. When we start thinking about an enemy, we start visualizing more and more bad situations that we encountered with that person; we tend to pull out all “past associations” from memory, as well as conjure up “many possible future scenarios” in our minds.
- All these “bad *sankalpana*” or “conscious bad thoughts” will strengthen the PS steps.
- Our minds can run wild if not controlled with *Satipaṭṭhāna* or *Ānāpāna*; see, [“Satipaṭṭhāna Sutta – Relevance to Suffering in This Life.”](#)

8. Even in a given *citta vīthi*, each *javana citta* is strengthened by the previous *javana citta*, via *asevana paccayā*. this happens in the time scale of billionth of a second and is driven by our *gathi*.

- The first *javana citta* is weak. But the second *javana citta* gets fuel from the first one, and is inevitably generating strength via association. One meaning of the name *javana* is “to run with.” The series of 7 *javanas* “run with the object in mind”, initially getting stronger until the fifth *javana*. Then the fuel runs out and the sixth and seventh *javana* become weaker and weaker.
- *Kamma* generated by the first *javana citta* can only bring *vipāka* in this life. But *kamma* done by the second through the sixth *javana citta* (which get stronger by association), are potent enough to bring *kamma vipāka* in many future lives. When the *javana* get weaker, the seventh *javana* can bring *vipāka* only in the next life, and will become null if it did not bring *vipāka* in the next life.
- It is not necessary to learn the complexities of *citta vīthi*, but it is good to have some idea.

9. The association then moves to the next *citta vīthi*. Thus the subsequent *citta vīthi* (and thus the *javana citta* in that *citta vīthi*) will be stronger. And thus it propagates and this is why one can get “really worked up” even thinking about a hated person.

- This is why *Satipaṭṭhāna* (and being mindful of bad thoughts) is so important. The start of such a hateful mindset is AUTOMATIC (and is due to our *gathi*) as discussed in the “[Living Dhamma](#)” section. But we have the ability to stop those initial thoughts BEFORE they get strong and become out of control.
- This can be compared to a seed giving rise to a mighty tree, unless one destroys it when it is just a little bud. When a seed germinates and becomes visible as a little plant, it can be easily broken. But if one waits and allows it to grow, it COULD grow to be a strong tree that is hard to take down.

10. As we can see, *paṭṭhāna dhammā* can go to very fine details. This is why *paṭicca samuppāda* has been compared to an ocean. It is vast, and can explain the arising of ANY *SANKATA* (whether live or inert) in this world.

- However, if we start digging deeper, that could become a waste of time since there is no ending as to how much finer detail one wants to examine.

- Still, it is good to see the depth of Buddha Dhamma. It gives one confidence in following the Path. Unshakable faith comes by realizing that Buddha Dhamma describes our world as it is.

11. Now let us briefly discuss the *aññamañña paccayā*, usually translated as “mutuality condition.” This is not a bad translation, but it could be also translated as “forward and backward condition.”

- Many of the steps in the PS cycle, go backward as well as forward. For example, the step we have discussed, “*viññāṇa paccayā nāmarūpa*” runs backwards (in the same PS cycle) too.
- Therefore, while *nāmarūpa* are generated AND get stronger by a given *viññāṇa*, the *viññāṇa* itself gets stronger by the cultivation of *nāmarūpa*, i.e., “*nāmarūpa paccayā viññāṇa*” step runs simultaneously too. This is the “mutual strengthening.”
- In the example of the teenager, cultivation of those bad *nāmarūpa* (visuals of party scenes, bad friends etc) leads to the strengthening of that bad *viññāṇa* (desire to drink or take drugs), even though the bad *viññāṇa* first led to corresponding *nāmarūpa*.

12. The *aññamañña paccayā* — just like the *āsevana paccayā* — is highly effective in the first several steps in PS. While “*avijjā paccayā saṅkhāra*” step initiates bad actions (or *saṅkhāra*), the continued actions in the same direction then lead to strengthening *avijjā* (or ignorance of the consequences of such actions), i.e., “*saṅkhāra paccayā avijjā*.”

- This is why it is very important to stop such conscious *saṅkhāra* (especially *sankalapanā* or the first part of *vacī saṅkhāra*), when one realizes that one is getting into the wrong track. Otherwise, one’s *avijjā* will grow and one’s bad *gathi* will only grow.
- Such immoral *saṅkhāra* — in the form of *vacī saṅkhāra* — appear to provide us with a sense of satisfaction at that time. For example, when one gets “really worked up” thinking about a bad deed done by an enemy, it gives one pleasure to say bad things about that person to others, or even retaliate directly to that person.

13. However, such actions actually lead to a “heat” or “*tāpa*” in us in the longer term. Long after that “initial satisfaction” of putting down that person, one will be “burning inside” for long times, even if one does not realize that. One will be prone to frequent outbursts even with other people.

- Removal of this *tāpa* or “fire” in us is what is meant by the phrase “*ātāpi sampajano*” in the *Satipaṭṭhāna Sutta*. That will help reduce our tendency to get “worked up” at the slightest provocation, i.e., to change our *gati* in the right direction.
- This is the first type of suffering that many of us don’t even realize; see, “[Suffering in This Life – Role of Mental Impurities](#)” and other posts in “[Living Dhamma](#).”

14. Finally, the *aññamañña paccayā* is not operative starting at the “*saḷāyatana paccayā phassa*” step in the *paṭicca samuppāda*.

- We can clearly see that “*phassa* cannot lead to *saḷāyatana*,” “*vedanā* cannot lead to *phassa*,” etc.

July 1, 2019: Regarding #2 above, it is important to note that *āsevana* is different from *asevana*.

- *Sevana* is association. *Āsevana* (Ā + sevana) is “came to associate with”(as discussed in #5 above).
- *Asevana* (A + sevana) is “not to associate with”, the negation; see #5 of “[Associations \(Sevana\) – A Root Cause of Wrong Views..](#)”

It is very important to see the difference, which illustrates how Pāli words combine (*sandhi*) to produce other words with very different meanings. Thanks to Tobias Große for bringing this distinction to our attention at the discussion forum today.

9.1.1 What is Intention in Kamma?

This is an old post; revised February 21, 2018

1. Here is an email that I received in early September, 2015 (I am just showing the relevant part of the email):

"You mention several times that one should be very careful not to offend anyone as one could insult a *Sotāpanna* and gather a big amount of bad *Kamma*. *Kamma* it is created based on ones mind. Act and speak with a pure mind and no bad *Kamma* will arise. Act and speak with an evil mind and bad *Kamma* will arise.

Offending a *Sotāpanna* is no more an evil act than offending an ant if your mind state is the same, thus if one does not know that a human being is enlightened it will not result in a different *Kamma*.

What makes offending an enlightened being so much worse is the fact that it requires a very perverted mind state to act evil towards some like that. I like to compare it with being angry at kittens :-)

I had the feeling that you might have a misunderstanding regarding this topic. **It sounded as if you can 'accidentally' gather bad *Kamma*,** which is not correct in my opinion."

- In the above comment, emphasize in bold is mine to indicate each key point. I think what is meant by that first statement is that having adverse thoughts is the bad thing and it does not matter to whom it was directed.
- The second point is that if one doesn't know the status of the person (or being) it was directed to, then one must not be responsible for the *kamma*.

2. I am sure many others had similar thoughts on this or somewhat related issues, so I wanted to share the reply with everyone. By the way, we have a new discussion forum (since December 2017) to discuss such questions; see, "[WebLink: Forum](#)."

- **Figuring out how *kamma* works (with certainty) can be done by only a Buddha.** This is one of those things that are discernible only to a Buddha. But as I have pointed out before, we can figure out some general trends that are compatible with the laws that the Buddha has clearly stated; see, "[What is Kamma? – Is Everything Determined by Kamma?](#)." Here we analyze in a bit more depth.

3. **There are two key factors to be remembered in evaluating how to assess a *kamma vipāka*:**

1. **Which of the *dasa akusala* is the intention?** For example, it could be taking a life, stealing, or harsh speech. Who is affected is not involved in this step. That is the "*cetana*" in "*cetana ham bhikkhave kamman vadami*", is just which *dasa akusala* is in one's mind; that is all.

2. Then the **strength of the *kamma vipāka* is based on the “level of consciousness” or “qualities” of the living beings affected** by that *kamma*. For example, killing a human will bring stronger *kamma vipāka* than killing an animal.
- That is the clearest way to analyze any given situation.
4. For example, in the recent second *desanās* on *Tilakkhaṇa*, I discussed the case of a person killing a bunch of people with a bomb; see Discourse 2 in [“Three Marks of Existence – English Discourses.”](#)
- His intention (*cetana*) was to kill. Thus the *dasa akusala* involved is “*panatipata*”, that of taking a life.
 - Now to the second step. He may not even know who was killed. By some coincidence if a parent of the killer was killed by the bomb, then he would have done an *anantariya papa kamma*. If an *Arahant* was killed, the same. If a *Sotāpanna* was killed, then it would not be a *anantariya kamma*, but still equivalent to killing thousands of normal humans.
 - So, it is important to understand that “*cetana*” is which of *dasa sakusala* are in one’s mind when a *kamma* is committed. It could be more than one. In the case of the bomber, there is *micchā diṭṭhi*, and likely greed also, in addition to “*panatipata*.”
 - One can analyze various situations with the above two steps.
5. We know that there are five *anantariya kamma*, which are so grave that one will be subjected to their *vipāka* in the very next life in the *niraya* (lowest realm): Killing one’s mother, Killing one’s father, Killing an *Arahant*, and injuring a Buddha (it is not possible for anyone to take the life of a Buddha), and causing schism in the *Saṅgha* (which really means trying to propagate a wrong version of the Buddha Dhamma).
- Since killing a normal human is not an *anantariya kamma*, it is clear that the “strength of the *kamma*” depends on who is being killed.
 - *Kamma vipāka* for committing any other offense, is similar. Hurting an *Arahant* would be million -fold grave compared to hurting a normal human. Thus, logically, hurting an *Anāgāmī*, a *Sakadāgāmī*, a *Sotāpanna* would have corresponding levels of consequences.
 - The “value of a life” depends on the “mental status” of that lifeform. Any life is not the same. This is why it is not possible to compare the life of an animal with that of a human; even among animals there are huge variations, and we can easily see that a gorilla or a dog is “more sentient” than a worm.
 - However, we must keep in mind that we all had been born a lowly worm; so even though we need to keep in mind that there is a variation, we should never take the life of ANY sentient being intentionally (unnecessarily).
6. Regarding the issue of “how would one know” the status of the living being who is affected by one’s actions, the “nature” would know.
- This point of “we are all inter-connected” is now proven by quantum mechanics: [“Quantum Entanglement – We Are All Connected.”](#)
 - This is a key factor in understanding *kamma/vipāka*, and is my next project. I believe that quantum mechanics can show this at an even deeper level.
7. Let us consider some prominent examples from the *Tipiṭaka*.
- It is clearly stated that the reason ascetic Siddhartha had to strive for 6 years and undergo such hardships to attain the Buddhahood is that he had said some insulting things regarding the Buddha Kassapa in a previous life. At that time, Siddhartha was a wealthy person by the name Jotipala, and had a friend called Gatikara who listened to *desanās* from Buddha Kassapa and became an *Anāgāmī*. Gatikara tried to persuade Jotipala to go and listen to Buddha Kassapa, but Jotipala kept refusing, saying “I do not want to go and listen to the bald-headed monk.”

- That was the *kamma* that forced ascetic Siddhartha to undergo such hardships before attaining the Buddhahood. This is a very clear example that one DOES NOT NEED TO KNOW that one is insulting a Buddha to accumulate the corresponding *kamma vipāka*.
- In fact, there are 11 more such *kamma vipāka* that brought about adverse effects to the Buddha Gotama even after attaining the Buddhahood. Three of those were for bad *kamma* committed against **Pacceka Buddhas**. It is especially not possible to recognize a **Pacceka Buddha** as such, because they appear during times when a **Sammā Sambuddha** (like Buddha Gotama) is not present, and they cannot teach Dhamma to others.
- Therefore, NOT KNOWING the status of the person (or the being) against whom the wrong act was done DOES NOT come into play. These are not rules made up by the Buddha; Buddha himself was not immune from those laws. *Kammic* laws are natural laws, just like laws of gravity; a Buddha just discovers them.

8. So, I hope the questions of the reader were addressed in the above. Another important thing to realize is that any *akusala kamma* involves **just one or more of the ten defilements (*dasa akusala*)**. **That is all**. And the severity of the *kamma vipāka* depends on the “status of the victim” and not knowing that status is not an excuse. We will discuss this in a bit more detail below.

9. To do that, let us look at the “intention” part a bit more carefully. First let us see the key factors involved in committing an *akusala kamma*.

- Any *akusala kamma* results from INTENDING TO DO one or more of the *dasa akusala*.
- A given *akusala kamma* has several stages (each has a different number of steps). For example, in the case of taking a life, the following are the four steps: there must be a living being, one must know that it is alive and one must have the intention to kill that being, one plans and carries out the necessary actions to kill, and finally the living being ends up dead. If all necessary steps are completed, then it is called a *kamma patha*.
- As the number of completed steps keep increasing, the severity of the *vipāka* will increase; when all are complete and a *kamma patha* is done, the *kamma vipāka* will be strongest possible.

10. Let us take as example the case of killing a human being. Now we have to combine the two effects in #3 and #4 above in order to assess the strength of the *kamma vipāka*.

- The human being in question could be a normal human or a Noble person, say an *Arahant*. **There is no way for the killer to know whether the victim is an *Arahant***. Thus the resulting *kamma vipāka* could be quite different depending on the “status of the victim” and the killer may even not know the severity of the crime committed.
- Now, suppose the killer went through the first four steps, but the victim survived. Now the killer will not face an *anantariya kamma* because he/she merely injured an *Arahant* even though the intention was to kill. Still, the strength of the *kamma vipāka* will be much higher compared to injuring a normal human.
- *Kamma vipāka* are based on natural laws. Their enforcement is automatic. Just like gravity operates regardless of the person involved, so do *kamma vipāka*.

11. **Therefore, the above analysis can be used in any given case to get an idea of the strength of the *kamma vipāka* for a given offense.** To summarize:

- The “intention” is one (or more) of the *dasa akusala*.
- The weight of *kamma* depends on the “mental status” of the victim, REGARDLESS of whether the person committing the *kamma* knew about that “mental status.”
- The weight of the *kamma* also depends on how many of the necessary steps were actually completed. **Just having an intention is not enough to yield the full impact.**

12. To further clarify the mechanisms, let us consider another example. Suppose person X detects a person moving around in X's house at night. Thinking it is an intruder, and INTENDING TO KILL the intruder, X shoots and kills "the intruder." And then X finds out that it is X's own father.

- The intention was to kill (one of the *dasa akusala*), and the victim turned out to be X's own father. Thus even though X did not intend to kill his father, X has now acquired an *anantariya kamma*.

13. In another twist, let us say that X was on the roof of his house repairing it, and he threw something heavy from the roof without realizing that his father was right below the roof on the ground. And the father got hit and was killed.

- **Here, there was no intention of killing a living being.** Thus even though the action resulted in the father's death, not even an *akusala kamma* was committed let alone an *anantariya kamma*.

14. This is why we have to be careful in analyzing some cases.

- When we encounter someone anywhere, just by looking at him/her, we cannot say whether he/she is a Noble person or not.
- But we can definitely see the difference between an animal and a human being. A human life has much more worth than any animal life; it is extremely difficult to get a "human *bhava*."
- Even among the animals, we can see that some animals are "more sentient" than others, even though there are no clear guidelines.
- However, one definitely does not need to worry about "accidental killings" of insects, for example, who may get crushed under one's feet as one walks around.

15. Going back to another statement in the comment of the reader: "...What makes offending an enlightened being so much worse is the fact that it requires a very perverted mind state to act evil towards someone like that."

- The problem is that most times we do not know whether a given person is a *Sotāpanna* or not. **And most people may not have even heard "who a *Sotāpanna* is".**
- Yet, the consequences will be the same whether one knew or not.

16. Please let me know if anyone has further questions related to this issue, or any other relevant specific case that is still not resolved. I can revise the post to add more details or try to address any other "tricky cases" if needed. **In the following I am going to discuss the "intention" issue in a bit more depth for the benefit of those who like to dig deeper.**

- The Buddha said, "*cetana ham Bhikkave kamman vadami*." Thus, what determines the type of *kamma* is the *cetana*. So, we need to look at the *cetana cetasika* carefully.
- *Cetana* is translated sometimes as "intention" and other times as "volition". It is hard to distinguish the difference between the two; volition seems to incorporate "more personal attributes" and thus may be better. **But neither is really a correct translation for *cetana*.**
- As I point out below, *cetana* is not "intention" in the sense that it is not the *cetana cetasika* that determines the nature of a *citta*. ***Cetana* combines the cumulative effect of many *cetasika* that come into play.** This is why sometimes it is best to keep the Pāli terms and understand their meanings.

17. I have introduced *cetasika* in "[Cetasika \(Mental Factors\)](#)," and have discussed some aspects of them in the "[Citta and Cetasika](#)" section.

- Thus *cetana*, which is one of the seven universal *cetasika*, is in each and every *citta*, even though we do not "intend to do something" with all *citta*. As briefly pointed in "[Cetasika \(Mental Factors\)](#)," *cetana* is the *cetasika* that "puts together the relevant *cetasika* into a given *citta*." This is also discussed in "[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#)."

- The “intention” is one of the *dasa akusala* in the case of an *akusala kamma*. That intention arises BECAUSE OF one’s *gathi* with certain set of *cetasika* being dominant.
- For *akusala kamma*, *moha* (ignorance) and three other *cetasika*, *Ahirika* (shamelessness), *Anottapa* (fearlessness in wrong), and *uddhacca* (restlessness or agitation) are always there, because they are the “four universals” for any *akusala citta*.
- But the presence of other “*akusala cetasika*” like *lobha*, *diṭṭhi*, *vicikicchā*, etc depends on the situation and the person committing the act; see, “[Cetasika – Connection to Gathi](#).” For example, one may lie about something because of greed (*lobha*); another person may tell the same lie because of hate (*dosa*); the consequences are worse for the latter.
- Intention is to commit one (or more) of the *dasa akusala*. Thus *cetana* is not “intention” per se; it is deeper. It also depends on how that determination came about. When the Buddha said, “*cetana ham Bhikkave kamman vadami*,” that is what he meant: **How that particular intention came about depends on the set of relevant bad *cetasika*.**
- For *kusala kamma* it works the same way. Here the “intention” is to commit one or more *kusala kamma*, and here a set of moral (or *sobhana*) *cetasika* come into play.

18. Thus we can keep digging deeper to get a more deeper understanding. But please do not get discouraged if you do not understand all the details. It takes time, as I know by experience.

- The more one thinks about a concept, one realizes that there could be multiple ways to look at it. That does not lead to confusion, but to more clarity. This is the power of pure Dhamma.
- There are many things to contemplate on this issue, even without getting into *Abhidhamma*. This is what real “*bhāvanā*” is, especially leading to the *Sotāpanna* stage.

This issue is being discussed at the discussion forum at, “[WebLink: Adding Kamma vs. Receiving Vipāka](#)” and “[WebLink: Clarification of definition – “Anantariya”](#).”

9.1.2 Would Nibbana be Possible if Impermanence is the Cause of Suffering?

1. I recently received a very insightful email from Mr. Lance Potter. Before getting to his email, let me provide some background (Of course I would give the name of the commenter only with his/her consent).

- He was commenting about the post, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#)”. In that post, I discussed briefly a phrase from the *Ajjhattanica Sutta*:

“*yadaniccā tan dukkham, tan dukkham tadanatta*”

- This phrase is translated in most current Theravāda literature (including the Sinhala translation of the *Tiṭṭaka*; see, *Samyutta Nikāya* – 3, p. 3 of the Pāli/Sinhala *Tiṭṭaka*) as:

“if something is impermanent, suffering arises, therefore ‘no-self’”

- In that post, I discussed some inconsistencies arising due to such a translation. I also pointed out that the phrase is consistent if one takes the correct interpretations of *anicca* and *anatta*, i.e., “that one cannot maintain anything to one’s satisfaction in the long run” and “(therefore) one is truly helpless in this rebirth process”.

2. Let me quote the relevant text from his email:

“The line of reasoning that says that *anicca* means simply impermanence and that impermanence leads to *dukkha* seems weak to me. The weakness lies in an apparent missing link. Logically, there must be an intervening link, a necessary link, between impermanence and *dukkha*. That link would be the actual cause of *dukkha*. **If the cause of *dukkha* were simply impermanence, then no one who awakened, not even Buddha himself, would experience a reduction of *dukkha*.** This is because the condition of impermanence

in *samsāra* remains unchanged whether one is awakened or not. In awakening, what changes is attachment to impermanent conditions of *samsāra*, not impermanent conditions themselves.

Put another way, one could say that if *anicca* means simply impermanence while ignoring the link between them, then Buddha's awakening and his subsequent reduction of *dukkha* would mean that impermanence as a condition of *samsāra* was reduced. Everyone would have experienced simultaneously a sudden change in the condition of impermanence affecting them.

It was only Buddha's relationship to impermanence that changed, not impermanence itself. Or, as you say, **his perception of the consequences of seeking happiness in impermanent things.**"

(Highlighting is mine).

3. That is a very insightful comment and I wanted to share that reasoning with others. This is what happens when one does the correct "*vipassana*" or "insight meditation". As one thinks deeply about the Buddha Dhamma, one can start seeing any problems in the interpretations.

- What Lance was pointing out was that since modern science has clearly illustrated that "impermanence" is an INHERENT CHARACTERISTIC of the universe that we live in, there is no possible way to "get rid of impermanence" in order to remove suffering and thus attain *Nibbāna* (that is, if one takes "impermanence" as the translation of *anicca*).

4. To emphasize that point, we need to remember that whole worlds like our Solar system are completely destroyed and re-formed every few billion years. Furthermore, "impermanence" and incessant change are inherent in anything in our universe as stated by the Second Law of Thermodynamics; see, "[Second Law of Thermodynamics is Part of Anicca!](#)."

- Therefore, if *dukkha* arises because of the "impermanence", AND since we need to remove that root cause of "impermanence" in order to avoid future suffering (*dukkha*) from arising, that would be an impossible task. **Impermanence associated with anything material CANNOT be avoided, let alone removed, according to modern science.**

5. I would like to again emphasize that impermanence is a word associated with PHYSICAL OBJECTS. Such physical objects CANNOT give us suffering. What gives us suffering is OUR CRAVING (or "icca") for such objects; this is called *nicca saññā*. In a world that is "*anicca*," we have the wrong PERCEPTION of *nicca saññā*; see, "[Anicca – True Meaning](#)."

- Note that *icca* is pronounced "ichchā", *nicca* is pronounced "nichchā" and *anicca* is pronounced "anichchā".
- If a house is destroyed by fire, who suffers? Only the owner of the house, who has an attachment to it; it does not cause suffering to others. If it was a run down house, even the owner may not suffer much because his/her attachment to that house would be less. The more attachment we have for something, our suffering would be greater if it is lost or damaged. **This is a simple observation, but has profound implications.**

6. *Dukkha Sacca* means that *dukkha* can be removed. *Dukkha* in "*Dukkha Sacca*" means "there is *dukkha* (suffering) in this world, AND it can be eliminated" ; see, "[Does the First Noble Truth Describe only Suffering?](#)."

- As explained in that *sutta* with that phrase, the "three characteristics" of this world are interrelated. **Not only that, the key characteristic is "*anicca*," i.e., nothing in this world can be maintained to our satisfaction in the long run. The *sutta* says that *Dukkha* (suffering) arises BECAUSE of the *nicca saññā* we have for things that have *anicca* nature, and thus the third characteristic (*anatta*) becomes self-evident, i.e., one is truly helpless since one cannot get rid of *dukkha* (unless one gets rid of the *nicca saññā*).**

7. Thus *nicca* is a PERCEPTION in one's mind. Through endless rebirths we thought that we can achieve happiness by acquiring sense objects that provide us with sense pleasures. Thus we keep "craving for such objects", and believe that they will provide us with happiness; this is the **wrong perception** of *nicca*. **It is called the *nicca saññā*.**

- Thus the four stages of *Nibbāna* are attained when one develops the opposite *saññā*, i.e., ***anicca saññā*** in stages, and is complete only at the *Arahanthood*.
- If one did not crave for anything in this world, there is NOTHING in this world that one willingly binds to (*paṭicca* = "pati + "icca"). If we can stop this *paṭicca* process (or willingly bind to things in this world), then there will be no "*samuppāda* ("sama" + "uppada") or births corresponding such cravings. Thus according to *paṭicca samuppāda*, there will be no more rebirths; see, "[Paticca Samuppāda – "Pati+ichcha"+"Sama+uppāda."](#)" And that is *rāgakkhaya* or *Nibbāna*.

8. Therefore, now we have a possible way to prevent *dukkha* from arising: we need to remove all types of cravings for impermanent material objects from our MINDS.

- Of course that is easy to be said than done. We attach to things in this world because they provide tangible sense pleasures. No one can deny that, and it is very hard to resist many sense pleasures for which we have had attachments from beginningless time.
- Thus we have to do it in stages. No one (except a few who have developed required mindset over many past births) can do it quickly.
- The critical first step to *Nibbāna* is the *Sotāpanna* stage. And that is gained just by gaining the first understanding of *anicca*, *dukkha*, *anatta*.
- It is hard to believe, but an enormous fraction of our craving for worldly things will be removed at the *Sotāpanna* stage when the realization hits that certain immoral things are NOT WORTH doing for the sake of long-term benefit. That is something that will be ingrained in the mind and one does not need to think about it.

9. It is stated in the *Nakhasikha Sutta* (*Saṃyutta Nikāya* – 2, p. 212 of the Pāli/Sinhala *Tipiṭaka*) that the amount of defilements that a *Sotāpanna* has left to remove can be compared to the soil one can pick up on one's fingernail, if the amount of defilements a normal human has is comparable to the soil in the whole Earth; see, "[What is the only Akusala Removed by a Sotāpanna?](#)."

- A short but correct translation of the essence of the *sutta* is also available online:

[WebLink: ACCESSTOINSIGHT: Nakhasikha Sutta: The Tip of the Fingernail](#)

- Since such a large amount of defilements are removed just by getting rid of *micchā diṭṭhi*, it is CRITICAL to get rid of *micchā diṭṭhi* by comprehending *anicca*, *dukkha*, *anatta*. And the key to all three characteristics is to comprehend the "*anicca* nature" of this world. This is why I keep emphasizing this point at every opportunity.
- However, it is not possible to grasp the "*anicca* nature" until one has purified one's mind to some extent; see, "[Starting on the Path Even without Belief in Rebirth](#)" and other posts in the "[Living Dhamma](#)" section.

Also, see, "[Logical Proof that Impermanence is Incorrect Translation of Anicca.](#)"

9.1.3 Logical Proof that Impermanence is Incorrect Translation of Anicca

This post was written in response to a comment made by Mr. Alexander Ausweger, on the basis of which I slightly revised the post "[Anicca, Dukkha, Anatta – Wrong Interpretations](#)" to make it more precise. I would like to get feedback from anyone interested, especially those who are experts on mathematical logic.

1. Using mathematical logic, it is possible to point out the flaw in translating *anicca*, *dukkha*, *anatta* as impermanence, suffering, and no-self. It does not require advanced mathematical concepts, but basic logical structure that is explained in the following Wikipedia article:

[WebLink: WIKI: Tautology \(logic\)](#)

2. As explained in the post, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#),” in the *Ajjhattanica Sutta* in the *Samyutta Nikāya*, the Buddha stated that the three characteristics of “this world” are RELATED to each other:

“*yadaniccā tan dukkham, tan dukkham tadanatta*”

OR, (*anicca* → *dukkha*) and (*dukkha* → *anatta*)

Here, there are two logical statements, which can be written as (with incorrect translations with *anicca*, *dukkha*, *anatta* translated as impermanence, suffering, and no-self respectively):

(impermanence → suffering) and (suffering → no-self)

- There are an infinite physical things in this vast universe and ALL are impermanent. **But not all of them cause anyone’s suffering. One’s suffering is caused only by those things that one willingly attaches to with the *nicca saññā***, as we will see below.

3. First let us consider just the part: (impermanence → suffering)

When we use the **law of contraposition**,

$(A \rightarrow B) \Leftrightarrow (\neg B \rightarrow \neg A)$ (“if *A* implies *B*, then not-*B* implies not-*A*”),

we get:

no suffering → **permanence**, i.e., if one is not suffering that implies something (the object in question) is permanent.

- But we can take many examples where “not suffering” does not imply a permanency. For example, when we hear a death of a rival there is no suffering associated with that.
- In another example if we get rid of a non-curable disease, that is associated with no-suffering. Thus, in both examples, the “no-suffering” condition did not imply a “permanence”.

Therefore, the original statement, (impermanence → suffering) DOES NOT HOLD.

4. **Now let us look at another way to analyze.** Normally, the statement $A \rightarrow B$ **does not lead** to $\neg A \rightarrow \neg B$ (i.e., not $A \rightarrow$ not B does not automatically follow).

However, if *B* is dependent only on *A* and no other factor, then the statement $\neg A \rightarrow \neg B$ would be valid.

- For an example, (rain → wet street), does not automatically lead to (no rain → dry street), because the street could get wet due to a garden hose being left open.
- However, **if the only cause for wetness of the street is rain**, then (no rain → dry street) is CORRECT.

5. In the case of the three characteristics, the nature of this world is either *nicca* or *anicca*. There is no “in between”, i.e., it is either “*nicca*” or “*anicca*.”

The *nicca* or *anicca* nature can lead *dukkha*, *sukha*, AND also neutral feeling. Thus here we will consider just *dukkha* or “no-*dukkha*” for this analysis. Then, there is nothing in between those two.

The third characteristic is either “*atta*” or “*anatta*.”

Thus, for this proof, we CAN rewrite the original statement,

(anicca → dukkha) and *(dukkha → anatta)* as,

(nicca → no-dukkha) and *(no-dukkha → natta)*,

and those two statements are identical.

6. Therefore, if we translate *nicca* and *anicca* as permanent and impermanent, then the statement, (impermanence → suffering) also implies, (permanence → no-suffering), because in our premise that suffering depends only on whether something is permanent or impermanent.

- Thus, we have, for our particular case: (permanence → no-suffering)
- Therefore, in our special case for the three characteristics of nature, we have: (permanence → no-suffering) AND (no suffering → permanence).

In the mathematical language of logic, this is written as:

(no suffering iff permanence), i.e., (no suffering if and only if permanence)

This is a strong statement than the one in #3.

However, we have many instances of no-suffering without having permanency associated with, as we discussed in #3.

- Furthermore, This implies that one can never attain *Nibbāna* (no suffering), since there is nothing in this world that is permanent LONG TERM. This is yet another contradiction.

7. However, if we take the correct interpretation of *anicca* as “nothing can be maintained to one’s satisfaction in the long run”, then the above statement reads:

(no suffering) if and only if (everything can be maintained to our satisfaction in the long run).

- Since we know that “everything can be maintained to our satisfaction in the long run” is not correct, it is impossible to attain a state of “no suffering” as long as one is in this world, i.e., in the cycle of rebirths.
- We can analyze any situation and see that “nothing in this world can be maintained to one’s satisfaction in the long run”. Thus everything experienced in this world eventually lead to suffering. The only way to get rid of suffering is to realize this critical point; that realization itself leads to the end of suffering.
- Thus “*avijjā*” is nothing but not realizing this fundamental characteristic of nature.
- The realization of the truth of “*anicca* nature of this world” is beyond “just understanding”. The mind has to accept that without any doubt. One needs to analyze as many cases as one encounters in real life and convince oneself that this is the case. If you can think about an exception, please let me know.

8. Now we can also derive a similar strong relationship between *anicca* and *anatta* as between *anicca* and *dukkha* that we derived in #6 above. Here we use the principle of syllogism:

$$((A \rightarrow B) \wedge (B \rightarrow C)) \rightarrow (A \rightarrow C)$$

Thus the original relationship, *(anicca → dukkha)* and *(dukkha → anatta)* lead to:

anicca → anatta

- Now using the same derivation of #4 and #5, we get, *anatta → anicca*.

Thus we again have the strong statement,

- *anatta if and only if anicca*

That means *anatta* is inevitable if the nature (this world) is of *anicca* nature.

9. Now, again if we take the wrong translations of impermanence and no-self for *anicca* and *anatta* respectively, what we derived above means: whatever is impermanent does not have a “self”. This is a meaningless statement for inert objects in this world.

On the other hand, with the correct interpretations, it means:

Nothing in this world can be maintained to one’s satisfaction and therefore one is helpless in this world (i.e., will be subjected to suffering).

- However, that holds only as long as one TRYING TO maintain things to one’s satisfaction with the wrong perception that it is achievable. When one realizes the true nature, one will stop from attaching to things in this world, and eventually will not be born in this material world. The mind will be released from the “material base” that is the cause of our long-term suffering.
- Thus, the only way to get out of the “helplessness in this cycle of rebirths” is to get rid of the *nicca saññā* (the perception that one CAN maintain things to one’s satisfaction), and cultivate the *anicca saññā*, the correct perception about anything in this world. That is the way to *Nibbāna*, which it is attained via steps.

10. Thus, it is important to realize that the “loophole” that the Buddha discovered in order to gain release from the inevitable suffering in this world, is to comprehend its “*anicca nature*” and stop craving for worldly things that “seem to provide sense pleasures”.

- In other words, the solution is “to realize that seeking happiness in this world is not only unachievable, but it also leads to suffering”. One is subjected to suffering ONLY BECAUSE one is WILLINGLY ATTACHING to worldly things that are intrinsically not setup to provide happiness in the long run.
- This act of “willingly attaching to things in this world” is called “*paṭicca*” (“*pati*” means bonding and “*ichcha*” means with liking). And this of course leads to “*sama uppāda*” (“*sama*” means same or similar and “*uppāda*” means another existence in this world). This is the fundamental reason why we can never remove the suffering in this cycle of rebirths as long as we have “*avijjā*,” the principle of “*paṭicca samuppāda*”; see, “[Paṭicca Samuppāda – ‘Pati+ichcha’+‘Sama+uppāda.](#)”
- Thus now we can see why the *akusala-mūla paṭicca samuppāda* cycle starts with “*avijjā paccayā saṅkhāra*”: that is because we have the “*nicca saññā*,” the perception that we can maintain things to our satisfaction.

11. If the “*anicca nature of this world*” is a FACT, then the other two logically follow: **nothing in this world** can be logically expected to provide “no-suffering” (i.e., either happiness or neutral state of mind), and thus one is truly helpless (*anatta*) and is struggling to achieve something that logically impossible to achieve.

- The key point is that we normally ACT with “*nicca saññā*” or with the perception that we can maintain things to our satisfaction. **Thus we go against the nature** and will be subjected to suffering in the long run. This is a subtle point to contemplate and comprehend. The “*anicca nature*” will lead us to suffering ONLY IF we take the opposite view of “*nicca saññā*.”
- There are two things to sort out: *anicca nature* (of the world) and “*nicca saññā*” (in our MINDS). The way to be released from this world of *anicca nature* is to comprehend that (i.e., cultivate the *anicca saññā*) and thereby not attach (*paṭicca*) to things in this world.
- Of course it is not an easy task. The realization is achieved in stages. Even at the *Sotāpanna* stage one realizes this at a basic level.
- This is the basis of Buddha Dhamma, and that is explained via many different ways, *paṭicca samuppāda* being the key. The *akusala-mūla paṭicca samuppāda* cycle starts with “*avijjā paccayā (abhi) saṅkhāra*,” which arises due to the “*nicca saññā*,” and ends up with “*jara, maraṇa, soka, perideva, dukkha, domanassa.....*” We generate our own future suffering by doing *abhisāṅkhāra* (actions, speech, thoughts generated by greed, hate, and ignorance) due to our *nicca saññā*.

- This is also why we cannot get rid of greedy, hateful, and foolish thoughts until we comprehend the true *anicca* nature of this world and cultivate the *anicca saññā*. Such thoughts arise AUTOMATICALLY in a mind that has the *nicca saññā*.

9.1.4 “Self” and “no-self”: A Simple Analysis – Do We Always Act with Avijjā?

October 23, 2015; revised August 14, 2019

I like to address two comments that I recently received. Questions such as these bring out significant issues that help clarify fundamental concepts.

First comment (by Mr. Alexander Ausweger):

Premises:

- (1) The number of rebirths of a single sentient being before now is infinite.
- (2) The probability of becoming an *Arahant* in one life-phase (from birth to death) is minuscule but not zero. (The possible probability-values range from 0 to 1 as usual in probability theory).

Conclusion: In an infinite number of rebirths the probability to reach *Arahantship* would be one, which means that everyone would already have left *samsāra*.

Conclusion: Since we are still here, one of the premises must be wrong.

Second comment (by Mr. Chamila Wickramasinghe):

“...in *akusala-mūla Paṭicca Samuppāda*, since “*avijjā anusaya*” is remaining for a person below the *Arahant* stage, is there not a single “*citta-kshana*” (or *citta*) that arises without *avijjā*? ..”

There is a perception of well-defined “self” embedded in both the above comments. That there is “a well-defined sentient being” that goes through a cycle of rebirths. Since we use names to label a person, that automatically gives the impression of a non-changing “self.” Thus it is a bit hard to remove this “sense of a self” from our minds.

- The other side of this issue is the common misconception that “*anatta*” means “no-self”. That is correct in a strict sense. However, there is a sense of a “self” until one attains the *Arahant*hood. The other meaning of “*anatta*” is “being helpless” and “subject to suffering,” as long as one has the perception of a “self.”
- That is why the Buddha said it is wrong to believe that there is a “self,” and it is also incorrect to think that “there is no-self.” That is a bit difficult to comprehend first; **that is why the Buddha said, “My Dhamma has never been known to the world...”**. So we will discuss some examples to clarify why both these views are not correct.
